The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

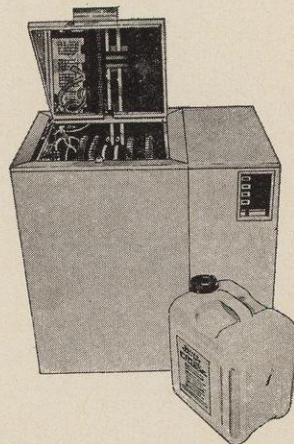

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

Anaesthetic routine.

Equipment not clean.

Problems

We must get a SCOTT CX500 automatic anaesthetic equipment decontamination system using CIDEX* Aqueous activated glutaraldehyde solution, to reduce the risk of Cross-infection. (saves time and money too)

The SCOTT CX500 automatically cleans and decontaminates three sets of anaesthetic equipment in 50 minutes. Cidex activated glutaraldehyde solution kills all pathogens: vegetable bacteria, tubercle bacillus, viruses, fungi—even the most resistant spores. Used together Scott/Cidex provides an easily operated system which saves time and eliminates cross-infection worries. For details, please contact the Information Officer, **ARBROOK** Division of Ethicon Limited, Bankhead Ave, Edinburgh EH114HE.
