The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

Evolutionary... revolutionary!

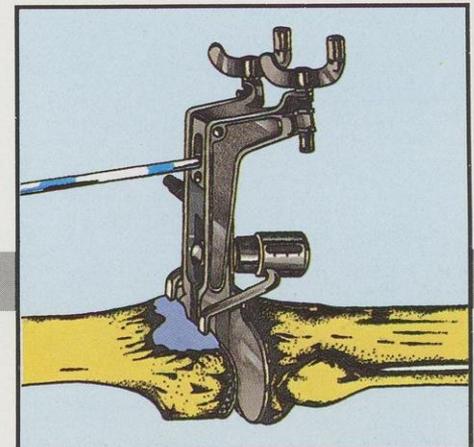

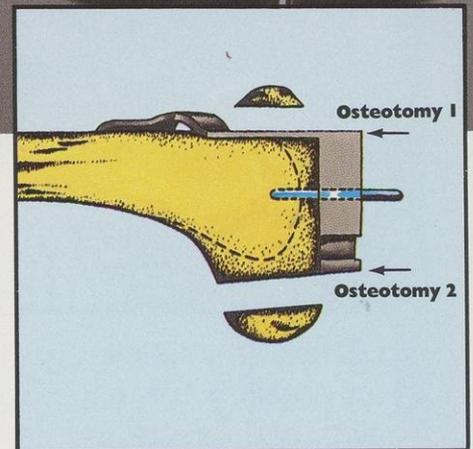

Through a step by step development, PROTEK brings new and revolutionary instrumentation to the MARK II Total Knee Replacement System.

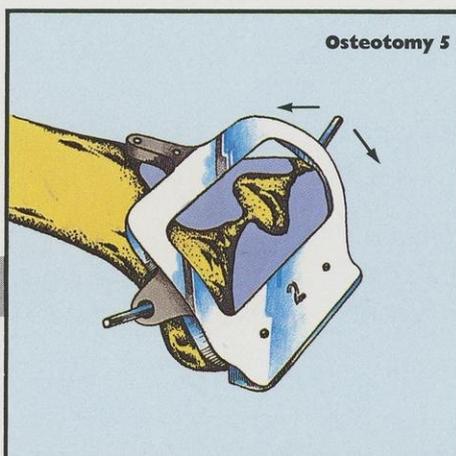

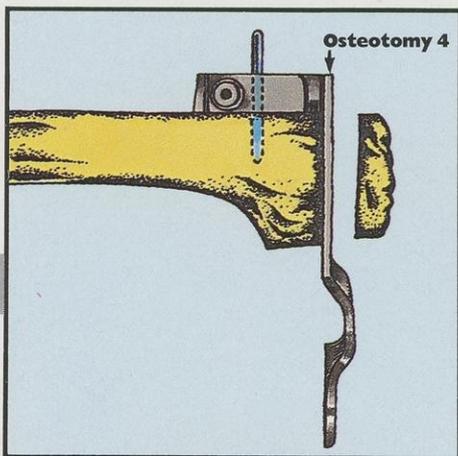

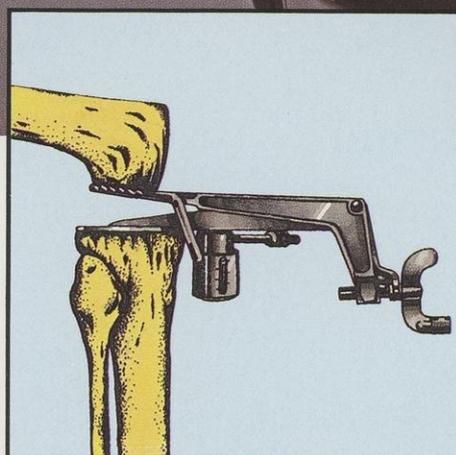

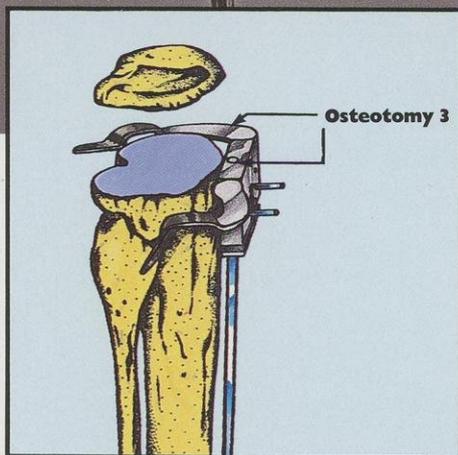

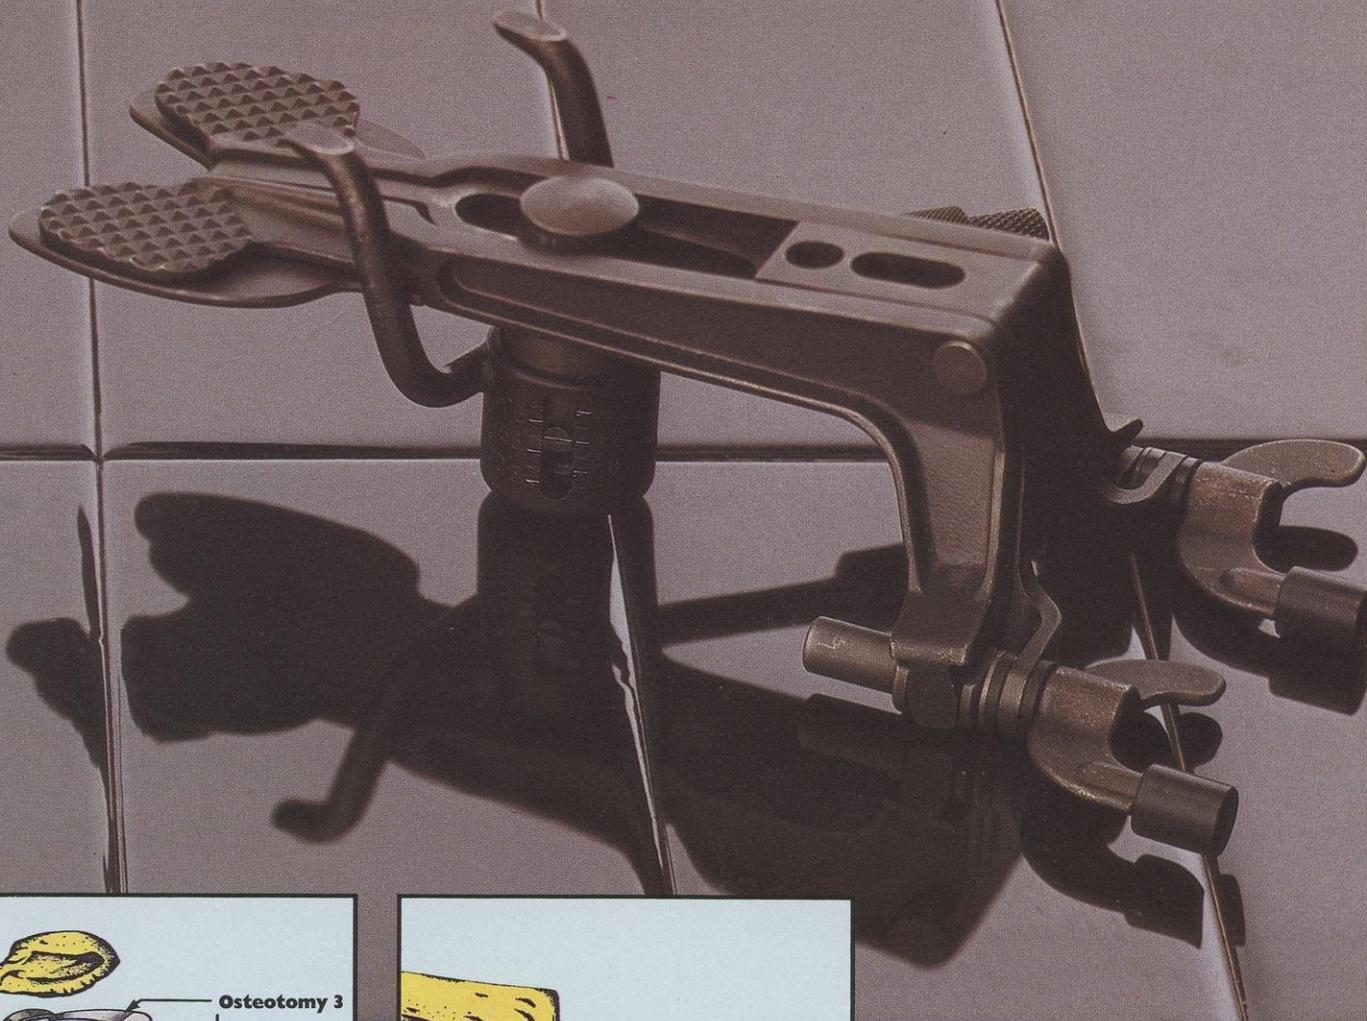

Simplified to their essence, these precision instruments clearly facilitate operational accuracy. Only three instruments are needed to make the five basic osteotomies and to adjust soft tissue tension. The Cutting Guide and the Anterior

Curve Guide are used for the five osteotomies and the Tenser is used to adjust the soft tissue tension and alignment.

This is another PROTEK System that presents a total coordination of operative technique, instrumentation and implants, all designed for flawless results.

...a commitment to perfection, only from PROTEK.
