The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

A full statement of the individuals to whom loans were granted with a description of the amount loaned upon each is hereto annexed and marked "Schedule B." The Commissioners call the attention of the Legislature to the fact that the amount of the loans granted during the year 1861 was \$1,200,000. The amount of the loans granted during the year 1860 was \$1,200,000. The amount of the loans granted during the year 1859 was \$1,200,000. The amount of the loans granted during the year 1858 was \$1,200,000. The amount of the loans granted during the year 1857 was \$1,200,000. The amount of the loans granted during the year 1856 was \$1,200,000. The amount of the loans granted during the year 1855 was \$1,200,000. The amount of the loans granted during the year 1854 was \$1,200,000. The amount of the loans granted during the year 1853 was \$1,200,000. The amount of the loans granted during the year 1852 was \$1,200,000. The amount of the loans granted during the year 1851 was \$1,200,000.

ANNUAL REPORT

OF THE

Commissioners of School and University Lands.

1861.

STATE OF WISCONSIN,

**OFFICE OF COMMISSIONERS SCHOOL AND UNIVERSITY LANDS,
MADISON, October 10, 1861.**

To his Excellency, the Governor :

Sir: The Commissioners for the sale of School University and Swamp Lands, having the care thereof and of the funds arising from such sales, respectfully report :

The report of the Secretary of State and the State Treasurer exhibit full and detailed statements of the receipts and disbursements on account of the several funds over which we have supervision, and to which we beg leave respectfully refer.

But a comparatively small amount of School and University lands have been sold during the past year. The general depression of business which has so reduced the ability of our citizens to make any permanent investments, the comparatively small emigration to our State, and the high price at which many of these lands are now held, have united to reduce the amount of sales to a very narrow compass.

A particular statement of the number of acres of school, university and swamp land sold during the past year, with the amount for which each class was so sold is hereto annexed, and marked "Schedule A."

LOANS.

The Commissioners have loaned for the past year, from the principal of the school fund, the sum of..... \$119,071 59
 From the Drainage Fund, the sum of..... 1,200 00
 From the University Fund, the sum of..... 7,600 00

A large proportion of these several amounts are loans back to purchasers who have patented the State lands. Some of them are exchanges of securities.

A full statement of the individuals to whom loans were granted, with a description of the premises mortgaged, and the amount lent upon each, is hereto annexed and marked—"Schedule B."

The Commissioners again call the attention of the Legislature to the present method of investing the trust funds of the State. They had the honor of submitting through the Executive, a special report to the last Legislature upon the subject.

They had taken measures to ascertain, by means of sworn appraisals of the mortgaged premises, the amount of loss to the funds, by means of the loans upon mortgages forfeited in 1858, 1859 and 1860.

They stated the results as showing a loss of \$64,643. They also said: "It must not be forgotten, that under the present system, those losses can never be restored. In those rare cases where forfeited lands are worth more than the amount due upon them, and have sold, or will sell for more, the laws direct the commissioners to return the surplus to the borrower. The Commissioners are thus compelled to sell the few valuable lands for less than their value, to the injury of the fund; and they are not permitted to sell the remainder for what they are worth; thus keeping a large amount of the principal of the fund idle, and locked up in lands unsaleable or worthless.

These results, startling as they are, show but a fraction of the truth. We know that the interest is now annually paid upon many loans upon worthless securities, because of the shame that would follow the exposure incident to a forfeiture. One mortgage in Milwaukee is secured upon two lots, that are now appraised at "nothing." The Superintendent states that they are covered with water so deep that they could only be filled up at an expense of thousands of dollars. Four loans of five hundred each (\$2,000 in all) were made in the years 1857 and 1858 to the wife, son, son-in-law and another relative of a prominent politician of La Crosse, and security taken for three of them upon "Cliffwood" out lots near that city, which, we are informed, are situated upon the side of a bluff so steep as to be almost inaccessible by any human agency, and which are about worthless except as a pasture for goats. The fourth is secured upon wild lands in Jackson county.

The full extent of these losses will not be ascertained for many years; and any estimate which can now be made will only approximate the truth. It is, however, the opinion of the present Commissioners that twenty-five per cent. of that portion of the fund now invested in mortgages is irretrievably lost. A considerable portion of this loss is, undoubtedly, chargeable upon the carelessness, and, perhaps, criminal connivance of the Commissioners themselves. The annual report of the Commissioners for the year 1860, shows that \$1,500 of this fund went to an Attorney General of this State, and to his near relatives, upon "lots" in Kilbourn City, now appraised at about \$230. All attempts at producing restitution have thus far failed.

But another and considerable portion of this loss is chargeable upon the system itself. That system of management of a trust fund is radically defective, if not criminally wrong, which provides for investing it in any manner that exposes the fund to inevitable loss, without any possibility of restoring it. In loaning one million of dollars in small sums to many thousand individuals, some losses are inevitable. A decent sense of honesty and good faith would require that some method should be provided, by which, in the administration of the fund, these losses could be replaced. We have already shown that our present laws *absolutely prevent and prohibit this.*

Again, that system of management for a trust fund must be inexcusably wrong which compels those who administer it to execute the trust in a manner that no court, controlling such a fund, would ever think of permitting, or that no private citizen would ever think of resorting to for the investment of his own fortune. The State government, having assumed the management of a trust fund, ought, at least, to manage it as prudently and carefully as a man of ordinary judgment and discretion would manage his own affairs. Yet would any prudent capitalist invest his own money in loans to men he did not know—taking security upon lands he never saw, with no better evidence of their value than the appraisal of two men of whom he knew nothing? Or, if a capitalist should ascertain that his agent was investing money for him in bonds and mortgages, after this manner of doing business, would he not at once put a stop to his proceedings, and make a change in his system of loaning, or, more probably, divest the agent of the trust altogether, as wanting discretion equal to the responsibility?

The people of Wisconsin received from the general government a most munificent grant, in trust, for the education of the children and youth of the State for all succeeding generations. It was a generous provision for the wisest and noblest of purposes. The State is bound for the preservation and faithful application of this trust by every sentiment of gratitude and honor, and moreover by the promptings of interest and of duty to the people of the State themselves, and to their posterity. Truth compels the confession that this trust has been, and is now, of necessity, most unfaithfully administered. The best of the school lands have been disposed of with eager haste and in disregard of the interest of the funds for which they were dedicated. Then the system adopted for the investment of the capital which has been realized to the funds from the sale of these lands, subjects this capital to waste and loss to the fearful extent instanced in the preceding pages of this report.

The commissioners recommended that all laws authorizing loans upon real estate should be repealed, and that as often as \$1,000 of the principal of any of the funds should accumulate, it should be invested in the bonds of the Northern States of the Union, or of the Federal Government.

That Legislature declined to interfere in any manner with the subject. Failing to procure any additional legislative protection for these funds, the Commissioners adopted some new and more stringent rules for the regulation of these investments. They now require the production of a certificate from the proper officer, showing the last two assessments of the property, an affidavit from the borrower that he believed the land fairly appraised; and when the appraisal shows that the land is unimproved, the Commissioners loan but one-third of the appraised value, except in this case, when the Commissioners are satisfied of the value of the premises by actual knowledge. They refuse to loan any money on unimproved city out lots.

The commissioners believe by the system they have adopted they have reduced the danger of loss to small limits. In loans amounting to \$80,508 50 made by the present commissioners in 1860, but \$6,245 have been forfeited; of this amount, \$3,665 were redeemed before sale, leaving only \$2,560 actually forfeited to the State; and in these cases the sworn appraisals were three times the amount loaned.

But at the best, it is but administering palliatives to a system fatally diseased. It prolongs the life of the fund because the process of depletion is slower. Its ultimate loss is none the less certain. No Commissioners can loan these Trust Funds with safety, upon the judgment of men of whom they know nothing. The present system does not permit any improvement of the Fund by an advance in the value of forfeited lands. In cases wherein the value of the property exceeds the loan, the surplus upon sale is returned to the borrower. There is no source whatever from which to supply the loss to the Fund, when the property is worth less than the loan. This fact alone should utterly condemn the system. This State has now outstanding about \$1,300,000 of six per cent. bonds. Every one knows that while the State has a government, the interest on these bonds will be paid. When our government is gone we shall have no more need of a School Fund.

The Commissioners earnestly recommend that they be authorized to invest the principal of the School Fund, as fast as it accumulates, in the bonds of this State, at a price not greater than their par value, or in the bonds of the United States, at a price not greater than their par value.

Should the Legislature not deem it advisable to change the present system, the Commissioners recommend that the existing laws be so amended as, if possible,

1st, To require each person obtaining a loan to execute and deliver to the State, in addition to the note and mortgage now required, a Warrant of Attorney authorizing the immediate entry of judgment upon such note, in any of the Circuit Courts of the State whenever a default should occur, and making it the duty of the Attorney General to cause such judgment to be entered, and execution to issue thereon.

2d. A repeal of all laws exempting property from forced sale upon such executions.

3d. Prohibiting all loans upon unimproved real estate.

Such enactments would not prevent persons obtaining loans upon ample security, and certainly no other loans ought ever to be obtained.

They would tend to prevent loans from being granted to persons who never intend to repay them.

NOTES ACCOMPANYING FORFEITED MORTGAGES.

There are now many notes in the hands of the Commissioners given with mortgages to secure loans, upon which a large balance is due to the State, the mortgaged premises having been sold to the State for a sum less than the loan.

These notes should all be put into judgment. The Commissioners have not caused it to be done because there is no money under their control with which to pay the costs that must inevitably be made. They recommend an appropriation for that purpose.

SCHOOL LAND PATENTS.

All the lands held by the State in trust for the several funds, which had been sold and upon which full payments had been made have from the first organization of the State government been conveyed to purchasers by patents executed by the Governor and countersigned by the Secretary of State.

The Supreme Court, in the cases of McCabe vs. Mazzuchelli, decided that all such patents for School and University Lands were void, not having been executed by the Commissioners of School and University Lands, in accordance with the provisions of sections 7 and 8 of article 10 of the Constitution.

The Legislature, at its last session, (chapter 281 of Laws of 1861) having given the commissioners the proper authority, they are now preparing new patents for all School and University Lands which had been previously patented by the Governor, to be executed by themselves. The commissioners are causing this to be done without any increase in the clerical force employed in the department, and will have them all ready for distribution by the 31st day of December next.

TRESPASSES UPON STATE LANDS.

The law of 1860, giving the Commissioners increased power to protect the lands of the State from trespasses, has been of immense value to the trust funds of the State. Not only has a very considerable amount been paid directly into the treasury by means of the clerks employed to look after these lands, but the fact that there has been in each lumbering section of the State a person whose especial duty it was to examine all pine lands belonging to

the State, has deterred many from committing such trespasses. This is evident from the greatly decreased trespassing in 1861, as compared with 1860.

The Commissioners expended for the year ending September 30th, 1860, in payment of salary and expenses of clerks, and those employed by them, the sum of \$1,997 34; for the year ending September 30th, 1861, the sum of \$1,515 18. During the last year the Commissioners have appointed experienced woodmen as clerks. They have not been uniformly successful in their selections, but with enlarged experience are hopeful for the future.

Experience has shown that the statute under which the Commissioners are acting requires amendment in certain important particulars. A bond in the penal sum of two thousand dollars, with sufficient sureties, to be approved by a responsible officer, should be required of every such clerk conditioned for the faithful accounting for and prompt payment to the State of all moneys coming to his hands belonging to it.

Severe penalties should also be enacted punishing any embezzlement of such funds, as well as any concealment of any trespass, coming in any way to their knowledge.

RACINE CITY MORTGAGES.

Proceedings have been commenced to foreclose a large number of mortgages executed to secure the payment of the unpaid purchase money upon lots in the school section of the city of Racine.

In some cases the whole amount due the State has been paid and patents issued for the lands. In ten cases, final judgments of foreclosure and sale have been rendered, and the lands described in the mortgages advertised for sale. Other cases are still pending undetermined. The Commissioners will proceed until all the mortgages in default shall have been foreclosed. Many of the lots are subject to various liens for unpaid taxes—upon many tax deeds are already outstanding. In every case that has come to the knowledge of the Commissioners, the holders of such tax deeds are willing to relinquish their liens upon receipt of the amount due for taxes, interest, legal charges for deeds, recording, &c. Under existing laws, the Commissioners have no authority to appropriate any of the fund to extinguish such liens or remove such incumbrances. Under the late decisions of our Supreme Court, a tax title, accompanied by an adverse possession of three years, would seem to be a good title. The Commissioners respectfully urge upon the Legislature the importance of giving them authority by law to remove such incumbrances and liens, and of appropriating a sum sufficient therefor.

But this is the opinion of the Commissioners and the power will be less likely to be exercised. The State now holds of School lands that have once been sold. Of Swamp lands. Of University lands.....

281,292 acres.
455,504 "
17,800 "

A small sum for that could be paid to these Superintendents as compensation and the amount added to the fund. Making a total area of School, Swamp and University lands that have been offered for sale and remain unsold.....

754,596 acres.

The following comparative statement shows the annual depletion in the principal available capital of the fund the amount of sales and on loans. The above School lands are held subject to sale at the aggregate sum of..... The Swamp lands at..... The University lands at..... The forfeited mortgage lands at.....

\$473,183
649,700
64,922
136,262

Total..... \$1,323,967

All these lands have now been in market over one year, and some of them more than three years. The appended tables show how many acres have been sold. The enormous amount of 754,596 acres of land, besides the forfeited mortgage lands, is therefore now held by the State for sale at prices exceeding their real value and which pay no taxes. \$1,323,967 of the School fund is lying idle. This is unjust to the citizens of the State, whose portion of the public burthen is increased by it. It is unjust to the children of the State, whose opportunities for instruction are decreased by it.

Such management is wanting in good faith to the United States government, by whose munificence the State has been so richly endowed.

The evidence on file in the office of the Attorney General is ample and conclusive, that but a fraction of the amount due upon the forfeited mortgage lands will ever be received from their sale. If these lands are held at their present prices they never can be sold.

The subject is surrounded with practical difficulties, but the Commissioners respectfully recommend that the County Superintendents of Common Schools, recently elected, be required to visit all such lands within their respective counties and appraise them under oath under rules and regulations to be prescribed by the Commissioners, at their present cash value, and that after such appraisal shall be filed with the Secretary of State such lands be held subject to private sale at the amount of such appraisal.

Such a power as this will impose very great responsibilities upon the Superintendents—responsibilities that will not always be

properly met. But this duty should be imposed upon some one, and the Commissioners are of the opinion that the power will be less likely to be abused, if confided to gentlemen entrusted by the citizens of the several counties with the management of their educational interests, than if the Commissioners themselves should select appraisers from the people at large.

A small sum per tract could be paid to these Superintendents, as compensation, and the amount added to the price of each tract upon the sale.

The following comparative statement shows the annual depreciation in the principal available capital of the fund—the amounts due on certificates of sales and on loans—since 1857:

Year.	Am't due on Certificates.	Am't due on Loans.	Total.	Annual Depreciation.
1858.	\$2,380,547 64	\$667,993 20	\$3,048,540 84
1859.	1,823,388 89	760,898 91	2,584,287 80	\$463,253 04
1860.	1,766,855 51	740,085 35	2,506,940 86	77,346 94
1861.	1,489,693 54	849,486 86	2,339,180 40	167,760 46

A similar comparative statement of the amounts due from the holders of swamp land certificates and borrowers from the drainage fund during the same period, will show a similar falling off. The university fund has been similarly, though not equally unfortunate. This depreciation is accounted for by the fact that every year a large proportion of the lands purchased from the State on credit, and lands mortgaged to the State as security for loans is forfeited, sold and bid in by the State, in default of other bidders. The above depreciation, of course, exceeds the ultimate loss to the funds, because the State will doubtless realize something from these forfeited lands. But the ultimate loss must be great, for the fact that these lands are thus abandoned to the State shows that they are not worth the amounts for which the State holds them, or for which they were pledged to the State.

Thus, while the number of children to be educated grows larger, the sum provided for their education grows smaller year by year.

Increasing public burthens for other purposes will make the people less disposed to increase the fund by taxation.

These facts suggest painful reflections, which the Commissioners have no space to elaborate. They must content themselves with saying, in conclusion, that not even in this supreme crisis of

his country's history, has the patriotic legislator a higher or more sacred duty than the conservation of this precious fund.

Respectfully submitted.

LOUIS P. HARVEY,
Secretary of State.
 SAM'L D. HASTINGS,
State Treasurer.
 JAMES H. HOWE,
Attorney General.
