NAVIGABLE WATERS.**REGULATION OF LEVEL AND FLOW OF WATER.***Gates in dam to control level and flow.*

1. Complaint was made that by reason of the height of the "lower dam" in the Rock river within the city of Mayville, and its lack of proper spillway or gateway, and also by reason of the construction of the "upper dam," the water in the river between the two dams at times rises higher than it should under the owner's flowage rights, and overflows large areas of land belonging to the petitioners and other property owners similarly situated; and that with present conditions existing and continuing to exist the owners of the property in question have good reason to believe that irreparable injury will result to them. The Commission was therefore asked to investigate the flow of water between the upper and lower dams, establish a maximum and minimum water level, determine the rights in the premises of the petitioners and of the Northwestern Iron Company, the owner of the two dams, and order the lower dam lowered and provided with spillway or floodgates capable of permitting the passage through or over the same of freshets or floods during all seasons of the year. It appears that during the spring of 1913 much damage was done to property in the city of Mayville, because of water backing up between the lower and upper dams, and that a recurrence of such event is likely unless a remedy is provided for disposing of the surplus water in case of flood. *Held:* That

the lower dam of the Northwestern Iron Co. is not capable of carrying off flood water without materially raising the water over the top of the spillway, and that the lower dam should be equipped with a gate that can be opened to a point five feet below the top of the present spillway for a total clear opening for water passage 27 feet in length, and that the bottom of the river on the up-stream side of the gate should be dredged out to a level at least as low as the bottom of the new gate; that a highwater mark should be established, and that when the water reaches such height, the gates should be opened immediately, and, that the present height of the dam is not dangerous, and that the crest of the present spillway should remain as it is. Order: That the Northwestern Iron Co. construct a gate in the lower dam in question with a clear opening 27 feet in length, that the bottom of the river upon the upstream side of such gate be dredged out to a level at least as low as the bottom of the gate to be constructed, and that the maximum height of the water permitted by the dam in question shall not exceed 6 inches above the top of the present spillway, and that when such height is reached the Northwestern Iron Co. shall open the gate to allow the water to escape. July 1, 1915, is deemed a reasonable time for the completion of the work ordered. *In re Reg. of Flow of Rock River in Mayville*, 698, 707.

Maximum and minimum level—Establishment of.

See also ante, 1.

2. Application was made to the Commission by the Long Lake Improvement Association to determine maximum and minimum levels of water in Long Lake, Washburn county. The petitioner alleged that the dam at present maintained at the foot of the lake by the Wisconsin-Minnesota L. & P. Co. is so used as to cause great variation in the level. Testimony was given to the effect, among others, that during high water springs and boat houses along the border of the lake are flooded, while during low water marshes are created, fish spawn killed, and boat landing places made inaccessible. The lake is used by the owner of the dam as a storage reservoir so as to provide it with sufficient water for the operation of its power plants further down the waterways. The constant raising and lowering of the level was said to erode islands in the lake, carrying away much desirable private land, and destroying scenic effects. The company claimed unreserved flowage rights to most of the land surrounding the lake, and prescriptive rights for the land not so covered. The latter rights, however, were denied by the petitioner. *Held*: That the lands bordering Long Lake are being affected by the existence of the dam and the raising and lowering of the waters; that in the absence of sufficient proof, the prescriptive rights alleged cannot be presumed to exist; that the lands not burdened with flowage rights are entitled to protection, and that the claim that the majority of the land is so burdened does not impair the right of the other to protection; and that a maximum level of 6 feet at the gage board with a maximum variation of 12 inches, with an additional permissible variation of 3 inches over the maximum height in case of flood, will provide protection from flooding for border structures and afford the company sufficient storage capacity for power purposes. Order: That the Wisconsin-Minnesota L. & P. Co. maintain the level of Long Lake between a maximum of 6 feet and a minimum of 5 feet on the gage board, provided that in case of flood the maximum may be raised three inches. *In re Reg. Level of Water on Long Lake*, 708, 711.

Regulation of height of dam.

3. The application was considered in the light of the evidence and arguments offered in its support and in opposition, and it was, by virtue of ch. 591, laws of 1911 *Found and Determined*: That the re-

quirement of ch. 189, laws of 1907, as to the construction and maintenance of the dam in question at eighteen feet, was no longer necessary from the standpoint of navigation, or of the public safety, and should be dispensed with, until the Commission, upon investigation had, should require such restriction to be replaced. *In re Appl. Wisconsin River Power Co.*, 471, 472.

Regulation of variation in level of lake.

4. Complaint was made that the adoption of the high and low water marks suggested by the Chippewa and Flambeau Improvement Co. for its Rest Lake reservoir would result in injury to petitioners' property and to the fish of the lakes involved, and a further hearing was requested. It was alleged that a wide variation in the level is allowed at certain seasons of the year; that the variation in level causes property owners inconvenience and expense in adjusting their piers and boat houses to the changing conditions, that violent changes in the level are destructive to fish, especially during the spawning season, and that as a result of the very low stage in the winter many fish are trapped in bays and die there. Property owners urged the adoption of various maximum levels (as measured by the gauge at the Rest Lake dam) ranging from 6 feet to 8 feet, and a minimum level not more than 2 feet lower than the maximum. The company suggested that a maximum of 10 feet be allowed in the spring, dropping to 6 feet 6 inches from June 1 to October 1, and running as low as possible during the fall and winter. It appears that the shore line affected by the stage of water maintained is approximately 60 miles in length, and that the number of people frequenting the lakes for fishing and hunting or for other purposes is rapidly increasing. *Held*: That, due regard being had for the interests of property owners in the vicinity, of the state at large, and of the company, the level maintained at the Rest Lake dam should not exceed 8 feet on the gauge, or 14 feet 6 inches below the top of the bench mark set by the Commission; that the level should not be allowed to fall below 5 feet 6 inches on the gauge, or 17 feet below the top of the above bench mark; and that the Rest Lake dam is in poor physical condition and should be repaired in the near future. *Ordered*: That the company maintain the level of the reservoir controlled by its Rest Lake dam with the least variation consistent with its proper use, and maintain the level between the maximum and minimum points stated in the decision. *In re High Water Mark on Rest Lake Reservoir*, 438, 441.

CONTROL AND REGULATION OF PUBLIC UTILITIES.

What are public utilities—Electric power company declared to be a public utility.

1. The applicant was organized as a public utility, its letterheads from the first advertising that it would sell current up to its capacity to any customer. The company was given the right in its charter to use the streets for poles and wires, and did so use them, being a holder of a franchise from the city authorizing such use. Its articles of incorporation give as one of its purposes to produce and convey electric power to any place where it may be desired and to engage in the business of electric lighting. The entire matter at present is specifically covered by sec. 1797m—1 of the statutes. *Held*: That sec. 1797m—1 of the statutes makes the applicant a public utility at present, and that the applicant was also a public utility within the meaning of the law when the contracts involved were entered into prior to the enactment of the statute in question. *In re Appl. Rhineland Power Co. to Amend its Rates*, 783, 786—792.

SCOPE AND PURPOSE OF LAW.

With respect to whether the right to do a public utility business is contingent upon the ownership of the physical property.

2. The question put squarely before the Commission in these proceedings is whether the right to do a public utility business in this state is a property right, and, if so, whether such right is contingent upon the ownership of the physical property. If the municipality is permitted to effect the arrangement which it desires, its action amounts to a virtual taking away of the respondent's franchise or right to do business, and the assertion of ownership over that business. We cannot escape the conclusion that if the city acquires the right to sell directly to the consuming public at Neenah it has taken something of value from the respondent. Upon what basis such value is to be determined we do not deem it necessary to decide in these proceedings. This question

becomes irrelevant when we have once settled as a fact that the right to do a public utility business in this state is contingent upon the ownership of the physical property. That this right or franchise is property, is settled. See *Joyce on Franchises*, pp. 80 to 85. Also, *Louisville & Jeffersonville Ferry Co. v. Kentucky*, 188 U. S. 385, 394; *Central Pac. Rd. Co. v. California*, 162 U. S. 91 127; *Metropolitan City R. Co. v. Chicago W. Div. R. Co.* 87 Ill. 317, 324; *People ex rel Woodhaven Gas Co. v. Deehan*, 153 N. Y. 528; *Cauble v. Graig*, 94 Mo. App. 675. As to whether it is personal or real property, we need not concern ourselves. Nor need we enter upon a review of the findings of the courts in other states as to whether franchise value attaches itself to the physical property. (For such cases see *Joyce on Franchises*.) We have to deal here only with franchise rights in this state. In Wisconsin, the distinction between franchise value and physical items of property was never entered into by the legislature, and the supreme court, while recognizing the right of the legislature to so distinguish, has always held that the physical and intangible items of property should be considered as an entirety. This matter has been brought before the court in taxation cases and has been uniformly decided in the manner indicated above. See *State ex rel Milwaukee St. R. Co. v. Anderson*, 90 Wis. 550; *State ex rel Ashland Water Co. v. Wharton*, 115 Wis. 457; *Chicago & N. W. R. Co. v. State*, 128 Wis. 553; *Fond du Lac Water Co. v. Fond du Lac*, 82 Wis. 322; *Monroe Water Works Co. v. Monroe*, 110 Wis. 11; *Yellow River Imp. Co. v. Wood Co. and another*, 81 Wis. 554. Under the Public Utilities Law a municipality can only terminate a franchise or indeterminate permit when it determines to acquire the plant of the public utility and then it must pay just compensation for the property as a going concern. *City of Neenah v. Wis. Tr. Lt. H. & P. Co.*, 626, 628, 629, 631.

Construction of Law with respect to extension of telephone lines.

3. In making the decision in the instant case we are not unmindful of the evasion of the law that might be accomplished by telephone companies that construct toll lines and then request that they be permitted to convert them into local lines. The Commission will, however, inquire carefully into the circumstances surrounding any application of that nature and it is not intended that the effect of this decision shall be to give the sanction of the Commission generally to such conversions. The weight that is accorded in this decision to the contention that the investment of the applying company in the existing toll line would become a dead one if the conversion were not permitted might not be accorded to a similar argument in another instance. Should other cases of this nature arise they will be dealt with on their individual merits. *In re Wis. Tel. Co. Toll Station at Eagle Point*, 454, 458.

PUBLIC UTILITIES LAW.

SECTIONS CONSTRUED.

- Section 1797m—1, what are public utilities, electric power company declared to be public utility, *see PUBLIC UTILITIES*, 1.
 Section 1797m—4, physical connection between telephone lines, and facilities to be granted other utilities, *see TELEPHONE UTILITIES*, 14.
 Section 1797m—4, physical connection, constitutionality of statute, *see RAILROAD COMMISSION*, 4.
 Section 1797m—74, competition of utilities, duplication of telephone facilities not permitted unless public convenience and necessity require same, *see TELEPHONE UTILITIES*, 1.
 Section 1797m—74, duplication of telephone lines prohibited, *see TELEPHONE UTILITIES*, 2.

- Section 1797m—74, duplication of telephone lines, when permitted, *see* TELEPHONE UTILITIES, 3.
- Section 1797m—76, municipal acquisition, municipality cannot acquire business of existing utility without also acquiring the plant, *see* PUBLIC UTILITIES, 2.
- Section 1797m—78, by acceptance of indeterminate permit, a utility waives the right to have established by the verdict of a jury, the necessity of the taking over of its property by the municipality, *see* ELECTRIC UTILITIES, 4.
- Section 1797m—81, municipal acquisition of public utilities, time of giving notice to utility or the Railroad Commission, *see* ELECTRIC UTILITIES, 7.
- Section 1797m—90, duty of utility to provide meters, *see* ELECTRIC UTILITIES, 14.
- Section 1797m—90, duty of electric utility to provide transformers and lightning arresters, *see* ELECTRIC UTILITIES, 15.
- Section 1797m—91, legality of rates established by contracts executed prior to April 1, 1907, *see* RATES—ELECTRIC, 24.
- Section 1797m—102, imposes upon the Commission duty of enforcing provisions of sections 1797m—1 to 1797m—109, as regards duplication of telephone lines, *see* TELEPHONE UTILITIES, 2.

RAILROAD COMMISSION.

Duty of Commission to enforce the Public Utilities Law.

1. The obvious purpose of the statute was to prevent the creation of the identical state of affairs that has arisen in this instance, namely, a wasteful duplication of telephone lines. It is the duty of the Commission to give this law effect. Sec. 1797m—102 says, speaking of the Commission, "It shall be its duty to enforce the provisions of sections 1797m—1 to 1797m—109". In enforcing the provisions of the statutes specified, it is no less the duty of the Commission to take steps to abate a condition that has arisen that the law is designed to prevent than it is to prevent the occurrence of that condition in the first place. *In re Proposed Extension Grange Hall Farmers Tel. Co.*, 11, 16.

Duty of Commission to fix a reasonable regulation with regard to telephone service with any railroad.

2. Section 1797g—2 of the statutes provides that "Upon complaint to the railroad commission of Wisconsin that any telephone service with any railroad is inadequate or in any respect unreasonably or unjustly discriminatory or that such service can not be had, it shall be the duty of said commission to investigate the same and if upon investigation the commission shall find that any telephone service is inadequate or

unreasonably or unjustly discriminatory or that such service can not be had it shall determine and by order fix a reasonable regulation, practice or service to be installed, imposed, observed and followed in the future." *Lauder v. C. St. P. M. & O. R. Co.*, 33, 35.

Duty of Commission to prescribe standards for telephone service.

3. The Public Utilities Law requires all public utilities to furnish adequate service and empowers the Railroad Commission to formulate standards of adequate service. Believing that the establishment of standards for telephone service would be of material aid in bettering such service throughout the state, an investigation of the matter was instituted by the Commission. *In re Invest. Standards for Tel. Service in Wis.*, 1, 2.

Duty of Commission to prevent wasteful duplication of telephone lines.

See ante, 1.

Duty of Commission to require physical connection—Question of constitutionality of law.

4. The Commission on June 3, 1914, made an order (14 W. R. C. R. 529) requiring the respondents to establish a physical connection of their lines in Janesville for the purpose of affording toll line and local, including rural, service to the subscribers of each company on the lines of the other company. The constitutionality of the act on which the present proceeding rests was challenged and argued by counsel. *Held*: It is not necessary to consider the question. As a general rule, administrative tribunals should assume the validity of acts submitted to them for administration. As the statute provides for judicial review of the orders of the Commission, the courts can determine if there is any infirmity in the statute in question without the order of the Commission causing injury to any one. *McGowan v. Rock County Tel. Co. et al.*, 378, 379.

Jurisdiction of Commission—Commission without jurisdiction to compel an electric utility to change the location of its high voltage transmission lines.

5. The confronting difficulty in the case is the want of jurisdiction in the Commission to compel either company to change the location of its lines. If the telephone company has suffered damage because of the interference with its service and business, it may possibly recover the same in an action in court. It is the duty of the telephone company under the circumstances to render its service adequate at its own expense if the respondent is unwilling to bear the same. If it has any remedy against the respondent it must seek the same in court. The situation here presented suggests the necessity of additional legislation, giving the Commission power to determine the location of high voltage transmission lines. *Ebenezer Tel. Co. v. M. L. H. & T. Co.*, 619, 621.

6. For the reason stated in the case of the *Ebenezer Telephone Company v. Milwaukee Light, Heat & Traction Company*, herewith decided, the petition herein will be dismissed for want of jurisdiction on the part of the Commission. *Platteville etc. Tel. Co. et al. v. Lancaster El. Lt. Co.*, 622, 625.

Jurisdiction of Commission—Commission without power to compel railway company to construct sidetrack at its own expense for shipper.

7. The petitioner in this case has no contract with the railway company by which the latter is required to construct or maintain an industrial track for the service of its industry. "At common law, no shipper or consignee of ordinary freight, no matter how large the business which he does with the railroad may be in the aggregate, has any right to have freight trains stopped at his premises or freight cars spotted at his siding, even if his premises abut upon the right of way or he has constructed a siding to the railroad grade ready for connection with the through tracks. Even if a patron is enjoying the privilege of having cars left on a siding for him and taken away when loaded, the railroad may discontinue this service on short notice." 1 Wyman on Public Service Corporations, sec. 815. It is also well settled that neither the legislature nor the Commission can compel a railroad company to construct sidings at its own expense. Any statute imposing such expense upon the railway company would be void. *N. W. Warehouse Co. v. Oregon Ry. & Navig. Co.* 32 Wash. 218; *Mays v. Seaboard Airline Ry. Co.* 75 So. Car. 455; *Mo. Pac. Ry. Co. v. Nebraska*, 164 U. S. 403; *Mo. Pac. Ry. Co. v. Nebraska*, 217 U. S. 196. For the reasons given, we are of the opinion that the Commission is without power to compel the respondent railway company to construct the sidetrack prayed for in the petition. *Osceola Mill & El. Co. v. M. St. P. & S. S. M. R. Co.*, 416, 420.

Jurisdiction of Commission—Commission without jurisdiction to order electric railway to carry freight.

8. Complaint was made that respondent, an electric railway operating from a point in the city of Waupaca, Waupaca county, to a point in the town of Farmington, Waupaca county, refuses to carry freight, though authorized to do so under the statutes of the state, its articles of association, and franchises granted by the municipalities involved, and the Commission was asked to require the respondent to transport over its line of road, petitioner's freight between the Wisconsin Veterans' Home and points reached by respondent railway. *Held*: That the Commission is without jurisdiction; that the carriage of freight through the city streets by respondent would cast an additional burden on the fee, for which abutting owners would be entitled to compensation; that in view of the reasonable doubt as to the existence of the authority contended for in the franchise in question, the authority cannot be inferred; that, in any event, the clause alleged to confer the requisite authority is permissive only and not mandatory, and that, respondent having never assumed any obligation under the same, the Commission can not order the respondent to assume such obligation in the first instance; that the fact that complainant is a semi-public institution and that respondent is operating under an indeterminate permit is not material in this proceeding, and that under all the circumstances the Commission is without power to make the desired order. The petition is dismissed. *Wis. Veterans' Home v. Waupaca El. Lt. & R. Co. et al.*, 656, 666.

Jurisdiction of Commission—Over changing of route of railroad company.

9. The petitioner seeks to base its application to this Commission for relief upon the provisions of section 1797—58 of the statutes, which state that a railroad company may alter or change its route upon a two-

thirds vote of its directors by making and filing with this Commission a map and certificate of the proposed alterations, provided "that such alteration or change shall not deviate from the original route of such railroad as approved by the Railroad Commission for a greater distance than one mile * * * and also provided that the original termini or route in any city or village shall not be changed by such alteration * * * without the approval of the Railroad Commission." *City of Ashland v. M. St. P. & S. S. M. R. Co.*, 816, 819.

Jurisdiction of Commission—Over culverts.

10. Section 1388b of the statutes (being chap. 159, laws of 1913) makes the provision, construction and maintenance of sufficient ditches, culverts or other outlets under such circumstances as the present mandatory. It is our judgment, therefore, that full compliance with the statute above quoted requires that the culverts in question be lowered so as to allow a free flow for the water in the drainage ditches on petitioner's land. It is also necessary to provide suitable ditches to carry off the water west of the embankment. *Williams v. C. & N. W. R. Co.*, 366, 369.

Jurisdiction of Commission—Over electric railways.

See ante, 8.

Jurisdiction of Commission—Over excursion trains.

See post, 13.

Jurisdiction of Commission—Over franchises.

See ante, 8.

Jurisdiction of Commission—Over interchange of traffic.

11. While the legislature has conferred authority upon the Commission to compel railway companies to provide reasonable facilities for the interchange of traffic between their respective lines (Wisconsin statutes, sec. 1797—11 and sec. 1802c) at the present time there is no statutory provision empowering the Commission to require facilities for the interchange of traffic between land and water carriers. *City of Ashland v. M. St. P. & S. S. M. R. Co.*, 816, 820.

Jurisdiction of Commission—Over interstate trains.

12. The Commission will not hesitate to require an interstate train to stop or make proper connections within the state when such changes are necessary for adequate service. *Nolan et al. v. C. & N. W. R. Co. et al.*, 588, 591.

13. The Commission has jurisdiction over interstate trains with respect to adequacy of train service so long as this jurisdiction is not so exercised as to be an unwarranted interference with interstate commerce. The primary duty of a railroad is to furnish reasonably adequate local service, and the question of adequacy in particular cases is, aside from statutory requirements, one for the Commission to determine. Thus, when a regulation by the Commission of an interstate train does not, under the circumstances, operate to interfere with interstate commerce, it is valid. (*Morris et al. v. C. M. & St. P. R. Co.* 1913, 12 W. R. C. R., 560; *Schlosstein v. C. B. & Q. R. Co.* 1911, 8 W. R. C. R. 242.) This doctrine has been upheld by the Wisconsin supreme court (*C. B. & Q. R. Co. v. R. R. Commission*, 1913, 152 Wis. 654) and the power of the states to make regulations of train service by statute or through their railroad commissions has been affirmed by the United States supreme court in numerous decisions. (*Diamond G. C. v. U. S. G. Co.* 187 U. S. 611; *Atl. C. Line R. Co. v. N. Car. Corp. Commission*,

206 U. S. 1.) It is upon another point, one partly advanced by the respondent, that the Commission considers that it lacks jurisdiction in this case. The train is not one regularly operated by the respondent and is not included in its list of trains giving regular service to stations on respondent's line, including Winnebijou and Campbell's Mill. As the testimony shows, it is operated only during the summer months, only on Sunday, and as an excursion train. It may be clearly considered as special service furnished in addition to the regular necessary train service, and as such the time and extent of its operation is subject only to the discretion of the company. *Hughson et al. v. D. S. S. & A. R. Co.*, 599, 602, 603.

14. To grant the relief sought would necessitate the regulation of interstate passenger service, which is beyond the jurisdiction of the Commission, except where such regulation is necessary for adequate intrastate service. In the present case no such condition exists. *Fond du Lac Business Men's Ass'n. v. C. & N. W. R. Co.*, 606, 607.

Jurisdiction of Commission—Over private commercial dock of railway company.

15. Property not devoted to the purpose of giving the service that the railway company holds itself out as offering, is essentially private in character and subject to the control of the railway company. It has been held that a railway company is not required to maintain a dock for the purpose of allowing any competing carriers to load and discharge goods. Such a dock or wharf is the company's private property to which it has the sole right of occupancy and the power of regulation thereof. *Louisville & Nashville R. R. Co. v. West Coast Naval Stores Co.* 198 U. S. 483. *City of Ashland v. M. St. P. & S. S. M. R. Co.*, 816, 821.

Jurisdiction of Commission—Over private contracts.

16. This Commission is not authorized to pass upon the validity of private contracts entered into by public utilities with their patrons with a view of rendering judgments specifically enforcing the same, or granting damages for their breach if found to be valid. *Lauder v. C. St. P. M. & O. R. Co.*, 33, 35.

Jurisdiction of Commission—Over public utility rates established by contract.

17. The power to regulate rates to public service corporations is a power belonging exclusively to sovereignty. Under our form of government it inheres in the state and is given expression by the legislature. In the case of municipality the legislature may and does sometimes divest itself temporarily of the right to interpose to fix or change rates by giving the municipality the power to act for it in regulating rates. But the legislature never divests itself of that power by conferring it upon a public service corporation. Any rates named, therefore, by a public service corporation in any contract are always subject to change by the legislature, if it so choose. This power of the state to regulate rates is implied in every contract touching rates made by a public utility. For the state, through the Commission, to interpose in the present case or in any such case to change or authorize a change in the rates named in a contract, is not such an impairment of contract obligations as comes within the inhibition of the constitution, but instead is carrying out one of the terms or provisions of the contract (*Manitowoc v. Manitowoc & Northern Tr. Co.* 145 Wis. 13). A case decided by the supreme court of Wisconsin as late as December 1914 (*M. St. P. & S. S. M. R. Co. appellant v. Menasha Wooden Ware Co.* 150 N. W. 411) makes very clear this principle. The right of the

legislature through the Railroad Commission to change or authorize a change in rates named in contracts made by public service corporations is well established. *In re Appl. Rhinelander Power Co. to Amend its Rates*, 783, 813, 814.

Jurisdiction of Commission—Over railway crossings.

18. Sec. 1813 is supplementary to sec. 1810, which specifically provides for the construction of cattle guards only at highway crossings. The farm owner is authorized by sec. 1813 to serve notice upon the railway company to "construct the necessary farm crossings and cattle guards thereon" and a penalty is fixed for the railway company's failure to do so. In our opinion sec. 1813 makes it obligatory upon a railway company to provide cattle guards and the wing fences necessary for their efficient use at farm crossings upon notice from a farm owner. This statute, while not a part of the Railroad Commission Act, relates to railroads, and its enforcement is within the jurisdiction of the Commission. (*In re Crossing on C. & N. W. R. Co. in Town of Gale*, 1914, 14 W. R. C. R. 445.) In the instant case our order is predicated upon the obligation of the respondent to furnish cattle guards and wing fences at farm crossings under sec. 1813 of the statutes, and not upon safety consideration. *Von Rueden v. C. M. & St. P. R. Co.*, 272, 275, 276.

Jurisdiction of Commission—Over railway crossings—Authority to order construction of.

19. Counsel for the respondent contends on brief that the Commission has authority under sec. 1797—12e of the statutes to refuse to permit the establishment of a crossing on the ground that public necessity does not require it. Counsel for petitioner maintains in his brief that the question of the public necessity of a proposed crossing is to be determined by the municipality in interest and that the Commission is without jurisdiction in the matter. The Commission has taken the latter position in similar cases (*Town of Elcho v. C. & N. W. R. Co.* 1914, 14 W. R. C. R. 796, and *Town of Superior v. G. N. R. Co.* 1914, 15 W. R. C. R. 300), and we see no reason for withdrawing from the position there taken. To hold otherwise would in effect place the Commission in the position of dictating a municipality's highway development. *Town of Remington v. C. M. & St. P. R. Co.*, 609, 610.

Jurisdiction of Commission—Over railway crossings—When Commission shall determine mode and manner of crossing.

20. Much of the testimony relates to the proximity of other crossings to the site at which the town seeks to establish a new crossing, and to the public necessity of such a crossing. These matters are not material to the present proceeding, since the town board is vested with authority to determine whether a crossing is needed, and the function of the Commission in such a case relates solely to the determination of the mode and manner of crossing. Counsel contends that the highway in question has not been legally laid out and objects to the jurisdiction of the Commission in the premises. However, the chairman and clerk of the town board appeared and submitted documents purporting to be copies of the original proceedings taken by the town board to lay out this highway. It is unnecessary to consider the technical validity of these proceedings inasmuch as the Commission is directed to determine the mode and manner of crossing upon complaint from either the town or the railway company that public safety requires such determination with reference to a crossing which is laid out or which it is

proposed to lay out. (*Town of Gillett v. C. & N. W. R. Co.* 1912, 9 W. R. C. R. 535, and *Town of Elcho v. C. & N. W. R. Co.* 1914, 14 W. R. C. R. 796.) *Town of Superior v. G. N. R. Co.*, 300, 305.

Jurisdiction of Commission—Over relations between officials of a utility.

21. Considerable testimony was introduced with reference to the official acts of the secretary and treasurer of the respondent company and as to whether such acts were duly authorized by the board of directors. The Commission has no jurisdiction over the relations between a utility official and the board of directors unless such relations impair the service or create unreasonable rates; and it does not appear that either condition exists in the present case. *Pospichal et al. v. Muscoda Mutual Tel. Co.*, 578, 579.

Jurisdiction of Commission—Over relocation of a railway station.

22. A rehearing was applied for in the case of *Von Berg et al. v. C. M. & St. P. R. Co.* 1914, 14 W. R. C. R. 553. The respondent contended that the order requires a new and different location for the depot ordered built than that formerly used, which is contrary to the laws of the state of Wisconsin and beyond the jurisdiction of the Commission. *Held*: The jurisdiction of the Commission to require the relocation of a station in the interest of public safety was considered in the previous decision, and no reason is seen for withdrawing from the position there taken. *Von Berg et al. v. C. M. & St. P. R. Co.*, 311, 312.

Jurisdiction of Commission—Over street railway service.

23. Although prior to the enactment of the Railroad Commission Law the power of service regulation was vested in the common council and the regulative ordinance of 1901 was a valid exercise of that power, jurisdiction in the matter was subsequently conferred on the Commission and any prior act of the common council which conflicts with the exercise of the proper authority by the Commission cannot stand. The company has assumed the duty of rendering adequate street car service on the portion of the line under consideration and it is incumbent upon the Commission, upon complaint, to determine what constitutes adequate service and by order to require it to be rendered. *Jones v. Wis. Ry. Lt. & P. Co.*, 174, 176.

CONSTRUCTION, MAINTENANCE AND EQUIPMENT.

Crossings—Railroad by highway—Protection of—Jurisdiction of Commission.

1. The statutes which empower the Commission to require the installation of protective devices and the alteration of crossings, refer only to highway crossings and the protection of public travel thereon. However, under sec. 1810 the railway company is required to provide "suitable and convenient farm crossings." A crossing can not be regarded as "suitable and convenient" unless it is reasonably safe for those persons whom it is intended to serve. Therefore, in the enforcement of this statute, the Commission is justified in requiring reasonable safeguards at farm crossings. Moreover, if the lack of crossing protection endangers railway traffic, the Commission has authority to order such improvements as are necessary to conserve public safety. In the instant case our order is predicated upon the obligation of the respondent to furnish cattle guards and wing fences at farm crossings under sec. 1813 of the statutes, and not upon safety consideration. *Von Rueden v. C. M. & St. P. R. Co.* 272, 276.

Crossings—Mode and manner of crossings—Determination of.

2. Complaint was made that the respondent refuses to construct a crossing at the point where a public highway laid out by its town board intersects the line of the respondent. The petitioner alleges that the highway is laid out on the north and south quarter line of section

9, township 47, range 15 west, and that public safety requires the determination of the mode and manner of the proposed crossing, which it accordingly asks the Commission to do. The contention was made by the respondent that it has provided an adequate crossing for the vicinity in question within about a quarter of a mile of the proposed location, and that public safety or convenience does not require the building of any other crossing or roadway in the vicinity. Objection was also made to the jurisdiction of the Commission in the premises on the ground that the highway in question was not legally laid out. Documents purporting to be copies of the original proceedings taken by the town board were submitted. *Held:* The objections are not material to the present proceeding, as the Commission is directed to determine the mode and manner of crossing upon complaint from either the town or the railway company that public safety requires such determination with reference to a crossing which is laid out, or which it is proposed to lay out. *Town of Gillet v. C. & N. W. R. Co.* 9 W. R. C. R. 535, and *Town of Elcho v. C. & N. W. R. Co.* 14 W. R. C. R. 796. It appears that the highway approaches the railway right of way on the quarter section line and is diverted west to the crossing for the purpose of avoiding a passing track. At the point in question the railway is on an embankment, which is about eleven feet above the level of the adjacent land. The respondent's engineer estimated that an under-crossing would cost between \$3,000 and \$3,500 and a grade crossing approximately \$1,200. He stated that a grade crossing in the present case would be dangerous. From an investigation of the situation it seems that the cost of a grade crossing would be substantially the amount estimated, and that present conditions do not warrant a grade separation. *Held:* The proposed crossing should be constructed at grade, but in order to provide a clearer view of approaching trains the highway should be at an angle of 90 degrees with the tracks, and should extend on a straight line for a considerable distance south of the tracks before turning back to the quarter section line, and it is so recommended. It is also recommended that the earth for filling the approach at the new crossing be obtained at the crossing one mile east of Dewey station, thus improving the view of trains and eliminating the cost of installing and maintaining some form of protection at that crossing. It is ordered that the proposed crossing as laid out by the town board of the town of Superior across the railway right of way at a point 150 feet west of the quarter section line of section 9, town 47, range 15 west, be at grade, and that the respondent construct a suitable grade crossing at that point in the manner specified, and upon completion of the work furnish the Commission with an account of all expenses incurred by it; that the town of Superior pay the respondent 40 per cent of the cost as determined by the Commission, and that the respondent bear 60 per cent thereof. *Town of Superior v. G. N. R. Co.*, 300, 305.

Crossings—Railroad by highway—Apportionment of cost among parties.

3. In view of the benefits of grade separation to all three parties it is considered proper that each pay its fair portion of the cost of the improvement, and that the division of the expense can best be made on a percentage basis as practically all of the work will be confined to the right of way of the railway company. The matters which shall make up the total cost to be apportioned among the parties are specified, and such cost is apportioned 70 per cent to the C. M. & St. P. Ry. Co., 25 per cent to the city of Milwaukee, and 5 per cent to the T. M. E. R. & L. Co. Should the C. M. & St. P. Ry. Co. desire, while depressing its two main tracts, to construct passing or storage tracks, one on either side of the main tracks, the cost thereof will be apportioned 70 per

cent to the railway company, and 30 per cent to the city. Should the C. M. & St. P. Ry. Co. be legally responsible for any costs in replacing or furnishing industry switching facilities within the limits of the order, such costs will be apportioned 50 per cent to the company, and 50 per cent to the city. *In re Grade Sep. on C. M. & St. P. R. in Milwaukee*, 762, 782.

4. In the instant case the actual total cost is apportioned 25 per cent to the city, 25 per cent to the Chippewa Valley Ry. Lt. & P. Co. and 50 per cent to the railway company. *In re Ry. Crossing on C. St. P. M. & O. R. in Eau Claire*, 24, 32.

5. In the instant case the actual cost of construction is apportioned 50 per cent to the town of Remington, and 50 per cent to C. M. & St. P. R. Co. *Town of Remington v. C. M. & St. P. Co.*, 609, 611.

6. In the instant case the total case of constructing the crossing is apportioned 40 per cent to the town of Superior and 60 per cent to the Great Northern Railway Company. *Town of Superior v. G. N. R. Co.*, 300, 305.

Crossings—Railroad by highway—Construction of grade crossing.

See ante, 2.

Crossings—Railroad by highway—Construction of—Public necessity of.

7. Complaint was made that respondent has refused to construct a proper crossing at the point where a highway which petitioner has duly laid out crosses respondent's tracks, and the Commission was asked to require respondent to construct a crossing in the mode and manner to be prescribed by the Commission under the authority conferred upon it in secs. 1797—12e and 1797—12 of the statutes. The public necessity for a crossing at the point in question was challenged by respondent, and the contention was made by respondent that under sec. 1797—12e of the statutes, the Commission has authority to refuse to permit the establishment of a crossing on the ground that public necessity does not require it. *Held*: That the question of the public necessity of a proposed crossing is to be determined by the municipality in interest and that the Commission is without jurisdiction in the matter, and that to hold otherwise would in effect place the Commission in the position of dictating a municipality's highway development. It appears that the physical conditions at the crossing as laid out, and the traffic which would probably use it are not such as to make grade separation practicable. *Ordered*: That the respondent construct a suitable grade crossing at the point in question, furnishing all necessary material and labor and performing all necessary work in fulfilling the provisions of the order. Upon the completion of the work the respondent is to furnish the Commission with an account of all expenses incurred therein, whereupon the Commission will determine the actual expense of construction, of which the petitioner is thereupon to pay the respondent 50 per cent, the respondent bearing 50 per cent. June 1, 1915, is considered a reasonable date for the completion and opening for public travel of the crossing ordered. *Town of Remington v. C. M. & St. P. R. Co.*, 609, 611.

Crossings—Railroad by highway—Elimination of.

See post, 25.

Crossings—Railroad by highway—Installation of.

8. Complaint was made that the crossing of the North Salem road and respondent's line in the town of Campbell, La Crosse county, is

dangerous to public travel. The crossing in question is located about one-fourth of a mile north of Grand Crossing station, and it appeared that respondent had not improved it, as provided by sec. 1299h—1 of the statutes. *Held*: The crossing in question is more than ordinarily dangerous. The respondent is ordered to construct and maintain a highway, in the manner specified, within its right of way limits. As the alterations ordered are necessary for compliance with sec. 1299h—1 of the statutes, the entire cost is assessed against the respondent. Sixty days is considered a sufficient time for compliance with the order. *Town of Campbell v. C. B. & Q. R. Co.*, 21, 23.

Crossings—Railroad by highway—Protection of.

9. Complaint was made by the city of Boscobel that the highway crossing on respondent's line at Wisconsin avenue and Walnut street are dangerous for public travel, and the Commission was asked to take such action as it deems just in the premises. The protection of the crossings in question was aimed at by the Commission in a previous case, *City of Boscobel v. C. M. & St. P. R. Co.* 1912, 10 W. R. C. R. 423. The respondent in the present proceedings was ordered in that case to reduce the speed of all trains to twelve miles per hour when crossing the streets in question; to discontinue the practice of making "flying switches" where cars are run over such streets detached from an engine, and, before doing any switching on Wisconsin avenue, to station at the crossing some person to give signals and warning to travelers, and to see that the passage is clear at all times when switching is done over such highway. Both railway and highway traffic have increased materially since the former hearing, and it was alleged that the order frequently has not been complied with. *Held*: That physical conditions are such that the installation of automatic bell protection would be of questionable value, and that some definite form of protection for which one individual will be responsible must be provided. It is ordered that the respondent station a flagman at Wisconsin avenue, to be on duty daily from 8 a. m. until the train due at 7:28 p. m. has passed, and that it install and maintain an electric gong at Walnut street, to be operated by means of a manual switch by the flagman at Wisconsin avenue, and an annunciator so arranged as to give the flagman sufficient warning of the approach of eastbound trains, plans to be submitted to the Commission for approval. Sixty days is considered a reasonable time within which to make the required installation. *City of Boscobel v. C. M. & St. P. R. Co.*, 296, 299.

10. The Commission held a rehearing on the adequacy of the protection ordered by it at South Fifth street in the city of Fort Atkinson, Wis., *City of Fort Atkinson v. C. & N. W. R. Co.* 1913, 13 W. R. C. R. 69. In that case the Commission ordered the respondent to install and maintain an automatic electric bell with an illuminated sign for night indication, and stated that, should the railway officials fail to rigidly enforce the flagging of all switching movements over the crossing, it would modify its order and require the company to station a flagman there. It appears that at times the bell rings for unusually long periods, a fact causing complaint and diminishing its effectiveness as a protective device. It also appears that it is impossible to arrange the circuits of the bell so that ringing for unusually long periods can be entirely avoided, and that respondent has failed to rigidly enforce its rule with regard to the flagging of switching movements. *Held*: Under the peculiar circumstances of the present case, the protection afforded by the bell and light is inadequate. The respondent is ordered, in lieu of the installation formerly prescribed, to station a flagman at the crossing in question, to be on duty from 7 a. m. to 7 p. m. and to install and maintain an automatic visual signal for night indication, to be operated from 7 p. m. to 7 a. m., plans for track cir-

cuits to be submitted to the Commission for approval. Thirty days is considered a reasonable time within which to make the installation ordered. *City of Ft. Atkinson v. C. & N. W. R. Co.*, 250, 253.

11. Complaint was made that two highway crossings on respondent's line at Second street and Third street in the city of New Richmond are dangerous for public travel on account of the surrounding physical conditions, and the Commission was asked to require the respondent to protect the crossings in question by gates or by flagmen. The surrounding physical conditions, the highway traffic using the crossing, and the movement of trains over the crossings were investigated. Petitioner objects to the installation of electric lights, alleging that they will not furnish adequate protection, and that the noise of ringing will be objectionable in such a thickly settled community. *Held*: That the crossings are unusually dangerous, but that it is feasible to install train operated visual signals, with lights for night indication, and that such signals should provide adequate protection under existing traffic conditions without annoying residents of the vicinity with ringing. *Order*: That respondent install at each of the crossings in question an electric train-operated visual signal, plans to be submitted to the Commission for approval, or, at its option, maintain a flagman at each of the crossings, such flagmen to be on duty daily from 7 a. m. to 7 p. m. Ninety days is considered a sufficient time within which to install the safety devices ordered. *City of New Richmond v. C. St. P. M. & O. R. Co.*, 752, 754.

12. The Commission, on its own motion, investigated the Hanchett crossing on the line of the C. M. & St. P. Ry. Co., about two and three-fifths miles southeast of Madison, in the town of Blooming Grove, Dane county. *Held*: The crossing is unusually dangerous. The respondent is ordered to install and maintain at the crossing an automatic electric bell, with a visual signal for night indication, plans for track circuits to be submitted to the Commission for approval. The respondent is further ordered to grade the crossing so as to provide an adequate roadway 24 feet wide within its right of way lines, and to replace the board wing fences at the crossing with woven wire fences. *In re Hanchett Crossing, Town of Blooming Grove, Dane Co.*, 45, 46.

13. The Commission, on its own motion, investigated the adequacy, under existing conditions, of the bell protection formerly ordered by it at the Marinette avenue crossing in the city of Marinette. Prior to the hearing the respondent installed a flagman at the crossing in question. The city officials, however, expressed a preference for crossing gates. It appears that more than one track is crossed, that switching movements are frequent, and that many school children use the crossing; also that the crossing bell has caused complaint. *Held*: Under circumstances like those of the present case the most effective crossing protection during the day is afforded by a flagman. The respondent is ordered to station a flagman at its Marinette avenue crossing in the city of Marinette from 6 a. m. to 6 p. m., and to install and maintain an automatic visual signal to be operated from 6 p. m. to 6 a. m., plans for track circuits to be submitted to the Commission for approval. Ninety days is considered a reasonable time within which to make the installation ordered. *In re Marinette Ave. Crossing in Marinette*, 200, 202.

14. Complaint was made that a highway crossing located on respondent's line about one-half mile west of Amherst Junction, is dangerous to public travel on account of the surrounding physical conditions, and the Commission was asked to take such action as it deems proper in the premises. It appears that at the crossing in question the track lies in a cut, the banks of which limit the view in both directions from each highway approach. The respondent's engineer testified that it was feasible to grade away a portion of the embankments, so as to provide an

adequate view of approaching trains. The Commission's engineer was of the opinion that to render the crossing reasonably safe without some form of automatic protection, it would be necessary to remove the banks to such an extent that a traveler fifty feet from the center of the track or more could see an approaching train when 2,000 feet from the crossing. *Held*: That the crossing in question is more than ordinarily dangerous, and that the installation of an electric bell and visual signal, plans to be submitted to the Commission for approval, or the removal of the obstruction in the manner proposed by the Commission's engineer should provide reasonable protection for the public under the existing conditions of travel. Order entered in accordance with the foregoing opinion. May 1, 1915, is specified as a reasonable date for the completion of the alterations, or installations ordered. *Town of Amherst v. M. St. P. & S. S. M. R. Co.*, 494, 496.

15. Complaint was made by various owners or lessees of farm land adjacent to respondent's North Lake branch that respondent was not properly maintaining its right of way fences and crossings, and the Commission was asked to require the respondent to build and maintain woven wire fences along its right of way, to properly plank and repair its grade crossings, and to build and maintain cattle guards at all crossings. It appears that subsequent to the filing of the complaint the respondent, in the matter of its fences, has made extensive repairs and replacements, so as to meet the conditions imposed by sec. 1797—120 of the statutes for the protection of live stock of adjacent owners, but has failed to place three crossings in satisfactory condition, and also two culverts. It is ordered that the respondent properly plank and repair the highway crossing on its North Lake branch line at the east boundary of Waukesha county, and the two farm crossings located, respectively one, and one and one-tenth miles west of Menomonee Falls, and clean and maintain in proper condition the two culverts immediately west of the "wye" at Lannon. Sixty days is considered a reasonable time for compliance. *Dent et al. v. C. M. & St. P. R. Co.*, 203, 206.

16. Complaint was made that the first highway crossing west of Fairchild on respondent's line in Eau Claire county is dangerous to public travel on account of the surrounding physical conditions, and the Commission was asked to take such action as it deems proper in the premises. The surrounding physical conditions, the highway traffic, and train movement involved, were investigated. It appears that on account of the height of the banks of the cut in which the track lies, and on account of the presence of brush on the right of way and on adjacent private property, the view of trains is seriously obstructed. *Held*: That the crossing in question is unusually dangerous and that some form of protection is necessary; that respondent should keep the brush on its right of way cut for a distance of at least 1,000 feet on each side of the crossing, and should remove the earth which has been heaped up on its right of way on the natural surface of the ground for a distance of 500 feet southeast of the crossing, and that with such improvements, and with the installation of an automatic electric bell and a visual signal for night indication, the crossing should be reasonably safe under the existing traffic conditions. Order entered in accordance with the foregoing conclusions. June 1, 1915, is considered a reasonable date for the completion of the installation and improvements ordered. *Town of Fairchild v. C. St. P. M. & O. R. Co.*, 755, 757.

17. Complaint was made that two highway crossings on respondent's line, located, respectively, at Main street near Hewitt station and one and three-fourths miles east of Marshfield, are dangerous to public travel and require further protection. At the hearing the Auburndale crossing, located about one mile east of Hewitt, was also mentioned, although respondent was not formally heard in that matter. It appeared that the three crossings in question could be rendered reason-

ably safe without the installation of protective devices, by grading and widening the approaches and removing certain obstructions. *Held*: The three crossings in question are dangerous. The respondent is ordered, with respect to the Main street crossing in the village of Hewitt, and the crossing one and three-fourths miles of Marshfield, known as Denk's crossing, to alter the approaches in the manner specified. The growing of corn on the railway right of way at the Main street crossing is to be discontinued. With respect to the Auburndale crossing, it is recommended that the respondent alter the approaches and the town authorities remove certain obstructions to the view, both to be done as specified. Sixty days is considered a reasonable time for compliance the order. *Town of Marshfield v. M. St. P. & S. S. M. R. Co.*, 207, 211.

18. A rehearing was applied for by the respondent in the case of *Town of Richmond v. W. & N. R. Co.* 1914, 14 W. R. C. R. 546. The parties in interest suggested that the order be modified, so as to require the raising of the tracks and the highway, and the removal of a part of the bank, in lieu of the installation of an automatic electric bell and light as ordered. *Held*: The proposed changes will afford the public adequate protection, and the former order is modified as suggested. Ninety days is considered a sufficient time within which to comply. *Town of Richmond v. W. & N. R. Co.*, 309, 310.

19. Complaint was made that a certain farm crossing which is located about three miles west of Eagle is dangerous on account of the surrounding physical conditions, and that no wing fences or cattle guards are provided, and the Commission was asked to require the respondent to construct cattle guards and permit an open crossing. It appears that access is had to the crossing in question through gates in the right of way fence, which must be opened and closed in crossing; that the crossing is petitioner's only outlet to the public highway; that it is constantly used for driving cattle to and from the pasture north of the track, and that before complaining to the Commission, petitioner requested respondent's division superintendent to construct cattle guards at the crossing in question. Respondent contends that a railway company is not required by law to provide cattle guards and wing fences at farm crossings, and that the Commission is without authority to order improvements at farm crossings because of safety considerations. Sec. 1813 of the statutes, however, authorizes the farm owner to serve notice upon the railway company, in case the railway company fails to construct the farm crossings or cattle guards required by sec. 1810, to "construct the necessary farm crossings and cattle guards thereon," and fixes a penalty for the company's failure to do so: And sec. 1810 requires the railway company to provide "suitable and convenient farm crossings." *Held*: That a crossing cannot be regarded as "suitable and convenient" unless reasonably safe for those whom it is intended to serve, and that sec. 1813 makes it obligatory upon a railway company to provide cattle guards and the wing fences necessary for their efficient use at farm crossings upon notice from a farm owner, but that the installation of cattle guards and wing fences does not necessitate the maintenance of an open crossing as prayed for; that the establishment of an open crossing on a farm road used for driving cattle from place to place, and upon which cattle may at times be allowed to stray, might prove dangerous both for the cattle and for trains, and that the prayer for an open crossing must be denied. It is ordered, that the respondent install and maintain at the farm crossing, located about three miles west of Eagle and adjacent to petitioner's property, suitable cattle guards and wing fences. Thirty days is deemed a reasonable time within which to comply. *Von Rueden v. C. M. & St. P. R. Co.*, 272, 276.

20. Complaint was made by the respondent that the cost of certain improvements ordered by the Commission at the Summit crossing in the town of Madison was excessive. The grading of the Summit and Tillotson crossings, and the installation of a bell at the Tierman crossing were ordered on January 16, 1914 (*Town of Madison v. I. C. R. Co.* 13 W. R. C. R. 608). In the present proceeding it was stipulated between the parties, subject to the Commission's approval, that crossing bells should be installed at both the Summit and Tillotson crossings in lieu of the grading ordered by the Commission. *Held:* The installation of bell protection at the crossings in question will be sufficient safeguard under present conditions of travel. The former order is so modified. The bells are to be automatic electric bells with a visual signal for night indication. Plans for track circuits are to be submitted to the Commission for approval. Sixty days is considered a reasonable time for compliance. *Town of Madison v. I. C. R. Co.*, 108, 109.

21. Complaint was made that a highway crossing on respondent's line, located on the town line between the towns of Wheaton and Tilden, in Chippewa county, is dangerous to public travel on account of surrounding physical conditions, and the Commission was asked to require the respondent to adequately safeguard the crossing in question. It appears, among other things, that the track lies in a cut about 20 feet deep at the deepest point; that the highway descends to the track from both sides; that a certain amount of traffic necessarily uses the crossing, and that after beginning the descent to the track a traveler must be within the right of way lines and very close to the track to obtain a clear view of trains. *Held:* That the crossing is unusually dangerous, and that the saving of the expense necessarily incident to the installation of some safety device is no justification for subjecting the traffic necessarily using the highway to unusual danger, even though that traffic is not heavy. *Ordered:* That respondent install and maintain, at the crossing in question, an automatic electric bell and visual signal for night indication, plans to be submitted to the Commission for approval. Ninety days is considered a sufficient time within which to comply with the order. *Town of Wheaton v. M. St. P. & S. S. M. R. Co.*, 667, 669.

22. Complaint was made that a highway crossing on respondent's line at Main street in the village of Cadott is dangerous to public travel on account of the surrounding physical conditions, and the Commission was asked to take such action as it deems proper in the premises. The physical conditions involved, the train movement over the crossing in question, and the highway traffic concerned were considered. It appears, among other things, that the street in question connects with main traveled highways leading to Chippewa Falls and Boyd, and is an important highway for traffic entering the village, and

that there have been several fatal accidents at the crossing and numerous narrow escapes. *Held*: That the crossing is unusually dangerous; that further protection is necessary, and that the installation of an electric bell and a visual signal for night indication will render the crossing reasonably safe under existing traffic conditions. *Ordered*: That the respondent install and maintain at the crossing in question an automatic electric bell and a visual signal for night indication, plans to be submitted to the Commission for approval. Ninety days is considered a reasonable time within which to comply with the order. *Village of Cadott v. M. St. P. & S. S. M. R. Co.*, 596, 598.

23. In the light of the testimony it is our opinion that the crossing in question is more than ordinarily dangerous. The traffic is not heavy, but it is necessary for a number of people to use the crossing in the course of their daily occupations. To subject these travelers constantly to unusual danger for the purpose of saving the expense necessitated by the installation of some safety device is certainly not justified. It is our judgment that the installation of an automatic electric bell and an illuminated sign for night indication will provide reasonable protection at this crossing under the existing traffic conditions. *Town of Wheaton v. M. St. P. & S. S. M. R. Co.*, 667, 669.

24. Complaint was made that a certain farm crossing which is located about three miles west of Eagle is dangerous on account of the surrounding physical conditions, and that no wing fences or cattle guards are provided, and the Commission was asked to require the respondent to construct cattle guards and permit an open crossing. Sec. 1813 of the statutes, authorizes the farm owner to serve notice upon the railway company, in case the railway company fails to construct the farm crossings or cattle guards required by sec. 1810, to "construct the necessary farm crossings, and cattle guards thereon" and fixes a penalty for the company's failure to do so. And sec. 1810 requires the railway company to provide "suitable and convenient farm crossings." Therefore, in the enforcement of this statute, the Commission is justified in requiring reasonable safeguards at farm crossings. Moreover, if the lack of crossing protection endangers railway traffic, the Commission has authority to order such improvements as are necessary to conserve public safety. In the instant case our order is predicated upon the obligation of the respondent to furnish cattle guards and wing fences at farm crossings under sec. 1813 of the statutes, and not upon safety consideration. *Von Rueden v. C. M. & St. P. R. Co.*, 272, 276.

25. The Commission, on its own motion, investigated two grade crossings on the line of the C. St. P. M. & O. Ry. Co. at Dewey street and Putnam street in the city of Eau Claire. It appeared that the two crossings in question afford the only means of access from the southern portions of the city to the "North Hill district"—a section with a population of approximately 4,000 persons. West of the Putnam street crossing, which crosses seven tracks, the tracks curve northward around the foot of a bluff. At the Dewey street crossing, which is used by the Chippewa Valley Ry. Lt. & P. Co's interurban line to Chippewa Falls, four tracks are crossed. It was conceded by all concerned that the crossings are very dangerous to public travel. After numerous conferences between the engineers of the Commission, the city, the C. St. P. M. & O. Ry. Co. and the Chippewa Valley Ry. Lt. & P. Co., a plan for the separation of grades was formulated. This plan was acceptable in its general outlines to all parties and forms the basis of the present order. It is ordered that the highway grade crossings at Dewey street and at Putnam street in the city of Eau Claire, and on the line of the C. St. P. M. & O. Ry. Co., be closed, and

that a subway be constructed at Dewey street and an overhead passageway for pedestrians at Putnam street in conformity with the requirements specified. A new street, with detours to North Dewey street and Madison street is to be constructed, in the manner specified, from the north portal of the subway in a northeasterly direction to an intersection with Madison street. The city of Eau Claire, by appropriate action, is to take certain steps, as necessary, in the carrying out of the grade separation. The city is to vacate the portion of Putnam street which lies within the railway company's right of way. The city is to pave the floor of the subway, the sidewalks in connection therewith, and the streets altered or constructed under this order. The city is to assume responsibility for all damages to property resulting from changes in streets and crossings under the order, subject to right of intervener on the part of the railway company and the Chippewa Valley Ry. Lt. & P. Co. The city is to grant its permission to the latter company to make all necessary changes in its tracks and distributing system so that it may operate its cars along the new street and through the subway, and that company is to make such changes and also to pave such portions of the street as it is obligated to pave. Notice of necessary obstruction in any public street is to be given to the city. All work is to be subject to approval by the Commission, and, where not specifically assigned to the city or the Chippewa Valley Ry. Lt. & P. Co., is to be performed by the railway company. Upon completion of the work the railway company is to obstruct the grade crossing at Putnam street so that it cannot be used by the public; and the city, the Chippewa Valley Ry. Lt. & P. Co., and the railway company, after the adjustment of damage claims, are to furnish the Commission with a complete account of the expense incurred, whereupon the Commission will determine and apportion the actual total cost—25 per cent to the city, 25 per cent to the Chippewa Valley Ry. Lt. & P. Co. and 50 per cent to the railway company. The work is to be commenced immediately and completed on or before May 1, 1915, subject to additional allowance for certain contingencies. *In re Crossings on C. St. P. M. & O. R. in Eau Claire*, 24, 32.

Crossings—Railroad by highway—Separation of grades—Track depression.

26. The petitioner requests the Commission to order the respondent, the C. M. & St. P. Ry. Co., to separate the grades of the tracks of its Northern division from the grades of the public thoroughfares of all streets between 38th street and Fond du Lac avenue. The matters involved were given extended study and were the subject of numerous conferences and investigations with the various parties interested. The Manufacturers' and Shippers' Association objects to grade separation if it is to involve either temporary or permanent interference with the facilities for industrial tracks and sidings as now enjoyed, and on the whole favors street depression. The city favors track depression and no disturbance of most of the streets, while the railway company appears to favor leaving the tracks in their present position and elevating or depressing most of the streets in question. However, both the Manufacturers' and Shippers' Association and the railway company ultimately offered plans calling for some track elevation, but greater street depression. The city requests the separation of grades at the expense of the respondents according to their respective interests. *Held*: That public safety and convenience demand a separation of grades of the tracks of the Northern division of the C. M. & St. P. Ry. Co. in the city of Milwaukee from the grades of 35th to Center streets, inclusive, and that the movement of traffic on the steam railroad tracks, electric street railway tracks, and street roadway and sidewalks are all contributing factors in creating conditions calling

for such a separation of grades; that no separation of grades is possible without interference in the use of side and switch track facilities unless all the changes required are made in the streets, and that to change the streets here in question, either by raising them over or depressing them under the tracks in their present position, would be unwarranted and unduly detrimental to the welfare of the city, and a large proportion of its citizens; that, while the advantage of grade separation by track elevation, as compared with track depression, both from the standpoint of cost and of the furnishing of switching facilities, is recognized, in the present case it seems advisable to effect the desired separation by means of track depression, as the topographical and physical conditions render a track elevation scheme impracticable; that it is recognized that in some cases it will be impracticable to leave switching facilities as they now exist; that in all such cases it will be necessary to accept such service at a level more or less depressed from existing elevation, or from team tracks located elsewhere; that the manner of furnishing switching service must of necessity be decided for each individual case desiring such service and should be decided by the parties directly interested, i. e. the industry and the railway company, and that in view of the mutual benefits to both it is expected that the railway company will use its best efforts to meet the different needs for such service in the most advantageous manner possible; and that, in view of the benefits of grade separation to all three parties it is considered proper that each pay its fair portion of the cost of the improvement, and that the division of the expense can best be made on a percentage basis as practically all of the work will be confined to the right of way of the railway company. Order: The plans of the main tracks of the Northern division of the C. M. & St. P. Ry. Co. are ordered depressed from some point southwest of the crossing of the tracks with Western avenue or 25th street, in the city of Milwaukee, to a point at or near Clark street, and from such point the tracks are ordered elevated to some point at or near Fond du Lac avenue, in such a manner as to permit the streets involved to be carried over or under the tracks of the railway company, as specified in the order. All of the streets are to be carried over except Clark street, which is to be closed to vehicular traffic, but provided with a pedestrian subway under the tracks, and Center street, which is to be carried under through a subway. The matters which shall make up the total cost to be apportioned among the parties are specified, and such cost is apportioned 70 per cent to the C. M. & St. P. Ry. Co., 25 per cent to the city of Milwaukee, and 5 per cent to T. M. E. R. & L. Co. Should the C. M. & St. P. Ry. Co. desire, while depressing its two main tracks, to construct passing or storage tracks, one on either side of the main tracks, the cost thereof will be apportioned 70 per cent to the railway company, and 30 per cent to the city. Should the C. M. & St. P. Ry. Co. be legally responsible for any costs in replacing or furnishing industry switching facilities within the limits of the order, such costs will be apportioned 50 per cent to the company, and 50 per cent to the city. *In re Grade Sep. on C. M. & St. P. R. in Milwaukee*, 762, 782.

Crossings—Railroad by highway—Separation of grades—Track elevation.

See ante, 26.

Culverts—Reconstruction of.

27. Complaint was made that culverts number 357 and 357½ on respondent's line, just north of Snells in Winnebago county, are so high that they back up water on petitioner's land, and that no ditch is provided between said culvert number 357 and the culvert on the line

of the M. St. P. & S. S. M. R. Co. The Commission is asked to take such action as it deems proper in the premises. It appears that since the excavation of certain ditches by petitioner in an effort to improve the drainage of adjoining fields, the culverts are insufficient to allow the free and unobstructed flow and percolation of surface water from petitioner's land and to prevent such land from becoming flooded, or otherwise damaged. Respondent contends that the Commission is without jurisdiction in the premises. *Held*: Sec. 1388b of the statutes (being ch. 159, laws of 1913) makes the provision, construction and maintenance of sufficient ditches, culverts or other outlets under such circumstances as the present mandatory. Respondent is ordered to reconstruct its culverts number 357 and 357½ near Snells station in the manner specified in the order, and to excavate from each end of its culverts to its right of way lines, ditches suitable for the outflow of surface water from the drainage ditches on petitioner's lands. June 1, 1915, is considered a reasonable date for the completion of the improvements ordered. *Williams v. C. & N. W. R. Co.*, 366, 369.

OPERATION.

RATE ADJUSTMENT.

See SCHEDULES OR TARIFFS.

RATE OF RETURN.

As element considered in making rates for electric utilities, see RATES—ELECTRIC, 10.

RATES—ELECTRIC.

See also MINIMUM CHARGES.

Discrimination in electric rates, see DISCRIMINATION, 1-2.

Contracts for service—When lawful.

1. The contention that the contracts were void at their inception as against public policy leads us to the consideration of what is meant by public policy as affecting the validity of contracts, and the judicial construction placed upon it. The trend of court decisions is to the effect that when it is sought to annul a contract on the grounds of public policy it must be made very clear that the contract is not only opposed to the practices and customs of orderly society, but that it is antagonistic to the general policy of the law of the country. Applying the principles laid down by the courts and the text writers, we have to determine first, whether the contracts under consideration were void from the beginning because the rates named were unreasonably low. The Commission does not feel warranted in so finding. *In re Appl. Rhinclander Power Co. to Amend its Rates*, 783, 797-801.

Deposits to insure payment of bills.

2. In case bills are not paid by the end of the month the delinquent customers shall be required to make a deposit of not less than \$2.50 to insure the payment of any subsequent bill. *In re Invest. Waterloo Mun. W. & El. Plant*, 534, 550.

Discount for prompt payment of bills.

3. The utility shall bill all consumers at the gross rate and the difference between the gross and net rates specified, or one cent per kilowatt-hour, shall constitute a discount for payment on or before the 15th of the month. *In re Appl. Mun. El. Utility of Sun Prairie*, 189, 198.

4. The utility shall bill all consumers at the gross rate and the difference between the gross and net rates specified, or one cent per kilowatt-hour, shall constitute a discount for payment on or before the 15th of the month. *In re Appl. United Heat, Lt. & P. Co. of Delaware*, 505, 515.

5. The utility shall bill all consumers at the gross rate, and the difference between the gross and net rates specified, or 1 cent per kilowatt-hour, shall constitute a discount for payment on or before the 15th of the month. *In re Invest. Waterloo Mun. W. & El. Plant*, 534, 550.

Incidental Appliances.

6. The first 600 watts capacity of each incidental appliance, such as flat irons, fans, toasters, and percolators, connected to the lighting meter shall not be considered in determining the active load. *Jones et al. v. Berlin Public Service Co.*, 121, 146.

Making rates—Elements considered—Cost of service—Depreciation.

7. Depreciation as usual has been figured on the cost new, which in this instance is taken to be the amounts shown in the property accounts. The rates of depreciation used in this instance are 5 per cent for the electric plant and 1 per cent for the water plant. *In re Invest. Waterloo Mun. W. & El. Plant*, 534, 540.

8. Allowance for depreciation was based upon the reserve required for the renewal of each item of equipment. *Jones et al. v. Berlin Public Service Co.*, 121, 129, 130.

Making rates—Elements considered—Cost of service—Continuous service.

9. The net rates for lighting purposes appear reasonable, although somewhat above the former rates at some points. Continuous service which will make lights available even at times when there is practically no load on the plant undoubtedly tends to make service more expensive than it would be if supplied only at times of considerable demand, and we think that, with the exception of the minimum charge, the lighting schedule may be accepted. *In re Appl. Burkhardt Milling & El. P. Co.*, 409, 411.

Making rates—Elements considered—Cost of service—Rate of return.

10. In the instant case as a request was made for an interest allowance only large enough to pay interest on the bonded indebtedness of the plant, 5 per cent of the fair value has been used in our computations as a reasonable rate of return. *In re Appl. Mun. El. Utility of Sun Prairie*, 189, 193.

Making rates—Elements considered—Cost of service—Taxes.

11. An allowance of 1 per cent of the fair value, or \$230, should be made for taxes in order to maintain an equitable relationship between consumers and tax payers. *In re Appl. Mun. El. Utility of Sun Prairie*, 189, 193.

12. In order to maintain an equitable relation between taxpayers and consumers, taxes have also been included in the costs at the rate of 1 per cent. *In re Invest. Waterloo Mun. W. & El. Plant*, 534, 540.

Making rates—Elements considered—Development and retention of business.

13. While circumstances seem to furnish a strong argument for an increase in the applicant's rates, it must be said, on the other hand, that the marketableness of the applicant's supply of power at rates much higher than those now charged has not been demonstrated before the Commission, and, since ability to dispose of power in a somewhat limited market constitutes as influential a force upon the value of the supply as any other factor, the establishment of rates regardless of such circumstances is a delicate and difficult task which should, however, be limited by a reasonable maximum based upon the facts brought out in this case. *In re Appl. Rhineland Power Co. to Amend its Rates*, 783, 813.

14. In making an adjustment in the rate schedule of a utility, increasing the rate to large power consumers is a serious matter, because there is always the likelihood of such customers finding it advantageous to use some other source of power. In the instant case we have given this matter careful consideration, and we believe that the rate prescribed is low enough to retain the business that the utility now has, and at the same time high enough to pay the additional costs involved in furnishing the service. *In re Invest. Waterloo Mun. W. & El. Plant*, 534, 545.

Maximum rates.

15. The maximum rate for power shall not exceed 10 cts. per kw-hr. *In re Invest. Waterloo Mun. W. & El. Plant*, 534, 544.

Minimum rates.

16. In a number of recent cases the Commission has concluded that 75 cts. per month is as large a minimum charge as should be authorized. Whether or not there are circumstances in the present case which would make a larger minimum charge reasonable we are unable to determine from available information. Inasmuch as the authorization of the entire schedule must be based more or less on what the experience of the Commission has shown to be reasonable in other places, it seems that the same rule may properly be applied to the minimum bill. In order that the minimum charge may not be out of line with the general schedule, a gross minimum of \$1.00 and a net minimum of 80 cents will be authorized. *In re Appl. Burkhardt Milling & El. P. Co.*, 409, 411.

17. As regards a minimum charge for electric power service, under the circumstances of the present case, the minimum charge should increase with increases in the size of the connected load, but should carry with it a limiting rate to prevent extraordinary increases in power bills, and respondent is accordingly authorized to make a charge for electric power service of not less than \$1 per month, and also to charge \$1 per month for each horse power in excess of one, provided that, except for consumption billed under the \$1 minimum, the maximum rate shall be 10 cts. per kw-hr. *In re Appl. City of Manitowoc as El. & Water Utility*, 212, 214.

18. The Commission has had occasion in a number of cases to investigate the reasonableness of minimum charges for electric service, and in a general way it may be said that a minimum charge of 75 cts. per month has been found reasonable. It is true that in one or two cases which have come before the Commission a minimum charge of

50 cts. per month has been established, but we are inclined to believe that 75 cts. is reasonable in this case. *In re Appl. Whitewater El. Lt. Co.*, 517, 519.

19. The petitioners have suggested that a provision for a minimum bill should be made in the electric lighting schedule. The Commission has always held this to be a fair practice, and will order that the minimum monthly bill hereafter be \$1.00. *Joneş et al. v. Berlin Public Service Co.*, 121, 135.

Power rates.

See post, 22.

Power rates—Emergency or "standby" service.

20. In addition to the regular power schedule, it is necessary to fix a rate for emergency service and a rate for service furnished to customers who operate only a relatively short time each year. As yet no emergency service is being supplied, but a demand for it may arise in the near future, in which event it will be necessary to have such a rate. The rate usually established for this kind of service is similar to the regular power rate with the exception that the limiting rate does not apply. There seems to be nothing in this case which would make a departure from the usual practice either necessary or advisable. *In re Invest. Waterloo Mun. W. & El. Plant*, 534, 545.

Reasonableness of advance in rates in particular cases.

21. Application was made for authority to put into effect a schedule of rates proposed for 24 hour service at Baldwin, where the applicant is engaged in the operation of an electric light and power plant. It appears that until recently the electric plant at Baldwin was owned and operated by the Baldwin El. Lt. & Fuel Co.; that the power was generated by a steam plant at Baldwin and that service was furnished only from dusk to midnight. Applicant now supplies power from its power plants on Willow river, and furnishes 24 hour service. *Held*: That under the circumstances of the present case, action taken must be based more or less on what the experience of the Commission has shown to be reasonable in other places; that the minimum charge for lighting service should not exceed 75 cts. per month, but that for the sake of harmony with the general schedule a gross minimum of \$1.00 and a net minimum of 80 cts. is authorized; that the proposed rule that patrons not paying for service within a specified time shall have their service disconnected is disapproved (*In re Refusal of Service by Madison G. & El. Co.* 1914, 13 W. R. C. R. 518), but that respondent may require a reasonable deposit to guarantee payment; and that subject to the foregoing qualifications applicant's proposed schedule appears reasonable and is authorized. *In re Appl. Burkhardt Milling & El. P. Co.*, 409, 411.

22. Application was made by the city of Manitowoc for authority to put into effect a minimum of \$1 per month per horse power of motors, regardless of continuity of actual use, actual horse power to be determined as provided in the published schedule of the Manitowoc electric utility, or, in lieu of such rate, such other rate as the Commission shall deem just. It appeared that there are a considerable number of power consumers in Manitowoc and that their motors were installed with the understanding that the minimum rate would be \$1, regardless of the connected load. *Held*: That, as regards a minimum charge for electric power service, under the circumstances of the present case, the minimum charge should increase with increases in the size of the connected load, but should carry with it a limiting rate to prevent extraordinary increases in power bills, and respondent is accordingly au-

thorized to make a charge for electric power service of not less than \$1 per month, and also to charge \$1 per month for each horse power in excess of one, provided that, except for consumption billed under the \$1 minimum, the maximum rate shall be 10 cts. per kw-hr. *In re Appl. City of Manitowoc as El. & Water Utility*, 212, 216.

23. Application is made by the Whitewater El. Lt. Co. for authority to adjust its rates for electric service. The changes contemplated in general constitute reductions in rates and the only portion of the proposed schedule which it is necessary to question is the minimum charge of 75 cts. per month for residences, which would result in increases in the bills of consumers using 3 kw-hr. or less per month. *Held*: The proposed minimum charge is reasonable. The utility is authorized to put the rates applied for into effect and is ordered to publish immediately a complete statement of the amendments in its rates as hereby authorized and to file with the Commission a statement of these amendments within twenty days from the date of this order. *In re Appl. Whitewater El. Lt. Co.*, 517, 520.

24. Application was made by the Rhinelander Power Co., a company owning a water power on the Wisconsin river near Rhinelander, for the Commission, after due investigation, to fix a schedule of rates for the furnishing by applicant of electric current at and in the vicinity of Rhinelander. The applicant, approximately ten years ago, entered into several contracts which still have about ten years to run. Under these contracts the larger part of the product goes to a purely private concern at the rates stipulated, and the balance chiefly to the lighting and power customers of the Rhinelander Lighting Co. The applicant complains that unless it is enabled to derive more income from the generation and sale of current, it will be unable to continue to furnish adequate service to the public and its individual customers, and will be unable to meet and perform its obligations and duties as a public utility. In passing upon the question of rates, the revenues and expenses, and the value properly assignable to the property, including due allowance for value of the water power rights, were investigated and considered in some detail. The value is fixed at approximately \$200,000 for purposes of this case. *Held*: That it does not appear that the contracts in question were grossly discriminatory or unreasonably low, and that in any event sec. 1797m—91 of the statutes exempts from the operation of the Public Utilities Law, as far as discrimination is concerned, contracts executed prior to April 1, 1907; that the rate of return upon the investment in physical property in the present case is low in comparison with the usual earnings of many other electric plants, and that any additional value on account of water power rights still further reduces the rate of return, and that the petitioner is entitled to a larger earning and to a higher rate of return upon its investment, but that the schedule proposed by the Commission is only a maximum, as the marketableness of the petitioner's supply at rates much higher than those now charged has not been demonstrated before the Commission, and, that the Commission has the power to authorize the changing of the contract rates in the state, such power being implied in every contract touching rates by a public utility. *Ordered*: That applicant is authorized to put into effect the schedule of rates proposed by the Commission. *In re Appl. Rhinelander Power Co. to Amend its Rates*, 783, 815.

Reasonableness of rates in particular cases.

25. Two proceedings are involved in this case: (1) the Sun Prairie Municipal Electric Utility applies for an adjustment of rates, on the ground that its customers consider the present rates exorbitant and that it would be able to secure more business by a reduction of the present charges, and (2) complaint is filed by certain customers of the utility

that its rates for electric service are discriminatory, that some of them do not conform to the rates as filed with the Commission, and that certain customers are furnished service at flat rates, while others are served through meters and charged on that basis, and that the revenue derived from the power business of the utility does not equal the cost of generation. The two proceedings are considered together. The utility appears to be placing all consumers on the meter basis as rapidly as possible and the complaint with respect to the use of flat rates therefore need not be considered. A valuation of the property of the utility was made and the revenues and expenses were investigated. The expenses were apportioned among the various classes of service and further apportioned between demand and output expenses. The utility has a number of power consumers, including the municipal water plant, but has no separate rates for this service. As request is made for an interest allowance only large enough to pay interest on the bonded indebtedness of the plant, 5 per cent of the fair value of the plant is used in the computations as a reasonable rate of return. *Held*: The rates of the utility should be revised. The utility is ordered to put into effect a schedule of rates fixed by the Commission. *In re Appl. Mun. El. Utility of Sun Prairie*, 189, 199.,

26. Three proceedings are involved in the instant case: (1) the United Heat, Lt. & P. Co. and the city of Delavan jointly request that the Commission make an investigation and fix a rate for certain boulevard lights which the city has installed in Delavan in place of certain arc lights; (2) the Delavan Commercial Club complains that the rates charged by the United Heat, Lt. & P. Co. are unreasonable and excessive and that the service rendered by the utility is unsatisfactory and below the proper standard; and (3) the city of Delavan complains that the rate charged by the utility for boulevard lights is unreasonable and that the service rendered by the utility is unsatisfactory. With respect to the matter of rates, the Commission made a valuation and investigated the revenues and expenses of the utility. The value of the physical property was apportioned among the service in the village of Darien and the arc lighting and commercial service in the city of Delavan. *Held*: The rates charged by the utility require revision to make them conform more closely to the cost of supplying service. The utility is ordered to discontinue its present schedule of rates and put into effect a schedule prescribed by the Commission. The new schedule includes, among other things, rates for power business which hitherto has been practically undeveloped at Delavan. *In re Appl. United Heat, Lt. & P. Co. of Delavan*, 505, 516.

27. With respect to electric rates, the petitioners complained that the village does not know whether it is paying the proper amount for street lighting, that the present rates for electrical energy used for power purposes are too low and that the entire rate schedule needs revision so that each class of consumers will pay its proper share of the cost of supplying the service. The value of the property of the electric utility was determined from the records of the utility and a computation of depreciation upon the 4 per cent sinking fund basis and a life of 18 years, and the revenues and expenses were investigated. The expense of steam generation and certain items of the general and undistributed expenses were apportioned between the electric utility and the water utility, which are jointly operated, and the expenses of the electric utility were apportioned between commercial lighting, commercial power, and street lighting expenses. It appears that the revenue from commercial lighting and the revenue from street lighting exceeds the cost of rendering the service while the revenue from power service is less than the cost of the service, and that the rates for commercial lighting and power are regressive. *Held*: The electric rates should be revised. The village of Waterloo is ordered to discontinue its

present schedules of electric and water rates and put into effect rates prescribed by the Commission. *In re Invest. Waterloo Mun. W. & El. Plant*, 534, 551.

28. Complaint is made that the rates, rules and regulations of the Berlin Public Service Co., a public utility engaged in supplying gas, electricity and heat in the city of Berlin, are unfair, unreasonable and unjustly discriminatory and that the service rendered is inadequate. Request is also made that the management and operation of the utility be investigated in order to disclose any inefficiency that may exist. The matter of electric service has been made the subject of a special investigation by the Commission and is therefore not considered here. Comparison of the operating statistics for the gas and electric departments of the utility with statistics for other Wisconsin plants similarly situated show that the operating costs of the utility are below normal, thereby indicating that the management is not inefficient. To determine the matter of rates, a valuation of the property used by each of the three departments of the utility was made and the revenues and expenses for each department were investigated. *Held*: 1. Inasmuch as comparisons for the respondent's operating expenses and its investment with those of other utilities similarly situated do not place the respondent's business in an unfavorable light, sufficient ground is not established for a more costly investigation of the management and operation. 2. A reduction of rates is not warranted. The gas and electric rates should, however, be revised for the purpose of eliminating certain unreasonably discriminatory features. It is ordered that the utility put into effect schedules of rates determined by the Commission for the sale of electricity and gas and that the utility be authorized to put into effect a schedule of heating rates determined by the Commission. *Jones et al. v. Berlin Public Service Co.*, 121, 151.

Reconnection charge.

29. The charge for reconnection for electric service for the same consumer on the same premises shall be \$1.00. *Jones et al. v. Berlin Public Service Co.*, 121, 146.

30. For the reconnection of a meter for the same consumer upon the same premises, a charge of \$1.00 is deemed reasonable. *In re Appl. Mun. El. Utility of Sun Prairie*, 189, 198.

31. For the reconnection of a meter for the same consumer upon the same premises, a charge of \$1.00 shall be made. *In re Appl. United Heat, Lt. & P. Co. of Delavan*, 505, 515.

32. The company asks also that it be given authority to charge \$1.50 for reconnection of a meter for the same consumer upon the same premises within one year of the date when service was disconnected. This has been held to be a reasonable provision in other cases before the Commission, and we see no reason for not authorizing such a practice in this case. *In re Appl. Whitewater El. Lt. Co.*, 517, 519, 520.

33. For the reconnection of a meter for the same consumer upon the same premises a charge of \$1.00 shall be made. *In re Invest. Waterloo Mun. W. & El. Plant*, 534, 550.

Service charge plus energy charge with limiting maximum rate per kw-hr.

34. The maximum rate for power shall not exceed 10 cents per kilowatt-hour except when limited by the minimum monthly bill, which shall be \$1.00 per month. *In re Appl. Mun. El. Utility of Sun Prairie*, 189, 199.

35. In order that the demand charge plus the energy charge may in no instance amount to an unreasonable total per kw-hr. for the short hour or small consumers, the maximum rate per kw-hr. will be placed

at 9½ cts. which shall prevail in all cases where the sum of the demand and energy charges exceeds an average rate of 9½ cts. per kw-hr. It should be provided, however, that no bill shall be rendered for less than \$1.00 per month, the minimum bill now effective. *Jones et al. v. Berlin Public Service Co.*, 121, 136.

Short time rate.

36. In establishing a rate for customers who take energy only a short time each year, the same difficulty is encountered as is met with in making rates for large power users who can readily find some other source of power. If this short time service can be supplied without increasing the capacity of the station or without making any investment other than stringing the regular service wire, it may be a source of considerable profit. In this connection, though, it should be borne in mind that every plant should have some reserve capacity, and that short time business of this nature should not be taken on if it makes use only of this reserve capacity, because if that is done it may become necessary to increase the size of the units in the station at some later time. In other words, this kind of business should come off the daily peak if it is supplied during the winter months, or it should come during the summer time when the daily peak is comparatively small. *In re Invest. Waterloo Mun. W. & El. Plant*, 534, 545.

Special contracts.

37. The special contract for power which the company has given shall remain in force until it expires, but it shall not be renewed. *In re Appl. United Heat, Lt. & P. Co. of Delavan*, 505, 515.

38. C. S. Morris, the Wisconsin Granite Company and the Wright Mills are at present purchasing current for power under special contracts. The rates at which these consumers are charged are not the same as the rates for the regular schedule, but since the service is not similar to that of other users it cannot be concluded on that ground that the rates are unjustly discriminatory. It appears inadvisable to change the rates under these contracts at this time because of possible disturbance of the whole business. The contracts will be at all times under the supervision of the Commission. *Jones et al. v. Berlin Public Service Co.*, 121, 137.

Special contracts—When lawful.

See ante 1.

Street lighting rates

39. The estimates for ornamental street lighting are based on a short term contract. Certain investment hazards are greater under short term contracts than for the longer periods, consequently a greater annual amortization charge is necessary on the annual basis. Should this service be contracted for on a basis of ten years' service, the company will undoubtedly be willing to reduce the rate somewhat. *Jones et al. v. Berlin Public Service Co.*, 121, 138.

RATES—GAS.

See also MINIMUM CHARGES.

Discount for prompt payment of bills.

1. The gross rate will be composed of a reasonable addition of 10 cts. per thousand cubic feet and the difference between the gross and net rates will constitute a discount for prompt payment of bills. *Jones et al. v. Berlin Public Service Co.*, 121, 140.

Making rates—Elements considered—Cost of service—Depreciation.

2. Allowance for depreciation was based upon the reserve required for the renewal of each item of equipment. *Jones et al. v. Berlin Public Service Co.*, 121, 129, 130.

Minimum rates.

3. The minimum bill now in effect is a charge of 25 cts. per month, which is inadequate to meet a reasonable portion of the consumer expenses which continue even when the consumer uses little or no gas. It appears under the circumstances that the minimum charge should be increased to 50 cts. per month. *Jones et al. v. Berlin Public Service Co.*, 121, 140.

Reasonableness of rates in particular cases.

4. Complaint is made that the rates, rules and regulations of the Berlin Public Service Co., a public utility engaged in supplying gas, electricity and heat in the city of Berlin, are unfair, unreasonable and unjustly discriminatory and that the service rendered is inadequate. Request is also made that the management and operation of the utility be investigated in order to disclose any inefficiency that may exist. Comparison of the operating statistics for the gas and electric departments of the utility with statistics for other Wisconsin plants similarly situated show that the operating costs of the utility are below normal, thereby indicating that the management is not inefficient. To determine the matter of rates, a valuation of the property used by each of the three departments of the utility was made and the revenues and expenses for each department were investigated. *Held*: 1. Inasmuch as comparisons for the respondent's operating expenses and its investment with those of other utilities similarly situated do not place the respondent's business in an unfavorable light, sufficient ground is not established for a more costly investigation of the management and operation. 2. A reduction of rates is not warranted. The gas and electric rates should, however, be revised for the purpose of eliminating certain unreasonably discriminatory features. It is ordered that the utility put into effect schedules of rates determined by the Commission for the sale of electricity and gas and that the utility be authorized to put into effect a schedule of heating rates determined by the Commission. *Jones et al. v. Berlin Public Service Co.*, 121, 151.

RATES—HEATING.

Formula for computing radiation.

1. The petitioners seemed to be in some doubt regarding the correctness of the formula used by the respondent in computing the radiation for customers of heating service. The petitioners requested that the formula be investigated and that a proper formula to be used by the company be published in order that all customers may know the basis upon which their heating requirements and charges are determined. Upon investigating the problem of determining the required radiation, it is found that eminent authorities on the subject advance different formulae, but that they seem to lead for the most part to about the same result. The most rational formulae take into consideration such factors as the influence of the volume of air to be heated, the frequency at which the air is displaced or renewed, the difference in room and outdoor temperature and the difference in room and radiator temperature. Empirical formulae less complicated than this have been devised by which the required radiation can be approximated. The re-

spondent's formulae appears to be one of these. It has been compared with other formulae in which careful consideration is given to the various factors influencing the needed amount of radiating area, and the conclusion is that the respondent's formula leads to a somewhat lower figure than the others. It therefore appears that, insofar as the charge for heating service is concerned, the formula used by the respondent does not lead to overcharges to patrons of the heating service. Whether the amount of heat received from radiation computed in this way is adequate is another matter. If it is not adequate, the improvement would have to be attained by an added amount of radiating area to which the company would not object, but for which the customer would have to pay. Under the circumstances, the company's rule may be accepted without injury to its customers through the charge for service. *Jones et al. v. Berlin Public Service Co.*, 121, 142, 143.

Reconnection charge.

2. The charge for reconnection of heating service for the same consumer on the same premises shall be \$5.00. *Jones et al. v. Berlin Public Service Co.*, 121, 151.

Making rates—Elements considered—Cost of service—Depreciation.

3. Allowance for depreciation was based upon the reserve required for the renewal of each item of equipment. *Jones et al. v. Berlin Public Service Co.*, 121, 129, 130.

Reasonableness of advance in rates in particular cases.

4. Complaint is made that the rates, rules and regulations of the Berlin Public Service Co., a public utility engaged in supplying gas, electricity and heat in the city of Berlin, are unfair, unreasonable and unjustly discriminatory and that the service rendered is inadequate. Request is also made that the management and operation of the utility be investigated in order to disclose any inefficiency that may exist. To determine the matter of rates, a valuation of the property used by each of the three departments of the utility was made and the revenues and expenses for each department were investigated. *Held*: Inasmuch as comparisons for the respondent's operating expenses and its investment with those of other utilities similarly situated do not place the respondent's business in an unfavorable light, sufficient ground is not established for a more costly investigation of the management and operation. The present rates for heating are insufficient, but inasmuch as the utility objects to an increase at this time, on the ground that conditions in Berlin are such that an increased rate would be more detrimental than beneficial to the heating department, it is deemed advisable to authorize rather than to order the utility to make the increase found to be reasonable. It is ordered that the utility put into effect schedules of rates determined by the Commission for the sale of electricity and gas and that the utility be authorized to put into effect a schedule of heating rates determined by the Commission. The utility is further ordered to apply rules and regulations filed by it to heating service furnished under either the existing or authorized schedule of heating rates. *Jones et al. v. Berlin Public Service Co.*, 121, 151.

RATES—INTERURBAN.

Reasonableness of rates in particular cases—Schofield to Wausau.

1. The petition asks the Commission to establish a five cent fare from any point in the village of Schofield to the city of Wausau. As far as transportation rates are concerned, these were adjusted by the Commission in *Fullmer v. Wausau St. R. Co.* 1909, 3 W. R. C. R. 520 and 555, and in 1910, 5 W. R. C. R. 114, and further adjustments both as to transportation rates and electric rates must necessarily require careful study, which will consume a considerable period of time. *Fullmer v. Wausau Street R. Co.*, 246, 249.

RATES—RAILWAY.

Commodity rates.

Complaint against, on sand and gravel, *see post*, 28.

1. Where a given rate under consideration is not complained of as unreasonable, there can be no justification for advancing some other rate merely to establish a difference in the two rates on the basis of the differing values of the commodities carried. *Greengo v. C. M. & St. P. R. Co.*, 532, 533.

Concentration rates—In general.

2. As shown in the discussion of an early case which came before this Commission, *So. Wis. Cheesemakers' Protective Assn. v. Railway Companies*, 1 W. R. C. R. 143, concentration rates were made by various methods, but in whatever manner they were effected they involved, as in lumber and tobacco concentration, and milling-in-transit privileges on other commodities, the reimbursing of the carrier for the low initial rate by full rates for the outhaul of the collected, sorted or milled product or its equivalent. *Kraft & Bros. Co. et al. v. M. P. & N. R. Co. et al.*, 217, 219.

Concentration Rates—Joint.

3. While concentration rates have long been a recognized element in rate construction and find their justification on various grounds, as set forth in the opinion, they always involve the reimbursing of the carrier for the low initial rate by full rates for the outhaul of the product in question. In the instant case, a joint concentration rate is denied for the reason that one of the carriers would not receive sufficient compensation for the outhaul. *Kraft & Bros. et al. v. M. P. & N. R. Co. et al.*, 217, 221.

Group or blanket rates—In general.

4. Group rates are made as a rule with less regard for distance and transportation conditions than for commercial conditions. "The chief justification for a zone system" (group rates) says the interstate commerce commission in *Ferguson Saw Mill Co. v. St. L. I. M. & S. R. Co.*, 1910, 18 I. C. C. R. 396, 398, "is that it places all producers on the same footing at the market." In another case, *Sawyer & Austin Lbr. Co. v. St. L. I. M. & S. R. Co.* 1911, 21, I. C. C. R. 464, 466, the interstate commerce commission says: "In making a blanket adjustment the burden rests upon the carrier to provide rates that shall not be unreasonable from any point of origin." In a case involving Wisconsin points, *Waukesha Lime & Stone Co. v. C. M. & St. P. R. Co.* 1913, 26 I. C. C. R. 515, 518-519, the interstate commerce commission held that where the rate complained of was not in itself unreasonable or exorbitant, the commission would not disturb a group rate system merely because as

high a rate was charged for a short haul as for a longer haul. The issue in the case before us is not whether other points farther away should have the same rate to Minocqua as Wausau, but whether the rate in force between Wausau and Minocqua, and of which complaint is made, is of itself unreasonable. That rate is 8 cts. and the distance is 72 miles. We believe that the rate is unreasonable and so find. *Central Wis. Traffic Bur. v. C. M. & St. P. R. Co.*, 521, 523.

Joint rates.

Joint rates, on peas and beans, Wis. points on the C. & N. W. and the C. M. & St. P. R., *see post*, 24.

Modification of, on wood, on the M. T. & W. R., the S. M. & P. R., and the W. & N. R. R. lines, *see post*, 32.

Reasonableness of rates—Matters considered in determining reasonableness—Reshipment.

See post, 25.

Reasonableness of rates in particular cases—Beets, Honey Creek and Hamilton to Menomonee Falls.

5. Complaint was made of overcharge on 8 carloads of sugar beets shipped from Honey Creek and Hamilton to Menomonee Falls. The C. M. & St. P. R. Co. denies any overcharge, but the M. St. P. & S. S. M. R. Co., on whose lines the shipments originated, admits the overcharge as claimed. Ordered: That respondents refund to the petitioner the amount claimed. *Wisconsin Sugar Co. v. M. St. P. & S. S. M. R. Co. et al.*, 650, 651.

Reasonableness of rates in particular cases—Bolts, Beaver Spur to Washburn.

6. Complaint was made of excess charges on two cars of wooden bolts shipped over respondent's line from Beaver Spur to Washburn, Wis. It appears that a rate of 5½ cts. per cwt. was exacted, and that at the time the shipment moved a rate of 2.6 cts. per cwt. was in effect on bolts in carload lots from Earl to Washburn, Wis., and from Beaver Spur to Bayfield, Wis. Beaver Spur is intermediate to Earl, and Washburn is intermediate to Bayfield. Refund is asked on the basis of a rate of 2.6 cts. per cwt. *Held*: The rate exacted was excessive. A reasonable rate would have been 2.6 cts. per cwt. Refund on that basis. *Kenfield-Lamoreaux Co. v. C. St. P. M. & O. R. Co.*, 294, 295.

Reasonableness of rates in particular cases—Bolts, Wis. points to Oshkosh and Menasha.

7. The petitioner alleges that the charges exacted by the respondent for the transportation of certain carload shipments of bolts from various points in Wisconsin to Oshkosh and Menasha were excessive, for the reason that they were assessed on the basis of minimum weights which were greater than the carrying capacity of the cars in which the shipments were made, and asks for refund on the basis of charges calculated upon the actual weight with a minimum loading requirement of 35,000 lb. Since the shipments moved the respondent has es-

established the loading requirement mentioned for shipments loaded in box or stock cars to the full visible capacity. The respondent is willing to make refund. *Held*: The charges exacted were unusual and exorbitant. The reasonable charges are those since established by the respondent. Refund is ordered upon this basis. *Oshkosh Excelsior Mfg. Co. v. M. St. P. & S. S. M. R. Co.*, 178, 179.

Reasonableness of rates in particular cases—Bottles, Milwaukee and La Crosse (between).

8. Complaint was made that the rate of 17½ cts. per cwt. on bottles between Milwaukee and La Crosse was excessive, and the Commission was asked to establish a rate of 15 cts. per cwt. for shipments of bottles between the points in question, and to order a refund to the petitioner on twenty-eight carloads of bottles, which petitioners shipped from Milwaukee to La Crosse between Oct. 23, 1912, and Jan. 24, 1914, and on which petitioner paid charges at the rate of 17½ cts. per cwt. It appeared that the 17½ ct. rate had been in force less than a month when the first car of the shipment in question was shipped, and that the net rate on bottles from Milwaukee to Eau Claire—a longer haul by nearly one hundred miles—was and remains 15 cts. per cwt. *Held*: The rate of 17½ cts. is unduly high. A rate of 15 cts. would bring the respondent a generous return. The respondent is ordered to cease exacting a rate in excess of 15 cts. per cwt. on bottles in carload lots between Milwaukee and La Crosse, and to make refund to the petitioner on the shipments in question on the basis of a 15 ct. rate. *John Gund Brewing Co. v. C. M. & St. P. R. Co.*, 82, 83.

Reasonableness of rates in particular cases—Cheese, to Mineral Point from points on the C. & N. W. in southwestern Wisconsin.

9. The petitions in substance request the Commission to order the respondent railway companies to make joint concentration rates on cheese to Mineral Point from points on the C. & N. W. Ry. in southwestern Wisconsin, reaching as far north as Madison. It appears that the latter railway company's line does not touch Mineral Point, but intersects, at Whitson Junction, the line of the M. P. & N. Ry. Co., which runs north from Mineral Point to Highland. While concentration rates have long been a recognized element in rate construction and find their justification on various grounds, as set forth in the opinion, they always involve the reimbursing of the carrier for the low initial rate by full rates for the outhaul of the product in question. The M. P. & N. Ry. Co. is willing to make joint concentration rates with the C. & N. W. Ry. Co., provided the rates be such as to secure it a fair return. However, it appears that it would be impractical for the C. & N. W. Ry. Co., against whom the petition is really directed, to get an equivalent outhaul at full rates, since the outhaul business would have to reach the C. & N. W. Ry. Co. through either the M. P. & N. Ry. Co. or the C. M. & St. P. Ry. Co. as the initial line. Thus at least 25 per cent of the rate received for the outhaul would go to the line originating the business, so that that portion of the outhaul rate would be lost to the C. & N. W. Ry. Co. *Held*: Since under present conditions it appears impracticable for the C. & N. W. Ry. Co. to secure a compensating rate on the outhaul of the business it might deliver at concentration rates to the M. P. & N. Ry. Co. at Whitson Junction for Mineral Point, the petitions are dismissed. If either petitioners or respondents should work out any plan for joint rates whereby the benefits would equal the disadvantages, the Commission will be glad to reopen the case. *Kraft & Bros. et al. v. M. P. & N. R. Co. et al.*, 217, 221.

Reasonableness of rates in particular cases—Gravel & Crushed Stone, etc., of C. & N. W. R. Co. et al. lines.

10. The Commission, on its own motion, investigated the refusal of the respondent named in the title to make the refund authorized in the case *Waukesha Lime & Stone Co. v. C. & N. W. R. Co. et al.* 1913, 13 W. R. C. R. 368. The rehearing was called for the purpose of developing the full facts as to respondent's refusal, and to put all the facts fully before the Commission, so that any defect found in the original proceedings could be remedied. The respondent alleged: (1) that the rates and charges as ordered by the Commission in *Waukesha Lime & Stone Co. v. C. M. & St. P. R. Co. et al.* 1912, 9 W. R. C. R. 87 and 347 did not justify the findings of the Commission in the original case; (2) that the findings of the Commission in the original case did not show a situation that warranted the authorization of a refund; and (3) that there was no evidence tending to show that petitioner sustained any damage. The findings of the Commission in the original case were to the effect that the 1912 orders (*supra*) established the marked capacity of car as the minimum weight. It appears that, as a matter of fact, the foregoing orders did not specify the minimum weight, but provided that the minimum weight then in force should apply in connection with the rates ordered. On the dates in question there were dual sets of like distance rates on stone between points on the respondent's line, with one of which the minimum weight applicable was 90 per cent of the marked capacity of the car, and with the other the marked capacity itself. The minimum weight in force at the time in question from and to the points involved in the original case, was 90 per cent of the marked capacity of the car, and the petitioner suffered an actual loss through the tariff making the marked capacity of the car apply as minimum weight instead of the former minimum weight of 90 per cent. *Held:* That as the minimum weight in force from and to the points involved at the time the orders in question (*Waukesha Lime & Stone Co. v. C. M. & St. P. R. Co. et al.* 1912, 9 W. R. C. R. 87 and 347) went into effect was 90 per cent of the marked capacity of the car, the publication of marked capacity of the car as the minimum weight was not a compliance with the orders in question, and that there is no reason why the original order should not stand, the conflict between the findings and the facts in that case having been due to dual sets of like distance rates on stone with different minimum weights. *Waukesha Lime & Stone Co. v. C. & N. W. R. Co. et al.*, 479, 481.

Reasonableness of rates in particular cases—"Hog fuel", Grand Rapids to Port Edwards.

11. The petitioner alleges that the rate of 2 cts. per cwt. charged by the respondent for the transportation of mill refuse, commonly known as "hog fuel," in carload lots from the petitioner's mill in Grand Rapids to the Consolidated Water Power & Paper Co's plant in the same city and to Port Edwards is unreasonable and asks that a reasonable charge be established and that refund be ordered on certain shipments. Since these shipments moved the respondent has reduced the rate in question to 1 ct. per cwt. and the petitioner accepts the new rate as satisfactory and asks merely for refund. *Held:* In view of the low price of the commodity carried, the high minimum loading requirements and the short haul involved, the rate exacted was clearly excessive. Inasmuch as the respondent by its own action in reducing its rates has acknowledged a rate of 1 ct. per cwt. to be a reasonable rate, and inasmuch as the petitioner has expressed himself as satisfied with this rate, refund is ordered upon this basis without determining

the reasonableness, in and of itself, of the new rate. *Ellis Lbr. Co. v. C. M. & St. P. R. Co.*, 527, 529.

Reasonableness of rates in particular cases—Lime, Superior to Washburn.

12. The petitioner alleges that the rate of 8.3 cts. per cwt. charged by the respondent for the transportation of a carload of slaked lime from Superior to Washburn is exorbitant and prays for refund on the basis of a rate of 5 cts. per cwt., which is in effect on the N. P. Ry. between the points named. *Held*: It would be impossible for the respondent to participate in traffic of the kind here involved upon a rate in excess of that in effect upon the competing line. The rate of 5 cts. is reasonable and the refund claimed is ordered. *Superior Mfg. Co. v. C. St. P. M. & O. R. Co.*, 160, 161.

Reasonableness of rates in particular cases—Logs and bolts, Wis. points on the C. M. & St. P. R.

13. Complaint was made of overcharges on certain shipments of saw logs and bolts in carloads, and reparation asked. Petitioners made no effort to show that the rates complained of are unreasonable *per se*, but based their claim on the fact that the rates complained of have been maintained at a somewhat higher level than the schedule prepared by the Commission in the case of *Northern Hemlock & Hardwood Mfrs. Assn. v. C. & N. W. R. Co.* 1913, 12 W. R. C. R. 241. *Held*: That the maintenance of differing schedules of rates by carriers of the same commodity does not necessarily involve unjust discrimination; that it is open to question whether rates for the transportation of logs have not reached as low a point in Wisconsin as justice will permit; that in the case relied upon the Commission's task was the prevention of an unwarranted increase in rates rather than the lowering of the general level of log rates; that the Commission is not warranted in finding that petitioners are suffering from unjust discrimination by reason of the rates complained of, and that before further extensive changes are made in the rates upon the commodity in question, a thorough investigation should be made of the entire field of log transportation in Wisconsin in order that log rates may be equitable between shippers as well as reasonable in themselves. The petition is dismissed. *Barker-Stewart Lbr. Co. et al. v. C. M. & St. P. R. Co.*, 645, 647.

Reasonableness of rates in particular cases—Logs, Brown's Spur to Peshtigo.

14. Complaint was made of excess charges on 21 carloads of saw logs shipped from Brown's Spur, Wis., to petitioner's mill at Peshtigo, Wis., and refund asked. It appears that at the time the shipments moved there was no rate applicable to logs moving between the points mentioned, and that consequently the respondent was obliged to apply its lumber tariff to the shipments in question. The respondent, upon learning of these shipments, published a tariff providing for such shipments, but that tariff did not become legally effective until ten days after the last shipments here involved were made. *Held*: The charge of 7½ cts. per cwt. on the shipments in question from Brown's Spur to Bagley Junction was exorbitant. A reasonable charge for such services would have been a rate of 1.8 cts. per cwt., as provided in respondent's present tariff, plus a \$3.00 switching charge from Bagley Junction to Peshtigo. Refund on that basis. *Peshtigo Lbr. Co. v. C. M. & St. P. R. Co.*, 43, 44.

Reasonableness of rates in particular cases—Logs, Grandview to Cumberland.

15. The petitioner alleges that the rate of 6 cts. per cwt. exacted by the respondent for the transportation of a carload of logs from Grandview to Cumberland was erroneous and asks for refund on the basis of a rate of \$2 per 1000 ft., minimum charge \$10 per car. The question here involved was passed upon in a previous case of the same title (1914, 14 W. R. C. R. 287), and the present claim should have been there included. *Held:* The rate complained of was unusual, illegal and exorbitant. A rate of \$2 per 1000 feet, minimum charge \$10 per car, would have been reasonable and refund is ordered on this basis. *Cumberland Fruit Pkg. Co. v. C. St. P. M. & O. R. Co.*, 158, 159.

Reasonableness of rates in particular cases—Logs, Madras to Stevens Point.

16. Complaint was made that the respondents were demanding exorbitant rates on shipments of saw logs in carloads from Madras to Stevens Point, Wis., and the Commission was requested to fix a reasonable rate for such shipments and to order the respondents to refund all excess charges. It appeared that the distance from Madras to Stevens Point is 30.4 miles, and that from Madras to Junction City, the haul of the "Milwaukee" road, is 19.4 miles. It further appeared that Madras is at the end of a spur of the "Milwaukee" road, and that this spur diverges from the main line of the Wisconsin Valley division of that road at Knowlton, and is eight or nine miles in length. The "Milwaukee" made no proposition in answer to a request for joint rates, but demanded 4½ cts. per cwt. for its haul from Madras to Junction City. The "Milwaukee" contended that an extra crew was required to handle business between Madras and Knowlton and that, should the Commission put in force the distance tariff for a one line haul with the addition of a ¾ ct. arbitrary for the junction transfer, an additional ¾ ct. arbitrary should be added for the transfer at Knowlton. The petitioner desired a joint rate about the same as the joint rate obtaining on pulp wood for similar service, presumably because saw logs and pulp wood are similar. With reference to the refund asked, it seems that petitioner, owing to certain circumstances, was obliged to ship logs from Madras to Stevens Point subsequent to the filing of the complaint, but before there could be an order in the premises. *Held:* The rates complained of are unreasonably high. As regards the alleged greater convenience of handling the business on the Madras-Knowlton spur with an extra crew, the cost of handling log traffic on spurs or tap lines is pretty well established, and the fact that for any reason a company might prefer to handle the business in a more expensive way would not warrant the charging of an exorbitant rate. And since the haul of the "Milwaukee" from Madras to Junction City can only be considered as a one line haul, the claim of that company that there should be an additional ¾ ct. arbitrary for the transfer at Knowlton is not tenable. On the other hand, the pulp wood rate is too low a rate for the service involved. The similarity between saw logs and pulp wood is no ground, in the present case, for making a similar rate. The pulp wood rates in question were established when the cost per unit for transportation was on the whole somewhat lower than at present, and were also in a measure based on the rates out on the products into which the pulp wood is manufactured, and on many other special conditions surrounding that traffic. A fair rate to all consumers for the saw log traffic involved in this case would be 3.3 cts. per cwt. The respondents are ordered to establish, in place of the present rates, a joint rate on logs from Madras to

Stevens Point not to exceed 3.3 cts. per cwt. Should the companies fail to agree upon the division of this joint rate, the Commission will determine the matter. No other change is made in any of the existing rules affecting the traffic involved. The respondents are further ordered to refund to the petitioner the amounts paid by it on all log shipments made after August 1, 1914, in excess of the joint rate established. *John Week Lbr. Co. v. C. M. & St. P. R. Co. et al.*, 53, 56.

Reasonableness of rates in particular cases—Logs, Unity to Colby.

17. Complaint was made that the respondent furnished petitioner two cars of a capacity in excess of those ordered by it, and charged it on the basis of the capacity of the cars furnished, wherefore petitioner seeks refund of the additional charges thereby caused. *Held*: That when a railroad company, for its own convenience or because of necessity, furnishes a car of greater capacity than that ordered by the shipper, its charges cannot exceed those based upon the capacity of the car actually ordered. The respondent is ordered to refund the additional charges. *Colby Cheese Box & Silo Co. v. M. St. P. & S. S. M. R. Co.*, 469, 470.

Reasonableness of rates in particular cases—Logs, Wis. points to Rhineland.

18. The petitioner alleges that the minimum weights and the charges for excess weight on logs as applied by the respondent to shipments from various Wisconsin points to Rhineland are unreasonable and asks for refund on certain shipments. It appears that the petitioner's difficulty in loading within the weight limits prescribed by the respondent is due not to any defects in the cars but to lack of facilities for ascertaining weights at loading points and that with more care in loading many instances of both overloading and underloading could have been avoided. The charge for excess weight is a safety measure designed to prevent shippers from endangering the respondent's equipment and the lives and limbs of the respondent's employes. The fact that a shipper, through lack of facilities for ascertaining weights, cannot load cars just as he would like to do does not prove the unreasonableness of the rate or the minimum weight applicable. The application of the charge for excess loading to saw logs and bolts only does not constitute unlawful discrimination if dangerous overloading of cars is prevalent only in the case of saw logs and bolts, as the testimony in the instant proceeding appears to show. *Held*: The minimum weights complained of, taken in connection with the rates applying thereto, and the charge for excess loading, when used as a measure of safety to induce shippers not to overload, are not unreasonable. The petition is dismissed. *Brown Bros. Lbr. Co. v. M. St. P. & S. S. M. R. Co.*, 569, 574.

Reasonableness of rates in particular cases—Lumber, Cotten to Rhineland.

19. Complaint was made of excess charges on three carloads of lumber shipped from Cotten to Rhineland, Wis., for manufacture and reshipment at that point. It was alleged that a reasonable rate for such shipments to be manufactured and reshipped would have been 6½ cts., the rate subsequently put into effect by respondent. Refund is asked on that basis. *Held*: That the rate exacted was exorbitant and out of line with the rates generally applicable to shipments like the ones in question. A reasonable rate is 6½ cts. per cwt. Refund ordered on that basis. *Pierce v. M. St. P. & S. S. M. R. Co. et al.*, 473, 474.

Reasonableness of rates in particular cases—Lumber, Odanah and Rhinelander to Milwaukee, Racine and Kenosha.

20. Complaint was made that the rates charged on lumber from Odanah and from Rhinelander to Milwaukee, Racine and Kenosha are excessive and unreasonable, and that under an explanation clause in the respondent's published tariff the rates charged the petitioner are not only excessive, but illegal, and a reduction in rates was requested and a refund on certain shipments charged the rates complained of. It appears that Ashland and other upper lake ports have a rate of 10 cts. per cwt. to Milwaukee, Racine, Kenosha, and other points in the southern portion of the state; that the specific rates complained of are 12 cts. from Odanah, and 11 cts. from Rhinelander to the southern destinations named, and that Odanah and Rhinelander are directly intermediate between Ashland and such destinations. The rates from Ashland to the points in question were based entirely on water competition, and had to be granted by the carriers in order to obtain a share of the traffic. It also appears that the construction of the clause in question contended for by petitioner is not in accord with that given it by respondent and acquiesced in by shippers for a number of years. *Held:* That that construction of the clause in question which has been accepted in actual practice for years is justified by the conditions in the present case; that the acceptance by carriers of competitive traffic, provided it can be had at rates that yield something above the additional cost of handling such traffic, and provided further that it does not result in unjust discrimination, is, as a rule, best for all concerned; that the question in the present case is whether the rates charged petitioner are in themselves excessive or unreasonable; that such rates under present conditions are not excessive nor discriminatory, and that the petition must be dismissed. *Mason-Donaldson Lbr. Co. v. C. & N. W. R. Co.*, 575, 577.

Reasonableness of rates in particular cases—Lumber, Robbin's Railway Transfer to Rhinelander.

21. Complaint was made of excessive charges on two cars of lumber switched for petitioner from Robbins Railway Transfer, near Rhinelander, to the plant of the Rhinelander Refrigerator Co., and refund asked. Petitioner alleges that charges were assessed at the rate of 3 cts. per cwt., though the service performed was of a character usually regarded as switching service and that a proper charge would have been 1 ct. per cwt. Respondent admits the allegations of the petition. *Held:* That the charge exacted of petitioner on the cars of lumber in question was excessive. A reasonable charge would have been 1 ct. per cwt., subject to a minimum loading weight of 50,000 lb. on each car. Refund ordered on that basis. *Mason-Donaldson Lbr. Co. v. M. St. P. & S. S. M. R. Co.*, 388, 389.

Reasonableness of rates in particular cases—Lumber, Wausau to Minocqua.

22. The petitioner alleges that the rate of 8 cts. per cwt. exacted by the respondent for the transportation of certain shipments of lumber from Wausau to Minocqua was exorbitant and asks for refund. The rate in question is part of a group system of rates in force on lumber and sash, doors and blinds and other house trimmings from lumber and manufacturing centers, including Wausau and certain other points in the Wisconsin river valley. Comparison with rates for the transportation of the same commodities between other points within the state indicates that the rate complained of is higher than the average rate for similar or greater distances. Group rates, however, are made as a

rule with less regard for distance and transportation than for commercial conditions and the issue in the instant case is not whether other points farther away should have the same rate to Minocqua as Wausau, but whether this rate is of itself unreasonable. *Held*: The rate is unreasonable. A rate of 6 cts. per cwt. would bring the respondent a reasonable return for the service rendered and the respondent is ordered to put it into effect. In view of the fact that the shipments upon which reparation is asked were made at the rate long published and in force, reparation will not be ordered and the petition, insofar as it asks for reparation, is dismissed. *Central Wis. Traffic Bur. v. C. M. & St. P. R. Co.*, 521, 523.

Reasonableness of rates in particular cases—Milk, Sussex to Milwaukee.

23. The petitioner complains that the rate charged by the respondent for the transportation of skimmed milk from Sussex to Milwaukee is the same as that charged for the transportation of unskimmed milk, although the value of the skimmed milk is but little more than one-third that of the unskimmed milk. It appears that little skimmed milk is shipped over the respondent's line between the points in question and that the cost of handling skimmed milk is the same as that of handling the unskimmed product. The petitioner does not question the reasonableness of the skimmed milk rate but objects to the fact that no higher rates are charged for the product of higher value. *Held*: Although the difference in the value of the two kinds of milk might warrant, under certain circumstances and if the traffic were extensive enough, a difference in the rate, the quantity shipped in the instant case does not call for this. Moreover, when a rate is not complained of as being unreasonable in itself there can be no justification for advancing some other rate merely to establish a difference in the two rates on the basis of the differing values of the commodities carried. The case is dismissed. *Greengo v. C. M. & St. P. R. Co.*, 532, 533.

Reasonableness of rates in particular cases—Peas and beans, points on the C. & N. W. R. and the C. M. & St. P. R.

24. Complaint was made that the rates charged petitioner on shipments of peas and beans are excessive. Petitioner is located at Sheboygan and its complaint applies to both carload and less than carload lots, to joint as well as one-line rates, and to both in and out shipments. Petitioner alleges that it has been engaged for a number of years in growing peas in considerable quantities at London, Lake Mills, and a number of other points within the state, some twenty in all. The business is carried on on a contract basis with the farmers, petitioner shipping the seed in, and, later, the crops out, to itself and to the canneries. Petitioner does not keep large stocks on hand in Sheboygan and its products are distinctly live commodities. It appears that petitioner's business has steadily increased for a number of years, but that the rates in question, with one exception, have remained unchanged for several years. The Commission is asked to establish local rates on a commodity basis, insofar as shipments moving entirely over the line of the C. & N. W. Ry. Co. are concerned, to order joint rates between Sheboygan and the points involved, and also to order reparation in such sum as the Commission shall find the charges paid to have been in excess of reasonable charges. *Held*: That, due consideration being given to the cost of the service to the carriers and the commercial conditions affected by the traffic, both the one-line rates and the joint rates charged petitioner are higher than they should be, and that the rates shown in the opinion will more nearly meet the demand for just and reasonable rates. That the greater expansion of business which would follow a

moderate reduction would benefit the carriers as well as the score or more of communities named, but that petitioner's steady growth during the period in question leaves little ground upon which to base a claim for a refund, and that the request for reparation must be dismissed. Ordered: That the C. & N. W. R. Co. substitute for the local rates in question those shown in the opinion, and that both respondents substitute the joint rates named for those now in force. *John H. Allen Seed Co. v. C. & N. W. R. Co. et al.*, 641, 644.

Reasonableness of rates in particular cases—Rye, Nekoosa to Janesville.

25. The petitioner alleges that the charge exacted by the respondent for the transportation of a shipment of rye from Nekoosa to Janesville and thence, as a reshipment, to Milwaukee, was excessive and asks for refund. The petitioner requested the respondent to furnish him a small car but was compelled to use a car of a capacity of 75,000 lb., although the actual weight of the shipment was 42,170 lb., and to pay charges on the basis of this capacity for the movement from Nekoosa to Janesville and the subsequent movement from Janesville to Milwaukee. The petitioner contends that he should have been charged only the full rate from Nekoosa to Milwaukee, plus \$2.00 charges for reshipment from Janesville, and that he should have been charged the rate upon the actual weight of the shipment instead of upon the car capacity. *Held*: (1) The claim of the petitioner for reparation on the basis of the through rate from Nekoosa to Milwaukee cannot be granted, for the reconsignment of a shipment by the original consigner on a through rate plus a small additional charge, is allowed only where the point of diversion and reshipment is on the direct or authorized route between the initial shipping point and the final receiving point. (2) The claim of the petitioner for reparation upon the basis of the actual weight of the shipment is justified. The respondent is ordered to refund to the petitioner the difference between the sum paid by the petitioner to the respondent and the sum which should have been paid at the tariff rates upon the actual weight of the shipment. *Stevens v. C. & N. W. R. Co.*, 524, 526.

Reasonableness of rates in particular cases—Sand, Milwaukee to Horicon.

26. The petitioner alleges that the rate of 2¾ cts. per cwt., exacted by the respondent for the transportation of certain carload shipments of burnt sand from Milwaukee to Horicon, was unusual and exorbitant and asks for refund upon the basis of a rate of 50 cts. per gross ton made effective for burnt sand after the shipments in question moved. The rate charged was the rate for sand and was applied in the absence of a tariff provision for burnt sand. *Held*: The rate exacted was exorbitant. Burnt sand, being a commodity of low value, cannot be moved except at a very low rate. The reasonable charge would have been 50 cts. per gross ton and refund is ordered upon this basis. *International Harvester Corp. v. C. M. & St. P. R. Co.*, 164, 165.

Reasonableness of rates in particular cases—Sand, Portage to Milwaukee.

27. Complaint was made of overcharges on four carload shipments of sand made at varying times from Portage to Milwaukee. It appears that two of the shipments were made more than two years prior to the filing of the complaint, and that the charges on the other two were in excess of what they would have been, had the rates properly applicable, which were fixed by the Commission in the case of *Waukesha Lime &*

Stone Co. v. C. M. & St. P. R. Co. et al. 1912, 9 W. R. C. R. 347, 353, been applied. *Held:* That under sec. 1797—37m only the last two shipments can be considered, and that refund is due on such shipments. Refund ordered on the basis of the rate made applicable in the former order of the Commission. (9 W. R. C. R. 347, 353.) *Nordberg Mfg. Co. v. C. M. & St. P. R. Co.*, 648, 649.

Reasonableness of rates in particular cases—Sand & Gravel, on Waupaca-Green Bay R. Co. and Grand Rapids.

28. Complaint was made of a new commodity rate on sand and gravel between the pits of the petitioner, located on the Waupaca-Green Bay Ry. Co., and Grand Rapids, and an investigation was made by the Commission, on its own motion, of the local rates charged on sand and gravel by the Waupaca-Green Bay Ry. Co. It appears that Granite is on the Waupaca-Green Bay Ry.; that the termini of such railroad are Scandinavia to the north, and Waupaca to the south; that the former is the junction with the Green Bay & Western R. R. Co., and the latter the junction with the M. St. P. & S. S. M. Ry. Co.; that prior to May 20, 1914, the joint through rate from Granite to Grand Rapids was 2 cts. per 100 lb.; that May 20, 1914, a joint through rate of 2.5 cts. per 100 lb. was established; that the local rate from Granite to both Waupaca and Scandinavia is $\frac{1}{2}$ ct. per 100 lb.; that the local rate from Scandinavia to Grand Rapids is 1.8 cts. per 100 lb., and that as the sum of the two locals is only 2.3 cts. the effective through rate from Granite to Grand Rapids has been 2.3 cts. per 100 lb. since May 20, 1914, instead of 2.5 cts. as intended by the change. The respondents ask that distance rates be established on local shipments—an action which would increase the local rate from $\frac{1}{2}$ ct. per 100 lb. to 1.2 cts. per 100 lb. from the pits to Waupaca, and 1.3 cts. per 100 lb. from the pits to Scandinavia. The petitioner alleged that it is confronted with new competition which will virtually bar it out of the market at Grand Rapids with a rate of 2.5 cts. per 100 lb. and a switching rate in addition. It appears that the rate of 2.3 cts. affords a reasonable return, but that the change in local rates asked will result in an advance over the present rates from the pits to Waupaca and Scandinavia of about 100 to 200 per cent. The petitioner, while praying for the restoration of the 2 ct. commodity rate, testified that it could successfully meet the new competition at Grand Rapids under a 2.3 ct. rate. *Held:* That the Commission cannot ignore established market conditions in determining the justice of rates which are called in question, although it is not its duty or province to undertake by rate-changing to equalize market conditions for the many commodities handled by carriers; that a rate which gives respondents a reasonable return, while retaining to them a heavy traffic would seem to be one which would be to the advantage of both shippers and carriers to have continued in force, but that the rate should be published as a joint through rate in lieu of the joint through rate of $2\frac{1}{2}$ cts. rather than as a combination of local rates; that the change in local rates asked is too radical, and not warranted; that a rate of $\frac{3}{4}$ cts. per 100 lb. would produce a revenue which would be adequate for the short haul from the pits to Waupaca; and that the rate to Scandinavia appears to be immaterial as there are practically no shipments to that point, and that in case any of the rates show an inadequate return, the Commission may be applied to for further relief. Ordered: That the respondent lines establish a joint through rate of 2.3 cts. per 100 lb. subject to minimum weight of 90 per cent of the marked capacity of the car furnished, on sand and gravel, straight or mixed carloads, from Gravel Pits on the Waupaca-Green Bay Ry. Co. to Grand Rapids, and that the Waupaca-Green Bay Ry. Co. establish a rate of $\frac{3}{4}$ cts. per 100 lb. subject to minimum weight of 90

per cent of the marked capacity of the car furnished, except that when cars are not weighed, the marked capacity will govern as minimum weight on sand and gravel, straight or mixed carloads, between Gravel Pits on its line and Waupaca and Scandinavia. *Waupaca Sand & Gravel Co. v. Waupaca-G. B. R. Co. et al.*, 482, 488.

Reasonableness of rates in particular cases—Silos, Vesper to La Crosse.

29. Complaint was made of excessive charges on a carload of silos shipped over respondent's lines from Vesper, Wis., to La Crosse, Wis. The petitioner alleges that at the time the shipment in question moved there was in effect between the two points, over the line of the C. M. & St. P. Ry. Co., a rate of 7 cts. per cwt. applicable to such shipment, and that a reasonable rate for such shipment is 7 cts. per cwt. The Commission is asked to order refund on that basis and to require the respondents to meet the rate of the C. M. & St. P. Ry. Co. It appears that the distance between the two points is 155 miles over respondents' lines, and only 89 miles over the line of the C. M. & St. P. Ry. Co.; that at the time the shipment moved there was in effect no joint through rate embracing the commodity in question via respondents' lines from Vesper to La Crosse, and that therefore the sum of two locals, or 11.9 cts. per cwt., was applied; that the single line rate for the total distance involved at the time the shipment moved would have been 8½ cts. per cwt.; that subsequent to the shipment respondents provided for the application of their lumber rates to wooden silos; that the application of lumber rates on silos is now in force generally via all lines in Western Trunk Line territory, and that under such application the rate in question would have been 8 cts. per cwt. between Vesper and La Crosse, via respondents' lines, instead of 11.9 cts. *Held*: That there is nothing in the Wisconsin law, or in any order of general application issued by the Commission, which requires competing lines of railroads to meet each other's rates on traffic moving between the same points; that a shipper, who does not ascertain, before making shipment, the rates, conditions, etc. in effect should not expect to escape responsibility for difficulties resulting from his own negligence; that the present rate of 8 cts. per cwt. for the service in question is reasonable, and that a reasonable rate at the time the shipment moved would have been 8½ cts. per cwt. Refund ordered on that basis. *Vesper Wood Mfg. Co. v. G. B. & W. R. Co. et al.*, 442, 445.

Reasonableness of rates in particular cases—Stone, Waukesha to Merrill.

30. The petitioner alleges that the rate of 6.35 cts. per cwt., exacted by the respondent for the transportation of a shipment of pulverized stone from Waukesha to Merrill was excessive. *Held*: The charge was unlawful. The lawful charge would have been 4.15 cts. per cwt., the rate recommended for such shipments in *Waukesha L. & S. Co. v. M. St. P. & S. S. M. R. Co. et al.* 1914, 13 W. R. C. R. 471, 473. Refund is ordered on this basis. Unless the rates recommended by the Commission in the order cited are put into effect by the respondent it will be necessary to hold a hearing and issue a formal order in the matter. *Fargo v. C. M. & St. P. R. Co.*, 162, 163.

Reasonableness of rates in particular cases—Switching rates, Milwaukee.

31. The petitioner complains of a charge of \$1.00 per car which is prescribed by the respondent's tariff for the movement of cars at the request of the petitioner between the petitioner's plant in Milwaukee

and the track scale installed and used by the petitioner and asks for relief. This charge, the petitioner alleges, is contrary to the agreement with the respondent under which the track scale was installed and placed in operation. It appears (1) that the charge complained of is intended to apply only to cars handled to and from the scale for the private information of the petitioner and not to shipments to or from the petitioner's plant placed on the scale to obtain weights upon which to assess regular transportation charges; (2) that the charge has been applied only to interstate movements because of an order of the Commission suspending the tariff which applied the charge to intrastate movements; and (3) that the charge is provided for in the code of weighing rules now in effect generally in Wisconsin and throughout the country. The weighing on the petitioner's scale is done by a sworn weighmaster for the Western Weighing Association and the respondent uses the weights obtained for the purpose of assessing its freight charges. While it is acknowledged that many track scale weights taken by railroad companies are erroneous, this fact does not prove that track scale weights taken by shippers on their own scales are always likely to be correct. When there is a difference in weights taken separately under like conditions a further test of some kind is necessary in order to establish the correctness or error of either weight. Nothing in the evidence submitted in the instant case shows which, if any, of the weights mentioned are the correct ones nor whether the circumstances under which the weights were taken by the petitioner were such as to establish the absolute correctness of any of them. *Held*: There do not appear, at present, to be sufficient grounds upon which to require the respondent to put into effect an exception to the general rule governing the charges for movements of the kind involved in the instant case. The rule is intended to apply generally throughout the country and its defects, if it has defects, should become generally apparent, and a single objection therefore can hardly justify the changing of a rule of so far-reaching application. *Kieckhefer Box Co. v. C. M. & St. P. R. Co.*, 564, 568.

Reasonableness of rates in particular cases—Wood, on the M. T. & W. R., the S. M. & P. R. and the W. & N. R. lines.

32. The M. T. & W. Ry. Co., the S. M. & P. Ry. Co., and the W. & N. R. Co. petitioned for a rehearing in the matter of the above order (Feb. 11, 1914, 13 W. R. C. R. 735), which required all of the carriers party to the case to establish joint rates between their lines on pulp wood in carloads by adding to the previous single line distance rates an arbitrary of $\frac{3}{4}$ cts. per cwt. for each transfer from one road to another. The question presented in the present proceeding is whether a suspension of the order in question as to the three lines in question should be made permanent. It appeared that forest products, constituting well over half petitioners' total tonnage, are relatively much more important on petitioners' lines than on the large lines; that the petitioners' proportion of the interline shipments would be small; that the joint rates applied to the business now moving would mean greatly diminished revenues, and that none of the three petitioners at the present time is earning a fair rate of return on their investments. *Held*: Under the circumstances the petitioner in this proceeding should be excused from compliance with the *Pulp Wood Joint Rate Order* of Feb. 11, 1914. It is ordered that the order of Feb. 11, 1914, insofar as it applies to the Marinette, Tomahawk & Western Railway Company, the Stanley, Merrill & Phillips Railway Company, and the Wisconsin & Northern Railroad Company is vacated, and the petition in that proceeding, insofar as it is directed against the foregoing companies, is dismissed. *Pulp & Paper Mfrs. Traffic Assn. v. C. & N. W. R. Co. et al.*, 66, 69.

Reasonableness of rates in particular cases—Wood, Robbin's Railway Transfer to Rhinelander.

33. The petitioner alleges: (1) that the rate of 1.35 cts. per cwt. exacted by the respondent for the transportation of certain carload shipments of pulp wood from Robbin's Railway Transfer to Rhinelander, a distance of five miles, was exorbitant and illegal, as the service performed was in the nature of switching service, on which the proper charge would have been 1 cent per cwt., subject to a minimum weight of 50,000 lb., and (2) that the charge exacted by the respondent upon the basis of the local distance tariff rate, subject to a minimum weight of 40,000 lb. per carload, for the transportation of certain shipments of pulp wood from Tripoli, McCord and Brantwood to Rhinelander was excessive for the reason that the respondent failed to furnish cars of sufficient size and capacity to carry the minimum weight. *Held:* The charges complained of were unreasonable, unlawful and exorbitant. A charge of 1 ct. for the switching service, and the regular tariff rate upon the actual weight of the shipments moved from Tripoli, McCord and Brantwood would have been reasonable charges. Refund is ordered upon this basis. *Rhinelander Paper Co. v. M. St. P. & S. S. M. R. Co.*, 171, 173.

RATES—STREET RAILWAY.

Discrimination in street railway rates, *see* DISCRIMINATION, 3.

Commutation zone rates.

1. The commutation zone tickets ordered in the present proceeding will effect a reasonable reduction in fare for the regular patron. By their use a passenger will be enabled to ride through the greater part of the village for a nickel fare, while the through fares will still conform to the distance principle. Sold through the conductors in units small enough to be within the reach of all, they should be preferable to the system of mileage books suggested. However, the company is ordered to rearrange the zones of the line in question, so as to place the limits practically a mile apart, and cause the short zone to be at the end of the line. *In re Milwaukee Suburban & Interurban Ry. Rates*, 330, 341, 342.

Making rates—Elements considered—Financial conditions.

2. Facts and circumstances other than financial conditions, such as value of the service, uniformity, existing and future possible traffic, etc., must undoubtedly be considered when single fare extensions are in question. In the instant case no good reasons appear for abandoning the general basis employed in former cases. Recent developments, however, indicate that it is justifiable from an economic as well as from a legal point of view to lay somewhat more emphasis upon financial conditions. *In re Milwaukee Suburban & Interurban Ry. Rates*, 330, 335.

Making rates—Elements considered—Traffic conditions.

3. No difference inhere in city, suburban, and interurban operation which warrant a single cash basis for the suburban schedule of fares when a double basis is in vogue for the other schedules. Petitioners' stand in this instance is supported by general practice. A uniform commutation rate is essential to retain existing and develop future traffic, and that this defect in respondents' schedules, as authorized by the order in question, must be remedied. Due consideration being given to the traffic and financial conditions, it is considered that thirty tickets for fifty cents will be equitable and convenient. Cash fares are to remain as before with the exception of changes made on the South Milwaukee and Tippecanoe lines. *In re Milwaukee Suburban & Interurban Ry. Rates*, 330, 339.

Minimum fares

4. Minimum fares find their justification in grounds of public policy and in transportation costs, and 5 cts. is a logical minimum under existing conditions. *In re Milwaukee Suburban & Interurban Ry. Rates*, 330, 348.

Reasonableness of rates—Matters considered in determining reasonableness—Financial conditions of company.

5. The propriety of the requested modification must be determined by consideration of changes affecting the company's financial condition which have occurred since December 31, 1911, as the Commission's order was based upon conditions then existing and knowledge then at hand. *In re Modification Milwaukee Urban Fare Decision*, 724, 751.

Reasonableness of rates—Matters considered in determining reasonableness—Relation of urban, suburban and interurban earnings and expenses.

6. Suburban system earnings and expenses can seldom, if ever, when as closely connected with the city system activities as in Milwaukee, be considered independently in the adjustment of fares or modification of service, and this principle was recognized in the decision in question, and in the subsidiary cases. As a rule, and in the present case, no such intimate relation exists between the activities of interurban cities and the terminal city as between suburbs and their urban center, and the contention that in the present case the interurban railways leading from the city should be considered in connection with a distribution of the profits of urban operation is not tenable. *In re Modification Milwaukee Urban Fare Decision*, 724, 733, 734.

Reasonableness of rates in particular cases.

7. Complaints were made against the suburban rates of fare of the respondents as authorized in the previous decision, *In re Milw. Suburban & Interurban Ry. Rates*, decided Jan. 2, 1914, 13 W. R. C. R. 475. In the main, the complaints stand for a reduction in suburban fares through the restoration of the fare schedule existing prior to the order, through additional single fare extensions, and through commutation tickets. *Held*: That as to the old schedule, the position taken in the former decision has been, if anything, strengthened by the matters brought out in the present proceeding. The street railway traffic in and about Milwaukee has attained such volume and density that the application of a country five-cent zone with overlaps is unsatisfactory and impractical. The previous order is amended so as to accord with the decisions in the present proceeding. The respondents are to draw up,

in accordance with the amendments presented, rate sheets for the Milwaukee-Racine-Kenosha line, similar to those under the previous order. Blocks of 20 tickets for \$2.50 on cars operating between Milwaukee and South Milwaukee, are to be discontinued, and in lieu thereof, on those cars and all other cars in suburban passenger service the zone tickets, 30 for 50 cents, herein proposed, are to be put on sale, subject to the minimum fare provisions prescribed. All complaints and petitions in the present proceeding, insofar as they are not satisfied or granted, and insofar only as they relate to rates of fare for suburban and interurban passenger service, are dismissed. *In re Milwaukee Suburban & Interurban Ry. Rates*, 330, 359.

8. The petition alleges that the order of the Commission in the case of *City of Milwaukee v. T. M. E. R. & L. Co.* Aug. 23, 1912, 10 W. R. C. R. 1, 305, is unreasonable in that it deprives and prevents the respondent from securing a fair return upon its capital invested and in that it provides that the earnings of the suburban railway company should not be considered a part of the earnings of the city railway operated in the city of Milwaukee. The Commission is asked to give consideration to the earnings of the suburban and interurban railways leading from the city as well as to those of the city railways, and in the light of such consideration to so modify its former order that the respondents will have a fair and reasonable return. The order in question directed the T. M. E. R. & L. Co. to discontinue its former rate of 25 tickets for \$1 and to substitute therefor a rate of 13 tickets for 50 cts. The propriety of the requested modification must be determined by consideration of changes affecting the company's financial condition which have occurred since December 31, 1911, as the Commission's order was based upon conditions then existing and knowledge then at hand, and the Commission still is of the opinion that, in the light of such knowledge and conditions, its order was justified. *Held*: That the increases in the operating expenses and fixed charges of respondents, and the failure of their gross and net revenues to maintain their ordinary annual growth during the past few years, are due to causes wholly beyond respondent's control, and have resulted in net earnings which are now, and for some time have been, considerably lower on the investments than the rates or costs at which it is well known new capital for similar undertakings can in the long run be had. That justice and the law demand that the rates charged by public utilities for the services they render shall be reasonable to the utilities as well as to their patrons; that had it been foreseen, at the time the order complained of was made, that the tendencies and changes in expenses and earnings involved in the present proceeding were permanent rather than temporary, the order would not have been made; and that the best interest of the greatest number in matters of this kind can as a rule be best promoted by allowing rates that are high enough to cover the cost of reasonably adequate service, and that, as the rates provided by the order complained of fall short of this, the order in question must be held unreasonable and repealed or abrogated. *Order*: That the order in question, *City of Milwaukee v. T. M. E. R. & L. Co.* 10 W. R. C. R. 1, 305, is rescinded, and also (through supplemental order of February 17, 1915, which is published with, and immediately following the principal case, and which so declares the intent thereof) such part of any orders of the Commission entered in the cases of *Cusick et al. v. T. M. E. R. & L. Co.* 1912, 10 W. R. C. R. 314, 336, *Koenig et al. v. T. M. E. R. & L. Co. et al.* 1912, 10 W. R. C. R. 337, 351, and *Village of East Milwaukee v. T. M. E. R. & L. Co.* 1912, 10 W. R. C. R. 358, 369, as might otherwise require the T. M. E. R. & L. Co. or the M. L. H. & T. Co. to discontinue the ticket rate for fare within the single fare limits of the city of Milwaukee existing on August 23, 1912, or to sell tickets in packages of 13 for 50 cts. *In re Modification Milwaukee Urban Fare Decision*, 724, 751.

RATES—TELEPHONE.*Business and residence rates.*

See post, 20, 22.

Charges to nonsubscribers.

1. While the company is under no obligation to serve nonsubscribers free, the toll rate now in force for nonsubscribers' calls is ample protection if properly enforced, and some of the calling by nonsubscribers can probably be eliminated by the coöperation of subscribers with the company. *Coady et al. v. La Crosse Tel. Co.* 331, 337.

2. The charge of 10 cts. per five minute message made to nonsubscribers for the use of subscribers' telephones does not appear unreasonable, in that the difficulty experienced by the telephone company in collecting charges of this kind in a large measure offsets the possible profits that might be secured. In fairness to the regular subscribers the rate charged to nonsubscribers should be high enough to prevent the cost of its collection from falling upon the regular subscribers in general. *Dorm et al. v. Walworth Tel. Co.*, 412, 415.

Contracts—Signing of yearly contract required.

See post, 16.

Deposits to insure payment of bills.

3. A deposit or properly signed guarantee will be required from parties who are not known to the company to be responsible for the payment of service charges. *In re Appl. Clark County Tel. Co. to Increase Rates*, 822, 825.

Discount for prompt payment of bills.

See also post, 15.

4. In the instant case it is provided that there shall be a discount for rural service of 75 cts. per year where payments are made one year in advance and of 25 cts. per half year where payments are made a half year in advance. *In re Appl. Clark County Tel. Co. to Increase Rates*, 822, 825.

Flat toll rates.

See post, 27.

Free or reduced rate service.

See also post, 17.

5. The question raised in the instant case has not been one of public necessity, but of the public necessity for free service, and in this case the Commission is unable to rule in favor of a physical connection under these conditions. *Farmers' Union Tel. Co. v. Mt. Vernon Tel. Co.*, 286-287.

Free toll service.

See post, 18.

Making rates—Elements considered—Cost of service.

6. Cost of service is never the sole consideration in determining the reasonableness of a charge. It is one of the primary considerations, but there are other considerations often as vital in reaching a conclusion. *McGowan v. Rock County Tel. Co. et al.*, 378, 380.

Making rates—Elements considered—Interest, depreciation, and maintenance.

7. An allowance of 20 per cent to cover interest, depreciation, and maintenance of this line, based upon the cost new, would be \$155.60 per year. In round numbers, it appears that \$160 per year will be a proper allowance to cover these expenses. No data are available from which we can determine these expenses more accurately than this. *In re Appl. New Union Tel. Co.*, 60, 65.

Reasonableness of rates—Matters considered in determining reasonableness—Financial conditions.

8. At the time of the hearing, the representatives of the company presented an argument setting forth the financial condition of the utility and giving in some detail the reasons for asking for increased earnings. Although it is not considered necessary to review in detail the argument of the company, consideration must be given to the financial condition in determining what are reasonable rates. *In re Appl. Clark County Tel. Co. to Increase Rates*, 822, 826.

Reasonableness of rates—Matters considered in determining reasonableness—Free exchange of service.

See post, 19.

Reasonableness of advance in rates in particular cases.

9. Application is made by the Glidden Tel. Co. for authority to increase the rates at its Glidden exchange. The applicant proposes to establish night service and asks for the increase to cover the additional cost of this service. *Held*: Although it is impossible to measure the exact extent to which expenses will be increased by the rendering of night service, the proposed increase appears to be reasonable and the applicant is authorized to put it into effect. *In re Appl. Glidden Tel. Co.*, 180, 181.

10. Application was made to the Commission for authority to increase rates for the reason that the present rates are considered insufficient to meet the required demands for adequate service, and to provide a satisfactory return upon the investment. Applicant specifically desires authority to put into effect the schedule or rates, and rules affecting rates, which it proposes. A protest was filed, some of the signers alleging unsatisfactory service, and all objecting to an increase in rates. The rate protest appears to have been due to a misapprehension as to the actual amount of the proposed increase in rural rates. The revenues and expenses were investigated, and a valuation of the property was made. It appears that the applicant company was formed by the consolidation of a number of companies and exchanges operating within

the territory now served by it; that the level of rates charged by the applicant is substantially that charged by its predecessors for a service covering only part of the territory; that it furnishes unlimited service to four cities and villages, making an exchange of approximately 850 telephones; that at the present time all rural lines are full metallic; that most of them are of standard construction; that the number of phones on such lines range from 8 to 13; that continuous night and day service is furnished; and that subscribers have the free use of all lines and all exchanges. *Held*: That as far as the requirements of the applicant are concerned, the increase asked is reasonable; that the Commission knows of no company furnishing telephone service of a standard grade over metallic lines with a limited number of subscribers per line, and with lines as long as those of the applicant, which has been able to furnish service at a lower rate than the one suggested by the applicant, and that the charge that service has been poor is largely unfounded, except that reconstruction work done during the past year may have interfered with service to some extent, and that it is only reasonable to assume that service has been improved by the improved facilities installed by the applicant. *Order*: That the applicant is authorized to discontinue its present schedule of rates, and rules affecting rates, and substitute therefor the schedule and rules proposed by it, with the modifications informally applied for, and that such rates and rules may be made effective March 1, 1915. *In re Appl. Clark County Tel. Co. to Increase Rates*, 822, 830.

11. The Marion & Northern Tel. Co. applies for authority to increase its rates for telephone service in the city of Clintonville, the villages of Marion, Tigerton and Gresham and the surrounding country. The utility is improving its system by the installation of a new switchboard at Clintonville and the changing of its wire plant from a grounded and common return system to a full metallic system and it desires to put the rates applied for into effect as soon as the improvements mentioned are completed. A valuation was made, the revenues and expenses were investigated, the operating expenses of each exchange were apportioned between local, rural, toll and switching expenses, and the probable effects of the rates applied for on the earnings of the utility were determined. If, because of competition, the extent or the character of the territory covered, or for some other cause beyond the control of the Commission, it is impracticable to put one or more classes of service on a remunerative basis, it does not seem fair that the remaining classes of service should be required to make up the deficit. *Held*: The rates of the utility should be revised. The utility is ordered to put into effect a schedule of rates prescribed by the Commission at such time as the local lines have been made full metallic. No change is to be made in the rates of any of the exchanges until all local lines of that exchange have been made metallic. It appears that the rural and switching classes of service will probably fail to yield an adequate return, but inasmuch as these classes of service were not considered in the application, they are not covered in the instant order. It is recommended, however, that steps be taken to put the switching service on a proper basis. *In re Appl. Marion & Northern Tel. Co.*, 552, 563.

12. Application was made to the Commission to define what kind of rural lines the applicant should switch at the \$2.00 rate fixed by the Commission in its order of June 7, 1912 (*In re Appl. Mineral Point Tel. Co.* 9 W. R. C. R. 285), to authorize, after Sept. 1, 1914, a rate of \$4.00 per phone per year to parties on grounded lines, until such time as the lines be made metallic; to prescribe that, in cases where the rural lines have switches by which they can switch other lines through the Mineral Point exchange without pay to the applicant, the originating exchange charge for such calls; and to fix the maximum number

of subscribers per line at a number not to exceed ten. A careful examination of the lines in question and of the situation in general was made. The action of the Mineral Point Tel. Co. in urging full metallic construction, a decrease in the number of subscribers per line, and other improvements in construction upon the rural companies was one of the things which engendered a spirit of antagonism between the Mineral Point Tel. Co. and the other companies. It appeared that in the matters of construction and service there is considerable need for improvement on the part of the rural companies, that the present scheme for making repairs needs attention, and that poor construction material is used on nearly all the lines connecting with the Mineral Point exchange. It also appeared that a number of the lines are overloaded. There were, however, no facts indicating the propriety of authorizing a rate higher than \$2.00 should the rural lines be kept in good condition. *Held:* Until some better scheme of maintaining and operating the lines in question is put into effect, the installation of full metallic service would be but a temporary relief to the present unsatisfactory conditions. Moreover, the present grounded construction, properly operated and maintained, would give the subscribers involved a fairly satisfactory grade of service. It is recommended: 1, that each of the companies owning the rural lines in question proceed, as soon as possible, to make such an overhauling of its lines as will place them in a first class working condition; 2, that each company own, operate, and maintain all subscribers' drops and substation wiring; 3, that each company employ an experienced lineman to care for its lines, and furnish him with all necessary repair material, and invest him with all necessary authority to enable him to permanently keep all lines in first class operating condition; 4, that the congestion on certain lines specified be relieved; and, 5, that various needed steps, as stated in the detailed investigation of the different lines, be taken to put them in proper operating condition. *Held:* The order of the Commission (*In re Appl. Mineral Point Tel. Co.* 9 W. R. C. R. 285) fixing the \$2.00 switching rate now in force was based upon the furnishing by the applicant of free exchange of calls to and from parties beyond its directory limits, but connected to a central which could call Mineral Point directly. The change to the present practice was never authorized by the Commission, and the original practice must be restored. While it is reasonable that free service limits should be established, under the circumstances of the present case they should not be the outer ends of the lines connected directly to Mineral Point. However, should the rural companies not put their lines in proper conditions, a somewhat higher switching charge would seem warranted, and also a toll charge upon calls over all lines not directly connected to the Mineral Point Tel. Co.'s exchange. It is ordered: 1, that no charge be made by the Mineral Point Tel. Co. on messages to or from parties directly connected to a switchboard from which the Mineral Point Tel. Co. can be called directly, except as provided in part 4 of the order; 2, that the rate for switching service continue to be \$2.00 per phone per year except as provided in part 3 of the order; 3, that if rural lines are put in good repair in accordance with both the general and special recommendations embodied in the report of the Commission's inspectors by June 30, 1915, the switching rate continue to be \$2.00 per year as long as the lines are properly maintained, and, if not put in such repair, that a rate of \$3.00 be authorized from that date until the lines are put in satisfactory shape; 4, that where lines are not put in good condition by June 30, 1915, as provided in part 3 of the order, the Mineral Point Tel. Co. may charge 10 cts. per message for incoming and outgoing calls from or to parties separated from Mineral Point by one intervening switch, and may continue to make such charge until the lines in question are put in

shape and; 5, that outgoing calls from the Mineral Point switchboard to parties beyond the free exchange limits specified in part 1 of the order as qualified by part 4, be charged for by the Mineral Point Tel. Co. at 10 cts. per call, which rate is to supersede any rate in effect at the time of the order, and that incoming calls from points beyond the free exchange limits specified in part 1 of the order as qualified by part 4, are to be checked by the operators of the switches connected directly with Mineral Point, and be charged at the rate of 10 cts. per message at those points. The Railroad Commission is to determine whether or not the recommendations of its inspectors have been complied with and whether or not lines are properly maintained. *In re Appl. Mineral Point Tel. Co.*, 70, 81.

13. Application is made by the Mineral Point Tel. Co. for authority to increase its rates for local service within the city of Mineral Point on the ground that the present earnings are insufficient to meet the requirements of the business. The accounts of the utility are confused and an audit was made for the purpose of ascertaining the revenues and expenses as closely as is possible under the circumstances. The results of the audit show that the utility is receiving a net return of 7.25 per cent upon a valuation equal to the cost new. *Held*: From the facts as shown it does not appear that the applicant should be authorized to increase rates at this time. When its records are kept in such manner that the information needed for passing upon an increase of rates can be procured, the matter may again be submitted. The application is dismissed. *In re Appl. Mineral Point Tel. Co.*, 182, 184.

14. Application was made by the New Lisbon Mutual Tel. Co. for authority to readjust its rates. It appears that the New Lisbon Mutual Tel. Co. has acquired the property of the Juneau Electric Co., with the exception of that company's Necedah exchange, and that it now proposes to operate as one system its original property and that acquired from the Juneau Electric Co. and thereby furnished an improved class of service. The value of the existing plant is approximately \$14,000, and the yearly operating expenses, including only a fair return upon the investment, will amount to about \$7,000, a figure which the revenues under the rates suggested by the applicant will not exceed. *Held*: The schedule suggested by the applicant is on the whole reasonable. However, portions are somewhat ambiguous, and some of the charges are not properly adjusted to the corresponding class of service. In connection with defects in the schedule suggested, attention is called to charges for "party" line business service, the absence of a rate for single party residence service, and the failure to distinguish between rural and village or city service. Not more than four parties should be placed on one line in villages and cities, except where urban subscribers ask to be placed on rural lines. A rate should be fixed for single party residence service, and a toll rate should be specified for calls sent by a subscriber between exchanges owned by the company when such subscriber has not contracted for unlimited service over all exchanges owned by the company. A charge of 5 cts. per call is suggested as reasonable for such service. The applicant is authorized to discontinue its present schedule of rates, and put into effect the schedule of rates proposed by the Commission. It is suggested that subscribers desiring service over all exchanges owned by the company or over connecting lines, be required to contract for such service on a yearly basis, in order to avoid confusion as much as possible. *In re Appl. New Lisbon Mut. Tel. Co.* 280, 283.

15. Application was made by the Norwalk Independent Tel. Co. for authority to put into effect a gross rate of \$1.25 per month, with a discount of 25 cts., for bills paid on or before the last day of the current month, in lieu of its present rate of \$0.75 per month. It appears that

applicant under its present schedule is unable to fulfill the obligation imposed upon it by law of furnishing adequate service, and that the rate applied for is not unreasonable, and would enable the company to meet the requirements of the law. *Held*: The applicant is authorized to substitute for its present rate the rate proposed by it. *In re Appl. Norwalk Independent Tel. Co.*, 222, 223.

16. Application was made by the West Menasha Tel. Co. for authority, (1) to make a charge of \$15 per phone per year to stockholders and nonstockholders alike, payable in advance in equal quarterly installments; (2) to require subscribers to sign yearly contracts if necessary for the protection of the company; and (3) to make a charge of \$1 for moving a telephone within a subscriber's house, and \$2 for moving a telephone from one building to another. The cost per phone exclusive of any allowance for interest, taxes, and depreciation was considered, but the cost of reproducing the plant, charging for labor at current prices, could not be fixed by the representatives of the utility. *Held*: While under the circumstances of the present case it is not possible to ascertain the exact cost of telephone service, from the facts before the Commission and from the experience of the Commission in other telephone cases where the service was comparable to that involved in the present case, it is evident that the rate applied for is not unreasonable. The respondent is authorized to put into effect the rates and practices proposed by it. *In re Appl. West Menasha Tel. Co.*, 224, 226.

17. The Commission, on its own motion, investigated the rates, regulations and service of the Eagle Tel. Co., which operates exchanges in Eagle, Mukwonago, Palmyra, Genesee, East Troy, Delafield and La Grange, and which also has rural lines in surrounding territory. It appears that on Dec. 5, 1913, the company filed an amendment to its schedule of rates, discontinuing its former practice of offering a certain amount of free toll service as an inducement for prompt payment, and amending its toll rate so as to fix a lower, but generally applicable charge per call for subscribers; that such amendment was accepted, subject to investigation if it should appear that subscribers had cause for complaint thereunder, and that, after the change became effective, a number of subscribers complained to the Commission. The company has also discontinued a former practice of treating two small exchanges as a single exchange, thus increasing rates for subscribers in the exchange areas affected, and causing a serious inconvenience to subscribers living near the edge of the area served by their exchange and not able to take care of their ordinary local needs with the service of only one exchange. While conditions were not normal during the six months immediately following the discontinuance of the old practice, the revenues from toll business were larger during the six months preceding under the old practice than the six months following under the lower, but generally applicable toll charge. *Held*: That there is no evidence that the former practice was unreasonable, or unjustly discriminatory; that such practice resulted in an adjustment of business and social relations upon a different basis than would otherwise have prevailed, and that the usefulness of the service to subscribers located on the outskirts of exchange areas has been greatly diminished by the new practice; that the old practice should be restored at least until the company sees fit to ask the Commission for approval of some other method of handling the situation; and that some of the confusion under the old practice could be avoided by a rule granting free toll service only when service is paid for in January or July for the period following. The company asked for a ruling on a charge for reconnecting telephones where service had been discontinued at the subscriber's direction. *Held*: A charge for reconnection is reasonable, but should not be applied unless in effect at the time

service was ordered discontinued. Ordered: That the company restore its former practice of a certain number of free toll calls to subscribers paying in advance; that a rule may be adopted making payments as of Jan. 1, or July 1, for a period of six months or a year, a condition precedent to such service, new subscribers to be entitled to a pro rata number of free toll calls upon payment in advance from the date of taking service to the first of January or July following; that the toll rates be restored as they were prior to Jan. 1, 1914; that the company may make a charge of \$2 for reconnection within one year after the discontinuance of service; and that the order take effect Jan. 1, 1915. *In re Invest. Rates & Regulations of Eagle Tel. Co.*, 397, 402.

Reasonableness of rates in particular cases.

18. A rehearing was applied for in the case of *Arena & Ridgeway Tel. Co. v. Troy & Honey Creek Tel. Co. et al.* 1914, 13 W. R. C. R. 763. In that case the respondents were ordered to pay the sum of \$27 per year to the petitioner for the use of the trunk line connecting the Spring Green and Fernan exchanges, and the petitioner was ordered to pay the respondents the sum of \$1 per telephone per year for such telephones as are connected to petitioner's rural lines, which enter the respondents' Spring Green exchange. The respondents contend that the Commission did not arrive at the proper decision and order in the previous case, largely because certain facts which should have been considered were not brought to the attention of the Commission. As regards the trunk line connecting the Spring Green and Fernan exchanges, and the sum to be paid by respondents for its use, respondents apparently argue that petitioner should furnish the trunk line in question without charge for the use of all parties connected with the Spring Green exchange, since in so doing it will be merely offering a fair exchange for the free toll service which its own subscribers can obtain through Spring Green with surrounding villages. *Held*: The argument is not valid. Utilities have a right to make a reasonable charge for toll service when they furnish toll lines. The failure of various companies connected to the Spring Green exchange to make a charge for the use of their through lines places no obligation upon petitioner to furnish its line free of charge. Petitioner is also under no obligation to do so as an incident to receiving switching service at the Spring Green exchange since the matters are essentially different. In the absence of any facts to show that the amount arrived at as proper compensation is unreasonable, it must stand. As regards the rate for switching service, it appears that peg counts submitted by respondent did not separate the number of calls passing over the loaded line between the points in question, from those passing over the trunk line; that, aside from that fact, they do not bear out respondents' contention that traffic considered by the Commission, when the traffic study was made, was abnormally light; that if complete expenses of the Spring Green exchange were not before the Commission, the responsibility therefore rested upon respondents; that the total expense reached by the Commission through estimates and actual expenses was in fact somewhat in excess of the total actual expenses; and that the rate for general switching service to the heavily loaded lines connected to the Spring Green exchange is not properly comparable to the switching rate for the trunk service involved. *Held*: Under the circumstances the establishment of a different rate has not been justified. Respondents request that in case it is found that petitioner should receive payment for the use of its through line, the Commission establish a toll rate. *Held*: No necessity for such a rate has been shown. Should it subsequently seem necessary, the matter can be considered upon proper application. It is ordered that the previous order be affirmed except that a minimum switching charge of \$25 per

year to petitioner be made, it appearing that the number of subscribers to whom the switching rate in the former order applied is slightly smaller than supposed. *Arena & R. Tel. Co. et al. v. Troy & H. C. Tel. Co.*, 315, 322.

19. Complaint was made that the rate paid for telephone service on respondent's Onalaska rural lines is excessive, that the service on one of the lines is insufficient, and that respondent refuses to install any telephone, save a pay telephone similar to those located in other business places, in the hardware store of the Onalaska Hardware Co. The rural rate complained of is \$1.50 per month, and the complaint originated upon a line purchased by respondent from another company upon which the rate up to the time of purchase was \$1.25, when it was raised to \$1.50 to conform to respondent's existing schedule. Onalaska rural subscribers receive free service to La Crosse as well as to Onalaska. *Held*: That observation has shown that a good quality of service to rural subscribers can seldom be furnished at less than \$1.25 per month; that when free exchange service is furnished to a large number of subscribers, \$1.50 per month is not usually unreasonable, and that in the present case, considering the service to which a subscriber is entitled, the rate of \$1.50 per month is not thought unreasonable and should remain; that the only solution appears to be an alternative or optional monthly rate of \$1.25 per phone for Onalaska service with a toll charge of 5 cts. for all calls into La Crosse, and a corresponding toll charge for La Crosse subscribers calling Onalaska rural lines having this form of service, such schedule to be adopted by a majority vote of the subscribers on any one line, and, when so elected, to stand as an election for the ensuing six months; and that, while such an election might seem an imposition upon minority subscribers, whose business demands frequent calls to La Crosse on such a rural line as those involved, the service which gives the greatest benefit to the greatest number should prevail. *Order*: That respondent put into effect an optional rate for rural subscribers on its Onalaska exchange with toll charge for each completed call to La Crosse, the rate to be \$15.00 per phone per year, the toll rate to be 5 cts. per message; that the rate go into effect at the election of a majority of the subscribers on any rural line; that the service be limited in such case to Onalaska local and rural connections; that respondent charge La Crosse subscribers 5 cts. per completed call for each call terminating at rural phones having limited Onalaska service, and that the election in question may be made at the beginning of any quarter, to be effective for at least two quarters thereafter, when it may in the same manner be abrogated; that the complaint regarding rural Onalaska service be dismissed; that respondent abolish pay stations in business places in Onalaska except when such subscribers especially desire their retention or installation; that respondent construct and maintain one additional trunk line between Onalaska and La Crosse, and that the order be complied with not later than April 1, 1915. *Coady et al. v. La Crosse Tel. Co.*, 831, 839.

20. Complaint was made by twenty-five residents of the village of Fontana that respondent's charges for service in Fontana are inequitable as compared with those for service in Walworth, and the request was made that the charges be either reduced or equalized. The request was also made that the present charge of 10 cts. per five minute message to nonsubscribers be reduced, and that a pay station be established at Fontana, and at what is known as "The Head of the Lakes." It appears that Fontana receives its service through the Walworth exchange, from which it is approximately $2\frac{1}{4}$ miles distant, and that the respondent furnishes party line rural and suburban telephone service of a much higher quality than that usually furnished by telephone companies in the state, having equipped all its party lines with

secret service equipment. The business rate, on its face disproportionately higher than the rate for residence service, is not bringing in revenues materially in excess of the cost of furnishing the service. As regards the matter of establishing pay stations at the points requested, it appears that no application to that effect has been made to respondent and that respondent would be willing to make arrangements with anyone who would look after the instrument and make the collections on a percentage basis. *Held*: That, due consideration being given to the superior character of the service in the present case and to the distance of Fontana from Walworth, with consequently higher initial and maintenance cost of lines, the Fontana residence rates cannot be considered unduly high or inequitable as compared with those in Walworth; that, for the present at least, the rate for business service is not unreasonably high, and that, in fairness to the regular subscribers, the charge to nonsubscribers of 10 cts. per five minute message for the use of subscribers' telephones cannot be regarded as unreasonable. The petition is dismissed. *Dorm et al. v. Walworth Tel. Co.*, 412, 415.

21. Inasmuch as a considerable time may elapse before the data necessary for a determination of the question of the reasonableness of respondent's rates can be gathered and passed upon, it is deemed advisable to render a decision at this time with reference to the service questions involved in the complaint. Our decision in the rate matters herein will therefore be held in abeyance. *Pospichal et al. v. Muscoda Mutual Tel. Co.*, 578, 580.

Reasonableness of rates in particular cases—Bridged Telephone service.

22. The Commission, on its own motion, investigated the bridged telephone service at Princeton. Complaint was made that the Wis. Tel. Co. now charges single party rates for the two party line service for one subscriber which it formerly furnished by bridging at the central office; that the company should not be allowed to discontinue the former service, which the agent of the company had voluntarily offered as an inducement to secure patronage, and that the present practice is discriminatory, as certain subscribers have their business and residence telephones on the same circuit and pay two-party rates. It appears that the bridging of circuits at the central office makes it possible for a business man to have his office telephone connected with the instrument at his residence, thus enabling him to answer calls made to his office at his home or vice versa, but that from the point of view of the cost of service two circuits bridged at the central office are substantially similar to two unconnected single party lines, and that, as regards the alleged discrimination, the practice has been to accommodate patrons by placing their two instruments on the same circuit, if they so desire, whenever the location of the station makes such an arrangement possible. *Held*: That the existing classification of service is not discriminatory; that when two separate telephone circuits are bridged at the central office, they should be considered as two separate units, and that, if a patron's office and home are so located that it is feasible to connect them on a single two-party circuit, such action on the part of the company should not be regarded as discrimination, provided other subscribers similarly situated with reference to the distributing points of the cable distributing system are furnished the same service upon request. However, the company should take vigorous steps to prevent the repetition of the practice apparently indulged in by the local office in the present case, of soliciting patronage by making representations contrary to the provisions of the written contracts for service. *In re Invest. Bridged Tel. Service at Princeton*, 475, 478.

Reconnection charge.

23. The company may adopt a rule providing for a charge of \$2.00 for reconnecting a telephone for the same subscriber upon the same premises within one year after service has been discontinued, but this rule shall not take effect until the time specified for the general application of this order. *In re Invest. Rates and Regulations of Eagle Tel. Co.*, 397, 402.

Removal charge.

See also *ante*, 16.

24. The company pays the initial expense of installation. The subscriber must pay the expense of any subsequent change in the location of the telephone instrument. *In re Appl. Clark County Tel. Co. to Increase Rates*, 822, 825.

Rural service rates.

See *ante*, 11, 19.

Switching rates.

See *ante*, 11, 12, 18.

Toll rates.

See also *ante*, 18, 19; *post*, 28.

25. A toll rate should be specified for calls sent by a subscriber between exchanges owned by the company when such subscriber has not contracted for unlimited service over all exchanges owned by the company. A charge of 5 cts. per call is suggested as reasonable for such service. *In re Appl. New Lisbon Tel. Co.*, 280, 283.

26. The Wis. Tel. Co., relative to the question of joint tolls and their division, proposed that the subscriber of one company wishing the service of the other should pay a charge of \$6.00 per year for the right to obtain such service, and, in addition, the regular toll charge of the connecting company, and, in addition thereto, if a subscriber of the La Crosse Tel. Co., a charge of 15 cts. for each message sent or received over the Wis. Tel. Co.'s lines. *Held*: The proposition is unreasonable. The charges suggested would be prohibitive of the services proposed and defeat the very purpose of the statute. The legislature primarily contemplated continuity of service over two or more systems, wherever the same could be established advantageously to all parties concerned, and not that the public desiring the facilities of two telephone companies should be indirectly required to become subscribers to each. No reason is seen for changing the conclusion reached in the original decision that the interests of the utilities, after connection, may be preserved through an additional charge to be paid by the patrons of either company using the toll lines of the connecting company. However, under the conditions in this state the arbitrary to be exacted should not be a uniform charge, but should be graduated on a zone basis. It is ordered that each subscriber of either company desiring service over the toll lines of the other company shall be charged for each message, in addition to the connecting company's regular charge, for all distances not over 50 miles, 5 cts.; for all distances over 50 miles and not over 100 miles, 10 cts.; and for all distances over 100 miles, 15 cts. Distances are to be measured by air line from the office of the connecting company. Neither company is to absorb the additional charge, but each is to collect the charge in question from its subscriber, and pay to the other the long distance tariff toll plus such additional charge. If the foregoing division of tolls, after a fair trial, is found to be inequitable, and the companies cannot agree upon a

proper division, the Commission will by supplemental order establish such division. Ten days is deemed a reasonable time for compliance with the order. *Winter v. La Crosse Tel. Co. et al.*, 36, 39-42.

Toll rates—Adjustment of toll rates and division of tolls.

27. The Commission, on its own motion, investigated the toll rate and division of tolls on the line connecting the H. A. Price Tel. Co. at Markesan with the Kingston Tel. Co. at Kingston. It appears that on about Aug. 1, 1913, the H. A. Price Tel. Co. attempted to put into effect a 15 ct. toll charge to its subscribers in lieu of the unlimited service previously available at flat rates; that it attempted to persuade the Kingston Tel. Co. to make a like charge to its subscribers, failing in which it threatened to collect the toll charge in question from the Kingston Tel. Co.'s subscribers as well as its own, and that, following the protests resulting from this action, the Price company further threatened to discontinue the use of the line entirely, claiming that the Wis. Tel. Co. was already furnishing adequate toll line facilities between the villages involved, and that the line in question was needed for rural service. It also appears that up to the action of the H. A. Price Tel. Co. unlimited service over the toll line at a flat rate of 50 cts. per year in addition to the regular rate was available to subscribers of that company, and at no extra charge to subscribers of the Markesan Tel. Co. The length of the line in question is approximately 8 miles, of which the H. A. Price Tel. Co. owns $2\frac{1}{2}$ miles, and the Kingston Tel. Co. $5\frac{1}{2}$ miles. The H. A. Price Tel. Co. has lines extending in every direction into the rural territory from Markesan, and operates an exchange to which about 450 telephones are connected. The Kingston Tel. Co. operates a system in and around the village of Kingston, and serves about 275 subscribers. It was contended that unlimited service over the line at a flat rate should be continued, inasmuch as many subscribers of the Kingston Tel. Co. live within marketing distance of Markesan, and need and use the unlimited service to the Markesan exchange. It was also urged that to deprive these subscribers of the service in question would result in loss of business to the business men of Markesan, and would decrease the value of the total service to the subscribers affected, and it was stated by the business men of Markesan that they would prefer to pay a somewhat higher flat rate charge per year than submit to a toll charge per call. *Held:* That in view of the nearness of the two exchanges, and the interlocking of the lines of the two companies, the position of subscribers in demanding a flat rate charge for the use of the line in question is well taken, and that, under the circumstances of the present case, to impose a toll charge upon calls with no flat rate alternative would be unfair. A valuation of the toll line in question was made, and the values apportioned between the two companies. The cost of the service, in the absence of accurate data, was ascertained through consideration of expenses of other companies. The cost to each company will be nearly the same, the higher physical investment of the Kingston Tel. Co. in the toll line being offset by the larger central office expense of the H. A. Price Tel. Co., and from a study of the traffic over the line in question it appears probable that, with the same charge in effect at both ends of the line, the average traffic would be about the same in both directions. *Held:* That the present rate will not cover the cost of service. A flat rate of \$2 per phone per year with an alternative of a toll rate of 10 cts. per message is considered reasonable. It is ordered that the H. A. Price Tel. Co. and the Kingston Tel. Co. substitute for the present rates in effect over the toll line in question, an optional charge of \$2 per phone per year above the regular rental charge, or a toll charge of 10 cts. per message; that all messages be limited to five minutes; that election by subscribers of both companies of the flat

rate he made one year in advance; that each company furnish the other and keep at its own exchange up-to-date lists of its subscribers electing the flat rate, and that the total revenue from the line arising from the imposition of both rates be divided equally between the two companies until both agree to some other basis of division. *In re Tel. Toll Rates Markesan to Kingston*, 288-293.

Toll rates—Adjustment of toll rates subsequent to physical connection.

28. Application was made by the New Union Tel. Co. for authority to retain all tolls collected at its end of a toll line between Dodgeville and Mineral Point, and to collect from the Mineral Point Tel. Co. 75 per cent of all tolls on business originating on the Mineral Point end of the line. The New Union Tel. Co., a public utility operating a telephone system in the city of Dodgeville and in Iowa county, operates the toll line in question which extends to the northern limits of the city of Mineral Point, where it connects with the system of the Mineral Point Tel. Co. A valuation of this toll line by the Commission as of July 30, 1914, showed, as to the portion owned by the Mineral Point Tel. Co., a cost new of \$64 and a present value of \$34, and, as to the portion owned by the New Union Tel. Co., a cost new of \$714 and a present value of \$470. The applicant alleged that the Mineral Point Tel. Co. contributed nothing towards the expense of maintaining the toll line and that a division of the tolls by which each company retained the total amount collected at its end of the toll line was unreasonable and unjust. The revenues accruing to the two companies from the business over the toll line in question were considered. It appeared that, as the business has been conducted, the Mineral Point Tel. Co., in keeping all revenues from business originating at Mineral Point, has secured an amount equal to practically 50 per cent of the revenues from both incoming and outgoing messages, and that, in order for the New Union Tel. Co. to earn an amount sufficient to pay interest, maintenance, and depreciation charges on its excess investment, and divide the remainder of the revenues equally between the two companies, the Mineral Point Tel. Co. should retain 35 per cent of the revenues from both incoming and outgoing business. The Mineral Point Tel. Co. contended, however, that, since it had a larger exchange than the New Union Tel. Co., the service it furnished was more valuable than that furnished by the latter company and thus offset the additional service furnished by that company in owning and maintaining the toll line. *Held*: The argument that, because Mineral Point has more subscribers than Dodgeville, the service furnished at Mineral Point is of more value, is unsound. Although Mineral Point offers a larger number of possible connections than Dodgeville, those offered by Dodgeville are available to the entire Mineral Point exchange, so that the only proper basis for computing the reasonable division of tolls is to consider the toll system as a system without reference to the size of the exchange at either end. Under the circumstances of the present case it is considered reasonable to permit the New Union Tel. Co. to earn a sufficient amount to reimburse itself for the interest, maintenance, and depreciation burden on its additional investment, the remainder of the revenue to be divided equally between the two companies. The division of tolls requested by the New Union Tel. Co., however, would give that company a larger proportion of the revenues than is necessary to accomplish that purpose. It is ordered that the revenues from toll service over the toll line of the New Union Tel. Co. between Mineral Point and Dodgeville shall be so divided that the Mineral Point Tel. Co. shall retain 35 per cent and the New Union Tel. Co. 65 per cent of the reve-

nues from both incoming and outgoing messages, the order to take effect and be in force Sept. 1, 1914. *In re Appl. New Union Tel. Co.*, 60, 65.

29. The question of charges which each company is entitled to for the use of its lines by the subscribers of the other company was the difficulty under the order in question, the companies conceding that the connection could be made without difficulty. *Held*: That, while cost of the service is one of the primary considerations in determining the reasonableness of a charge, it is never the sole consideration. In the present case, any charge which would result in taking business from one company and giving it to its competitor could not be regarded as just. Under all the circumstances, five cents is considered adequate compensation for local service, such being the usual charge for such service at toll stations. As regards the question of toll charges, the rule laid down in the case of *Winter v. La Crosse Tel. Co. et al.* 15 W. R. C. R. 36, should control in the instant case. It is ordered that each subscriber or patron of either company desiring service over the toll lines of the other company shall be charged for each message, in addition to that company's regular charge, as follows: For all distances not over 50 miles from the originating company's office, five cents; for all distances over 50 and not over 100 miles from such office, ten cents; and for all distances over 100 miles, fifteen cents. All distances are to be measured by air line. The charge for local or rural service to local or rural patrons is to be five cents. Neither company is to absorb the additional charges herein, but each company is to collect the additional charge for local service and for toll service from its subscribers, and is to be liable therefor to the other company to whom it is to pay the same. The order is necessarily experimental, and if it appear, after a fair trial, that its terms operate inequitably, it will be modified to obviate injustice to any of the parties. *McGowan v. Rock County Tel. Co. et al.*, 378, 382.

Toll rates—Division of, between connecting companies.

See ante, 27.

RATES—WATER.

Fire protection rates.

1. As regards the question of fire protection, the correct principle is that the two classes of service furnished by water utilities, i. e. fire protection service and general service, are coördinate, and that each, as far as possible, should be self-supporting. In justice to all classes of consumers the city should pay for fire protection service, and in the present case \$10,000 is a conservative amount to pay for such service. *In re Appl. Kenosha Mun. W. Ptt.*, 426, 430-431.

2. Application was made by the city of Manitowoc for authority to put into effect such rates for private hydrants or standpipes on private premises, and for hose connections inside buildings to be used only in case of fire, as the Commission shall deem just; and a minimum charge for all sprinkler service of \$20 per year, and a further minimum of 5 cents additional for each sprinkler head in excess of 400 maintained by one patron, or, in lieu thereof, such rates as the Commission may deem just. As regards the rates for different types of fire protection,

it seems that when the city took over the water utility there were certain deviations from the schedule, and that a definite schedule is now desired in order to avoid confusion regarding a proper basis of charging. *Held*: That the sprinkler system rates proposed by the city are reasonable and are authorized; that, under the circumstances of the present case, where the private hydrants may be properly assumed to have been installed at the expense of private parties, a rate of \$30 per hydrant per year is reasonable and is authorized; and that the present general rate of \$40 per year for two-inch standpipes and \$60 for four-inch is not uniform, but that rates of \$30 and \$60, respectively, are reasonable and are authorized. *In re Appl. City of Manitowoc as El. & Water Utility*, 212, 216.

Fire protection rates—Private—Hydrants.

3. With regard to private hydrants, it may be said that there are a great many factors which influence the proper charge for this service. In cases where the cities are paying their full share of the cost of operating the utility, that is, where the cities are paying the full cost of fire protection, there may be very little justification for any charge for private hydrants based on any cost analysis. This, of course, cannot be made as a general rule, because of differences of conditions in various cities. *In re Appl. City of Manitowoc as El. & Water Utility*, 212, 215.

Fire protection rates—Private—Standpipes.

4. It should be said in connection with the rates for private fire protection that the reasonableness of such rates is hard to measure on a cost basis. Some water works men even go so far as to say that no charges should be made for any of these services, on the theory that the total fire risk of the city is decreased by the installation of private fire protection. Where the policy of the city, however, is not to bear the full cost of fire protection, it can hardly be expected that the utility is to furnish private fire protection free of charge, and the rates which will be authorized in this case represent the Commission's view of what will be reasonable rates for this service in Manitowoc. *In re Appl. City of Manitowoc as El. & Water Utility*, 212, 215, 216.

Making rates—Elements considered—Cost of service—Depreciation.

5. Depreciation as usual has been figured on the cost new, which in this instance is taken to be the amounts shown in the property accounts. The rates of depreciation used in this instance are 5 per cent for the electric plant and 1 per cent for the water plant. *In re Invest. Waterloo Mun. W. & El. Plant*, 534, 540.

Making rates—Elements considered—Cost of service—Taxes.

6. In order to maintain an equitable relation between taxpayers and consumers, taxes have also been included in the cost at the rate of 1 per cent. *In re Invest. Waterloo Mun. W. & El. Plant*, 534, 540.

Making rates—Elements considered—Development and retention of business.

7. It must be remembered that a number of concerns which might naturally be expected to be large users of water from the utility's mains are furnishing their own water supply, and any material increase in the rates must be made with consideration given to the possibility that some of the larger consumers find the rate prohibitive. *In re Appl. Green Bay Water Co.*, 84, 90.

Making rates—Elements considered—Methods of financing utility.

8. If it were not for the fact that the city has no other means available of financing improvements in its water plant except such as are dependent upon the earnings of the utility itself, it might not be necessary to authorize any increase in revenues at this time. *In re Appl. Kenosha Mun. W. Plt.*, 426, 429.

Reasonableness of advance in rates in particular cases.

9. Application was made by the Green Bay Water Co. for authority to readjust rates, so as to enable it to receive a 7 per cent return upon its investment. The order of Jan. 6, 1913 (*City of Green Bay v. Green Bay W. Co.* 11 W. R. C. R. 236), which established the schedule of meter rates now in force, was necessarily based on an estimate as to what the use of metered water would amount to in Green Bay, since only a small portion of the consumers were supplied on a meter basis. The utility's experience, after the installation of meters, indicated that the use of water was considerably less than the estimate of the Commission, and the revenues from the sale of water consequently smaller than the estimated revenues. The value of the property, for the purpose of this case, was tentatively fixed as approximately \$770,000, as of July 1, 1914. The revenues and expenses were investigated, and revenues and schedules necessary to afford a 6, 6½ and 7 per cent return were arrived at and considered. It appeared that metering was practically completed during July 1914, and that during the last quarter of the fiscal year 1913-1914 there were 757 register numbers billed at flat rates, and 3,505 metered consumers, exclusive of certain large users whose meters are read monthly. An estimate was therefore necessary as to the amount of water which would be sold through the 757 services for which there was no record of metered consumption. It seemed fair to assume that the average consumption through the foregoing unmetered services would be approximately the same as that through those metered, excepting from the latter, as noted, certain large users. It is noted that any material increase in rates must be made with due consideration of the possibility that some of the larger consumers may find the rate prohibitive. *Held*: Some increase in rates should be permitted. The increase, however, should not be as large as asked by the utility. An increase averaging about 5 cts. per 100 cubic feet of water sold is considered reasonable. The applicant is authorized to discontinue its present schedule of rates and substitute therefor the schedule of rates proposed by the Commission. *In re Appl. Green Bay Water Co.*, 84, 91.

10. Application was made by the city of Kenosha as a water utility to increase its rates in order to provide for needed extensions and changes, and to furnish the improved service demanded. It appears that the present water works system requires enlargement and improvement; that a proposal to issue bonds to finance such changes was defeated at the last election; that the city has been paying nothing for fire protection, but that the council of the city recently sanctioned the imposition in the future of a charge not to exceed \$10,000 per year for rental of fire hydrants, such rental to be paid by general taxation; that the improvements contemplated would cost from \$150,000 to \$200,000, and that the present revenues may be substantially increased without yielding an excessive return on the probable value of the plant. *Held*: That the need for a greater supply of water and for purer water cannot be overlooked; that no other method of financing the improvements necessary than by a general bettering of the credit of the utility appears possible; that the revenues should be increased approximately \$10,000 per year to effect the desired ends; that as re-

gards the question of fire protection, the correct principle is that the two classes of service furnished by water utilities, i. e. fire protection service and general service, are coördinate, and that each, as far as possible, should be self-supporting; that in justice to all classes of consumers the city should pay for fire protection service, and that in the present case \$10,000 is a conservative amount to pay for such service. Ordered: That the rates for general water service in the city of Kenosha stand unchanged, and that the city pay its water department \$10,000 per year for fire protection. *In re Appl. Kenosha Mun. W. Plt.*, 426, 432.

11. Application was made by the Park Falls Mun. W. Wks. for authority to adjust its rate schedule, on the ground that its present schedule is not uniform or equitable. It appears that the schedule applied for, unlike the one now in effect, does not contain regressive and discriminatory features, provides for a uniform charge for tapping mains and laying service pipes, and definitely states matters which are not made clear in the present schedule. It also appears that the schedule asked for will not materially affect the revenues of the utility from general service. *Held*: The schedule applied for is much more desirable than the one at present in effect. The respondent is authorized to put into effect the schedule proposed. *In re Appl. Park Falls Municipal Water Works*, 284, 285.

Reasonableness of rates in particular cases.

12. The petitioner asks that an order establishing a schedule of rates, rules and regulations for the Janesville W. Co. which was issued in this matter on Aug. 17, 1911 (7 W. R. C. R. 628), but subsequently suspended, be put into effect. The suspension of the order was originally authorized by the Commission upon application by the water company for a rehearing and was continued with the approval of both parties to the case, pending action before the Commission and subsequent action in circuit court involving the proceedings instituted by the city of Janesville for the acquisition of the property of the water company. The city now insists, however, that inasmuch as it will be impossible for the just compensation for the property to be determined and possession given to the city prior to Oct. 1, 1914, the order of Aug. 17, 1911, be put into effect on that date. *Held*: There has been no change in the situation which would justify any modification of the order in question. It is ordered that the order become effective on Oct. 1, 1914. *City of Janesville v. Janesville W. Co.* 117, 120.

13. With respect to water rates the petitioners complained that no proper charge is made for water used for street sprinkling and that water used for construction purposes is furnished free. Because of the lack of sufficient record information and the fact that the business of the utility is not yet fully developed, it seems inadvisable to attempt a reconstruction of the rate schedule for general service. The investigation in the matter of water rates is therefore confined to the questions of the proper charge to make to the village for fire protection and the rates for water used for street sprinkling and for construction purposes. The value of the property of the water utility was determined from the records of the utility and a computation of depreciation upon the 4 per cent sinking fund basis and a life of about 50 years; the value so ascertained was apportioned between fire and general service; and the expenses were investigated and apportioned between fire and general service. *Held*: (1) At least \$1,500 should be paid by the village for fire protection each year. (2) The rates for water used for street sprinkling and for construction purposes should be revised. The village of Waterloo is ordered to discontinue its present schedules of electric and water rates and put into effect rates

prescribed by the Commission. *In re Invest. Waterloo Mun. W. & El. Plant*, 534, 551.

Street sprinkling rates.

14. The rate for street sprinkling shall be 10 cts. per 1,000 gallons. Unless the sprinkling wagon is metered, it will be necessary to determine its capacity and keep a record of the number of tanks filled. *In re Invest. Waterloo Mun. W. & El. Plant*, 534, 551.

Tapping mains, charge for.

15. A charge of \$5.00 is made for tapping mains. The city furnishes all connections for making the tap and all pipe for delivering the water from the mains to the customer's lot line; provided, however, that not more than 100 feet of service pipe will be furnished to any one consumer. *In re Appl. Park Falls Municipal Water Works*, 284, 285.

REMOVAL CHARGES.

Charge made for moving subscriber's telephone within his house, and from one building to another, see RATES-TELEPHONE, 16, 24.

REPARATION.**REFUNDS.**

Refusal to make refund ordered by the Commission.

1. The Commission, on its own motion, investigated the refusal of the respondent named in the title to make the refund authorized in the case *Waukesha Lime & Stone Co. v. C. & N. W. R. Co. et al.* 1913, 13 W. R. C. R. 368. The rehearing was called for the purpose of developing the full facts as to respondent's refusal, and to put all the facts fully before the Commission, so that any defect found in the original proceedings could be remedied. The respondent alleged: (1) that the rates and charges as ordered by the Commission in *Waukesha Lime & Stone Co. v. C. M. & St. P. R. Co. et al.* 1912, 9 W. R. C. R. 87 and 347, did not justify the findings of the Commission in the original case; (2) that the findings of the Commission in the original case did not show a situation that warranted the authorization of a refund; and (3) that there was no evidence tending to show that petitioner sustained any damage. The findings of the Commission in the original case were to the effect that the 1912 orders (*supra*) established the marked capacity of car as the minimum weight. It appears that, as a matter of fact, the foregoing orders did not specify the minimum weight, but provided that the minimum weight then in force should apply in connection with the rates ordered. On the dates in question there were dual sets of like distance rates on stone between points on the respondent's line, with one of which the minimum weight applicable was 90 per cent of the marked capacity of the car, and with the other the marked capacity itself. The minimum weight in force at the time in question from and to the points involved in the original case, was 90 per cent of the marked capacity of the car, and the petitioner suffered an actual loss through the tariff making the marked capacity of the car apply as minimum weight instead of the former minimum weight of 90 per cent. *Held*: That as the minimum weight in force from and to the points involved at the time the orders in question (*Waukesha Lime & Stone Co. v. C. M. & St. P. R. Co. et al.* 1912, 9 W. R. C. R. 87 and 347) went into effect was 90 per cent of the marked capacity of the car, the publication of the marked capacity of the car as the minimum weight was not a

compliance with the orders in question, and that there is no reason why the original order should not stand, the conflict between the findings and the facts in that case having been due to dual sets of like distance rates on stone with different minimum weights. *Waukesha Lime & Stone Co. v. C. & N. W. R. Co. et al.*, 479, 481.

Refund from charges based on minimum weight of cars furnished at the convenience of the carrier instead of the minimum weight of the cars ordered by the shipper.

2. Complaint was made that the respondent furnished petitioner two cars of a capacity in excess of those ordered by it, and charged it on the basis of the capacity of the cars furnished, wherefore petitioner seeks refund of the additional charges thereby caused. *Held*: That when a railroad company, for its own convenience or because of necessity, furnishes a car of greater capacity than that ordered by the shipper, its charges cannot exceed those based upon the capacity of the car actually ordered. The respondent is ordered to refund the additional charges. *Colby Cheese Box & Silo Co. v. M. St. P. & S. S. M. R. Co.*, 469, 470.

3. The petitioner alleges that the charge exacted by the respondent for the transportation of a shipment of rye from Nekoosa to Janesville and thence, as a reshipment, to Milwaukee, was excessive and asks for refund. The petitioner requested the respondent to furnish him a small car but was compelled to use a car of a capacity of 75,000 lb., although the actual weight of the shipment was 42,170 lb., and to pay charges on the basis of this capacity for the movement from Nekoosa to Janesville and the subsequent movement from Janesville to Milwaukee. The petitioner contends that he should have been charged only the full rate from Nekoosa to Milwaukee, plus \$2.00 charges for reshipment from Janesville, and that he should have been charged the rate upon the actual weight of the shipment instead of upon the car capacity. *Held*: (1) The claim of the petitioner for reparation on the basis of the through rate from Nekoosa to Milwaukee cannot be granted, for the reconsignment of a shipment by the original consigner on a through rate plus a small additional charge, is allowed only where the point of diversion and reshipment is on the direct or authorized route between the initial shipping point and the final receiving point. (2) The claim of the petitioner for reparation upon the basis of the actual weight of the shipment is justified. The respondent is ordered to refund to the petitioner the difference between the sum paid by the petitioner to the respondent and the sum which should have been paid at the tariff rates upon the actual weight of the shipment. *Stevens v. C. & N. W. R. Co.*, 524, 526.

Refund from charge based on minimum weight which cannot be loaded.

See post, 6.

Refund from charge based on minimum weight which could not be loaded and which was subsequently lowered.

4. The petitioner alleges that the charges exacted by the respondent for the transportation of certain carload shipments of bolts from various points in Wisconsin to Oshkosh and Menasha were excessive, for the reason that they were assessed on the basis of minimum weights which were greater than the carrying capacity of the cars in which the shipments were made, and asks for refund on the basis of charges calculated upon the actual weight with a minimum loading require-

ment of 35,000 lb. Since the shipments moved the respondent has established the loading requirement mentioned for shipments loaded in box or stock cars to the full visible capacity. The respondent is willing to make refund. *Held*: The charges exacted were unusual and exorbitant. The reasonable charges are those since established by the respondent. Refund is ordered upon this basis. *Oshkosh Excelsior Mfg. Co. v. M. & S. S. M. R. Co.*, 178, 179.

Refund from excess charge caused by failure to protect an intermediate point in a rate which was subsequently extended to cover such point.

5. Complaint was made of excess charges on two cars of wooden bolts shipped over respondent's line from Beaver Spur to Washburn, Wis. It appears that a rate of 5½ cts. per cwt. was exacted, and that at the time the shipment moved a rate of 2.6 cts. per cwt. was in effect on bolts in carload lots from Earl to Washburn, Wis., and from Beaver Spur to Bayfield, Wis. Beaver Spur is intermediate to Earl, and Washburn is intermediate to Bayfield. Refund is asked on the basis of a rate of 2.6 cts. per cwt. *Held*: The rate exacted was excessive. A reasonable rate would have been 2.6 cts. per cwt. Refund on that basis. *Kenfield-Lamoreaux Co. v. C. St. P. M. & O. R. Co.*, 294, 295.

Refund from excess charge based on distance tariff rate instead of a general switching charge.

6. The petitioner alleges: (1) that the rate of 1.35 cts. per cwt. exacted by the respondent for the transportation of certain carload shipments of pulp wood from Robbin's Railway Transfer to Rhinelander, a distance of five miles, was exorbitant and illegal, as the service performed was in the nature of switching service on which the proper charge would have been 1 cent per cwt., subject to a minimum weight of 50,000 lb., and (2) that the charge exacted by the respondent upon the basis of the local distance tariff rate, subject to a minimum weight of 40,000 lb. per carload, for the transportation of certain shipments of pulp wood from Tripoli, McCord and Brantwood to Rhinelander was excessive for the reason that the respondent failed to furnish cars of sufficient size and capacity to carry the minimum weight. *Held*: The charges complained of were unreasonable, unlawful and exorbitant. A charge of 1 ct. for the switching service, and the regular tariff rate upon the actual weight of the shipments moved from Tripoli, McCord and Brantwood would have been reasonable charges. Refund is ordered upon this basis. *Rhinelander Paper Co. v. M. St. P. & S. S. M. R. Co.*, 171, 173.

Refund from excess charge based on distance tariff rate instead of general switching charge subsequently made effective.

7. Complaint was made of excessive charges on two cars of lumber switched for petitioner from Robbins Railway Transfer, near Rhinelander, to the plant of the Rhinelander Refrigerator Co., and refund asked. Petitioner alleges that charges were assessed at the rate of 3 cts. per cwt., though the service performed was of a character usually regarded as switching service and that a proper charge would have been 1 ct. per cwt. Respondent admits the allegations of the petition. *Held*: That the charge exacted of petitioner on the cars of lumber in question was excessive. A reasonable charge would have been 1 ct. per cwt., subject to a minimum loading weight of 50,000 lb. on each car. Refund ordered on that basis. *Mason-Donaldson Lbr. Co. v. M. St. P. & S. S. M. R. Co.*, 388, 389.

Refund from excess charge based on higher rates than those ordered by Commission.

8. Complaint was made of overcharges on certain shipments of saw logs and bolts in carloads, and reparation asked. Petitioners made no effort to show that the rates complained of are unreasonable *per se*, but base their claim on the fact that the rates complained of have been maintained at a somewhat higher level than the schedule prepared by the Commission in the case of *Northern Hemlock & Hardwood Mfrs. Assn. v. C. & N. W. R. Co.* 1913, 12 W. R. C. R. 241. *Held*: That the maintenance of differing schedules of rates by carriers of the same commodity does not necessarily involve unjust discrimination; that it is open to question whether rates for the transportation of logs have not reached as low a point in Wisconsin as justice will permit; that in the case relied upon the Commission's task was the prevention of an unwarranted increase in rates rather than the lowering of the general level of log rates; that the Commission is not warranted in finding that petitioners are suffering from unjust discrimination by reason of the rates complained of, and that before further extensive changes are made in the rates upon the commodity in question, a thorough investigation should be made of the entire field of log transportation in Wisconsin in order that log rates may be equitable between shippers as well as reasonable in themselves. The petition is dismissed. *Barker-Stewart Lbr. Co. et al. v. C. M. & St. P. R. Co.*, 645, 647.

Refund from excess charge based on a lower rate to a more distant point.

See post, 9.

Refund from excess charge based on a rate subsequently held to be reasonable by the Commission.

9. Complaint was made that the rate of 17½ cts. per cwt. on bottles between Milwaukee and La Crosse was excessive, and the Commission was asked to establish a rate of 15 cts. per cwt. for shipments of bottles between the points in question, and to order a refund to the petitioner on twenty-eight carloads of bottles, which petitioners shipped from Milwaukee to La Crosse between Oct. 23, 1912, and Jan. 24, 1914, and on which petitioner paid charges at the rate of 17½ cts. per cwt. It appeared that the 17½ ct. rate had been in force less than a month when the first car of the shipment in question was shipped, and that the net rate on bottles from Milwaukee to Eau Claire—a longer haul by nearly one hundred miles—was and remains 15 cts. per cwt. *Held*: The rate of 17½ cts. is unduly high. A rate of 15 cts. would bring the respondent a generous return. The respondent is ordered to cease exacting a rate in excess of 15 cts. per cwt. on bottles in carload lots between Milwaukee and La Crosse, and to make refund to the petitioner on the shipments in question on the basis of a 15 ct. rate. *John Gund Brewing Co. v. C. M. & St. P. R. Co.*, 82, 83.

10. Complaint was made that the rates charged on lumber from Odanah and from Rhinelander to Milwaukee, Racine and Kenosha are excessive and unreasonable, and that under an explanation clause in the respondent's published tariff the rates charged the petitioner are not only excessive, but illegal, and a reduction in rates was requested and a refund on certain shipments charged the rates complained of. It appears that Ashland and other upper lake ports have a rate of 10 cts. per cwt. to Milwaukee, Racine, Kenosha, and other points in the southern portion of the state; that the specific rates complained of are 12 cts. from Odanah, and 11 cts. from Rhinelander to the southern destinations

named, and that Odanah and Rhinelander are directly intermediate between Ashland and such destinations. The rates from Ashland to the points in question were based entirely on water competition, and had to be granted by the carriers in order to obtain a share of the traffic. It also appears that the construction of the clause in question contended for by petitioner is not in accord with that given it by respondent and acquiesced in by shippers for a number of years. *Held*: That that construction of the clause in question which has been accepted in actual practice for years is justified by the conditions in the present case; that the acceptance by carriers of competitive traffic, provided it can be had at rates that yield something above the additional cost of handling such traffic, and provided further that it does not result in unjust discrimination, is, as a rule, best for all concerned; that the question in the present case is whether the rates charged petitioner are in themselves excessive or unreasonable; that such rates under present conditions are not excessive nor discriminatory, and that the petition must be dismissed. *Mason-Donaldson Ltr. Co. v. C. & N. W. R. Co.*, 575, 577.

Refund from excess charge based on a reasonable rate.

11. Complaint was made that the rates charged petitioner on shipments of peas and beans are excessive. Petitioner is located at Sheboygan and its complaint applies to both carload and less than carload lots, to joint as well as one-line rates, and to both in and out shipments. Petitioner alleges that it has been engaged for a number of years in growing peas in considerable quantities at London, Lake Mills, and a number of other points within the state, some twenty in all. The business is carried on on a contract basis with the farmers, petitioner shipping the seed in, and, later, the crops out, to itself and to the canneries. Petitioner does not keep large stocks on hand in Sheboygan and its products are distinctly live commodities. It appears that petitioner's business has steadily increased for a number of years, but that the rates in question, with one exception, have remained unchanged for several years. The Commission is asked to establish local rates on a commodity basis, insofar as shipments moving entirely over the line of the C. & N. W. Ry. Co. are concerned, to order joint rates between Sheboygan and the points involved, and also to order reparation in such sum as the Commission shall find the charges paid to have been in excess of reasonable charges. *Held*: That, due consideration being given to the cost of the service to the carriers and the commercial conditions affected by the traffic, both the one-line rates and the joint rates charged petitioner are higher than they should be, and that the rates shown in the opinion will more nearly meet the demand for just and reasonable rates. That the greater expansion of business which would follow a moderate reduction would benefit the carriers as well as the score or more of communities named, but that petitioner's steady growth during the period in question leaves little ground upon which to base a claim for a refund, and that the request for reparation must be dismissed. *John H. Allen Seed Co. v. C. & N. W. R. Co. et al.*, 641, 644.

Refund from excess charge based on a reasonable rate effective between same points on a competing line.

12. The petitioner alleges that the rate of 8.3 cts. per cwt. charged by the respondent for the transportation of a carload of slaked lime from Superior to Washburn is exorbitant and prays for refund on the basis of a rate of 5 cts. per cwt., which is in effect on the N. P. Ry. between the points named. *Held*: It would be impossible for the respondent to participate in traffic of the kind here involved upon a rate in excess of that in effect upon the competing line. The rate of 5 cts. is reason-

able and the refund claimed is ordered. *Superior Mfg. Co. v. C. St. P. M. & O. R. Co.*, 160, 161.

Refund from excess charge based on a reasonable rate previously ordered by the Commission.

13. The petitioner alleges that the rate of 6.35 cts. per cwt., exacted by the respondent for the transportation of a shipment of pulverized stone from Waukesha to Merrill was excessive. *Held*: The charge was unlawful. The lawful charge would have been 4.15 cts. per cwt., the rate recommended for such shipments in *Waukesha L. & S. Co. v. M. St. P. & S. S. M. R. Co. et al.* 1914, 13 W. R. C. R. 471, 473. Refund is ordered on this basis. Unless the rates recommended by the Commission in the order cited are put into effect by the respondent it will be necessary to hold a hearing and issue a formal order in the matter. *Fargo v. C. M. & St. P. R. Co.*, 162, 163.

Refund from excess charge based on the sum of the locals instead of through rates.

See also, 3.

14. Complaint was made of excessive charges on a carload of silos shipped over respondents' lines from Vesper, Wis., to La Crosse, Wis. The petitioner alleges that at the time the shipment in question moved there was in effect between the two points, over the line of the C. M. & St. P. Ry. Co., a rate of 7 cts. per cwt. applicable to such shipment, and that a reasonable rate for such shipment is 7 cts. per cwt. The Commission is asked to order refund on that basis and to require the respondents to meet the rate of the C. M. & St. P. Ry. Co. It appears that the distance between the two points is 155 miles over respondents' lines, and only 89 miles over the line of the C. M. & St. P. Ry. Co.; that at the time the shipment moved there was in effect no joint through rate embracing the commodity in question via respondents' lines from Vesper to La Crosse, and that therefore the sum of two locals, or 11.9 cts. per cwt., was applied; that the single line rate for the total distance involved at the time the shipment moved would have been 8½ cts. per cwt.; that subsequent to the shipment respondents provided for the application of their lumber rates to wooden silos; that the application of lumber rates on silos is now in force generally via all lines in Western Trunk Line territory, and that under such application the rate in question would have been 8 cts. per cwt. between Vesper and La Crosse, via respondents' lines, instead of 11.9 cts. *Held*: That there is nothing in the Wisconsin law, or in any order of general application issued by the Commission, which requires competing lines of railroads to meet each other's rates on traffic moving between the same points; that a shipper, who does not ascertain, before making shipment, the rates, conditions, etc. in effect should not expect to escape responsibility for difficulties resulting from his own negligence; that the present rate of 8 cts. per cwt. for the service in question is reasonable, and that a reasonable rate at the time the shipment moved would have been 8½ cts. per cwt. Refund ordered on that basis. *Vesper Wood Mfg. Co. v. G. B. & W. R. Co. et al.*, 442, 445.

Refund from excess charge based on unreasonable minimum weights and charges for excess weight on logs.

15. The petitioner alleges that the minimum weights and the charges for excess weight on logs as applied by the respondent to shipments from various Wisconsin points to Rhinelander are unreasonable and asks for refund on certain shipments. It appears that the petitioner's difficulty in loading within the weight limits prescribed by the

respondent is due not to any defects in the cars but to lack of facilities for ascertaining weights at loading points and that with more care in loading many instances of both overloading and underloading could have been avoided. The charge for excess weight is a safety measure designed to prevent shippers from endangering the respondent's equipment and the lives and limbs of the respondent's employes. The fact that a shipper, through lack of facilities for ascertaining weights, cannot load cars just as he would like to do does not prove the unreasonableness of the rate or the minimum weight applicable. The application of the charge for excess loading to saw logs and bolts only does not constitute unlawful discrimination if dangerous overloading of cars is prevalent only in the case of saw logs and bolts, as the testimony in the instant proceeding appears to show. *Held*: The minimum weights complained of, taken in connection with the rates applying thereto, and the charge for excess loading, when used as a measure of safety to induce shippers not to overload, are not unreasonable. The petition is dismissed. *Brown Bros. Lbr. Co. v. M. St. P. & S. S. M. R. Co.*, 569, 574.

Refund from excess charge based on unreasonable rate.

16. The petitioner alleges that the rate of 8 cts. per cwt. exacted by the respondent for the transportation of certain shipments of lumber from Wausau to Minocqua was exorbitant and asks for refund. The rate in question is part of a group system of rates in force on lumber and sash, doors and blinds and other house trimmings from lumber and manufacturing centers, including Wausau and certain other points in the Wisconsin river valley. Comparison with rates for the transportation of the same commodities between other points within the state indicates that the rate complained of is higher than the average rate for similar or greater distances. Group rates, however, are made as a rule with less regard for distance and transportation than for commercial conditions and the issue in the instant case is not whether other points farther away should have the same rate to Minocqua as Wausau, but whether this rate is of itself unreasonable. *Held*: The rate is unreasonable. A rate of 6 cts. per cwt. would bring the respondent a reasonable return for the service rendered and the respondent is ordered to put it into effect. In view of the fact that the shipments upon which reparation is asked were made at the rate long published and in force, reparation will not be ordered and the petition, insofar as it asks for reparation, is dismissed. *Central Wis. Traffic Bur. v. C. M. & St. P. R. Co.*, 521, 523.

Refund from excess charge ordered on basis of a joint rate established by order of the Commission.

17. Complaint was made that the respondents were demanding exorbitant rates on shipments of saw logs in carloads from Madras to Stevens Point, Wis., and the Commission was requested to fix a reasonable rate for such shipments and to order the respondents to refund all excess charges. It appeared that the distance from Madras to Stevens Point is 30.4 miles, and that from Madras to Junction City, the haul of the "Milwaukee" road, is 19.4 miles. It further appeared that Madras is at the end of a spur of the "Milwaukee" road, and that this spur diverges from the main line of the Wisconsin Valley division of that road at Knowlton, and is eight or nine miles in length. The "Milwaukee" made no proposition in answer to a request for joint rates, but demanded 4½ cts. per cwt. for its haul from Madras to Junction City. The "Milwaukee" contended that an extra crew was required to handle business between Madras and Knowlton and that, should the Commission put in force the distance tariff for a one

line haul with the addition of a $\frac{3}{4}$ ct. arbitrary for the junction transfer, an additional $\frac{3}{4}$ ct. arbitrary should be added for the transfer at Knowlton. The petitioner desired a joint rate about the same as the joint rate obtaining on pulp wood for similar service, presumably because saw logs and pulp wood are similar. With reference to the refund asked, it seems that petitioner, owing to certain circumstances, was obliged to ship logs from Madras to Stevens Point subsequent to the filing of the complaint, but before there could be an order in the premises. *Held*: The rates complained of are unreasonably high. As regards the alleged greater convenience of handling the business on the Madras-Knowlton spur with an extra crew, the cost of handling log traffic on spurs or tap lines is pretty well established, and the fact that for any reason a company might prefer to handle the business in a more expensive way would not warrant the charging of an exorbitant rate. And since the haul of the "Milwaukee" from Madras to Junction City can only be considered as a one line haul, the claim of that company that there should be an additional $\frac{3}{4}$ ct. arbitrary for the transfer at Knowlton is not tenable. On the other hand, the pulp wood rate is too low a rate for the service involved. The similarity between saw logs and pulp wood is no ground, in the present case, for making a similar rate. The pulp wood rates in question were established when the cost per unit for transportation was on the whole somewhat lower than at present, and were also in a measure based on the rates out on the products into which the pulp wood is manufactured, and on many other special conditions surrounding that traffic. A fair rate to all consumers for the saw log traffic involved in this case would be 3.3 cts. per cwt. The respondents are ordered to establish, in place of the present rates, a joint rate on logs from Madras to Stevens Point not to exceed 3.3 cts. per cwt. Should the companies fail to agree upon the division of this joint rate, the Commission will determine the matter. No other change is made in any of the existing rules affecting the traffic involved. The respondents are further ordered to refund to the petitioner the amounts paid by it on all log shipments made after August 1, 1914, in excess of the joint rate established. *John Weck Lbr. Co. v. C. M. & St. P. R. Co. et al.*, 53, 56.

Refund from excess charge ordered on basis of rates for shortest available route.

18. Complaint was made of overcharge on 8 carloads of sugar beets shipped from Honey Creek and Hamilton to Menomonee Falls. The C. M. & St. P. R. Co. denies any overcharge, but the M. St. P. & S. S. M. R. Co., on whose lines the shipments originated, admits the overcharge as claimed. *Ordered*: That respondents refund to the petitioner the amount claimed. *Wisconsin Sugar Co. v. M. St. P. & S. S. M. R. Co. et al.*, 650, 651.

Refund from excess charge ordered on basis of a reasonable rate established by former order of Commission.

19. Complaint was made of overcharges on four carload shipments of sand made at varying times from Portage to Milwaukee. It appears that two of the shipments were made more than two years prior to the filing of the complaint, and that the charges on the other two were in excess of what they would have been, had the rates properly applicable, which were fixed by the Commission in the case of *Waukesha Lime & Stone Co. v. C. M. & St. P. R. Co. et al.* 1912, 9 W. R. C. R. 347, 353, been applied. *Held*: That under sec. 1797—37m only the last two shipments can be considered, and that refund is due on such shipments. Refund ordered on the basis of the rate made ap-

plicable in the former order of the Commission. (9 W. R. C. R. 347, 353.) *Nordberg Mfg. Co. v. C. M. & St. P. R. Co.*, 648, 649.

Refund from excess charge ordered on basis of reasonable rate established by order of the Commission.

20. The petitioner alleges that the rate of 6 cts. per cwt. exacted by the respondent for the transportation of a carload of logs from Grandview to Cumberland was erroneous and asks for refund on the basis of a rate of \$2 per 1000 ft., minimum charge \$10 per car. The question here involved was passed upon in a previous case of the same title (1914, 14 W. R. C. R. 287), and the present claim should have been there included. *Held*: The rate complained of was unusual, illegal and exorbitant. A rate of \$2 per 1000 feet, minimum charge \$10 per car, would have been reasonable and refund is ordered on this basis. *Cumberland Fruit Pkg. Co. v. C. St. P. M. & O. R. Co.*, 158, 159.

Refund from excess charge ordered on basis of reasonable rate subsequently made effective.

21. The petitioner alleges that the rate of 2 cts. per cwt. charged by the respondent for the transportation of mill refuse, commonly known as "hog fuel", in carload lots from the petitioner's mill in Grand Rapids to the Consolidated Water Power & Paper Co's plant in the same city and to Port Edwards is unreasonable and asks that a reasonable charge be established and that refund be ordered on certain shipments. Since these shipments moved the respondent has reduced the rate in question to 1 ct. per cwt. and the petitioner accepts the new rate as satisfactory and asks merely for refund. *Held*: In view of the low price of the commodity carried, the high minimum loading requirements and the short haul involved, the rate exacted was clearly excessive. Inasmuch as the respondent by its own action in reducing its rates has acknowledged a rate of 1 ct. per cwt. to be a reasonable rate, and inasmuch as the petitioner has expressed himself as satisfied with this rate, refund is ordered upon this basis without determining the reasonableness, in and of itself, of the new rate. *Ellis Lbr. Co. v. C. M. & St. P. R. Co.*, 527, 529.

22. The petitioner alleges that the rate of 2¼ cts. per cwt., exacted by the respondent for the transportation of certain carload shipments of burnt sand from Milwaukee to Horicon, was unusual and exorbitant and asks for refund upon the basis of a rate of 50 cts. per gross ton made effective for burnt sand after the shipments in question moved. The rate charged was the rate for sand and was applied in the absence of a tariff provision for burnt sand. *Held*: The rate exacted was exorbitant. Burnt sand, being a commodity of low value, cannot be moved except at a very low rate. The reasonable charge would have been 50 cts. per gross ton and refund is ordered upon this basis. *International Harvester Corp. v. C. M. & St. P. R. Co.*, 164, 165.

23. Complaint was made of excess charges on 21 carloads of saw logs shipped from Brown's Spur, Wis., to petitioner's mill at Peshtigo, Wis., and refund asked. It appears that at the time the shipments moved there was no rate applicable to logs moving between the points mentioned, and that consequently the respondent was obliged to apply its lumber tariff to the shipments in question. The respondent, upon learning of these shipments, published a tariff providing for such shipments, but that tariff did not become legally effective until ten days after the last shipments here involved were made. *Held*: The charge of 7½ cts. per cwt. on the shipments in question from Brown's Spur to Bagley Junction was exorbitant. A reasonable charge for

such services would have been a rate of 1.8 cts. per cwt., as provided in respondent's present tariff, plus a \$3.00 switching charge from Bagley Junction to Peshtigo. Refund on that basis. *Peshtigo Lbr. Co. v. C. M. & St. P. R. Co.*, 43, 44.

24. Complaint was made of excess charges on three carloads of lumber shipped from Cotten to Rhinelander, Wis., for manufacture and reshipment at that point. It was alleged that a reasonable rate for such shipments to be manufactured and reshipped would have been 6½ cts., the rate subsequently put into effect by respondent. Refund is asked on that basis. *Held*: That the rate exacted was exorbitant and out of line with the rates generally applicable to shipments like the ones in question. A reasonable rate is 6½ cts. per cwt. Refund ordered on that basis. *Pierce v. M. St. P. & S. S. M. R. Co. et al.*, 473, 474.

Refunds ordered on specific shipments.

Refund on shipment of beets, *see ante*, 18.

of bolts, *see ante*, 4, 5.

of bottles, *see ante*, 9.

of burnt sand, *see ante*, 22.

of "hog fuel," *see ante*, 21.

RESERVES.

Depreciation reserve charge, *see* DEPRECIATION, 2.

RESHIPMENT.

As matter considered in determining reasonableness of railway rates, *see* RATES—RAILWAY, 25.

Conditions under which reshipment is allowed for small additional charge, *see* RATES—RAILWAY, 25.

RESIDENCE RATES.

Business and residence rates for telephone utilities, *see* RATES—TELEPHONE, 20, 22.

RETENTION AND DEVELOPMENT OF BUSINESS.

As element considered in making rates for electric utilities, *see* RATES—ELECTRIC, 13-14.

for water utilities, *see* RATES—WATER, 7.

RETURN.

See RATE OF RETURN.

RIGHT HAND OPERATION.

Right hand side operation of street cars, *see* STREET RAILWAYS, 4.

ROUTING.

Change in original termini or route of a railway for a greater distance than one mile, requires the approval of the Railroad Commission, *see* RAILROAD COMMISSION, 9.

Street railway cars, change in routing of, to improve service, *see* STREET RAILWAY, 3.

RULES AND REGULATIONS.

Rules and regulations promulgated "In re Standards of telephone service in the State of Wisconsin," *see* TELEPHONE UTILITIES, 39.

Requirements as to payment of rates for services rendered by public utilities.

Certain amount of free toll service for prompt payment of telephone bills, *see* RATES-TELEPHONE, 17.

1. The proposed rule that patrons not paying for service within a specified time shall have their service disconnected is open to the objection that it may be misconstrued. *In re Refusal of Service by Madison Gas & El. Co.* 1914, 13 W. R. C. R. 518, it was held that a utility has no right to refuse to furnish service because of the patron's indebtedness to it, so long as the patron pays or guarantees to pay for future service. *In re Appl. Burkhardt Milling & El. P. Co.*, 409, 411.

Requirements as to rates for weighing of cars.

2. When a loaded car is weighed or reweighed at the request of consignor or consignee, the charge for such service shall be \$2.00 for railroad company's scales, and \$1.00 for private scales, which charges shall include the weighing of the empty car. *Kieckhefer Box Co. v. C. M. & St. P. R. Co.*, 564, 568.

Requirement as to reconnection of suspended telephone subscriber.

3. The regulation of the company prohibiting subscribers on party lines from "listening in" except to ascertain whether the line is open or busy is reasonable. However, while persistent and gross infractions of telephone utility rules might warrant a permanent exclusion from the use of the utility service, the "listening in" and remarks following were not of a character, in the present case, to warrant depriving the Epaviers of telephone service indefinitely. After suspension of service for a reasonable time, reconnection should have been made voluntarily by the company. *In re Refusal Oconto Rural Tel. Co. to Extend Service*, 277, 278.

Requirement as to signing yearly contracts for telephone service.

Adequacy of station facilities.

1. Complaint was made that the station facilities at Lampson in Washburn county, on the line of the respondent, are inadequate and it was alleged that the location of the community and its business prospects warrant the construction of a depot, the employment of a freight agent, and the provision of other adequate accommodations and shipping facilities. Lampson is a prepaid station, the nearest open stations being 6.3 miles south, and 8.2 miles north. It appears that for about 8 months of the year Lampson is a block signal station and that a small shed has been provided there for sheltering the operator; that five passenger trains stop on signal daily; that the proprietor of a general store at Lampson sells tickets for respondent, but has no duties with reference to freight; that no means are provided for ascertaining when a train will arrive; that trains are frequently an hour late and rarely on time, and that men, women and children at times wait on the open platform in bitterly cold or rainy weather. The respondent contended that existing conditions are practically the same as they were when a similar petition was denied by the Commission in 1910, *Pishel v. C. St. P. M. & O. R. Co.* 4 W. R. C. R. 783. From a consideration of the testimony it appears that the district in question was originally a logging one with considerable timber shipments; that for a time its importance as a shipping station declined with the industrial transition from logging to agriculture, and that the business was too slight to warrant extensive station facilities, but that at present agricultural development is well under way, the population and the products showing a material increase. *Held:* That under the circumstances the erection of a shelter for the protection of freight and passengers is warranted, but that under present traffic conditions the enlargement of the duties of the operator to cover those ordinarily performed by an agent during eight months of the year, and the employment of a competent person during the remaining four months, whose duty shall be to sell tickets, take care of freight and keep the building clean and properly lighted and heated at train times, is all that can be reasonably required of the respondent. *Ordered:* That the respondent construct an adequate building for freight and passenger traffic at Lampson, in Washburn county, plans to be submitted to the Commission for approval, and employ a competent person to sell tickets, take care of freight, and keep the building clean and properly lighted and heated at train time. May 1, 1915, is considered a reasonable date at which the building shall be completed and opened for public use. *American Society of Equity v. C. St. P. M. & O. R. Co.*, 489, 493.

2. Complaint was made that the station facilities furnished by respondent at Boscobel are inadequate, and the Commission was asked to require the respondent to install a proper system of water works and sewerage in its depot at Boscobel. It appears that the city has established a sewerage system and extended it to a point in the street adjacent to the railway station. *Held:* That respondent's station facilities at Boscobel are inadequate. The respondent is ordered to install modern, sanitary toilet facilities in its station at Boscobel, plans to be submitted to the Commission for approval. June 1, 1915, is considered a reasonable date for the completion of the installation ordered. *Blaine v. C. M. & St. P. R. Co.*, 403, 404.

3. Complaint was made that the station facilities for freight and passengers at Porter's Mills in Eau Claire county are inadequate, and

the Commission was asked to require the respondent to provide a suitable platform for freight, and a shelter shed for the accommodation of passengers. It appeared that neither shelter nor platform were provided, that the absence of the latter necessitated the lifting of milk and cream from the ground to the car floor, and that in inclement weather passengers were obliged to expose themselves to the elements or take refuge in nearby houses, a practice occasionally resulting in their missing trains. It seems that an average of three passengers a day alight from or board trains at this point. *Held*: A small shed and platform, which can be constructed without great expense, should be provided as a minimum of service, even though the traffic is light. Passengers should not be obliged to depend on nearby residents for shelter while waiting for trains. The respondent is ordered to provide a shelter shed and platform at Porter's Mills, which shall be adequate for the freight and passenger traffic. Sixty days is deemed a reasonable time for compliance with the order. *Rouk et al. v. C. M. & St. P. R. Co.*, 8, 10.

4. Complaint was made that respondent's practice of requiring the removal of freight consignments from its station at Denmark within 48 hours, or the payment of a storage charge, works a hardship on the petitioner. It appears that while the petitioner's own situation is somewhat exceptional, the rule established for the purpose of inducing patrons to remove their freight from stations within a reasonable time, has greatly improved conditions. *Held*: That the facts of the present case indicate the need of some modification of the practice complained of in order to allow persons living at a distance from a station additional free time within which to remove their freight, and also to provide for other unusual conditions, such as presented in the *Albright* case, 1914, 14 W. R. C. R. 763. Recommended: That the respondent, and all other companies operating railroads in Wisconsin, who are members of the Wisconsin Demurrage Bureau immediately publish and put into effect a reasonable rule, according to the schedule given in the decision, to allow additional free storage to patrons in proportion to the distance over which they are obliged to haul freight from railway stations. *Buckman v. C. & N. W. R. Co.*, 405, 408.

5. Complaint was made that respondent's passenger station in the city of New Richmond is unclean, unsanitary, poorly lighted, and inadequate for the comfort and accommodation of the traveling public, and the Commission was asked to require the respondent to construct and maintain an adequate passenger station at the site of its existing depot in the city of New Richmond. The respondent, while admitting the inadequacy of its station, alleges that the earnings and financial conditions of the Chicago division do not now and have not for some time past warranted the expenditure necessary for a new station. It was suggested that within two or three years the financial conditions would probably improve so as to permit the expense, and that in the meantime the company is willing to make temporary improvements. *Held*: That it is not reasonable that petitioner should wait the length of time suggested by counsel, though it is recognized that respondent should not be unnecessarily burdened in its present financial condition; that the advisability of making temporary repairs on the existing station is also questionable; that under all the circumstances the replacement of the station in question should be given prior consideration over other station expenditures, and that one year is a reasonable time, in the present case, for the erection of the new station. The site of the new station was a point of contention, the petitioner and respondent each favoring a different location. *Held*: That the choice of the actual site for a station is properly a function of the management of a railway company and should not be interfered with unless it is established that adequate service or the safety of the public is endangered;

that in the present case it does not appear that respondent's choice would render its service inadequate, and that the location will therefore not be specified. Ordered: That the respondent erect a modern passenger station, to be adequate for passenger traffic, in the city of New Richmond, plans to be submitted to the Commission for approval. Feb. 1, 1916, is considered a reasonable date for the completion and opening for public use of the new station. *City of New Richmond v. M. St. P. & S. S. M. R. Co.*, 615, 618.

6. Complaint was made that the joint station maintained by respondents at Valley Junction in Monroe county is inadequate and the Commission was asked to take such action as it deems just in the premises. The size, accommodations, and use of the station in question were considered. It appears that the waiting room is usually filled beyond its seating capacity two or three times a week; that the freight to be stored exceeds the capacity of the freight room as often; that express and freight are occasionally placed in the waiting room, and that goods stored in the station have been damaged by rats and mice. Complaint was also made as to the driveway approaching the station, and the location of a telephone pole with respect to the driveway. Respondents offered to remedy the two latter conditions. *Held*: That the station facilities at Valley Junction are inadequate; that the traffic warrants separate waiting rooms for men and women; that a more capacious room is needed for the storage of freight; that efforts should be made to protect goods stored in the station from rats and mice; and that the improvements in the approach to the station suggested by respondents should be made. Ordered: That respondents provide a suitable building, to be adequate for freight and passenger traffic, at Valley Junction, plans to be submitted to the Commission for approval. June 1, 1915, is considered a reasonable date for the completion and opening for public use of the station ordered. *Frederick v. C. St. P. M. & O. R. Co. et al.*, 670, 673.

7. Complaint was made that no shelter for passengers or facilities for handling live stock are provided at Earl in Washburn county, and the Commission was asked to require the respondent to furnish accommodations suitable for the traveling public. The revenues accruing to the respondent at Earl and the general situation were considered. It appears that the only facilities at present provided are a spur track, a milk platform and a cinder platform located about 20 rods from the store at which passengers are accustomed to wait for trains, and that these are not infrequently late. A count showed that during one month an average of six passengers a day boarded or alighted from trains at Earl. As regards the establishment of stockyards, it seems that at Trego and Spring Brook, the nearest stations, distant three and four and two fifths miles, respectively, the total shipments amounted to only twenty-four carloads of stock in a year. *Held*: The establishment of stockyards at Earl is not warranted at the present time, but the station facilities are inadequate. The respondent is ordered to erect a building which shall be adequate for the accommodation of the freight and passenger traffic, and to employ a caretaker to keep it clean, warm and lighted, and open twenty minutes before any train carrying passengers is scheduled to stop and until such train departs. Ninety days is considered a sufficient time for compliance. *Hope et al. v. C. St. P. M. & O. R. Co.*, 47, 49.

8. Complaint was made that the station facilities at Joel are inadequate, and the Commission was asked to require the respondent to employ a regular station agent and install stock scales at that point. It appears that the station and stockyards were constructed in 1912; that the former is a prepaid station, and cared for by the proprietor of a general store located nearby, whose duties are to see that it is heated and open at train times, to sell passenger tickets, and to sign receipts

for freight. It was contended that various inconveniences have resulted from the present arrangement; that few farmers in the vicinity ship a carload of stock at a time; that stock scales are necessary for smaller shipments, that Joel would be the most convenient point for stock shipping for a majority of the farmers in the vicinity, and would be used if stock scales were provided; and that approximately six hundred people would probably use the station if better facilities were provided. The revenues of the station, and the cost of making needed alterations in the stockyards, and of installing ten-ton stock scales were considered. *Held*: That the station facilities at Joel are inadequate; that the present traffic is considerable and probably will increase if stock scales are installed and convenient arrangements made for receiving and shipping less than carload freight and live stock; that the duties of the present caretaker could be extended to the supervision of less than carload freight and stock shipments without great expense as a temporary expedient; that a year's trial will show whether the installation of stock scales and improvements in the service ordered have resulted in a material increase in the business transacted; and that, if they should, the employment of a regular agent may be warranted. *Ordered*: That the respondent install suitable stock scales, provide proper access to its stockyards from the public highway, and employ a competent person to keep the station clean, properly lighted and heated, to sell passenger tickets, and to attend to the receiving and shipping of less than carload freight and live stock. May 1, 1915, is considered a reasonable date for the completion of the installation and alteration ordered. *Jenks et al. v. M. St. P. & S. S. M. R. Co.*, 465, 468.

9. Complaint was made that the respondent does not furnish adequate train service or station facilities at Sunnyside in Douglas county, and the Commission was asked to take such action as it deems proper in the premises. It appears that there is no shelter for passengers or freight at the point in question and that persons while waiting are at times exposed to severe discomforts from rain and cold. *Held*: That the station facilities and train service are inadequate. *Order*: That the respondent provide at the point in question a suitable building, which shall be adequate for freight and passenger traffic; that it submit plans to the Commission for approval; that it employ a competent caretaker for the building. Sixty days is considered a reasonable time for the erection of the building ordered. *Keup et al. v. M. St. P. & S. S. M. R. Co.*, 459, 464.

10. The petition alleges that the convenience, comfort and safety of passengers demand the erection of a shelter along the track opposite respondent's depot at Merrillan, and the Commission is asked to take such action as it deems just in the premises. It appears that under the existing station and track arrangements at Merrillan it is necessary for passengers on frequent occasions to wait for a considerable time on an exposed platform or walk around the rear coach of the train and across the tracks to the station. *Held*: That the practice is one which should be discouraged, and that it is unreasonable to require passengers to wait five or ten minutes on an exposed platform in inclement weather; that the existing station facilities at Merrillan are inadequate and that the erection of a suitable umbrella shed is necessary for adequate service. *Ordered*: That respondent erect a suitable umbrella shed not less than 260 feet in length between its main line and branch line at Merrillan, plans to be submitted to the Commission for approval. May 1, 1915, is considered a reasonable time within which to comply with the order. *Monk v. C. St. P. M. & O. R. Co.*, 635, 637.

11. Complaint was made that station facilities at Greenville are inadequate and the Commission was asked to require the respondent to provide a proper depot building. It appears that at the hearing respondent offered to make improvements in the spring of 1915, and that these

improvements will fulfill the requirements of adequate service. It is ordered that the respondent provide a suitable station for freight and passenger traffic at Greenville to be completed and open for public use on or before June 1, 1915, plans to be submitted to the Commission for approval. *Tennie et al. v. C. & N. W. R. Co.*, 386, 387.

12. A rehearing was applied for in the case of *Von Berg et al. v. C. M. & St. P. R. Co.* 1914, 14 W. R. C. R. 553. The respondent contended that the order requires a new and different location for the depot ordered built than that formerly used, which is contrary to the laws of the state of Wisconsin and beyond the jurisdiction of the Commission. *Held*: The jurisdiction of the Commission to require the relocation of a station in the interest of public safety was considered in the previous decision, and no reason is seen for withdrawing from the position there taken. A depot located east of the tracks at Mosinee, as ordered, will be safer for the traveling public than the existing site, and the cost of making the change should not be unreasonable. While it is safer, as a general practice, to locate a station on the outside rather than the inside of a curve, it is also a general practice to locate a station on that side of the track to which the greater portion of the traffic must approach. In the present case some curtailment of the view of the platform should not endanger operation, as trains should be under control when approaching the station. A further objection was urged on the ground that the order requires the erection of a modern station without giving respondent the privilege of remodeling the existing depot to meet the present demands. *Held*: Nothing in the order prevents respondent from utilizing such portions of its present structure as can be used to advantage in the construction of a modern station at the specified location. It is ordered that the former order stand as of the date of the present decision. As necessary track changes may be impossible during the winter months, time for compliance is extended to June 1, 1915. *Von Berg et al. v. C. M. & St. P. R. Co.*, 311, 314.

13. If a railway company of its own volition establishes a station necessary for local traffic at a distance from a public highway, it should provide a reasonably convenient means of approach at its own expense. But if a station is located for the purpose of handling transfer traffic at a considerable distance from a highway, and if the locality is reasonably well served by other stations, it would be unjust to require the railway company to incur large expense in order to make its junction station accessible for local use. However, where such a station is maintained, patrons from the vicinity should be allowed to use it, if such use is not attended by unusual danger. *Wilkins & Wilkins v. C. M. & St. P. R. Co.*, 18, 20.

14. Complaint was made that the station facilities furnished by the respondent at McNaughton are inadequate, and the Commission was asked to require the respondent to erect an adequate station building at that point and to maintain an agent there. It appears that McNaughton is respectively ten and eleven miles distant from the nearest points at which agents are maintained; that it is in a lake region; that not less than five hundred people are estimated to come to the vicinity to hunt and fish during the season from June 1 to December 1; that in excess of forty-two families live within a radius of six miles; that the surrounding country is being developed agriculturally, and that the failure of the company to install a telephone and station a representative at the point in question to look after its freight and passenger business results in serious inconvenience of various kinds to patrons. Freight earnings were given as \$1,763.44 for the year ending May 1, 1914, but no estimate of passenger earnings was offered. The present facilities consist of two box car bodies, one for the accommodation of passengers and one for storing freight, and a small cinder platform. *Held*: The facilities at McNaughton are inadequate, A care-

taker should be employed and a telephone should be installed in the station. In the absence, however, of any statistics of passenger earnings, an order requiring the erection of a more commodious building would not be warranted at the present time, but upon receipt of a complete record of freight and passenger traffic, which respondent is to keep from November 1, 1914, to September 1, 1915, the Commission will further consider this feature of the case. It is ordered that respondent install a telephone in the station in question and employ a caretaker to keep the station clean, properly heated and lighted, and also to sell passenger tickets, make sleeping car reservations, sign freight receipts, and properly care for freight shipments. It is also ordered that respondent keep a complete record of all passenger and freight traffic at McNaughton from November 1, 1914, to September 1, 1915, and promptly submit such record to the Commission. *Wubker, Jr. et al. v. C. & N. W. R. Co.*, 326, 329.

15. Complaint was made that respondent's station at Lehigh is unsanitary and inadequate for the freight and passenger traffic. The respondent contended that a point 2.3 miles east of Lehigh would be more suitable location for a station on account of better operating conditions. It appears that respondent's contention attempts to reopen the question of the relative merits of Lehigh and Strickland as sites for a railway station, and that in the case of *Bowker et al. v. M. St. P. & S. S. M. R. Co.* 1908, 2 W. R. C. R. 514, the Commission decided in favor of the former. *Held*: That the question before the Commission is the adequacy, for freight and passenger traffic, of existing station facilities at Lehigh, and that the Commission would not be justified in refusing to require adequate facilities at a long established station on the ground that a station at a point more than two miles distant might be more convenient to some patrons or satisfactory to the company for operating reasons. The size of the station in question, its use, and the freight and passenger earnings at the point in question were considered. It appears that on some occasions the waiting room is so blocked with freight that only four or five people can obtain shelter. *Held*: That the existing station is inadequate and should be superseded by a suitable building with a somewhat larger seating capacity, and with ample storage room for freight. *Ordered*: That respondent provide an adequate station building for freight and passenger traffic at Lehigh, plans to be submitted to the Commission for approval. June 1, 1915, is considered a reasonable limit for the completion and opening for public use of the building ordered. *Ziesenis et al. v. M. St. P. & S. S. M. R. Co.*, 585, 587.

16. The petition asks that the respondent be required to place a telephone connected with the system of the Darlington Farmers' Tel. Co. in its Darlington station. It appears that the La Fayette County Tel. Co. serves the larger portion of the city telephone users, and that the Darlington Farmers' Tel. Co.'s chief business is the performance of switching service for three rural systems which control it. The La Fayette County Tel. Co. has an instrument installed in respondent's station. A physical connection between the two systems involved was found not to be necessary in the case *Belmont & Pleasant View Tel. Co. et al. v. Wis. Tel. Co. et al.* 1914, 15 W. R. C. R. 92. However, while there is no direct connection between the two systems, it is possible for subscribers on one system to reach subscribers on the other indirectly over the toll lines of the Wis. Tel. Co. *Held*: That under all the circumstances the installation of a second business telephone in the respondent's station at Darlington is not warranted, and that, if a more direct connection with the railway depot is desired by the Darlington Farmers' Tel. Co. and its patrons, a pay station may be installed in accordance with a previous ruling of the Commission. *Ordered*: That the respondent permit the Darlington Farmers' Tel. Co. to install a pay station in accordance with the conditions set forth in Finding No. 3 of the Commission's former order. *In re Free and Reduced Rate Telephone Service*, 1908, 2 W. R. C. R. 521, 543. *Bottomley et al. v. C. M. & St. P. R. Co.*, 446, 448.

17. Complaint was made that the respondent had ceased to furnish telephone service at its railway station at Shell Lake, Wis. It was alleged that the installation of a telephone in the depot is necessary to adequately serve patrons who receive freight at Shell Lake and reside at a considerable distance, and the Commission was asked to take such action as it deems just in the premises. This proceeding is instituted under sec. 1797g—2 of the statutes, which imposes upon the Commission the duty, upon complaint, of fixing a reasonable regulation practice or service, when telephone service with any railroad is found unreasonable, inadequate, or unjustly discriminatory. It appears that the discontinuance of the service was caused by a disagreement between the respondent and the Shell Lake Tel. Exch. over a contract relating to the service in question, and the respondent contends that the Commission should require the restoration of the telephone under the terms of the contract. *Held*: The public should not be inconvenienced because of a controversy between the railway company and the telephone company as to the validity of the contract in question. If the telephone company has breached such contract, the remedy therefor must be sought in the courts. The Commission is not authorized to pass upon the validity of private contracts, entered into by public utilities with their patrons, with a view of rendering judgments specifically enforcing the same or granting damages for their breach, if found valid. The installation of a business telephone with unlimited service at the Shell Lake depot is necessary for the reasonable accommodation and convenience of the patrons of the railway company in the transaction of railway business. The respondent is ordered to furnish adequate telephone connection between its depot at Shell Lake and the Shell Lake Telephone Exchange. *Lauder v. C. St. P. M. & O. R. Co.*, 33, 35.

18. The petition alleges that the respondent has been receiving free telephone service at its Juda depot from the local telephone company, which threatens to discontinue the service unless the usual rental is paid. The Commission is asked to require the respondent to maintain

telephone service at the station in question. The respondent is willing to install a pay station, but the telephone company declines to restore the pay station, which was at the depot until June 1914 and which was removed by the company because the revenue from tolls was insufficient, and because the respondent refused to pay the usual rental for a business telephone. The need for the service requested, and the freight revenues at the station in question were considered. *Held*: That adequate service for respondent's patrons at the station in question necessitates the maintenance of telephone communication with the station and that under such circumstances the Commission is directed by statute to require adequate connection. Such connection is accordingly ordered. Since the local company is not willing to install a pay telephone, the installation of a business telephone is ordered. *McNaught et al. v. C. M. & St. P. R. Co.*, 433, 434.

Adequacy of station facilities—Toilet facilities.
See ante, 2.

Adequacy of station facilities—Use of a private commercial dock of railway company for public convenience.

19. Complaint was made that respondent has refused to compel the Central Coal & Dock Co., the lessee of its commercial dock at Ashland, to keep the same in proper repair and open for public use. It appears that the dock in question and a warehouse thereon were built by the respondent at the end of its railroad, which it extended some 1,500 feet out into Chequamegon Bay at the time it entered the city; that a trestle approach was also constructed by respondent, from the foot of Ellis ave. out to the dock and railroad tracks; that the dock in question was used for many years for the interchange of traffic between lake and rail carriers; that passenger boats and boats handling freight were permitted to land at the dock, and that for some thirty years the trestle approach to the dock was held open for the passage of pedestrians to and from the boats, and for the use of drays and vehicles carrying freight and baggage to and fro; that in course of time the volume of traffic handled by the respondent diminished; that some five years ago the Wisconsin Central Ry. Co., the then owner, leased the dock and warehouse in question to the Central Coal & Dock Co., which now controls and operates it as a coal dock, and that the latter recently concluded to close the trestle approach to the dock to the public, and so notified the petitioner. The Commission is asked to compel the respondent to keep the dock in repair and to permit the approach to the dock to remain open for public traffic. The application to the Commission is made upon the theory that the respondent in closing its dock is in some manner changing its route and operations within the city without following the statutory method of securing the authority of the city council to make such change, and also on the theory that the right to use the dock by the public had been acquired by prescription and uninterrupted use during a long series of years. Sec. 1797—58, which makes the approval of the Railroad Commission necessary in order to change the original termini or the route in any city or village, is relied upon. It is not contended that the termini provided by the respondent in Ashland are inadequate nor that respondent contemplates withdrawing the usual freight service to and from the dock in question so as to fail to adequately provide for traffic coming to it from the lake. *Held*: That there does not appear to be any effort on the part of the respondent to change its route or the character of the termini offered in the city of Ashland, and that under such circumstances the Commission has no jurisdiction in the premises by reason of the section relied upon; that the statutes do not confer authority upon the Commission to re-

quire facilities for the interchange of traffic between land and water carriers, but that were such the case, and assuming that respondent's contemplated action involves the abandonment of one of its public functions, it is unlikely that the instant situation would demand positive action of the Commission; *Brown v. Janesville Street Railway Co.* 4 W. R. C. R. 757, 761; *Jack v. Williams*, 113 Fed. 823; *Covington etc. Turnpike Co. v. Sanford*, 164 U. S. 578; that a railway company should not be required to maintain and offer its facilities to the public as a gratuity, the maintenance of the dock and wharf being desired solely for the purpose of accommodating the public, irrespective of its necessities in reaching the property of the company to obtain railroad service; that the property in question is essentially private in character, and subject to the control of the company; and that the company is not required to permit the continued use of its dock or wharf simply because the public had heretofore been allowed the use of the dock as a licensee (*Transportation Co. v. Parkersburg*, 107 U. S. 691); and that as neither the statutory provisions specially applicable, nor the general powers of supervision and control vested in the Commission confer the necessary authority, the Commission is without jurisdiction. The petition is dismissed. *City of Ashland v. M. St. P. & S. S. M. R. Co.*, 816, 821.

Practicability, public convenience and necessity of union station in particular cases—Sparta.

20. Application was made in the case of *McMillan et al. v. C. & N. W. Ry. Co. et al.* 1914, 13 W. R. C. R. 679, for a rehearing, and a suspension of that part of the order requiring the C. & N. W. Ry. Co. to erect a new passenger station. The case treated two separate proceedings as one, and part of the order dismissed a petition seeking to compel the C. & N. W. Ry. Co. and the C. M. & St. P. Ry. Co. to erect a union passenger station in the city of Sparta. It appears that the passenger transfer facilities in that city are far from convenient; that the present station buildings are antiquated structures; that Sparta is on the main line of the C. M. & St. P. Ry. Co.; that it is the junction point of that company's Viroqua branch, and also of two important branches of the C. & N. W. Ry. Co.; that it is the county seat of a populous and prosperous county; that it has a population of nearly 5,000 inhabitants, and that surrounding towns have petitioned the Commission for the union station in question. It seems that the combined passenger business for the year May, 1912, to May, 1913, amounts to over \$65,000, and the total business, passenger and freight, was placed at nearly \$700,000 a year. The intersection of South Water street by the tracks of the two companies affords a suitable location for either a union station, or two new stations in close proximity. It is estimated that the total cost of a union station at that point and of necessary changes would not exceed \$32,000. As to the erection of new stations alone, the need for better facilities was conceded by the representatives of the C. & N. W. Ry. Co., and the

situation of the C. M. & St. P. Ry. Co. differs but little. *Held*: A union station would greatly add to the convenience of transfer from road to road in Sparta, as also of travel to and from that point, and the large volume of business transacted fully warrants a reasonable expenditure for new station facilities. However, as it is possible that two separate stations in close proximity would meet the needs of the situation as well as a union station, the respondent companies are given thirty days within which to present arguments, should they so desire, to show that separate stations in close proximity will better meet the requirements of the situation, whereupon the Commission will consider the question of modifying its present order. The respondents are ordered to discontinue their passenger stations now in use in the city of Sparta, and to erect and put in use, within one year from the date of the order, a union passenger station at a point close to where South Water street in the city of Sparta is intersected by the tracks of the two companies. Plans and location are to be submitted to the Commission for approval within sixty days. *McMillan et al. v. C. & N. W. R. Co. et al.*, 227, 237.

OPERATION.

Requirements as to service and facilities—Adequacy of service.

1. This is a rehearing of matters involved in an order issued on June 2, 1914, 14 W, R. C. R. 518, requiring the respondent to operate its cars

over that portion of its Oak Hill-Cemetery line from 18th street to 25th street on La Crosse street in the city of La Crosse on the same schedule as that on which its cars are or may be operated on the remainder of its Oak Hill-Cemetery line. The respondent alleges in effect that the provisions of an ordinance which was adopted by the city of La Crosse in 1901 and submitted in evidence at the rehearing relieve it from the duty of complying with the terms of this order. The ordinance in question provides that the respondent shall not be required to operate its cars on La Crosse street east of 15½ street to exceed five months in each year and that it shall be required to operate cars then only when in its judgment the revenue derived therefrom will warrant it in doing so. *Held*: Although prior to the enactment of the Railroad Commission Law the power of service regulation was vested in the common council and the regulative ordinance of 1901 was a valid exercise of that power, jurisdiction in the matter was subsequently conferred on the Commission and any prior act of the common council which conflicts with the exercise of the proper authority by the Commission cannot stand. The company has assumed the duty of rendering adequate street car service on the portion of the line under consideration and it is incumbent upon the Commission, upon complaint, to determine what constitutes adequate service and by order to require it to be rendered. In view, however, of the fact that the respondent would undoubtedly have refused to lay the track in question if the service requirements of the ordinance of 1893 had not been limited by the ordinance of 1901, it would be inequitable to require the respondent to supply service on this extension in addition to that contemplated by the ordinance of 1901 unless there is reason to believe that such additional operation will not result in a serious financial loss. As the evidence indicates conclusively that the operation of even a minimum service throughout the year on the track in question as prayed for would inevitably result in a considerable loss, and as there is little probability that such operation would be profitable for several years to come, the former order should be modified by restricting its operation to five months during each year. The former order is rescinded and the respondent is ordered to operate its cars on La Crosse street from 18th street to 25th street on the same schedule as that on which its cars are or may be operated on the remainder of its Oak Hill-Cemetery line during the five months from May to September, inclusive, each year. *Jones v. Wis. Ry. Lt. & P. Co.*, 174, 177.

*Requirements as to service and facilities—Adequacy of service—
Carrying of freight.*

2. Complaint was made that respondent, an electric railway operating from a point in the city of Waupaca, Waupaca county, to a point in the town of Farmington, Waupaca county, refuses to carry freight, though authorized to do so under the statutes of the state, its articles of association, and franchises granted by the municipalities involved, and the Commission was asked to require the respondent to transport over its line of road, petitioner's freight between the Wisconsin Veterans' Home and points reached by respondent railway. The petitioner is located in the town of Farmington. The city of Waupaca, intervener, denies that the respondent has authority, under its franchise from the city, to carry freight within the city and contends that the Commission is without jurisdiction in the premises. It appears that the question involved in this proceeding has been before the common council of the city of Waupaca on several occasions and that respondent has never been granted authority to carry freight, if the authority was not contained in the first grant as alleged. *Held*: That the Commission is without jurisdiction; that the carriage of freight through the city

streets by respondent would cast an additional burden on the fee, for which abutting owners would be entitled to compensation; that in view of the reasonable doubt as to the existence of the authority contended for in the franchise in question, the authority cannot be inferred; that, in any event, the clause alleged to confer the requisite authority is permissive only and not mandatory, and that, respondent having never assumed any obligation under the same, the Commission can not order the respondent to assume such obligation in the first instance; that the fact that complainant is a semi-public institution and that respondent is operating under an indeterminate permit is not material in this proceeding, and that under all the circumstances the Commission is without power to make the desired order. The petition is dismissed. *Wis. Veterans' Home v. Waupaca El. Lt. & R. Co. et al.*, 656, 666.

3. Application was made for a rehearing in the above entitled matter, an order in which was issued July 28, 1914, 14 W. R. C. R. 788. The order required the respondent to operate through cars from the north terminus of its 27th street line to the down-town district via State street, and from the west terminus of its North avenue line to the down-town district via 8th street during the morning and evening rush hours in accordance with the standards of rush hour service fixed in the general service order. (13 W. R. C. R. 178.) It appears that additional track work is necessary at the intersection of North avenue and 8th street for the operation of through cars via North avenue as provided in the order in question, and that it is impracticable to operate trailers on 27th street north of Center street with the existing track layout. *Held*: That through service between the district in question and the down-town district, during the rush hours, other than that now provided on 27th street, is necessary for adequate service; that the expense of additional track work at the intersection of North avenue and 8th street is not so great that it should be allowed to stand in the way of necessary service, but that the traffic north of Center street on 27th is not such as to warrant a considerable expenditure to make the operation of trailers north of Center street possible, and that the order should be so modified, for the present, as to permit the down-town service on 27th street via State street to terminate at Center street. *Ordered*: That the previous order be modified in effect as follows: that the respondent operate through cars between the intersection of Center street and 27th street and the down-town district via 27th street and State street, and between the intersection of 47th street, and North avenue and the down-town district via North avenue and 8th street, during the morning and evening rush hours, in accordance with the standard of rush hour service fixed in the Commission's general service order, 13

W. R. C. R. 178, and make such track and overhead connections as are necessary to furnish the service ordered. April 1, 1915, is considered a reasonable limit for the completion of the track and overhead connections and the putting into effect of the service ordered. *Twenty-Second Ward Adv. Ass'n v. T. M. E. R. & L. Co.*, 593, 595.

Requirements as to service and facilities—Adequacy of service—Stopping of cars.

4. The petition asks the Commission to require the respondent to maintain lights at all stopping places in the village of Schofield; to stop its cars to receive and discharge passengers at all street crossings in the village except School street, and also to stop at Goff's alley; to receive and discharge passengers at all stopping places from the car door nearest the sidewalk; to establish a five cent fare from any point in the village of Schofield to the city of Wausau, and to substitute a discount of one cent per kw-hr. on payments made for electric lighting service prior to the fifteenth of the month in lieu of the existing service charge of 25 cts. Since the hearing a contract has been entered into between the village and respondent for the establishment of a lighting system for the village streets. With regard to increasing the number of stopping places, it appears that respondent intends to establish a stop in addition to those already made. As to boarding and alighting from cars on the side near the sidewalk, it seems that in part of the village respondent's track is laid near the east sidewalk, and in part near the west sidewalk; that respondent's cars are of the prepayment type with doors opening on the right hand side; that the traveling public has become accustomed to boarding and alighting from respondent's cars on that side, and that respondent offers to construct suitable landing places on both sides of the track when necessary for the reasonable convenience of the public. As far as transportation rates are concerned, these were adjusted by the Commission in *Fullmer v. Wausau St. R. Co.* 1909, 3 W. R. C. R. 520 and 555, and in 1910, 5 W. R. C. R. 114, and further adjustments both as to transportation rates and electric rates must necessarily require careful study, which will consume a considerable period of time. *Held*: In view of the lighting contract entered into between the parties, further consideration of the lighting of stopping places is unnecessary at present. The number of stops now made with the additional stop planned by the respondent will be reasonably adequate, and the construction of landing places, as far as boarding and alighting are concerned, will render right hand side operation reasonably safe and convenient and avoid the confusion a change would likely create. The petition as to service matter is dismissed, and as to rates is held in abeyance for necessary study and consideration. *Fullmer v. Wausau Street R. Co.*, 246, 249.

SWITCH CONNECTIONS.**RIGHT OF SHIPPER TO SWITCH CONNECTIONS.**

Industrial track, petition for construction of, dismissed by Commission.

1. Complaint was made that the respondent had removed a spur track extending from its main line to petitioner's warehouse and mill, and that, as a result, the petitioner is without adequate and reasonable shipping facilities at its warehouse and mill. The petitioner prays that the respondent be required to furnish adequate and reasonable facilities by replacing the spur track. It appears that the construction of the track in question was pursuant to an agreement between respondent and a certain improvement company about to build a dam across the St. Croix river; that the agreement was that the respondent should build, from the railway station at St. Croix Falls to the dam site, a spur track over which the company might haul its material for the construction of the dam; that the track, when constructed, was laid upon the land of the improvement company, and not of the respondent; that under an indeterminate lease the petitioner leased of the improvement company the frame of a building which the company had erected close to the spur track here involved; that petitioner enclosed the frame of the building, which now forms the warehouse in question; that the mill involved, prior to its purchase by petitioner, was operated as a custom mill only; that prior to the purchase of the mill or the lease of the warehouse, petitioner secured permission from respondent's superintendent to use the sidetrack in question; and that the only agreement respondent had, respecting the track in question, was the one with the improvement company that the track should remain until the completion of the dam. The respondent assigned various reasons for removing the track. *Held:* That the respondent can not be compelled to acquire a right of way and construct a new track to serve the industry which had been served by the prior track; that even if a patron is enjoying the privilege of having cars left on a siding for him and taken away when loaded, that railroad may discontinue such service on short notice (1 Wyman on Public Service Corporations, sec. 815), and that neither the legislature nor the Commission can compel a railroad company to construct sidings at its own expense (*N. W. Warehouse Co. v. Oregon Ry. & Navig. Co.* 32 Wash. 218, and other authorities cited). The petition is dismissed. *Osceola Mill & El. Co. v. M. St. P. & S. S. M. R. Co.*, 416, 420.

Spur track, relocation of.

See post, 2.

Spur track, removal of.

See ante, 1.

Spur track, protection of.

2. The petitioner alleges that respondent entered into a contract with it for the construction of a spur track, but subsequently insisted upon an additional payment to cover the expense of signal protection. The petitioner alleges that such signal protection is wholly unnecessary for safe operation, and requests the Commission to take such action as it deems just in the premises. It appears that petitioner is merely seeking the relocation of an existing spur track, and that the existing switch is not protected by an automatic signal of the type proposed by respondent. The suggested location of the new switch is not substantially different from the old, and it seems that in the same district there are several switches protected only by the ordinary switch targets. Respondent subsequently agreed to leave the matter of switch protection to the Commission, and constructed the spur track in question. The track is so located that a clear view is afforded enginemen approaching the facing point of the switch for a distance of 2,000 feet. *Held:* The installation proposed by respondent is not justified in the present case. While automatic protection of switches is desirable as a general practice, to be effective, such installations should be uniform, in order that enginemen may be assisted in making quick decisions. *Middleton Sand & Concrete Co. v. C. M. & St. P. R. Co.*, 306, 308.

Track connection, construction of, ordered by Commission.

See also post, 4.

3. Complaint was made that the respondents do not maintain a track connection and proper facilities for the transfer of carload and less than carload freight at the intersection of their lines at Dill, Wis., and the Commission was asked to require the respondents to install a connecting track and proper facilities for handling and transferring less than carload and carload freight at Dill. It appears that less than carload freight between stations on the branch in question, or Dodgeville branch of the I. C. R. R. Co., and certain stations on the C. M. & St. P. Ry. Co. may be routed via Dill, but that practically all less than carload freight not moving between such points must be routed via Freeport, Ill., and that such routing has resulted in unnecessary delay. As regards carload shipments there was evidence that with the track connection there would be more stock shipments over the Dodgeville branch; that Milwaukee wholesale houses would ship a carload of small consignments to points on such branch every day or so, and that the connection would be a convenience to the merchants thereon. From consideration of the actual traffic involved, of the cost of such a connection, and the cost of the out-of-line haul made necessary by the lack thereof, it appeared that the saving would pay liberal interest upon the investment necessary for the installation of the connection. *Held:* That the track connection at Dill is necessary for adequate service, and that an equal division of the cost thereof between respondents is equitable. *Ordered:* That the respondents construct and maintain a track connection at Dill and readjust their tariffs so as to permit the routing of carload and less than carload freight via Dill to and from all Wisconsin points on the Dodgeville branch of the I. C. R. R. Co., and to and from all points on the entire system of the C. M. & St. P. Ry. Co. Plans for the connection are to be submitted for approval, and

June 1, 1915, is considered a reasonable date for the completion of the installation ordered. *Gratiot et al. v. I. C. R. Co. et al.*, 421, 425.

ESTABLISHMENT OF.

Track connection—Public convenience and necessity of.

4. Complaint was made that, while respondents' tracks are about 100 feet apart in the village of West Salem, they maintain no track connection, and that the lack of such connection is inconvenient to shippers. The Commission is therefore asked to require the respondents to construct a cross-over track between their lines. It appears that the cost of drayage, which could be avoided by the use of a connecting track, amounts to approximately \$5 per carload in the case of lumber, and varies in amount for other kinds of freight; that, in addition to the loss on drayage, there are other losses and inconveniences due to the absence of a connecting track; that 216 carload shipments of freight were received at West Salem during 1913, and 69 forwarded, and that a cross-over track, which would not create a dangerous condition, could be constructed near the factory of the West Salem creamery company at an estimated cost of approximately \$1,384. The track estimated would be long enough to accommodate five cars and approximately one-half would lie on each company's right of way. *Held*: Public convenience and necessity require the construction of a cross-over track between the lines of respondent companies at West Salem, and an equal division between the two companies of the cost of construction and maintenance is considered equitable. The respondents are ordered to construct, maintain and operate, in the manner specified, a connecting track between their respective lines in West Salem, plans to be submitted to the Commission for approval; the track to be completed within sixty days of the date of the order. *West Salem Canning Co. et al. v. C. M. & St. P. R. Co. et al.*, 254, 257.

ESTABLISHMENT, CONSTRUCTION AND MAINTENANCE.

Extension of lines—Conversion of toll station into a rural station
—Public convenience and necessity of.

1. The Wis. Tel. Co. served notice upon the Commission that it proposed to change its toll station in the village of Eagle Point to a local subscribers' station, and the Chippewa County Tel. Co. filed objections to such proposed change. It appears that the Chippewa County Tel. Co. renders service in and around Eagle Point; that the Wis. Tel. Co. renders service in the district about Eagle Point, but not within the village, with the exception of the toll station in question; that Eagle Point is the natural and logical market for a considerable number of the Wis. Tel. Co.'s rural subscribers in the section in question; that at present they are unable to communicate with Eagle Point in order to get market quotations without calling the toll station and paying a long distance charge; that the patrons involved would be satisfied with a telephone located near the business center of the community so that ready information could be obtained by telephone as to market conditions and prices; that the conversion of the toll station into a local service station will not involve additional duplication of lines, and should not involve any great expense; that the Wis. Tel. Co. has no intention by means of its proposed change, to take on additional subscribers, and, under all the circumstances, is not in a position to do so, and that the toll station in question, which has been maintained for a number of years, has not brought the company sufficient revenue to warrant its continuance. *Held:* That public convenience and necessity would be subserved by allowing the Wis. Tel. Co. to maintain a local service station in Eagle Point and that such finding under all the circumstances of the present case is not inconsistent with the Anti-duplication Law. The decision is not a precedent, however, for future cases where it may

be desired to convert a toll line into a local line. Should other cases of such a nature arise, they will be dealt with on their individual merits. *In re Wis. Tel. Co. Toll Station at Eagle Point*, 454, 458.

Extension of lines—Duplication of equipment of established utility not ordinarily the remedy for excessive rates or inadequate service.

See also post, 5.

2. The Grange Hall Farmers Tel. Co. on Dec. 13, 1913, filed notice with the Commission of a proposed extension of its line in the town of Rock Elm. The company informed the Commission that the extension in question would not interfere with any other company. Accordingly, when the twenty day period fixed by statute had elapsed and no objection to the extension had been filed, the company was notified that it was authorized to proceed. It later appeared, through an investigation following a complaint by the Highland Tel. Co., that the proposed extension would parallel the line of the latter company for fully three miles, and that the Grange Hall Farmers Tel. Co. had not complied with the law in that it had not served written notice upon the Highland Tel. Co. The former company was then notified that the proceedings instituted in December 1913 were void, and that a new notice would be necessary. Such notice was accordingly served on the Commission on April 21, 1914, and hearing held pursuant thereto on May 14. At the hearing it developed that the construction of the extension in question had proceeded to completion in spite of the fact that the matter was before the Commission for determination and that nineteen subscribers were attached to the new line, six of whom had discontinued the service of the Highland Tel. Co. The controlling reason for the construction of the extension seemed to be the belief that subscribers of the new line would get the benefit of a much lower rate, though it appeared that the lower rate was not fixed at a proper amount, as it made no allowance for maintenance, taxes, depreciation, and interest, but covered only the cost of switching service. It did not appear that the rates of the Highland Tel. Co. were unreasonably excessive, and an inquiry into the merits of the case revealed that there was no public need for the extension in question. *Held*: Sec. 1797m—74 of the statutes was aimed to prevent such wasteful duplication of telephone lines as has arisen in the present case. Such duplication is not to be permitted merely because the rates of existing companies are thought to be excessive. The law provides an adequate remedy for such a situation through the filing of a complaint with the Commission. Sec. 1797m—102 imposes upon the Commission the duty of enforcing the provisions of sec. 1797m—1 to 1797m—109. In enforcing the provisions of these statutes, it is no less the duty of the Commission to take steps to abate a condition that has arisen than the law was designed to prevent, than to prevent the occurrence of that condition in the first place. The construction of the line in question was clearly an illegal act. If the Grange Hall Farmers' Tel. Co. and the individual patrons of the new line do not permanently discontinue the service over the line in question within two weeks following the date of the present decision, the matter is to be turned over to the attorney-general for prosecution. *In re Proposed Extension Grange Hall Farmers Tel. Co.*, 11, 17.

Extension of lines—Duplication of equipment of established utility—When permitted.

3. While the Anti-duplication Act does not intend that the presence of the line of a telephone company upon a highway shall preclude all

other companies from approaching that highway, it does intend that where a prospective subscriber to telephone service is situated in close proximity to an existing line from which he can receive service fairly suited to his needs at a reasonable charge, he shall be regarded as legitimately a prospective customer of the existing line. A more liberal construction of the law would open the way to that unnecessary competition, which it is the obvious purpose of the law to prevent. Authorization of the proposed extension is refused. *In re Extension Pewaukee-Sussex Tel. Co.*, 57, 58-59.

4. To allow the conversion of the toll station at Eagle Point into a local station as contemplated in this decision will, of course, result in the paralleling of the rural service line of the Chippewa County Telephone Company from the point where the present local line of the Wisconsin Telephone Company leaves the main highway to the village. It was evidently the intention of the legislature to prevent such duplication of investments except in those instances in which peculiar local conditions create a definite public necessity for the extension of the paralleling line. Such instances are naturally but few in number. The danger of permitting paralleling lines lies in the economic waste of having two investments to perform a service that could be performed as well by one, and the troublesome disagreements that may arise between two telephone companies that are in competition on the same thoroughfare. Neither of these difficulties inheres in the paralleling permitted in this instance. *In re Wis. Tel. Co. Toll Station at Eagle Point*, 454 457.

Extension of lines—Extension contrary to law—Grange Hall Farmers Telephone Co. in town of Rock Elm, Pierce County.

See ante, 2.

Extension of lines—Public convenience and necessity of extension in particular cases—Oak Ridge Tel. Co. in town of Muscoda, Grant County.

5. The Oak Ridge Tel. Co. filed notice with the Commission of its intention to extend its telephone line in the town of Muscoda, Grant county. The Muscoda Mutual Tel. Co. objects to the proposed extension, which would have the effect of practically paralleling its lines for several miles. The purpose of the extension is in part to secure certain present subscribers of the objector, who contend that the latter's service is inadequate and its management unsatisfactory and express the belief that the Oak Ridge Tel. Co. could provide service at lower rates. *Held*: Public convenience and necessity do not require the extension proposed. Deficiencies of service or inefficient management are to be remedied by proper proceedings for that purpose before the Commission. *In re Proposed Extension Oak Ridge Tel. Co.*, 166, 170.

Extension of lines—Public convenience and necessity of extensions in particular cases—Pewaukee-Sussex Tel. Co. in sec. 32, town of Lisbon, Waukesha county.

6. The Pewaukee-Sussex Tel. Co. filed notice with the Commission of a proposed extension to a certain residence in the town of Lisbon, Waukesha county, Wis. The residence in question fronts on a north and south road upon which there is no telephone line, although the line of the Merton Telephone Co., which objected to the extension, is only a short distance to the north and that of the applicant a short distance to the south. It appeared that the residence in question is considerably

closer to the line of the Merton Tel. Co. than to that of the Pewaukee-Sussex Tel. Co. and that, in fact, it could be reached from the line of the former company by the setting of one pole. It also appeared that the service of the Merton Tel. Co. would suit the purposes of the prospective customer. *Held*: Public convenience and necessity do not require the construction of the extension in question. While the Anti-duplication Act does not intend that the presence of the line of a telephone company upon a highway shall preclude all other companies from approaching that highway, it does intend that where a prospective subscriber to telephone service is situated in close proximity to an existing line from which he can receive service fairly suited to his needs at a reasonable charge, he shall be regarded as legitimately a prospective customer of the existing line. A more liberal construction of the law would open the way to that unnecessary competition, which it is the obvious purpose of the law to prevent. Authorization of the proposed extension is refused. *In re Extension Pewaukee-Sussex Tel. Co.*, 57, 59.

Extension of lines—Public convenience and necessity of extensions in particular cases—St. Croix Tel. Co. in towns of Cylon and Emerald, St. Croix County.

7. Notice was served on the Commission of a proposed extension of the St. Croix Tel. Co. in the towns of Cylon and Emerald, St. Croix county, Wis. The purpose of the proposed extension is to afford free telephone communication between New Richmond and the vicinity thereof, and certain residents along the highway east of the village of Cylon. The latter propose to construct a new line into Cylon, there to connect with a circuit which the St. Croix Tel. Co. plans to add to its present line extending eastward from the city of New Richmond to the village of Cylon. The proposed line east of Cylon would parallel an existing line of the West Wisconsin Tel. Co., which has several subscribers among the parties proposing the line in question, and opposes its construction. It appears that the lack of physical connection between the two companies concerned is responsible for the fact that present facilities for communications between the territories involved are not all that could be desired. *Held*: Public convenience and necessity do not require the construction of the proposed line east of Cylon, St. Croix county, insofar as such extension would reach residents along the highway, in the sections specified in the decision, in the towns of Cylon and Emerald. The difficulties of communication would be remedied by a physical connection, which the law provides a means of securing. *In re Extension of St. Croix Tel. Co.*, 241, 243.

Pay station—Abolishment of.

8. Pay phones were installed some two years ago in various business houses because of the respondent's belief that business phones in Onalaska generated more than a reasonable amount of traffic on account of use by nonsubscribers. The arrangement was that at the end of the month the amount of tolls collected would be refunded to the subscriber of the phone in question, whose regular rate was to continue the same. From a traffic study it appears, among other things, that, during the busy hour, 10 per cent of the calls for trunks to La Crosse were not completed on account of "lines busy"; that only 8 of the 24 Onalaska business phones are equipped with coin boxes; that none of the La Crosse business phones are so equipped, and that service furnished to pay stations is somewhat hindered due to the fact that the operator gets the called party on the phone before the connection is made. Trunking conditions are becoming inadequate for good service, and irrespective of the pay-station problem, an additional trunk line is required between

Onalaska and La Crosse. Either all the business houses should have pay-station service or it should be abolished altogether. The cost of installing the additional stations would exceed the cost of another trunk line to La Crosse. Troubles usually encountered with nickel phones tend to condemn their use in a small town, and their abolition in the present case would effect economies, and that they should be abolished. *Coady et al. v. La Crosse Tel. Co.*, 831, 835, 838.

Rural station.

OPERATION.

Bridged telephone service.

Rates for bridged telephone service, *see* RATES-TELEPHONE.

Contracts—Signing of yearly contracts required.

9. In order to avoid as much confusion as possible, we suggest that subscribers who desire service over all the exchanges owned by the company, or over connecting lines, be required to contract for such service on a yearly basis. *In re Appl. New Lisbon Mut. Tel. Co.*, 280-283.

Duty of utility to furnish service and facilities.

10. The duty of a utility is to serve without discrimination, under reasonable rules and regulations, all people desiring service who subscribe to and abide by such regulations. The call for service, though coming from an individual, partakes strongly of the character of a public demand. *In re Refusal Oconto Rural Tel. Co. to Extend Service*, 277, 279.

Extension of service refused.

See post, 35-36.

Physical connection—As means of improving service.

11. It would seem that the proposed line is not one which is demanded by public convenience or necessity. All the requirements of the petitioners for telephone service to the neighborhoods served by the St. Croix Telephone Company would be met by a physical connection between that company and the company whose service is now at their command, which the law provides a means of securing. *In re Extension of St. Croix Tel. Co.*, 241, 243.

Physical connection—Establishment of—Conditions precedent.

See also post, 18.

12. As in physical connections cases generally, this case must be decided with reference to the provisions of the statute authorizing the Commission to require physical connection under certain conditions. The facts in the case must be such as to show: 1. That public convenience and necessity require such physical connection or connections. 2. That such physical connection or connections will not result in irreparable injury to the owners or other users of the facilities of such public utilities. 3. That such physical connection or connections will not result in any substantial detriment to the service to be rendered by such public utilities. The only vital objection to such connection, is that, as matters now stand, a physical connection on any basis which would make its use by Arena and Ridgeway subscribers practical would re-

sult in irreparable injury to the Mazomanie company. This objection, although sufficient to prevent the issuance of an order for physical connection in this case, is not necessarily insurmountable. *Arena & Ridge-way Tel. Co. v. Mazomanie Tel. Co.*, 390, 392-394.

Physical connection—Establishment of, in particular cases.

13. The petition alleges that public convenience and necessity require physical connection for local service between the lines of the parties, and that such physical connection will not result in irreparable injury to either, nor in any substantial detriment to the service. It appears that certain sections of the two companies' systems are in competition; that in those sections petitioner has approximately 75 phones, and respondent approximately 25; that in a few cases parties have both phones; that subscribers living between Arena and Mazomanie have interests, business and social, in both places; that those living west and southwest of Arena also probably have frequent occasion to use Mazomanie service; that petitioner's rate is substantially lower than that of the respondent; that nearly all of petitioner's subscribers are also stockholders, and that the Wis. Tel. Co. has a toll line from Arena to Mazomanie, and that such toll line is connected at those places with the telephone systems of the parties to the case. *Held*: That, while there is a necessity for a physical connection for the conduct of ordinary local business (even though the present long distance service may be adequate for emergency use), and while there is no ground for anticipating that such connection would result in substantial detriment to the service, as matters now stand, a physical connection on any basis which would make its use by petitioner's subscribers practical would result in irreparable injury to the respondent company. Should the petitioner, on proper application and authorization, raise its rate to \$12 per year, respondent's present rate, and probably a minimum for securing proper operation under the circumstances of the present case, or should it acquire those parts of respondent company's system in competitive territory, the present objection to requiring the physical connection would be obviated. The petition is dismissed. *Arena & Ridge-way Tel. Co. v. Mazomanie Tel. Co.*, 390, 396.

14. The Belmont & Pleasant View Tel. Co. operating telephone exchanges and lines in La Fayette and Grant counties, and the La Fayette & Iowa County Tel. Co., and the Willow Springs Tel. Co., operating in La Fayette and Iowa counties, petitioned the Commission: 1, for an order requiring the reestablishment of physical connection between their lines and those of the White Oak Tel. Co. at Darlington; 2, for an order requiring the establishment of physical connections between their lines and those of the Wis. Tel. Co. at Darlington; and, 3, by supplementary petition, for an order requiring physical connection with the La Fayette County Tel. Co. The La Fayette County Tel. Co., in an intervening petition, complains of various practices of the petitioners and requests that the Commission investigate the furnishing of telephone service and toll service at and in the vicinity of the city of Darlington, and throughout La Fayette county; that it investigate the service, rates, rules, etc. of the various companies furnishing service in such territory, and that it issue an order putting into effect uniform service, rates, rules, regulations and practices for the furnishing of telephone exchange and toll line service in the territory in question. The La Fayette County Tel. Co., in its intervening petition, further asks that the Commission either dismiss the petitions of the three companies or grant relief only upon the condition that the free toll service afforded by the petitioners and all other discriminatory practices on their part be discontinued, and that the petitioners be required to conform their service, rates, rules, etc. to those of the La Fayette County Tel. Co. It appears that the

lines formerly owned and operated by the White Oak Tel. Co. have been acquired by the La Fayette County Tel. Co., and are now operated by that company, and that the White Oak Tel. Co. does not at present operate any telephone lines. As regards the question of physical connection with the toll lines of the Wis. Tel. Co. at Darlington, it appears that as a practical matter it is impossible for the subscribers of the three petitioning companies to secure adequate long distance service over the lines of the Wis. Tel. Co. at any point other than Darlington, and that physical connection at that point is thus demanded by public convenience and necessity. It seems, however, that this connection must be had through the switchboard of the La Fayette County Tel. Co., inasmuch as the telephone exchange property in the city of Darlington formerly owned by the Wis. Tel. Co. is now owned by the La Fayette County Tel. Co., of which, however, the Wis. Tel. Co. owns approximately one-half the stock. So far as any irreparable injury is concerned, the physical connection would almost certainly increase the toll business of the Wis. Tel. Co., and the La Fayette County Tel. Co., which competes in Darlington with the Darlington Farmers' exchange, may charge a reasonable amount for the use of its facilities, and thus protect itself against injury from such connection. As there was nothing to show that the construction or condition of the other two petitioning lines was materially different from that of the Belmont & Pleasant View Tel. Co., with which the Wis. Tel. Co. has an agreement for long distance connection at Belmont, and inasmuch as toll connections actually are furnished by the Wis. Tel. Co. at non-competitive points, there seems no reason to suppose that any substantial detriment to the service would result from the making of the physical connection in question. As regards physical connection with that part of the La Fayette County Tel. Co.'s system which was formerly owned by the White Oak Tel. Co., it does not appear that there exists a public necessity for such connection. However, with physical connection for toll purposes between petitioner's lines and the toll lines of the Wis. Tel. Co., petitioners' subscribers will be afforded a toll connection with Shullsburg, which, while possibly not as convenient a method of securing service as would be a direct connection from Darlington, should be reasonably convenient and all that is necessary. *Held:* Under the conditions specified in the statute (sec. 1797m-4), physical connection must be required between the Wis. Tel. Co. at Darlington and the exchange operated in Darlington by the petitioners. Physical connection with the system of the La Fayette County Tel. Co. cannot be required, however, except as such connection is incidental to complete compliance with the order requiring physical connection with the Wis. Tel. Co. It is ordered: 1, that the petition against the White Oak Tel. Co. be dismissed; 2, that physical connection be made at Darlington between the toll lines of the Wis. Tel. Co. and the Darlington exchange owned and operated by the petitioners, and that the Wis. Tel. Co. furnish as complete toll service to the three petitioning companies and their Darlington exchange as is furnished to exchanges of the Wis. Tel. Co.; and, 3, that the petition for physical connection with the system of the La Fayette County Tel. Co. be dismissed, with the exception that that company is to permit the use of its switchboard for physical connection between the petitioners and the Wis. Tel. Co. *Belmont & Pleasant View Tel. Co. et al. v. W. O. Tel. Co.*, 92, 107.

15. The petitioner asks that physical connection be ordered between its line running from Mifflin to the city limits of Mineral Point and the lines of the respondent on the basis of free exchange of service between the two companies. Up to a few years ago the petitioner had a direct line extending from Mifflin to Mineral Point and connected at Mineral Point with the respondent's telephone system. Part of the subscribers on this line were connected directly to the Mineral Point telephone exchange, and part of them had to have their messages routed through

a switch which was placed upon the line between Mifflin and Mineral Point. It appears that at the present time this line has been cut by the respondent between Mifflin and Mineral Point, leaving about eight subscribers so situated that they can receive service directly from the respondent. Subscribers between the point where the line is cut and Mifflin have to have their messages routed through the Powell central in order to reach Mineral Point. The parties connected to the end of the petitioner's line, which is still connected to the Mineral Point central, expressed their intention of building a line of their own to Mineral Point and giving up the line of the Diamond Grove Tel. Co. entirely. The actual dispute in the case seems to be between those of the petitioner's subscribers who are able to call Mineral Point directly and those on the Mifflin end of the line, who have to go through the Powell switch in order to receive Mineral Point service. *Held*: An action against the respondent asking for physical connection is not warranted at this time. *Diamond Grove Tel. Co. v. Mineral Point Tel. Co.* 185, 187.

16. Application was made for a physical connection between the Farmers' Union Tel. Co. and the Mt. Vernon Tel. Co. in order to afford more direct communication between Middleton and Verona. It appears that at present it is necessary to call in a round-about route via Mt. Horeb. The Farmers' Union Tel. Co. has a party line running into Verona from Middleton and offers to convert this line into a toll line, if the Mt. Vernon company will operate and maintain the Verona end, the proposition being that each company own one-half the line. However, the Farmers' Union Tel. Co. desires free service over the line in question, while the Mt. Vernon Tel. Co. desires that calls be charged at the rate of 10 cts. each. The representative of the Farmers' Union Tel. Co. stated that he would rather use the service of the Wis. Tel. Co. between the points in question at the present rate, which is not greatly in excess of that proposed by the Mt. Vernon Tel. Co., than have the connection established on any other than a free basis. No inadequacy was shown in the present service between Middleton and Verona. *Held*: That under the circumstances of the present case the Commission would not be warranted in ordering physical connection on a free basis. The application is dismissed. *Farmers' Union Tel. Co. v. Mt. Vernon Tel. Co.*, 286-287.

17. The Commission on June 3, 1914, made an order (14 W. R. C. R. 529) requiring the respondents to establish a physical connection of their lines in Janesville for the purpose of affording toll line and local, including rural service, to the subscribers of each company on the lines of the other company. The constitutionality of the act on which the present proceeding rests was challenged and argued by counsel. *Held*: It is not necessary to consider the question. As a general rule, administrative tribunals should assume the validity of acts submitted to them for administration. As the statute provides for judicial review of the orders of the Commission, the courts can determine if there is any infirmity in the statute in question without the order of the Commission causing injury to any one. *McGowan v. Rock County Tel. Co. et al.*, 378, 379.

18. Complaint was made that there was need in Wood county of a physical connection between the Wis. Tel. Co. and the Lindsey Farmers Tel. Co. It appears that the complainant has many crews of men at work improving and building roads, and that the physical connection asked would be a convenience and facilitate its work. It developed, however, that, in order to give satisfactory service with the physical connection asked, extensive changes not warranted by the resulting increase in revenues would be necessary in the case of the Lindsey Farmers Tel. Co., and the complainants stated their willingness to withdraw their complaint. *Held*: In the absence of a showing of a public demand,

such as would warrant the finding that public convenience and necessity require the connection, leave to withdraw the complaint is granted and the proceeding is dismissed. *State Aid Highway Comm. v. Wis. Tel. Co. et al.*, 244-245.

19. The respondent companies in the present proceeding were ordered (May 14, 1913, 11 W. R. C. R. 748) to make such physical connection of their toll lines or systems as would be necessary for the furnishing of toll line service over the toll lines of both companies to the subscribers of each company at the stations installed in their residences and places of business. It subsequently appeared that the companies were unable to determine and agree upon the manner of the physical connection, or the joint toll charges to be made, or the apportionment of the toll charges, and the Commission accordingly proceeded to investigate the matters in controversy. In the absence of any experience showing the effects of a physical connection of lines upon the business of the competing companies, the order made is necessarily experimental and subject to revision or rescission at any time either company appears to suffer injury from the arrangement. The Wis. Tel. Co. submitted quite elaborate plans and specifications to the La Crosse Tel. Co. and to the Commission for a permanent connection between the switchboards of the two companies, but the La Crosse Tel. Co. rejected these plans, presumably on the ground that, as the order was necessarily experimental, the cost of a permanent connection was not warranted at the present time. As regards a temporary connection, it appeared that a cable of the La Crosse Tel. Co. containing 15 available pairs, and one of the Wis. Tel. Co. containing 10 or more available pairs, are so situated that they could easily be connected by stringing twisted pair distributing wire a distance of approximately 35 feet from one terminal pole to the other. It further appeared that such a temporary connection from board to board could probably be made within a day's time, and with very little expense, and that it would require only a few hours' time to connect an additional circuit when found necessary. *Held*: The plans and specifications submitted probably provide more extensive facilities than a liberal estimate of the traffic to be expected would justify. In order to determine just what provision should be made to handle the traffic resulting from a physical connection of the systems, a temporary connection, using the present switchboard equipment and spare cable pairs in the present distributing cables of each company, should be provided. The respondents are ordered to connect three trunk circuits for the present as follows: 1. Wis. Tel. Co. toll to La Crosse toll; 2. Wis. Tel. Co. toll to La Crosse local; 3. Wis. Tel. Co. local to La Crosse toll; and, as the business requires, the respondents are also to make such further connection of circuits as is necessary to furnish reasonably adequate service. All calls are to be "ticketed" for the purpose of adjusting charges, thus providing a means of checking traffic over the trunks in question, and also, when traffic becomes somewhat settled, of determining what should be provided in the permanent construction. *Winter v. La Crosse Tel. Co. et al.*, 36, 39.

Physical connection—Establishment of—Statutory requirements.

20. Section 1797m-4 of the statutes states definitely under what circumstances physical connection shall be made. These are (1) whenever public convenience and necessity require such physical connection, and (2) such physical connection will not result in irreparable injury to the owners or other users of the facilities, nor (3) in any substantial detriment to the service. *Belmont & Pleasant View Tel. Co. et al. v. W. O. Tel. Co.*, 92, 102.

Physical connection—Establishment of—Terms and conditions of joint use.

21. The Wis. Tel. Co., relative to the question of joint tolls and their division, proposed that the subscriber of one company wishing the service of the other should pay a charge of \$6.00 per year for the right to obtain such service, and, in addition, the regular toll charge of the connecting company, and, in addition thereto, if a subscriber of the La Crosse Tel. Co., a charge of 15 cts. for each message sent or received over the Wis. Tel. Co.'s lines. *Held:* The proposition is unreasonable. The charges suggested would be prohibitive of the services proposed and defeat the very purpose of the statute. The legislature primarily contemplated continuity of service over two or more systems, wherever the same could be established advantageously to all parties concerned, and not that the public desiring the facilities of two telephone companies should be indirectly required to become subscribers to each. No reason is seen for changing the conclusion reached in the original decision that the interests of the utilities, after connection, may be preserved through an additional charge to be paid by the patrons of either company using the toll lines of the connecting company. However, under the conditions in this state the arbitrary to be exacted should not be a uniform charge, but should be graduated on a zone basis. It is ordered that each subscriber of either company desiring service over the toll lines of the other company shall be charged for each message, in addition to the connecting company's regular charge, for all distances not over 50 miles, 5 cts.; for all distances over 50 miles and not over 100 miles, 10 cts.; and for all distances over 100 miles, 15 cts. Distances are to be measured by air line from the office of the connecting company. Neither company is to absorb the additional charge, but each is to collect the charge in question from its subscriber, and pay to the other the long distance tariff toll plus such additional charge. If the foregoing division of tolls, after a fair trial, is found to be inequitable, and the companies cannot agree upon a proper division, the Commission will by supplemental order establish such division. Ten days is deemed a reasonable time for compliance with the order. *Winter v. La Crosse Tel. Co. et al.*, 36, 39-42.

Relocation of exchange.

See post, 30.

Requirements as to service and facilities—Adequacy of service.

See also STANDARDS OF SERVICE.

22. Complaint was made that the telephone service rendered by respondent in the village of Lomira is inadequate, and the Commission was asked to investigate the matter. Complaint was made both as to difficulty in long distance communication and as to local service within the village, especially with reference to "listening in" by other subscribers, and overloaded lines. It appears that sufficient regular tests and inspections of the line are not made; that the manager does not give his entire time to the affairs of the company; that his assistant is inexperienced in telephone work, and that complaints made to the manager are not always thoroughly investigated. *Held:* That the service rendered by respondent is inadequate; that sufficient competent help should be employed for regular tests and inspections and the prompt location and elimination of trouble, that at least one through line, with few, if any, subscribers' instruments installed thereon, should be established between Lomira and Theresa, and that a toll station should be provided at Lomira, so situated that it will be convenient for local and transient toll patrons. Order entered in accordance with the foregoing conclusions. May 1, 1915, is considered a reasonable limit for the com-

pletion of the toll line, and public toll station. *Grantman et al. v. Theresa Union Tel. Co.*, 582, 584.

23. Complaint was made that the respondent fails to render service between the hours of 10 p. m. and 7 a. m. and it was alleged that public needs require continuous telephone service, and the Commission was asked to require the respondent to render such service. Respondent takes the position that the additional expense which would be entailed is not warranted, and that it prefers to devote all of its available funds to improving its day service by installing full metallic circuits. It appears from investigation, however, that the privilege of making urgent night calls could be extended to the village, as well as rural lines, by dividing night calls between the manager and his son, who at present do answer night calls on rural lines. *Held*: The service rendered by respondent is inadequate. Night service should be provided subject to a suitable rule of the company to prevent the abuse thereof. It is ordered that the respondent provide regular switchboard service for all its lines between the hours of 5 a. m. and 10 p. m., and handle calls of an urgent nature at all other times from any of its lines, or connecting lines, subject to rules to be submitted to the Commission for approval. *W. R. Howard & Sons et al. v. Greenwood Tel. Co.*, 323, 325.

24. The charge that service has been poor is largely unfounded, except that reconstruction work done during the past year may have interfered with service to some extent, and it is only reasonable to assume that service has been improved by the improved facilities installed by the applicant. *In re Appl. Clark County Tel. Co. to Increase Rates*, 822, 829.

25. Some complaint was made at the date of the application and at the hearing of the service rendered by the utility. The chief causes for complaint seem to have been the limited period of service and the alleged failure of the utility to manage and keep up its system properly. Since the date of application the service has been materially improved and it appears that a compliance with the standards of service established by the Commission *In re Standards for Tel. Service*, 1914, 15 W. R. C. R. 1, will remove all present causes for complaint. *In re Appl. Marion & Northern Tel. Co.*, 552, 561.

26. The Commission, on its own motion, investigated the adequacy of the service rendered by the Door County Tel. Co. and by Matt Peffer over the lines owned and operated by him in Door county. It appears that, while improvement has been made in the service rendered on both systems, some causes of complaint have not been eliminated. The existing grounded circuits of both systems, the fact that toll line No. 7 of the Door County Tel. Co. has 31 instruments attached to it, and the habit of subscribers of listening on the line while other subscribers are engaged in conversation, are causes responsible for the present poor service. It is ordered that the Door County Tel. Co. establish full metallic circuits on all its telephone lines, and that Matt Peffer take similar action on all the lines owned and operated by him in Door county; that the Door County Tel. Co. install such new equipment as is necessary to divide its toll line No. 7 so that the number of instruments attached to the same circuit shall not exceed twelve; that both maintain in proper condition these lines, instruments and other equipment; that both keep an accurate record of all complaints and irregularities in the service, showing the day and time at which the trouble is reported, the nature of the trouble, its duration and final disposition, and otherwise fully comply with the general order fixing standards of telephone service, issued on August 13, 1914, 15 W. R. C. R. 1. The installation of full metallic circuits is to be carried forward as rapidly as possible, and monthly progress reports are to be filed with the Commission until the installation is complete, which shall not be later than November 1, 1915. Toll line No. 7 on the Door County Tel. Co.'s system is to be di-

vided and made full metallic before June 1, 1915. All other requirements are to be complied with within 60 days. *In re Invest. Service Door County Tel. Co. et al.*, 375, 377.

27. Complaint was made that the respondent was not rendering adequate service. The chief complaint seemed to result from the poor condition of the poles and other line equipment. It appears that formerly the village of Lake Nebagamon had a larger population than it now has. At one time there were ninety connected telephones in the village, but at present only twenty-five. The poles in the village are owned by the company, but the rural lines are the property of the subscribers, of whom many are behind in the payment of the monthly rentals. The manager stated that the financial condition of the company is such that it cannot undertake to rebuild the rural lines. *Held*: Adequate service is required by law. In the present case it cannot be rendered until the poles and other line equipment are put in proper condition, and such repairs as are necessary must be undertaken by the company. The situation is covered by the general order issued Aug. 13, 1914, prescribing rules and standards of adequate telephone service, Rule 4 providing that each utility shall maintain the equipment used on its system in proper condition and make the necessary tests and inspections. Rules should be adopted, calculated to insure prompt payment of rentals in the future, and vigorous efforts should be made to collect unpaid bills. Should the utility fail to secure a sufficient number of additional subscribers to place the company on a substantial business basis after the restoration of adequate service and the adoption of an efficient method of collecting revenue, application may be made to the Commission for authority to charge rates sufficient to permit proper maintenance and operation. The respondent is ordered to repair and reconstruct the equipment used on its system and thereafter maintain the same in proper condition. Sixty days is considered a reasonable time for compliance. *In re Invest. Service Nebagamon Tel. Co.*, 50, 52.

28. Complaint was made that the secretary and treasurer of respondent company assumes to manage all its affairs without authority from the board of directors, and that the service rendered is inadequate. The Commission was asked to cause an audit of respondent's books to be made, and to take such further action as it deems proper in the premises, and also to consider certain matters having to do with different charges and rates, and certain alleged discriminations in collecting rent in advance. Decision in the rate matters is held in abeyance pending the gathering of and passing upon the data necessary for such determination. As regards the alleged assumption of undue authority of the secretary and treasurer, it does not appear that such assumption has in itself impaired the service or created unreasonable rates. *Held*: That the Commission has no jurisdiction over the relations between a utility official and the board of directors unless such relations impair the service or create unreasonable rates. As regards questions of service, it appeared that serious cross-talk was found on certain through lines, and also on another line, operated but not owned by respondent, but that the lines were metallic circuits, and that the trouble could probably be satisfactorily eliminated by making necessary transpositions. Several of respondent's rural lines also serve more subscribers than is consistent with adequate service. It appeared that respondent's switchboard capacity and operating force are sufficient for existing traffic, but that subscribers have not always reported trouble or irregularities promptly to the proper official of the company. *Held*: That, in order to comply with the rules of service set forth in the Commission's order of Aug. 13, 1914, 15 W. R. C. R. 1, the respondent should make necessary transpositions on certain of its lines, and also take steps as soon as practicable to increase the number of rural lines; that in thus making adjustments necessary for such relief of overloaded lines, care

should be taken to avoid discrimination; that subscribers should be connected with lines geographically best adapted for their service, and that the company should make an effort to encourage its patrons to report trouble at once. Ordered: That the respondent make such transpositions on its through metallic lines from Muscoda to Blue River, and from Muscoda to Avoca as are necessary to eliminate all objectionable cross-talk, and otherwise comply with the Commission's general order of Aug. 13, 1914, 15 W. R. C. R. 1. May 1, 1915, is considered a reasonable limit for the completion of the transpositions ordered. *Pospichal et al. v. Muscoda Mutual Tel. Co.*, 578, 581.

29. The petitioners allege that the service rendered by the respondent is inadequate because of defective instruments, unrepaired lines and overloaded circuits and because repairs have been inefficiently made. Inspections made of the respondent's property on April 10 and Aug. 20, 1914, showed conditions to be unsatisfactory. The respondent admits that its service has been partially inadequate but promises to continue its efforts to improve the service. *Held*: The present service is inadequate. The respondent's attention is directed to Rules 6 and 11 of the standards prescribed by the Commission for telephone service in its general order of August 13, 1914 (*In re Standards for Telephone Service*, 1914, 15 W. R. C. R. 1), which require reasonable provisions to be made for emergencies and for the elimination of interruptions and irregularities of service. The respondent is ordered (1) to employ a competent man to periodically inspect and repair its lines, instruments and other equipment and (2) to comply with the rules prescribed in the general order cited above. *Purtell et al. v. Hubertus Tel. Co.*, 152, 154.

Requirements as to service and facilities—Adequacy of service—

Change in location of the exchange.

30. The petition, signed by residents of the village of Friendship, alleges that the proposed removal of the central office of the respondent from the village of Friendship to the village of Adams will inconvenience a large number of patrons and result in an unnecessary expenditure for the respondent. A counter petition, signed by residents of the village of Adams, alleges that the public can be more adequately served than it is at present if the central office is located at Adams instead of at Friendship. It appears that the two villages are only about one-half mile apart and that the utility, being forced to vacate the building which it now occupies in the village of Friendship, has determined to construct a building for itself in the village of Adams for the reason that a cheaper site can be secured in Adams and the further reason that a less expensive cable between the two villages will be required if the exchange is located in Adams. *Held*: It is practicable to render adequate service from an exchange located in either Adams or Friendship and the choice of either location will not involve the utility in unreasonable expenditure for construction or operation. The choice between the two locations is therefore the function of the utility and not of the Commission. The petition is dismissed. *Purves et al. v. Friendship Tel. Co.*, 530, 531.

See ante, 26, 29; *post*, 39.

Requirements as to service and facilities—Adequacy of service in railroad station.

See STATION FACILITIES.

Requirements as to service and facilities—Adequacy of service—Interference of high voltage transmission lines.

31. Complaint was made by petitioner, a corporation owning and operating a rural telephone system in the town of Watertown, Jefferson county, that respondent had built, on the same side of the highway on which petitioner's lines are located, a line carrying a current of 23,000 volts; that such voltage had greatly interfered with petitioner's service; that respondent had proceeded with the construction of the line in question, though requested prior thereto, by reason of the anticipated effect on petitioner's service and business, not to construct its lines on the same side of the highway on which petitioner's lines are located and that respondent, although urged by the petitioner to remove its lines to the other side of the highway, has neglected and refused to do so. The Commission was therefore asked to require respondent to thus remove its poles and lines. *Held*: That it would be much better if the high tension lines, or the telephone line were changed to opposite sides of the highway, but that the Commission is without jurisdiction in the matter; that it is the duty of the telephone company under the circumstances to render its service adequate at its own expense, if respondent is unwilling to bear the same, and that if it has any remedy, it must seek it in court. The petition is dismissed. *Ebenezer Tel. Co. v. M. L. H. & T. Co.*, 619, 621.

32. The petitions allege in substance that respondent's construction of a high tension transmission line in close proximity to petitioners' telephone lines interferes with the furnishing of proper telephone service by petitioners and causes them damage, and the Commission is asked to take such action as it deems proper in the premises. It appears that the Platteville, Rewey & Ellenboro Tel. Co. maintains grounded lines along the Lancaster-Platteville highway from its central office at Platteville to Ellenboro, and thence to Lancaster; that the highway has been occupied for such purpose approximately eighteen years; that the highway between Ellenboro and Lancaster and between Lancaster and Fennimore is occupied by the lines of the Farmers' Tel. Co. of Beetown, all but one of which are grounded circuits; that respondent has constructed power transmission lines from Platteville to Lancaster, and from Lancaster to Fennimore, and that such lines which carry a voltage of 33,000 were placed in operation in October 1914 and are for the most part on the side of the highway occupied by petitioners. It also appears, from the reports of the Commission's engineer, that in order to secure adequate service, it is necessary that the lines of the petitioners, which now parallel respondent's transmission lines, be moved to the opposite side of the highway and made full metallic. *Held*: That for the reasons stated in the case of *Ebenezer Tel. Co. v. Milwaukee Lt. H. & T. Co.*, decided as of the same date as the present case, the Commission is without jurisdiction and the petition must be dismissed. The petition is dismissed. *Platteville etc. Tel. Co. et al. v. Lancaster El. Lt. Co.*, 622, 625.

Requirements as to service and facilities—Adequacy of service—

Issuance of directories.

Requirements as to service and facilities—Adequacy of service—

Need of additional trunk line.

33. Trunking conditions are becoming inadequate for good service, and irrespective of the pay-station problem, an additional trunk line is required between Onalaska and La Crosse. Either all the business houses should have pay-station service or it should be abolished altogether. The cost of installing the additional stations would exceed the cost of another trunk line to La Crosse. Troubles usually encountered with nickel phones tend to condemn their use in a small town and their abolition in the present case would effect economies, and they should be abolished. While the company is under no obligation to serve non-subscribers free, the toll rate now in force for nonsubscribers' calls is ample protection if properly enforced, and some of the calling by non-subscribers can probably be eliminated by the coöperation of subscribers with the company. Ordered: That respondent construct and maintain one additional trunk line between Onalaska and La Crosse. *Coady et al. v. La Crosse Tel. Co.*, 831, 838.

Requirements as to service and facilities—Adequacy of service—

Number of instruments per toll line.

See ante, 26.

Requirements as to service and facilities—Adequacy of service—

Number of subscribers per line.

See also ante, 28; post, 39.

34. We are of the opinion that not more than four parties should be placed on one line in the villages and cities, except in cases where urban subscribers ask to be placed on rural lines. *In re Appl. New Lisbon Mut. Tel. Co.*, 280-282.

Requirements as to service and facilities—Adequacy of service—

Provision against failure of lighting or power service, fires and storms, sudden increases in traffic, illness of operators, or other emergencies which would seriously impair service if not promptly met.

See ante, 29; post, 39.

Requirements as to service and facilities—Adequacy of service—

Provision for sufficient switchboard capacity and operating force to handle traffic at all times.

See post, 39.

*Requirements as to service and facilities—Adequacy of service—
Provision for one through line.*

See ante, 22; post, 39.

*Requirements as to service and facilities—Refusal to extend
service.*

35. The Commission, on its own motion, investigated the refusal of the Oconto Rural Tel. Co. to restore service to Charles Epavier. It appeared that the wife of the former subscriber here in question was responsible for an infringement of the company's rules, forbidding "listening in" and the use of coarse or abusive language on the lines; that as a result thereof and of alleged other similar incidents the company disconnected the service; that, in spite of the Epaviers' willingness to agree faithfully to observe all the rules and regulations of the utility if services were restored, the company rejected all propositions for reconnection conditionally or otherwise; and that nearly eight months' time had elapsed since the deprivation of the service complained of. The company urged the fact that several subscribers threatened to withdraw their patronage if service should be restored to the Epaviers. *Held:* The regulation of the company prohibiting subscribers on party lines from "listening in" except to ascertain whether the line is open or busy is reasonable. However, while persistent and gross infractions of telephone utility rules might warrant a permanent exclusion from the use of the utility service, the "listening in" and remarks following were not of a character, in the present case, to warrant depriving the Epaviers of telephone service indefinitely. After suspension of service for a reasonable time, reconnection should have been made voluntarily by the company. The threats of several subscribers to withdraw their patronage should be given little or no weight, as it is the duty of a utility to serve without discrimination, under reasonable rules and regulations, all people desiring service who subscribe to and abide by such regulations. The Oconto Rural Tel. Co. is ordered to forthwith reinstall telephone service for Charles Epavier. *In re Refusal Oconto Rural Tel. Co. to Extend Service, 277-279.*

36. Complaint was made that the respondent refuses to install telephones for all its applicants along its line, upon request, at the usual rental, and the Commission was asked to take such action as it deems just in the premises. The respondent operates a toll line from Rice Lake to Birchwood, connected with the public toll station at Mikana and Angus, and also a rural line extending north from Rice Lake to a point about one and one-half miles south of Mikana. The petitioners live north of the last station on the rural line and wish to have local service connected directly with the Rice Lake exchange. Subsequent to the hearing respondent sold its Birchwood exchange to the Wise Tel. Co. under an agreement by the latter not to install any lines for local service within one mile of respondent's toll station at Mikana. It appears that a few patrons have been given service over respondent's toll line upon payment of a rental of \$5.00 per month, and that a similar connection has been offered other parties at the same rate. The respondent contended that to extend the rural line in question, or to construct an additional line for the service of petitioners would decrease the revenue derived from its toll stations at Mikana and Angus. *Held:* That the fact that the extensions in question would probably decrease the number of toll calls made from Mikana is not entitled to consideration, since respondent can not limit the local service in order to increase the revenue derived from toll service; that a contract between two telephone companies dividing the territory in which they render service is valid, if such division is not contrary to public policy, *McKinley Tel.*

Co. v. Cumberland Tel. Co. 152 Wis. 359; that the agreement between the Wise Tel. Co. and respondent is not inimical to adequate service; that those of the petitioners who live in the territory allotted to the Wise Tel. Co. in the agreement in question should apply to that company for service from its Birchwood exchange; and that if the rates now in effect prove unremunerative after the extensions have been made, the respondent has the privilege of making application to the Commission for a readjustment of rates. Ordered: That the respondent extend its rural telephone service from its exchange at Rice Lake to all persons living within a reasonable distance of its toll line, and south of a line one mile north of its existing toll station, and who demand such service. Sixty days is considered a sufficient time for compliance with the order. *Brooks et al. v. Barron County Tel. Co.*, 499, 501.

*Requirements as to service and facilities—Adequacy of service—
Switching service.*

37. Nothing can be done in the instant case toward securing connection between the two companies until the petitioner settles its own disputes and has its line or lines built to the city limits of Mineral Point ready to connect with the petitioner in accordance with the terms of the order issued June 7, 1912, *In re Appl. Mineral Point Tel. Co. for Authority to Increase its Rates for Switching Service*, 9 W. R. C. R. 285, 304. The petition is dismissed. The respondent would be within its rights in treating this application for service as the application of an entirely new rural line and insisting that the requirements for a full metallic line with a limited number of subscribers and other requirements set forth in the order cited above, be met by the petitioner's line before service is furnished. If the subscribers on the Mineral Point end of the line carry out their intention of building their own line to Mineral Point, the respondent must furnish them service provided they have a metallic line with a limited number of subscribers. If the parties remaining on the Diamond Grove line between Mifflin and Mineral Point desire connection with Mineral Point, it will be possible for them to obtain that connection by establishing a line upon the proper basis and with a proper number of subscribers to the city limits of Mineral Point. *Diamond Grove Tel. Co. v. Mineral Point Tel. Co.*, 185, 187, 188.

Toll service.

See post, 39.

Requirements as to service and facilities—Adequacy of service—

Uniform service, rates, rules, etc.

38. As regards the application of the La Fayette County Tel. Co. for an order fixing uniform service, rates, rules, etc. among telephone companies in La Fayette county, it seems that each of the rural companies involved occupies a more or less clearly defined territory, and that there is little if any destructive competition, and no evidence of improper competitive practices. In the city of Darlington, while the Darlington Farmers' exchange (maintained and operated jointly by the three petitioners) does charge a lower rate, it also appears to offer a different grade of service from that of the La Fayette County Tel. Co., and to have made no special effort to develop business within the city of Darlington, so that such competition as there is, is not very aggressive. *Held:* Although in certain cases the Commission has established uniform rates and practices for utilities operating in the same city, thereby preventing rate wars with their wasteful duplication and almost inevitable consolidation, it does not appear, under the circumstances of the present case, that there should be an order fixing uniform rates, rules, regulations and service among telephone utilities operating in La Fayette county, or placing the rates in Darlington, of the Darlington Farmers' exchange and the La Fayette County Tel. Co. upon the same basis. To secure uniformity of service on telephone lines throughout La Fayette county, it would be necessary to require the same methods of construction of all companies—an action not considered advisable at the present time. It is believed that sufficient standardization will be secured through compliance with the standards of telephone service prescribed by the Commission. (*In re Standards Telephone Service, 1914, 15 W. R. C. R. 1.*) *Held:* That the application of the La Fayette County Tel. Co. for an order fixing uniform rates, rules, service and regulations be dismissed. *Belmont & Pleasant View Tel. Co. et al. v. W. O. Tel. Co., 92, 100-102.*

Requirements as to service and facilities—Reconnection.

See ante, 35.

Standards of service—Establishment of.

39. The Commission is required by the Public Utilities Law to establish standards of adequate service for public utilities. Notice of hearing to consider this question was served on all the telephone utilities of the state. A large number participated, and tentative rules were submitted. Later a second hearing was had. The rules and regulations promulgated in the present order were thus formulated after full and careful consideration. Rule 1. Equipment and lines shall be so constructed and maintained as to eliminate all cross-talk and noise which unreasonably interfere with the transmission of messages for ordinary distances. Rule 2. The number of subscribers on any one line shall not be greater than that consistent with adequate service. Rule 3. Each utility furnishing service alone or jointly with other utilities in two or more cities, villages or other exchange points, shall provide at least one

line for through traffic between such points, along which few if any subscribers' instruments are installed. Rule 4. Each utility shall maintain in proper condition the lines, instruments and other equipment used on its system and shall make such tests and inspections as are necessary. Rule 5. Each exchange shall have sufficient switchboard capacity and a sufficient operating force to handle the traffic at all times with reasonable facility. Traffic studies shall be made and recorded, of such extent and frequency as to demonstrate to the Commission that sufficient equipment is in use and that an adequate operating force is employed. Rule 6. Reasonable provision shall be made against the failure of lighting or power service, fires and storms, sudden increases in traffic, the illness of operators, or other emergencies which would seriously impair the service if not promptly met. Rule 7. At exchanges serving five hundred or more subscribers 94 per cent of the calls should be answered within ten seconds or less. At all other regular exchanges 90 per cent of the calls should be answered within ten seconds or less. At small exchanges, operated in connection with other work, slower service may be adequate. Calls shall be carefully supervised and parties disconnected promptly after conversations are completed. Rule 8. Suitable rules and instructions shall be adopted covering the phraseology and methods to be employed by operators in handling regular and special calls. Rule 9. Directories in which 1,500 or more subscribers are listed shall be revised at least semiannually. All other directories shall be revised at least once each year. All directories shall be dated. Rule 10. Directories shall contain such instructions and rules governing local and toll service and methods of payment as may be necessary to inform subscribers of their rights and obligations. Rule 11. Reasonable efforts shall be made to eliminate interruptions and irregularities, and to correct them promptly when they occur. Records shall be kept of all complaints or irregularities in the service, showing the day and time at which the trouble is reported, the nature of the trouble, its duration and final disposition. Rule 12. The name and address of the official or employe designated to handle service matters and a copy of each new directory shall be filed with the Commission. Upon request a complete map of each telephone system shall be filed with the Commission, and a similar map shall be kept at the principal office of each utility and revised from time to time as changes in the system are made. No specific rules are prescribed with regard to toll service, but general provisions are made for the testing of circuits, the reporting of trouble on circuits, accurate devices looking to correct toll charges, the avoiding of unnecessary delay on account of toll business, correct methods on the part of the operators, and the recording of the condition of long distance circuits entering each exchange. It is ordered that all telephone utilities operating in the state of Wisconsin comply with the rules and regulations promulgated in the present order. Sixty days is deemed a reasonable time for compliance. *In re Invest. Standards for Tel. Service in Wisconsin*, 1, 7.

TRAIN SERVICE.

Discrimination as between shippers, *see* DISCRIMINATION, 4-5.

Adequacy of train service.

1. Complaint was made that the passenger train service furnished by respondent at Devil's Lake, Wis., is inadequate, and the Commission was asked to require respondent to stop northbound train No. 505 and southbound train No. 510 at Devil's Lake to receive and discharge passengers during the period from June 1 to October 1 each year. It appears that Devil's Lake station is three miles south of Baraboo, at which all passenger trains stop; that at present three trains each way

stop at Devil's Lake, and that train No. 505 is a heavy steel train operated for through traffic between Chicago and Minneapolis. Respondent offered to make Devil's Lake a regular stop for train No. 503, and a flag stop for train No. 510, such service to be afforded from June 1 to September 15. *Held*: That with such additional accommodation the train service at the point in question will be reasonably adequate under existing conditions. The respondent is ordered to furnish such service. *Bissell v. C. & N. W. R. Co.*, 435, 437.

2. The petition alleged that conditions warrant the establishment of a passenger stop at Hinkle on respondent's line between Kimball and Hurley in Iron county, and the Commission was asked to require the respondent to stop its trains known as numbers 19, 122, 24 and 23, daily except Sunday to receive and discharge passengers. Prior to 1910 a lumber camp was maintained in the vicinity of Hinkle, and, to take care of the traffic incident to the enterprise, a sidetrack was built, several trains stopped to receive and discharge passengers and a box car shelter provided. Upon the abandonment of the lumber camp, the train service was withdrawn and the shelter and sidetrack removed. It appears that the surrounding country is not heavily populated and that the trading center at Hurley is accessible by means of a newly constructed highway, and it does not appear that the petitioner and other residents of Hinkle are subjected to unreasonable hardships or compelled to travel an unusual distance to Kimball or Hurley for railway service. *Held*: That under all the circumstances, the granting of the prayer of the petition would not be justified, and that the petition must be dismissed. *Hariu v. C. & N. W. R. Co.*, 502, 504.

3. Complaint was made that the respondent does not furnish adequate train service or station facilities at Sunnyside in Douglas county, and the Commission was asked to take such action as it deems proper in the premises. It appears that Sunnyside is about ten miles south of Superior; that its present service consists of a morning southbound mixed train, and an afternoon northbound mixed train; that the former is usually on time, but the latter very irregular; that there is no shelter for passengers or freight at the point in question and that persons while waiting are at times exposed to severe discomforts from rain and cold, and that, on account of the schedule of the two mixed trains, it is necessary for a resident of Sunnyside, when the northbound train is late, to spend two nights in Superior in order to be there during office hours for the transaction of business. It was urged that the northbound and southbound Chicago-Duluth Limited trains be stopped at Sunnyside for the convenience of passengers. It was also contended that with a more favorable service the milk and cream business would develop substantially and it was sought to have the northbound morning Chicago-Duluth Limited stopped for milk and cream. The traffic situation immediately involved was considered, and also the service afforded places of equal importance with that of Sunnyside on other lines of railroad in Douglas county, the inquiry in the latter having reference to time allowed patrons for the transaction of business in Superior. *Held*: That the station facilities and train service are inadequate; that the latter gives rise to a condition which does not exist at any station of equal importance on other lines of railroad in Douglas county and that, even with the stopping of the northbound through train, the respondent's patrons at Sunnyside would not be as well served with reference to access to Superior as the patrons of other stations of similar importance in the county, but that the stopping of the latter to carry milk and cream would not be justified under the circumstances of the present case. *Ordered*: That the respondent provide at the point in question a suitable building, which shall be adequate for freight and passenger traffic; that it submit plans to the Commission for approval;

that it employ a competent caretaker for the building, and that it stop its northbound through train at Sunnyside on signal to receive and discharge passengers, or, at its option, provide other daily passenger service which will enable residents of Sunnyside to reach Superior before noon. Sixty days is considered a reasonable time for the erection of the building ordered. *Keup et al. v. M. St. P. & S. S. M. R. Co.*, 459, 464.

4. Complaint was made that milk shippers at Calhoun are now obliged to have their shipments ready at what is an unreasonably early hour during the winter months, and that respondent's failure to furnish later service, as requested, is discriminatory as train No. 610 furnishes such service to towns west of Calhoun, but not to Calhoun itself. Train No. 610 leaves Jefferson Junction at 9:10 a. m. and serves milk shippers on the line between that point and Milwaukee, with the exception of those at Calhoun. It also served the latter until the summer of 1914, when the service was discontinued on the ground of the delay the stop occasioned. From an investigation it appears that the present service to Calhoun could be run at a later hour. *Held*: That the service rendered to the shippers of milk and cream at Calhoun is unreasonably discriminatory, if it is practicable to give them later service similar to that accorded other shippers; that train No. 610 can probably continue to furnish the desired service, which was recently discontinued, without serious hindrance, but that if respondent prefers to furnish the shippers in question a service comparable with that accorded other shippers on the same line in some way other than by stopping train No. 610, such an arrangement will be satisfactory. *Ordered*: That respondent stop train No. 610 at Calhoun to receive shipments of milk and cream during the period from December 15 to March 15 each year, or, at its option, provide other service during the forenoon, such service to leave Calhoun not later than 8:30 a. m. *Milw. Milk & C. Shippers of Calhoun v. C. & N. W. R. Co.*, 638, 640.

5. Complaint was made that train No. 105, northbound, on the line of the C. & N. W. Ry. Co., and train No. 3, westbound, on the line of the G. B. & W. R. R. Co., fail to connect at New London Junction at the present time, though such connection was made prior to 1911, and it was alleged that the lack of such connection renders the service of the respondent unreasonable and unjustly discriminatory. Train No. 105, a strictly intrastate train, has been superseded, since the filing of the complaint, by train No. 153, an interstate train. The two trains involved are scheduled to arrive 26 minutes apart. Their failure to connect shortens the time that patrons of the G. B. & W. R. R. Co. west of New London Junction are able to spend in Appleton, their trading center, by about two hours, and necessitates their spending the night in Appleton, or returning via Green Bay at additional expense. The total population of the territory which might be benefited was estimated at between 16,000 and 20,000 people. Important connections, impracticability and danger of increasing the speed, interference with the proper maintenance of the schedule, and the interstate character of train No. 153 on the line of the C. & N. W. R. Co. were urged as reasons why the trains in question should not be required to connect. *Held*: That it is entirely feasible to make the connection prayed for without breaking any important connections of either train, or creating unsafe operating conditions; that it is unreasonable that two trains scheduled to arrive at an important junction only 26 minutes apart should fail to make connection, unless such an arrangement would disrupt more important connections or create dangerous operating conditions; that adequate service requires that a connection be made at New London Junction between the two trains in question, and that the Commission will not hesitate to require an interstate train to stop or make proper connections within the state when such changes are necessary for adequate service. *Ordered*: That the respondents so operate the trains in ques-

tion that they connect for the interchange of passengers at New London Junction at 6:47 p. m. On account of the difficulty in severe winter weather of maintaining a schedule ordinarily ample, April 1, 1915, is fixed as a reasonable date for the making of the connection ordered. *Nolan et al. v. C. & N. W. R. Co. et al.*, 588, 592.

6. The petitioners request that the respondent be required to operate an additional passenger train in each direction daily between Green Bay and Laona. The present service consists of a passenger train in each direction, and freight train service, said to be generally late, over part of the branch. The difficulty complained of is the inconvenience, and time necessarily lost by patrons of this line in transacting business under the existing arrangements in Green Bay, and also in doing so at Laona and points north. The population of the district concerned, the passenger revenues therefrom, and the cost of operating the additional service prayed for, were considered. It appears that though the territory is in process of industrial transition and agricultural products are considerable, forest products still predominate in the business of the branch line in question. *Held*: That, while the service in question is poor as compared with that of more densely populated communities, it cannot be classed as inadequate in the present case, all things considered, and that, while with the further development of the country some additional service will probably be warranted, an order would not be justified at the present time requiring respondent to operate a new train in each direction at a considerable loss. The petition is dismissed. *Schmitt et al. v. C. & N. W. R. Co.*, 758, 761.

7. The petitioner asks: (1) that the C. St. P. M. & O. Ry. Co. and the M. St. P. & S. S. M. Ry. Co. be required to establish flag stops at the junction point of the former's Park Falls line and the latter's Superior division and (2) that the M. St. P. & S. S. M. Ry. Co. be required to establish flag stops at the intersection of its Superior division and its line to Reserve. At both junction points the crossing is made by one railroad passing over the other on an elevated trestle and it would be necessary for the safety of passengers boarding or alighting from trains at these points to widen the embankments and construct suitable walks connecting the upper and lower grades. *Held*: The present traffic is too slight to warrant the expenditure which would be necessitated by the establishment of the stops requested. The petitions are dismissed. *Senty v. C. St. P. M. & O. R. Co. et al.*, 155, 157.

8. Complaint was made that the respondent was failing to operate certain trains on its Dodgeville branch so as to regularly connect at the junction at Dill with the trains of the C. M. & St. P. Ry. Co.; that the time available for the transaction of business at Dodgeville between the arrival of the morning train northbound, and the departure of the latest train southbound is insufficient, and that under the existing arrangement it is often necessary to carry less than carload freight from stations north of Dill to Dodgeville, and deliver it on the return trip, thereby causing delay and injury to less than carload freight. It appears that the trains complained of are frequently very late, so that connections at Dill are uncertain; that the morning northbound train is also frequently very late, so that persons living at points south of Dodgeville cannot depend on having more than a couple of hours for the transaction of business in Dodgeville if they return the same day; that about 18 per cent of the passenger traffic on the branch in question transfers at Dill, and that the number would be increased if surer connections were established at that point. The service involved was investigated in two previous cases, *Knapp v. I. C. R. Co.* 1910, 5 W. R. C. R. 176, and *In re Dodgeville Branch of the I. C. R. Co.* 1912, 10 W. R. C. R. 572. It was suggested that a later southbound train to connect with the westbound train at Dill would afford more time between trains at

Dodgeville, and also more satisfactory service for persons wishing to travel west of Dill. *Held*: That the quantity of service rendered by the respondent is sufficient, considering the traffic conditions, but that the quality has been very poor, owing to the lateness of trains; that the respondent has not complied with the order in the case, *In re Dodgeville Branch of the I. C. R. Co.* 10 W. R. C. R. 572; that the present complaint would apparently be satisfied if that order should be strictly complied with, and that unless the service is materially improved so as to comply with such order, the Commission will take the necessary steps to insure its enforcement. The petition is dismissed. *Watrud v. I. C. R. Co.*, 449, 453.

9. Complaint was made that the passenger train service at Allens Grove was inadequate and that Bardwell was not provided with a suitable walk or road to a public highway. Bardwell is a junction point between two branches of respondent's system, and is 1.7 miles east of Allens Grove station, and 2.5 miles west of Darien. The train service now afforded Allens Grove was considered, and the revenues arising therefrom. As regards Bardwell, it appeared that a station was made necessary at that point by reason of an intersecting line and interlocking plant, and that the local traffic would probably not warrant a station independently of the transfer business. *Held*: The train service at Allens Grove is reasonably adequate for the present. As to Bardwell, it devolves upon the town board to construct a suitable public highway to the station, if the additional convenience of boarding trains at Bardwell instead of Allens Grove or Darien is regarded by the community as warranting such an expenditure. *Wilkins & Wilkins v. C. M. & St. P. R. Co.*, 18, 20.

10. Complaint was made that the transportation facilities heretofore furnished by the respondent to State Fair Park in West Allis, near the city of Milwaukee, during State Fair week have been insufficient and inadequate, and the Commission was asked to require the respondent to operate sufficient and adequate special train service between its union station in Milwaukee and its stations at West Allis and Elm Grove during the period in question. It appears that respondent operates a line which branches off from the main line a short distance east of Merrill Park, passes the State Fair Park, and connects again with the main line at Elm Grove. Petitioner desires that all passenger trains be routed via this line during State Fair week, or that a shuttle train be operated hourly between the union station in Milwaukee and Elm Grove via the State Fair Park. The line in question, formerly used for east-bound passenger traffic, is now devoted exclusively to freight business. It seems that to divert regular passenger trains via the fair grounds, as requested, would conflict with the company's postal contract to deliver mail at intervening points on the main line. In addition it was evident that such a diversion would be unsafe for the traveling public, owing to the track layout and operating conditions on the line in question, an objection equally applicable to the operation of a shuttle train over that line. It also appeared that there was no evidence which would enable a determination as to the feasibility of loading and unloading passengers at the park in connection with the use of the available track facilities for handling exhibits. *Held*: The safety of the traveling public, rather than its convenience, must control in the present case. The operation of passenger trains through freight terminals and over lines used exclusively for freight service is unusually hazardous. While it might be possible that with careful supervision passengers could be transported to the fair grounds over the proposed route, the danger would be greater than under usual methods of operation, and the saving of five minutes or even a half-hour in reaching the fair would not be a sufficient justification for subjecting passengers to unusual danger. *Wis. St. Brd. of Agriculture v. C. M. & St. P. R. Co.*, 110, 116.

Adequacy of train service—Milk train.
See ante, 4.

Adequacy of train service—Sleeping car service.

11. Complaint was made that an arrangement by which a sleeping car is now set out at Oshkosh by respondent's train No. 224 at 10:27 p. m. daily, and is picked up by train No. 102 at 2:42 a. m., passing through Fond du Lac at 3:15 a. m., makes it necessary for patrons who live at Fond du Lac to await its arrival at an unusual hour, or travel to Oshkosh at an increased expense to board it, and it was alleged that to require train No. 224 to carry this sleeping car through to Fond du Lac arriving there at 11:20 p. m. would be more satisfactory to patrons at Fond du Lac, and would not seriously discommode patrons at Oshkosh. The Commission was therefore asked to require respondent to set out the sleeping car in question at Fond du Lac instead of Oshkosh. It appears that the sleeping car under consideration is operated primarily for the accommodation of persons in Appleton, Neenah, Oshkosh and Fond du Lac, and the territory tributary thereto, who desire to make the trip to Chicago during the night; that relatively few people use the sleeper to travel to Milwaukee or other Wisconsin points, and that the chief complaint is that residents of Fond du Lac who desire to make early train connections at Chicago are inconvenienced by reason of the fact that they are obliged to sit up until 3:15 a. m. or travel to Oshkosh to obtain accommodation on this sleeping car. *Held:* That the Commission is without jurisdiction; that to grant the relief sought would necessitate the regulation of interstate passenger service, which is beyond the jurisdiction of the Commission, except where such regulation is necessary for adequate intrastate service, which is not the case in the present proceeding, and that the petition must therefore be dismissed. The petition is dismissed. *Fond du Lac Business Men's Ass'n v. C. & N. W. R. Co.*, 606, 608.

Adequacy of train service—Sunday excursion train.

12. Complaint was made that respondent's failure to operate its summer Sunday excursion train from Superior beyond Lake Nebagamon results in inadequate Sunday train service at Winnebijou, Campbell's Mill, and other points between Lake Nebagamon and Iron River or Bibon. The case is a continuation in substance of *Hughson v. D. S. S. & A. R. Co.* 1913, 13 W. R. C. R. 406, in which the Commission, after due consideration, issued an order requiring the respondent to stop the train in question, then operated to Bibon, at Winnebijou. In the summer of 1914, however, the train was operated only as far as Lake Nebagamon, 5½ miles west of Winnebijou, thereby depriving the latter place of the facilities of that train. It appears that it is now practically impossible to get from Superior to stations on respondent's line east of Lake Nebagamon, and back on Sunday. However, the villages of Winnebijou and Campbell's Mill receive the full quantum of train service required by statute, and also all that is warranted under present conditions, so that the question is not strictly one of adequacy of train service. The respondent contended that the increased business resulting from an extension of the run of the train in question would not compensate the company for the increased cost of its operation, and that the Commission is without jurisdiction, because the train is in-

terstate, and because, being a Sunday excursion train, it is a form of special service, which the Commission has no authority to order extended. *Held*: That the Commission is without jurisdiction; that the reason is not the interstate character of the train; that, on the contrary, the Commission has jurisdiction over interstate trains with respect to adequacy of train service, so long as the jurisdiction is not so exercised as to be an unwarranted interference with interstate commerce; that the reason for the absence of jurisdiction is that excursion train service is a special form of service, which the railroad is not compelled to furnish and which, if it does furnish, is wholly within its discretion as to time and extent of service, subject only to the general police power of the state with respect to public health, safety, or equal rights; that when the respondent operated the train beyond Winnebijou, and failed to stop, the Commission's jurisdiction arose in its authority under the statute to prevent discrimination, but that as the respondent now sees fit to furnish the special service only as far as Lake Nebagamon, the Commission cannot intervene to compel it to be furnished to more distant stations. The petition is dismissed. *Hughson et al. v. D. S. S. & A. R. Co.*, 599, 605.

Adequacy of train service—Sunday train.

13. Complaint was made that the Sunday passenger train service furnished by respondent between Prairie du Chien and Madison, with particular reference to the service west of Lone Rock, is inadequate and discriminatory, and the Commission was asked to require the respondent to render adequate service in this district. On week days passenger train service between Lone Rock and Prairie du Chien consists of three trains in each direction. On Sundays passenger train service is afforded only as far as Lone Rock, at which point it branches off to Richland Center. West of Lone Rock mixed service only is offered on Sunday, and complaint was made that the train in question is rarely on time. It appears that under the existing service, residents of Boscobel, Muscoda and other stations between Lone Rock and Prairie du Chien are unable to reach Madison, Milwaukee, or other points east for the transaction of business on Monday morning unless they leave Saturday evening and spend Sunday away from home. From an investigation of operating conditions on the division in question it appears that it would be feasible to utilize certain train crews, which now lie over at North McGregor, in the operation of a new train to Madison in the forenoon, returning to North McGregor in the evening, and that such a plan would not entail as great an expense as the plan suggested by respondent's superintendent. *Held*: That the Sunday passenger train service furnished by respondent between Madison and Prairie du Chien is inadequate; that the operation of a passenger train in each direction between the points in question is necessary; that the plan of an eastbound morning train, returning in the evening, would be of more service to the community than other plans suggested, and that such service should prove remunerative after a fair trial, but that if it should not, the case may be reopened on application. Ordered: That respondent operate a Sunday passenger train in each direction between Prairie du Chien and Madison, scheduled to arrive in Madison not later than 10:30 a. m. and to leave not earlier than 2:30 p. m. *Blaine v. C. M. & St. P. R. Co.*, 652, 655.

DETERMINATION OF VALUE OF PROPERTY OF PUBLIC UTILITIES—ELEMENTS CONSIDERED.

Damages to owner of joint property.

1. The difficulty that confronts us in this case is the fact that there must be a separation of the electric property from the mill property, and as such separation must necessarily result in leaving to the owners of the property certain units which are necessary and required for the operation of the mill as well as of the electric plant, damages must be included for the injury inflicted upon the owner of the property. (*In re Cashton Light & Power Co.* 1908, 3 W. R. C. R. 67.) *In re Purchase El. Pl. of Prairie du Sac Mill & Lt. Co.*, 360, 363.

Going concern.

2. The village contended that the value of the physical property fixed by the engineers in their last inventory was somewhat excessive. The testimony of the engineer of the village, however, is not convincing. His estimate was based upon the theory of disposing of the plant piecemeal and not upon the theory of the plant being in its entirety an operating unit rendering service. Of course, no valuation based on any other theory than that of the plant being a going concern can be accepted under the ruling of the courts. *In re Purchase El. Pl. of Prairie du Sac Mill & Lt. Co.*, 360, 362.

3. The value to be fixed must be the value of the going concern, and not the value of the physical plant, as an entity distinct from the business in which the company is engaged. To determine this fair value consideration must be given to such elements as the value of the physical property, the going value, the cost of securing money, etc. *In re Purchase Janesville Water Works Plant*, 674, 676.

Going value—Net cost of building up the business.

4. As regards the question of going value, the matter must be determined from the evidence in each particular case, and there is nothing in the record in the present case to justify as large an allowance as claimed by the company. *In re Purchase Janesville Water Works Plant*, 674, 691-692.

In general.

5. In view of the numerous discussions of the subject contained in former decisions of the Commission, it becomes unnecessary to again

review the elements that must be considered in determining the fair value of the property of a public utility. In *Appleton Water Works Co. v. Railroad Commission*, 154 Wis. 129, the principles that must guide in determining the just compensation to which a public utility is entitled when its property is taken over by a municipality are very clearly stated and have been followed in arriving at an award in the instant case. *In re Purchase of Grand Rapids El. Co.*, 258, 270.

Physical property—Cost of reproduction new—Depreciation.

6. The company's contention that because the property is a continuous property which will probably never be entirely scrapped at one time, it should be considered that there has been no element of depreciation which should be deducted from the cost of reproduction is not tenable, and the best evidence as to physical depreciation in the present case is the valuation made by the engineering staff with the modification noted. *In re Purchase Janesville Water Works Plant*, 674, 695.

Physical property—Cost of reproduction new—Discounts on bonds.

7. As regards the question of an allowance for discount on bonds, such allowance may be reasonable, when the discount is a normal and reasonable cost of getting money to finance a needed utility, and in the present case some weight must be given to the fact that the bonds in question were sold at a discount to provide money for an enterprise reasonably necessary for the public service. *In re Purchase Janesville Water Works Plant*, 674, 690.

Physical property—Cost of reproduction new—Water power.

8. A value of some \$80,000 might be claimed because of the estimated saving from operation by hydraulic power except for the fact that other circumstances cast further doubt upon its worth. First, the company does not possess an auxiliary or reserve power of any kind and consequently the value which would exist in power continuously supplied is now more or less dormant. Secondly, the saving which has been determined by means of the foregoing estimates presupposes that the applicant would be able to dispose of a large quantity of steam-electric power or of hydro-electric power aided by steam service under a schedule of rates based on costs for such service; but there is nothing in evidence to demonstrate the marketableness of the power under those conditions. With these facts in mind it appears that \$80,000 is about the maximum value that could be fairly allowed for the water power rights under the present conditions. This amount added to the value of physical property, working capital and going value, would bring the total valuation to approximately \$200,000. *In re Appl. Rhinelander Power Co. to Amend Its Rates*, 783, 809.

DETERMINATION OF THE VALUE OF PROPERTY OF PUBLIC UTILITIES—METHODS OF APPRAISAL.

Determination of value of physical property from records of utility.

9. No valuation of the physical property has been made in this case, as both plants have been built in recent years, and as we have a fairly complete statement of the amounts spent in their construction. *In re Invest. Waterloo Mun. W. & El. Plant*, 534, 542.

*Determination of the value of physical property of the plant—
Cost of reproduction new.*

10. Whether the proper method of physical valuation represents the cost of replacing units identical with those in the existing system, or merely the cost of replacing the units in the existing system with equivalent units was a question involved in the proper value assignable to a number of items. *Held*: That neither method is final, as determining the cost new or present value of the property; that both may be of evidentiary value in the determination of actual fair value of the property, and that, when, as in the present case, there is nothing to indicate that the original investment was unwisely made, it seems only reasonable to accept as evidence bearing upon their value as a part of the plant to be transferred the actual cost of the items, or the cost of replacing them by identical units. *In re Purchase Janesville Water Works Plant*, 674, 685, 686.

DETERMINATION OF THE VALUE OF PROPERTY OF PUBLIC UTILITIES—VALUATION IN PARTICULAR CASES.

Electric utilities—Berlin Public Service Co., Berlin.

11. A valuation of the physical property as of June 30, 1913, shows a cost of reproduction new of \$100,852 and a present value of \$74,361. *Jones et al. v. Berlin Public Service Co.*, 121, 125.

Electric utilities—Grand Rapids El. Co., Grand Rapids.

Saving from operation of electric plant by hydraulic power as element considered in determining value of electric utility, *see* VALUATION, 8.

DAMS.

Dams constructed and operated without authority of law—Status of.

1. It is contended by the counter-petitioners that the petitioners' McClure dam is an illegal structure, being constructed and operated with no authority from either the legislature or the Commission. Sec. 1596—59 of the Water Power Act allows a period of six months after which a dam operated without authority shall become a public nuisance. As the dam in question was finished a few days prior to the date at which the Water Power Act went into effect, and even if its construction had not been completed until after the act went into effect, the petitioner could have operated it without a franchise for the period of six months allowed by statute, so that the dam cannot be said to be in any sense a nuisance under the Water Power Act. *In re Appls. for W. P. Franchise on Apple River*, 712, 721.

When considered a public nuisance.

See ante, 1.

WATER POWER FRANCHISES.

Condition under which franchises may be granted.

2. The provisions of subsec. 6 of sec. 1596—69 do not apply to the New Richmond Roller Mills Company, for neither is it a "grantee" within the meaning of the term as used throughout the Water Power Act, nor is the Huntington dam included within the terms of the section quoted. The "coupling up" referred to applies to dams of less than 250 horse power and to dams for which a franchise has been granted under the Water Power Act, and the Huntington dam is neither of these, and as no franchise has as yet been granted to the petitioner to operate the

McClure dam, it is in no sense a grantee. It is not obligatory, therefore, that the petitioner organize under the provisions of sec. 1596—62 of the statutes in order to become eligible for a franchise under the Water Power Act. *In re Appls. for W. P. Franchise on Apple River*, 712, 721.

Franchises granted in particular cases.

3. This proceeding involves two independent applications for a franchise under the 1913 Water Power Act,—sec. 1596—50 to 1596—79, inclusive, of the statutes. The New Richmond Roller Mills Co. desires a franchise to maintain and operate its “McClure dam,” which it constructed on the Apple river in St. Croix county prior to the taking effect of the 1913 Water Power Act and which it desires to operate in conjunction with its previously constructed “Huntington dam,” in order to use the combined energy of the two in generating power for the city of New Richmond and for other purposes. The other applicants, C. W. Arnquist, J. M. Arnquist, and Kate Tholien, desire a franchise to construct, maintain and operate a dam and hydraulic plant on the same river somewhat below the McClure dam. They propose two sites for a location, one of which, “site B”, if adopted, would make impossible the continuance of the McClure dam, as the pondage contemplated for the dam there planned includes that now belonging to the former. The other, “site A,” would not interfere with the McClure dam. Site “B,” however, is favored by the applicants on account of the greater development possible at that point. They oppose the granting of a franchise to the New Richmond Roller Mills Co. on the grounds that the McClure dam was constructed without legislative authority and is thereby a public nuisance; that the dam is not a safe nor substantial structure; and that the dam they propose and favor is adapted to the service of furnishing variable power during 24 hours of the day, and that such is not the case with the McClure dam. Two other questions involved were the propriety of the company’s application under subsec. 2 of sec. 1596—60, which relates to future developments of not more than 250 horse power, and whether, in view of the provisions of subsec. 6 of sec. 1596—69, the company can apply for the franchise in question, intending to couple up the water power to be developed by its McClure dam with that already developed by its Huntington dam, thereby completing a development of more than 250 horse power without incorporating under the Water Power Act. The physical situation involved was considered. The flowage of the river in question was investigated, and a study made of the efficiency and possibilities of the several projects concerned. The provisions of the Water Power Act involved were also examined with respect to the individual applicants’ contentions. *Held*: That the company need not incorporate under the Water Power Act in order to apply for a franchise, since it is not a “grantee” of a franchise under the section in question and therefore not embraced within its terms, and that, as it does not appear from an investigation that the development for which the franchise is desired can consistently generate more than 250 horse power of useful energy, the application was properly made under subsec. 2 rather than subsec. 1 of sec. 1596—60; that the construction and operation of the McClure dam without authority from the legislature or the Commission, as contended by the individual applicants, is not, under the circumstances of the present case, a nuisance under the Water Power Act, since the dam was completed prior to the taking effect of the act and the act does not make the obtaining of a franchise essential to maintenance and operation until six months after its passage and publication; that the McClure dam is safe, and that the total horse power, which could be furnished by it, and the smaller dam at “site A,” suggested but not favored by the other applicants, would exceed that furnished by the single high head dam favored by the latter, except dur-

ing the peak period, and that such period is not of sufficient length to justify the destruction of the McClure plant on account of the superior efficiency of the higher head dam; that, all things considered, the company should be granted a franchise to operate the McClure dam under subsec. 2 of sec. 1596—60 of the Water Power Act as long as the power there generated does not exceed 250 horse power, and that there is nothing in the statute to prevent the joint operation of the two dams, as the Huntington dam was a legal structure before the passage of the Water Power Act, and is not within the purview of the act nor under the jurisdiction of the Commission; that the McClure dam, however, should be supplied with fishways, and, that the other applicants, C. W. Arnquist, J. M. Arnquist, and Kate Tholien, be granted authority to organize and incorporate under the Water Power Act, and that they also be granted a franchise to construct and operate a dam under subsec. 1 of sec. 1596—60, provided that such dam and pondage shall in no manner interfere with the New Richmond Roller Mills Co's McClure plant. Order: That the New Richmond Roller Mills Co. be granted a franchise under subsec. 2 of sec. 1596—60, to operate a dam and plant at the so-called McClure site on the Apple river in St. Croix county, and that such company provide the dam with an adequate fishway, sixty days being deemed a reasonable time for such construction; that the other applicants be granted permission to incorporate under the Water Power Act, and that such corporation be granted a franchise to construct and operate a dam for the generation of more than 250 horse power of energy at site "A", or any other site on the Apple river, at which, when the dam is completed, there will be no impairment of the riparian rights under franchise of the New Richmond Roller Mills Co., or any other grantee, either by virtue of legislative enactment or under the Water Power Act; that if such a dam is constructed, it shall be a stable structure and equipped with adequate ways or chutes for the passage of fish, and that all grants in the order are made subject to all of the restrictions and provisions applicable under the Water Power Act (sec. 1596—50 to 1596—79, inclusive). *In re Appls. for W. P. Franchise on Apple River*, 712, 723.

ESTABLISHMENT, CONSTRUCTION AND MAINTENANCE.

Extension of water mains.

1. Complaint was made by a resident of Janesville that respondent company refuses to make an extension of a water main along South Bluff street in that city to give service to a house lately constructed by the complainant. It appears that, while there is no main traversing the block of South Bluff street involved, six of the eight houses at present in this block receive service from mains not intended to serve houses on South Bluff street; that of the remaining two houses, one has a private system, the other being the house of complainant; that the existing service is afforded by the company by means of unusually long and expensive makeshift services installed as best could be to meet the

existing demand and to obviate the necessity of laying a main in the block in question; that the existing service in the block logically should be made from Bluff street; that the earnings from the existing service in the block would be ample to justify the installation of the requested extension; that should the extension in question be made, certain vacant property in the block involved would doubtless be developed in the near future; and that, unless the extension is ordered, the house in question will be precluded from getting service at all. *Held*: That the extension requested should properly be credited with the earnings from the other consumers on the street, and that the equities of the case and business policy require that it be made, even though there be only one taker in immediate prospect. A refusal would only postpone it, and would be a retarding influence on the development of the property in the block, a result to be avoided if possible, both in the interest of the city and the company. *Ordered*: That the company extend its main on South Bluff street from the present terminus of the two-inch main at the corner of South Bluff and Racine streets, southward to form a connection with the pipe extending northward in said block from the main on Clark street in substantially the manner described in the decision. Thirty days is considered sufficient time for compliance. *In re Extension of Water Main by Janesville W. Co.*, 370, 374.

MUNICIPAL ACQUISITION—TERMS AND CONDITIONS OF SALE AND PURCHASE.

Compensation for property—Compensation determined by Commission in particular cases.

2. Notice was served on the Commission by the city of Janesville of its determination to acquire the plant of the Janesville Water Co., which operates under an indeterminate permit. The physical value of the plant was considered with reference to the actual investment, and the reproduction cost and reproduction cost less depreciation. According to the company, the actual investment, excluding overhead, at the time of the hearing was \$262,730. *Held*: That due allowance for certain matters of accounting makes it doubtful whether the actual original cost of property now in the system was much more than \$250,000. In considering the cost of reproduction, matters in dispute were examined in detail. It appears that certain items in the valuation of the engineering department could perhaps properly be somewhat modified. The valuation in question fixed the reproduction cost at \$253,367 and reproduction cost less depreciation at \$217,775. *Held*: The most liberal estimates which should be considered in arriving at the value of the property, making due allowance for the possible changes noted, would fix the reproduction cost at \$268,151, and reproduction cost less depreciation at \$233,734. That the fair value of the property in the present case, due consideration being given to all the different elements which go to make up the final value of the property, is determined to be \$265,000, as of July 1, 1914, such value excluding materials and supplies, but including all records of the company reasonably necessary for the conduct of the business by the city. *Ordered*: That the company transfer possession to the city on or before April 1, 1915, at the price fixed, less the now outstanding bonds (\$186,500) and accrued interest to April 1, 1915, the bond issue to remain a lien upon the plant, and to be taken by the city subject thereto. Materials and supplies, and additions made to the plant since July 1, 1914, are to be paid for by the city at such price as may be agreed upon by the parties, or fixed by the Commission by supplemental proceeding in case of their failure to agree, and the city is also to pay the company the amounts due on the transaction in question within six months after the date of this order, and with in-

terest at the rate of 6 per cent from the date of taking possession of the plant until the amount due is fully paid. *In re Purchase Janesville Water Works Plant*, 674, 697.

OPERATION.

Management—Financial transactions.

3. Petition was made requesting the Commission to investigate the Waterloo W. & Lt. Commission and its management of the municipal water and electric utilities of the village of Waterloo. A preliminary survey seemed to indicate the need for an investigation broader in scope than the one requested and the Commission decided to institute an investigation on its own motion, covering not only the management but also the rates, service and accounting practices of the two utilities. The petitioners complained that no satisfactory statement showing the financial condition of the utilities and the results of operation was obtainable under the present methods of accounting procedure. It appeared upon examination of the books and accounts of the utilities that the inadequacy and incorrectness of the records were due chiefly to the lack of a scientific accounting system and the Commission has accordingly prescribed and installed a suitable system of accounts for the utilities. The petitioners further complained that collections were made by the secretary of the W. & Lt. Commission instead of by the village treasurer as required by law. The accounting system prescribed by the Commission removes this cause of complaint by providing that collections shall be made by the village official upon whom the duty devolves according to statutory provisions. The complaint of the petitioners with reference to the management of the joint utilities seems to be based in large measure on the practice followed in the sale of materials to consumers. Materials sold by a utility should be sold at a price high enough to cover at least the cost of handling in addition to the cost of the goods, and in the cost of handling should be included not only such items as freight and cartage, but also the losses due to breakage, necessary waste and other costs of a similar nature. In the instant case it appears that the recent change in the system of accounts and records used by the joint utilities and in the persons in charge of the system will eliminate the cause of complaint indicated. *In re Invest. Waterloo Mun. W. & El. Plant*, 534, 551.

Refusal to make refund on shipment because of findings of the Commission as to marked capacity of the car and minimum weight, see RATES-RAILWAY, 10; REPARATION, 1.

Establishment of minimum weights.

1. The proper principle to govern in fixing a minimum loading for a car, when used in the transportation of any commodity, is the ascertainment of the amount of the commodity that can be loaded when ordi-

nary care is exercised and the establishing of the minimum within such limit. (*Merrill Woodeware Co. v. C. M. & St. P. R. Co.* 1908, 3 W. R. C. R. 54, 60.) *Oshkosh Excelsior Mfg. Co. v. M. St. P. & S. S. M. R. Co.*, 178, 179.

Minimum weight based on capacity of cars ordered by shipper.

See also RATES—RAILWAY.

2. It has been held by this Commission that when a railroad company for its own convenience or because of necessity furnishes a car of greater capacity than that ordered by the shipper, its charges can not exceed those based upon the capacity of the car actually ordered. *Colby Cheese Box & Silo Co. v. M. St. P. & S. S. M. R. Co.*, 469.

Weighing facilities.

3. The fact that a shipper, through lack of facilities for ascertaining weights cannot load cars just as he would like to do does not prove the unreasonableness of the rate or the minimum weight applicable. *Brown Bros. Lbr. Co. v. M. St. P. & S. S. M. R. Co.*, 569, 574.

State Banking Department.

NINETEENTH ANNUAL REPORT.

TO HIS EXCELLENCY, FRANCIS E. MCGOVERN,
Governor of Wisconsin.

SIR: In compliance with the provisions of section 2024—5 of the statutes, I respectfully submit my annual report on banks of Wisconsin.

There is exhibited herein the financial condition of the 623 state banks, 4 mutual savings banks, and 15 trust companies doing business under the laws of this state at the date of the last call for statement, December 1st, 1913. The aggregate amount of capital employed in these 642 financial institutions is \$21,163,750.00, a gain of \$1,152,100.00 during the past twelve months, and their total resources are now \$230,073,789.52, an increase of \$21,036,291.00 for that period.

There is included in the report itemized abstracts of the resources and liabilities of each of the three groups of Wisconsin banking institutions; also, that of the national banks in the state.

GENERAL CONDITION.

That the stability of the state banking system has been augmented during the past year is strongly evidenced by the growth in total bank resources. The increase is especially noteworthy in view of the fact that the financial world was subjected to a considerable money tightness during 1913.

The examinations and reports on file in this department show that a strong cash reserve has been maintained by our banking institutions at all periods; moreover, it is encouraging to note that whenever a criticism has emanated from this department regarding the maintenance of cash reserve, the same met with

ready response and apparently no serious difficulty was experienced in the matter of securing funds to replenish reserves.

Another important feature of our work has been the efficient efforts of our examiners in fostering a stronger realization of the responsibility incumbent on bank directors. A special meeting of directors is generally called at the time of an examiner's visit, and the affairs of the bank, as seen by the examiner, presented to the board. This policy, I am certain, has materially raised the standard of efficiency in the bank directorate of our state, and the elimination of many unsafe banking practices is the inevitable result. In this connection, we have been successful in securing an average increase in the number of directors on a board, believing that such action is also conducive to better management.

NEW BANKS.

I believe that the 36 new banking institutions which have been authorized during the past year represent a healthy increasing demand for additional banking facilities rather than the tendency toward uneconomic competition which has been previously evidenced in the organization of new banks. It has been the policy of this department thoroughly to investigate the conditions surrounding a charter application. On several occasions I have been convinced from the resulting information that a new bank would serve no public good, and it has been incumbent on me to disapprove the application.

Following is a list of new banks and trust companies chartered from November 26, 1912, to December 1, 1913:

No.	Location.	Name of Bank.	Capital.
1	Trempealeau	Citizens State Bank.....	\$10,000 00
2	Lyndon Station	Lyndon State	10,000 00
3	Ashippun	Bank of Ashippun.....	15,000 00
4	Crivitz	The State Bank of Crivitz.....	10,000 00
5	Mt. Sterling	The State Bank.....	10,000 00
6	Wales	State Bank of Wales.....	15,000 00
7	Saukville	Saukville State Bank.....	10,000 00
8	Dalton (P. O. Kingston)...	Dalton State Bank.....	10,000 00
9	Hillsboro	Farmers State Bank.....	20,000 00
10	Clinton	State Bank	35,000 00
11	Howard's Grove	State Bank of Howard's Grove.....	10,000 00

18	Richland Center	Farmers & Merchants Bank.....	50,000 00
19	Adams	Adams County State Bank.....	10,000 00
20	Glidden	Citizens Bank of Glidden.....	10,000 00
21	Whitewater	Whitewater Commercial & Savings Bank.....	50,000 00
22	New Butler	State Bank of New Butler.....	10,000 00
23	Arcadia	Farmers State Bank.....	15,000 00
24	Cashton	Farmers Exchange Bank.....	10,000 00
25	Sauk City	Farmers & Citizens Bank.....	22,000 00
26	Kendall	Farmers & Merchants Bank of Kendall..	23,000 00
27	Wautoma	Farmers Home Bank.....	15,000 00
28	Thorp	Farmers Exchange Bank.....	30,000 00
29	Whitehall	Peoples State Bank.....	15,000 00
30	Chetek	Chetek State Bank.....	10,000 00
31	Stetsonville	Farmers State Bank.....	10,000 00
32	Caroline	Caroline State Bank.....	15,000 00
33	Ridgeland	Farmers State Bank.....	10,000 00
34	Salem	Salem State Bank.....	12,000 00
Total			\$562,000 00

NEW TRUST COMPANIES.

35	La Crosse	La Crosse Trust Co.....	\$50,000 00
36	Marinette	Farmers Savings & Trust Co.....	50,000 00
Total			\$100,000 00

CAPITAL.

To stimulate the public confidence and as an important factor toward security to the depositor, I have recommended increases of bank capitalization wherever the growth of the business warrants the same. My efforts in this direction have generally been met by acquiescence on the part of the bankers of the state, and in several instances increases have been made voluntarily.

The specific instances of capital increase for the past year are as follows:

INCREASE OF CAPITAL.

Location.	Name of Bank.	From	To
Hustisford	Hustisford State Bank.....	\$25,000	\$30,000
Milwaukee	Merchants & Manufacturers Bank....	250,000	400,000
Osceola	Bank of Osceola.....	25,000	40,000
Fennimore	State Bank of Fennimore.....	25,000	50,000
Wonewoc	State Bank of Wonewoc.....	30,000	35,000
Soldiers Grove	Bank of Soldiers Grove.....	10,000	20,000
Marion	First State Bank of Marion.....	25,000	30,000
Highland	Highland State Bank.....	10,000	20,000
Horicon	Horicon State Bank.....	25,000	50,000
Mineral Point	Iowa County Bank.....	50,000	60,000
Sauk City	The State Bank.....	10,000	20,000
North Milwaukee	Citizens Bank of North Milwaukee....	20,000	25,000
West Salem	West Salem State Bank.....	16,000	25,000
Richland Center	Richland County Bank.....	50,000	100,000
Sparta	Monroe County Bank.....	25,000	50,000
Dousman	Dousman State Bank.....	10,000	20,000
Evansville	The Grange Bank.....	10,200	15,000
Cashton	Bank of Cashton.....	10,000	20,000
Lake Mills	Greenwood's State Bank.....	60,000	80,000
Fountain City	First State Bank.....	10,000	20,000
Elmwood	First State Bank.....	10,000	15,000
Rosholt	State Bank.....	10,000	25,000
*Glenbeulah	Glenbeulah State Bank.....	10,000	15,000
*Melrose	Bank of Melrose.....	10,000	12,500
Athens	Bank of Athens.....	20,000	30,000
Norwalk	Farmers State Bank.....	10,000	15,000
Hurley	Iron Exchange Bank.....	10,000	30,000
Coloma	Peoples Bank.....	10,000	15,000
Bagley	Bagley State Bank.....	5,000	10,000
Boscobel	Central State Bank.....	10,000	25,000
*Stratford	Stratford State Bank.....	10,000	25,000

* Indicates banks which have not completed their capital increases at the date of the last call for statement, December 1, 1913.

BANK LIQUIDATION.

The Glidden State Bank filed resolution of liquidation April 22, 1913.

There follows a summary of gain and loss in capital of state banks and trust companies.

Capital, November 26, 1912	\$20,011 650 00	
Capital, 34 new banks and 2 trust companies.....	662,000 00	
Capital, 31 banks increased	495,100 00	
		\$21,168,750 00
Less capital of one bank liquidated.....		5,000 00
		\$21,163,750 00

The total gain in surplus for the year is \$726,291.45, and undivided profit account shows an increase of \$351,297.68 over the amount returned a year ago. These increases testify well to the growing strength of our state banking institutions and trust companies.

IN THE HANDS OF THE COMMISSIONER.

Bank of Clear Lake.

When the Bank of Clear Lake was closed by my predecessor in office, January 25, 1911, it had deposits of \$51,934.41. On August 11, 1911, proved claims had been filed amounting to \$47,506.41. One of the stockholders, having confidence in the institution, in his private capacity, has settled with many of the creditors. He has taken assignments of their claims, and the claims so assigned have been surrendered to the department and cancelled.

A cash dividend of ten per cent. has also been paid to creditors, leaving the remaining claims on December 1, 1913, at \$33,929.22. As against this amount of liability there are assets amounting to \$56,019.85. This figure represents real estate in the amount of \$29,480.27, loans and discounts \$23,737.86, and miscellaneous assets \$2,801.72. Certain worthless assets have been charged off, leaving the remaining assets much nearer par. As has been indicated, a considerable amount of real estate has been taken, a portion by foreclosure, and, in some cases, by deeds from mortgagors to save time and expense. The creditors seem willing to bide their time rather than urge a forced sale of the assets and consequent sacrifices.

Special Deputy Commissioner F. P. Ainsworth continues in charge of the bank, and the cost of the administration is nominal, it being the policy of the department to conserve the property rather than dissipate it in expenses and attorney's fees.

Citizens Savings and Trust Company,

In Liquidation.

In order to protect the interests of depositors, I deemed it expedient on October 2, 1913, to close the doors of the Citizens Savings & Trust Company of Milwaukee.

Soon after I assumed the duties of Commissioner of Banking, our department discovered certain irregularities of management in the affairs of this company, and in March, 1912, I had A. B. Geilfuss, a veteran banker, and at that time bank examiner, elected to the office of vice president. He was my representa-

tive in full charge of the affairs of the trust company, and during his incumbency old deals cropped up, revealing false entries, perversion of funds, and so forth, committed by former officials of the institution.

Our aim was to segregate assets for the protection of deposits, and at the present date we have securities in the amount of \$433,505.00 segregated for the protection of deposits amounting to \$350,945.70.

With due allowance for shrinkage, I believe that the liquidation will result in full payment of all depositors' claims.

The closing of the Citizens Savings and Trust Company at once raised a question of the status of depositors and holders of participating certificates in a trust company. I have maintained that the latter class of clients do not share in common with the depositors in the liquidation of a trust company; that their security must only come from the specific collateral on which their certificates are based.

A test case brought by the holder of a participating certificate sought to enjoin me from acting as trustee for the company. An expression of the desire of those interested in this matter was secured by Judge Eschweiler, and on November 22nd his court decided that I should remain in the capacity of trustee.

Claims are now being filed, and January 26, 1914, is the date set before which all creditors must prove their demands.

LEGISLATION.

The banking legislation of 1913 added several features to our laws which, I am confident, will result in public good, as well as prove desirable to the banking interests of the state.

Section 2024—6 extends the powers of the commissioner of banking in authorizing him to refuse bank charters to undesirable parties, or where the community appears to have adequate banking facilities. I consider this law a valuable asset toward increasing the efficiency of my department, as I am thereby enabled to check needless and unprofitable competition, which experience has shown me to be a menace to the stability of the affected banks.

The provisions in sections 2024—36, which permits state banks to qualify as postal savings depositories, has not brought

a large volume of deposits,—\$120,745.70 at the last call,—but it is valued by our bankers in that it raises their prestige and inspires confidence, as well as providing a means for retrenchment of deposits in the event of a panic and consequent sudden withdrawal of funds.

We have at times had occasion to disapprove the attempt of a corporation to own bank stock. For the reason of the double liability on the holder of bank stock, it is our policy to require that it be issued to individuals. It would be desirable to have a law covering this point and forbidding banking corporations being formed by other corporations owning the stock in such banks. Such laws have been found efficient in other states.

In section 2024—36 of our banking laws, we have provided that it shall be unlawful for any bank to issue its certificate of deposit for the purpose of borrowing money. The provision is efficacious in enabling this department to eliminate disapproved methods in replenishing cash reserve.

I wish to suggest that we would be further assisted in procuring good banking practice by the enactment of a provision making it unlawful for one bank to *loan* to another by the certificate of deposit method. Our examinations disclose a tendency among our banks to carry in their loans the certificates of western banks lying outside the territorial limit prescribed by section 2024—35, W. S.; such procedure is censured by this department as being an evasion of the intent of this law. I do not consider these western bank certificates desirable paper by reason of their uncertain security, and the fact that funds which should be loaned for the development of home resources are thereby perverted into foreign channels.

LAND MORTGAGE ASSOCIATIONS.

The incorporation of land mortgage associations, new institutions in Wisconsin, is authorized by chapter 666, adopted by the legislature at its last session. The organization of these associations and their operations are placed under the jurisdiction of this department.

This chapter, known as the "Land Mortgage Association Act," was adopted to meet the demands of agriculture for loans running for a long term of years and payable on the installment

or amortization plan. The act is designed especially to assist those desiring to acquire farms, and those desiring permanently to improve or to equip farms already owned. The long-term loan feature is made workable by provision for bond issues, the bonds to act as intermediaries between the lender and borrower. The law requires that the borrower pay off at least one per cent of the principal each year.

Under the plan outlined in the act, fifteen or more persons, adult resident freeholders of Wisconsin, may incorporate with a capital stock of not less than \$10,000 for the purpose of making loans secured by first mortgages on Wisconsin real estate. The mortgages thus obtained may be deposited with the state treasurer, and the association may then issue bonds up to the amount of the mortgages so deposited. The bonds issued are the direct obligations of the association, and shall at no time exceed the amount of the securities on deposit with the state treasurer.

Each association, the act provides, shall be managed by a board of trustees, and shall have a committee on loans and an auditing committee. The duties and functions of the different officers, boards, and committees are so planned that each acts as a check upon the other.

The granting of loans is safeguarded, first, by a provision imposing a double liability upon stockholders for the obligations of the association, which includes the bonds; secondly, by a requirement that the assessor of incomes shall certify that the value placed upon any property for the purpose of a loan does not exceed its market value; thirdly, by a provision that no loan shall be made unless the committee on loans shall first be satisfied that a loan for the purpose specified by the applicant promises to benefit him, and by other provisions for soil conservation, the payment of taxes, insurance, special assessments, and so forth.

Most of the laws applicable to state banks and their supervision by this department are made applicable to these land mortgage associations. Their articles of incorporation and constitution and by-laws are subject to my approval; they are subject to periodic examination, as are state banks, and are required to report to this department at stated intervals and upon demand.

A uniform constitution and by-laws and a uniform system of accounts for the associations to be formed have been prepared under my supervision. The form of mortgages and bonds to be used by the associations and the deed of trust for transferring the mortgages to the state treasurer are subject to the joint approval of the attorney-general and the commissioner of banking.

Several applications for charters under this act have already been filed in this office. Two associations will open for business some time shortly after the beginning of the year 1914. One of these associations will be located at Eau Claire; the other at Marinette.

STATISTICAL.

Table A exhibits abstracts of each of the five reports made to this department by state banks, mutual savings banks, and trust companies during 1913.

Table B is a comparative abstract exhibiting a year's growth in our banking statements.

Table C presents the abstracts of statements made at annual periods since the creation of this department in 1905. The development of our state banking system during a period of nineteen years is detailed therein.

Total	\$427,483,473 22	Total.....	\$427,483,473 22

The significance of the above abstract is the representation it gives of the total banking power of Wisconsin. A year ago the totals were \$403,689,620.91 and the increase for the year is \$23,793,852.31.

Through the courtesy of the national banks of this state in complying with my request for their statements of October 21, 1913, I am enabled to present such herein, thus making the volume a complete directory of all banks located in Wisconsin.

STATE BANKING DEPARTMENT.

Record of the activities and expense covering the period of eleven years, from 1903 to 1913, inclusive:

SCHEDULE

showing the number of banks, and the aggregate assets of banks, under the supervision of the state banking department, year by year.

	No. of banks.	Total asse's.
1903	347	\$90,164,209 11
1904	372	90,459,989 31
1905	390	99,629,048 29
1906	406	114,308,381 52
1907	429	124,323,751 84
1908	450	124,845,425 46
1909	473	140,155,455 87
1910	510	162,125,649 30
1911	573	186,008,546 54
1912	607	209,037,438 52
1913	642	230,073,789 52

The assets of building and loan associations, which are also under the supervision of this department, have grown from \$3,819,768.55 in 1903 to over \$10,000,000.00 in 1913, and the number of associations has increased from 53 in 1903 to 65 in 1913.

The foregoing figures demonstrate the large growth, both in numbers and in the volume of business, of institutions under the supervision of this department, entailing a corresponding increase of the work and the activities of the department. The work, both in field and in office, is incessant and strenuous the year round.

From 1903 to 1911 banks were examined not less than once in each year, and the department roster comprised the commissioner, deputy, three examiners, a chief clerk, and one clerk. In 1905 a building and loan examiner was added. From June 1, 1911, not less than two examinations of each bank in each year were made, the legislature having augmented, for that purpose, the departmental staff, which now consists of the commis-

sioner, a deputy, seven bank examiners, one building and loan examiner, a chief clerk, and three clerks. In addition, an extra clerk has been employed under authority of the board constituted under section 169b of the statutes. Building and loan associations continue to be examined at least once a year.

The number of examinations made in one year has grown from 404 in 1903 to 1455 in 1913. Owing to the growth of banks, examinations that could be made in from six to eight hours ten years ago, now require two full days of work.

The intense character of supervision is best evidenced by the fact that since 1904 not a dollar has been lost to depositors in banks operating under state laws, nor has there been a failure of a building and loan association in fifteen years.

The cost of maintenance of the state banking department is largely borne by banks through annual examination fees, filing fees, and so forth.

In 1913 the total operating expense of the department amounted to \$41,677.82. Of this amount \$28,531.22 has been covered by the receipts from the above sources, and only \$13,146.60 was paid from the general fund of the state.

During the eleven-year period, from January 1, 1903, to December 31, 1913, the disbursements of the state banking department for salaries, transportation, printing, postage, stationery, etc., amounted, in the aggregate, to \$269,896.88. During the same period, the receipts from examination fees, filing fees, forfeitures, etc., were \$140,810.12, the difference of \$129,086.76 being paid out of the general fund of the state treasury, and showing that the average annual cost of maintaining this department during the eleven years was \$11,735.16.

Number of Examinations made by the State Banking Department during the eleven-year period from January 1, 1903, to December 31, 1913.

Year.	No. of banks.	No. of building and loan associations.	No. of examinations.
1903	347	53	404
1904	372	55	460
1905	390	54	477
1906	406	54	496
1907	49	52	540
1908	450	50	614
1909	473	53	645
1910	510	60	660
1911	573	57	986
1912	607	61	1,398
1913	642	65	1,455
Total number of examinations			8,135

Note: Beginning with June, 1911, semi-annual examinations of banks have been made.

Under the general appropriation act of 1913, there were no changes made in the number of employes, and their compensation remained about the same.

The names and compensation of all employes of this department from January 1, 1913, to December 31, 1913, are as follows:

Name.	Title.	DATE.		Number of months	Annual salary.	Total salary received.
		From.	To.

State Banking Department

TWENTIETH ANNUAL REPORT.

To His Excellency, EMANUEL L. PHILIPP,
Governor of Wisconsin.

Sir: I respectfully submit my annual report on banks of Wisconsin, as provided by section 2024—5 of the statutes, this being the twentieth annual report.

The compilation was made on the basis of the last call for statement, October 31, 1914, and exhibits the financial condition of six hundred and forty-eight state banks, five mutual savings banks, and fourteen trust companies doing business under our state laws on the date mentioned.

State banks and trust companies represent an aggregate capital investment of \$21,819,950, and a gain during the twelve month period in capital invested amounting to \$656,200. Their total resources are \$238,561,733.03 which shows an increase in resources of \$8,487,943.51.

My report includes itemized abstracts of the reports of each of the three groups of Wisconsin banking institutions, and in addition that of the national banks of the state.

GENERAL CONDITION.

An analysis of the statements of Wisconsin banks, and a résumé of the work of this department for the year 1914, gives evidence of the industrial depression incident to the European conflict, and the fact that our state banking system was given a severe test. Notwithstanding the unforeseen demands upon the resources of the banks during the latter half of the year, it is encouraging to note that the total resources for the year's period show an increase of \$8,487,943.51; that capital investment shows an increase of \$656,200, and total deposits a gain of \$5,696,715.68.

The weight of the burden borne by the banks is shown in the increase in loans, amounting to \$10,822,830.55. Rediscounts and bills payable showed an increase in accordance with the financial stringency, amounting to \$1,171,139.46. That the state banks of Wisconsin could not be accused of hoarding their money is shown by the fact that the average reserve at the December 1, 1913, call was 21%, and on October 31, 1914, this average decreased to 19%. The normal average reserve of our state banks is 22%.

In general, it can be said that the state banks of Wisconsin met heavy demands upon their resources during the past year; that conscientious effort was made to take care of the needs of their customers, and that, with one exception, they had liquid assets to meet the situation.

NEW BANKS.

From December 1, 1913, to October 31, 1914, there were twenty-nine new banks authorized to commence business in Wisconsin, with an average capitalization of \$16,965. It is significant to note in this connection that of the above number, twenty-three were banks in locations which previously had no home banking facilities.

The list follows:

No.	Location.	Name of Bank.	Capital.
1	Waldo	Waldo State Bank.....	\$10,000.00
2	Nekoosa	Nekoosa State Bank	20,000.00
3	Ripon	Ripon State Bank	50,000.00
4	Westboro	Westboro State Bank	10,000.00
5	Lancaster	Lancaster State Bank	50,000.00
6	Merton	Farmers Exchange Bank	18,000.00
7	Lebanon	Lebanon State Bank	10,000.00
8	Ogema	State Bank of Ogema.....	10,000.00
9	Spring Green	Farmers State Bank	15,000.00
10	Laona	Laona State Bank.....	10,000.00
11	Menomonie	The Kraft State Bank	30,000.00

22	Corliss	Corliss State Bank	12,000.00
23	Green Bay	The West Side State Bank	50,000.00
24	Friesland (P. O. Cambria)	Friesland State Bank	10,000.00
25	Woodland	Woodland State Bank	10,000.00
26	Waumandee	Waumandee State Bank	15,000.00
27	Rockland	Rockland State Bank.....	10,000.00
28	Madison	Randall State Bank	25,000.00
29	Black Hawk (R.F.D. Spring Green)	Black Hawk State Bank	10,000.00
	Total	\$492,000.00

INCREASE IN CAPITAL.

The value of ample capital in a bank's statement is being recognized each year by a gratifying number of banks which file articles increasing capital stock. I warmly commend this procedure. It is a double addition to depositor's guaranty, an efficient means of inspiring public confidence, and one of the best evidences of the desire of a bank to safeguard the funds of its community. Capital stock has been increased to date of October 31, 1914, as follows:

Location.	Name of Bank.	From	To
Barneveld	Barneveld State Bank.....	\$10,000.00	\$15,000.00
Cassville	Cassville State Bank.....	10,000.00	20,000.00
Independence	State Bank of Independence.....	25,000.00	50,000.00
Chaseburg	Chaseburg State Bank	10,000.00	20,000.00
Mosinee	State Bank of Mosinee	12,000.00	30,000.00
Strum	First State Bank of Strum.....	10,000.00	20,000.00
Glenwood	First State Bank of Glenwood.....	10,000.00	25,000.00
Viola	State Bank of Viola	10,000.00	25,000.00
Hudson	Bank of Hudson	25,000.00	50,000.00
Union Grove	State Bank of Union Grove.....	10,000.00	25,000.00
Osseo	State Bank of Osseo	15,000.00	30,000.00
Sturgeon Bay	Door County State Bank.....	20,000.00	50,000.00
Plymouth	Plymouth Exchange Bank.....	50,000.00	100,000.00
Monticello	Bank of Monticello	25,000.00	40,000.00
Random Lake	State Bank of Random Lake	10,000.00	25,000.00
North Lake	Bank of North Lake.....	15,000.00	20,000.00
Grantsburg	First Bank of Grantsburg.....	25,000.00	50,000.00
Coon Valley	Coon Valley State Bank.....	10,000.00	25,000.00
Coloma	The Peoples Bank	15,000.00	20,000.00
Muscoda	Farmers & Merchants Bank.....	15,000.00	20,000.00
Rice Lake	Barron County Bank.....	10,000.00	25,000.00

CONSOLIDATION AND DISSOLUTION.

The State Bank of Fennimore, with a capital of \$50,000, on March 2, 1914, took over the business of the Fennimore Bank. The latter was capitalized at \$5,000, and the capital of the State Bank of Fennimore remained unchanged.

The Blanchardville State Bank, on August 31, 1914, filed an amendment to its articles of incorporation whereby its capital was increased from \$50,000 to \$55,000, and its name changed to Union State Bank. It absorbed the business of the Citizens State Bank of Blanchardville, capital \$25,000.

The final dissolution of the Fidelity Trust Company, Milwaukee, capital \$100,000, was made June 12, 1914.

NATIONALIZED.

Two state banks, during the past year, have entered the national system,—the Bank of Hudson, under the name of The National Bank of Hudson, capital \$50,000,—and the Bank of Prescott, under the name of First National Bank, capital \$25,000.

The following is a summary of gain and loss in capital of state banks and trust companies:

Capital, December 1, 1913		\$21,163,750.00
Capital, 29 new banks		492,000.00
Capital, 22 banks increased		348,000.00
Capital, 3 banks increased previously, but paid in subsequent to Dec. 1, 1913		21,200.00
		\$22,024,950.00
Less capital liquidated.....	\$130,000.00	
Less capital nationalized.....	75,000.00	
		205,000.00
Total capital October 31st, 1914.....		\$21,819,950.00

BANK OF CLEAR LAKE REOPENED.

On August 12, 1914, the Bank of Clear Lake resumed business, after being in the hands of this department for a term of three years and seven months.

The suspension of payments by this bank was due to slow assets, consisting of mortgages and of real estate acquired by the bank through foreclosures and in settlement of debts. The policy adopted by the state banking department and the special deputy in charge was constantly to endeavor to conserve the assets and keep the administrative expenses at as low a figure as possible consistent with efficient management.

The total expense of the receivership during this time, under Special Deputy Commissioner Ainsworth, amounted to but \$4,812.03. This included the deputy's remuneration, as well as attorney's fees. The latter amounted to but two hundred dollars. There was placed to the credit of undivided profits during the receivership the sum of \$9,152.95. Thus, the earnings of the bank from various sources more than paid the cost of administration.

The aggregate amount of proved claims at the time of suspension of payments by this bank amounted to \$47,506.41. This figure was reduced to \$27,386.10 by the time the bank resumed business.

COMMERCIAL AND SAVINGS BANK OF RACINE.

In Liquidation.

The Commercial and Savings Bank of Racine, now undergoing liquidation, was placed in the hands of this department September 17, 1914.

The suspension of the bank was occasioned by the fact that its assets contained certain pieces of slow and nonbankable paper, which, coincident with the prevailing unsettled industrial conditions, made it necessary to close its doors.

Service to an industrial community constituted the entire business of this bank, and under ordinary circumstances there would probably be no difficulty in liquidating the paper to meet the demands for cash. But with the industries of the community practically at a standstill, the consequent need of funds by the depositors, and inability of the manufacturing concerns to pay their obligations, the bank could not meet the unlooked for demand upon its resources.

It was the original intention of those interested in this institution and myself to reopen its doors. After considerable delay, an assessment of one hundred per cent on the stock was nearly completed. However, public confidence had begun to wane. There appeared to be no representative man available to head the project, and liquidation to meet the immediate needs of the community for funds became necessary.

Examiner A. C. Pond of this department has been appointed special deputy commissioner in charge of the liquidation. We will endeavor to pay a fifty per cent dividend at the expiration of the time for filing claims. The directors of the bank assert that enough good paper is contained in the assets to pay the depositors in full.

CITIZENS SAVINGS AND TRUST COMPANY OF MILWAUKEE.

Liquidation proceedings continue in the affairs of the Citizens Savings and Trust Company, Milwaukee, in charge of this department since October 2, 1913. We have been able to pay a twenty-five per cent dividend to depositors since that date. The assets of this company are slow in working out, and a further reduction of claims is not imminent.

Special Deputy Commissioner A. B. Geilfuss continues to conduct the work of liquidation, and every effort is being made to

realize on the assets without sacrifice, as well as to minimize the expense.

DISAPPROVAL DECISION REVERSED.

Under date of March 4, 1914, an application was filed in this department for a second bank at Mosinee, Wisconsin. After a thorough investigation, as provided for in section 2024—6, W. S., I disapproved the application. My decision was based on the fact that Mosinee, with a population of twelve hundred, already had adequate banking facilities in a bank whose capital had increased to \$30,000, surplus \$15,600, and deposits which had not exceeded \$150,000 during the past nine years. Thus, the depositors of this bank were protected in capital investment alone to nearly one-third of their total deposits. Further, it appeared that the new organization would have been dominated by outside interests, and from the information I secured regarding the project, I was convinced that it had all the indications of being a "spite bank," rather than a business proposition impelled by a genuine demand for additional banking facilities. Two of the largest subscribers were, in my opinion, unsafe parties to engage in the banking business, and two banks at Mosinee would obviously result in uneconomic competition.

An appeal was made in this matter, and the board of review, consisting of the governor, secretary of state, and attorney-general reversed my decision on two grounds: first, that it would be unconstitutional to delegate a legislative power to an administrative officer, and, second, that none of the three provisions of section 2024—6 had been violated by the applicants.

I respectfully take exception to this ruling in so far as it usurps the authority of a court of record in passing on the constitutionality of my interpretation of the statute, and depriving me of any discretion in withholding my approval of an application.

To refuse to grant a charter is practically impossible under this decision. In consequence of this action on the part of the board of review, I have considered it incumbent upon me to approve applications for bank charters at several locations where my investigations plainly brought forth the fact that a bank could not exist on a paying basis, and that its opening for business would mean an unsafe financial institution added to our state banking system.

The double liability on the holders of bank stock under section 2024—44 presents another problem to this department in this connection.

My only opportunity for determining whether the financial worth of the stockholders is ample to insure the possible need of collecting an assessment imposed by the above statute is at the time of the initial organization of a bank. Such organization, at least, should exhibit all stockholders to be financially equal to their liability. Subsequently, when the stock transfers take place, it is not possible for this department to prevent any one from holding bank stock. The stock being personal property, under the law the holder is free to transfer title to his shares at will. Therefore, I feel that the proper administration of such valuable provisions as are embodied in section 2024—44 demands that this department be given authority to refuse a bank charter, where it is plainly evident that the prospective stockholder of the bank is not able to meet his liability.

This is a matter which should engage the earnest attention of every adherent to safe banking practice. I am in hopes that the result will be a change in our laws, whereby the incorporation of unnecessary, and, obviously, unsafe banks can be prevented, and, further, that the board of review be composed of men whose offices are not elective.

It is not merely a desire for more authority that moves me to ask that a wider latitude be vested in this department in the matter of refusing bank charters. It is plainly evident to any one who has made a careful analysis of the banking business that there are frequent instances where an additional banking institution is destined to failure, either through the influence of natural surroundings or the type of men wishing to engage in that particular banking business.

LAND MORTGAGE ASSOCIATIONS.

One of the most significant features of the work of this department in 1914 has been the inception of the land mortgage associations, provided by chapter 666 of the statutes.

In my report of last year I outlined the plan of operation of these organizations, which offer a long-term loan made workable by bond issues, the bonds to act as intermediaries between the lender and borrower.

Two associations were given charters this year: The First Wisconsin Land Mortgage Association, Eau Claire, capital \$10,000, on January 22nd, 1914, and the State Land Mortgage Association, Marinette, capital \$25,000, on May 5th, 1914. Both have placed bond issues on the market, secured by an equal amount in real estate mortgages, deposited in trust with the state treasurer. Additional security is provided by the capital stock of the associations, on which the usual double liability of bank stock is imposed.

Especially promising for the new plan of agricultural credit is the fact that the bonds were sold at a low rate of interest, and were readily disposed of in the face of industrial depression and money stringency, occasioned by the European conflict. At a time when the bond market was practically at a standstill, the land mortgage bonds appeared and found a ready market.

Better credit facilities for the agricultural communities is a topic which is being given nation-wide attention. I believe that we have a practical solution of the question in our land mortgage association act. There remains but to exercise proper administration of the associations' affairs, and the plan inaugurated in Wisconsin will grow into a potent and highly satisfactory aid to the development of the agricultural resources of the state.

There is now invested in the capital stock of the associations the sum of \$35,000, and such associations have land mortgage bonds outstanding in the amount of \$66,000.

STATISTICAL.

Table A exhibits abstracts of each of the five reports made to this department by state banks, mutual savings banks, and trust companies during 1914.

Table B is a comparative abstract exhibiting a year's growth in our banking statements.

Table C presents the abstracts of statements made at annual periods since the creation of this department in 1903. The development of our state banking system during a period of twenty years detailed therein.

STATE BANKING DEPARTMENT.

Record of the activities and expense covering the period of twelve years, from 1903 to 1914, inclusive.

SCHEDULE,

SHOWING THE NUMBER OF BANKS, AND THE AGGREGATE ASSETS OF BANKS,
UNDER THE SUPERVISION OF THE STATE BANKING DEPARTMENT, YEAR
BY YEAR.

Year.	No. of Banks.	Total assets.
1903	347	\$90,164,209.11
1904	372	90,459,989.31
1905	390	99,629,048.29
1906	406	114,308,381.52
1907	429	124,323,751.84
1908	450	124,845,425.46
1909	473	140,155,455.87
1910	510	162,125,649.30
1911	573	186,003,546.94
1912	607	209,037,498.52
1913	642	230,073,789.52
1914	667	238,561,733.03

The average size of a bank's business has considerably increased, and many examinations which in former years required but one day now require two or three days' work. This growth for the past five years is shown by the following figures:

Average bank deposits now	\$310,371.48
Average bank deposits in 1909.....	251,888.93
Average increase	\$58,482.55
Average bank capitalization now.....	\$32,771.00
Average bank capitalization in 1909.....	29,501.00
Average increase	\$3,270.00

The efforts of this department are directed along lines which will efficiently regulate and safeguard our state banking system, and the work represents a steadily increasing task.

There reflects in the growing demand for banking facilities the development of the wealth of our state. State banks in Wisconsin are increasing at the rate of thirty-five banks per year. There are between thirty and forty banks continually in the process of organization.

The activity of this department is confined solely to the work designated by our banking laws, and no untried and expensive schemes are propagated. Our methods of supervision are along lines similar to the supervision exercised by our federal banking system—methods which are the result of years of experience in the supervision of the banking business. Plainly evident in our work is the necessity for supervision which is free and unrestricted by political influence.

The scope of this department was increased by the passage of

sections 2024—100—140, inclusive, in 1913, creating land mortgage associations. Two such corporations are now under this department, and others are in the process of organization. Their operations require further examinations, as well as an increasing amount of office supervision and clerical detail on our part, pertaining to their deposits of securities and bond issues. Outside of our departmental routine, we are required to investigate the financial standing of bondsmen who sign bonds guaranteeing the deposits of state funds in Wisconsin banks. About fifty lists of bondsmen of state depositories have been reported on by our examiners the past year.

The building and loan associations, also under the control of this department, now number seventy, and they are examined at least once a year. Such examinations, properly made, require considerable time, and the work of one examiner is devoted exclusively to those corporations. Their operations have been very successful in Wisconsin, due in part to the care which we exercise in supervising the conduct of their affairs.

The Mutual Building and Loan Association of Appleton, owing to the embezzlement by a former secretary, has been undergoing liquidation by this department since October 17, 1913. I feel certain that eventually its members will be paid in full. Aside from this proceeding, there has not been a failure of a building and loan association in Wisconsin in sixteen years.

The banking department represented a net cost of but \$13,184.22 to the state during 1914. This amount is but \$37.62 in excess of the net cost the previous year. The total operating expense was \$44,737.99, and the amount of \$31,553.77 was borne by the banks through annual examination fees, filing fees, and miscellaneous sources of revenue. The average net cost annually of this department to the state for the past twelve years has been \$11,855.91.

In order to retain competent men in the service of the department, I have found it necessary to make yearly increases in the salaries of examiners, salaries being graded according to term of service. There are two examiners being paid \$2,400 annually, three at \$2,200, three at \$2,000, and one at \$1,800.

Unsettled industrial conditions are quickly evident in our bank reports, and present conditions demand the utmost vigilance on the part of this department. I anticipate that the year 1915 will require additional examiners on our force in order that the work may not suffer by undue haste.

NUMBER OF EXAMINATIONS MADE BY THE STATE BANKING DEPARTMENT DURING THE TWELVE YEAR PERIOD FROM JANUARY 1, 1903, TO DECEMBER 31, 1914.

Year.	No. of Banks.	No. of Building and Loan Associations.	No. of Examinations.
1903	347	53	404
1904	372	55	460
1905	390	54	477
1906	406	54	496
1907	429	52	540
1908	450	50	614
1909	473	53	645
1910	510	60	660
1911	573	57	986
1912	607	61	1398
1913	642	65	1455
1914	678	70	1486
Total Number of Examinations			9,621

Note: Beginning with June, 1911, semiannual examinations of banks have been made.

THE NAMES AND COMPENSATION OF ALL EMPLOYES OF THE STATE BANKING DEPARTMENT FROM JANUARY 1, 1914, TO DECEMBER 31, 1914, ARE AS FOLLOWS:

Name.	Title.	DATE.		No. of months.	Annual salary.	Total salary received.
		From.	To.			
A. E. Kuolt.....	Commissioner ...	1-1-14	12-31-14	12	\$5,000.00	\$5,000.00
W. H. Richards..	Deputy	1-1-14	12-31-14	12	3,000.00	3,000.00
C. L. Brown.....	Examiner	1-1-14	12-31-14	12	2,400.00	2,383.34
Thos. Herreid ...	Examiner	1-1-14	12-31-14	12	2,400.00	2,383.34
R. B. Ellis.....	Examiner	1-1-14	12-31-14	12	2,200.00	2,182.67
A. C. Pond.....	Examiner	1-1-14	11-30-14	11	2,200.00	1,999.34
H. E. Stedman...	Examiner	1-1-14	12-31-14	12	2,200.00	2,182.67
C. F. Schwenker.	Examiner	1-1-14	12-31-14	12	2,000.00	1,984.00
Burne Pollock ...	Examiner	1-1-14	12-31-14	12	2,000.00	1,984.00
J. R. Hayes.....	Examiner	1-1-14	12-31-14	12	2,000.00	1,984.00
J. H. Coe.....	Examiner	1-1-14	12-31-14	12	1,800.00	1,750.00
C. W. Rhodes....	Clerk	1-1-14	12-31-14	12	1,500.00	1,500.00
Jennie Nelson ...	Clerk	1-1-14	12-31-14	12	1,500.00	1,490.00
G. W. Jamieson..	Clerk	1-1-14	12-31-14	12	1,200.00	1,200.00
Eugene Wulff ...	Clerk	1-1-14	12-31-14	12	1,200.00	1,200.00
	Total salaries					\$32,223.36

The following schedule presents the receipts and disbursements of the department for the year 1914:

Disbursements.	
Salaries	\$32,223.36
Expense	6,057.84
Transportation	2,721.17
Miscellaneous	136.46
Printing	2,486.98
Stationery	69.87
Postage	996.43
Telephone and telegraph	37.82
Express and drayage	8.06
Total expense	\$44,737.99
Receipts.	
Examination fees	\$28,675.00
Filing fees	1,460.00
Forfeitures (Sec. 2014—12 W. S.)	80.00
Fees for taking possession (Sec. 2024—29 W. S.)	700.00
Refund, Postage advanced	3.62
Witness fees	9.05
Certification fees	3.60
Total receipts	\$30,931.27
	\$13,806.72
Appropriation reimbursement, under sec. 172—132 W. S., account of Investigation conducted for Superintendent of Public Property	622.50
Net cost to State.....	\$13,184.22

I respectfully submit in the appendix a financial statement of each banking corporation doing business in Wisconsin on October 31, 1914, including national banks located in the state.

I am, sir,

Very respectfully yours,

A. E. KUOLT,

Commissioner of Banking.

Madison, Wisconsin, January 5, 1915.

TABLE A.

Abstract of the five reports called for from state and mutual savings banks and trust companies during the year 1914.

	Jan. 13, 1914.	Mar. 4, 1914.	June 30, 1914.	Sept. 12, 1914.	Oct. 31, 1914.

* Private banks were legislated out of existence by Chapter 234, Laws of 1903.

† Trust companies were authorized by Chapter 186, Laws of 1909, to receive time deposits and appear in abstract for Dec. 5, 1911 for the first time.

The following abstract is a consolidation of financial statements of state and mutual savings banks and trust companies, and national banks of Wisconsin, at the close of business October 31, 1914. It represents the total banking power of Wisconsin.

CONSOLIDATED ABSTRACT.
