The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

more rapid relief of brachial plexus pain with ease and comfort

Now, thanks to TRACTOLATOR, the physician can administer a carefully graduated, smooth traction force . . . precisely automatically . . . intermittently with maximum comfort to the patient . . . of greater traction force than ever before! Clinical results of intermittent traction, because of the application of adequate traction force, have far exceeded results obtained from traction therapy applied by yesterday's methods!

As illustrated, TRACTOLATOR is made in both chair and bed models, the latter for bed patients and hospital cases. Bed traction is used for lumbar or pelvic traction and can be adapted for cervical traction by using a single pulley and cable with head halter attachments. You owe it to yourself and your patients to see what TRACTOLATOR can do for you! Why not write for further information, case histories, and literature?
