The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

Have you seen wire
cut through the sternum
like cheese?

Give your wire repair a
Bio-mechanical Advantage

- Method is based on sound orthopedic surgery principles.
- Strong repair on the front of the sternum to convert the distractive forces of chest expansion into desired compression at the sternotomy site.
- Metal plate prevents the wires from cutting into the sternum.
