The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

# Two Centuries Ago Sickness Was Cured By Faith - - Civilized? No!

Bezoar stones are no longer considered a civilized cure for an upset stomach—but we still use war to cure an upset world.

The progress of medicine made the Panama Canal possible. It increased the life span by twenty years. The newborn infant has a 30% greater chance to live. LIVE FOR WHAT? Live to be blown to bits? Live to be maimed and broken? Live to be a travesty on manhood? Yes—unless the world learns that the barbarity of war is as out of place in civilization as witchcraft in a sickroom.

You men who have given youth a chance to live—give them a sane world to live in. Give them peace. You can do it. You and those who realize that war *is* preventable.

World Peaceways has a practical plan of how you can help. Write for it.
