The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

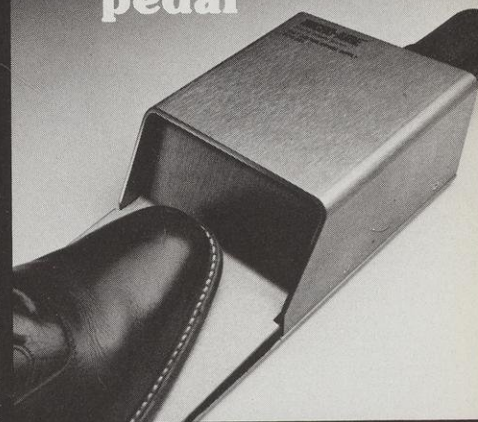

## 1. Plug it in

## 2. Connect the cord

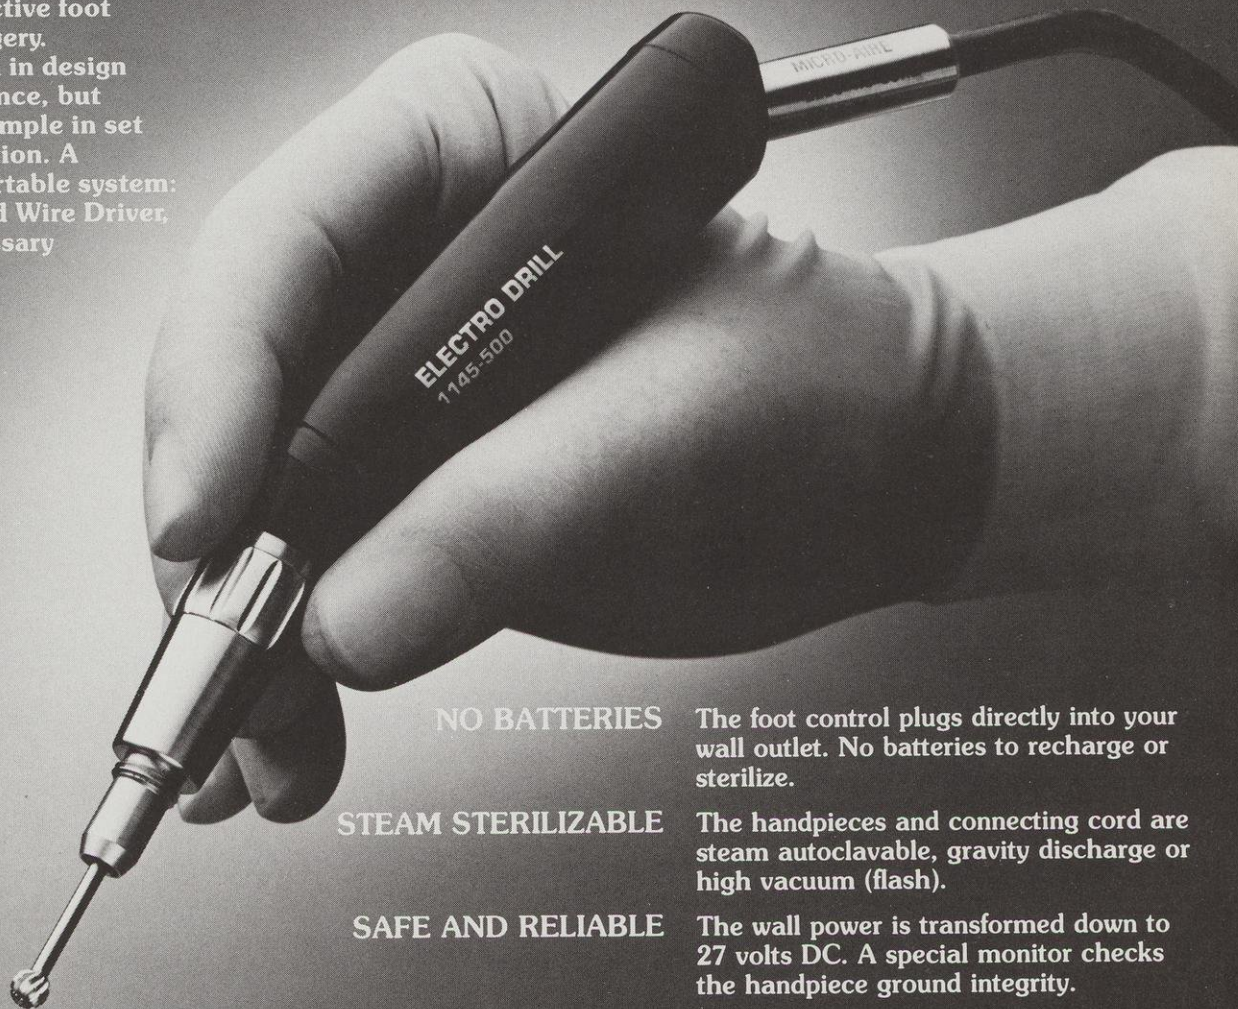

## 3. Push the pedal

# ...the Electro Surgery System

A new electrically powered precision instrument system for reconstructive foot and hand surgery. Sophisticated in design and performance, but remarkably simple in set up and operation. A complete, portable system: Drill, Saw and Wire Driver, with all necessary accessories.

### NO BATTERIES

The foot control plugs directly into your wall outlet. No batteries to recharge or sterilize.

### STEAM STERILIZABLE

The handpieces and connecting cord are steam autoclavable, gravity discharge or high vacuum (flash).

### SAFE AND RELIABLE

The wall power is transformed down to 27 volts DC. A special monitor checks the handpiece ground integrity.
