We had breakfast on the 50th Century. We registered at the Biltmore Hotel on arriving in New York. We went over to the New York Stock Exchange and witnessed how the stocks are bought and sold. We had lunch with Mr. Walter Rosenthal at the Franconia Tavern. After lunch we went to the New York Aquarium and the Woolworth Tower. We

then went out to the middle of Brooklyn Bridge. After that we went shopping and got Tatiana a present from America. After supper we went and took a riverside bus and went way down the Drive. We then took a bus back to our hotel and went to bed.

DATE: June 22, 1929. Place: Aboard R. M. S. Samaria
Weather: Warm and Slightly foggy.

We boarded the ship at 10:30 and put our luggage in our cabin. We then went up on the boat deck and watched the boat pull out of its berth. We had lunch at 12:15 and then went and sat in our deck chairs. We lounged around most of the afternoon. We received lots of telegrams, flowers and letters. Calm and steady but quite a bit of vibration. The fog horn blew intermittently. We had supper at 6:30. After supper we went out on deck. We went to bed at 10:00. three hours. At 1:15 we went to the cinema
and saw the show "Viking" part of which we had
seen the day before. When the show was over we

walked back to Lansdowne. When we got to Lansdowne we met Miss Alison, Tatiana's governess, and Tatiana. We then went to Waterloo station and took a train to Southampton where a officer of the Selfridge yacht met us and took us in a car to the docks where a motor launch took us to the yacht which was anchored in Southampton water. There was a big party at Lansdowne that night so Cousins Serge and Rosalie, daddy and mother and Uncle Harry came down that night in the car. When we got on the yacht we were shown our cabins and supper was ordered. On our way to the yacht we saw the Olympic in the floating dry dock. We also saw the Mauretania and the Leviathan tied up to the near-by docks. The Olympic surly looked large when you could see all that was under water. Just before supper Captain Loyd showed us the engine room. We had supper at 8:30 and we went to bed at 9:30.

After breakfast we tried to fish but the tide was coming in to rapidly and it carried our lines way away from the boat and the spot at which we were trying to fish. After that we watched the sailors prepare the boat for a short voyage around the Isle of Wight. It was very calm on our trip down the Solent but when we reached and had rounded the "Needles", the Needles are a few thin needle like rocks forming a point on one corner of the Isle of Wight, we met a swell coming in from the open sea. We had lunch at 1:30. After lunch we played around on the bridge. The captain tried to teach me how to navigate a vessel while Chan played games with Tatiana. We got up after the servant had fixed our clothes and drawn our curtains as usual. We then went down and had our breakfast. After breakfast we went to the store and got some films. We then came back for lunch. After lunch we went to our rooms and played cards. At 3:30 we went up to Tatiana's room and had lemonade. We then took Tatiana to the Zoo. There we saw many interesting animals butterflies and insects. We also saw many kinds of snakes in a wonderful collection in one of the Houses. Also there were a lot of very large turtles and tortoises. We had a ride on an elephant. We also fed the elephants peanuts and raw potatoes. We also fed the many and gaudy colored parrots peanuts. We then came home and got ready for and had our supper. After supper we played around until it was time to go to bed.

We got up at the usual time and had breakfast. We played around until 11:00 and then we took the 11:00 train for Windsor Castle. We arrived at Windsor at 12:00. We then went straight to the castle when we got to the castle we began by looking at Prince Albert the Consorts Chapel. The chapel was very beautiful and we enjoyed it very much. After that we went through some small cloisters. And then we went through to the "one hundred steps" and from there we went into the Horseshoe Cloisters. We thought that they were very beautiful. They are shaped in the form of a horseshoe and are done in the old English wood and stucco type with carved wooden trimmings. These same cloisters sort of fitted around the end and main entrance to St. Georges chapel. The stucco was all pinkish and the entrances to the cloisters were the kind that go right through under the building. Also the buildings had spires and high gables. There was a covered walkaround the whole inside of the cloisters.

The man that was showing us around said that the boys after they were flogged picked up the little twigs that came loose during the flogging and wore them in their button holes. They also gave a little twig to each of their friends and their friends gave them one after they had been flogged. We were told that the boys used to be called up to the teachers desk and then led to the flogging place and flogged in public. The boys are now flogged in private. When they are flogged there is nothing between their backs and the birch. After seeing that we went to see the dining room in which the seventy highest classmen ate. This seventy eat and sleep right on the school grounds while the live in boarding houses not far from the school. We also saw where the graduates carved their initials. was quite novel. After looking around and buying a few papers we returned to the ~~yacht~~ yacht. Our impressions on walking through Deippe were that it had very narrow and dirty streets without sidewalks and the little cages out in the street with people eating at them. On getting on the yacht we had our lunch and then went and sat on the deck. While we were sitting watching a boat leaving the dock we saw a pigeon fall into the water. We did not pay much attention to this but we soon noticed that it was not able to get up out of the water. Cousin Jack went and got the dingy. Soon we saw him heading straight for the pigeon and the next thing we knew he had it and was returning. he brought it on board and we fed it some bread and gave it some water to drink. as usual. There was a difference however since dad and mother had breakfast with us also. After breakfast dad took us to see the change of the Guards at Buckingham Palace. It was quite crowded but we picked up a small boy that knew the ropes and he got us into the best position. We noted that the changing of the guards was quite a ceremony and I think there were more than just tourists there looking at the changing of the guards. Our boy then piloted us into the court of St. James palace where we saw them change the guards there. It was not as ceremonious as the operation at Buckingham Palace. We then returned for lunch and had it. After lunch we went on a search for coin shops. We were successful and bought several coins. We then returned home and had our supper. that had been recently erected to the Scotch

soldiers and sailors that died in the war
for their country. We then saw King David's
Tower which is all under ground. It had
been ruined in a war and all filled in for
the foundations of the Half Moon battery.
It had just recently been dug out or rather
~~hollowed out~~ hollowed out. It had been built
in the tenth century. After learning the mysteries
of the "Tower" we proceeded to Queen Mary's

It was raining quite hard so we (that is Chan and I who were without raincoats) thought that we had better get some rain coats before we did any more touring. We then hired a car and had the chauffer drive us over the King's Drive which is a very beautiful drive winding through up through some hills which compose the King's Park. From one of the higher hills we got a very beautiful view of the Firth of Forth and the city. We then returned to the city and looked around for a raincoat for me. We walked through the town of Stirling which is very old and whose streets are very narrow and dirty. The castle was in the oldest part of town as most the castles are and that part of town being the oldest was the dirtiest. On the way to the castle we stopped in at the Stirling Cathedral which is very old. It was quite pretty. We then went to the castle itself which was built in the 13th century. It is a very famous castle having once housed the government. We saw where the royal lions had been kept. We also saw the old House of Parliament and the royal Scottish palace. We were not able to go in either one as both are used as barracks and for that matter so is the whole castle. We went up on the castle walls from which we were able to see a great part of the country. We saw where the battle of Bannockburn took place, where the battle of Sheriff Muir took place, Wallace's monument and the River Tay. We got a late train back to Gleneagles and arrived just in

We played golf all morning. After lunch we hiked to a mear by mountain which we wished to climb. On our way to the mountain we saw a lot of rabbits sitting in a field near their holes. As we came nearer to them they all scuttled into their dens. At the foot of the mountain which went up at a very steep angle we paused to take a rest and get some pictures of some funny looking sheep that we saw. After a stiff climb we reached the top of the mountain from which we got an excellent view of the Scotch Highlands.. We took a few pictures of them while we were up there. On our way down we chased some more sheep in an effort to photograph them. We had great fun taking pictures of each other. These we took turned out to be very good and very funny as we had almost gotten directly on top of one another. We got home just in time for our supper.

Kingston we took the boat to Holyhead on
the Welsh coast. At Holyhead we took the
train to London. We arrived in London at
8:00 and went straight to our hotel.
The hotel was the Mayfair Hotel which is
next to Lansdowne House. After supper
we called on Cousin Gordon. We visited
with him a while and then he showed us his
automatic pistols that carries the records
itself.

the horse races began. We had fun betting
and watching but in the long run I lost \$4.00
and Horst lost \$1.40. We played Ping Pong
until dinner. After dinner we walked around
the dock 30 times. We figured this to be
about 2 miles.

While we were eating mother and dad came in and said there was an iceberg very near to the ship. We left our breakfast and hurried on deck. The iceberg was $\frac{1}{2}$ to $\frac{3}{4}$ of a mile away. It was quite large and in the shape of a cake. After gym while were on deck a steward pointed out to us another iceberg in the distance. After lunch we played tag on deck. In the afternoon we sighted land. In the afternoon there was a party for children. It was a lot of fun with blowing of horns and breaking of balloons. After dinner there was a concert.

We packed before breakfast. After breakfast we watched the boat approach Quebec. After the boat was docked we got off and took our luggage onto the train. Then we took a taxi to the Quebec Fortress. From here we got an excellent view of the St. Lawrence river and of Quebec. Then we came back to the docks and got on the special boat train to Chicago. After lunch I slept and Hobart went out on the observation. We stayed out on the observation the rest of the day.
