1049

MINUTES OF THE REGULAR MEETING
of the
BOARD OF REGENTS OF THE UNIVERSITY OF WISCONSIN SYSTEM

Madison, Wisconsin

Held in the Clarke Smith Room, 1820 Van Hise Hall
Friday, November 19, 1976
9:11 A.M.

President McNamara presiding

PRESENT: Regents DeBardleben, Erdman, Fish, Gerrard, Grover, Hales, Johnson,
Lavine, Lawton, McNamara, Neshek, Pelisek, Sandin, Thompson

ABSENT: Regents Barkla and Walter

Upon motion by Regent Lavine, seconded by Regent Sandin, it was
VOTED, That the minutes of the Meeting of the Board of Regents of the
University of Wisconsin System held on October 15, 1976, be approved as sent out
to the Regents.

Vice President Neshek assumed the Chair.

President McNamara moved adoption of the following resolution, the motion
was seconded by Regent Johnson, and it was voted:

Resolution 1340: WHEREAS, John M. Zancanaro of Milwaukee was the first president
of the Vocational, Technical and Adult Education Board to serve
simultaneously as a member of the Board of Regents of the Uni-
versity of Wisconsin System, from the organizational meeting of
this Board on October 19, 1971, until his death on November 9,
1976, and

WHEREAS, during that period the University System and the VTAE
System established more mutually productive accommodations in
programming and planning than in all the years that preceded
establishment of a single University System in 1971, and

WHEREAS, John Zancanaro earned the respect, admiration and
affection of his fellow Regents for his lifelong and enlightened
leadership in the labor movement, for his understanding of public
and private higher education governance, for his refreshing wit
and candor, and for his courage in continuing important volunteer
responsibilities to age 69, despite serious illness,

BE IT RESOLVED, That this Board acknowledges and attests to the
dedicated and unselfish services of John M. Zancanaro to his
fellow citizens of Milwaukee and Wisconsin and expresses heartfelt
condolences to his wife Evelyn, and to their 10 children and 29
grandchildren.

President McNamara resumed the Chair.

The members of the Board, and others present, observed a moment of silence in memory of Regent Zancanaro.

- - -

REPORT OF THE PRESIDENT OF THE BOARD

President McNamara introduced Regent Zancanaro's successor, the Vice President of the Vocational, Technical and Adult Education Board, C. Philip Johnson, Darien, Wisconsin.

-

President McNamara called upon Regent DeBardleben for the report of the Higher Educational Aids Board meeting held on November 5, 1976. Regent DeBardleben referred to the report on the matter dated November 9, 1976 (attached as EXHIBIT A), and stated that he would respond to any questions.

-

President McNamara called upon Regent Lavine for a report on a Group Conference on a Regional Approach to Higher Education, at which he represented the Governor and the University. Regent Lavine reported the general result of the meeting was that there seemed to be no one in most states to contact to find out what is going on and from whom to get answers to specific questions. He reported there was some discussion of developing Midwest-wide resource sharing, for example, an inventory of all courses available in the various systems. He stated that it was the conclusion of the group that there is no need for further meetings.

-

President McNamara reported that the Association of Governing Boards of Universities and Colleges is embarking on a project for governing boards relating to self-assessment programs and has asked the University of Wisconsin Board to be one of three boards to serve as test stations to ascertain whether the project is worthwhile before proceeding further. Regent DeBardleben asked if it is contemplated that some of these evaluations would be completed by a representative cross section of faculty members, and was advised in the negative. He stated it is somewhat like asking someone to evaluate himself and that he did not feel it would be very objective. Regent Erdman observed that she had read a number of the AGB booklets and articles and that it appeared to her they have more words than they need on the subject and this is just compounding what we all know. She continued that it is a lovely project to keep people busy, but is totally unneeded.

Regent Lavine moved that the University of Wisconsin Board participate in the project, the motion was seconded by Regent Sandin, and it was voted, with Regent DeBardleben voting "No".

-

President McNamara called upon Elizabeth Wright, President of the United Council of Student Governments, for the purpose of making a presentation relative to the Student Association of UW-Milwaukee vs. Chancellor Baum--Implementation of Wis. Stats. 36.09(5). President Wright made the following statement:

"I suspect that there is no great desire for you to address the topic which I bring before you today. You have rejected similar appeals as recently as June 1975. Yet I feel the situation has changed (and has not progressed sufficiently), so that you should consider this problem now. I am referring to the implementation of the student rights and responsibilities section of the University System Statute, 36.09(5).

"As you know, the Wisconsin Supreme Court recently ruled on a case filed by UW students which sought, and to my mind, achieved some clarification of the final sentence of that section. That is: 'The students of each institution or campus shall have the right to organize themselves in a manner they determine and to select their representatives to participate in institutional governance.' The sentence seems to be the least ambiguous in the section--and perhaps the most easily carried out. Unfortunately, there have been and there continue to be problems. There are many instances within the System where the students are not choosing their representatives--other members of the university community are... exercising the right for us.

"I have been accused of being biased in my interpretation of this decision because I was a plaintiff and supposedly a winner. Therefore I put this question to you--perhaps an impartial panel of justices--the elusive answer to which we sought before the Supreme Court: When is a chancellor (faculty or academic staff), a student under 36.09(5)? And if your answer to that is: 'It isn't likely that he would be construed as such,' then how, in the presence of the final sentence of 36.09(5) which says that students shall choose representatives, how, by what logic and under what ruling, can the Chancellor request (4) nominations from students for (2) positions on a given committee? Perhaps too simply stated, this was the primary issue addressed in the suit that was filed two years ago--that students and only students have the power to select their representatives to participate in university governance.

"Now that the section of the statute has been judicially clarified, we begin the arduous process of elucidating the clarification. I foresee the intuitive reaction of the Board being delegation of the responsibility to work out any difficulties that exist to the several institutions. I have been forewarned by my predecessors, 'If I wanted to get where you want to go, I wouldn't start from here'. The campuses could spend another year--or more interpreting, construing, and in fact obfuscating the Supreme Court decision. I believe proper action should be taken now at the Central level.

"The campuses are following the lead of Central Administration and Assistant Attorney General Dalton in reacting to the Supreme Court decision. The winners of the case--the students--are in the precarious position of having the decision of the Court interpreted and administered by those who have demonstrated some reluctance to implement the section fully in the two years it has been on the books.

"The Board of Regents is charged with enforcing the University System rules and regulations as set forth in the Administrative Code and the State Law. There are violations of Chapter 36, and I expect that you will take some action in the near future to bring the campuses within that law.

"Recognizing that some of you may not have had the chance to read the decision, I encourage you to do so and am willing to discuss it with you. Some of the wording is unclear. The basic intent is clear, and we anticipate cooperation from each campus after some initial clarification. I have distributed to you a letter to the System Legal Counsel which expands on what I have said here."

President McNamara suggested that the Board refer the matter to the Council of Chancellors for its reaction and then the Board would proceed to discuss the comments above and the Chancellors' and Administrative Officers' judgments of the various campuses. Regent DeBardeleben stated that he felt it is important to define what we are referring to the Chancellors, that is, what are they being asked to do -- are they going to be asked to review campus regulations, are they going to be asked to review the rules that are adopted by this Board which are possibly affected by the decision for the purpose of bringing in a recommendation as to what amendments should be made in the regulations. He continued that he felt they should be given a very specific charge rather than merely being asked to generally discuss the matter and come up with their views on it. He stated that he felt we have to comply with the findings and it seemed to him it is a question of determining in what way -- what steps we must take in order to comply. President McNamara stated he felt there are two problems involved, one a purely legal matter, and the other a matter of equity as to how we organize the University, the role students play and how they play that role; so it goes beyond the court decision. Therefore, our response should not be a simple legal response; it should be a broader response, and that is why he felt it ought to be referred initially to the Chancellors for their response and then to Central Administration, and our legal department, so that we have the benefit of all these points of view. Regent Neshek stated that he felt we should give the Chancellors the benefit of the doubt by having one of the Assistant Attorneys General review the recommendation to ensure that it complies with the court decision. He stated we should not be in a position of trying to pass some type of revised rules in order to try to get around the decision, as the decision has been rendered and this Board accepts the responsibility to see that it is carried out.

- - -

REPORT OF THE PRESIDENT OF THE SYSTEM

President Weaver introduced Professor Joseph O. Hirschfelder, University of Wisconsin-Madison, a recent recipient of the country's highest honor, the National Medal of Science. Professor Hirschfelder made the following statement:

"I want to thank you ever so much for inviting me here. This National Medal of Science is in a very real sense a tribute to the help and opportunities which I have received from the faculty, administration, and Regents of the University. The University of Wisconsin is a great institution and has the capabilities of being even greater!

"For the past thirty-nine years I have tried to develop the teaching and research in Theoretical Chemistry at Madison. Theoretical chemistry applies theoretical physics to molecular problems and plays the role of middle-man between the theoretical physicists and the chemists and chemical engineers--indeed, theoretical chemistry is useful for anyone seeking to understand the macroscopic chemical or physical properties of materials in terms of the behavior of the individual molecules. The Madison Campus is an excellent place to carry out interdisciplinary research from the following standpoints:

"First: I know of no university which has closer or more friendly relations between members of different departments than Madison--if we want to know something, we get on the telephone.

"Second: We can always count on Chancellor Ed Young, Vice Chancellor Borchers, Dean Bob Bock and his Graduate School staff, Dean Cronin and his Letters and Science college staff, and the business administrators to listen sympathetically to our problems and give us a helping hand.

"And Third: The Wisconsin Alumni Research Foundation is doing a marvelous job of providing research funds to the University.

"However, I would like you to consider the following difficulties about carrying out research on the Madison Campus:

"There is not enough flexible research money currently available to fill the needs of all of the various research activities on the campus. I am using the term 'flexible research money' in the sense of auxiliary funding which is required in order to seed the early stages of a research project; and later, to provide the University's contribution to the maintenance of either federally or privately supported research projects. The Wisconsin Alumni Research Foundation grants have been very useful in this connection, but additional funds are required. As you know, the overhead which the University of Wisconsin collects from federal and private research grants and contracts is intended to serve this purpose. Instead, the University of Wisconsin is using the overhead from research grants to finance a variety of university functions not necessarily connected with research. During the past fifteen years my own Theoretical Chemistry Institute has brought nearly one-and-a-half million dollars into the State Treasury in the form of overhead and from this overhead we have received very little benefit.

"And Second: The other problem which I want to call to your attention is the need for Research Professors who are not necessarily members of any single department. In making an appointment, departments seek those people who will make the greatest contributions to their teaching needs and make significant research contributions in areas of greatest interest to that department. Thus, it is very difficult to obtain a professorship for anyone who is working along interdisciplinary lines. For example, right after World War II, the Navy built a small laboratory for me and gave us very generous financial support to study the molecular properties of gases and liquids, the theory of flames, and the chemical and physical effects of ultrasonics. I built up an excellent group in which the experimental work was directed by a brilliant young physical chemist. Since his research was along interdisciplinary lines, I could not persuade the Chemistry Department to recommend him for an Assistant Professorship and thus, I was compelled to disband the experimental part of our research and give away hundreds of thousands of dollars worth of experimental equipment. Later, in 1962, NASA provided generous financial support for our Theoretical Chemistry Institute. We had high hopes for carrying out a variety of interdisciplinary research activities. However, because there was no possibility of making research professorship appointments, most of our plans for interdisciplinary research had to be abandoned.

"I would like to propose for your consideration the following solution: In the College of Engineering, there exists the Engineering Experiment Station which has been set up to encourage interdisciplinary research. The Engineering Experiment Station is provided with some (but probably not enough) flexible research funds and from time to time they have been able to make Research Professorship appointments. Thus, I propose that the Experiment Station concept be broadened to include all of the Colleges in the Madison Campus. This Campus-wide Experiment Station should be empowered to recommend a small number of Research Professorships and be provided with flexible research funding obtained from research overhead funds. With such a Campus-wide Experiment Station, I am sure that our great University would become even greater!"

Chancellor Edwin Young noted that the indirect cost problem is very serious for all universities. He pointed out the money is allocated for the costs of heat light, building, secretarial support, and the State of Wisconsin deducts it from our budget, we cannot do with it as we wish. He pointed out a subcommittee of the

house has taken a very strong position that the indirect costs of the university should be further reduced and we have no right to expect to cover all of our costs. He continued the battle is going on now and we may have to come back to the Board to ask for some support in this whole matter.

Regent DeBardleben moved adoption of the following resolution, the motion was seconded by Regent Sandin, and it was voted:

Resolution 1341: That the Report of Non-Personnel Actions by Administrative Officers to the Board of Regents and Informational Items Reported for the Regent Record be received for the record; and that actions included in the report be approved, ratified, and confirmed. (EXHIBIT B, attached)

At the request of President Weaver, Chancellor James Connor, UW-Whitewater, made the following report on the status of the program objectives on the White-water campus:

"What the campus has done over the past three years is to establish program objectives for each of those years. Sometimes we meet those objectives and sometimes we don't. We had established a list of some twenty program objectives for the 1976-77 academic year. I will just go over a half dozen or so of these so that you can see how the campus is moving in identifying objectives, and then you can judge how well we have done the job, once the exercise is completed.

"In the accreditation of academic programs, we have two objectives: First to initiate appropriate action relating to the recommendations of North Central Association, NCATE, and DPI, and a second objective is to continue to pursue adequate resources for basic planning and program development to meet standards for accreditation for the Master of Business Administration degree by the American Assembly of Collegiate Schools of Business in the College of Business and Economics.

"Another objective relates to liaison between academic departments and learning resources, which is the title today for the University library. It has been traditional, I guess, that faculty have served on library committees of one sort or another: planning, book purchases, periodical selection, etc. We are trying to reverse that process this year, and we are designating a liaison person from the learning resources staff to work directly with academic departments in discerning their needs in terms of purchases, personnel, library hours, etc.

"A further objective has to do with the development of the Computing Services capability which will better serve the University of Wisconsin-Whitewater. We are well into the system of developing a master data base for students and faculty, and we expect to continue, and perhaps conclude, that particular exercise in the computer center. Secondly, since money is of utmost importance and the accountability for such funds is absolutely necessary, we wish to expand the accounts receivable system to a total revenue system for general institutional reporting and accounting purposes.

"Another objective has to do with the operation of our physical plant. I mentioned in the report that as of July 1, 1976, we centralized our maintenance system in order to provide greater efficiency and economy, and our objective in continuing the centralized program, which I think Ody Fish's committee heard in some detail yesterday, is to effect a savings in energy through more effective

monitoring of uses of electric lights, gas dryers, automotive fuels, in addition to fuels that supply heat. A second part of that objective is to install energy utilization monitors in all auxiliary-supported facilities in order to more effectively charge back for energy utilization. You may recall, I think a month ago, you approved a program that would provide energy monitoring equipment on our campus.

"I noted that one of the special missions of the UW-Whitewater is to serve the needs of the physically handicapped. I think we have perhaps as much experience in this area as any other campus in the System, and we have three objectives in this particular area: to renovate and remodel buildings to make them accessible to severely physically handicapped students, to implement physical therapy programs for the more severely disabled students, and to increase the scope and content of services to disabled students.

"In the counseling area we have identified other objectives: One, to increase the enrollment and retention of minority and educationally disadvantaged students, and then to develop and implement a program for counseling staff as well. As you know, the Regents currently have underway a study of student residence hall living. We have one of our faculty on that particular committee. We are now waiting until the outcome of that particular study. We have an objective to provide an educational and social environment in which University students can easily live and learn, and we would accomplish this primarily by increasing student involvement in planning and programming educational and cultural activities in the halls. We also want to increase the housing staff involvement in planning student residence programs and personnel education and development. I think there is a two-way street here. The student is assisting in devising his own environment and then the University is becoming involved in making sure that those environments are effective.

"These are about a half dozen or so of the basic goals that have been established for next year. In some cases they will be met; in other cases they will not be met. At least we are going to do the best we can to implement these goals and objectives to make the campus at the University of Wisconsin-Whitewater a better place in terms of providing educational services for the Southeastern portion of the State."

President Weaver called upon Chancellor Lee Dreyfus, UW-Stevens Point, for the report of the Council of Chancellors. Chancellor Dreyfus reported that the Council unanimously approved a resolution of sympathy to Chancellor Fort upon the death of his father, and considered the report of a subcommittee relative to the use of University facilities for religious services, etc. He noted a recommended policy had been approved and forwarded to President Weaver for his consideration.

Regent DeBardeleben stated that he felt it proper that the matter be deferred until it can come before us on proper notice as it is an important policy that affects the whole system. He continued that when the matter does come before the Board, we should have a presentation on the extent to which students are being asked on a voluntary basis or otherwise, to indicate on application forms their religious preference. He stated he was shocked to find this was going on and felt that the Board should know about it and consider it -- that it should come to us with a recommendation from Central Administration. President Weaver assured the members of the Board that the matter will be brought to the Board, probably through the Education Committee.

President McNamara noted that Regent Walter had requested that the report of the Residence Halls Review Panel, scheduled for the December meeting, be deferred to a later date.

- - -

REPORT OF THE SECRETARY

The Secretary reminded the Regents that the next meeting is to be held in Milwaukee and hotel reservations should be made in advance. It was agreed that the meeting schedule for 1977-78 would be considered at the December meeting.

- - -

D. REPORT OF THE EDUCATION COMMITTEE

The report of the Education Committee was presented by Regent Lavine.

Regent Lavine reported that in the Committee meeting on the previous day there had been a presentation by the UW System Latin American Studies Center. Professor Edward Mulvihill, UW-Madison, coordinator of the UW System Latin American Studies Center introduced Professor Michael G. Riley, UW-Milwaukee, who delivered prepared remarks dealing with the history of events relating to the establishment of the Center in 1973, and its present structure and organization. Professor William Denevan, UW-Madison, discussed the Center with particular reference to Madison Campus. Professor Donald Shea, UW-Milwaukee, discussed the outreach activities including the design and implementation of an interdisciplinary interinstitutional course in Latin American Studies, soon to be offered simultaneously on the Eau Claire, Milwaukee, and Stevens Point Campuses.

-

Regent Lavine reported there had also been a special presentation on Women's Studies Library Projects and Annual Report on Women's Studies. Dr. Karen Merritt, Central Administration Academic Planner, Professor Dorothy Schultz, Director College Library, UW-Madison, and Ms. Miriam Allman, Acquisitionist Librarian, Medical Library, UW-Madison, described ways in which libraries and librarians contribute to Women's Studies programming.

-

Regent Lavine reported the Committee had received a report on the UW System and Department of Public Instruction Cooperative Study of Teacher Education and Other Education Professions Programs in the UW System. He reported Senior Vice President Donald Smith described the transition from a long period of public school teacher undersupply to the present condition of the generally adequate or in some cases, oversupply. He stated Dr. Smith noted that UW System teacher preparation had adjusted, at least in part, to the declining teacher employment market, with some 2,000 fewer students per year completing teacher education than was the case in this system four years ago. Regent Lavine stated Dr. Smith said it seems appropriate at this time to undertake a broad review of the education professions through a task force described in the prospectus for the study of teacher education, which had been forwarded to the Regents. The prospectus proposes a study undertaken jointly with the Department of Public Instruction, the agency which licenses teachers and is constitutionally responsible for public elementary and secondary education. Regent Lavine said

Regent Barbara Thompson, State Superintendent of Public Instruction, took this occasion to address the Committee on previous cooperative relationships between the DPI and the UW System. He reported in the course of her remarks Regent Thompson commented on understandings of pre-college education which it would be desirable to seek in the selection of the next UW System President. She spoke of Wisconsin's long tradition of local control of schools, indicating that "We in Wisconsin" will do everything possible to maintain that tradition. She also presented statistics indicating relatively superior performance by Wisconsin children and youth when compared to national norms. Regent Lavine stated that Regent DeBardeleben observed that the latter remarks made by Regent Thompson having to do with qualities to be sought in the System President, the proposition that local control is something Wisconsin citizens want and the performance of students relative to national norms were not in keeping with the topic: UW System-DPI cooperative activity.

Regent Lavine stated the study will be ongoing and will be brought back to the Board at some future time. Regent Erdman expressed the hope that liberal arts lay persons, students, etc., could be well-represented on the committee.

Regent Lavine reported the committee next received a report of the Senior Vice President for Academic Affairs. He stated Senior Vice President Donald Smith presented a study of student flow in the UW System which is to be circulated to the institutions for comment. In response to Regent Erdman's question, Vice President Smith stated the study refers to the study of students in and out of our institutions and that we need more information on the phenomenon of the student who interrupts his educational program, which is an increasing phenomenon. He continued that we know there is an enormous volume of transfer but we know very little about the structure of that transfer volume. He said we want to gather the information in a way that the institutions agree will be of maximum help for their purposes and not create an over burden of research.

Regent Lavine noted that our study of minority students in the System indicated that not just minority students, but all students appear to be spending five years to get their degree, often because students either drop out for work experience related to their academic education, to replenish their finances, or for other reasons.

Regent Lavine reported Vice President Smith also reviewed responses to the Governor's policy issues relative to (a) Drop/Add Procedures and Effect in the UW System and (b) Student Admission Procedures in the UW System.

Regent Lavine moved adoption of the following resolution, and the motion seconded by Regent Sandin:

Resolution 1342: That the Regents endorse the following Central Administration recommendations on ISSUE ANALYSIS SPECIFICATIONS titled, "Should changes be made in the admissions procedures of the University of Wisconsin System?":

1. That the System continue current admissions procedures, with full reliance on established avenues of intra-System cooperation and improved exchange of information, for Spring, 1977, and Fall, 1977, admissions decisions.

(Continued)

2. That the question of additional guidelines designed to improve future System admissions procedures be referred to the Study Group on Admissions Procedures. Any recommendations for change in procedures flowing from this study would, if approved by the appropriate reviewing agencies, become effective not earlier than Fall 1978, since at least one year lead time is required to inform prospective students and their counselors effectively about such changes.

Regent Erdman referred to the paper relative to the Drop/Add Procedures and Effect in the UW System, stating that she was very disappointed in this paper because there were no specifics, there was no discussion on causes and no discussion on the facts. She pointed out that it was stated there was no financial involvement, but that she felt finances are an integral part of drop/add. She noted that tuition and fees are set uniformly, professors' salaries are set uniformly, and inquired why students shouldn't have a certain uniform obligation. Senior Vice President Smith responded that drop/add policies are a function of faculty and do have relationship to the faculty's functions. He said he could not conceive of the faculty at an urban university, such as Milwaukee, and the faculty at a primarily resident university being likely to adopt precisely the same drop/add policy and procedure. He continued they have very different constituencies to work with and different relationships with those students. He said what we are trying to say in the paper is that the question of fiscal impact had to be set aside. He stated we have undertaken some revisions as a matter of educational policy because some of the faculties believe they have gone too far in the permissiveness of their drop policy and they have taken action to change those policies as they calculate what they believe to be overly-generous procedures are not effective.

Regent DeBardleben noted that this subject was discussed in the Committee meeting on the previous day, the concern of the Committee members being that the proposed resolution not be construed as abrogating or diminishing the right of the faculty to have a dominant voice in the establishment of admission policies, because this was a tradition considered to be an educational matter.

After further discussion, the question was put on Resolution 1342, and it was voted.

Regent Lavine reported that the Committee next considered Planning Guidelines for Undergraduate Computer Science and Related Programs in the UW System. It is expected that the planning guidelines will be used in making staff recommendations on institutional requests for entitlements to plan in computer science systems. The guidelines were prepared by a System study group and are being reported to the Regents as information pertinent to the consideration of new undergraduate planning entitlements in computer science.

Regent Lavine reported that Senior Vice President Donald Smith presented the names of faculty selected by their colleagues to be the first participants in the UW System's faculty sabbatical program, as follows:

Kenneth A. Connors, Professor, **Pharmacy**, UW-Madison
 Daniel F. Doeppers, Associate Professor, Geography, UW-Madison
 Gareth W. Dunleavy, Professor, **English**, UW-Milwaukee
 Luc A. Leplae, Associate Professor, **Physics**, UW-Milwaukee
 Michael J. O'Brien, Assistant Professor, **History**, Center System-Fox Valley
 Robert B. Wenger, Associate Professor, **Science & Environmental Change**,
 UW-Green Bay
 Kenneth J. Grieb, Professor, **History & International Studies**, UW-Oshkosh
 Edward N. Peterson, Professor, **History**, UW-River Falls
 Robert G. Rossmiller, Professor, **Education**, UW-Stevens Point
 Agate N. Krouse, Associate Professor, **English**, UW-Whitewater

Regent Lavine moved adoption of the following resolution, and the motion was seconded by Regent DeBardeleben:

Resolution 1343: **That, upon recommendation of the President of the (Policy-New) UW System and the Chancellor of the UW Center System, the document entitled "Policies and Procedures Concerning All Faculty Outside Activities", a provision required under UWS 2.02, be approved.**

Regent Lawton inquired if this differs significantly from other System policy and was advised that the Board has approved general guidelines within which each institution of the System must implement its guidelines. When they carry forward that implementation, they bring it back for Central Administration to check to be certain that it fits within our guidelines and does not deviate from them.

The question was put on Resolution 1343, and it was voted.

Regent Lavine moved adoption of the following resolution, the motion was seconded by Regent DeBardeleben, and it was voted:

Resolution 1344: **That, upon recommendation of the President of the UW System (Policy-Revised) and the Chancellor of UW-Parkside, amendments to the UW-Parkside faculty personnel policies and procedures approved by the UW-Parkside Faculty Senate between September 1, 1975 and September 28, 1976, be approved; such amendments relating to the following sections of the UW-Parkside faculty personnel policies and procedures: UWP 41.05, 41.12, 46.01, 46.05, 46.06, 46.12, 46.08(4), 46.03, 46.04, 46.041, and 46.042.**

Regent Lavine moved adoption of Resolution 1345 relating to approval of programs for inclusion in the Entitlements to Plan of the appropriate institutions, (attached as EXHIBIT C), and the motion was seconded by Regent Pelisek.

Regent Lawton noted that we have no report or summary of the requests that were turned down in the budgetary process and stated that he felt this information should be available. Regent Lavine stated that fifty or sixty programs were received by Central Administration but only eight programs were approved for entitle-

ments to plan. Vice President Smith pointed out that most requests for entitlement to plan do not clear the campus level and that of the number that are brought to Central Administration, most of them do not clear that level except after a long process or considerable negotiation. He continued that one of the reasons we don't bring a list of the entitlements to plan not brought forward to the Board is that very often we refuse the request for entitlement to plan on the grounds that we think there is a whole host of unanswered questions about such factors as relationship to mission, preliminary estimate of need relationship to other planning studies going on, etc. He stated he would rather leave such entitlements to plan at the negotiation level, and it is not a final action in any sense. Regent DeBardeleben stated this cuts off what may be a faculty request for consideration of some program and they are not going to get a further chance to be heard. Senior Vice President Smith stated that that is not quite the case as one of our procedures is that if we state we will not recommend an entitlement to plan for a particular program, the campus has the option, if it chooses, to bring the program forward to the Board. It will come forward with campus endorsement and with our disapproval. So far no one has exercised that option. Regent DeBardeleben inquired if the Chancellors know about this option and was advised by Vice President Smith that they have known but thus far it has appeared that we have a better chance with the Board if both parties are on the same side of the fence. Regent Lavine suggested that three categories be created--one for those that receive entitlements, one for those being negotiated, and a third category for those that were turned down.

The question was put on Resolution 1345, and it was voted.

Regent Lavine moved adoption of the following resolution, the motion was seconded by Regent DeBardeleben, and it was voted:

Resolution 1346: **That, upon recommendation of the President of the UW System and the Chancellor of UW-Madison, the status of Walter Rudin, the Albert C. Schaeffer Professor of Mathematics, College of Letters and Science, UW-Madison, be changed to Vilas Research Professor of Mathematics, College of Letters and Science, UW-Madison, on a permanent basis, beginning with the second semester of the 1976-77 academic year, salary as shown in the 1976-77 budget, with \$5,000 chargeable to the funds of the William F. Vilas Trust Estate for his salary and \$2,500 for an auxiliary allowance for the 1976-77 academic year; and in ensuing years, \$10,000 chargeable to the William F. Vilas Trust Estate for his salary, plus an appropriate auxiliary allowance.**

E. REPORT OF THE BUSINESS AND FINANCE COMMITTEE

The report of the Business and Finance Committee was presented by Regent Hales.

Regent reported that the gifts, grants and government contracts were reviewed by Vice President Lorenz, who called attention to thirty-nine National Institutes of Health grants totaling \$3,852,000, one of which for the support of cancer research at McArdle Laboratory was in the amount of \$3,086,000, an increase of \$130,000 over last year's grant. Attention was also called to six grants from the Energy Research and Development Agency totaling \$1,060,000. Regent Hales noted that in light of the discussion that occurred yesterday in the Physical

Planning and Development Committee about what we are doing in energy research, it might be appropriate that Central Administration give the Business and Finance Committee some information as to what is happening in this particular budget in the area of energy conservation. Regent Hales stated that the receipts to date of \$97.4 million exceed the 1975 total of \$89.7 million. The total does not reflect an additional grant to the Madison Campus in the amount of \$1,200,000 representing financial support to the UW-Madison College of Engineering to provide academic linkage services for Surabaya Institute of Technology in the Republic of Indonesia.

Regent Hales moved adoption of the following resolution, the motion was seconded by Regent Erdman, and it was voted:

Resolution 1347: That, upon recommendation of the President of the System, the gifts, grants and contracts presented at this meeting (copy filed with the papers of this meeting) be accepted, approved, ratified and confirmed; and that, where signature authority has not been previously delegated, appropriate officers be authorized to sign agreements.

Regent Hales reported that the Committee received the following informational reports by Vice President and Controller Reuben Lorenz:

- (1) Summary of earnings from the Auxiliary Surplus Cash Fund for the period July 1, 1975, through June 30, 1976
- (2) Projected fiscal year 1976-77 summary report on general program operations
- (3) Report on billing and collection of student loans

- - -

REPORT OF THE PHYSICAL PLANNING AND DEVELOPMENT COMMITTEE

The report of the Physical Planning and Development Committee was presented by Regent Fish.

Regent Fish noted that all Regents had been invited to attend the Committee meeting on the previous day, to participate in the discussion and vote on the Capital Budget items. Regent Fish noted that the Waukesha County Board has approved \$45,000 for advance planning of an addition to the existing facility to handle the present overflow of students, and not to accommodate additional students. Included in the 1977-79 University System Capital Budget is an item of \$350,000 for movable equipment for expansion of the UW-Center-Waukesha County. He reported that there was considerable discussion in the Committee regarding the impact any action by the Regents might have on the development of this type of expansion in the Center System. There was general concern that any Regent action might be interpreted as either approving or disapproving proposed expansion of the Waukesha facility. He noted that expansion of existing facilities is actively being considered by Washington County and Fox Valley. He stated it was believed the concerns expressed by Board members have been conveyed by Central Administration staff to the Waukesha County Board and to other interested groups.

Regent Fish moved adoption of the following resolution, the motion was seconded by Regent Grover, and it was voted:

Resolution 1348: **That, upon the recommendation of the UW Center System Chancellor and the President of the University of Wisconsin System, Analysis Paper #15 be approved to support the Center System request for approval of the plan prepared by the Waukesha County Board for completion of the Waukesha Center campus, and that the planning assumptions and conditions set forth in the paper be established to guide the Center System in responding to similar proposals for completion of Center campuses.**

Regent Fish reported that the Committee was attempting to work out a cooperative arrangement with the Vocational, Technical and Adult Education Board to jointly review projects for both Systems in the areas where cooperative use of facilities could result in savings in operating costs as well as building costs. He noted a reorganized committee representing both agencies and giving more strength to Central Administration staff has been operating for about seven months with some positive results.

Regent Fish reported that in the Committee meeting on the previous day President Weaver commented briefly on the proposed 1977-79 Biennial Capital Budget Request, stating that it was the lowest dollar request in fifteen years. The requests total \$74.4 million, with \$63.5 million from state tax funds, a large portion of which would be financed by state borrowing and paid for over a twenty-year period. He pointed out that the University System is steward and custodian of about 70% of all buildings owned by the State with the combined value of all University buildings in excess of \$1.5 billion.

Regent Fish noted that the first item provided \$7.8 million for energy conservation, which would be used as a pool for energy conservation projects and represents phase I of a serial program. Regent Fish stated that there were concerns expressed by several Regents as to whether this amount was sufficient to fund all energy conservation projects that would be required in this biennial period, noting that when campus buildings are surveyed for energy conservation projects, the needs may well be in excess of \$20,000,000.

Regent Erdman moved approval of \$7.8 million for the energy conservation item, the motion was seconded by Regent Grover, and it was voted.

Regent Fish requested that Regent DeBardleben present the resolution that bears on energy conservation. Regent DeBardleben stated that at the meeting yesterday there was discussion of what appeared to be an inadequacy of the treatment of the conversion of facilities for the use of alternative fuels, and moved adoption of the following resolution, which was seconded by Regent Lavine and voted:

Resolution 1349: **The Board of Regents supports all necessary actions to assure that all state-owned campus heating/chilling plants and facilities be modified to permit the use of all available fuels. In furtherance of this commitment, the Board requests that the Department of Administration conduct an immediate investigation on behalf of the University of Wisconsin System to determine the manner and cost of making these conversions.**

(Continued)

It is the belief of the Board of Regents that such investigations should be advanced or sufficiently completed by February of 1977 so that the estimated 1977-79 costs involved can be added to the UW System's capital projects budget request for that biennium.

Regent Fish stated that the University System has 1,383 buildings, exclusive of all self-amortized facilities, such as, residence halls, student centers, farms and field stations, and it is proposed to budget \$3.5 million for roof replacement, repairs, masonry repairs, and other deferred maintenance programs.

Regent Fish moved approval of \$3.5 million for preventive/deferred maintenance, the motion was seconded by Regent Johnson, and it was voted.

Regent Fish moved approval of \$1,216,000 for electronics production and broadcast equipment replacement fund, the motion was seconded by Regent Erdman, and it was voted.

Regent Fish stated that he proposed to group the minor projects, indicate the major projects and those items on which there was discussion, votes or changes in the Committee, and requested that the members of the Board indicate their approval or disapproval.

He indicated that at UW-Eau Claire there were no major projects requested; the campus requested eleven minor projects totaling \$1,537,300, Central Administration approved six projects totaling \$791,800 and denied five projects. The UW-Eau Claire projects were approved without objection.

With respect to the UW-Green Bay campus Regent Fish stated there were two major projects requested, the College of Human Biology Theme Building was denied, and that action was sustained by the Committee. The second major project was student housing, which was recommended by Central Administration and passed by the Committee. Under minor projects \$175,000 for the greenhouse/headhouse and \$150,000 for the College of Human Biology laboratory conversion, which would do some of the tasks that would have been involved with the College of Human Biology Theme Building, were approved. Regent DeBardleben stated that he was concerned about the Central Administration recommendation to deny the money for the College of Human Biology at Green Bay while recommending \$1,250,000 of state funds for advance planning for building an East Campus Physical Education, Intramural and Recreation facility on the Madison campus. He stated he felt this is a case of gross misplaced priorities and that he was not going to vote for the appropriation of state money for a physical education or an athletic recreation facility ahead of any academic building. Chancellor Weidner, UW-Green Bay, stated that the College of Human Biology building is one of the last projects to develop and complete the minimum module buildings on the Green Bay campus. It was in the priority list brought to the Board two years ago, and Central Administration turned it down and came up with some minor projects. He continued that he indicated that this did not have campus approval nor his approval because they had been developing some private support for the College of Human Biology to help it along. The minor projects would eliminate the possibility of using private support as the building will not be built, and in addition it creates an immediate demand on the campus. He said this does not permit us to go ahead with an orderly plan and that he did not have a chance to design anything or consider strategies or alternatives of funding for the College of Human Biology. He stated that he felt the campus would be boxed in should the minor projects proceed and that is why on the previous day he suggested he would not want to move ahead with these two minor projects in the near future. He noted

that the Human Biology program spreads throughout other buildings, some of which do not have laboratories and hence they are unable to teach all of the courses called for in the curriculum. Regent DeBardleben stated that he would like to see the project moved forward in some constructive way. Chancellor Weidner stated that he would much prefer dropping the two minor projects and having that money used for advance planning.

Regent DeBardleben moved that the \$325,000 set forth under minor projects for the Green Bay campus for the 1977 biennium be transferred to advance planning for the College of Human Biology for that biennium, and the motion was seconded by Regent Lawton.

Regent Erdman stated that the area is already flooded with University of Wisconsin System campuses of one sort or another and there are private colleges in the area and that, while the module may have been planned for in the past, it now appears there was a certain amount of over-planning and that this would not be a wise expenditure of state money. Regent Fish noted that each major and minor project considered had justification but some were turned down on the basis of evaluation by Central Administration and some realism as to the size of the construction budget that we are going to be able to secure at this time. He said the evaluation was made that the College of Human Biology is a project that we would like to favor but does not rate high on our priority list. Regent DeBardelen said that he felt that this is different from the other major projects. We have here a situation where the Chancellor of a campus comes before us and says it would be his preference to eliminate two minor projects and that he only wants to take the money if he does not have to use it immediately so that he can explore alternatives. He pointed out that the Green Bay campus is not limited to being a commuter-type of institution and has a much broader mission than that, and the College of Human Biology is one of the essential elements of filling out the ability to perform that mission. He said this is a high-level educational question on which the Chancellor is the best-qualified person in this room and that is entitled to great weight. Regent Lawton inquired if this action constitutes a retraction of a prior commitment. Regent Fish responded in the negative, noting that when the Legislature supported the construction of Green Bay and Parkside, it was on the basis that they be commuter campuses and that the mission evaluation has changed.

The question was put on the proposed amendment, and it failed on a voice vote.

There was no objection to the proposed program for the UW-La Crosse Campus.

Regent Fish noted that the Madison Campus has 44% of the net assignable square footage of the System. He reported that there had been discussion of the East Campus Physical Education, Intramural and Recreation Facility financing and the remodeling of King Hall. Regent Grover stated that he voted against the King Hall remodeling because the cost works out to approximately \$113 per square foot, which he considered excessive. Chancellor Edwin Young admitted that remodeling is expensive but wherever possible, we attempt to preserve the character of the campus. Dean Emeritus Kurt Wendt stated that it is a very attractive building and after very much discussion the Campus Planning Commission decided to try to preserve the appearance of the campus at no additional cost. Regent Gerrard stated that he felt that it would make a lot of sense, especially in view of the energy problems, to have a new building, which could be built for about the same cost as for remodeling it. Regent DeBardleben noted that the presentation says that because of the restricted site, little new construction could be located there if the present building were demolished, and this suggests that if a new building is to be erected, it would be erected on a different site, and that means that from a

practical standpoint you are not going to get rid of the old building. He pointed out that the building is evidently being considered as a candidate for inclusion in the National Register of Historic Places and there will be a great hue and cry go up and we would have a difficult time getting the old building torn down, and if the cost is the same, as against putting up a new building and still keeping the old building, he would opt for keeping the old building. Regent Grover said that whether or not King Hall remodeling will ultimately be adequate for a growing program area bothered him. He said that he feared that we have a short-term solution to a long-range problem, that we will underconstruct and we will have \$113 per square foot in an historic monument. He said that he did not feel that this is good public policy, that we have a poor solution to a previous Board action that was denied, and that the Board is going to be confronted with another facility application to replace King Hall in the not too distant future.

Regent Grover moved that the \$1,335,000 allocated for the remodeling of King Hall on the UW-Madison Campus be rejected, the motion was seconded by Regent Gerrard, and it failed on a voice vote.

Regent Fish reported that the Committee considered the East Madison Campus Physical Education Building, which has a budget of \$3.5 million of state funds, \$5.7 million of gift and self-amortizing funds, for a total of \$9.2 million. Central Administration recommended that the site for the project be approved, that \$1,250,000 be approved for land acquisition and outdoor field development and that the project be authorized for advance planning in the 1977-79 biennium. He reported that the project was approved in Committee with a dissenting vote by Regent Barkla.

Regent DeBardleben moved that the \$1,250,000 recommended by Central Administration for advance planning for the East Campus Physical Education, Intra-mural and Recreation facility on the Madison Campus be deleted, and the motion was properly seconded.

Chancellor Young stated that this is an academic building--we have a very distinguished department of women's physical education which is now merged with men's physical education. Their people are selected and promoted on the same basis as anybody else in the biological sciences, and therefore, to talk about this building as being non-academic versus academic is unfair to the people who will be using it. He said sometime ago the University made a commitment to the women's physical education department that we would do everything possible to bring their resources to a par with those of men and we are trying to carry that out as we merged the two departments. Regent DeBardleben said he did not use the word "non-academic" that was used by Chancellor Young. He stated that he said academic other than physical education should have priority over physical education. He continued that he was sure that the physical education people consider their discipline, if that is what it is, academic.

The question was put on the proposed amendment, and it failed on a voice vote.

The list of major utility projects for construction funding in the amount of \$7,194,500 was approved without objection.

Regent Fish reported that there had been no objection to the proposed \$3,390,000 Central Administration recommendation for the Physical Sciences Laboratory/Additional Accelerator Facilities supported by gift, grant and fee funds, nor any objection to the self-amortizing project in the amount of \$2,940,000 for the Lower Campus Ramp--Phase I. Of the minor projects he reported one item was changed, \$75,000 for University Bay Development--Phase II was deleted with all Regents voting

to delete it, with the exception of Regent Barkla. He reported that there had been a split vote on the \$18,000 request for x-ray room ceilings for the Clinical Sciences Center, which had been denied by Central Administration. He reported that Regents Neshek and McNamara voted for placing it back in the budget, and Regents Grover, Barkla, and Fish voted to sustain Central Administration's recommendation. Regent Fish explained that the rationale for the denial was that we have twice assured the State Building Commission that the budget for Phases I and II of the Medical Center is complete, with no additions expected, but that now the Hospital Administration is requesting not only the \$18,000 for the x-ray room ceilings for Clinical Sciences Center, but also \$200,000 additional for an audible paging system for the Center. He stated that on the basis of the assurances previously given to the State Building Commission that there would be no additional funds sought, the Committee had voted against the two items mentioned above, in essence requiring them to do these items out of the funding that has already been authorized. Superintendent Gordon Derzon pointed out that this is a very large project and there are a number of items of this nature for which funds are not available to initiate a contract at the present time. He stated they were not included in the final contract because costs over-ran the amount of funds available. He stated that the Building Commission is aware of the fact that these items were not included in the contract. Regent Fish stated that he would prefer going back to the Building Commission and telling them that we had a shortfall of X number of dollars to trying to convince them that we planned a \$94 million hospital and didn't put a paging system in the planning. Superintendent Derzon stated that the ceiling was omitted because it holds the mounts for the x-ray rooms and therefore must be installed after the equipment is in place. He stated the paging system was omitted because at the time the building was planned many people thought it would be satisfactory to have a pocket paging system exclusively. Regent DeBardeleben stated that he felt that Superintendent Derzon was not responsible for the omission of these items and that it is a question of whether it was omitted or not. If they were not in the specifications, somebody made a mistake, but he did not feel abusing Superintendent Derzon was called for. Superintendent Derzon stated that with the complexity of the building and the magnitude of the change orders, the administration was running into these kinds of situations and exactly what it was going to cost before we bring patients into the new facility he was not prepared to say. He stated that hopefully we will have that answer in the next three or four months. Regent Pelisek inquired if the paging system is not installed now, will it be forever lost. Superintendent Derzon responded that it was his understanding that it would be more appropriate to install it now rather than later.

Regent Pelisek moved that \$18,000 for x-ray ceilings for Clinical Sciences Center and \$200,000 for audible paging systems for Clinical Sciences Center, which had been denied by the Central Administration recommendation, be reinserted in the capital budget, the motion was seconded by Regent Lawton, and it was voted on a voice vote.

Regent DeBardeleben stated that he continued to believe that the deviation from the long-established policy of financing such items as the painting of the facilities at Camp Randall be paid out of Intercollegiate Athletics fees was a mistake, and moved that the \$62,000 approved by the Central Administration recommendation for Camp Randall Memorial Sports Center painting be deleted, and the motion was properly seconded. Chancellor Edwin Young stated that Camp Randall Memorial Sports building was built with Intercollegiate funds and then given to the recreation people and if this is voted, it will not be for paying for an Intercollegiate Athletics intercollegiate activity, it is for recreational space which the students use. The question was put on the proposed amendment, and it failed on a voice vote.

There was no discussion of the projects recommended by Central Administration on the UW campuses at Milwaukee, Oshkosh, Parkside and Platteville.

Regent Fish noted that there had been a tie vote in the Committee with respect to reinserting \$514,000 for the Women's Physical Education Addition to Karges Center at UW-River Falls, with Regents Barkla and Johnson voting in favor and Regents Fish and Grover voting "No"; therefore the motion failed. He stated that Regent Barkla voted in favor because of the shortage of facilities for women on the campus and on that basis voted to put the project back in the budget. Regent Johnson stated that he voted in favor of reinstating the item because River Falls has a major program of the physical education type and he did not feel the matter will receive much further consideration for a long time. Regent Grover stated that he supported the recommendation of Central Administration on this question because it is a half solution to a larger problem and because if there is to be an overall look at physical education in the whole System, this probably is not the right direction to go. He stated we are aware of the problem and are going to make a study of it. Regent Johnson moved that the item of \$514,000 for the Women's Physical Education Addition to Karges Center at UW-River Falls requested by the campus and denied by Central Administration be reinserted in the capital budget, the motion was seconded by Regent Erdman, and it failed on a voice vote.

Regent Fish reported that the Committee added the project in the amount of \$27,500 for lighting improvements in the Physical Education Building at Stevens Point, primarily because the present lighting system interferes with the musical events conducted in the building which are attended by the general public. The item had not been recommended for inclusion by Central Administration.

There was no objection to the Central Administration recommendations for projects at UW-Stout, Superior, Center System, and Extension.

Regent Fish reported that the Committee approved the item of \$80,000 for replacement of stairwell enclosures at UW-Whitewater, which had not been recommended for approval by Central Administration, after learning from the Chancellor that a very dangerous situation exists.

Regent DeBardleben moved that the priority list be amended to move Item 11, East Campus Physical Education, Intramural and Recreation Facility, at Madison in the amount of \$1,250,000 to the bottom of the priority list, with the intervening items moved upward accordingly, the motion was seconded by Regent Lavine, and the proposed amendment failed on a voice vote.

Regent Lavine moved that all of the approved minor projects for Physical Education and Athletics be shifted to the last positions of the respective campuses' minor projects priority list, the motion was seconded by Regent DeBardleben, and the amendment failed on a voice vote.

Regent Lavine moved adoption of the 1977-79 Capital Projects Budget, University of Wisconsin System, and the major projects priority list for the 1977-79 biennium (attached as EXHIBIT D), the motion was properly seconded, and it was voted.

Regent Fish moved adoption of the following resolution, the motion was seconded by Regent Johnson, and it was voted:

Resolution 1351: That, upon the recommendation of the UW-Madison and UW-Parkside Chancellors and the President of the University of Wisconsin System, authority be granted to plan, bid and construct the following minor projects, at the cost and from the funding sources indicated:

UW-Madison

- (1) 1975-77 air-to-air solar collector, Arboretum Education Center, at a cost of \$60,000 from State Building Trust Funds (\$30,000) and UW Arboretum Trust Funds (\$30,000)
- (2) 1975-77 increase light intensity in the Bacteriology Building plant growth rooms, at a cost of \$45,500 from National Science Foundation grant funds

UW-Parkside

- (3) 1975-77 construction of parking lot at a cost of \$243,500 from Auxiliary Enterprise Operating Funds

Regent Fish moved adoption of the resolution relating to leases of space, UW-Madison, La Crosse, and UW-Extension (attached as EXHIBIT E), the motion was seconded by Regent Sandin, and it was voted.

Regent Fish moved adoption of the following resolution, the motion was seconded by Regent Grover, and it was voted:

Resolution 1353: That, upon the recommendation of the UW-Stevens Point Chancellor and the President of the University of Wisconsin System, the President or Vice President and Secretary or Assistant Secretary of the Board of Regents be authorized to execute an easement to the Diocese of La Crosse (UW-Stevens Point Newman Center) for the right of way needed to place, replace and maintain an underground sewer lateral across the UW-Stevens Point property.

The land is described as follows:

A part of Lot 10 of Block 3 of T. Helminski and Others Addition to the City of Stevens Point, Portage County, Wisconsin, more particularly described as follows:

The North 10 feet of the South 31 feet of the West 29 feet of said Lot 10.

Regent Lavine moved adoption of the following resolution, the motion was properly seconded, and it was voted on a roll call vote, with Regents DeBardleben, Erdman, Fish, Gerrard, Grover, Hales, Johnson, Lavine, Lawton, McNamara, Neshek and Sandin voting "Aye", and with Regents Barkla, Pelisek, Thompson and Walter absent: (Regent Pelisek returned to the meeting after the vote was taken.)

Resolution 1354: That, in accordance with Section 19.85(1)(c) and 19.85(1)(g), WIS. STATS, a closed session be held to consider personnel matters and confer with legal counsel.

The meeting recessed into closed session at 2:03 P.M.

The meeting resumed in open session at 2:40 P.M.

President McNamara announced that the following resolutions had been adopted:

Resolution 1355: That, upon recommendation of the President of the UW System and the Chancellor of the UW Center System, Chester F. Natunewicz be appointed Dean of the UW Center-Manitowoc County, beginning December 1, 1976 (or as soon thereafter as he is able to physically relocate), at an annual salary of \$25,000.

Resolution 1356: That the request of Senior Vice President Donald Smith that his retirement from the position of Senior Vice President for Academic Affairs, effective June 30, 1978, be approved.

The meeting adjourned at 2:42 P.M.

J. S. Holt, Secretary

MSN HS-MED PREVENTIVE MED (144-H091) 10,000.00
44. NASA, GODDARD SPACE FLIGHT CENTER
GREENBELT, MD
IN SUPPORT OF THE FOLLOWING:
- 1) STUDIES OF SOUNDINGS AND IMAGING MEASUREMENTS FROM GEOSTATIONARY SATELLITES FOR THE PERIOD 08-01-72 THROUGH 11-30-76
AT A TOTAL COST OF \$331,221.00
AWARD # NAS5-21798, MOD. 11
MSN GRAD SPACE SCI&ENG CT (144-D234) 35,021.00
- 2) GISS/SSEC MCIDAS DATA STUDY FOR THE PERIOD 03-01-73 THROUGH 07-30-77
AT A TOTAL COST OF \$159,434.00
AWARD # NGR-50-002-215, MOD. 4
MSN GRAD SPACE SCI&ENG CT (144-D896) 25,800.00
- 3) DESIGN AND TESTING OF THE NAVIGATION MODEL FOR THREE AXIS STABILIZED EARTH ORIENTED SATELLITES APPLIED TO THE ATS-6 SATELLITE IMAGE DATA BASE FOR THE PERIOD 03-18-75 THROUGH 04-30-77
AT A TOTAL COST OF \$69,790.00
AWARD # NAS5-20974, MOD. 2
MSN GRAD SPACE SCI&ENG CT (144-G255) 10,000.00

GIFTS, GRANTS AND CONTRACTS
NOV 19, 1976

UNIVERSITY OF WISCONSIN - MADISON

RESEARCH

- 4) CONTINUATION OF ORBITAL OPERATIONS AND POST-LAUNCH DATA REDUCTION AND ANALYSIS FOR THE OSO-1 EXPERIMENT "SOFT X-RAY BACKGROUND" FOR THE PERIOD 06-26-75 THROUGH 06-25-77
AWARD # NAS5-22410, MOD. 9
MSN GRAD SPACE SCI&ENG CT (144-G821) 111,875.00
- 5) CONDUCT A PRELIMINARY DESIGN STUDY OF THE UV SPECTROPHOTOMETER/POLARIMETER FOR THE PERIOD 10-14-76 THROUGH 04-13-77
AWARD # NAS5-23748
MSN L&S AST-SPA AST LAB (144-J426) 43,913.00
45. NATIONAL SCIENCE FOUNDATION
WASHINGTON, DC
IN SUPPORT OF THE FOLLOWING:
- 1) LOGISTIC SUPPORT FOR CARRYING OUT PROJECT ENTITLED "VIRAL ETIOLOGY EPIDEMIOLOGY" FOR THE PERIOD 09-01-76 THROUGH 10-31-76
MSN HS-MED PREVENTIVE MEDICINE
AWARD # DPP76-19827
- 2) ENZYMES SYNTHESIZING CAROTENES IN PLANTS FOR THE PERIOD 07-01-76 THROUGH 12-31-77
AT A TOTAL COST OF \$19,000.00
AWARD # PCM76-06281 A01
MSN HS-MED PHYSIOLOG CHEM (144-J101) 10,800.00
- 3) STUDIES OF SURFACE STRUCTURES, LATTICE DYNAMICS AND ADATOM INTERACTIONS FOR THE PERIOD 09-01-76 THROUGH 02-28-79
AWARD # DMR76-21576
MSN L&S PHYSICS (144-J297) 96,100.00
- 4) METEOROLOGICAL OBSERVATIONS AT THE SOUTH POLE FOR THE PERIOD 09-01-76 THROUGH 03-31-77
AWARD # DPP 76-22571
MSN L&S METEOROLOGY (144-J301) 7,151.00
- 5) WORKSHOP ON MANAGEMENT OF LABORATORY INSTRUMENTS. THIS PROJECT ALSO INCLUDES 9,725 EGYPTIAN POUNDS, THE EQUIVALENT OF \$17,720 TO BE USED IN EGYPT (REDUCTION DUE TO GRANT BEING TRANSFERRED TO UNIVERSITY OF WISCONSIN-EXTENSION) FOR THE PERIOD 09-01-76 THROUGH 08-31-77
AWARD # INT76-12329
MSN ENGR ENGR EXPER STA INTRDSC PR (144-J314) 21,970.00-
- 6) MICROWAVE SPECTROSCOPY OF MOLECULAR IONS AND OTHER TRANSIENT SPECIES FOR THE PERIOD 09-01-76 THROUGH 02-28-78
AWARD # CHE76-07374
MSN L&S CHEMISTRY (144-J338) 45,900.00

* Item Accepted at 10/15/76 meeting but not included in summary totals.

TO: The Board of Regents of the University of Wisconsin System

FROM: Regent Members of the Higher Educational Aids Board

DATE: November 9, 1976

SUBJECT: HEAB Meeting on November 5, 1976

The meeting of the Higher Educational Aids Board was held in the Governor's conference room, Madison, on November 5, 1976, chaired by Jerry Madison. Regent member DeBardeleben was present.

As a follow-up item to the biennial budget request, the HEAB Board reviewed a staff analysis of the effect of preparing the WHEG II budget request on the basis of maintaining a consistent ratio between state grant and loan programs. This method was proposed because of a concern about an increasing reliance on loans. The analysis showed that budgetary needs that would have been requested under this approach were comparable with that which had been requested in the biennial budget request. Based on the results of this analysis, the Board did not alter its biennial budget request for WHEG grant funds. Esther Kaplan asked to have her position recorded in the minutes as one of dissatisfaction with the approach adopted by the Board and that she was in favor of increasing WHEG grant funds through a formula which maintained a consistent percentage of WHEG funds relative to the amount of student need.

In order to meet the increasing loan needs of health professions students and to enable implementation of changes in the Higher Education Amendments of 1976, the Board approved an increase in the maximum annual amount that graduate and professional students may borrow under the direct state loan program from \$2500 to \$5000, and a corresponding increase in the aggregate maximum amount from \$10,000 to \$15,000.

The staff reported on its review of institutional need for a state funded work study program and based on its findings recommended that the Board continue its present position of not requesting creation of a state funded work study program at this time. It was indicated that present funding levels, an increased authorization, and a seven-year extension of the federal work study program raised questions as to the need for a similar state program at this time. Secondly, it was determined that a higher priority should be given to the funding of state grant programs and consequently it was recommended that the development of a state work study program should be postponed so as to not jeopardize the higher priority WHEG II program.

Buff Wright of the United Council of UW Student Governments reported that United Council endorsed the HEAB recommendation supporting as a higher priority the grant program, but they would like to have institutions seek to expand career-related employment opportunities using the existing federal work study program. She reported that a letter had been sent to the UW chancellors regarding the United Council's interest in expanding career-related employment opportunities.

EXHIBIT A

11/19/76

Regent Lavine also had forwarded a letter outlining the response of a survey of university institutions regarding a state funded work study program which showed that in the past year there were 10,821 students with work study jobs on-campus and 1,588 students off-campus. Regent Lavine also recommended against consideration of a state work study program until there is further experience with WHEG II and the federal work study program.

In response to a request of Esther Kaplan, Chairperson Madison requested the staff to also submit the tuition grant program along with a list of HEAB activities identified for performance assessment by DOA. Two of the following activities will be subjected to performance assessment: state student loan collection, Wisconsin Higher Education Grant Program, the Indian Student Assistance Program, the Educational Opportunity Program, Marquette dental contract, and the tuition grant program.

The Board deferred, at Mr. Jung's request, any review of the Programmatic Policy Notebook until the February meeting as he wanted to take additional time to work on the format of the notebook.

In an attempt to resolve the immediate capital problem facing the direct state loan program, the HEAB has negotiated for the sale of up to \$12 million in loans to private lenders and the Board of Commissioners of Public Lands. To meet present needs, the HEAB approved the sale of up to \$2 million in student loans to the Board of Commissioners of Public Lands.

The Board staff reported that an analysis of the WHEG II program's funding status had shown that the present equity formulas were underspending program funds. The WHEG II ad hoc committee had reviewed October's program activity on November 2 and concurred that surplus WHEG II funds existed due to: (1) a lag in vouchering; (2) the impact of no-shows; (3) multiple admissions applications to other systems; (4) difficulties with the independent student model; (5) impact of the federally-funded basic educational opportunity grant; and (6) other modeling difficulties. To be most effective, program changes affecting allocation of these WHEG funds need to be implemented before start of the second semester in order to give financial aid administrators time to react and complete administration of the program. Therefore, the Board adopted the WHEG II ad hoc committee and the Board staff recommendation that funds be allocated to the institutions on a need based formula. The institutions could then use a series of options to meet locally identified unmet student needs. This approach was expected to be less disruptive than requiring the complete revision of existing WHEG awards and it would give aid administrators the flexibility to meet locally perceived needs. The disadvantage of this approach is that it would tend to erode the statewide equity that has been achieved under the WHEG program in 1976-77. It should be noted that this action should not be interpreted as setting a permanent program precedent or as indicating a lack of support for the conceptual framework on which WHEG has been established.

The HEAB Board also adjusted the WHEG II program to extend eligibility to an AFDC recipient who may not qualify for a regular WHEG II award.

The Board received a report reviewing the Legislative Audit Bureau audit of the Minnesota-Wisconsin reciprocity agreement which identified the steps that have been taken to correct the problems noted in the audit report. The Board approved language for two proposed amendments to the compact statute which would give the Board sufficient flexibility to settle the summer school tuition issue through negotiation and enable the two states to set a payment date by mutual agreement.

The Board received an information report on the talent search program which has the goal of promoting an interest in education, particularly at the post-secondary level among disadvantaged and minority students who are unfamiliar with its opportunities.

The Board reviewed an information report dealing with default and reduced payment experience with the student loan program. In summing up the report, the Board staff had stated that it is premature to draw definitive conclusions but there were indications that the administrative procedure permitting only limited and judicious use of reduced payments appeared to be justified. Some Board members took issue with that position and requested that a justification for that statement be presented to the Board at the February meeting. Mr. Jung was requested to review the data and recommend policy relative to the value of flexibility in collecting student loans and to the need for reexamining the balance between grant and loans. Some members of the Board have expressed their feeling that a comprehensive default study is necessary for the purpose of identifying persons likely to default with a view to determining whether persons in these categories should be receiving grants instead of loans. Regent DeBardleben requested that the Executive Director also review the data to determine if there was any basis for predicting that a student who enters the System as needy may also leave the System as the most needy.

An information report was presented to the Board on ways to improve administration of the state and guaranteed student loan program. Mr. Jung pointed out the need to work with the institutions so that administrative procedures for the loan programs will be compatible with the administration of other programs in the several institutions involved.

The Board also received reports which (1) outlined the methods used by the Marquette University School of Dentistry to determine relative academic qualifications and credentials of residents and nonresidents applying for admission; (2) summarized the impact on HEAB programs of the Higher Education Amendments of 1976 which were recently passed at the federal level; and (3) identified membership and agenda of the Advisory Council on Financial Aid for 1976-77.

The Board adjourned its meeting and members reconvened in a meeting of the Wisconsin Higher Education Corporation.

WHEC was presented with a program report on volume which showed that in fiscal year 1975-76 the Corporation guaranteed 42,171 loans for \$34.3 million representing a 12% increase in dollar amount and a 17% increase in the number of loans guaranteed over 1974-75.

The Board discussed a staff proposal that the Corporation establish a lender servicing program. Rationale for the program included: (1) a growing concern, on the part of private lending institutions, over the administrative costs of the student loan program; and (2) the opportunity to service the loan program at lower costs and in turn use the service fees to offset state tax dollars presently used to support administration of HEAB.

Regent DeBardleben opposed the recommendation on the grounds that (1) need for the program was not sufficiently demonstrated, (2) it would put WHEC into

competition with private business without any adequate showing of justification or need. (On this point Mr. DeBardeleben stressed that he was not opposed per se to government competition with private business, but feels that there ought to be some showing that the function proposed to be performed cannot be performed, or is not being performed, by private business.) and (3) it appears to place WHEC in a position of conflict of interest because WHEC has the role of regulating lenders who would be potential customers for the lender service. Others stated that it would be better to have the proposal presented by HEAB to the Executive Office and the legislature where it could be addressed as a matter of public policy. The Board agreed to lay over the proposal until the next meeting of the Corporation on February 5, 1977.

The meeting was adjourned at 12:00 noon.

University of Wisconsin - Madison
(Project No. 7511-20)
1. Change Order No. GC-3 ADD \$ 51,173.00

III. REPORT OF ACTIONS TAKEN (MEMOS OF AGREEMENT).

- A. Wildlife Inventory Agreement, dated October 28, 1976, extending through December 1, 1976, has been signed between the Board of Regents of the University of Wisconsin System and the State of Wisconsin Department of Natural Resources, providing for coordination by the University (Department of Wildlife Ecology, UW-Madison) of student volunteers working with the DNR on wildlife inventory projects. (Agreement signed by Associate Vice Chancellor.)
- B. A Memorandum of Agreement has been signed, covering the period July 1, 1976 through June 30, 1981, between the Board of Regents of the University of Wisconsin System (Land Tenure Center, UW-Madison) and Spectrum Motion Picture Laboratory, Inc., providing for the storing by Spectrum of preprint materials of films produced by the Center. (Agreement signed by Associate Vice Chancellor.)
- C. An agreement has been signed by representatives of the UW-Madison campus with Mr. Ross Genrich which provides for the use of approximately one acre of land by the Institute for Environmental Studies for use in a research study to evaluate pollution damage to alfalfa.

- D. An agreement has been signed by representatives of the UW-Madison campus providing for the sale of the potato warehouse located at Three Lakes to Carl G. and Marjorie A. Williams.
- E. A lease has been signed between Milwaukee World Festival, Inc., and the Board of Regents of the University of Wisconsin System for the use of one of the Summerfest parking lots as one of several remote facilities served by the UW-Milwaukee UBUS system.
- F. An agreement between the Federal Property Program (DOA) and UW-Stout for the rental of Building No. 2 of Lange Warehouse Complex has been signed. This allows continued use of a portion of this complex as a federal surplus property distribution center and provides approximately 4,000 additional square feet of display area for this mutually beneficial project.
- G. A Services Agreement, dated June 17, 1976, has been signed between the Board of Regents of the University of Wisconsin System and the Council of Wisconsin Librarians, Inc., whereby COWL agrees to act as the contracting agent to provide services available through the Ohio College Library Center for all UW-System institutions which are members of the Wisconsin Library Consortium. The agreement is intended to be a continuing one which may be terminated by either party upon one year's notice in writing. (Agreement signed by Vice President and Controller.) (Refer to report of assignment of the interest of the Regents in the contract dated April 8, 1975 and in effect until June 30, 1978, with OCLC to COWL, made to the Board on October 15, 1976.)
- H. The University of Wisconsin Press.

Entitlements to Plan

EDUCATION COMMITTEE

Resolution 1345:

That, upon recommendation of the President of the UW System, the Regents accept and approve the programs listed below for inclusion in the Entitlements to Plan of the appropriate institutions:

UW-Eau Claire

B.S. Computer Science
B.A. Comparative Study of Religion

UW-Green Bay

Associate in Arts Degree

UW-La Crosse

B.S./B.A. Public Administration*
M.S. Adult Fitness-Cardiac Rehabilitation

UW-Madison

Ph.D. Textiles and Design

UW-Milwaukee

B.A./B.F.A. Film
B.A./M.A. Comparative Study of Religion
M.S. Computer Science
Ph.D. Earth and Atmospheric Sciences

UW-Oshkosh

B.F.A. Fine Arts
B.S. Computer Sciences

UW-River Falls

B.F.A. Fine Arts

UW-Stout

B.S. University Studies
M.S. Personnel Training and Development

UW-Superior

M.E. Professional Development

UW-Whitewater

B.S. Management Computer Systems
B.F.A. Fine Arts

*This request is tentatively indicated pending the result of a staff study by Academic Affairs

Leases of Space, UW-Madison,
UW-La Crosse and UW Extension

PHYSICAL PLANNING AND DEVELOPMENT COMMITTEE:

Resolution 1352:

That, upon the recommendation of the UW-Madison, UW-La Crosse and UW Extension Chancellors, and the President of the University of Wisconsin System, authority be granted for lease of the following properties:

(1) UW-Madison

2,050 square feet of space located at 905 University Avenue, Madison, Wisconsin for the period January 1, 1977 to December 31, 1979.

First Wisconsin National Bank, Lessor
1 South Pinckney Street
Madison, Wisconsin

The annual lease cost is \$11,787.50

(2) UW-La Crosse

A 35-car parking lot located on Pine Street, adjacent to the City of LaCrosse Memorial Field, for the period October 15, 1976 to October 14, 1977

City of La Crosse, Lessor
Parking Utility Board
La Crosse, Wisconsin

The annual lease cost is \$125.00

(3) UW-Extension

Approximately 1,375 square feet of space in the Brooks Building, Hayward, Wisconsin for the period January 1, 1977 through December 31, 1977

B and B Development Corporation, Lessor
Brooks Building
Hayward, Wisconsin 54843

The annual lease cost is \$6,875

EXHIBIT E

American Geographical Society Gift

BUSINESS AND FINANCE COMMITTEE

Resolution: That, upon the recommendation of the President of the University of Wisconsin System and the Chancellor of UW-Milwaukee, the gift of the American Geographical Society Collection, together with all usable equipment and furnishings, be accepted by the Board of Regents of the University of Wisconsin System and transferred to the University of Wisconsin Library; and that the Secretary or Assistant Secretary be authorized to sign an agreement covering the gift on behalf of the Board of Regents of the University of Wisconsin System; and that the administration of UW-Milwaukee be authorized to do all things necessary to effect the transfer of this gift to that campus.

(The American Geographical Society Council has offered this gift subject to the approval of the Attorney General of the State of New York, the Education Department of the State of New York, and a Justice of the Supreme Court of the State of New York, all as required by law. The agreement covering this gift was negotiated by Chancellor Baum, Assistant Chancellor Komsi, Vice President Lorenz, Senior Counsel Stathas, and UW-Milwaukee Professors Borowiecki and Roselle. The AGS Collection consists of all cataloged materials (books, monographs, bound and unbound journals, periodicals, magazines, serials, government publications, pamphlets, photographs, atlases, maps, globes, and cartographic reference materials), the Research Catalog, the publication Current Geographical Publications, and the total backlog of unprocessed materials. The cataloged materials in the AGS Collection consist of approximately: 184,000 volumes, 5,500 atlases, 347,000 maps, 33,600 pamphlets and documents, 45,000 photographs and 65 globes. The AGS Collection will be housed in the UWM Library in the East Wing on the third floor and will occupy approximately 33,000 gross square feet.)
