## The Month Current

---

### **The University and the Feeding Stuff Law.**

One of the important lines of work carried on by the Experiment Station at the College of Agriculture is the supervision of the concentrated commercial feeding stuffs sold in the state. In accordance with the Wisconsin Feeding Stuff Law, passed by the legislature of 1901, all concentrated feeding stuffs licensed for sale and others found on the feed market must be analyzed by the University Experiment Station, to determine their composition. Each year the Experiment Station, therefore, analyzes hundreds of samples of these concentrated feeds and reports any adulterations or any deficiencies that are found. At the close of each year the University Experiment Station issues a bulletin giving the results of these analyses, explaining such adulterations of feed stuffs as have been discovered by the Station and indicating the comparative value of the various feeds on the market.

The provisions and operation of this law indicate the character of the protection which, through the work of

the Experiment Station, it affords to the farmers and cattle raisers of the state. The law requires that concentrated feeds before being placed upon the market, must be licensed for sale by the manufacturer or dealer; and that a guarantee of the percentage of protein, or flesh-forming substances, and of fat and oil found therein, must be plainly printed on the back of the sacks, with the name and address of the manufacturer. The law was enacted to prevent variations in the valuable component parts of commercial feeds, and to prevent adulteration, the temptations for which were never greater than at present. Immense quantities of low-grade refuse materials are obtainable at the large oat mills, hominy factories, starch and glucose factories, at almost nominal prices; at grain elevators, malt houses and breweries other waste materials are to be had in quantities and at prices that render wholesale utilization of these materials in mixed concentrated feeds both practicable and profitable so long as no state law interferes. Since laws of this character are in force in a number of eastern states, it is natural that the poorest

grades of feeds are shipped to states where there is no feed inspection law. Hence the enactment of such laws is necessary as a matter of self-defense, to prevent shipments of low-grade adulterated or even worthless goods into the state.

Although many of the most important feeding stuffs, such as mill feed, ground corn and oats, and oil meal, are generally of excellent quality and free from foreign admixtures, gross adulterations are not infrequently found through the analyses made by the Experiment Station. Occasionally ground and even whole wheat screenings are mixed with wheat bran. These consist largely of noxious weed seeds and cannot legally be added to the bran sold in the state without the fact being distinctly stated on the sacks. A single sample of wheat bran which was forwarded to the University Experiment Station for examination, contained over 50,000 whole weed seeds in one pound of bran. When the shipper was warned that the transaction would come under the state feeding stuff law, the carload was taken out of the state again and was sold in the state farther west from whence it came, and where no feeding stuff laws, as yet, interfere with the sale of such goods as pure wheat bran.

So-called ground feed, or corn and oats, ground together, was often found adulterated with oat hulls, ground corn cobs, and the like, during the first two years of feed inspection work, but the quality of these feeds on the feed market has of late greatly improved, and it is now no longer difficult to obtain pure feeds of this class. Large quantities of mixed oat feeds, or corn and oat feeds, however, are still sold in the state. Some of

these are good feeds, but none are of equal feeding value as the pure grains, ground together, and the high price which they all command is due largely to misrepresentation on the part of the feed dealers who argue that they are almost equal to ground corn and oats in feeding value. This is not the case with the best of them, and a number of these feeds sold in the state are no more valuable for feeding purposes than ground corn stalks or oat hulls would be; in fact, they closely resemble these materials in their chemical composition, containing less than 6 per cent of protein and 2 to 3 per cent of fat, and about 30 per cent of crude fiber. This latter component renders the feeds largely indigestible when present in such large quantities and reduces their feeding value to practically nothing. The poorer grades of the oat feeds are used to a large extent by dishonest dealers for adulterating ground feed.

The way in which the University Experiment Station protects the farmers and cattle raisers of the state by warning them of possible adulterations has been well illustrated during the past month. Early in February two carloads of ground rice hulls were shipped into the state, to be sold, according to the statement of the feed dealer, as egg-packing material. Ascertaining this fact, the University Experiment Station at once warned farmers and stock raisers of the danger of these hulls being used for adulterating feeds. The warning proved a timely one, for shortly after the professors at the University Station secured samples of feeds from different parts of the state containing rice hulls, and at once sent out notification of the fact to farmers and stock

raisers. As the rice hulls contain both to consumers and honest dealers forty per cent of woody fiber and from fifteen to twenty per cent of silica or sand, and as the sharp barbs upon the edges of the hulls cause irritation in the intestinal organs of animals feeding upon this material, they are not only worthless as food, but not infrequently cause the death of horses and cattle fed on them.

The feeding stuff law has proved of great benefit to the farmers and other purchasers of feed in the state during the past three years by rendering it possible to know the quality and exact composition of the various kinds or brands of feed on the market; by exposing frauds in the feed business that have come to light, and indirectly by keeping out of the state, through the fact that the law is in force, materials of low grade and of doubtful value as feed for live stock. The large majority of feed dealers in the state, as well as the buyers of feeding stuffs fully recognize the importance of the law to their business, and to the agricultural interests of the state, and heartily cooperate with the Station in its enforcement.

The law as enforced by the University Experiment Station has been worth tens of thousands of dollars to farmers and stock raisers of the state every year since its enactment, and in the future its value to agricultural interests is likely to become greater, for the ever increasing competition between manufacturers of different food materials tends to reduce prices of feed stuffs to a minimum and thereby increases the temptation to sell adulterated or low-grade goods as standard feed materials. The law furnishes a wholesome check on dishonesty and cupidity, and is of great bene-

fit both to consumers and honest dealers of concentrated feeding stuffs.

### Home Economics Ideals.

The first annual housekeepers' conference, held under the auspices of the department of home economics at the University of Wisconsin as explained in the February Magazine was largely attended and entirely successful. Miss Caroline L. Hunt, head of the new department of household economics, delivered the opening address, the subject of which was "Home Economics at the University of Wisconsin."

Miss Hunt's address, setting forth as it did, the objects and ideals of the new department of Home Economics can hardly fail to be of interest. She spoke in part as follows:

"The Department of Home Economics at the University of Wisconsin seeks to stand for the highest ideal of home-life and for the most efficient means of realizing that ideal. To this end it desires to be sensitive to changing ideals, when these embody not change alone but also progress, and to gain promptly and to spread quickly the knowledge of improved methods.

"The department of household economics would represent that for which the home stands today. It would cooperate with the department of physical education in securing helpful conditions of life for the young women who attend the University. It would, as far as possible, try to secure the most artistic and harmonious surroundings for the girls during their course at the University. It considers that one of its functions is to promote rational sociability and to open its rooms for those who wish to gather

together because of common interest in some good cause. It hopes by its very existence in an institution which offers to the women the opportunity for scholarly work of all kinds, and for preparation in all fields of work not directly connected with the home, to emphasize home making as a necessary part of every well balanced life.

"It would not stand for the unattainable, however, but for a practical ideal; and for this reason it seeks to know the means by which this ideal may be realized. Of these means which are numberless, I mention only four: First; the application of science to the affairs of every day life for the purpose of promoting health; Second, the simplification of the machinery of life to the end that life itself may be elaborated; Third, the training of teachers of domestic arts to the end that the schools may cooperate with the home; Fourth, the holding of conferences among practical housekeepers to the end that whatever one has learned by experience may be made a benefit to all.

"The first of these means, the application of science to every-day affairs, is the object of its more formal courses, those offered in the college of letters and science. As preparation for these courses it encourages the young women to take thorough work in chemistry, physics, bacteriology and other sciences in order that in after life they may avoid the difficulties which lie in the path of those who would make practical application of the results of scientific research; difficulties which are caused by ignorance of scientific methods and scientific literature and are the result of dependence on a popular science which is full of errors.

"Again, the department would stand for simplification of the machinery of life. The ideal of life which it upholds is obviously not simple, but elaborate and complex,—a life which includes healthful, physical and mental activity, enjoyment of nature and artificial beauty, leisure for intercourse with friends, and the joys of service. The real simplification which we need is not that of life but that of the machinery of life, including the machinery of home making. This must come from a thorough understanding of the ends in view and also the means, and must take the form of direct application of means to ends without unnecessary loss of time and energy. It involves the using of the best of housekeeping appliances and the knowledge of the best methods of doing work and the successful attempts at cooperation. The department plans for the future a museum which shall display up-to-date housekeeping tools and other things of interest to housekeepers. This museum will probably take the form of a model kitchen.

"Again, it stands for the training of teachers. While it gives no distinctly normal course, it teaches the subjects of home economics, and brings also before the students the object and social value of teaching domestic arts in the lower schools. Special summer courses primarily for teachers are to be given both for those who wish to specialize in the subject, and also those who wish to incorporate instruction in domestic science into the general courses in primary and secondary schools.

"Finally, the department desires to bring about conferences between the housekeepers of the state, for the purpose of encouraging discussion of sub-

jects of interest among those occupied with household duties, in the hope that the conference will be what the word conference implies, a bringing together of ideas that have been proved by practical experience. It is of this hope and desire that the present conference is an expression."

### State Bar Resolutions.

The necessity of making provision for a substantial addition to the income to the College of Law has come to be recognized by all the friends of this department and by none more strongly than the members of the bar of Wisconsin.

At the business session of the State Bar Association, held in Madison, March 1, the subject of legal education and requirements for admission to the bar were discussed. The Committee on Legal Education, consisting of W. D. Van Dyke, Milwaukee; George F. Merrill, '72, Ashland; Francis Williams, Sheboygan; Burr W. Jones, '70, '71, Madison; W. J. McElroy, Milwaukee; E. W. Chafin, '75, Waukesha; and Professor H. L. Smith, '81, '85, Madison; presented a report at this meeting which considered the recent changes in the requirements of the Board of Law Examiners, and the higher standard for admission to the College of Law. It was recommended that the Legislature and Board of Regents make such provision for the maintenance of the University College of Law that it will no longer be dependent for its support entirely upon tuition fees. In regard to the question of continuing the College of Law upon a self-supporting basis by the system of tuition fees, the

report of the Committee was as follows:

"The College of Law of the University is the only institution for legal education in the state of Wisconsin. It is the oldest of all the professional Colleges of the University. From the start it has been substantially self-supporting. It is the only department of the University in which tuition fees are charged, and in the past the feeling has been that for some reason, perhaps because it has tuition fees, the expenditures upon the College of Law should be limited to the amount received by way of tuition. Such a policy must necessarily discourage the raising of standards and encourage a policy which will result in obtaining and retaining the largest possible number of students. It would be especially unfortunate if at this time, when the standards are being so encouragingly raised, this policy should be persisted in.

"We are glad to note that the traditional attitude of the University towards this College does not seem to be approved by the present President of the University. In his last report to the Board of Regents, December 1, 1904, he said: 'The College of Law has not grown as rapidly as the other Colleges already considered. This is partly explained by the fact that the State has taken a different attitude towards this College than towards the others. The plan has been to make the College of Law as nearly self-supporting as practicable. However, the experience of other institutions shows that it is impossible to maintain work in law on the highest plane from tuition fees alone. So far as I can see, there is no legitimate reason why the College of Law should be placed upon

a different basis from the other colleges.' ”

The report of the Committee also commended the action of the Faculty and Regents of the University in raising the standard for admission to the Law School, by which, beginning with the academic year of 1907-1908, two years of a general University course will be required as a condition for entrance. Upon this point the Committee reported as follows:

“This is a requirement in advance of that exacted by any other State University or by any College of Law whose diploma admits to practice at the bar. The effect of the arrangement is that students who are at present qualified to pursue the studies of the College of Law may continue to do so as at present and fit themselves for the bar examinations of this and other States; but that the diploma of the University with its attendant right of admission to the bar without further examination will be conferred only on those who, in addition to completing the three years' course in law, have the equivalent of two years of preparatory University training. In effect, the diploma with its attendant right of admission to the bar, will constitute a most effective premium upon the highest degree of preparation, and can scarcely result otherwise than in very sensibly raising the standard of legal education. It is quite possible that the institution of this advanced standard may for a time reduce the numbers in attendance upon the College of Law. As the world is only too full of those who judge success by the magnitude of the results attained, without respect to quality, we deem it suitable that this Association should express its emphatic approval of the action of

the Board of Regents in this particular, and herewith present a resolution with that end in view.”

In regard to the matters presented in this report, the Bar Association adopted the following resolutions:

“*Resolved*, That the Wisconsin State Bar Association heartily approves the action of the Board of Regents of the State University of Wisconsin in raising the standard of admission to the College of Law of all candidates for the degree in law in the University, and pledges to the Board of Regents the support of the Association in all efforts to maintain a high standard of legal education.

“*Resolved*, That in the opinion of the State Bar Association of Wisconsin, no branch of instruction is of greater service and necessity to the State than legal instruction; that no reason exists for making the amount and quality of such instruction dependent upon tuition fees received that does not apply with equal force to the other Colleges of the University; and this Association urges upon the legislature and the Board of Regents that with respect to the support accorded to legal instruction in the University, the College of Law be placed upon as favorable a footing as other departments of the University.”

#### Professor Meyer Honored.

Professor Balthasar H. Meyer, '94, '97*h*, of the department of political economy at the University, has been appointed editor of the History of Transportation that is to form a part of the Economic History of the United States, the compilation and publication of which has been undertaken by the Carnegie Institution of

Washington. It is understood that a grant of \$15,000 has been set aside for the work, which it is expected will extend over a period of five years. Professor Meyer has made a special study of transportation, and especially of railway problems, and is regarded as one of the best authorities on that subject. The work which the Carnegie institution is undertaking is a monumental one, as it covers all fields of economic activity of the United States. The work of collecting material and carrying out the plans of the Institution is organized as the department of economics and sociology, and this department is sub-divided into eleven divisions each of which has been assigned to a leading scholar and investigator in that special field, Professor Meyer's being that of transportation. Among the other divisions are those on population and immigration, agriculture and forestry, manufacture, money and banking, and federal and state finance.

Professor Meyer has just completed the collection of material for a monograph on the valuation of the railways of the United States, a piece of work which he undertook under the direction of the Interstate Commerce Commission by request of the Director of the Census. He, therefore, has been acting as special expert for both the Interstate Commerce Commission and the Director of Census. Professor Meyer sails for Berlin on March 2, where he will continue special work in the study of European transportation and railway problems in relation to American railroad systems. He will complete the study of the European railroad systems which he began some

years ago, and will investigate the organization of commerce and insurance. Upon his return, he will take up at once the compilation of material for the history of transportation, a considerable part of the work of which will be carried on at the University, and will offer advanced and graduate students in political economy an excellent opportunity to assist in the collection of material for this monumental work.

#### **Increase in Attendance.**

The second semester of the University of Wisconsin opened with a considerable increase in attendance, the total number of students entering at this time being 75. Of this number 50 are new students, and 22 are re-entering to continue their work after an absence of a semester or more. The most marked increase is in the Graduate School, where 12 new students have entered, making the total enrollment of the Graduate School 143, against 115 last year, an increase of 28, or practically 25 per cent. Five of these new graduate students are graduates of the University of Wisconsin, and one each of Cornell University, Western Reserve University, Ohio State University, University of California, University of Missouri, Cornell College, and the University of Göttingen. Fifteen of the new students are freshmen, ten adult specials, eight juniors, four specials and one junior law. Of those who have re-entered to complete their work six are seniors, four juniors, six sophomores, two freshmen, and four specials.

## Lawrence and Ripon Affiliate With Wisconsin

---

One of the most important matters affecting the relation of the University with the other leading educational institutions of the State and the closer affiliation of these institutions educationally is the arrangement officially announced at the opening of the present month between Lawrence University, Ripon College and the University of Wisconsin, providing for a basis on which work taken in the two institutions first named, may be credited when students desire to continue their work in the University. The new plan of cooperation was drawn up by President Hughes of Ripon College, President Plantz of Lawrence University and President Van Hise, and has been duly approved by the governing bodies of the three institutions. Lawrence and Ripon will adopt the unit system of admission and will require for entrance the equivalent of 14 units of work, exclusive of manual training and commercial studies, which are the present requirements for admission to the University. Adopting the same entrance requirements, the authorities of Ripon and Lawrence will be furnished the accredited high school list of the University of Wisconsin for their use.

The most important aspect of the new arrangement, however, is its effect upon the migration of students from the smaller institutions to the University. Those who desire to come from Ripon and Lawrence at the end

of the sophomore year, with a satisfactory record for two years' work, may enter as juniors in the College of Letters and Science of the University. In case of migration earlier than the sophomore year proportionate credit will be given. In accordance with the general University policy, students who hold the degree of either of these colleges will be accepted as graduate students. For students of Ripon and Lawrence who desire to take professional and technical courses which are not offered by these colleges, the new plan provides that graduates of Lawrence and Ripon who have taken the mathematics-physics group of studies at these institutions and who have also taken descriptive geometry, mechanical drawing and surveying substantially equivalent to these studies in the College of Engineering at the University, may enter as sophomores in Engineering. Thus, students in the affiliated institutions may transfer to the College of Engineering on the same basis as students of the College of Letters and Science at the University.

It will also be possible for students who desire to take up the study of Law to enter the College of Law and receive credit for their law studies in part requirement toward the bachelor's degree at their own institutions. By this plan, it will be possible for them to combine the general education of the college course with the technical and professional work and reduce the

length of the combined course from one to two years.

At the time that the announcement of this arrangement was made, plans had just been completed for a closer relation with the Normal schools of the State. The question of the terms upon which normal graduates shall be received at the University and the amount of credit allowed for their normal work has always been a difficult one but the present plan is said to be very satisfactory, both to the Normal schools and the University, and is regarded as an important step in uniting higher educational interests in the State.

The report of the special committee appointed by the faculty to consider the question is as follows:

I. They recommend that certain changes be made in the requirements for the course leading to the degree of Bachelor in Philosophy, as follows:

a. Any graduate of the advanced course of a Normal school who offers work in foreign language equal in amount to that required of candidates for the degree of Bachelor of Arts, shall not be required to pursue courses in foreign language in the University; and no student in this course shall be required to do more work in foreign language than is demanded for the degree of Bachelor of Arts.

b. The requirements in philosophy and education shall be reduced from 22 semester hours to 12 semester hours; 6 hours to be in philosophy and 6 in education. Six hours of this work must be completed in the junior year.

c. The committee further recommend that the name of the course leading to the degree of Bachelor of Philosophy be changed from "Philos-

ophy Course" to "Course for Normal School Graduates," and that some suitable abbreviation be found as "Nor.," for use in the directory, etc.

II. The committee submit the following recommendations regarding the accrediting of normal school work for the degree of Bachelor of Arts.

a. A graduate of the advanced course in a Wisconsin normal school shall receive a credit toward the A. B. degree of 30 unit hours, provided that before entering the advanced course of the normal school he has had the full equivalent of a four year standard high school course.

b. A graduate of the advanced course who, before entering the normal school, has completed the full equivalent of the preparatory course in an accredited high school, including at least the minimum requirement in foreign language, shall be granted a credit of 36 hours.

c. A graduate who has had the preparatory work specified in *b*, and who, during this course at the normal school, has selected his studies with a special reference to attending the University, may secure additional credits to an amount not exceeding a total of 45 hours.

d. A student who applies for such additional credit must present a full statement of his work at the normal school, which will be examined and rated by the Committee on Advanced Standing. The studies presented for credit under this arrangement must be fully equivalent to the corresponding courses in the University. Credit beyond 36 hours will ordinarily be granted only to students who present college work in foreign language. No credit will be given for any work in the normal school done in a quarter

when more than 20 hours per week were taken; the terms "20 hours" being interpreted as including all studies for which any preparation is required outside of the classroom.

e. Graduates of a normal school during their first semester shall not be permitted to take more than 16 hours' work and students who enter the University without any preparation in foreign language must expect to remain in residence for three years.

f. The committee further recommends the appointment of an additional member of the Committee on Advanced Standing, whose especial duty it shall be to take charge of the credits granted to normal graduates.

The effect of these recommendations which were adopted by the faculty will be briefly, that graduates of the Wisconsin Normal schools who are also graduates of the four years accredited high schools will receive full credit for one year's work toward the degree of Bachelor of Arts and if their normal school studies have been selected with special reference to attending the University, the amount of this credit will be increased to one and one-half years' work, thus making it possible for normal school graduates to secure the degree of Bachelor of Arts after two and one-half years' attendance at the University. Or put

still differently, the graduate of an accredited high school who desires to attend a normal school two years and also to secure a degree from the University may do so with the loss of only half a year's time over what would have been required had he gone direct from high school to the University. This will affect large numbers of students who live in and near towns in which are located normal schools and who can thus take the first two years' work at a considerable less expense than would be incurred in case they entered the University as freshmen. Naturally it is to be assumed that the standards of work in the normal schools will necessarily, in some instances, have to be considerably raised, if their work is to be accepted as a full equivalent of the corresponding University courses. If this result is achieved, the old prejudice and disposition to scoff at the "Normalite" in the University as a species distinct from the regular four year student on the Hill will gradually be broken down. Closer relations between the colleges, the Normal schools and the University of the State, founded upon a common effort toward the attainment of similar and higher ideals in education cannot fail to benefit all the related institutions.

## President Van Hise Speaks on Journalism

---

President Van Hise addressed the members of the Wisconsin Press Association at its annual meeting in Madison, February 16, and in the course of his remarks on "The Relation of the State Press to the State University" made some interesting references to the University men who are at present engaged in newspaper work, and the training now offered and to be offered men contemplating journalistic careers. Portions of the address follow:

Until within the last few years the University has made no special attempt to prepare its students for journalism, other than to give them an education of a kind which will adapt men to various walks of life. But recently, as a result of the development of very strong departments in history, political economy, political science, and commerce, the University is giving to many of its students, a training which fits them for many of the more important fields of journalism. In past years also a number of students, while carrying on their university work, have edited the college daily paper, have served as reporters on the Madison papers, and have acted as local and university correspondents for Chicago, Milwaukee, and State newspapers. Thus without any special attempt on the part of the University, it has produced a considerable number of newspaper men. So far as we have ascertained the total number of journalists that are graduates of the

University to the year 1901 is about seventy-five, but to this number doubtless should be added many others who have obtained their higher education at the University but who did not take a degree.

The development along the lines already mentioned, combined with its location and peculiar facilities, has led the University during the past few years to consider what it can do further in the way of preparing men for newspaper and magazine work, so far as such preparation can be done at a university. Several years ago was established what is called a course preparatory to journalism. Among the studies suggested are thorough courses in American history, nineteenth century history, the history of political thought, contemporary politics, diplomacy, state and federal administration, public finance, modern sociological thought, distribution of wealth, municipal government, agricultural industries, as well as surveys of English and American literature, and advanced courses in English composition. In this way the departments of history, political science, political economy, and English, undertake to give the student who is preparing to take up newspaper work a broad view of the history not only of his own country, but of Europe as well, and to teach him to interpret present conditions in the light of past history. So also in providing for courses in contemporary politics, municipal govern-

ment, state and federal administration, and public finance, it is the purpose of the departments of political science and political economy to give the student a fair, unbiased view of the great subject of government and administration, in order that he may understand the conditions as they exist in our city, state and national governments today. To give him a knowledge and understanding of the large question of the world politics, there are the courses in international law, diplomacy, colonial government, and similar subjects. The courses in literature are designed to cultivate an appreciation of the "best that has been thought and said in the world," while those in English composition are designed to train him to express his thoughts clearly and accurately, and to give him command of as good an English style as possible. That this training is considered good preparation by editors, is shown by the fact that during the past month one of the largest Milwaukee daily papers applied to the University for two graduate students in political economy and political science, to fill positions as editorial writers on the paper, and that one of the men chosen by the editor of the paper was holding the University fellowship in political science, while the other had a University scholarship in political economy.

While we lay stress on the studies mentioned for the various lines of editorial work, it seems to us that the most essential training which the University can give to a student thinking of journalism is to equip him broadly with the knowledge of the ages and give him such intellectual power that he will be continually fertile in applying that knowledge to present condi-

tions. The fundamental qualification for a journalist is to possess wealth of ideas from the best that the world has thought and said not only in literature, but in all fields of human knowledge.

While we hold the training which the University can give along broad intellectual lines is fundamental for journalism, we appreciate that in this profession, as in other lines of work, some technical training is advisable, and even this we have undertaken to furnish to some extent. Next year the department of English will train those students who are interested in newspaper work in some of the particular features of writing for the papers which require not a little practice. A course is to be given in newspaper writing which will include practice in reporting, correspondence, the preparation of special articles, and similar details of newspaper work. In this connection students will be assigned to cover actual events in University life, and will turn in their "stories" to one of the instructors in the English department, who will edit them as a newspaper might do. These reports will then be published in the college daily or other papers, in order that the student may have the advantage not only of correction, but also of seeing his writing in print. In this way it is hoped that the students will be taught the elementary principles of seeing the essential things in the events of the day, and will acquire the ability to present those things in a readable and attractive form that will make them interesting to the newspaper reading public. Thus, while the University in no sense undertakes to provide the student with that invaluable experience which actual work in a news-

paper office gives, it will offer him opportunity for some training in the elementary principles of newspaper writing, which will make easier his initiation into the mysteries of the editor's blue pencil.

So much for what the University is doing for the press. The question now arises, how can the press assist the University? The press can assist the University by giving to the people full information concerning the University so that the youth of the state for whom the University exists, may know the opportunities offered by the institution in the various lines of training and to what these opportunities are likely to lead in after life. By carrying to the people the full information as to the University, the press has an opportunity to do very great service to the state. To illustrate, if a weekly newspaper in one of our smaller towns by a series of articles giving information in respect to the University induces two or three of its abler and brighter young men to go there and get its training, these men three or four years hence will bring back to that community such part of the intellectual wealth of the world as their capacities permitted them to absorb. Thus through the students and graduates of the University the best thoughts, the newest methods in teaching, and the latest discoveries in the arts and sciences reach every corner of the State.

After important discoveries and investigations have been made, the question that naturally presents itself is, how shall they be conveyed to the people; for upon their wide dissemination depends their value to the citizens of the whole state. As we look

about for the most effective medium, the medium that will give the widest dissemination to this important information, we see only the public press. It is to the newspapers of the state, therefore, that the University feels it must look for its support in the effort which it is making to reach all of the people. And what better service can the newspapers render to the state than to give to the millions of readers the results of investigations which will be of direct benefit to these many readers? This may be said to be the true form of university extension.

If the newspapers realize the important part which they have to play in this extension of the advantages of education, they will not be slow, we believe, to assist willingly in the great work of disseminating knowledge, and its important practical results to the millions of readers. We, therefore, desire to ask you, as editors of the newspapers of the state of Wisconsin, to co-operate with the University in this true movement of university extension. If with your aid and criticism, and with your co-operation in giving wide distribution to information concerning the work of the University, we are able to bring before the people the latest results of investigations in the pure sciences and in the applied sciences of agriculture, engineering, hygiene, as well as the results of investigations in other fields of knowledge that vitally concern the welfare of the people, we feel that the University and the newspapers together will be accomplishing a work for the citizens of the whole commonwealth, the value of which cannot be estimated.

## New Constitution of the Athletic Association Adopted March 8, 1905

---

### *Article I.—Name.*

Section 1. The name of this association shall be The University of Wisconsin Athletic Association.

### *Article II.—Membership.*

Section 1. All male students of the University of Wisconsin shall be members of this association.

### *Article III.*

Section 1. The officers of the association shall be a president and vice president, and the board of directors.

The board shall consist of twelve members from the student body, including the president and vice president; three from the faculty; three from the alumni; and one from the board of regents.

All of these officers shall hold office for one year, or until the designation of their successor.

The student members shall be elected by the association.

The faculty members shall be chosen by the faculty.

The alumni members shall be residents of Chicago, Milwaukee and Madison, respectively, and shall be designated in such manner as the alumni shall determine.

The regent member shall be appointed by the regents.

Eight members of the board shall constitute a quorum.

Section 2. The president and vice president shall have the usual powers

and perform the usual duties of such officers.

Section 3. The secretary of the regents of the University of Wisconsin shall be ex-officio treasurer of the association and shall have charge of all moneys of the association from all sources whatsoever. He shall pay out no money except on an order signed by the president and graduate manager, or in the absence of the president by one of the members of the executive committee other than the graduate manager.

Section 4. Before every athletic event the athletic director shall furnish the graduate manager a requisite number of tickets for such event and take his receipt for the same. The athletic director appointed by the regents has such powers of a supervisory character as the regents may from time to time determine.

Section 5. The Board of Directors shall have general supervision and control over all athletic affairs of the university; shall have entire control of the raising and expending of money for athletic purposes; shall make by-laws for the government of itself, and also by-laws for the government of standing committees, and shall have the right to delegate such of its power, as it may deem wise, to standing committees, except the power to incur indebtedness. During intervals between meetings of the association it shall

have and exercise all powers of the association. The board shall appoint a standing committee of three students to be known as the Committee on Elections.

Section 6. The executive committee shall be composed of the graduate manager, the president of the association, the Madison alumni member of the board, one of the faculty members of the board, and one student member of the board, said faculty and student members to be designated by the board; three members of this committee constitute a quorum. The executive committee may exercise all the powers of the board of directors, except appropriation of money in excess of the budget. The graduate manager shall keep a record of all proceedings of the executive committee, and report the same to the next meeting of the board.

There shall be elected by the board of directors at the end of each fiscal year a committee consisting of three of its members, one of whom shall be president of the association, to examine and audit the report of the graduate manager for the last fiscal year.

All members of the association shall pay fifty cents each semester to the treasurer to be devoted exclusively to the support of the crew, and the treasurer shall collect the same.

#### *Article IV.—Elections.*

Section 1. The president and vice president and the additional ten student members of the board of directors shall be elected annually by the association.

Section 2. Vacancies in the board of directors, occurring at any time may be filled by the board of directors, but such appointments shall expire at the

next annual or semi-annual election. At the semi-annual election all vacancies then existing shall be filled, but such appointments shall expire at the next annual election.

Section 3. Nominations for members of the board of directors shall be made at a nomination convention of the association and the election shall take place on the same day as provided in Section 4, of Article IV of this Constitution.

Section 4. It shall be the duty of the committee on elections to designate some form of the Australian ballot system and provide for all elections according to that system. A plurality of votes shall elect.

Section 5. The first election under this constitution shall be held on March 31, 1905; thereafter the annual election of the association shall be held on the third Friday of the second semester, and the semi-annual election on the third Friday of the first semester.

#### *Article V.—Meetings and Elections.*

Section 1. The president shall have power to call special meetings of the association at any time in the college year and it shall be his duty to do so upon the written request of twenty-five (25) members of the association.

Section 2. Fifty members of the association shall constitute a quorum.

Section 3. Notice of all meetings shall be conspicuously posted upon the bulletin boards at University and Science halls, Engineering building, Law building, Library and Gymnasium at least three (3) days in advance and shall be published in the issue of the college paper immediately previous to the occurrence of the meeting.

Section 4. The board of directors

shall meet as often as occasion may require on call either of the president or of five members of the board.

*Article VI.—Management of Departments.*

Section 1. A graduate manager, an alumnus of the institution, shall act as general manager of the entire athletic association. He shall be nominated to the board of regents by the president of the University, after consultation with the board of directors. His salary shall be fixed by agreement between the board of directors and the board of regents. The board of directors shall be empowered to make such arrangements with the board of regents as to insure the payment of this salary through the secretary of the board of regents. The graduate manager shall have supervision and control over all department managers, commodore and vice commodore, shall arrange all schedules, shall keep full minutes of the proceedings of the board of directors and executive committee, shall keep all records of all departments, correspondence, an accurate set of books, showing receipts and disbursement of the association and of each athletic department, and he shall at all times be under the control of the board of directors.

Section 2. The board of directors shall at the proper time elect such coaches as they may deem necessary and a student manager and an assistant student manager for each of the different departments, except the aquatic department, for which it shall elect a commodore and vice commodore. Such student department managers and assistants, commodore and vice commodore shall be under the direction and control of the graduate

manager and shall co-operate with him in the conduct of affairs relating to such department. Candidates for all such managers, assistants, commodore and vice commodore shall be nominated for election by student petitions of not less than fifty names.

Section 3. The election of all managers, assistant managers, commodore and vice commodore shall be subject to the approval of the Athletic Council, as provided by the rules of the inter-collegiate association.

Section 4. Manager of departments shall have no power to spend money or incur any indebtedness.

Section 5. The graduate manager shall turn over to the treasurer of the association within the week following any athletic event or trip, the total gross receipts from such event or trip, less the expenses immediately connected with such event or trip.

Section 6. No graduate manager shall arrange for any trip or inter-collegiate event without the approval of the board of directors or executive committee, and all contracts for inter-collegiate events shall be made in writing so far as practicable. Such contracts shall be presented to the auditing committee by the graduate manager when he accounts for that event.

Section 7. It shall be the duty of the graduate manager to present to the auditing committee a complete written statement, signed by the managers of both teams, of accounts under the contract for the event.

Section 8. No tickets shall be used at any match game or public exhibition, except those furnished by the athletic director. The athletic director shall provide the managers with official complimentary tickets, such tickets to be accounted for by the

manager and no other form of complimentary ticket shall be honored at the gate.

*Article VII.—Athletic Teams.*

The by-laws shall provide for the conduct of all athletic teams.

*Article VIII.—Impeachments.*

Section 1. Any officer or appointee of the association may be impeached upon the recommendation of the board of directors and upon a three-fourths ( $\frac{3}{4}$ ) vote of all the members present at a meeting of the association called for the consideration of such impeachment. The officer so impeached shall be given one (1) week's notice in writing and shall be allowed to appear in his own behalf, both before the board of directors and the association.

Section 2. The board of directors shall constitute a court before which all impeachment trials must be brought. It shall submit its verdict together with the evidence to the association.

*Article IX.—Amendments.*

Section 1. It shall require a three-fourths ( $\frac{3}{4}$ ) vote of those present at any meeting of the association to alter or amend in any way the constitution.

Section 2. Proposed alterations or amendments to this constitution must be posted on the bulletin boards in University and Science halls, and published in the issue of the college paper preceding their consideration.

*Article X.*

The graduate manager shall before the beginning of the active season in each department make up and submit

to the board of directors a budget containing the estimated expenses of each department for the ensuing year, including all fixed charges based upon the actual expenses in each department respectively for prior years. The board of directors shall adopt such budget as they may think proper for each department for such ensuing year. No expenditure in any department shall be made in excess of the amount of the budget, except by the approval of the graduate manager and a vote of at least twelve members of the board of directors. The power to incur indebtedness on the part of the association shall not be delegated by the board to any person except the graduate manager.

*Article XI.*

The graduate manager shall during the season of the track, and baseball departments, crew department, and the football department publish in some issue of the University paper during the first week of each month a complete statement of all the receipts and disbursements of the association from the beginning of the current fiscal year.

The fiscal year shall begin on the first day of January, and end on the thirty-first day of December.

*Article XII.*

During the summer vacation, matters which can only be decided by the board of directors may be disposed of by a vote by mail under the direction of the graduate manager and any proposition shall be deemed carried by a majority of all votes received within one week after mailing of the ballots to the members of the board.

## News

### Progress of the University

---

#### Regular Meeting of Regents.

At the quarterly meeting of the Regents of the University held February 28, regulations concerning the graduate managership were adopted, and several degrees were granted.

Provisions in regard to the graduate managership are as follows: First, that the graduate manager be nominated by the President of the University to the Board of Regents, in order that the position of graduate manager may be held on the same terms as are those of the members of the faculty; Second, that the President of the University make this nomination after consultation with the directors of the athletic association, and such others as may wisely advise him; Third, that the salary be fixed by agreement with the directors of the athletic association, that it be paid through Secretary Riley, and that the Regents make such arrangements with the directors of the athletic association as shall secure the payment to him of this salary; Fourth, that the graduate manager shall be empowered to attend meetings of the faculty and take full part in all matters relating to athletics; Fifth, that the graduate manager shall be an alumnus of the University, and shall have general charge of all business matters of the association with no coaching duties. The appointment of George F. Downer, '97, as graduate manager was confirmed.

Upon recommendation of the University Faculty the following degrees were granted: doctor of philosophy, Stephen Marshall Hadley, Oskaloosa, Ia.; master of arts, George Matthew Reed, Beaver Falls, Pa.; bachelor of arts, George Holmes Brownell, Janesville, Wis., Louis Wadsworth Parks, Watertown, Wis., Julius Ferdinand Derge, Eau Claire, Wis., Jesse Dwight Suter, Madison; bachelor of sci-

ence in engineering, Robert Roy Henry, Anchorage, Wis., and Frank Herbert Blood, Kenosha, Wis.

---

#### Varsity Dines Editors.

The several hundred members of the Wisconsin Press Association which met in Madison, Feb. 15-16, and the members of the state legislature were entertained at a dinner given at the University Armory by the citizens of Madison. The hall was elaborately decorated for the occasion and more than six hundred guests were served. There were a number of after-dinner speeches, Hon. William F. Vilas, '58, acting as toastmaster, and among those that responded were Governor La Follette, '79, President Van Hise, '79, Senator J. M. Whitehead, ex-Gov. W. D. Hoard, and Professor J. C. Freeman.

President Van Hise spoke briefly on the relation of the University to the state and emphasized the idea that to be truly successful the influence of the University must extend to every home in the state "I shall never be content," he said, "until the beneficent influence of the University reaches every family of the state. This is my ideal of a state university. If our institution reaches this ideal it will be the first perfect state university."

THE DRIVE NEAR RUSTIC BRIDGE.

### Short Course in Agriculture Closes.

One of the most successful terms in the history of the short course in agriculture of the University of Wisconsin closed March 10 after a fourteen-week session. The total number of students enrolled was 312, of whom 128 were members of the second year class, and completed their work this year; and 184 were first year students who will return to finish the course next year. Of those in attendance 292 were from Wisconsin, and 20 from other states, including New York, Connecticut, Michigan, Illinois, Iowa, and Washington, D. C. About 95 per cent of the short course students return at once to farms, either of their own or others. Over 75 students have already accepted positions on farms, and the call for these agricultural students has been greater than ever this year, for over 200 requests have been received, which is considerably in excess of the number of those who desire positions. The course this year included farm dairying, agricultural chemistry, management and care of live stock, plant life and horticulture, agricultural physics, economics of agriculture, bacteriology, veterinary science, farm book-keeping, debating and parliamentary practice, farm carpentry, blacksmithing, farm machinery and farm crops. The indications for the coming year are that there will be an increased attendance in the short course, for already over 150 applications for admission have been received, although the next term does not begin until December 1, 1905.

### University Girl Wins Scholarship.

Miss Emma G. Jaeck of Omro, a graduate of the University of Wisconsin in the class of '03, has been awarded the Association of Collegiate Alumnae scholarship at the Willard School for American Girls at Berlin, Germany, where she will continue her study of German literature and philology begun at the University.

### To Debate Michigan.

In the annual joint debate between the University of Michigan and the University of Wisconsin which will be held at Madison on March 31, the University of Wisconsin will be represented by Max Loeb, '05, Appleton; David K. Allen, '05, Oshkosh; and Ira B. Cross, '05, Canton, Ill. The question for debate will be primary election system.

### Four Year Course in Music.

The courses in the School of Music of the University of Wisconsin, and especially those in the piano and voice departments, have been rearranged and extended to cover a period of four years instead of three as heretofore, and the requirements for admission to the piano department have become slightly raised. This new arrangement will make it possible for the students to complete the course without difficulty in four years, and will give them the most thorough training in music.

## Daily Calendar

This department is conducted by L. W. Bridgman, '06.

### FEBRUARY.

Monday, 6.—First semester examinations began.—Agricultural college acquired Lorch property on University avenue, which will be transformed into approach to agricultural hall.—Dr. A. C. Tilton, instructor in European history, resigned to

become chief of map and manuscripts division of state historical library.

Wednesday, 8.—Short course students in agriculture banquetted at Sherlock hotel.—Fourth annual meeting of Wisconsin agricultural experiment station held in Agricultural Hall.

Thursday, 9.—Delegation of state legisla-

tors witnessed demonstration concerning tuberculosis in cattle at University farm.

Friday, 10.—Theta Delta Chi incorporated, with capital of \$15,000, for purpose of erecting chapter house; incorporators: O. M. Salisbury, '95, Ernest Borchert, Jr., '05, Harry A. Porter, '07.

Monday, 13.—Valentine Abt, harpist and mandolinist, gave concert at Library hall, assisted by Bach's Mandolin and Guitar orchestra and Monona Ladies' quartette.

Tuesday, 14.—Bill introduced in legislature by Assemblyman H. L. Ekern, '94, providing for two-fifths mill tax for University fund income, to take place of the usual appropriations.—Ten days' house-keepers' convention opened at South hall; meetings addressed by members of faculty and prominent Madison women.—Prof. E. C. Roedder, of German department, had narrow escape from death in Breevort Hotel fire, Chicago.

Wednesday, 15.—Post exam. jubilee held at Library hall under auspices of Christian associations.—Lloyd G. Spencer, better known as "Babe," football mascot of former years, died after long continued suffering with paralysis.

Thursday, 16.—Registration for second semester began.—Gov. R. M. La Follette, '79, in lecture on "Hamlet" at Library hall, held to the theory, contrary to general opinion, that Shakespeare's own Hamlet was a jaggard and irresolute of action but that circumstances compelled delay on his part in avenging the death of his father.—President Van Hise addressed meeting of American Press association at Madison on "The Relation of the Newspapers to the State University." Announcement made of new course in newspaper writing to be given next year.—C. G. Elliott, chief expert in drainage of U. S. department of agriculture, and Prof. A. R. Whitson discussed drainage problems at conference of drainage engineers in Agricultural Hall.

Friday, 17.—Junior Prom. attended by 375 couples; no financial deficiency incurred.—F. B. Powers Pharmaceutical society elected following officers: president, Raymond P. Longfield; vice president, Alvin H. Ward; secretary, Henry Davis, treasurer, Jake W. Koehler; corresponding secretary, Arthur F. Sieves; censor, Wal-

ter Rimsnider; assistant censor, Stewart Lindsay; sergeant-at-arms, Geo. A. Hos-sall.—Philosophical club organized by leading students in philosophical department, object being to discuss problems incident to their studies.

Saturday, 18.—Prom. festivities held sway in fraternity circles.—Prom. play, "Trelawney of the Wells," produced by Edwin Booth and Red Domino Dramatic clubs for endowment of student ward at Madison general hospital.—Joseph O. Mayhew of Plymouth, Wis., sophomore short-course student, died of pneumonia.

Monday, 20.—Second semester began.—Teachers' course in physical training added to curriculum.—"The New Civilization," first of series of lectures on The American City, given by Dr. Frederic Howe of Cleveland, Ohio.—Prof. Charles K. Leith began six-weeks' course as non-resident professor of geology at University of Chicago, in place of President Van Hise.—25 baseball men reported for first practice.—Try-out for Chicago track meet held.

Tuesday, 21.—Otto H. Breidenbach of Milwaukee, representing Philomathia, took first place in sophomore open oratorical contest; subject: "The American City." Alfred Bushnell representing Athenae, second.

Wednesday, 22.—Legal holiday; all classes suspended.—Fourth military hop at gymnasium attended by 410 people.—Wisconsin will be represented at Poughkeepsie regatta July 1.—Total number of new students entering for second semester is 75.—Senior girls of Chadbourne hall entertained with Martha Washington reception.

Thursday, 23.—Dr. U. S. Grant of Northwestern University gave illustrated lecture at Science club on "The Lead and Zinc Mines of Southwestern Wisconsin."—Dean E. A. Birge elected president of State Library association.—150 new lockers installed in gymnasium.—Senior smoker at Keeley's addressed by President D. W. Hoan and Professors Carl R. Fish and J. G. D. Mack.—Ten members of Delta Tau Delta attended fraternity conference at Chicago.—Senior class officers elected as follows: president, Daniel W. Hoan; vice-president, Miss Julia Cole and Miss Esther Concklin; secretary, Louis H. Turner;

treasurer, Fred Dorner; sergeant-at-arms, Carl Reed.

Friday, 24.—Athletic board approved settlement of Chicago grand stand trouble, which provides that Wisconsin and Michigan shall assume defense and settlement of three damage cases now pending.—School of music gave convocation program.—Y. W. C. A. installed following officers: president, Edna Koch; vice-president, Ruth Lyon; treasurer, Bertha Davis; secretary, Grace Gilmore.—Prof. Charles Bullock of Economics department at Harvard visited University.—Red Domino Dramatic club elected to membership: Elizabeth D. McKey, '07, Elsie Adams, '07, and Genevieve Scott, '07.—Caduceus, new pre-medical society, elected following officers: president, Walter Darling; vice-president, Charles C. Bishop; secretary, Fred Heineman; treasurer, Arthur O. Fisher; censor, David Crawford.—Management of skating rink decided to close rink for the winter.—March 25 set as date for biennial circus.—Athletic board accepted report of committee on revision of constitution.—Ten days' farmers' course closed; 228 members were enrolled.—Milwaukee delegation of turners visited military drill.—Angus S. Hibbard, general manager of Chicago Telephone company, lectured to engineering students on "The Relation of the Engineer to Corporation Organization."

Saturday, 25.—Chicago defeated Wisconsin in track meet at Chicago; score 48 to 29.—Delta Upsilon incorporated, with capital stock of \$20,000, for purpose of building chapter house.—Sophomore class officers elected as follows: Otto Breidenbach, president; Miss Abby Greene, vice president; Henry Swenson, secretary, Paul Hammersmith, treasurer; Albert Heyroth, sergeant-at-arms.—Peter H. Schram, representing Philomathia, won junior oratorical "ex" at Library hall; subject, "Compromise, the Supreme Law of Progress."—Prof. B. H. Meyer, of Economics department, appointed editor of the History of Transportation, which is to form part of the Economic History of the United States, under compilation by Carnegie Institution.

Sunday, 26.—State Secretary F. E. Anderson addressed Y. M. C. A. meeting.—Edward Strass, '06, spoke before University

Socialist club on "Some Economic Phases of Irish History."

Monday, 27.—Department of Household Economy started class in cooking, open to all students.—Prof. M. V. O'Shea read paper before National Society for the Scientific Study of Education, Milwaukee.

Tuesday, 28.—Regents in quarterly meeting adopted regulation that graduate manager be empowered to attend faculty meetings and to take full part in all matters relating to athletics.—Dairy department's exhibit, arrived from St. Louis, installed for exhibition in dairy building.—Cala Valerie Jaarling of Manila, P. I., enrolled for pharmacy course.—First of series of lectures on textiles in house decoration given by Miss Althea Harner of Chicago.—Senior engineers prepare for minstrel show with F. W. Huels, stage manager, Donald Falconer business manager, and Charles D. Willison, Joseph R. S. Blaine and Franklin H. Mann.—Edwin Booth club elected following officers for second semester: president, Alfred G. Arvold, '05; vice-president, Walter G. Darling, '05; treasurer, T. Logan Boyd, '07; secretary, Rowland Hill, '07; keeper of the mask, Willard S. Griswold, '05.

#### MARCH.

Wednesday, 1.—The Hon. Emlin McClain, justice of Iowa supreme court, and formerly chancellor of law department of State University of Iowa, spoke to students of College of Law.—Nora Samlag, Scandinavian society, held social.—Henry C. Duke won junior open oratorical contest; subject, "The Throne of the Czar."—Junior class officers elected as follows: president, Zebulon B. Kinsey; vice president, Miss Eurette Kimball; second vice president, Miss Meta Starke; treasurer, Alfred Sorem; secretary, Miss Rowena Whittier; class historian, Miss Agnes Raven; sergeant-at-arms, Ralph Hetzel.—Wisconsin Bar association recommended that regents or legislature make provision for maintenance of college of law so that it will no longer be dependent for support entirely upon tuition fees.

Thursday, 2.—Germanistische Gesellschaft presented "Heinzelmännchen," one-act comedy.—Tracy Burke, '07, and Earl

Pryor, '07, elected to membership in Commercial club.—Prof. Frankenburger organized class of eight men for purpose of discussing Michigan debate question, object being primarily to assist the debaters.—Officers of girls' bowling league elected as follows: president, Madge Loranger; secretary, Clara Kemler; treasurer, Cosaiette Elliott.

Friday, 3.—Convocation addressed by Dr. Richard Boone of New York, formerly professor of education at University of Indiana and superintendent of schools at Cincinnati.—Charles A. Brown, formerly general manager of Western Electric company, Chicago, addressed 300 engineering students on "The Skill of the Practicing Engineer and Inventor."—Prof. F. E. Bolton of University of Iowa, Prof. Crane, state superintendent of Iowa, Prof. Ellis of University of Texas, and Dr. R. E. Boone of New York addressed University and town audience.—C. H. Williams, '96, general superintendent of the Madison Gas & Electric Co., talked to U. W. Engineers' club on "Central Station Engineering."—

First games in intersorority bowling league rolled.—Varsity defeated Co. 1 (Portage) basketball team at Portage, 52 to 28.—Water polo team defeated by University of Chicago; score 23 to 18.—Max Loeb, member of Athenaeon society, was victor in senior open oratorical contest; subject, "Idols and Ideals." Emil Olbrich second; subject, "Economic Justice."

Saturday, 4.—At indoor track meet Wisconsin won two-mile relay race from Beloit, and Delta Upsilon won interfraternity relay race.—Glee and mandolin clubs returned from week's trip which included concerts at Elgin, Chicago, Milwaukee and Waukesha.—Water polo team defeated Central Y. M. C. A. at Chicago by score of 5 to 4.—Defeated in swimming races.

Sunday, 5.—Mrs. Florence D. Richards of Ohio, national temperance lecturer, spoke to Christian associations on "The Walls, and How to Build Them."—Prof. F. J. Turner returned from Ann Arbor where he gave five lectures at University of Michigan on the period of 1820-1830 in American history.

## Athletics.

---

At a meeting of the Board of Directors Feb. 24, the chief business was a discussion of the report of the committee to recommend changes in the constitution of the Association and the report of the special representatives of the Association in the negotiations with Chicago and Michigan regarding the grand stand disaster at Marshall Field in 1902. Judge Sanborn delivered both reports.

In the grand stand matter, the report was voluminous, including all the correspondence and the memoranda of half a dozen conferences held in Chicago since January 1, 1905. In these conferences Wisconsin was represented by Judge A. L. Sanborn and Professor Slichter; Michigan, by Judge Lane and Professor H. M. Bates of Ann Arbor; Chicago by Professor Capps and Dr. Raycroft. To go at length into the details of the report would be impossible in the

space allotted to this department, and will not be attempted. The settlement agreed upon provides that Michigan and Wisconsin shall assume the defense of three personal injury damage suits, now pending against the University of Chicago, and hold Chicago harmless, and that against Chicago's claim for \$2,000 paid by them in settling a fourth case, Michigan and Wisconsin shall have an offset, in the sum of \$1,745 for permanent stands at Marshall Field, paid for from the receipts of games in 1898, Chicago agreeing to waive the difference. It was voted to ratify the agreement thus provisionally made, as reported.

The report of the committee on constitution was amended in certain particulars and recommended to be presented to the association for passage at the annual meeting. The most important changes were the rejection of the committee recommendation that the

number of "W" men on the Board be limited to seven out of twelve, and the addition of a provision that each member of the Association pay fifty cents a semester to be devoted to the use of the crew. The other recommendations of the committee and the joint conference, as to the composition of the Board were accepted.

The Board held a meeting March 8, for the consideration of financial matters. Geo. R. Keachie presented a bill of \$274.62 for bolting the bleachers at Camp Randall, and a balance of \$45.68 due for work in connection with the football programs last fall. Both matters were originally authorized by the executive committee, and it was voted to refer them to this committee and the graduate manager with authority to act.

The graduate manager was also authorized to raise \$3,000 on the association's notes and to give the Co-operative Co. a note for \$3,111.59, which was the amount of the Athletic Association bill for athletic supplies for the year ending January 1, 1905.

The recommended constitution came up for consideration at the regular annual meeting of the Association held at Library Hall, March 3, but on account of other engagements it was possible to get the hall only at an hour which made it impossible for more than a very small number of students to attend. Rather than consider so important a matter at a small meeting, an adjournment was taken to March 8, at 7:30 p. m. This meeting was more largely attended, although because of the fact that most of the student body regarded the recommendations of the Board of Directors as final, there were not as many out as would otherwise have attended. It was supposed that the constitution, as recommended by the Board, represented about what could and would be carried and that ratification would be merely a perfunctory registration of a matter already settled. Contrary to expectation, however, the meeting developed a small but vigorous, not to say, violent opposition, and although the constitution eventually went through, for the most part, as recommended, the provision for nomination for membership on the Board by petition, two weeks before the election, was defeated. The most important of the new

provisions are those relating to the office of the graduate manager, making him a member of the faculty; the provision that the faculty members of the Board of Directors shall be elected by the faculty, and the alumni members by the alumni; the definition of the duties and powers of the graduate manager; and the introduction of a budget system and better financial methods.

\* \* \*

Wisconsin opened the indoor track season at Chicago February 25, the meet having been originally scheduled for February 18, by Mr. Kilpatrick. Graduate Manager Downer succeeded in getting a week's postponement, as the first date was the day following the Junior Prom, and just at the close of ten days of examinations. But even with the added week the team was in poor condition, and while Chicago's victory by a score of 48 to 29 was merited, decisive and clean-cut, Wisconsin should show to better advantage in the return meet, March 18. Waller made the best showing of any Wisconsin man, winning the sprint from Hogenson and the quarter from Groman of the Maroons. Captain Breitreutz ran with poor judgment and threw away any chance he might have had of beating Lightbody by cutting his own pace and holding the first quarter down to 1:12, from which point the crack Chicago man went out and won all the way in 2:12 3-5. The summary of the events follow:

50 yard dash—First heat—Won by Waller, Wisconsin; Barker, Chicago, second. Time, :05 3-5.

Second heat—Won by Hogenson, Chicago; Grobe, Wisconsin, second. Time, :05 3-5.

Final heat—Won by Waller, Wisconsin; Hogenson, Chicago, second; Barker, Chicago, third. Time, :05 4-5.

Two mile run—Won by Lyon, Chicago; Hean, Wisconsin, second. Time, 10:14 1-5.

50 yard hurdles—Won by Catlin, Chicago; McAvoy, Chicago, second; Quarles, Wisconsin, third. Time, :07.

880 yard run—Won by Lightbody, Chicago; Breitreutz, Wisconsin, second; Meyers, Wisconsin, third. Time, 2:12 3-5.

440 yard dash—Won by Waller, Wisconsin; Groman, Chicago, second; Taylor, Chicago, third. Time, :55 2-5.

Shot put—Won by L. Miller, Wisconsin; distance 40 feet 7½ inches; Gale, Chicago, second; distance, 39 feet 9 inches; Russell, Chicago, third; distance 37 feet 9 inches.

High jump—Won by Dulaney, Wisconsin; height, 5 feet 7¼ inches; Brown, Chicago, second; height, 5 feet 6⅞ inches; Hueffner, Wisconsin, third; height, 5 feet 5¼ inches.

Mile run—Won by Lightbody, Chicago; Kiesel, Wisconsin, second; W. Matthews, Chicago, third. Time, 5:10 2-5.

Pole vault—Forfeited without contest by Wisconsin.

Relay race—Won by Chicago, (Ferris, Templeton, Taylor, Barker); Wisconsin, second. Time, 3:25.

\* \* \*

In the home meet, March 4, a number of special features were introduced and a large and enthusiastic crowd was in evidence at every close finish, but the performances were none of them fast. The feature

events were the inter-fraternity relay race, which Delta Upsilon won from Delta Tau Delta in fast time; an inter-scholastic relay race, in which Milwaukee West Division high school beat Madison High School, and a two mile relay race between the varsity team, Kiesel, Waller, Meyers and Captain Breikreutz, and a team from Beloit, the varsity four winning in 8:23 3-5.

\* \* \*

Base ball practice has been regular since February 20, and the men are in shape to begin stiff work just as soon as the weather will permit out-door practice. Roys, who played right field last year, has left college to go into business in the West, but the new men are showing up very satisfactorily.

\* \* \*

At present out-door practice in all branches of sport is being retarded by the backwardness of the season.

## Alumni

*Alumni are requested to contribute to this department. When newspaper clippings are sent, care should be taken to indicate date and place, clearly. Distinguish between date of paper and date of event recorded. Report all errors promptly. The notation used in this department is as follows: Two figures preceded by an apostrophe indicates the year of graduation. Two numbers separated by a dash indicate the period of residence of a non-graduate. Where only figures are given the college of letters and science is indicated; e stands for engineering department; l, law; p, pharmacy; h, higher degrees; (Hon.) honorary. Addressed envelopes will be furnished to any one who will use them regularly to send news to this department.*

### ALUMNI SMOKER AT MILWAUKEE.

About fifty members of the Milwaukee Alumni association of the University of Wisconsin gathered for an informal smoker at the University club March 8. The reception committee consisted of Judge W. D. Tarrant, Robert Wild, R. N. McMynn, Dr. T. L. Harrington, and H. J. Desmond.

When all had gathered the company retired to the seclusion of the Rathskeller, where a kommers was held and the evening was spent in recounting the tales of college days, singing the old songs and listening to numerous informal speeches from members who were called upon.

Among those present were: F. L. Mc-

Namara, Allard Smith, T. S. Bell, S. Dahlberg, Franklin Sweet, J. H. Paul, D. Schuler, Jacob Fehr, Jr., Paul Stover, C. E. Burnham, E. M. McVicker, G. F. Markham, E. D. Jenner, P. H. McGovern, G. P. Barth, Rublee Cole, F. Katzenstein, E. P. Worden, Arthur Cotzhausen, Paul Binzel, N. S. Robinson, C. F. Geilfus, Casimir Gonski, M. Blumenfeld, T. Desmond, Julius Walthers, Richard Elsner, A. E. Braun, Judge O. T. William, A. C. Rietbrock, Henry Cummings, E. J. Gross, G. E. Marbon, A. W. Gray, C. G. Phipps, G. B. Vinson, W. E. Kramer, S. H. Cole, D. W. Smith, G. H. Katz, and Prof. F. J. Turner of Madison.

'58.

An informal dinner was given by the citizens of Madison at the University armory on Feb. 15th to the members of the Wisconsin Press Association and the state legislature. The Hon. W. F. Vilas, '58, presided, and there were addresses by Gov. La Follette, '79, President Van Hise, '79, and others.

'67.

Rome, Dec. 3, 1904.

Sec'y U. W. A. A.:

Dear Sir—Last spring I wrote you that I expected to be absent in Europe for a year and requesting that you discontinue sending the Alumni Magazine until my return. The October number, however, has finally reached me here and contains so much of interest concerning the Jubilee, that I was reluctantly obliged to miss, that I am persuaded to renew my subscription now and avoid any break in the monthly visits of the magazine. Inclosed please find draft.

Yours truly,

Geo. Cross,

Class '67.

Direct to Fairbury, Neb., as before.

'68.

Charles E. Vroman, '68, resides at 54 Walton Place, Chicago.

'70.

Justice Clark A. Smith, '70, '71, of the supreme bench of the state of Kansas, has removed his residence from Cawker City to Topeka.

Burr W. Jones, '70, '71, '74h, a member of the faculty in the law school, was elected president of the Dane county bar last month.

'74.

Fred R. Mosse, '74, is practicing medicine at Rochester, Minn.

Mrs. Kate G. Morgan, '74, resides at 141 S. Butler St., Madison, Wis.

Alfred H. Bright, '74, '76l, is general solicitor of the Soo railroad, and lives in Minneapolis.

'75.

Duane Mowry, '75l, who has recently come into possession of the correspondence and private papers of the late Senator James R. Doolittle, has an article in the current issue of the bi-monthly publication of the Southern History Association on the part which Senator Doolittle played in averting the impeachment of President Andrew Johnson. The article was called forth by the fact that the Reverend James S. Jones in his *Life of Andrew Johnson* omitted the name of Senator Doolittle from the list of republican senators who voted against the impeachment. Mr. Mowry was a friend of Judge Doolittle and rises to his defense for the sake of "doing justice to the memory of a publicist pre-eminent in his time, in power, in character and in positive influence." Such a defense of Senator Doolittle's action would have had quite a different effect in the time which it occurred when he was loaded with opprobrium and called upon to resign by the Legislature of Wisconsin for his vote against the conviction of the impeached President.

'76.

George Haven, '76e, is in business in Minneapolis at 225 Lumber Exchange Bldg.

J. W. Hunner, '76, is practicing law at 1217 Chamber of Commerce, Chicago, Ill.

Miss Mary M. Henry, '76, who resided in Dakota for many years, has returned to Madison, where her address is 313 Johnson Court.

'77.

James Whelan, '77e, is inspector and engineer of river and harbor improvements for the Milwaukee District, which position he has held since 1887. Mr. Whelan's permanent address is Hartford, Wis.

'78.

Philip E. Brown, who was a member of the class of '78, is district judge of Luverne, Minn.

W. A. Corson, '78, is practicing law at Omaha with offices in the First National Bank Bldg.

'79.

Kemper K. Knapp, '79, '821, is an attorney for the Illinois Steel Co., his office address being Rookery Bldg., Chicago.

'80.

H. J. Desmond, '80, resides in Milwaukee, where his address is Postoffice Drawer No. 36.

George Hofstetter, '80, who graduated from Rush Medical College in '82, is a physician at Lyons, Pa.

Alfred Patek, '80, has been appointed private secretary to Gov. Alva Adams of Colorado. Mr. Patek has been in newspaper work in Milwaukee and St. Louis, and more recently as a member of the staff of the Denver Times.

'81.

Joshua N. Sanborn, '812, is master mechanic of the B. and M. railroad at Brainard, Minn.

F. Julius Walthers, '811, has removed his law office to Room 64, Cawker Bldg., N. E. Cor. West Water and Wells Sts., Milwaukee, having had his office on Reed St., in Milwaukee, since 1888.

'82.

The Hon. John Jacob Esch, '82, '871, of La Crosse, Wis., is serving his third term in the national House of Representatives. Congressman Esch shares the honors with Mr. Townsend of Michigan in the naming of the Esch-Townsend bill for the regulation of railroad freight rates. Mr. Esch's brilliant address at the University's jubilee celebration last June brought him into prominence among Wisconsin graduates and students.

Charles L. Alverson, '82, of Medford, Wis., suffered the loss of his wife by death on January 26. The remains were taken to Portage, Wis., for burial. Mr. Alverson is a banker at Medford.

'83.

Henry P. Stoddart, '83, '861, is practicing in Omaha, with offices in the New York Life Bldg.

Edmund G. McGilton, '83, '851, is located

at Omaha and has just concluded a term as Lieutenant Governor of that state. His present address is First National Bank Bldg., Omaha.

Miss Eleanor O'Sheridan, '83, died at her home in South Madison on Feb. 20, after a period of ill health extending over a year. She was afflicted with tuberculosis of the lungs. Miss O'Sheridan had been a teacher for many years. She had taught at Neillsville, Antigo, Crandon, South Madison, and other places. She leaves an aged father, three brothers and three sisters, one of the sisters being Miss Mary Grant O'Sheridan, the author and poetess, who attended the University many years ago. The classmates of the deceased in Madison were present at the funeral. They were Miss Martha M. Dodge, Miss Ida B. Fales, Miss Therese S. Favill, and Mr. C. O. Marsh, chief clerk of the assembly. Six former pupils, all but one of whom are now University students, acted as pall bearers.

C. O. Marsh, '83, of Antigo, was again elected chief clerk of the Wisconsin assembly.

'85.

F. C. Finkle, who was a special student in engineering from 1885 to 1887, is chief engineer of the Edison Electric Co. of Los Angeles, and his work in connection with the power transmission plant which that company is erecting is highly praised. The plant is the largest of its kind in the world.

Charles I. Earll, '852, is a patent expert with offices at 120 Broadway, New York.

Fred A. Teall, '851, is practicing law in Duluth at 601 Torey Bldg.

Myron T. Wildish, some time a member of '85, is engaged in the banking business at Aurora, Neb.

'86.

Henry H. Roser, '86, is practicing law at Los Angeles, Cal.

Theodore Schroeder, '862, '891, is the author of an article on "The Impurity of Divorce Suppression" in the Arena for February. Mr. Schroeder, after leaving the University, settled in Salt Lake City, where he practiced law for twelve years. During the last years of his residence in Utah he

became rather famous for his strong opposition to Mormonism. He took a prominent part in the prosecution of the case against Brigham H. Roberts. He is now practicing law in New York City, address 31 W. 33d street.

'88.

Seymour S. Cook, who was a member of the class of '88, is connected with the Minnesota Loan and Trust Co., Minneapolis.

'89.

Winfield R. Smith, '89, '91, who is a member of the firm of Shank & Smith of Seattle, Wash., was East in February and spent some time in Milwaukee.

'90.

D. E. Kiser, '90, who was principal of the Durand high school for a number of years and who has recently been in Oregon, Wis., has returned to Durand, where he has purchased stock in the Badger State Lumber Co., and will have charge of the office work of the company in Durand.

'91.

Andrews Allen, '91, is with the Wisconsin Bridge and Iron Co. in its Chicago office in the Monadnock Bldg.

Paul S. Richards, '91, is engaged in the practice of his profession at Ellsworth, Neb.

Charles A. Dixon, '91, '93, is practicing in Sioux City.

W. A. Dennis, '91, is practicing medicine in St. Paul.

'92.

E. A. Ahara, '92, '96, is superintendent of the Dodge Manufacturing Company of Mishiawaka, Ind. The company, which was established in 1878, is engaged in the manufacture of power transmitting machinery and grain handling machines and appliances.

Charleton H. Earle, some time a member of '92, is in business at Waukon, Ia.

'93.

Charles B. Rogers, '93, '95, is junior member of the firm of Rogers & Rogers,

attorneys, at Ft. Atkinson. Mr. Roger was district attorney of Jefferson county from '99 to '02.

Harry B. Boardman, '93, is in the employ of the Wisconsin Lime and Cement Co., in its Chicago office in the Chamber of Commerce.

James B. Hain, '93, is in the office of the chief engineer of the C., M. & St. P. Ry., Chicago.

'94.

Notice is received of the publication by Joseph Schafer, '94, '00, of the University of Oregon, of a history on the "Pacific Northwest." The book is written for a popular audience and should be successful with younger readers, as the style is entertaining and at the same time the story is a straightforward bit of history with the proper recognition of perspective and a strict regard for historical truth. The book is from the press of the McMillan Co.

John A. Pratt, '94, for some years principal of the Prairie du Chien high school delivered an address on Abraham Lincoln at Menomonie, which is the subject of a high encomium in a recent issue of the Menomonie Falls News.

Charles A. Engelbracht, '94, of Berlin, Wis., who went to Manila, P. I., in 1903 to assist in codifying the laws in the Philippines, has been appointed U. S. marshal and consular clerk in Manila, according to reports received by Assistant District Attorney E. J. Henning, '94.

Robert E. Rienow, '94, is located at Waukesha, Minn.

Willis B. Silverthorn, '94, is editor of the Mississippi Valley Lumberman, a weekly trade journal published at Minneapolis, Minn. His address is 1013 Lumber Exchange.

Prof. B. H. Meyer, '94, and wife have gone to Europe for a brief tour.

'95.

William B. Rubin, some time a member of '95, is a candidate for the position of circuit judge of the People's Non-Partisan ticket in Milwaukee.

F. W. Thomas, '95, has been succeeded at Medford by Mr. H. L. Arnemann of Eau Claire. Mr. Thomas resigned to en-

gage in business in Eau Claire.

Frank W. Guilbert, ex-'95, is connected with the National Lead Co. at St. Paul, Minn.

Charles H. Howell, ex-'95, and a member of the 'varsity foot ball team of 1892, is in the service of the federal government of Sioux City, Ia.

'96.

C. A. Phelps, '96, is connected with the Mutual Life Insurance Co., at Milwaukee.

Harry J. Noyes, '96, is in the employ of the Russell Berdell & Ward Bolt and Nut Co., Pt. Chester, N. Y.

Delos O. Kinsman, '96, is professor of economics and political science in the State Normal School at Whitewater. He has discontinued his subscription to the Magazine.

Miss Rose Dengler, '96, who is teaching in Eau Claire, has changed her address to 212 Oxford avenue, that city.

George H. Trautman, '96, is assistant superintendent for the International Harvesting Co., his address being 2667 N. Hermitage Ave., Ravenswood, Chicago.

Carl S. Jefferson, '96, of Chicago, is private secretary to George R. Peck, general counsel for the St. Paul railroad.

Louis M. Ward, '96, has removed from Chicago to Denver, where he is manager of the Denver branch of the Crocker-Wheeler company. During his college days Mr. Ward was prominent in varsity amateur dramatic circles. In 1902 he married Miss Lydia E. Moore, '99.

Henry A. Huber, '96, represents one of the Dane county districts in the Wisconsin legislature this winter.

Charles H. Williams, '96, general superintendent of the Madison Gas & Electric Co., was recently elected president of the Northwestern Branch of the American Society of Electrical Engineers and is prominent among the men of his profession.

'97.

O. E. Crooker, '97, has moved from Rutland, Vt., to Woonsocket, R. I., where he is pastor of the Universalist church.

Capt. W. F. Hase, '97, who is captain of the artillery of the regular army at Ft. Barrancas, Florida, was recently visited by his

father, Mr. Henry Hase, of Milwaukee, for a number of weeks.

Notice is received of the marriage at Ladoga on December 14, 1904, of Albert G. Chase, '97, '04, to Miss Mabel I. Randall, who graduated from the pharmacy course in 1889. Mr. and Mrs. Chase reside at 2029 24th Ave., S., Seattle, Wash.

Ernest S. Park, '97, is engaged in the real estate and insurance business at Des Moines, Ia.

William N. Smith, '97, is a geologist and mining expert, his permanent address being 140 E. Gorham St., Madison.

Miss Louise Phelps Kellogg, who is in charge of the manuscripts division of the Wisconsin Historical library in Madison, has recently been the recipient of additional honors for her work in original research, and the announcement of the fact that her monograph in colonial history, "The American Colonial Charter," has been published by the American Historical Society at the government printing office at Washington will be heard with special interest by those interested in the results of her scholarship.

'98.

M. L. Parker, a special student in '98, is proprietor of the Acme Printing Office of Boise, Idaho.

H. R. Crandall, '98, is treasurer of the Henece, Bainsford, Crandall Co., Milwaukee.

Earl C. May, ex-'98, is engaged in the newspaper business at Minneapolis.

Otto Patzer, '98, of the French department in the University, has an article in the February number of Modern Language Notes, entitled, "The Miracles de Nostre Dame and the Fourteenth Century." In it he shows how the political, social and religious conditions of the fourteenth century are reflected in the miracle plays of the time.

Mrs. Mary Huff Moody, '98, died at Boscobel on Wednesday, March 1, 1905. Mrs. Moody was a native of Boscobel, and in 1896 entered the University as a junior in the class of '98, after her graduation from Platteville Normal School. After receiving her degree she taught in the high schools of Boscobel, Mineral Point, Eau Claire, Milwaukee and La Crosse until the time of her

marriage, Nov. 24, 1901, to Mr. G. S. Moody, '96.

'99.

Philip L. Allen, '99, who was very prominent in all the literary and journalistic enterprises of the University as an undergraduate, is at present on the staff of the Evening Post of New York. Mr. Allen has had a considerable number of his short stories published in leading magazines during the last few months.

W. S. Kies, '99, '01, is assistant city attorney of Chicago.

Miss Helen Grace Andrews, '99, resides at Portage.

H. O. Seaman, '99, is in the employ of the Wisconsin Telephone Co.

State Senator Charles T. Hutson, '99, '01, of Connell, Wash., is said to be slated for the position of assistant United States attorney in a new federal district to be established in eastern Washington. Mr. Hutson now enjoys the distinction of being the youngest member of the state senate. He is only 29 and has lived in the state but three years.

Judge James G. Jenkins, '93 *hon.*, recently retired from the bench of the United States circuit court of the 7th judicial district. He will be 71 years old on July 18, and has spent 50 years in his profession.

'00.

Howard G. Boardman, '00, is a representative of the A. H. Andrews School Supply Co. in the East, his address being 92 William St., New York city.

The Rev. A. J. Macartney, '00, who has been abroad during the present year, is studying at the University of Glasgow and Oxford.

E. G. Merrick, '00, is connected with the Stanley Electric Manufacturing Co. at Pittsfield, Mass.

From Idaho has been received the announcement of the engagement of Mr. Bernard M. Palmer, '00, of Janesville, to Miss Butterfield of Moscow, in that state.

H. D. Buchanan, '00, '03, is practicing in Seattle, Washington, with offices at 410 Boston block.

Wayne T. Moseley, '00, '03, is located at Fargo, N. Dak., where he has a responsible

position with the J. I. Case Co., of Racine. Mr. Moseley writes under date of February 20th, "Kindly send all the back numbers of the past semester. I have borrowed long enough and want to help the cause along by adding a subscriber to the list. North Dakota alumni all send best wishes and congratulations on the improvement in the last few months." Letters of this sort "help some."

Edwin A. Snow, '00, has recently located in Boise, Idaho, for the practice of law and has been appointed assistant to the attorney general.

W. B. Clark, '00, is studying law in the University of Michigan. His address is 233 S. Ingalls St.

H. A. Russell, '00, is located at Ft. Scott, Kan.

'01.

J. C. Taylor, '01, is at present employed by the Sullivan Electric Co. at Salt Lake City. Mr. Taylor was captain of the track team in 1899. He is a wearer of the W and holds the varsity record for the one- and two-mile bicycle events.

George F. Crouch, who was for some time a member of the class of '01, is in New York, where he may be reached by addressing the Webb Ship Building Academy, Fordham Heights, N. Y.

A. W. Nicholaus, '01, is located at Beaver Dam, where his address is 309 Washington St.

Paul Stover, '01, is employed in the city treasurer's office in Milwaukee. His address is 744 Van Buren St.

Lester Williams, '01, is instructor in civil engineering in the University.

Harry A. Severson, '01, is with the Barber, Coleman Co., of Rockford.

Carl S. Newcomer, some time a member of '01, is in business at Eldora, Ia.

'02.

Carl F. Stillman, who was a member of the class of '02, and who last year returned to the University to complete his work and secure his degree, is a mining engineer in the employ of the U. S. Steel Co., at Hibbing, Minn.

Louis J. Paetow, '02, who spent some months at Boulder, Colorado, where he

took the place of a professor in history who was away on a leave of absence, has returned to Philadelphia for graduate study in the University of Pennsylvania. His address is U. of P. Dormitories, Franklin 333.

Henry E. Murphy, '02, is in business in Manitowoc.

Albert F. Larson, '02, the famous half-back of the 1901 championship team, is engaged in the hardware business with his father in Sioux Falls, S. D.

William E. Smith, '02, '04, is a practicing attorney at Neenah, Wis.

Miss Ella F. Tormey, '02, is teaching Latin and German in the high school at Washburn, Wis.

'03.

Miss Emma G. Jaeck, '03, of Omro, Wis., has been awarded the Association of Collegiate Alumnae scholarship at the Willard school for girls at Berlin, Germany, where she will continue her study of German literature and philosophy begun at the University of Wisconsin.

Harry C. Johnson, '03, has returned to the University to finish law. For the past year Mr. Johnson has been working on the Review of Reviews.

R. O. Gibbons, '03, who is teaching mathematics at Carroll College, Waukesha, resides at 520 E. Main St.

Will Spalding, '03, has removed from Oshkosh to Anderson, Ind.

Walter K. Adams, '03, is connected with the Chicago office of the Pennsylvania Ry.

Paul R. McKee, '03, is business manager of the Whitewater Register, Whitewater.

'04.

Allen Lee, '04, and Norman Lee, '04, both graduates of the college of engineering, are now taking courses at L'Ecole de l'Electric in Paris.

Harold I. Shaw, '04, of Milwaukee, and Miss Gertrude E. Newberry, also of Milwaukee, were married in Chicago Jan. 23d. The groom had announced that his father, the Rev. W. A. Shaw, was to perform the ceremony, but owing to his continued illness the wedding took place at the parsonage of the Evanston Avenue Methodist Episcopal church, the Rev. Dr. A. E. Saunders, an uncle of the groom, officiating.

Al. Rhodes, '04, has formed a partnership for the practice of his profession at Ester-ville, Iowa.

Chauncey E. Blake, '04, has associated himself with Attorney John B. Sanborn, '96, in Madison. Mr. Sanborn had practiced with his father, Arthur L. Sanborn, '80, until the latter was appointed judge of the federal court recently.

Erwin J. Beule, '04, has gone to Mexico to assume the consular agency at Laguna del Carmen, state of Campeachy. Rolf Anderson, another University student, who went to seek his fortune in Mexico and who is situated at Cheopas, writes that he is well pleased with his work and prospects in the south. He is employed by a large rubber plantation company, his work being the overseeing of the general provision store on the plantation. The life is a provincial one and full of interest to a lover of adventure. His father, Prof. R. B. Anderson, '85 *hon.*, has interests in Mexico, being president of the Wisconsin Rubber Plantation company.

L. W. Burdick, '04, resides at 1505 Windsor St., Columbia, Mo.

Fred Pettit, some time a member of '04, graduated from the University of Chicago at the close of the winter quarter. Mr. Pettit was compelled to leave college on account of illness and subsequently entered the University of Chicago. He was a member of the University Golf team and a former state champion. He has accepted a position with the J. I. Case Co. of Racine.

Louis F. Musil, '04, is in the employ of the Laclede Gas Light Company of St. Louis, and resides at 4255 a Finney Ave., St. Louis, Mo.

B. S. Hale, '04, is pursuing graduate study in the University this year.

S. D. Townley, '90, International Latitude Observatory, Ukiah, astronomer.

C. H. Van Wormer, law '71, Santa Rosa, fruit grower.

---

## Book Reviews.

---

Professor T. S. Adams of the department of political economy and Miss Helen L. Sumner, honorary fellow in political economy at the University this year, are joint authors of a volume on Labor Problems, which is just published by the Macmillan Co. The book is the first convenient collection of facts that will facilitate the study of American labor problems. Among the subjects that are considered are Woman and Child Labor; Immigration; The Sweating System; Poverty, Earnings and Unemployment; Strikes and Boycotts; Labor Organizations and Employers' Associations; the Agencies of Industrial Peace; Profit Sharing; Co-operation; Industrial Education; Labor Laws; The Material Progress of the Wage Earning Classes.

The following is one review of the book which appeared shortly after its publication:

"The most satisfactory work that has yet appeared on this subject. It brings together within moderate bounds a remarkably complete and well selected mass of facts, drawn from original sources; and it presents a clear, comprehensive and judicious view of the difficult problems which they represent. The chapter on Profit-

Sharing, to take a single example, is based upon an investigation of every case of profit-sharing of any importance in the United States. While it is a book for the general reader, it will save the student or any one interested in the labor question an immense amount of research, and will enable him to grasp quickly the really important issue. Its great value in its field is likely to cause it to be used extensively as a class book in economic instruction."

---

In an interesting paper in the February number of Modern Language Notes, entitled "The Miracles de Notre Dame and the Fourteenth Century," Otto Patzer, '98, of the French Department shows how the political, social and religious conditions of the fourteenth century are reflected in the miracle plays of the time.

---

The last number of the American Law School Review contains the address delivered by Dean H. S. Richards of the College of Law, upon "Entrance Requirements for Law Schools", at the Fourth annual meeting of the Association of American Law Schools held in St. Louis last fall.
