TOPICAL
SOLUTION

TRONOTHANE solves the riddle of topical anesthesia with a new approach. Its formula is structurally unique, non-"caine".

Sensitization and toxicity can be expected to be negligible, judging from their absence in over 1,220 clinical trials to date.^{1,2,3,4}

Yet TRONOTHANE is prompt, effective. Use it to relieve discomfort in episiotomy, hemorrhoids, various itching dermatoses, anogenital pruritis, minor burns and sunburns, intubation procedures, etc.
