The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

*It is not enough to teach our young people to be successful... so they can realize their ambitions, so they can earn good livings, so they can accumulate the material things that this society bestows. Those are worthwhile goals. But it is not enough to progress as individuals while our friends and neighbors are left behind."*
