The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

BURNHAM DIGITAL SPLINTS

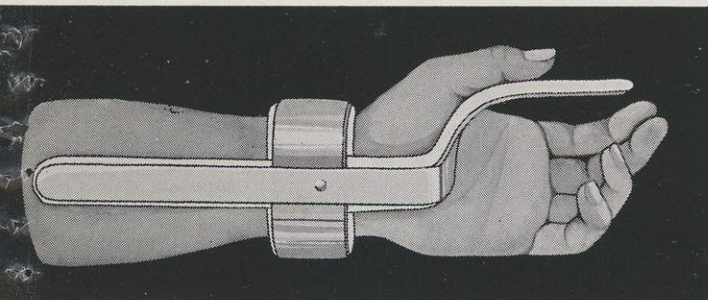

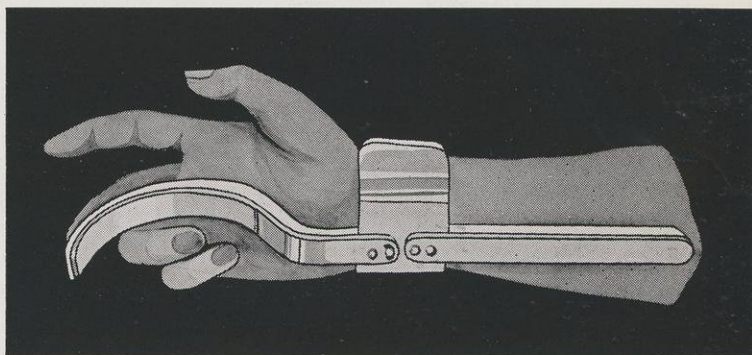

For Fractures and Dislocations of the Digits

These new splints are based on the new principle of splinting fractured or dislocated parts in a position of rest to prevent muscle-tendon tensions from distorting the parts. Wrist splint provides maximum reduction of muscle-tendon tensions. All Burnham splints are padded with white felt for patient comfort and are constructed of radio-lucent aluminum for ease of checking reduction and healing by X-ray.
