The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

*New!*

The *Direct-Writing* **Cardiotron**  
produces an absolutely **Permanent Standard Recording of**  
**HEART ACTION THE INSTANT IT OCCURS!**

Without any sacrifice in accuracy or dependability, CARDIOTRON produces an electrocardiographic record impervious to heat and time—a record which cannot be scratched or marred by rough handling and which will retain its original form after years of storage.

No ink is used, no processing or developing is necessary either before or after taking the graph. The CARDIOTRON operates from regular A. C. lines, with no batteries of any kind required, and will operate on D. C. lines through the use of a special lightweight converter which is available.

Deliveries of the CARDIOTRON are proceeding as rapidly as current material shortages will permit, with several hundreds of the instruments now in use throughout the country.

Write for 12 page booklet containing graphic evidence of the accuracy of this most modern development in electrocardiography.

See your **CARDIOTRON Dealer**  
now for demonstration!
