MADISON, WIS., FRIDAY, APRIL 12, 1895.

[PRICE THREE CENTS.

HOME ECONOMICS

MRS. CAMPBELL'S FIRST LECTURE ON THE TOPIC.

THE IMPORTANCE OF DOMESTIC SCIENCE.

Other Lectures to Follow, and Their Subjects.

Yesterday Mrs. Helen Campbell delivered her first lecture in the course to be given on Household Economics. There were a large number of Madison ladies present aside from the regular students; and four gentlemen were among the listeners. The course promises to be a most instructive one taking up as it does a science which underlies the home life and, when once brought out its bearing upon general economic life is most plausibly seen.

The first lecture had to do with the static and dynamic understanding of household economy. The relation of the science to our every day life; what bearing it has in the family and how the home influences merge into those of the state and this into the welfare of the nation. It is a science of the home and from the family organism finds its influence entering into every phase of life in which men are represented. Household economics is not a new science, but an old one buried under the prejudices of many centuries. Its progress can be noted from the most primitive times to the present, yet society being ignorant of its own action and the laws by which it acts has failed to study this science which lies at the very base of its life.

Of the divisions into which the study of the home will be taken up are those of: environments and climatic conditions which give types of home-life, architecture, designing, color and its adaptation to life by promoting harmony, cooking, cleaning, nursing and many others which are of immediate importance. As a science it is not the "light household tasks" of which the poet sings but a study broad and deep. The old accusations that laziness and lack of womanliness are the causes of disinterestedness in household work, are no longer to be considered: the study of the new science will regenerate its own life. Our object in life is to become better human beings and to leave behind us a fitter race of men and women—to become as far as possible responsible for the unhappiness of the world, should be the aim of every true man and woman. To study the relation which we bear to the life of society, what we owe it and how but to accomplish the most good from the humble position of a house wife is to make woman's position the most exalted.

A drug firm at Excelsior Springs, Mo., will award a prize of fifty dollars to the member of the Mississippi Pharmaceutical association who identifies the largest number of drugs by the smell.

LITERARY SOCIETIES.

ATHENA:

First Debate—Resolved that the teachings of Ingersol are detrimental to society.

Second Debate—Resolved, that the United States should subsidize merchant marine.

HESPERIA:

First Debate—Should a system of compulsory arbitration in labor troubles be adopted?

Second Debate—Resolved, that the government should own and operate the telegraph lines of the United States.

FORUM:

First Debate—Resolved, that the United States should adopt a system of free coinage of silver at a ratio of 20 to 1.

Discussion—What has been the greatest reform of the century? Why? (15 minute speeches.)

E. G. RYAN:

First Debate—Resolved, that the civil service ought to be extended to all department of public service.

Second Debate—Resolved, that a senator or representative should be governed in his vote by the wishes of his constituents.

PHILOMATHIA:

First Debate—Resolved, that a system of cabinet government is preferable to the present system in the United States.

Second Debate—Resolved, that the policy of the United States in making railroad land grants has been unpolitic.

COLUMBIAN:

First Debate—Resolved, that the United States congress should make a law permitting the free and unlimited coinage of silver.

BILDUNGS-VEREIN BALL.

Invitations have been issued for the First Annual Reception and Ball of the Bildungs-Verein to be given at the Governor's Guard armory on Monday evening April 15; this is the first entertainment of the kind ever given by the society in its career of over two years.

The various committees are hard at work and every effort will be put forth to make this one of the leading events of the year. Tickets which will be sold in advance can be procured of Messrs. Wartner, Sauthoff and Hein, and will be on sale at Moseley's.

INTERNATIONAL CRICKET.

An international cricket match is proposed between the colleges of the United States and Canada. The United States team will be picked from the cricket elevens at Harvard, Pennsylvania and Haverford. The date and place of the match have not been definitely arranged, but it will probably be played at Manheim during the first week in July.

—There are 451 universities and colleges in the United States, employing 10,247 instructors, and with an enrollment of 122,555 students. Of this number, 55,553 are in collegiate departments, 43,054 are in preparatory departments, and 3,565 in graduate schools.—Oberlin Review.

A GRAND CONCERT

BY THOMAS' ORCHESTRA AND THE CHORAL UNION.

A PROGRAM FOR LOVERS OF MUSIC.

High School Gives a Concert Tonight.

The Choral Union will give a concert at the Armory, May 3d, in connection with Theodore Thomas' orchestra, of Chicago. The parts taken by the Choral Union will undoubtedly be given in as fine a manner as the oratorios which have been presented in the past. The following is the program to be given:

Overture, "Academic Festival" — Brahms.

Largo, from Symphony, "From the New World" — Dvorak

Part Songs—*a.* "There is Dew for the Flow'ret" — Eaton Fanning; *b.* "The Merry World is Free" — Pinsuti.

Madison Choral Union.

Wedding March with Variations — Goldmark.

By Babylon's Wave — Gounod.

Madison Choral Union.

(Intermission.)

Suite, "L'Arlesienne" — Bizet.

Prelude: "Minuetto," "Adagietto," "Carillon."

Ride of the Valkyries, "Walkure," "Voices of the Forest," "Siegfried," — Wagner.

Theme and Variations; Finale, — Op. 55. Tschaikowsky.

Violin Obligato, — Mr. Max Bendix.

HIGH SCHOOL CONCERT.

To be Given This Evening at the Unitarian Church.

The musical clubs of the high school will give a concert at the Unitarian church this evening. It will be under the auspices of the Unitarian Guild. The clubs contain some good musicians and an excellent concert is assured. The price of admission will be 25 cts.

SPRING FOOTBALL AT YALE.

Captain Thorne has called out all the new candidates for the positions of half and fullback of next year's Yale eleven, who are not at present taking part in any other branch of athletics. The work, which is to consist of kicking and catching, will begin today and continue for about three weeks. If the number of men warrant it, a contest will be held at the end and four prizes will be given. The centre rushes and quarterbacks, who have been working for two weeks past, will be kept a while longer to give them an opportunity of practising with the backs.

The ladies of the U. W. faculty will meet at the home of President Adams tomorrow afternoon. Other prominent ladies will be present.

PASSES THE SENATE.

Only one Dissenting Vote—Ready for the Governor.

The senate passed the university appropriation bill, under suspension of the rules, yesterday. The only member voting against it was Senator McGillivray, of Black River Falls. It now only requires the governor's signature to become a law.

The substitute library bill having been reported favorably by the claims committee will probably be passed. The decreased appropriation has won over a number of the former enemies to the bill.

FACULTY CONTROL AT PENNSYLVANIA.

A change has been made in the Faculty government at Pennsylvania. The old Faculty Athletic Committee has been dissolved by the Board of Trustees, and the deans of the respective departments asked to appoint from their respective faculties professors to compose a new board. This has long been the desire of the present committee. Under the present regime they had absolutely no power to enforce obedience should the athletic authorities see fit to resist their ruling. They could merely advise the adoption of certain measures. By the new plan greater powers are granted to the new board. The trustees have entrusted the regulation and restriction of athletics to them, and they will now exercise the full power of the trustees.

The new board will be practically the same as the old. It will be composed of three members of collegiate faculty and three each from the law and professional school faculties. From the law school, George Tucker Bispham and George Wharton Pepper, the law school's present representatives, will comprise two of the three. Dr. J. William White and Dr. Horatio C. Wood and Dr. John W. Adams will probably represent the medical schools; and Dr. Edgar F. Smith and Professor Simon N. Patten will be two of the college representatives. Deans Fullerton, Marshall and Patterson have not as yet announced their selections.—Courier.

CONSTITUTIONAL LAW.

Professor Parkinson will continue his course of synoptic lectures upon constitutional law, beginning on Monday, April 15th, at 4 p. m., in the law building. The study for this term will be the constitution of the United States. The work will consist of lectures, talks and quizzes upon the constitution, and the aim will be to gain such knowledge of its meaning and scope as shall be eminently practical. The exercises will be open to any who care to attend.

WILL MAKE A SURVEY.

About the first of June Prof. J. M. Clements, assistant professor of geology, and Samuel Weidman, a post graduate of the university, will leave for the northern peninsula of Michigan on a government geological expedition. They will be gone all summer. Prof. Van Hise has charge of the government geological work in the northwest.

The students of Brown University
have just been favored with a lecture
on "Trilby." Next!There will be a meeting of the
reporters and all others desiring to do
any work on the Cardinal at the up-
town office, in University hall (third
floor) tomorrow at 12:30 p. m.The election of a Badger board is
always an interesting event in the
history of a class and the present
sophomore class will probably prove no
exception. In electing the editors
every effort should be made to secure
the best men for the several positions
on the board, for the annual represents
in a measure the whole university as
well as the class that publishes it.The plan of the management of the
musical clubs to give a second con-
cert will no doubt meet with approval.
There are probably a number, both in
the university and in the city, who
have not heard the clubs this year
and also many others who will be
glad for an opportunity of hearing
them again. With the new program
which is promised, the concert ought
to prove a pleasant affair.We print in this issue a notice relative
to the organization of a University
Bicycle club. Two years ago the uni-
versity boasted of a club known as
U. W. Cyclers, but this organization
has not been perpetuated so that this
year we are without any bicycle organi-
zation. It is earnestly requested that
all students who ride bicycles be pres-
ent at the meeting to be held tomorrowbecause the season has already opened
and no time should be lost in re-
organizing.Just at this time the dramatic so-
cieties of the various colleges are
preparing to give their annual per-
formances. The Mask and Wig club
of the University of Pennsylvania is
about to give "Kenilworth" and the
Hasty Pudding club of Harvard will
produce "Proserpina." The students
of Beloit college were recently quite
successful in their production of Oedi-
pus. But the past few years have seen
no dramatic productions at the univer-
sity. This is probably not on account
of any lack of dramatic ability as the
students have often taken part in
plays given by Madison clubs. But
the students have always waited for
the Madison people to take the ini-
tiative in this matter. There is no
reason why a successful dramatic club
could not be organized among the
students. Such a club could add a
great deal to the college life by its pro-
ductions. The annual plays of the
clubs in other colleges are as im-
portant events as the concert of the
musical clubs, the promenade, etc.

LITERARY NOTE.

"The Pacific Railway Debts" is the
subject of a paper by Mr. R. T. Col-
burn, published by the American Acad-
emy of Political and Social Science.
The question as to the settlement of
these debts is one which must be de-
cided by Congress at an early date
since the thirty-years term of the
original loan of the United States to
the Pacific Railroad has rolled around.
The first instalment of bonds issued
to the Central Pacific Railroad matured
on January 16 last, and during the
next four years, but chiefly in
1898, the remaining instalments fall
due. Not only have the companies
failed to collect enough to pay off the
principal, but they have even failed
to pay a great part of the annual in-
terest, so that now the Central and
Union companies owe the government
about \$125,000,000, or twice the original
loan of \$64,000,000.Several modes of solving this prob-
lem have been advanced in Congress.
Mr. Colburn takes them up in turn
showing the advantages and disad-
vantages of each. He finally explains
the method which seems to him the
best.

CLIMATIC BEAUTIES.

Little drops of water
Freezing as they fall,
Make the walking shorter,
And the swearing tall.

ATHLETICS AT GRINNELL.

The Grinnell Athletic Union has secured the services of Trainer Greiner who will from now on take charge of track athletics at Grinnell. Mr. Greiner comes from Northwestern University, and has had ten years of experience as a trainer.

Grinnell athletics have perceptibly "picked up" since the arrival of the trainer, and active work has been commenced.

At a mass meeting of track men, last Wednesday, Mr. Greiner delivered a short address, in the course of which he said: "Each member of the team, who does his best, has an equal share in the victory, whether he wins one point or not. A man should work as faithfully for a second or third place as for a first. The third place may win the cup."

These remarks, intended for Grinnell men, are equally applicable to our athletes, and should ever be borne in mind by them. Although third places may not secure great personal glory for those who win them, they nevertheless count one in the final score, and are of the utmost importance. One point has more than once decided victories.

Twenty-six candidates are in training for the baseball team and systematic work has been carried on for some time. The Scarlet and Black published in Saturday's issue the batting and fielding averages of the men so far this season.

Captain Crary last week resigned the captaincy of the football team for next year owing to expected absence from school. H. G. Willard, '96, was elected to fill the vacancy.—Vidette Reporter.

DANCING ACADEMY.

Prof. Will R. Schimmel's Dancing Academy will reopen at the Odd Fellows' hall, tomorrow (Saturday) evening, at 7 o'clock. The class will be followed by a social dance. Students and their friends invited.

CURIOS FACTS.

A clay found near Clarence, Mo., has been found to contain forty per cent. of aluminum.

The Russian government expects to complete the great Trans-Siberian railroad by 1901.

The Soudan is so called from the Arabic word Belad-ez-Suden, "the land of the blacks."

The fishermen along our coasts and in our waters catch \$45,000,000 worth of fish every year.

Montenegro has its name from the color of its mountains. The word means "black mountains."

The total valuation of all the farm products of every description was by the last census, \$2,460,107,454.

The total tonnage passing through the Sault Ste. Marie canal during the season was valued at \$143,000,000.

Since the organization of our mint in 1793, it has coined, of gold, \$1,612,405,375.50, and of silver, \$669,929,323.

In Zante, one of the Ionian Isles, there is a petroleum spring that is mentioned by Herodotus. It has been known for nearly 3,000 years.

In China, which has long been known as "the land of opposites," the dials of clocks are made to turn around, while the hands stand still.

Search lights are such good targets for the enemy's guns that the Germans are arranging to throw the light first on a mirror and thence on the enemy, thereby concealing its real source.

There is a movement in North Adams, Mass., to make the town a city. With a population of 21,000, it

claims to be the largest town in America, with the exception of Watervliet, N. Y.

There are enrolled in the public schools of our country 13,484,572 pupils, who are taught by 373,210 teachers.

The Brewers' Journal states that English syndicates have \$91,000,000 invested in American breweries, the dividend on which, at nine per cent. last year, was \$8,190,000, and was paid in gold.

The city of Buenos Ayres has the largest street car system, in proportion to its population, of any city in the world. The total number of passengers carried last year was 71,346,564, while the monthly average was 5,955,547.

Austrians seem determined to maintain their reputation for being the most merry and pleasure loving nation in Europe, for their parliament has just rejected, with a considerable show of indignation, a bill making drunkenness penal. The opponents of the measure found no difficulty in convincing the house that the established habits of the people were such that it was impossible to punish this failing, and that the feasts and family drinking bouts which have been customary among the population for over a thousand years, can not be abolished by law.

The captain of one of our American war ships in the east says, after visiting a Japanese war hospital near Nagasaki: "The hospital was the admiration of the French and English surgeons, as well as our own. The medical staff was all Japanese, who had graduated in medicine and surgery either in America or England, then taken a post-graduate surgical course in clinics at the Paris and Berlin hospitals. They had the best modern instruments and systems, the newest antiseptics—everything a hospital on modern lines should have. And all this is the work of a generation."

An English physician calls attention to a means of keeping pneumonia, colds, chills and all the ailments that cold weather brings on, at a distance. Deep and forced respirations, he says, will keep the entire body in a glow in the coldest weather, no matter how thinly one may be clad. He was himself half frozen to death one night, and began taking deep breaths and keeping the air in his lungs as long as possible. The result was that he was thoroughly comfortable in a few minutes. The deep respirations, he says, stimulate the blood current by direct muscular exertion, and cause the entire system to become prevaded with the rapidly generated heat.

Everyone should visit the clothing store of Grinde, Schmedeman and Quammen during Easter week and see their grand electrical display. They are opening to the public one of the finest assortments of Spring Clothing and Gents' Furnishing Goods ever seen in the city at prices well in accord with the hard times. Be sure and give their new tailoring department a call before ordering your spring clothing.
