The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

MORE THAN MEETS THE EYE . . .

Physicians know that in every pint of blood lie vital hidden treasures.

The AMERICAN RED CROSS knows this, too. Through the Blood Program, licensed by the National Institutes of Health, it provides

- whole blood to hospitals served by the program
- blood for national emergencies
- blood derivatives to physicians and hospitals . . . serum albumin, gamma globulin, fibrinogen, fresh-frozen plasma and packed red cells
- crude fractions for research

Encourage donors to expand the availability of life's most precious fluid by giving blood wherever there are facilities for receiving it.
