MINUTES OF THE REGULAR MEETING
of the
BOARD OF REGENTS OF THE UNIVERSITY OF WISCONSIN SYSTEM

Madison, Wisconsin

Held in the Clarke Smith Room, 1820 Van Hise Hall
Friday, March 9, 1979
9:10 A.M.

Vice President Lavine presiding

PRESENT: Regents Barkla, Beckwith, DeBardleben, Elliott, Erdman,
Fitzgerald, Fox, Gerrard, Grover, Lavine, Lawton, McNamara, and
Thompson

ABSENT: President Hales, Regents Majerus and Walter

The Secretary requested that the minutes of the February 9, 1979, meeting be corrected to provide that in the third sentence of the first paragraph on page 11, the words "Chancellor Fort" be deleted and the words "this report" be substituted so that the sentence reads as follows: Regent DeBardleben noted that northern Wisconsin has probably the largest concentration of native Americans in the nation and he did not get the message from this report that we are doing enough about that in that area of the state.

Upon motion made and properly seconded, it was
VOTED, That the minutes of the regular meeting of the Board of Regents of the University of Wisconsin System held on February 9, 1979, be approved as corrected above.

- - -

REPORT OF THE PRESIDENT OF THE BOARD

Vice President Lavine noted that he was presiding in the absence of President Hales, who is out of the country, and that Regent Walter was absent due to poor flying conditions. He stated a hearing on collective bargaining is tentatively scheduled for March 20th in the Legislature in the Senate Labor Committee. Vice President Lavine recalled there was a proposal before the Higher Educational Aids Board to rather dramatically cut back financial aid proposals to the Governor and the Legislature. He stated the Chairman of HEAB has sent a note to the Board members that in light of the lack of information presently available, the President of the HEAB now suggests that it go ahead with the proposals of last Fall, the larger proposal. With reference to the Legislative Audit Bureau audit report recently circulated to the Regents by Vice President Lorenz, Vice President Lavine stated that he shared with many of the members of the Board a sense of real pride and accomplishment in that audit. He said he felt the audit was a thorough, professional, and objective document and commended the audit staff on a job well done. The audit addressed itself to management policies and performances in the UW System and examined the dimensions of our performance. It did not impinge on the province of the University which must and should be the province of academic decision-making rather than government. He noted he was one of the Regents who

worked long and hard with the Joint Audit Committee of the Legislature to reach a better understanding of the boundaries within which government should confine its audit evaluation of our performance, and that it was heartening to see that these arrangements were really fully and professionally honored. Vice President Lavine stated the audit was one of the most affirmative evaluations of performance that he had read of any state agency. Our budget control and monitoring processes received high marks as did our enrollment projections methodologies. He stated there were some minor suggestions made in the procedure for handling of fund transfers, but these have already been implemented. There were also some recommendations for additional levels in internal auditing of our data reports and several methods of how to control and assure their accuracy. Vice President Lavine stated that he had read audit reports of other agencies as well as for the University and did not ever recall reading a report for an agency of this size that was as complimentary as the audit of the University System. He commended Central Staff and all of the campuses that had input into the matter.

REPORT OF THE PRESIDENT OF THE SYSTEM

President Young reported that Chancellor Werner Baum is announcing his retirement and stated that he personally will sorely miss him. President Young stated he had been an outstanding Chancellor and has been a close personal friend with whom he enjoyed working very much. He stated Chancellor Baum has the qualities that a Chancellor demands - - academic achievement, integrity, leadership, and was a firm believer in quality of higher education. He noted that under his leadership the University of Wisconsin-Milwaukee continued to grow in size and quality. He wished him well in his new role, and expressed gratitude for the contributions he has made, and will continue to make in the months ahead.

-

President Young called upon Paul Rusk, President, United Council of Student Governments. Mr. Rusk distributed a chart showing the fees and tuition of all the public institutions in the midwest. He noted it shows that our out-of-state fees are outrageously high and said he felt it rather silly to suggest that the Platteville tuition experiment is based on a dangerous precedent. He said he felt that precedent is already established and fees are so high that as we enter the 1980s we are not going to be able to attract many out-of-state students. He noted that there is a large difference in other states between the in-state tuition at a Big Ten school and one of their other campuses and stated he felt it unfair to continually harp on the fact that we are the lowest in the Big Ten. He noted that we are, but we have a lot of other institutions that are not as low as the institutions in other states. Mr. Rusk called attention to a new piece of legislation that has been recently introduced relating to the responsibility of students for the disposition of segregated fees. He noted the law has been working very well throughout Wisconsin, but recently a legislator introduced legislation to amend Chapter 36.09(5), which would add a sentence saying that every allocation of student segregated fee funds over \$500 would have to be approved by the Chancellor. He said he felt this is uncalled for and a slap at the students at Stout, LaCrosse, and Superior, who have been doing a good job with their segregated fee funds.

Regent DeBardleben stated that Mr. Rusk's point is well taken as far as some of the campuses are concerned in each of the states, but did not think that it is well taken so far as Madison is concerned on a comparison basis. He stated that if you compare UW-Madison with Champaign-Urbana, with Purdue, Indiana-

Bloomington, Michigan at Ann Arbor, Minnesota at Twin Cities, or Ohio State at Columbus, Madison does compare favorably, although he felt it is still high. He said the point is well taken that every one of those states does offer a collegiate opportunity at some campuses which are substantially less than anything we offer in Wisconsin. He said he would like to hear a comment from either President Young or Senior Vice President Smith as to what the practicalities are as far as addressing that issue in the current session of the Legislature.

President Young responded that anything we can convince the Legislature is an important matter can be introduced, but with it there would be a fiscal note, and the fiscal note would be the real issue. If we got a bill introduced changing this, we would have to provide a fiscal note to the bill and go to Joint Finance with the question about funding. He added that there are a lot of other questions about funding in the Legislature, but if reduction were made, it would mean that the money would have to come from some place. Regent DeBardleben stated that he was mindful of that, but was also mindful that the Executive has disapproved our request for the experiment that we want to undertake at this time, and we do have campuses in this state that could certainly use some more enrollment. He noted the figures are really quite striking when you realize that a youngster in Minnesota can go to Mankato or Moorhead, St. Cloud or Winona for \$524 and the lowest cost he could go anyplace in Wisconsin is approximately \$700.

Senior Vice President Smith noted we are under an administrative agreement with state government that we set our fees at 25% of educational costs, and we get only minor differentials among the clusters on that basis. Most of the states we are talking about have not discovered the merits of percentage budgeting which generates an automatic fee increase with every cost increase -- they set their fees in quite a different way. He stated Minnesota has historically had a premise that regardless of relative cost of instruction, the regional institutions are going to maintain a lower fee policy. He said we would have to give very careful thought to that. He noted whenever comparisons are made, the one comparison that is always crossed out is the one that shows Wisconsin low, i.e. against the Big Ten. It is not made against the midwest generally of public institutions. It is never made against land grant institutions nationally, because the Big Ten happens to be the highest fee-tuition area in the country as far as that picture is concerned, and while we do get out-of-state data on the board, it does not receive a great deal of attention although it is one of the most shocking relationships that have developed. He said that he agreed with President Young that we would have to look very, very carefully at an ad hoc approach to this with the cost of the fee involved. He said he felt it is something we ought to take under study, not relative to this budget, but relative to subsequent discussions.

Regent DeBardleben stated we have asked for special consideration of the enrollment funding equation, that he did not feel there is anyone on the Board that does not acknowledge that there are some institutions in the System that the continuance of which could not be justified, except in terms of providing access to higher educational opportunities in certain parts of the state. He said he did not feel this is a problem that can wait for another two years, and even though we can not get it done at this time, we ought to be doing more about it. Senior Vice President Smith stated the enrollment funding will be back for annual review at the end of the year and we are talking only about six or eight months before it comes back again.

Regent Erdman stated that if you have equal tuition for all students in the state, you are going to have equal quality in all institutions in the state. She stated she would suspect that in these other schools, there might be quite a differential in the undergraduate teaching between the major and

lesser schools. When we put all the institutions on the same financial basis, then we expect the same high quality from them. Senior Vice President Smith stated that our purpose is to say that wherever you take an undergraduate public higher education degree in Wisconsin, it is not only to promote access, it is to promote genuine equality of opportunity, i.e. qualitative equality so far as possible. He continued we all know how difficult that evaluation is to perform, but he felt that has been our purpose in Wisconsin and it is a difficult issue philosophically as to what our relationship is between our qualitative aspirations and our policy relative to cost.

Regent Beckwith noted that two of our schools bordering on the Minnesota border charge tuition approximately \$200 more than St. Cloud, Mankato, etc., and do quite well in drawing Minnesota students. He said that may tell us something about the perception of St. Cloud, Mankato, and Moorhead by Minnesota students. He said there is a philosophical question and that is something we have to study carefully, but he did not feel there is a philosophical question about the experiment at Platteville. He said that is something we ought to concentrate our fire on -- it is not only foolish philosophically, but it is bad economics. Vice President Lavine stated we ought to note the historical fact that when we lowered fees in the Center System at some campuses, it not only did not diminish quality, it also did not take students away from the regional VTAE or other schools--all it did was increase their enrollments because more people came to school. He said if we are going to use this argument, we ought to use facts, not guesswork, and noted that we do have history in this area.

Regent Grover stated he felt these statistics really demonstrate and make the case for the inclusion of the Platteville experiment. He said we would be negligent if we did not pursue this matter in a vigorous fashion, and could not believe that these statistics are not going to be tremendously persuasive when we meet with the Joint Finance Committee of the Legislature and try to move this thing along. He said the Legislature ought to have the audacity and imagination to incorporate one smidgeon of an experiment with an obvious problem we are experiencing. He said he hoped that the Regents would take the personal initiative with the people that are on the Joint Finance Committee to make the Platteville case, because he felt that is just the tip of the iceberg as we deal subsequently with the whole resident and nonresident tuition requests.

Regent Beckwith noted that since the last Board meeting we have received from System Administration the outline of the structure of tuition and fees, and stated that he hoped that does not signal that all of the various studies are going to go on at the same pace, and the first shall be as slow as the last, because he felt that there are some matters that are of an emergency nature. He noted the part-time student question is extremely serious and he felt that is a matter that ought to be addressed very early and need not await the completion of everything else. Senior Vice President Smith responded we will assuredly will bring to the Regents next November the report on the enrollment funding dealing with the part-time student issue, the fixed cost issue, and then the management principles. He stated the remainder of the studies need not have that timetable connected with them. He continued that many of them are integrated in the process of studying enrollment funding formula and cost behavior in the System and we do not want to lose sight or fail to follow up on earlier studies of the projections of student costs through the 80s unless we address what is going to be a formulary consequence unless something is done now. He said we are urging the Legislature that it is time to get at this question of cost escalation of students not because you can't manage it another year and another year beyond, but if you put it off six years, you are looking at a problem of great magnitude and it is clear we are just eroding our way to a situation which right now people would say would be intolerable.

Regent McNamara stated that it appeared to him that the points made by Mr. Rusk and Regent DeBardleben deal directly with such a fundamental part of our existence that we ought to take a close look at this particular problem as soon as possible. He continued if we can't do it before November, we should come out with some preliminary findings and we might be able to encourage the Legislature and a lot of other people to think seriously about this problem. Vice President Lavine noted there will be a hearing next Wednesday before the Joint Committee on Finance attended by two members of this Board and the Chairman of the Business and Finance Committee, with System officials present, and he assumed this discussion will be noted and at least to the degree possible they can begin with emphasis on the so-called tip of the iceberg.

Regent McNamara moved adoption of the following resolution, the motion was seconded by Regent Fitzgerald, and it was voted:

Resolution 1837: That the Report of Non-Personnel Actions by Administrative Officers to the Board of Regents and Informational Items Reported for the Regent Record be received for the record; and that actions included in the report be approved ratified, and confirmed. (EXHIBIT A, on file)

Regent McNamara assumed the Chair.

President Young noted that he had spent Wednesday in Washington with several other University presidents at the invitation of Secretary of Health, Education and Welfare Califano, who invited them to tell him what was wrong with what he was doing. President Young noted the day was not long enough for that. President Young stated one of the main concerns was about student support, not only support, but the stability of it; another concern was about federal regulations, which are written by HEW and approved by Congress, and administered by the people from HEW, who allegedly go around the country throwing their weight around and at times are alleged to have said we will go through your files where we will find something. He said he did not know if that is true, but the serious part of it is that he came away with the clear conviction that the administration does not intend to improve beyond this year what it is doing for student financial aids. The money for next year is an improvement over this one, but they are as intent upon holding taxes down as the State Legislature is, and some Congressmen are quite annoyed at some of the state legislators for spending federal money and then telling them to cut taxes at the same time. He said the mood in Washington is very like the mood around the state where the Democratic Congress is probably going to cut the President's budget, rather than expand it, as they often did in the past.

Regent Grover inquired as to the effect of the actions that the Governor's Office has taken in regard to student financial assistance. He said he was left with the bottom line that if the federal government did come through like they are talking about for middle income students, perhaps our requests would not be necessary. President Young responded that for the next academic year, starting in September, there has been enough of an increase in federal money so that it will probably equal at least the increased costs. He said it is very hard to estimate because they have increased the amount of money, but they have also increased the eligibility, so the individual student may get more, but more

students will get more. He said it was his impression from the Secretary of HEW that there will not be more increases after next year. Regent Grover inquired in the light of our student assistance package and the state of emasculation, how President Young would prioritize what we ought to attempt to restore. President Young responded that he felt that through the entire year we need to call attention to good management, and also help the students in an inflationary period. He said it is important for students to know in the early Spring what they are going to be paying next year--they do not know that now.

He said another important item is that the money for the increase in student wages for those at the minimum is something that we have to argue about. He said he felt that we and the Governor and the Legislature ought to be watching the federal picture so that in next year's biennial review, if what the Secretary of HEW suggested was going to happen, does happen, that we come back and ask for more financial assistance for students at that time. He noted that we have some tentative allotments for student work/study which show an increase of nearly four million dollars for next year for the state, and that we have to be honest and say that the financial aids offices will have to work hard to spend that well. He said that we ourselves have to be very careful that we spend all the federal money and work out a system so that if we come back to the Legislature a year from now we will have done our best and have organized it well. He said it is important that the work/study program be educationally related, and that it not be used to subsidize cleaning, dishwashing, etc.

- - -

REPORT OF THE EDUCATION COMMITTEE

The report of the Education Committee was presented by Regent Lawton.

Regent Lawton reported in the Committee meeting on the previous day a presentation was made by Marc Humphries, Chairman of the UW-Madison African-American Student Caucus. In his remarks, Mr. Humphries stated the caucus's view that the UW System budgetary provision for the recruitment and retention of black and other non-white students is seriously inadequate and results in denial of opportunity for higher education for non-whites. He noted that blacks account for 17% of the nation's high school enrollment and that non-whites make up 22%. He suggested that the University's goals for non-white enrollment should reflect those percentages and that the System budget should reflect the higher goals. He also stated the Caucus's position that financial aid grants for all students, particularly non-white students, should be increased in proportion to loans and other non-grant aids.

Regent Lawton reported Regent Lavine stated his appreciation for Mr. Humphries' statement and noted that students as well as the Regents can participate in efforts to influence the provision of necessary funding. He also noted that the Regents had so far been unable to secure funding for meeting the modest goals already set and that the high nonresident tuition is a serious barrier to out-of-state minority student recruitment. He also stressed the importance of establishing high goals for retention as well as for initial admission.

-

Regent Lawton reported the composite 1980-81 System academic year calendar was presented as it had previously been provided to all Regents. He reported Regent Lavine requested that the administrators of all campuses having pre-Labor Day beginning dates be reminded to publicize the arrangements by which students having summer employment extending through Labor Day can be accommodated for registration and initial class attendance without undue penalty.

Vice President Hales resumed the Chair.

Regent Lawton reported Senior Vice President Smith gave a preliminary report of the System Basic Skills Task Force, and noted a major final report is to be made in June, 1979. He said that the preliminary report was prompted by the timing of legislative consideration of the System 1979-81 biennial operating budget request and by concern about the Governor's deletion of the System 1979-81 request for support of basic skills. He reported the following recommendations will be included in the final Task Force report:

1. That university admissions requirements not be raised to exclude, but that compensatory instruction be offered to, disadvantaged students.
2. Improved articulation between college and high school personnel involved in basic skills instruction.
3. The use of verbal and mathematical placement tests in order to assess competencies and to place students accurately.
4. That compensatory instruction be recognized as an essential part of each university's educational mission, and that additional funding be sought to support student basic skills needs.
5. A high priority on faculty development and curriculum improvement efforts directed toward identifying proficiencies expected of college graduates and the appropriate demonstration of those proficiencies.

Regent Lawton moved adoption of the following resolution, the motion was seconded by Regent DeBardleben, and it was voted:

Resolution 1838: That, upon the recommendation of the President of the UW System and the Chancellors and Faculties of the institutions involved, the following new academic programs be approved with an implementation date of Fall Semester, 1979:

UW-Eau Claire	MS, Environmental and Public Health
UW-Green Bay	BSW, Social Work
UW-La Crosse	BA/BS, Public Administration
UW-Madison	BFA, Art PhD, Child and Family Studies
UW-Parkside	BS, Applied Computer Science BA, Humanities MPSA, Public Service Administration

Regent Lawton moved adoption of the following resolution, the motion was properly seconded, and it was voted:

Resolution 1839: That, upon the recommendation of the President of the University of Wisconsin System and the Chancellor of the University of Wisconsin-Madison, the request for authorization to recruit for a professor of Neurology and chairman of the Department of Neurology be approved.

- - -

REPORT OF THE BUSINESS AND FINANCE COMMITTEE

The report of the Business and Finance Committee was presented by Regent Grover.

Regent Grover reported the Systemwide totals of gifts, grants, and U.S. government contracts this year to date are \$144 million, which is \$6.7 million higher than a comparable period last year, with Research up \$5.4 million.

Regent Grover moved adoption of the following resolution, the motion was seconded by Regent Fitzgerald, and it was voted:

Resolution 1840: That, upon recommendation of the President of the System, the gifts, grants and contracts presented at this meeting (copy filed with the papers of this meeting) be accepted, approved, ratified and confirmed; and that, where signature authority has not been previously delegated, appropriate officers be authorized to sign agreements.

-

Regent Grover reported that the late Laura Jane Wheldon, Bangor, Wisconsin, bequeathed the residue of her estate to the University of Wisconsin to be used for research in the field of medicine, particularly on the causes and cure of asthma, arthritis, heart disease and emphysema. The residue is estimated at \$260,000.

Regent Grover moved adoption of the following resolution, the motion was seconded by Regent Fitzgerald, and it was voted:

Resolution 1841: That the bequest of the late Laura Jane Wheldon, Bangor, Wisconsin, to the University of Wisconsin be accepted by the Board of Regents of the University of Wisconsin System in accordance with the terms and conditions of the Last Will and Testament of Laura Jane Wheldon, Deceased; and that the Secretary or Assistant Secretary be authorized to sign a receipt on behalf of the Board of Regents of the University of Wisconsin System for this bequest, and to do all things necessary to effect the transfer of this bequest to the University of Wisconsin-Madison.

- - -

REPORT OF THE PHYSICAL PLANNING AND DEVELOPMENT COMMITTEE

The report of the Physical Planning and Development Committee was presented by Regent Gerrard.

Regent Gerrard reported the \$250,000 Lakeshore Improvement project at UW-Madison involves the renovation of the Lake Mendota lakefront near the north end of Park Street, to provide shoreline protection as well as an all-weather outside storage capability for the Hooper Sailing Club's sailboats. The \$340,000 Mechanical and Electrical Monitoring System Project at UW-Oshkosh is the eleventh project in this program to be approved and only a similar project for UW-Whitewater and the expansion of the UW-Madison system remain to be approved. He noted the systems are estimated to save 17% on heating and 12% on electrical energy, resulting in a payback of less than 3 years.

Regent Gerrard moved adoption of the following resolution, the motion was seconded by Regent Barkla, and it was voted:

Resolution 1842: That, upon the recommendation of the UW-Madison and Oshkosh Chancellors and the President of the University of Wisconsin System, the concept and budget reports be approved and authorization be granted to plan, bid and construct the following projects, at the cost and from the funding source indicated:

UW-Madison

Lakeshore Improvement Project, \$250,000, (\$175,000 - Gift and Grant Funds, Non-GPR and \$75,000 - Building Trust Funds, GPR)

UW-Oshkosh

Mechanical and Electrical Monitoring Project, \$340,000, General Obligation Bonding, GPR

Regent Gerrard moved adoption of the following resolution, the motion was seconded by Regent Barkla, and it was voted:

Resolution 1843: That, upon the recommendation of the UW-Madison Chancellor and the President of the University of Wisconsin System, authorization be granted to plan, bid and construct the Additional Accelerator Facilities, Physical Sciences Laboratory Synchrotron-Radiation Center (Alladin) project at the increased project cost of \$1,243,810 (Total increase: \$77,310--\$57,310 from Gift and Grant Funds and \$20,000 transferred from 1973-75 Minor Project Funds).

Regent Gerrard explained that the next item relates to the lease of space for an out-patient, primary care clinic in the Village of DeForest.

Regent Gerrard moved adoption of the following resolution, and the motion was seconded by Regent Lawton:

Resolution 1844: That, upon the recommendation of the UW-Madison Chancellor and the President of the University of Wisconsin System, authority be granted to lease the following property:

1,280 square feet of space located at:

210 North Main Street, DeForest, Wisconsin for the period 4-1-79 (or date of occupancy) to March 31, 1984

DeForest Shopping Center, a Joint Venture, Lessor
210 North Main Street
DeForest, WI 53532

The annual lease cost is \$7,044 (\$5.50 per square foot)

Regent Lawton explained that the matter had been discussed by the Council of Trustees of the Hospital; so Regents Erdman and Barkla are also acquainted with the matter. It serves two purposes: The community requested that someone come in and provide medical care after local providers had made several unsuccessful attempts. The University was then approached and, needing such a laboratory for this type of experience, they accepted the invitation of the community. He noted that Dean Brown feels it is a worthwhile venture from an educational standpoint, while at the same time supplying a small community with needed medical care.

The question was put on Resolution 1844 and it was voted.

Regent Gerrard moved adoption of the following resolution, the motion was seconded by Regent Barkla, and it was voted:

Resolution 1845: That, upon the recommendation of the UW-River Falls and UW-Stout Chancellors and the President of the University of Wisconsin System, authority be granted to plan, bid and construct the following minor projects from program revenues (Non-GPR):

UW-River Falls: 1979 Four Residence Hall Masonry Repairs Project, \$40,000

UW-Stout: 1979 Six Building Masonry Repairs Project, \$34,000

Regent Gerrard reported that in the Committee meeting on the previous day, Chancellor Baum, representatives of the UW-Milwaukee faculty, and students appeared in support of the proposed resolution relative to the naming of the UW-Milwaukee Library the "Golda Meir Library." He further reported a systemwide United Council of Student Governments' representative on behalf of the Milwaukee Student Association requested deferral of the item to allow further discussion by student groups on the UW-Milwaukee campus. He reported the Physical Planning and Development Committee voted to approve this request based upon the UW-Milwaukee Physical Environment Committee's unanimous vote in support of the request and

the Chancellor's recommendation. Later, during the discussion of other items on the agenda, UW-Milwaukee student representatives appeared and requested an opportunity to speak in opposition to the resolution and seek deferral of the request for two months. Relevant points raised during this series of student presentations included:

- (1) Additional time would provide an opportunity for all student views at UW-Milwaukee to be presented and discussed;
- (2) a considerable number of UW-Milwaukee students from the Mideast strongly oppose naming the Library after Golda Meir;
- (3) a number of student associations oppose the request;
- (4) UW-Milwaukee students have varying opinions regarding the Zionist movement;
- (5) there is a potential disruptive impact from approval of the request, during a time when peace negotiations are being undertaken in the Mideast; and
- (6) there are varying opinions regarding Golda Meir's character and actions.

Regent Gerrard moved adoption of the following resolution, and the motion was seconded by Regent DeBardeleben:

Resolution 1846: That, upon the recommendation of the University of Wisconsin-Milwaukee Alumni Association, the Physical Environment Committee Names of Buildings Subcommittee, the Chancellor and the President of the University of Wisconsin System, authorization be granted to name the University of Wisconsin-Milwaukee Library the "Golda Meir Library".

Chancellor Baum reported that shortly after the death of Golda Meir, the Alumni Association, which had on a previous occasion given her a distinguished alumni award, recommended the naming of the library as the Golda Meir Library. That recommendation was placed in the hands of a faculty committee, the Committee on the Naming of Buildings, and that Committee unanimously endorsed the concept and forwarded it to the committee which has final responsibility, our Physical Environment Committee, which is a committee which also has students on it. The two members are appointed by the President of the Student Association--one is the President himself, who was not present at the meeting at which the matter was discussed, and another student who voted in favor of the recommendation, as did the entire committee.

Chancellor Baum noted that while the process was going on, there was publicity in the press about the matter, and at no time in the Physical Environment Committee was this viewed as a political issue of any sort whatsoever. He said it was viewed merely in the context of the recognition of an outstanding former student of our predecessor institution. In response to the action of the Physical Environment Committee and the Committee on Naming of Buildings, he recommended to the President of the System that if he concurs, this be recommended to the Board of Regents at this meeting. Chancellor Baum reported that since he made that recommendation, considerable discussion arose on the campus over the issue and the Student Association adopted the resolution relating to the matter, attached as EXHIBIT B. Chancellor Baum stated that he was not accepting the recommendation of the Student Association that the matter be deferred for two months. He said he stood with the recommendation as submitted, mostly because it was procedurally and entirely correct, and because he believed it is a proper action for the University and the Board to take. He said he would not object to deferring the matter, but would suggest that the discussion be for not more than three months with final action to be taken not later than the month of June.

Vice President Lavine recognized Mazen Armouti, UW-Madison graduate student. Mr. Armouti stated he spoke as a representative of the Arab Students' Union, the Madison Chapter, which represents 240 students from thirteen Arab countries, and in the capacity as a delegated speaker from different chapters of Arab students and their allies on different campuses around the State of Wisconsin. He noted the number of Arab students in the University of Wisconsin System numbers more than 600 students. He stated that in the recommendation of the Committee on Naming of Buildings it was stated they did not consider the issue as political. He said he felt this reflects a naive attitude because no one dealing with a matter like this would rule out the political overtones in this recommendation. He said on the Palestinian level, Golda Meir symbolizes the death and misery for thousands of Palestinians for over 30 years. To them she also symbolizes the vast horror the Palestinians are living in now. On a broader level, for the Arabs, Golda Meir embodies the ideals of the Zionist movement, which is a racist and criminal idea that occupied not only Palestinian land, but also the lands of several Arab countries and uprooted several hundreds of thousands of Arabs, and adversely affected the development of Arab countries. On a larger level, Golda Meir, in name and as a symbol of the Zionist movement, was condemned by 104 countries of the United Nations as one of the leaders of Zionism, racism, expansionist, and a criminal movement. He said he was not trying to attract sympathy, he was merely pointing out the situation as it exists. He noted that last year when several student organizations called for a demonstration condemning Zionism, of which Golda Meir was a leader, there was the largest demonstration in Madison since the Viet Nam War, and this demonstration was supported not only by foreign organizations on the campus but also by numerous student organizations, several American church and civic groups in Madison, and in Wisconsin. He asked that the Board reconsider the recommendation. He said he realized the issue has reached an advanced stage in the decision-making process, but asked that the other side be given its share, and to be aware of the possible consequences for the University here and abroad. He said he was very proud to be a student of the University and several hundred of his colleagues were proud also. He said we would not like to change our view about this and would not like to see many universities and groups in his country change their minds and withhold sending other students to this campus. He said he viewed the University as an excellent example of an institution for higher learning that is impartial, is prestigious, has integrity, and would not like such a decision to change this image and affect the reputation of the University adversely here and at home.

Vice President Lavine recognized Noreddin Bushena--Arab student Organization, UW-Milwaukee. Mr. Bushena said that in the light of the Zionism there will be conflict in the hearts of those students when they come to the library because they feel they are studying in a Zionist institution. He said the University as an academic institution must be neutral and far from political and should not side with anything of a political nature. He said we do not deny any group to have activities, and they can call themselves whatever they wish, but a library must be shared by all and the Arabs have their rights also. He said we would like to improve our relationship and have a better understanding with other people and do not like to see this happen because it makes for bad feelings, a feeling to withdraw from the University. He said we do like the University and came to the University of Wisconsin System, whether in Milwaukee or Madison, or any other campus, to get a quality education. He said he felt the University of Wisconsin too should be proud that we have come here and we appreciate the opportunity the state has given us, but we do not like to see this issue to be here at all.

In response to Regent Barkla's question, she was advised by Mr. Armouti that approximately 10% of the 600 Arab students are women.

Regent DeBardleben stated that he assumed the speakers would concede that we live in a world of diverse viewpoints and ideologies and would concede that the United States is a pluralistic society; that Golda Meir had important Wisconsin connections, she lived in Milwaukee, and she was, as you are, developing important Wisconsin associations, and she was a world leader, whether you agree with it or not. He continued that fifty years from now if you gentlemen fulfill your promise, you will have important Wisconsin connection--you will occupy positions of leadership. Some who come here will stay and others will go back. He inquired wouldn't it be in keeping with the pluralistic society in which we live that we be free--that a duly constituted committee of the University of Wisconsin-Milwaukee be free to recommend that a building be named after people who have made significant contributions and who have come from varying kinds of backgrounds. He inquired isn't that consistent with what our society is and wouldn't it be consistent for you people when you have reached the status of Golda Meir at some age or have passed on, that you be considered.

Mr. Armouti stated that what Regent DeBardleben had said was true, but it is also consistent with the values of a pluralistic society that different people be given a fair shake and be given an opportunity to be heard and to discuss the matter. He said he was glad he could sit with the members of the Board at the same table and converse with the Regents freely--that he appreciated it. He said this is one of the advantages that you find in this society that you might not find in other societies. Regent DeBardleben inquired wouldn't our society be a sterile place if we could only recognize the accomplishments upon which everyone could agree. Mr. Armouti responded that he appreciated that point of view and that it is not a good thing to have one view; otherwise you are not part of a democracy, but there is a point beyond which people, including this Board, should consider things more thoroughly.

Vice President Lavine recognized David Marks, Vice President, Student Association, UW-Milwaukee. Mr. Marks, in response to a question by Regent Barkla, stated the Committee considering the matter had two students on the Committee, one of whom is the President of the Student Association, and he could not attend the meeting on the particular day it was held. The other student representative was there, voted with the majority, left the meeting, thought about the ramifications and came back to the Student Association the same day and reported what was voted on and pointed out there may be a problem which was not considered in the committee meeting. That was when the Student Association started discussing with the campus administration and students on the campus to find out what their reaction would be.

Vice President Lavine recognized David Kersting, a UW-Milwaukee student. Mr. Kersting pointed out that he was an independent student, not associated with any group, and that there are a great many students on the UWM campus who strongly oppose naming the library after Golda Meir. He said the American students who oppose greatly outnumber the Arabic students who oppose it, and many are not involved in political organizations, don't have any interest in any kind of political activism, but do read the newspapers and are aware that the Zionist side of the Middle East debate has been heard much more than the other side. He said the Zionist side has practically dominated the press in this country, noting that when the United Nations voted that Zionism was a form of racism, the Milwaukee Journal in the following week published a letter in its editorial comments ridiculing the decision in a rather unscholastic manner and in mocking terms, and people sent letters urging the Journal to print the text of the resolution, or somehow try to help the readers understand

how people arrived at support of the resolution, but none of these opinions was ever published. He continued that he felt that perhaps people who have spent thirty years of their adult life favoring the Zionist side of the issue can be excused for thinking that Golda Meir's name is not political, but a lot of younger people have become interested in the Middle East situation since the late sixties after the six-day war, and in the mid-seventies watched the press's position on the Middle East change drastically. He said he felt the Palestinians are getting a hearing now, and if they had been getting a hearing all along, Mr. DeBardeleben and the others would not think lightly of the controversy surrounding Golda Meir. He said he felt it unfair to compare her with Adolph Hitler, but not unfair to compare her with people like Ian Smith or Richard Nixon, whom many students would oppose for a name for the library. He said naming the library at UWM after Golda Meir would be something like naming the library after William S. Moreland in 1966, and it will be a constant source of trouble and provocation for the University of Wisconsin-Milwaukee to get that name tacked on to the library. He noted there has already been spray painting done on the library, prior to the decision, and he had never seen that sort of thing at UWM before and he would not stay at UWM if it went in the directions the students are going now. He said it is understandable that Milwaukee people would treat Golda Meir as an individual, but the University is supposed to understand a broader view of things and that a responsible and conservative point of view would be to not identify the library with an extreme kind of politics. He said you should not honor even a hometown figure who became famous by doing something that is offensive to half of the population of the world.

Mr. Marks stated that whenever an issue has come up on the campus that has the potential of being brought before the Board of Regents, there has always been an attempt to discuss with the administration on campus at their urging all of the problems involved in trying to reach a decision because it had always been understood that bringing a controversial decision before the Regents and taking up their time was a no-gain proposition for the University. He said that at the time the students did have discussions with the administration, he as well as other student leaders were led to believe that if the Student Association took a position requesting that this be brought back to the campus, the Chancellor would be willing to withdraw the recommendation. He said unfortunately this did not happen even though the student government on the campus had taken the position of let's discuss the decision and what went into it. He said the student position was that what needed to be discussed was what happened at the Committee level. Committees and processes do not always consider all the issues involved and apparently what happened was that for one reason or another the Committee saw that this would be a good idea to honor a former Milwaukee resident and someone who had gained leadership, but did not consider possible political ramifications. He said he felt what we have to look at is do we want the central building on a multi-cultural international campus to be named after a controversial political figure or might it not be better and more in the interest of the student population to name it after an academic person who has emerged from the University and done significant work. He noted there has been talk on the campus of the debt that is owed to the native American tribes which used to reside on what is now the Milwaukee campus before the land was taken from them. He continued the Student Association has not taken the position on whether it should be named after anybody, and asked that the matter be deferred so that people on all sides of the issue could be heard as to why it should or should not be named after Golda Meir or why somebody else might not be a better choice. He noted that there have been indications from the embassies of Arab countries that they will withdraw their students from the UWM and perhaps the UW System and he did not feel that risking losing that many cultures from an educational institution should be risked because of the devastating effect on the student body.

Regent Elliot stated that he had no great hangup as to whether the building is called one thing or another, noting that the building now contains periodicals, literature and books, etc., relating to the Nazis and the Ku Klux Klan, the labor movement, the Arabs and their leadership, and it will still continue to function in that manner.

Vice President Lavine recognized Jessie Schwade, Senior nursing student at UW-Milwaukee. Ms. Schwade noted that the opponents to the naming of the library after Golda Meir said that she was a Zionist and Zionism is an evil thing. She said that on the contrary Zionism was the most meaningful revolution in the history of Judaism--Israel is always central in the self-consciousness of the Jew in prayer and in hope, in his ways of life, and in his innermost urgings, in every corner of his dispersion. The behavior mode of the Jews can not be depicted without this unbreakable bond. She said surely she must determine her own identity of a Jew out of this bond with the land of Israel. Zionism set out to liberate a people, not a land. This is the end purpose of Zionism and it is the moral justification. Whoever denies it, denies the right of Jews to be free. These are the ideals to which Golda Meir devoted her life. To the extent that there is a controversy here, it is a controversy over the ideals of democracy and human justice which Israel represents, and the Jewish way in which modern Jewish reality was given light. She said that to postpone naming the library would put a question mark on the right of the Jews to be free. She said we should be proud to honor Golda Meir for her magnificent accomplishments by placing her name on the UWM Library.

Vice President Lavine recognized Nathaniel Tolwin, a UW-Milwaukee student majoring in history. Mr. Tolwin stated he feared there had been a wrong emphasis placed on the matter of politics in this matter. He said that politically he many times disagreed with Golda Meir, but as the framers of this proposal realize, and as Chancellor Baum has pointed out, that topic is not an issue. When you honor a great person, you look and think of the essence of that person's life and what it represents in a historical sense to this country, this day, and this City, Milwaukee. When Golda Meir died, she didn't leave money and property, but rather the legacy of a good name. She came to America a refugee from Czarist Russia seeking freedom and liberty. She came to Milwaukee, which is a city of minorities and refugees. Her ideals were nurtured and developed at our schools and more specifically at Milwaukee Teachers College which became UW-Milwaukee. She as a woman gained the knowledge and spirit to rise to the pinnacle of world leadership. Her life set an example for all the homeless people in despair who came and do come now to this country in hopes of a better life. She showed that the American dream is an ideal that is good and needed and can be fulfilled. Historically therefore, what more worthy gesture can this community and the University make than to name the University library after this brave and courageous woman? To delay naming the library after her would not only be an affront to her name and the University, but also to the City of Milwaukee.

Vice President Lavine recognized Johathan Levy, Instructor in Economics, UW-Milwaukee. Mr. Levy stated the proposal has moved through many committees and been considered in many forms. It is suggested that further delay is required to get additional student input. He said he did not agree as the proposal was unanimously passed by the UWM Physical Environment Committee, which has two student members, one of whom was present, and Student Association President Ragland did not see fit to attend. He noted that the past Sunday the Student Senate passed a resolution urging the decision to delay and that resolution was passed with no debate or discussion by the Senators on the merits of the issue, perhaps because the Student Association is controlled by a bloc of members who apparently meet in private before the public meeting and agree

on voting strategy. He stated the Board of Regents' Physical Planning and Development Committee had met on the previous day and that he was there, along with other members of the the UWM Jewish Community to make their views known on the subject and if the occasion arose, to respond to any arguments brought up against naming it after Golda Meir. None was forthcoming, although a representative of the State Association of Student Governments did convey the UWM students' request for delay. He reported the proposal was then approved unanimously by the Committee. After the meeting had adjourned, some opponents of the proposal did appear and spoke before the Committee. He said that while he supported their right to be heard, he questioned their procedure. By failing to appear at the appropriate time for discussion they exempted themselves from critical commentary by supporters of the resolution, which the Committee had already approved unanimously. He continued this hardly sounds like a debate in which the pros and cons of an issue were discussed, but it does seem typical of the way that opponents of the resolution presented their case. He said that during the last few weeks he had spent considerable time in the UWM Union listening to the arguments of those who opposed naming the library after Golda Meir, as well as taking part in the discussion. He continued that he felt Mr. Kersting was less than candid when he portrayed himself as an apolitical student, because he had written a vitriolic article which appeared in the UWM Post and that in spite of his devotion to his studies, he managed to work virtually full-time for the last couple of weeks with the anti-Zionist group in the UWM Student Union. Mr. Levy stated that each day that he spent in the Student Union he heard and saw the same dozen or so people make the same set of points--Golda Meir was a Zionist, Zionism is evil, a racist ideology, therefore Golda Meir is not someone to be honored. He stated there is controversy over the nature of Zionism. He said Zionism is a movement to re-establish Israel as the national homeland of Jewish people and is an aim through the State of Israel to guarantee the survival of the Jewish people. Long experience has taught us that we cannot entrust our survival to other nations. There must be one place at least in the world which has a goal guaranteeing that one can live freely and openly as a Jew. In addition to the ideal of preserving the Jewish people, the State of Israel upholds many other ideals of political and economic freedom in common with countries like the United States. He noted a recent State Department report on Human rights, pointed out that Israel is a full-fledged parliamentary democracy of extremely high standards of justice and human rights. All of its citizens, regardless of religion or ethnic background, enjoy freedom of the press, of assembly, of expression, of religion, and other political and economic freedoms. Golda Meir devoted much of her life to the establishment and the nurturing of the State of Israel. From those who admire the noble principles of the equality and preservation of the Jewish people, for which Golda Meir stood, she is deserving of the highest respect and admiration. He urged that the Board reject, as our national government has done, the false equation that Zionism is racism. He said Golda Meir grew up in Milwaukee, attended the State Teachers College there, and it is fitting that the UW-Milwaukee Library should be named after a Milwaukeean who achieved such greatness.

Vice President Lavine recognized Saul Sorrin, Anti-defamation League, Milwaukee. Mr. Sorrin stated that he felt Golda Meir deserves being honored on account of her contributions as a world leader, as a leader of democratic socialism throughout the world, as a builder of a free trade union movement in the State of Israel, as a spokesman for the rights of women, for her role as a mother, for her development of the principles of equal rights, which to this day guide the State of Israel, and as was indicated previously had been so recognized by the Department of State and by such organizations as the Freedom House. Millions of people throughout the world have repeatedly indicated in polls and in other ways the tremendous admiration and respect for this woman who received her education and was nurtured in the American tradition of

freedom in Milwaukee, Wisconsin. He said a distinguished committee of leaders in Milwaukee, representing politics and government, the University community, labor movements, and racial and religious groups in the city is now being convened to find ways of creating an annual Golda Meir national festival. He urged that the issue not be allowed to become politicized and exploited by political activists.

Regent McNamara stated we are discussing the proposition of naming a building after an individual whose roots are in the community and in the University. The opponents are making their case purely on political matters. He noted that in the United States we name buildings after a lot of people; for example there are a great many buildings named after Winston Churchill because his mother was an American. He said he disagreed completely with everything Winston Churchill has done as a politician, but supported naming buildings after him because he was a great world leader. He continued we are proposing at the moment in Milwaukee to erect a statue to Douglas MacArthur. He said he opposed everything that MacArthur stood for as a politician, as a statesman, and as a soldier, but he was not going to oppose the statue in Milwaukee, because whatever his personal prejudices about him are, and he confessed a great deal of it is personal prejudice, having served in World War II, he recognized that in the minds of a great many people throughout the world Douglas MacArthur was a great man and was worthy of having a statue named after him in Milwaukee. He said he had the same view about Golda Meir. Regent McNamara stated he clearly was not a Zionist, and had disagreed politically with many of the points of view expressed by the Zionists, particularly some of the more militant ones. He said he did not agree with everything that Israel has done as a country, or things done by any other country, but he noted it is one of the twenty-three or twenty-four democracies left in the world and that this overwhelming resolution against Israel that had been mentioned was a cynical, shoddy deal engineered by the Soviet Union and its client states aimed more against the United States than against Israel. He noted that not a single country voting for the resolution was a democracy, or to his knowledge is there a single Arab country which today is a democracy. He stated Golda Meir was an individual whose roots were deep in the Milwaukee community--she came here as a very young girl, settled in Milwaukee, grew up there within the political left wing movement there, went to school at the predecessor school of the University of Wisconsin, became a great world leader, and her greatness is really attested to by the opposition expressed here today. In a sense he knew of no greater tribute to her. He said the Palestinian problem is as much a creation of the Arabs as it is of the Jews--both bear a share of the guilt. He said we are not talking politics today, we are talking about a very simple proposition, naming a building on the University campus after a woman whom he did not always agree with, but whom he admired to the end of her days. He said he felt this is what most Americans feel, and that if we were to name the building after her, we would have the overwhelming support of the American people. He said we might not have the support of the 600 Arab students who make up a portion of the 150,000 students in the System, but hoped that all of us would adopt a more tolerant attitude toward great people, great leaders, in other political movements. He said he did not agree with a great many people in the world arena, but admired many of them, and if a person who had roots in Milwaukee with other points of view were to be accorded an honor, he would support that as well. He said he hoped we would vote for the resolution today because if it is temporized, then we would erroneously give the impression that we are supporting a point of view which is anti-American and anti-democratic.

Regent Barkla stated that when you are talking about racism and criminal activities by the Zionists, that is a political view. What is going on in the Middle East in terms of women is criminal but not racist; it is worse than that.

She said she would like to be able to name a building in this state and in this country after an outstanding woman from the Middle East, preferably from an Arab nation. What is happening in that part of the world in terms of repression of women, as was demonstrated by her sisters in Iran yesterday, makes that almost an impossibility at this time. She said she would say to her friends from the Arab nations, you are studying with us in Wisconsin, and that if she could vote to honor a woman from the Middle East from Wisconsin like Golda Meir, she could send a message to the women in the Middle East about their chances for coming to Wisconsin, Milwaukee, River Falls, Oshkosh, and to this country, and what this could accomplish for them.

Regent Beckwith stated that he did not feel he would be in any better informed two months from now and therefore would not seek a delay. He said he would support the Committee recommendation but was troubled about the matter. He said he said our policies in the future should restrict the naming of University buildings to persons who have achieved positions of leadership in the world of scholarship, science and higher education. He said in his view it is unwise to name University buildings after political leaders and was particularly concerned in this case what the discussion in the last hour had demonstrated. He said we have used the naming of a University building as a vehicle for political discussion and debate, and he did not believe that is in the right context. He continued that he felt that political discussion and debate, Zionism, women's rights, etc., are entirely appropriate in a University, but in the context of discussing issues, not the naming of a University building. He said the fact is the naming of this building does reflect pride of a group of people in Golda Meir. It is a religious pride, an ethnic pride, and a political pride, and he had no quarrel with that whatsoever. He said that if someone were to propose to build a statue to her or to name a public building after her, he would have no quarrel with that, but he noted that he was a Regent of the University and it is troublesome to get involved in a political debate over the naming of a building of the University. He said he was concerned that a negative vote would be interpreted as a political vote--a vote against Israel or Zionism, or a vote against the friends and supporters of Israel and Zionism, and a vote against many people in this state and the Milwaukee community who are very loyal supporters of the University of Wisconsin-Milwaukee, and who revere Golda Meir. He said he believed it was the Committee's intent to honor a distinguished former student, a person who had been recognized throughout the world for her intelligence, humanity, and quality, wholly apart from her political point of view. It is on that basis that he felt it can be justified to name a building after her. He said he intended to propose that after we have taken this action, we seriously discuss whether we are ever going to get into that process again. He said his own view is that we ought to make it clear that that is not a proper way to recognize a person and that the recognizing of persons by naming buildings after them should be restricted to those who have achieved leadership in areas which are of particular concern to the University--scholarship, science, and higher education.

Regent Erdman stated that she felt that the Board should not allow itself to be drawn into the near Eastern controversy, and this is exactly what the opponents of the resolution would like for us to do--to take sides. She noted that all the proper procedures had been followed on the UWM Campus--the students were consulted and had their opportunity to put in their views and if we go back on this recommendation and do not follow what has been recommended to us by these two committees, we will be opening up the Milwaukee Campus, and probably the entire System, to a kind of debate which would be completely emotional and will leave bad feelings based on misinformation and based on hatreds of the past and the present.

Regent Fox stated that he disagreed with Regents Beckwith and Erdman relative to adopting a policy preventing naming facilities or buildings or recognizing people who are in politics and are controversial figures. He said that represents a pretty narrow point of view. He noted that our University teaches government, and that those who excel in government are often controversial. He said he felt they should be recognized as well as the academicians and others who come out of the University community, or who stay in the University community. He stated he felt we should continue recognizing people who deserve recognition.

Regent DeBardleben stated that he supported the resolution because it is a matter that has properly come to us via the proper channels of the University of Wisconsin System, it is an action that has a proper logical and rational basis, and should be supported on that basis. He said he shared Regent Beckwith's views that we should address ourselves to the policy question of whether we should not follow the procedure that has long been followed on the Madison Campus of naming buildings after people who have distinguished themselves in academic endeavors.

The question was put on Resolution 1846, and it was voted.

Regent Gerrard noted that the proposed gift-in-kind of an Alumni Center from the UW-Whitewater Foundation was deferred from the last meeting in order to enable Chancellor Connor to provide background and additional information. He reported that in addition to Chancellor Connor, Mr. Wallace Zastrow, the Alumni Director, Mr. Leonard Converse, member of the UW-Whitewater Foundation Board and a contractor, and Dr. Kay Harcy, President of the National Alumni Association, appeared in support of the request. He reported that after considerable discussion the resolution was approved with the understanding that the proposed site will be restudied by the UW-Whitewater Campus Planning Committee and Alumni and Foundation representatives, with further review by the Chancellor and approval of the UW System Administration. Construction is not to proceed until funding to complete the project is available and appropriate financial guarantees are made by the UW-Whitewater Foundation, Inc., to assure total funding of a completed project. He reported the resolution had been approved in the Committee meeting on the previous day, with Regent Fox voting "No".

Regent Gerrard moved adoption of the following resolution, and the motion was seconded by Regent Erdman:

That, upon the recommendation of the UW-Whitewater Chancellor and the President of the University of Wisconsin System, Resolution 1171 (adopted 2/6/76) be rescinded and the Board of Regents indicate willingness to accept a "gift-in-kind" of the construction of an Alumni Center on the site of "Old Main" on the UW-Whitewater campus from the University of Wisconsin-Whitewater Foundation, Inc., contingent upon the restudy of the site for the Center by the UW-Whitewater Campus Planning Committee and the Alumni and Foundation with further review by the Chancellor and approval of System Administration and with the provision that appropriate financial guarantees be provided by the UW-Whitewater Foundation, Inc., to assure total funding of a completed project.

Regent Fox stated he voted against the resolution because we are indicating willingness to accept a gift that has not been designed yet, nor has the location been decided. He said it appeared to him that this is a backward way of doing things, that we ought to get the design for the building and its location, and it ought to be approved by the Campus Planning Commission before we indicate our willingness to accept it. Regent Barkla stated that the resolution covers the concern that two members of the Committee had. She said the Director of Alumni Relations and a member of the Whitewater Foundation Board said they can't get support for the project unless there is some indication from the Board of Regents that they are willing that there be a project. Regent DeBardleben stated that he felt the resolution is meaningless, you can't read it, and questioned what we have really decided if we adopt the resolution. Regent Gerrard noted the matter had been before the Committee at two different times and the building is not to his liking, but it represents Old Main. He said the Whitewater Administration had given assurance that they would like to go out and start enlisting Alumni, and Mr. Anderson and Vice President Winter have agreed to work with them in the design of a building, and with Central Administration watching over it, he was assuming that everything is going to work out. Chancellor Connor reported the Foundation has raised \$80,000 thus far and the campus wants to complete the project and in order to get the support of the Alumni, they have to have assurance that the gift will be accepted. He said if it is not going to be accepted, there is very little incentive for an alumnus to donate to this project.

Regent DeBardleben inquired why would there be any assumption that a gift would not be accepted. He said we don't have anything on the table--we are asked to accept something and we don't have anything to accept. Vice President Lavine stated that he felt that there was general support for the idea, but that rather than trying to accept an idea without a site, and without an architectural plan, and without knowing what we are accepting, would it not be possible to get the site decided on and at least preliminary planning done so that we have some understanding of what kind of a building it is.

Chancellor Connor responded that planning and designing costs money, but he could have it back within a period of approximately two months. Regent Fox stated that is not what the resolution says and felt the reason these people want the resolution passed is so that they can talk to people to solicit funds based on that building and a specific site that they have in mind. He said that is exactly what we are not doing--we are not deciding the site, we are not deciding the kind of building, and he felt that what we would be doing is boxing ourselves in morally to having to take anything that is presented. In response to Regent DeBardleben's question as to what is the site that is to be re-examined, Chancellor Connor responded there are some questions about the specific location at the same place where Old Main previously existed. Regent Erdman noted that other Foundations within the System raise money for general purposes and noted there is a fund-raising drive on the Madison Campus now for support of research there. She inquired why it would not be possible that the Foundation would raise money for the benefit of the University of Wisconsin-Whitewater and when it has the funds in hand for a specific project, come to us and ask for approval for a specific thing at that time.

Chancellor Connor responded the problem is that we have Alumni that would give to this specific project, but might not give it for another purpose.

Regent Barkla moved to amend the resolution by adding the words "and approval by the Regents" after the words "System Administration", and the amendment was seconded by Regent Gerrard.

Regent DeBardeleben stated that he felt that there is an important philosophical question involved which he would like to have addressed at the point when we have a definitive proposal before us, and that is whether an Alumni House should be built on public land. He noted the question came up many years ago at Madison whether the Alumni House should be built on University property. He said he happened to think that it should not be. He felt they should go out and buy some land if they want to put up an Alumni House. He reported he was overruled on that, and they decided to put it on state land, but there is a question here and he felt we should have a definite proposal before us when we are asked to vote on a matter such as this. He said it is arguable whether this is a public purpose, whether it is an educational purpose, and he did not feel we should be asked to sign a kind of a blank check.

Regent Fox moved that the resolution and the amendment be tabled until definite plans have been submitted and the recommendation of the Planning Committee at Whitewater is received by the Board of Regents, and the motion was seconded by Regent DeBardeleben.

The question was put on the motion to table, and it was voted, with Regent Barkla voting "No".

Regent Gerrard moved adoption of the following resolution, and the motion was seconded by Regent Fitzgerald;

Resolution 1847: That, upon the recommendation of the UW-Oshkosh and Whitewater Chancellors and the President of the University of Wisconsin System, the Campus Development Plans, as updated, be approved to document physical facilities and campus boundaries for UW-Oshkosh and UW-Whitewater.

Regent Elliott noted for the record that the River Commons Building at the University of Wisconsin-Oshkosh is one of four or five alternates being discussed by the local VTAE district for use, but did not wish there to be a preconceived notion that the building will definitely be used for vocational education. Chancellor Penson confirmed that the building is up for sale, and it seemed appropriate to get a reasonable price because part of the burden of the building is being borne by UW-Oshkosh students.

The question was put on Resolution 1847, and it was voted.

Regent Gerrard moved adoption of the following resolution, the motion was seconded by Regent Barkla, and it was voted:

Resolution 1848: That, upon the recommendation of the UW-Green Bay Chancellor and the President of the University of Wisconsin System, authority be granted to plan, bid and construct the steam and condensate line pipe insulation minor project at UW-Green Bay, at a cost of \$168,400 from General Purpose Revenues.

Regent Gerrard reported the Committee deferred action on a request by the Flad Development and Investment Corporation for authority to proceed with a restaurant on a parcel in the University Hill Farms area. Regent approval is required in order to proceed with the project to construct this type of commercial facility in the area. The matter is to be returned for action in April.

- - -

REPORT OF THE COMMITTEE OF THE WHOLE

Vice President Lavine reported President Young provided a brief overview of the System's budget, noting the fact that the Governor has recommended an increase in GPR support of \$13.2 million in contrast to the System's request for \$54 million, exclusive of the State Laboratory of Hygiene. He stated this figure falls substantially short of the needs of higher education. He reported the response to the request for suspension of the enrollment funding formula was seen as constructive. He noted problems in the current funding formula failed to take into account the actual cost of part-time students and the failure to take into account that fixed costs of instruction as a proportion of the total costs increase as enrollments decline.

Vice President Lavine reported the Governor's recommendation in relation to the Center for Health Sciences and staffing thereto was discussed and support for the advanced opportunity grants which provide fully funded graduate education for minority students. He reported there was discussion of programs to hold down student costs and plans for increasing the size of the medical classes. He noted there was not additional funding for outreach programs, although public demand and need are increasing. He reported there was also discussion of enrollment and fiscal targeting.

Vice President Lavine reported the final matter discussed in the Committee of the Whole was the School of Veterinary Medicine. He recalled that we submitted a recommendation that if the school was to be built, Option 4 was the desirable choice. He reported that Regent Erdman voiced objection to the resolution, feeling that the System should look seriously at any request of this magnitude, when substantial reductions had been made in the operating budget of the System, and it was her feeling that until there had been significant restoration of dollars in the System's biennial budget request, the Regents should withhold submission of this documentation. He reported Regent Fox expressed concern about this program funding reductions for the University's Medical School and the adverse effect such reductions would have on the quality of that school's program. He stated Regents Lawton and Fitzgerald felt the Board did not have an opportunity to discuss the philosophic question of whether or not the System should establish a School of Veterinary Medicine. Vice President Lavine stated the opinion of the majority of those in attendance seemed to be that since the Legislature had established that "there shall be a School of Veterinary Medicine" and the Governor had requested that the Regents submit a request for a School of Veterinary Medicine, and the cost of construction be added to the budget, it would be inappropriate not to respond.

Regent Grover moved adoption of the following resolution, the motion was seconded by Regent Barkla, and it was voted, with Regents Erdman, Fitzgerald, and Fox voting "No":

Resolution 1849:

That, pursuant to the request of the Governor of the State of Wisconsin and upon the recommendation of the UW-Madison and UW-River Falls Chancellors and the President of the UW System, a major project request be approved as a part of the 1979-81 biennium capital budget to construct a School of Veterinary Medicine, University of Wisconsin-Madison, with a Satellite Food Animal Clinical Facility at the University of Wisconsin-River Falls, in accordance with Option 4 of the November, 1978, Report of the University of Wisconsin System to State Government on Veterinary Medicine, at a total project cost of \$30 million (\$28 million for facilities plus \$2 million for site costs) to be supported by General Purpose Revenue funds; and

That, upon the recommendation of the UW-Madison Chancellor and the President of the University of Wisconsin System, an increased operating budget request of \$1,327,400 in General Purpose Revenue funds be approved for the 1979-81 biennium to provide sufficient funds and positions to continue planning of the School of Veterinary Medicine and enable operation to begin by the Fall of 1983; and

Further, that, the Board reaffirms its position, as stated in Resolution 1788, adopted December 8, 1978, that: "...the Board affirms its earlier position that funding and positions for a new School of Veterinary Medicine must be in addition to the budget needs of the UW System as now reflected in the biennial budget recommendations of the Regents to state government..."

- - -

UNFINISHED AND MISCELLANEOUS BUSINESS

Regent Beckwith expressed his sincere regret that Werner Baum is leaving as Chancellor of the University of Wisconsin-Milwaukee. He said he had known Werner as a friend for as long as he has been in Milwaukee, and more recently as Chancellor, and since he had been on the Board of Regents. He stated Dr. Baum is an outstanding scholar and administrator and in his view has carried the UW-Milwaukee Campus to a great degree of success. He said that in his opinion, Dr. Baum had the full support of the Board of Regents, should there be any question about that. He continued that he regretted his resignation and regretted to lose his contact as a friend, and the System will suffer from his loss as a Chancellor, a feeling that he was certain is shared by his fellow Regents. He stated he had had an opportunity to chat briefly with Dr. Baum on his most difficult decision and it reflects the fact that our Chancellors and System Administrators, the President, etc., are under extraordinary pressures from the state, federal, parents, students, and increasingly from the advocacy press of the city newspapers. He said he felt it is our obligation as Regents to try to address ourselves to that and try to make the life of our chief administrators something that is closer to the world of scholarship and less close to the world of controversy. He wished Dr. Baum great success.

- - -

Regent DeBardleben moved adoption of the following resolution, the motion was seconded by Regent Fitzgerald, and it was voted, with Regents Barkla, Beckwith, DeBardleben, Elliott, Erdman, Fitzgerald, Fox, Grover, Lavine, Lawton, McNamara voting "Aye":

Resolution 1850: That the meeting recess into closed session to consider personnel matters as permitted by S. 19.85(1)(c) and (1)(f), WIS. STATS.

The meeting recessed into closed session at 11:50 A.M.

The Board arose from closed session at 11:58 A.M.

Vice President Lavine announced that the following resolution had been approved in the closed session:

Resolution 1851: That, upon the recommendation of the President of the UW System, the retirement of Werner A. Baum as Chancellor and Professor of Geography, University of Wisconsin-Milwaukee, be accepted, effective August 31, 1979.

And, that the President of the UW System be authorized to initiate the search and screen process leading to the selection of his successor.

The meeting adjourned at 12:00 M.

3-23-79

UW-Parkside:	1977-79 Handicapped Entry (\$18,900).	
	* * *	

UNIVERSITY

PROJECT

ACTION

13. UW-SYSTEM (cont.)

Requested authority to modify the Scope of Work for the 1971-73 Library-Classroom Building project at the UW-System Pigeon Lake Field Station near Drummond, Wisconsin, and authority to accomplish portions of the work through the purchase of material and construction work to be performed by faculty, staff, and students.

DEFERRED
for statutory clarification for authority to use faculty/staff/student labor.

Whereas: Chancellor Werner Baum has forwarded the recommendation of the Building Naming Committee that the UW-Milwaukee library be named after Golda Meir to the Board of Regents for approval; and

Whereas: This action has created a political controversy within the University Community and the surrounding residential areas; and

Whereas: This controversy is particularly distasteful to many foreign students and their governments and could have an adverse effect on enrollment; and

Whereas: The allegations and denials made by parties on both the pro and con sides of this issue were never considered by the Building Naming Committee; and

Whereas: A public debate of this issue before the Board of Regents could only damage the credibility and respectability of UW-Milwaukee with the Board of Regents; and

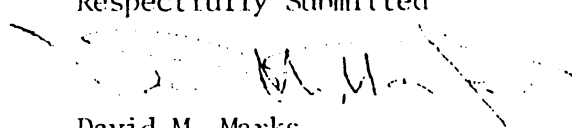

Whereas: There exists no compelling reason not to delay action on this issue until all issues and alternatives are explored;

Therefore, Be It Resolved: That the Student Association formally recommend to the Chancellor that he request the Regents to defer taking any action on this issue for at least two (2) months; and

Be It Further Resolved: That the Student Association formally recommends to the Chancellor that he, in conjunction with the Building Naming Committee and Physical Environment Committee, hold hearings on the naming of the library to enable all interested parties to present their views.

Passed by Student Senate
on March 4, 1979

Respectfully Submitted

David M. Marks
S.A. Vice President

Amended by Education Committee
Passed Unanimously by Education Committee
