The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

RADIUM

RESPONSIBILITY, measurement, purity and service are the important factors in the purchase of radium.

The financial responsibility of the company selling radium is important, but can be easily ascertained by reference to recognized books of commercial rating or by bank references.

Measurement is insured by certificates of measurement from the United States Bureau of Standards in addition to our own guarantee of purity.

In service we offer technical assistance through teaching clinics, facilities for full medical advice, installation of approved radium emanation apparatus, radium appliances, literature, bibliography, abstracts and a mass of little details in service that constantly arise in individual cases.

As one of the first refining and producing companies we ask that you allow us to quote prices when you contemplate buying.

Because every process in the production of our radium is carried on in our own plants we can unqualifiedly guarantee its purity.

United States Radium Corporation

30 Church Street, New York City

Plants and Laboratories:
Orange, New Jersey

Mines:
Colorado
