The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

NEW! RAICHE INCONTINENCE DRAIN*

RAICHE INCONTINENCE DRAIN

- (A) External Balloon Funnel
- (B) External Balloon
- (C) Bladder Balloon Funnel
- (D) Bladder or Internal Balloon
- (E) Hard Rubber Outlet Connector
- (F) Hard Rubber Cap

for female incontinence

The Raiche Drain is indwelling—with inflating balloons to assure internal and external seal of the female urethra—at the same time provide for excre-

tion of urine. Particularly adaptable for use by the non-ambulatory patient—especially helpful to spastics, paraplegics and hemiplegiacs.

How the Raiche Drain functions

- **Drain is inserted** through the urethra until the external (B) balloon is in contact with the external meatus. See diagram.
- **Bladder balloon (D)** inflates with approximately 20 c.c. of air or water. Catheter plug, to close off funnel, (C) is included.
- **Bladder balloon** is “seated” over internal urethral orifice by traction applied on the drain.
- **External balloon** is inflated with enough air to insure a seal over the external meatus. Funnel is sealed with plug or tied off. (A)
- **Can be used** for intermittent drainage or assembled to urinal reservoir for constant drainage.

*This is a professional appliance, and should be used only under the direction and instruction of a physician.
