UNIVERSITY OF WISCONSIN.

VOL. IV—No. 123]

MADISON, WIS., SATURDAY, MARCH 2, 1895.

[PRICE THREE CENTS.

JOINT DEBATERS

MILLER, COCHEMS AND LOCKNEY FOR ATHENA.

JUNIOR EX. TO TAKE PLACE IN TWO WEEKS.

Good Selections Made all Around—Other Society News.

There was much enthusiasm at Athena hall last night, for everyone remembered that it was the time for the election of joint debaters, and came up to work and vote for his favorite candidate. As usual the second debate was dispensed with, and the entire latter half of the evening devoted to the election. There was lots of good material to select from, and it took several ballots to decide the matter. Finally however the following were decided upon to contend with Hesperia for the honors next spring:

George H. Miller, '96.
Henry F. Cochems, '97.
Henry Lockney, '97.

There was much good feeling manifested, and the men when elected received the hearty congratulations of the members.

The election of Cochems takes from the athletic field a candidate for football honors whom the athletic association has been counting much on. He himself does not leave the gridiron without regret, even to accept this honor.

JUNIOR EX.

The date for the junior oratorical contest has been set for Friday evening, March 15. The societies will be represented by the following contestants:

Athena—M. J. Gillen.
Hesperia—H. S. McCard.
Philomathia—A. H. Schmidt.
Castalia—Miss A. Wootton.
Laurea—Miss Gertrude B. Hood.

OTHER SOCIETY NEWS.

As usual, Philomathia's hall was well filled last night. The officers elected at the last meeting were "sworn in," and Pres. Buckley in a short but forcible inaugural address outlined the work for the future.

The first debate on the question, "Are the Russian nihilists justified in their political action," was won by the affirmative, led by Wilson, '97, over the negative led by Young, '98. Maloney, '96, and Lucas, '96, volunteered for the affirmative. The second debate was won by the negative. It was on the question, "Should the term of the president of the United States be extended to six years with his ineligibility for re-election?" Shephard, '96, led the affirmative and Ela, '98, the negative. The feature of this debate was the vigorous debate put up by Ball, '95.

After the critic's report by Conway, '96, Oestreich, '97, was unanimously

elected a member and J. P. Gregg, '98, initiated.

The meeting of the Pharmaceutical society last evening was opened by a vocal solo by Prof. Leland S. Cheehey, which was well rendered and well received. Prof. F. W. Kremers followed with a lecture on the "Chemistry of Volatile Oils." Although the lecture was long, it was interesting throughout and treated of a peculiarly appropriate subject, coming in thus after the lecture on "Volatile Oils" by Dr. Barns two weeks previous.

Miss De Leny favored the society with a banjo solo, accompanied on the piano by Mr. Schempf, '96, which received a hearty encore. The society may well be congratulated on the success of its efforts to secure the very best authorities on scientific subjects, to lecture before it. This policy is greatly increasing the profit to be derived from a regular attendance of the meetings.

Pursuant to the "Cardinal" suggestion, to have a joint meeting of the literary societies of the university, Athena, Philomathia and Hesperia each appointed a committee to arrange for such a meeting. The chairmen of the three committees met last night in the library and decided to have such a meeting some time during next term as the different oratorical contests make it impossible to carry out the plan this term. It was further decided to invite Castalia and Laurea to participate.

The debate which preceded the election of Athena's joint debaters was upon the Webster and Clay question. It was decided that Webster was the greatest statesman. Chandler was the champion of his cause, against Chase for Clay. This debate was one of the most interesting of the term, and brought out quite forcibly the fact that such questions are at times a pleasing departure from the usual dry economic question.

The joint debate between the engineering societies will take place May 10. The question for debate is: "Resolved that engineering achievements in the past one hundred years have done more to destroy insular prejudice and to bring men together in harmonious relations than all the preaching and forensic speaking of the past eighteen hundred years."

—The joint debate between the Agricultural society and the Dairy society has been given up on account of lack of time.

CHRISTIAN ASSOCIATIONS.

Dr. H. L. Russell will speak to students at the meeting of the Christian associations tomorrow. Meeting at 4:30 p. m., in the Law building. Everybody welcome.

—The candidates for the 'Varsity crew were on the machine by themselves this week. Previously they had been distributed among the freshman and sophomore crews. The number of the candidates for the crews has been reduced to forty, forming five crews, the 'Varsity, Sophomore and three Freshman crews.

A SHELL WANTED

CREW MUST HAVE ONE IF IT WINS ANY RACES.

WHICH IT CERTAINLY WANTS TO DO.

The Pabst Shell Is Worn Out—Paper Has Lost Its Stiffness.

The Minnesota 'Varsity crew has been in training since January and inasmuch as it has had the best of coaching from Kenedy and has had the best of indoor practice on the rowing tank belonging to the Minnesota Boat club, of St. Paul, the prospect for a strong crew in that institution this year is very certain. The question therefore comes home to our own crew, "Are we going to maintain our athletic championship over Minnesota when we meet its crew on the water this year?" We have a very pronounced advantage, as is acknowledged by every one who knows anything about the matter, in point of the rowing experience which our oarsmen have had. But this is not going to give the race to our eight if it is compelled to row in the shell which has run two seasons of hard usage. The Pabst shell is worn out. It has lost its stiffness, which is a great requisite to the speed of the boat, and the paper is in such a bad shape at the points where the sections meet, that the boat would be utterly unfit for racing purposes. The crew might have made fifteen seconds faster time last year if it had had a shell in good condition. This was conceded by Coach Kenedy and all of the Minnesota crew men who were invited to examine the shell before the race and give their opinions of it.

The crew men have been in faithful training since the first week of January and are now doing hard daily practice on the machines. The practice of crew men has always been noteworthy in all institutions, and especially at Wisconsin, for the faithfulness with which the men live up to the training and dieting principles. It is absolutely necessary to do so in order to succeed in boat racing. Five or six months of such training is a period which is covered only by the men of best mettle and greatest pertinacity. The crew merits the very best support which the university can give it, and steps ought to be taken at once to secure a first class shell to fit out the 'Varsity this year.

Coach O'dea asks for a cedar boat. The Australian oarsmen as well as the English use cedar boats almost exclusively. They claim that the stiffness of cedar makes up for the slight increase of weight. The navy has been in active correspondence with all the boat builders of the country and has several good bargains in view, but as yet the lack of funds has prevented the purchase of a new boat.

—Rev. F. W. Gunsaulus, D. D., will deliver his lecture on Robert Browning in the M. E. church March 12. This is the last in the city course.

MELVIN CLUB.

The Melvin club will meet this evening at the home of Miss Lizzie Purcell, 203 E. Washington avenue. The program for the evening will be as follows:

Music—Miss Rose O'Brine.
Address—Senator Kennedy.
Music—Miss Kittie Spencer.
Recitation—Miss Kittie Luft.
Paper on Life of Father Ryan—Mr. Healy.

Reading—Miss Kelley.
Quartett—Mesdames Donovan and Lynch and Messrs. Purcell and Halligan.

The meeting will be called promptly at 8 o'clock.

LOCAL AND PERSONAL.

—H. S. Youker, '94, is in the city.
—Miles Keysar, law '96, was called home today.

—A. F. Bulfinch, '95, is spending Sunday, at his home near Monroe.

—E. A. Schmidt, '98, is confined to his room by an attack of the grip.

—Prof. Henry is again attending to his duties at the agricultural school.

—Repairs are being made today on the tank in the top of Main hall.

—Pres. Adams attended the U. of W. alumni banquet at the Grand Pacific in Chicago last evening.

—Prof. Morrow, of Illinois, delivered an address before the agricultural and horticultural literary society at South hall last night.

—A contingent of short course students, of agriculture, went to Jamesville today to judge stock on Galbraith brothers' horse farm.

—The Press club will hold its regular meeting in the junior law lecture room at 7:30 o'clock, Wednesday evening. A practical newspaper man will address the club.

—Wrestling apparently is becoming more and more popular among the students. Those training for the boat crews were given a series of lessons by Mr. Everett and most of them are continuing to practice daily. Besides, many others take part in this exercise so that at almost any hour the mats are covered with struggling athletes.

THE ELECTRICAL UNIT.

Professor Marsh, of Yale College, has prepared a bill, to be forwarded to congress, providing for the establishment of a uniform electrical unit. The bill is based upon the report of a committee appointed by the American Academy of Sciences, consisting of Professor Rowland, of Johns Hopkins, General Abbott, of the United States engineering corps; Professor Barker, of the University of Pennsylvania; Professor Trowbridge, of Harvard; Professor Hastings, of Yale; Professor Barns, of the Smithsonian Institution, and Professor Michaelson, of the University of Chicago. The committee's report was prepared after some conferences and much correspondence, taking in Germany, Great Britain, France and the United States. The bill aims to make the unit agree with that adopted in the three foreign countries named. Old terms are retained, and there are merely modifications of former methods or materials in the direction of simplicity and more accurate determination of units.

Both the joint debate teams are
now elected and work on the contest
of next January is already begun.
This annual test represents the climax
of debating society training and Wis-
consin prides herself upon unusual
development in this direction. What
has become of the scheme for inter-
collegiate debates. It is hard to get
too much of a good thing, especially
when there is any quantity of good
material seeking to prove its good
qualities.

The management of the coming Free-
man-Donnelley debate could have
placed no more appropriate motto on
the posters than the one which they
have chosen: "When Greek meets
Greek, then comes the tug of war."
Each of the contestants is known
throughout the length and breadth of
the land as a man of brains, an emi-
nent scholar, a man who has studied
long and well the subject on which
he undertakes to debate; each will
enter the arena feeling that he has a
foeman worthy of his steel, and each
will be nerved to his best effort by
the additional thought that the whole
country will be listening to hear which
name after the contest the multitude
shouts as victor.

OUR CREW.

The question has come up repeatedly
in the history of our Athletic asso-
ciation, "What branches of athletics
shall we develop? What branches
shall we lay stress upon?" Happily,
however, the question has always
been answered in the only natural and
reasonable manner that it ought to be

answered. We will develop all
branches and lay special or exclusive
stress on no one branch. Each branch
depends on the others. Each branch
of athletics helps every other from an
athletic point of view. The fact that
only a certain class of athletes is suit-
ed for one style of athletics, brings
irresistibly the reason for the develop-
ment of as many styles as possible.

All who have witnessed the rise and
evolution of aquatics at U. W. know
that its growth has been a marked
one for every year of the past six
years. Aquatic sports have come to
stay and the crowning phase of boat-
ing sports—the intercollegiate eight-
oared shell race—is for the first time
made an assured event of the season.
Wisconsin can justly claim the honor
of having laid the foundation of 'Var-
ity shell racing in western colleges.
It will probably not extend to more
than one or two other western colleges
in the course of the next decade. But
that is natural as only the great uni-
versities of the country are supposed
to support crews. Wisconsin and Min-
nesota this year are two of the six
universities of the country which
maintain a 'Varsity crew.

Let us see therefore that the show-
ing of our 'Varsity crew is creditable.
The crew must have a new shell this
year. The means of raising the money
for it must be found. If we are beaten
by the University of Minnesota this
spring we will be the laughing stock
of western colleges. With our experi-
ence in shell racing, we are expected
to defeat Minnesota's crew, which will
get into a shell for the first time this
spring, as a matter of course. But
it is certain that the old shell will
never win a race. The situation is
desperate but it must be met some
way.

—Mr. Jenny, of Berlin, was in the
city for a few days visiting his son
R. D. Jenny, '98.

Teacher. "Thomas, how is it that
James can say his alphabet so much
better than you can; he never misses
a letter?"

Thomas. "He oughtn't to, 'cause his
father's a postman."

Murdock. "Oh, mamma, see the car-
riage-wheels making successful rebel-
lions!"

Mamma. "What do you mean, dear?"

Murdock. "Why, mamma, teacher
said that revolutions are successful reb-
ellions."

CHURCH SERVICES.

First Methodist Episcopal Church.
Rev. E. J. Baskerville will preach at 10:30 a. m. on "The Greatest Power in the Universe or Nature of God." After the sermon reception of members. The subject for 7:30 p. m., is "The dead, dried and scattered, brought to Life." Music by quartette. Sabbath school at 12 m. Junior league 4 p. m. Epworth league, 6:30 p. m. General prayermeeting, Wednesday 7:30 p. m. Students and visitors bible classes in connection with Sabbath school.

Congregational Church.
Rev. E. G. Updike will preach at 10:30 a. m. Sunday school at 12 m. Communion at 3 p. m. No evening service. Y. P. S. C. E. at 6:30 p. m.

Unitarian Church.
Rev. W. D. Simonds, Pastor. Morning service at 10:30, Subject, "Religion A Reality," a sermon in answer to the assertion that "God is a guess." Sunday school and students class at 12 m. Evening lecture at 7:30. Subject, "A Master of Eloquence—Thomas Corwin."

Grace Episcopal Church.—At 10:30 sermon, ordination of three deacons and holy communion. Bishop Nicholson will officiate. At 7:30 p. m. evening prayer and sermon. Bishop Nicholson will preach, addressing himself more directly to young men.

Christ Presbyterian Church.—Services at 10:30 and 7:30. Sermon by the pastor. Theme: "A New God." Evening service a temperance meeting under the auspices of W. C. T. U.

OLD DANCES TO BE REVIVED.

The Gavotte Quadrille Quite a Favorite in London.

Lovers of really artistic dancing will be interested to hear, upon the authority of so eminent a London professor as Madame D'Alise, that an early revival of the older and more stately steps and figures may be looked for. The fashionable dance in court and aristocratic circles will be the gavotte quadrille, which has had immense favor in Berlin ever since it was danced before the emperor. It is a figure of eight and similar to the quadrille, except that it begins and ends with the couples facing the audience. It is reported to be an extremely graceful dance so long as the dancers keep to the little sliding steps that are appropriate to it.

The square dances are coming in again and strenuous efforts are to be made to curtail the waltzing and galloping which have of late years entirely ruined the effect of these dances, for which special movements and steps were originally intended. It will be good news to many that skirt-dancing as a drawing room entertainment for ladies is declining in favor, owing very largely to the dislike that the best dancing masters and mistresses have to teaching it to ladies who do not intend to adorn the theater and music hall. Asked as to the present condition of the dancing art, Madame D'Alise declares its degeneration is mainly due to men who will not learn to dance, and who are only willing to walk through dances with as little effort as possible.

The air has received too little credit as a geological agent, in the belief of Prof. J. A. Udden, of Augustana college. It is 813 times lighter than water, and exerts no wave motion on the earth's surface, the erosive effect of wind therefore being important only in regions of abrupt and broken reliefs under a dry climate. Rock material can be transported by the atmosphere only as fine dust, the largest quartz particles an ordinary strong wind can sustain being about 1-250 of an inch in diameter. The carrying capacity of air for smaller particles is great, being estimated to be, at a velocity of five miles an hour, about 1-1000 of that of an equal volume of water. The whole atmosphere over the Mississippi valley, if the wind blows ten times as fast as the water runs, may transport 1,000 times as much dust as the river.

RECOGNIZING A FELLOW CRAFTSMAN.

A commercial traveler of the more flashy type had just finished a strutting story when the listener, a new acquaintance, remarked:

"That reminds me of Munchausen's yarns."

"Munchausen!" said the drummer, "who's he?"

"Why, don't you know about him? He is the most colossal example of mendacity that civilization has produced."

A moment of silence followed, broken by the commercial traveler:

"Excuse me," he said, "would you mind telling me what house he travels for?"—Washington Evening Star.
