in oral penicillin therapy

the speed of action you want

the reliability you need

Penicillin, still the most frequently prescribed antibiotic, assumes new reliability in the form of PEN·VEE K. Tablet or Liquid PEN·VEE K may be prescribed for all infections responsive to oral penicillin . . . *including many usually treated with parenteral penicillin.*

The speed of action and reliability of oral potassium penicillin V have been dramatically demonstrated by recent studies^{1,2} in which 107 subjects were each given 400,000 units of the antibiotic. Appreciable penicillin levels were consistently produced within 15 minutes; peak levels within one-half hour. Penicillin levels still persisted in all subjects at two hours, and in 93 per cent of subjects at four hours.
