The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

## No wonder it's standard equipment

The CROUPETTE® is standard equipment in about 3,000 hospitals and 96 per cent of U. S. medical schools. First "cool vapor" croup tent, the CROUPETTE consistently excels all others in comfort, convenience and safety. The fresh, moisture-saturated air is effectively cooled and oxygenated by exclusive CROUPETTE forced circulation. Aerosol or oxygen therapy may be easily administered. With no moving parts, the CROUPETTE is as simple as it is safe and efficient.

Light, compact, portable.  
Includes spare atomizer.

Visibility and accessibility are CROUPETTE features. Cooled, supersaturated, aerated vapor provides immediate relief and comfort.
