The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

presenting the
ELMED PM1
the only reliable pulse monitor giving all these essential features

indicates amplitude and rate of pulse
low clear tone, free from interference
through stethoset or loudspeaker
precise cut out indication for measuring blood pressure
standard data logging output 1V into 10K ohms
booster switch for increased sensitivity

One of a range of precision instruments developed by ELMED, the P.M.1 is a self-contained portable instrument specifically designed for monitoring the peripheral pulse. It offers various unique features hitherto unobtainable in this type of instrument. Primarily designed for use in operating theatres and recovery rooms, there are many other cases where the P.M.1 may be used to present pulse information in this convenient form. Operates on two Ever Ready (PP3) batteries 18V or equivalent.
