Syringes and Water Bottles Combined	104, 106	Yeast Powder Bottles	33
Syrup Dispensing Bottles	45	Zincs, for Batteries	134

We take pleasure in presenting our Annual Price List for 1903, which contains, in addition to goods formerly shown, a number of new articles in GLASSWARE AND DRUGGISTS' SUNDRIES that have been added to our line since the last issue.

DISCOUNTS.

Most of the prices herein given are subject to discount. Discount sheets will be furnished to the trade upon application.

TERMS.

Payment in funds at par in New York or Philadelphia.

We necessarily send our Price List to many parties with whom we have not the pleasure of an acquaintance, and first orders should be accompanied with the cash, or satisfactory references.

No goods sent C. O. D. to strangers.

We pack carefully, and ship goods in a merchantable condition, and our responsibility ceases with the signing of the Shipping Receipt. Claims for missing packages, overcharges in freight, or unusual breakage, should be made to the transportation companies.

ORDERS FOR SUMMER STOCK.

During July and August, owing to the heat, but little Glass is made. It is, therefore, essential that our customers, in order to procure a stock of Glassware to meet their wants during the Summer, should, so far as practicable, send in their orders by the 1st of May in each year.

GLASSWARE.

For many years our Glassware has held the first place in the market, and has been generally accepted as the standard of excellence.

Through close selection of materials and care in all branches of manufacture, we insure an even production of bottles which have never been excelled in strength, color, and design, or equaled in regularity of weight, content, and finish.

Besides our regular qualities of Flint and Green Glass, we make Amber, Blue, Dark Green, and White Opaque. Many articles on our List can be made in any of these colors.

Correspondence is invited in regard to any special articles of Glassware that may be wanted.

STOPPERED WARE.

Having long made a specialty of STOPPERED WARE, we have entire confidence in recommending our output as thoroughly reliable for essences and volatile fluids, or for packing with liquid contents, as every bottle is carefully tested before it is sent out.

Each glass stopper is ground into the bottle for which it is intended, and will fit no other bottle satisfactorily.

PRIVATE MOULDS.

The manufacture of Private Moulds for customers who desire bottles of special shapes or sizes is a considerable branch of our business, and we are prepared to execute orders on favorable terms.

The advantages are great for making moulds at a Glass Factory, where experts know the special requirements necessary for delivering smooth and regular bottles. When desired, samples can be blown and forwarded before lettering or finishing up the mould, so as to allow of modification of style.

Moulds for Insertion of Lettered Plates.

We have a large line of Moulds arranged for the insertion of Lettered Plates, whereby the expense of entire New Moulds for producing Lettered Bottles of our regular styles can be avoided.

Special pencil designs, with devices, monograms, etc., will be sent for selection or approval without charge. See designs for lettering, page 8.

The same plates fit the moulds for Pharmacy Ovals, Phenix Prescriptions, Philadelphia Ovals, Manhattan Ovals, Double Philadelphia Ovals, Baltimore Ovals, Knickerbocker Ovals, Penn Ovals, Millville Rounds, French Squares, and French Squares Wide Mouth, and ware of all of these styles can be ordered from the same engraved plate. Other styles require special plates.

The Small Charge for Engraving Lettering on our Plates is made on the First Order only, the Plates being Preserved for Subsequent Orders.

STOPPERS.

The following cuts show our leading styles of Stoppers. While each stoppered bottle catalogued has its regular style of stopper, other styles can often be substituted to meet special requirements.

701
Mushroom Tincture.
All sizes.

702
Ball.
All sizes.

703
Flat Head or
"Hand Made."
All sizes.

704
Square Head.
 $\frac{1}{2}$ oz. to quart.

705
Lubin.
 $\frac{1}{2}$, 1 and 2 ounce.

706
Tall.
 $\frac{1}{2}$ oz. to pint.

709
Mushroom
Saltmouth.
All sizes.

712
Carmine.
All sizes.

717
Pear.
 $\frac{1}{2}$ oz. to pint.

718
Medicine Chest.
1 and 2 oz.

720
Table.
1 and 2 oz.

722
Club Sauce.
 $\frac{1}{2}$ pint, pint, and
quart.

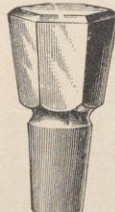

724
Flat Hood.
Tinct. 1 oz. to gallon.
Salt M. 1 oz. to quart.

725
Oblong Head.
For Saltmouths.
All sizes.

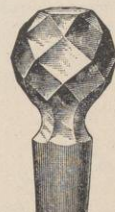

727
Globe Hollow.
All sizes.

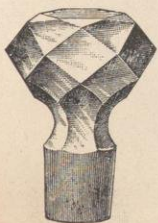

728, 732, 733
Tall Hexagon.
2, 4 and 8 oz.

734
Hollow, Flat, Cut.
1 oz. to 2 gallon.
Tinct. and Salt M.

736
Lapidary.
2 to 16 oz.

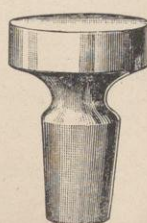

740
Flat Lapidary.
8, 16, and 32 oz.

742
Diamond Globe.
1 to 16 oz.

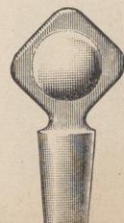

761
Extra Lapidary,
Flat Top.
1 to 16 oz.

763
Heavy Top
Mushroom.
 $\frac{1}{2}$ oz. to quart.

772
Full Lapidary.
 $\frac{1}{2}$ pint to $\frac{1}{2}$ gallon.
Tinct. and Salt M.

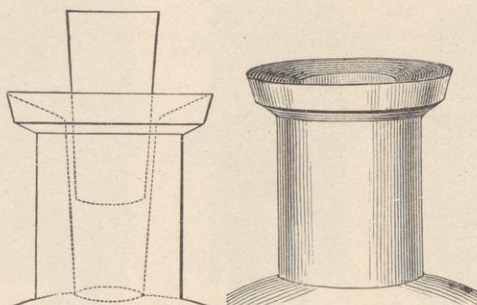

773
Diamond Head.
1 ounce.

FINISH.

In the manufacture of bottles at our factories, special attention is given to the forming of the lips and mouths, and our ware has always been noted for its smooth and uniform finish. In any package of bottles made by us, the mouths will be found to run exactly alike, so that one size of corks will fit them all.

STYLES OF FINISH.

When ware is desired with a different finish from the standard style, it should be distinctly indicated as below.

"Prescription Lip" means a flaring mouth, with thin edge, suitable for dropping.

"P. L." means "Patent Lip," that is, square and flat on top.

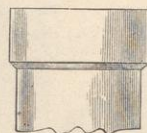

"Ring" means a finish such as is generally used on Castor Oils.

"Wine Finish" is like cut herewith.

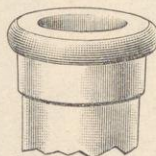

"Champagne Finish" means that a narrow ring is below the mouth.

"Blow Over" means ground off without lip.

"Deep Lip" means a flat patent lip, as put on English Essential Oils.

"Extract Lip"—This style is used in bulk and small extracts.

"Re-enforced Extract Lip" is like cut herewith.

"Double Ring" means a ring, as on Citrate of Magnesia bottles.

"Trumpet Mouth" is used in Colognes.

"Wide Prescription Lip" means extra width of thin lip, as in Reagent bottles.

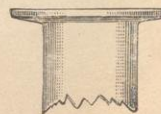

TABLE.

WHITALL TATUM COMPANY.

FLINT GLASSWARE.

PRESCRIPTION BOTTLES.

Our Prescription Bottles, measured to base of neck, hold slightly over their named capacity.

NO CHARGE FOR PACKING GOODS ORDERED IN ORIGINAL PACKAGES.

The Moulds for most of our Prescription Bottles are arranged to take lettered plates, so that Customer's name, etc., can be blown on the bottles, when ordered in Original Package lots, at a slight additional expense.

For designs of lettered plates, see page 8.

FOR QUANTITIES IN ORIGINAL PACKAGES, SEE PAGE 11.

W. T. CO. ACME BALL NECK PANELS.

These Bottles are uniform in shape, and are much larger in appearance than the ordinary Ball Neck Panels of corresponding capacity. The panel on one side is oval in form, which adds greatly to the handsome appearance of the Bottles. The moulds are arranged to take lettered plates, so that customer's name, etc., may be blown in the oval panel, leaving the square panel for labeling.

NAME.	Price per gross.	Contents.	Height to Base of Neck. Inches.	Width. Inches.	Thickness. Inch.	Length of Neck. Inches.

PANELS.

To aid in the selection of Panelled Bottles, we give below a table of standard dimensions and contents at standard weight. There will be some slight variation from figures given, especially in length of neck.

Except where otherwise specified, the Bottles are Panelled on four sides.

Moulds for Panelled Bottles, except G. 1 ounce and L. 2 ounce Old Style, take Lettered Plates.

NAME.	Price per Gross.	Contents.	Height to base of neck. Inches.	Width. Inches.	Thickness. Inches.	Length of neck. Inches.

W. T. CO. X PANELS.

A line of Panel Bottles, uniform in shape, and, as shown by measurements given below, much larger in appearance than the ordinary panel bottles of corresponding capacity. The panel on one side is oval in form, which adds greatly to the handsome appearance of the bottles. The moulds are arranged to take lettered plates, so that customer's name, etc., may be blown in the oval panel.

NAME.	Price per gross.	Contents.	Height to base of neck. Inches.	Width. Inches.	Thickness. Inches.	Length of neck. Inches.	No. of doz. in original package.

ROUNDED SQUARE RECESSED WARE.

PATENTED APRIL 2, 1889.

A very handsome style of shelf ware, blown in iron moulds, special care being taken to make the bottles smooth and well finished. They are of Square shape, with Rounded corners; the Recess is oblong, and is carried around to the sides of the bottle, the labels being specially made to conform, so that their edges are protected from injury. As the front of the bottle is flat, the label is shown to great advantage.

WHITALL TATUM COMPANY.

GLASS LABELS. FOR SHOP FURNITURE BOTTLES.

See Illustrations, pages 47 and 48.

Lists of Names for Labels are furnished, on application, to parties wishing to order outfits.

Labels are not carried in stock, but are always painted to order.

The labels are painted with block letters, as shown in illustrations, unless otherwise specified. Any style not listed can be made on receipt of pattern or sample. When labels are wanted to match others already on hand, the fact should be stated and sample sent with the order.

When **labels only** are wanted, give the circumference of the bottles that they are to fit, measured at the point where they are to be attached.

Unless otherwise ordered, the lettering will be in accordance with the U. S. Pharmacopœia, the necessary abbreviations being made.

The prices given below are for loose labels, to fit bottles of any size from $\frac{1}{2}$ gallon down, lettered in the usual way. 1 gallon labels, 5 cents each extra, net; 2 gallon labels, 10 cents each extra, net. Lettering in two lines instead of one, 2 to 3 cents extra, net. Any special style of label or lettering, special price.

One cent each, net, is charged for attaching labels.

PLEASE ORDER BY NUMBER.

All styles of labels are made with square corners when ordered for Recessed Ware.

DIRECTIONS FOR ATTACHING GLASS LABELS TO BOTTLES, JARS, ETC.

CEMENT.—To one part of best yellow wax add three of rosin ; melt together in an open pan or kettle, with a gentle heat, to the consistency of syrup.

DIRECTIONS.—Place the bottle on a table in a nearly horizontal position ; the glass must be perfectly free from moisture. Pour the cement on the hollow side of the label with a spoon ; then apply the label to the bottle with a gentle pressure. While the cement is soft form a groove in it by running the point of a knife around the label. This will save labor in chipping it off. It will harden in about ten minutes, when with a putty knife such as glaziers use, remove the surplus. Clean bottle and label with a little kerosene oil ; wipe off with a damp towel.

For Drawer Pulls and Labels, see pages 188 and 189.

PRESCRIPTION CASE BOTTLES.

WITH GROUND GLASS LABELS.

The labels on our Prescription Case Bottles are blown in the glass, the face of each letter being ground so as to render it distinct. The lettering is thus indestructible and in no danger of being defaced when the bottle is washed or handled.

The lips of the Tincture Bottles are wide and specially constructed for dropping.

The mouths of the Saltmouths are of extra width and the lips are protected from the dust by a Hood Stopper.

Amber Bottles are furnished for articles affected by the light, and Blue Bottles, for Poisons.

PRICES.

LABORATORY GLASSWARE.

Our Glassware for Chemical use contains no lead, zinc, or other metallic flux, and is made after a formula recommended by the best authorities, for resisting the action of chemicals and for safety under fire.

Through increased experience and extended facilities we have succeeded in introducing many improvements in material and workmanship, and claim our product to be equal, and in some respects superior, to any in the market.

Our graduating of Flasks, Jars, Burettes, and Pipettes is based on the Liter of the International Bureau of Weights and Measures. It is done with the aid of apparatus especially devised and controlled by ourselves, and by methods which insure freedom from error, so that we are able to guarantee the highest degree of accuracy. A comparison of our fine graduating work with the best imported goods is cordially invited.

When ordered in sufficient quantity, we can, if desired, furnish at extra price any of our Graduated Apparatus with a certificate of verification from the National Bureau of Standards, at Washington. Orders for such Apparatus will be subject to the delay incident to verification.

Having unusual facilities for filling small orders from stock, we solicit accounts with small academic and private laboratories, believing that buying at first hands will be found to the interest of purchasers.

2600. MUSEUM JARS.

FOR PRESERVING AND DISPLAYING SPECIMENS IN MUSEUMS AND EXHIBITIONS.

These Jars are now made without contraction at the neck, so that the width of the mouth is the same as the inside diameter of the body of the Jar.

The contents are enclosed entirely in glass, with a thin rubber medium under the lid to make a tight joint. This lid is securely fastened down with a metallic clamp. On the under side of the lid are two glass rings, from which specimens may be suspended so that they will stay in any position.

Patented June 11, 1895.

WHITALL TATUM COMPANY.

W. T. CO. REAGENT BOTTLES.

WITH GROUND GLASS LABELS.

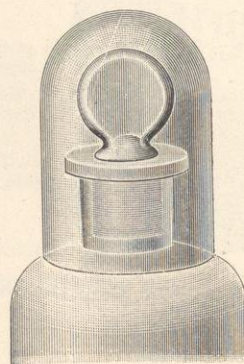

The labels on these Bottles are of raised letters blown in the glass, the surface of each letter being ground so as to render it distinct. The lettering is thus indestructible, and in no danger of being defaced when the bottle is washed or handled, and the inconvenience and unsightly appearance attending the use of paper labels is entirely avoided.

The Bottles are made of glass containing no lead, zinc or other metallic flux, and in the points of convenient shape, thin dropping lip and perfect stoppering are unequalled. They are exclusively used in many of the leading laboratories of the country.

The names and symbols have been carefully revised in accordance with modern practice, and are exactly as given in the list.

Included in our list of 4 oz. and 1 oz. Reagent Bottles will be found the names of all the Test Solutions referred to in the United States Pharmacopœia.

SPECIAL N. B. FITTINGS.

Sold only in Packages of 3 dozen.

In addition to the fittings already described, we furnish two of cheaper grade, designed to meet the demand for an article that can be sold at a very low price. While not of as good quality as our standard line of goods, they contain much better value for the money than the cheap fittings usually sold.

No. 3. White Fitting, White Rubber, Maple Top and Shield.

Per gross \$7 20

No. 5. Black Fitting, Black Rubber, French Jet Top, and Bone Shield.

Per gross \$9 00

W. T. CO. No. 10 NIGHT LAMP.

This Lamp is designed to furnish a dim light to burn all night in a nursery or sick-room.

The light is supplied by a small taper floating on oil.

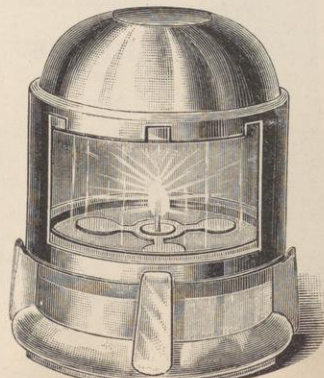

The base of the Lamp, or oil cup, is of glass, and the upper part of nickel-plated metal with a sheet of mica set in one side. The other side being opaque, the light may be shaded by turning the top around.

Cotton Seed, Lard, Spermin, Olive, or U. S. Oil may be used. One cup of oil and one taper will burn all night.

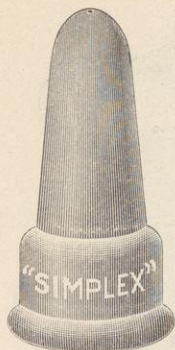

Sold only in packages containing 1/2 dozen.

Per dozen \$2 70

6

Height, 3 1/4 inches.

"SIMPLEX" Hygienic Nipple.

Patented October 28, 1902.

The "SIMPLEX" Hygienic Nipple is made so that all parts of the interior are plainly visible and readily cleaned, there being no ribs, corrugations, bulb, or sharp angles to catch the milk, and we think the trade will appreciate, at a glance, its many advantages over any Nipple heretofore offered for sale. The "SIMPLEX" Hygienic Nipple can be easily turned inside out if desired.

HOME FOUNTAIN SYRINGES.

Patented June 22, 1886.

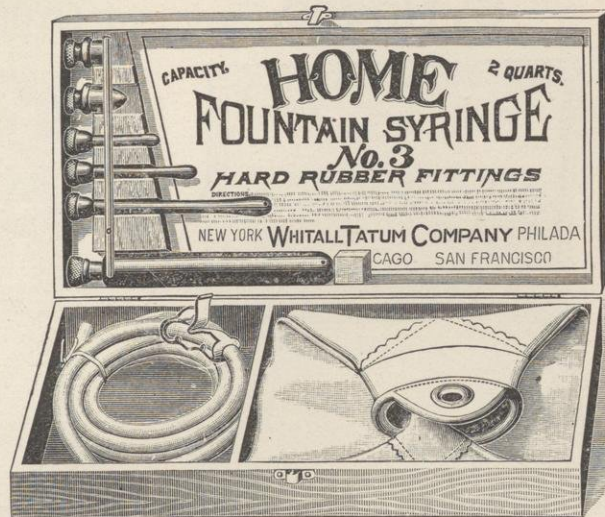

The bag of the Syringe is formed so that when filled it expands to a flat shape, instead of being thin at edges and thick in the centre, as in the old style.

All the pipes and connections are of Hard Rubber.

Each Syringe is put up in handsome and well-finished wooden box, with Infant's, Rectal, and Vaginal Pipes, Vaginal Irrigator, Nasal Douche, and Spray.

The Pipes are contained in a rack in lid of box, so that they may be always kept in place.

All Glass Spray Tubes and Reservoir encased in and protected by the Soft Rubber Bulb.

The Spray Tubes are made entirely of Glass attached to and forming a part of the outer Glass tube which serves as a container for the medicament used. The Reservoir is designed to hold sufficient for at least one day's treatment.

The Rubber Bulb is made so that when the Atomizer is not in use the Cylindrical Glass Reservoir can be pushed into the Bulb, forming a very compact instrument, the Bulb also furnishing a good protection for the Glass when carried in the pocket.

This instrument is designed for practical use, and produces a fine spray or vapor similar to our Nebulizers.

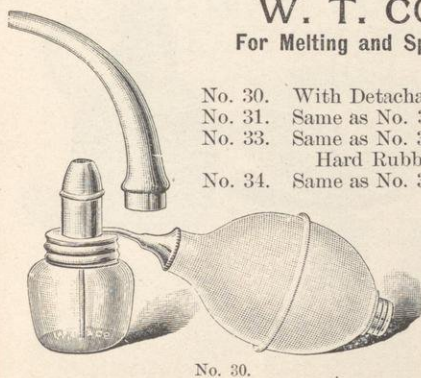

Per dozen \$7 00

No. 1. EMMET SMITH ATOMIZER AND NEBULIZER.

METAL PARTS NICKEL-PLATED AND POLISHED.

This instrument may be used either as an Atomizer or Nebulizer, and will be found invaluable where a very fine spray or subdivision of medicated oil is necessary. It is so constructed that the liquid will not spill or leak out when the Atomizer is screwed firmly on the bottle, so as to make a liquid-tight joint, and the bottle is not filled above the ring near the base. The throat tube is so made that either end will fit the atomizer.

Each in handsome box Per doz. \$13 50

No. 1 W. T. CO. NEBULIZER.

PATENTED FEBRUARY 6, 1900.

Glass Bottle and Globe.

REMOVABLE THROAT AND NASAL TIPS OF
HARD RUBBER.

Metal Parts Nickel-Plated and Polished.

This instrument will produce a vapor much finer than the spray obtainable from the best class of Atomizers.

The Nebulizer will be found invaluable where a very fine subdivision of medicated oil is necessary.

Each in handsome paper box Per doz. \$18 00

RAUSCHENBERG'S FORMALDEHYDE DEODORIZERS.

PATENTED MAY 1, 1900.

This apparatus was originally designed for the New York Hospital, where its efficiency has been thoroughly demonstrated.

The Formaldehyde Gas emanating from it instantly destroys all odors of putrescent animal or vegetable matter.

Formaldehyde is known to be the most reliable antiseptic, disinfectant, and germicide. Moths, and all forms of insect life, can be thoroughly destroyed by starting the apparatus, and placing it in a closet containing the infected clothing, closing the door and allowing the generator to work for about thirty minutes.

No. 1. Capacity for deodorizing 50,000 cubic feet, or for disinfecting 500 cubic feet; also for medicinal uses.

No. 2. For disinfection—capacity, 4,000 cubic feet.

	Each.

The Florence

FARADIC BATTERY.

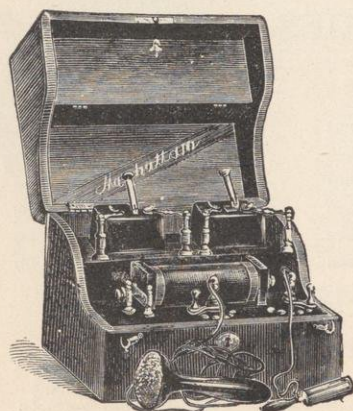

With Patent Hard Rubber Hydrostat, Hinged Rod, Silk-covered Cords, and Shell Electrodes. All metal parts nickel-plated. In hand-polished Cherry Case. Size, $6\frac{1}{2}$ x 5 inches.

Each \$8 00

THE MANHATTAN FARADIC BATTERY.

TWO CELLS, SIX CURRENTS.

The Battery is of excellent workmanship and finish. It is furnished with Patent Hard Rubber Hydrostats, Hinged Rods, Silk-covered Cords, Shell Electrodes with Handles, and Sponge Electrode.

By an improved device the currents may be changed as desired, without disconnecting the cords and breaking the circuit.

The cells can be used either separately or together. When the battery is not in use, the zincs may be removed from the fluid without disturbing the caps of the cells.

The case is of mahogany, finely polished, and contains a closed receptacle for the electrodes. Size of case, $9\frac{1}{4}$ x $7\frac{1}{4}$ inches.

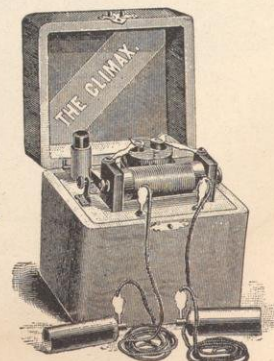

This Battery will be found especially well adapted to the use of physicians.

Each \$18 00

THE CLIMAX FARADIC BATTERY.

An effective Battery for family use, at a very small cost. The small size of this Battery renders it especially convenient for persons traveling. It is enclosed in a handsome polished wood case, and furnished with Cords and Shell Electrodes. Size of case, $5\frac{1}{2}$ x 5 inches.

Each \$4 50

The Phoenix

FARADIC BATTERY.

With set of 10 Electrodes, finely finished Wood Handles, and Silk-Covered Cords.

Hand-Polished Cherry Case, with drawer for containing the Electrodes. Size of case, $7\frac{1}{2}$ x 7 inches.

Each \$14 00

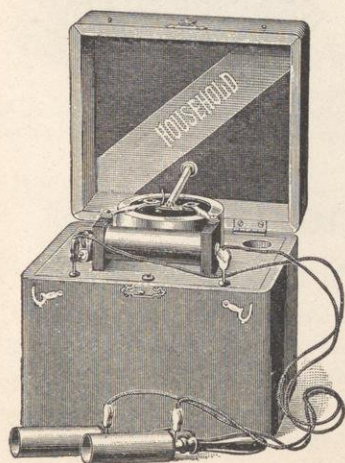

HOUSEHOLD FARADIC BATTERY.

Especially adapted for home use. Cylindrical Cell, which may be removed from the box for filling without disturbing the other parts of the battery. Hinged Rod, with zinc and double carbons attached. Silk-Covered Cords, Shell Electrodes, with Handles.

Case of fine quartered oak, polished. Size, $7\frac{1}{4}$ x $6\frac{1}{4}$ inches.

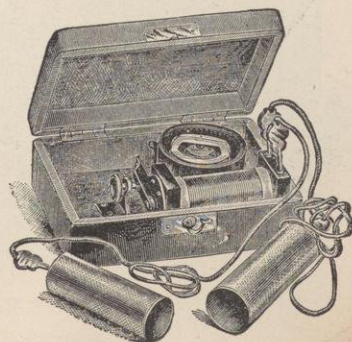

Each \$7 50

POCKET BATTERIES.

No. 1. One Cell. Complete with Zinc, Carbon, Coil and Regulator, Silk-Covered Cords, Shell Electrodes, and vial of Bisulphate of Mercury. In Polished Mahogany box, $4\frac{1}{4}$ x 3 x $1\frac{1}{2}$ inches.

Each \$2 80

No. 2. Two Cells. Complete with Zincs, Carbon Cups, Coil and Regulator, Silk-Covered Cords, Shell Electrodes with Handles, and vial of Bisulphate of Mercury. In Polished Mahogany Box, $6\frac{1}{2}$ x 3 x $1\frac{1}{2}$ inches.

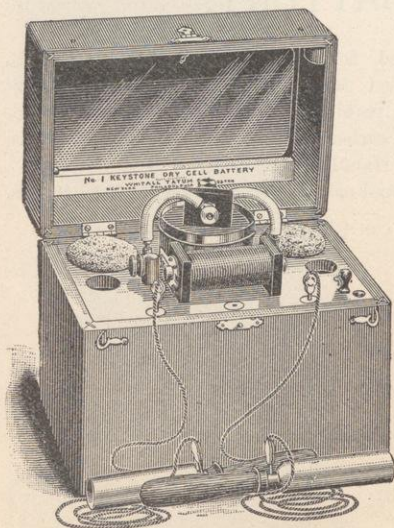

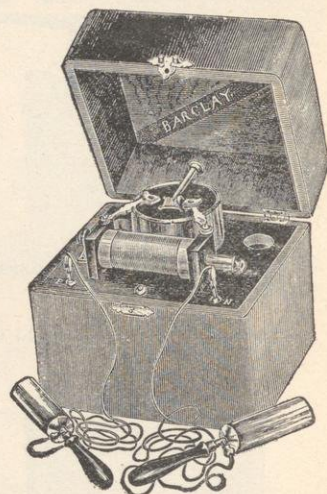

Each \$5 00

The Barclay-No.1.

FARADIC BATTERY.

For physicians' or household use. An excellent machine at a popular price. Patent Hydrostat, Hinged Rod, Silk-covered Cords and Shell Electrodes with Handles. All metal parts nickel-plated and burnished. In handsome polished wood case. Size, 6½ x 6 inches.

Each \$6 00

Keystone Dry Cell Faradic Batteries.

These Batteries are fitted with the improved Mescro Cells. They are put up in highly polished Mahogany Cases, and are furnished with the following Electrodes: one large Foot-plate, two Metal Shells, two Wood Handles and two Sponge-covered Discs, and one pair Silk-covered Cords.

ELECTRODES.

For use with Galvanic or Faradic Medical Batteries.

We are now furnishing a line of fine Electrodes for use with our Batteries. These instruments are of best workmanship and finish, and are supplied either singly or in sets. A complete set in Case forms a noticeable addition to the outfit of a drug store. The articles may be replaced as fast as sold, thus keeping the set complete.

They may be ordered by numbers as designated below:

FULL SET, in plush-lined Leatherette Case \$24 00

W. T. CO. BACTERIOLOGICAL TEST SET.

In combination with a suitable microscope and its appurtenances, this set forms a complete apparatus for ordinary bacteriological tests. The outfit is enclosed in a handsome case of polished mahogany, with drawer. Size of case, 15 x 10 x 9 inches.

The Set Contains:

- 8 1½-ounce Wide Mouth Bottles, fitted with perforated Soft Rubber Stoppers and Tube Pipettes.
- 6 1-ounce Glass Stoppered Reagent Bottles.
- 4 4-ounce Glass Stoppered Reagent Bottles.
- 3 Glass Boxes with Glass Lids.
- 1 1½-ounce Glass Spirit Lamp, complete.
- 1 Balsam Varnish Bottle.
- 1 Test Glass.
- 1 60 cc. Graduate.
- 1 3-ounce Tall Beaker.
- 4 5-inch Test Tubes.
- 1 5-inch Glass Stirring Rod.
- 1 Extra Tube Pipette.
- 1 2½-inch Evaporating Dish, Dark Glass.
- 1 2½-inch Evaporating Dish, Berlin Porcelain.
- 1 Platinum Teasing Needle, on Glass Rod.
- 1 2-inch Glass Funnel.
- 1 Adjustable Funnel Holder.
- 1 Zinc Tray, 8½ x 13½ inches.
- 1 Pair Steel Pincers.
- 1 Copper Heating Plate.
- 1 Pack 4-inch Filter Paper, White.
- 1 Sheet Gummed Labels.
- Blotting Paper.
- Each \$16 00

HYPODERMIC SYRINGES.

Metal work finely nickel-plated. Points of superior quality and not liable to rust. Warranted not to leak.

Special attention is called to the convenience, durability, and compactness of our metal cases.

No. 3 PHENIX HYPODERMIC SYRINGE.

IN NEAT AND COMPACT NICKEL-PLATED METAL CASE
WITH HINGED LID.

With Graduated Glass Barrel protected by a Fenestrated
Metal Cylinder.

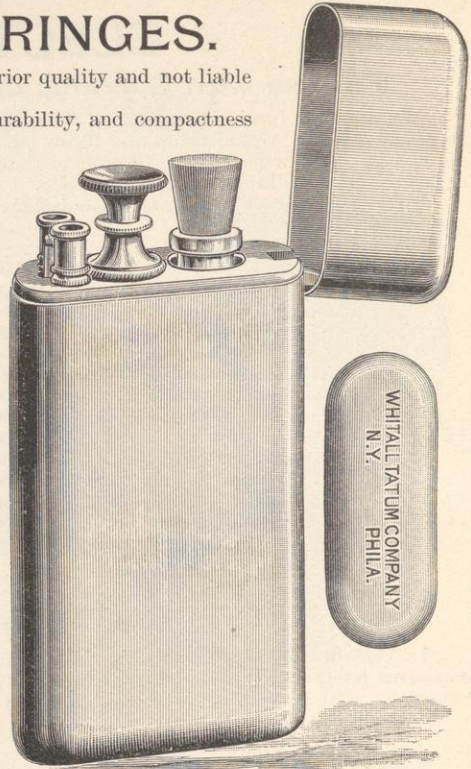

By a simple device, used in connection with this style of Syringe, the needles can be attached to the Syringe before they are removed from the case, and can be returned to the case and securely fastened in it before they are detached from the Syringe. This obviates the inconvenience of handling the needles, as from the time the case is opened to use the Syringe, until it is closed ready to return to the pocket, it is not necessary to touch the needles with the hand.

We Specially Commend this Favorite Style to our Customers.

Per dozen \$24 00

Per dozen \$15 00

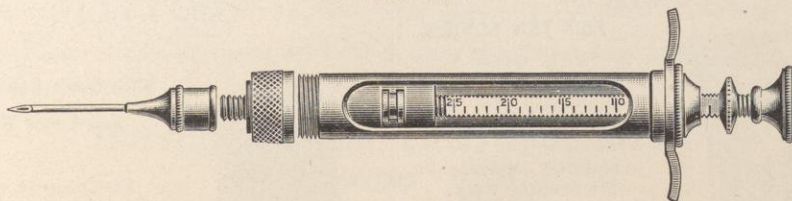

No. 30.

**W. T. CO. DETACHABLE PISTON-HEAD
HYPODERMIC SYRINGES.**

FOR LIQUIDS OR TABLETS.

Fenestrated Metal Cylinder, with Finger Rests. Glass Barrel. Graduated on Piston-Rod.

A special feature of this Syringe is the device by which, when it becomes necessary to renew the packing of the piston, the rod may be unscrewed from the head, and the latter, together with the glass barrel, removed from the frame, and a new barrel, with piston-head already adjusted to it, inserted in its place. It is therefore unnecessary to return the syringe to the manufacturer for repairs, and it may be kept in use until the new barrel and packing have been received.

Glass barrels, with piston-heads adjusted to fit, are kept in stock, and will be forwarded by mail at a cost of fifteen cents each, net.

DRUGGISTS' SUNDRIES.

WHITALL TATUM COMPANY.

139

No. 300 W. T. Co. Prism Clinical Thermometer.

MAGNIFYING FRONT.

Patented January 16, 1883.

Fahrenheit or Centigrade.

- No. 300. Four inch length, in Patented Oval Metal Case with Undetachable Slide Cover (Pat. June 15, 1886) \$18 00
 With Certificate of Yale University Observatory, showing variation from true standard at every 5° 24 00
 Our No. 300 Thermometer, being prismatic or triangular in form, is prevented from rolling when laid down, and danger of breakage through accident is thus materially lessened.
 The column of mercury is highly magnified, by which an accurate reading of the instrument is greatly facilitated.
 The Thermometer is self-registering, having an Indestructible Index, the column remaining at its full height until shaken down.

No. 342 W. T. Co. Clinical Thermometer.

INDESTRUCTIBLE SCALE.

SELF-REGISTERING.

Fahrenheit Scale Only.

- No. 342. Indestructible Index, 4 and 5 inch lengths, in hard rubber cases \$12 75
 A cut-off is formed in the bore of this Thermometer, which allows the mercury to rise freely, but prevents its receding into the bulb; it therefore remains at its full height until shaken down.

No. 360 W. T. Co. One Minute Clinical Thermometer.

MAGNIFYING FRONT.

Fahrenheit Scale Only.

- No. 360. Four inch length, in Patented Oval Metal Case with Undetachable Slide Cover (Pat. June 15, 1886) \$18 00
 With Certificate of Yale University Observatory, showing variation from true standard at every 5° 24 00

	Per gross.
$4\frac{1}{8}$ x 3 x $1\frac{1}{4}$ inches	\$6 00

LIP SALVE BOXES.

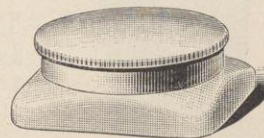

Made of Opaque White Glass, with Nickel-Plated and Polished Screw Caps.

No. 1.

No. 1. This Box is very attractive in appearance, and from its size and shape, and the security of the Screw Cap, is specially adapted for carrying Cold Cream, Vaseline, etc., in the pocket.

Diameter, $1\frac{3}{16}$ in. Height, $\frac{3}{8}$ in.
In boxes of 2 dozen . \$9 00 per gross.

No. 2.

Patented May 28, 1901.

No. 2. New Style. Body, $1\frac{1}{4}$ inches square. Height, $\frac{9}{16}$ inch.
In boxes of 2 dozen \$10 00 per gross.

ACME WATER COOLER.

Patented March 26, 1895.

FOR KEEPING WATER COLD, PRESERVING CRACKED ICE, Etc.

Dimensions, $5\frac{1}{2}$ x 7 inches.

A glass jar, capacity one quart, is inclosed within a double walled can, so constructed as to be a non-conductor of heat. When the can is closed the temperature inside is kept almost unchanged for a considerable length of time. Ice placed in the jar will remain unmelted for many hours, and water may be kept perfectly cold all night.

Owing to its non-conducting quality, the can is also well adapted for retaining the heat of broth, gruel, or other food placed in the jar when hot.

The can is lined with zinc, and is handsomely japanned outside. It is furnished with a folding handle so that liquid may be readily poured out without removing the jar from the can.

Per dozen	\$15 00
---------------------	---------

GRADUATES.

In all our graduating work the Liter of the International Bureau of Weights and Measures is taken as the unit of volume, in accordance with the requirements of the Pharmacopœia.

The Phenix and Acme Graduates are made to *deliver* the quantities indicated, and are standard at 15° C. (59° F.). All readings are to be made at the bottom of the meniscus.

With the aid of apparatus specially devised and controlled by ourselves, we are able to insure absolute freedom from error. In no case is mechanical division employed, but every line on each graduate is determined independently and with the same accuracy. Every graduate is carefully tested after graduation.

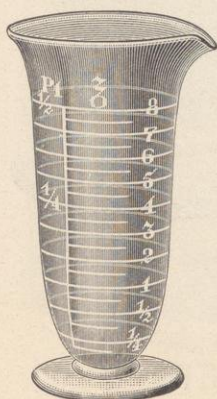

A GUARANTEE OF ACCURACY ACCOMPANIES EVERY GRADUATE.

The principal lines on all Graduates, except the "Duplex" and sizes under $\frac{1}{2}$ ounce, extend entirely around the glass, so that a level can be obtained without difficulty.

PILL PESTLE—Wedgwood.

About 8 inches long, with rounded end. Suitable for working pill mass in mortar.

Per dozen . . . \$3 00

EVAPORATING DISHES. PHENIX. PORCELAIN LINED.

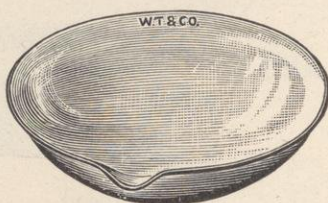

Iron, with Detachable Handles.

		Each.
7 inch.	1½ pint	\$1 00
8 inch.	1 quart	1 20
10 inch.	½ gallon	1 50
13 inch.	1 gallon	2 20
16 inch.	2 gallon	4 25
18 inch.	3 gallon	5 75

The Porcelain Lining is warranted acid proof, and extends over the oval rim of the dish, preventing the contents from coming in contact with the iron. The dishes are turned smooth on the inside before applying the porcelain, so that the surface of the lining is even and free from holes. Each dish is furnished with two handles, which are easily attached when it is to be removed from the fire.

W. T. CO. CORKS.

Particular attention is called to our Special Brands of Corks, which are now supplied in four grades. They are of extra length, and are specially selected for our purpose, and we guarantee their quality. The Red Seal and Bulls-Eye Brands are particularly adapted for use in pre-

scription bottles. The White Seal is an intermediate grade; and the Acorn Brand will meet the wants of those who desire Corks of good quality but low in price. The high standard of excellence which has made these brands so popular with the trade will be fully maintained.

No. 10 W. T. Co. Tablet Mould.

HARD RUBBER.

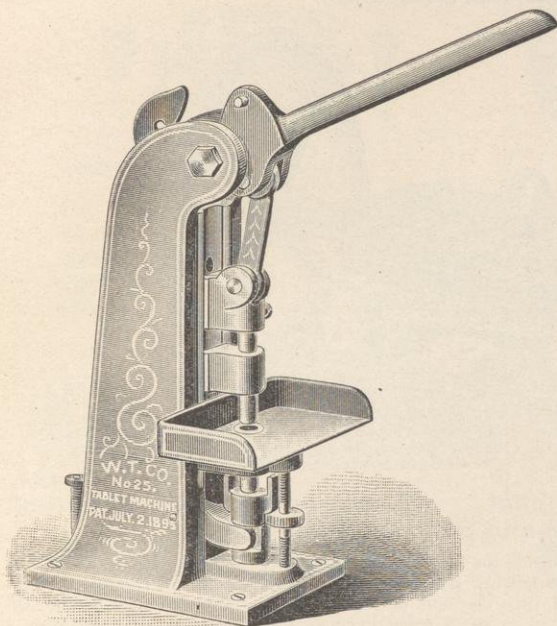

For Making 50 One-Grain
Triturate Tablets.

Each \$3 50

No. 25 W. T. Co. Tablet Machine.

Patented July 2, 1895.

Height, 10½ inches.

This machine is designed for making Compressed Tablets in small quantities, and is especially adapted for use by retail druggists in filling prescriptions in tablet form.

The depth of the mould is regulated by means of a screw, so that after weighing out the powder for one tablet and adjusting the mould so that it will just contain the powder before compression, the tablets will be made of uniform weight and thickness by simply filling the mould to the top for each tablet.

When the lever is thrown back, the lower die is automatically raised, discharging the tablet. It then recedes to its former position and the mould is ready for refilling.

Each machine is supplied with two sets of moulds and dies, making tablets respectively of $\frac{5}{16}$ and $\frac{6}{16}$ inch diameter, and of thickness as required.

Complete \$18 00 each.

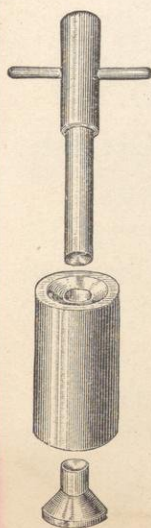

Tablet Compressors.

Nickel-Plated.

For compressing dry powders into small lentil-shaped tablets which can be readily swallowed.

Single Compressor, 3 or 5 grain \$2 50 each.

Set of two Compressors, 3 and 5 grain, on oblong base, with an aperture between them, through which the tablets may be dropped into a receptacle; complete \$6 50 each.

Allen Snap Suppositories.

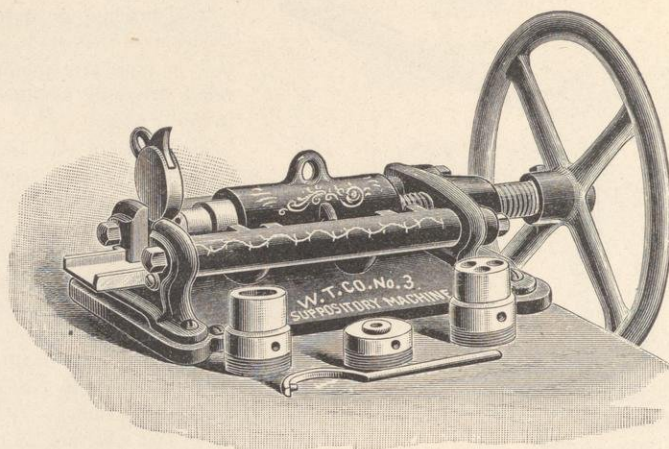

For making suppositories by cold compression.
Simple in construction and rapid in operation.

No. 1	Per doz. \$60 00
No. 2, 15 and 30 grain	72 00

No. 3 W. T. CO. SUPPOSITORY MACHINE.

IMPROVED.

Patented March 26, 1895, and July 6, 1897.

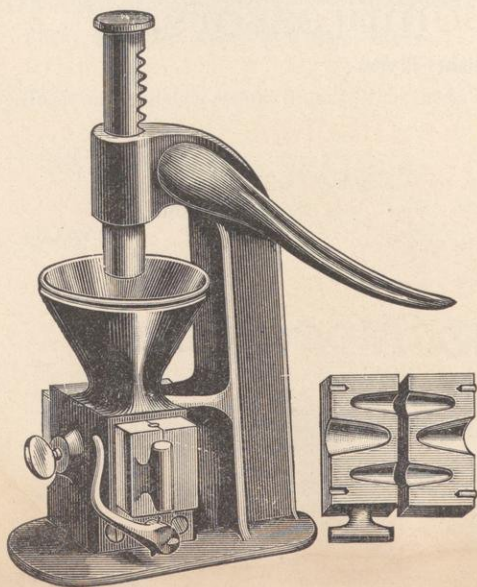

Simple in Construction and Compact. Easily and Quickly Operated.
Will make Smooth and Solid Suppositories.

Each machine is furnished with set of moulds for making Suppositories of three sizes—15 grain, 30 grain and Vaginal, and with six moulds for making bougies or forming pill mass into rods. The moulds are of brass, and are screwed into the end of the cylinder. They can be easily and rapidly inserted or removed.

No. 3 Suppository Machine, Complete, with Nine Moulds \$18 00 each.
 Pill and Bougie Moulds only, set of Six in Polished Wood Block 3 00 per set.
 Extra Pill Moulds, any size 50 each.
 The diameters of bores in set of Pill and Bougie Moulds are $\frac{8}{64}$, $\frac{10}{64}$, $\frac{12}{64}$, $\frac{14}{64}$, $\frac{16}{64}$ and $\frac{20}{64}$ inch.

No. 1 W. T. CO. SUPPOSITORY MACHINE.

For Making Suppositories by Cold Compression.

The Machine is simple in construction, durable, and rapid in operation. The mould is adapted for making three sizes of Suppositories, two Rectal and one Vaginal.

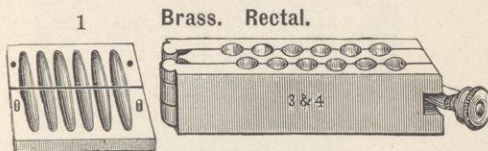

Each, complete with mould . . . \$6 00

JONES' IMPROVED MIXER AND SIFTER.

A simple, durable, practical machine for the mixing, compounding and triturating of all powders intended for manufacturing and compounding Baking, Tooth, Dyspepsia, Talcum, Condition, and Seidlitz Powders, and all compound Druggists' Powders.

This machine mixes powders thoroughly, rubs all lumps out by elastic rubber brush, then forces same through sieves of the proper fineness for the intended powders.

The cylinder, box, and drawer fit tightly and are dust-proof.

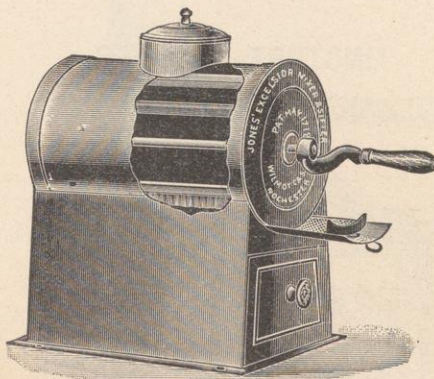

It is all metal, and front head is removable and can be washed and cleaned from any powder in five minutes.

By removing tin slide under sieve, it sifts powder into tin drawer.

Two sieves are furnished with each Mixer, 20 and 60 mesh.

80 and 100 mesh brass wire sieves can be made to order.

No.	Capacity, 6 pounds	Each.
No. 1.		\$7 50

No. 1

PRESCRIPTION SIEVE.

NICKEL-PLATED.

Made in three parts, as shown in cut.

Dimensions, 5½ x 3 inches	Each.
	\$1 00

PHENIX DISPENSING TANK.

Designed for dispensing heavy oils, such as Castor Oil, Olive Oil, Glycerine, etc. Bottles of any size can be filled directly from the pump spout. The tightly-fitting cover prevents evaporation and excludes dust.

The Tank is made of heavy sheet-tin, handsomely ornamented by the lithographing process.

Furnished unlettered or lettered—either *Oleum Olivæ*, *Oleum Ricini*, or *Glycerinum*.

CONTENTS, 2 GALLONS.

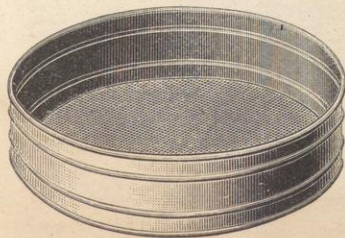

Each \$3 30

Names other than the three given above can be painted on the cans at a cost of 25 cents each, net.

5-GALLON DISPENSING TANK.

A round Tank, with hinged cover and side handles, and fitted with Pump similar to that used in our Phenix Dispensing Tank. It is neatly painted in dark green with gilt trimmings, and can be lettered with the name of the contents when desired.

Each, including lettering \$6 75

PHENIX PHARMACEUTICAL CONDENSERS.

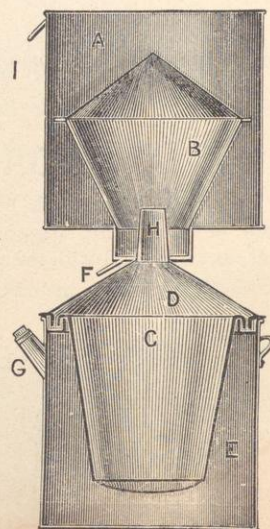

An Improved Apparatus for Distilling Water, recovering Alcohol from mass left from Percolation, etc.

E is the boiler. The pan *C* can be used as a water bath when required. The vapor rises through the spout *H* into the chamber *B*, where it is condensed, the reservoir *A* being supplied with cold water, ice or snow. The condensed liquid flows into the trough around the spout *H*, and is discharged through the tube *F*. *G* is opening, closed with a screw cap, through which the boiler can be supplied with water. *I* is overflow pipe for *A*.

When desired, a thermometer can be placed in *G*, so that the temperature can be regulated.

The boiler *E* contains two gallons. Its diameter being 9½ inches, it can be used on any oil or gas stove.

Tin \$10 80 each. | Copper \$16 00 each.

LABELS FOR PHENIX HERB CANS.

LITHOGRAPHED ON STRIPS OF METAL. BLACK LETTERS ON CREAM-COLORED BACKGROUND.

Names not given can be painted to match the Lithographed Labels, at an extra charge.
Unless otherwise ordered, such labels will be lettered in accordance with
the Pharmacopœia, the necessary abbreviations being made.

For Prices, see opposite page.

GLASS OINTMENT JARS.

WITH RAISED GLASS LETTERS.

We make these jars in Amber and White Opaque Glass, with Steeple Top or Flat Top. They are much preferable to Earthenware, as the latter are liable to be penetrated by grease, when they become discolored and rancid. Glass resists grease for an unlimited period.

Amber color is selected, as, by the general consent of chemists, it resists the decomposing action of light better than blue or other colors.

When ordering, state Color and Style of Top.

FLAT TOP.

	Height.	Per dozen.	
		Amber.	Opaque.

Glass Labels for above, Style A or B (see page 48)			1 50

Complete.

Section 1.

Section 2.

"IMPROVED"

DRAWER PULLS.

The cut shows the Pull complete. Section 1 is the face of the Pull, which is fastened to the drawer by two screws (one at each end). Section 2 with label laid on it is then pushed up under Section 1 until the screw holes at the top of both are opposite, when it is fastened by a screw going through both plates. Labels can be removed and changed by taking out the top screw, and without removing the face of the Pull from the drawer. This arrangement gives the Pull a solid iron back, so that the glass label is protected, and also gives a larger space for the hand.

	Per doz.
Small Bronzed. $4\frac{1}{4}$ x 2 inches. Without Labels	\$1 35
Large Bronzed. 5 x $2\frac{1}{4}$ inches. Without Labels	1 60

Bates Automatic Numbering Machines. FOR NUMBERING PRESCRIPTIONS.

DIAL SETTING MOVEMENT.

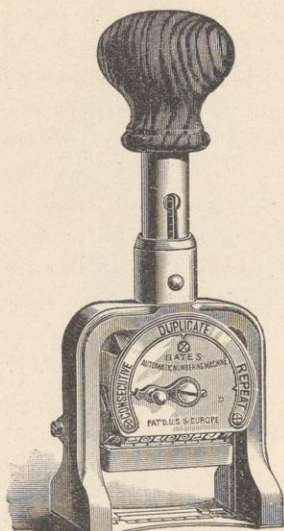

STYLES OF FIGURES.

STYLE A.

12345

STYLE E.

12345

Total Height, 6 inches.

The Machine will print numbers in duplicate, changing automatically after producing each set; will print consecutive numbers, or repeat the same number indefinitely.

It prints from steel figures, which give a clean-cut impression, and will not wear out and become indistinct.

Every wearing part is made of steel, and all the parts are interchangeable.

By a self-acting device the figures are freshly inked after each movement of the machine.

	Each, Net.
4 Wheel Machine—Numbering from 1 to 9,999	\$12 00
5 Wheel Machine—Numbering from 1 to 99,999	14 00

SODA SYRUP SIGN.

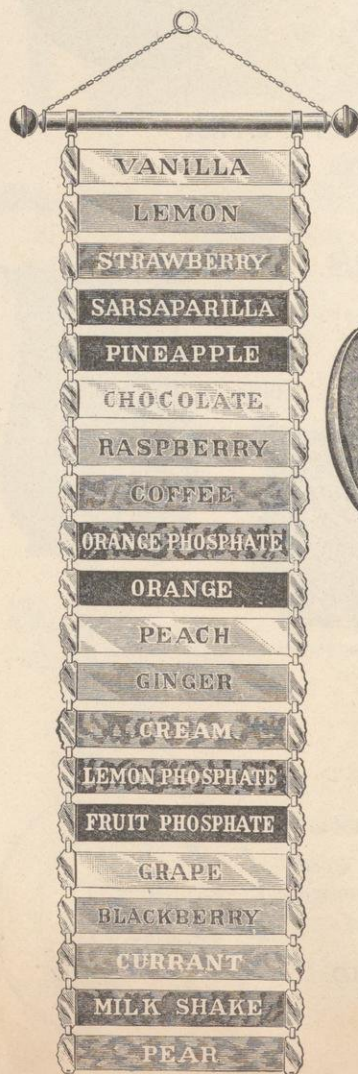

The names are painted in gold, silver and black letters, on plates of glass, with background decorated in various styles. These plates are fitted with metal tips, so made that they may be suspended one from another, the complete banner being held by a bar and chain. All the metal work is finely nickel-plated and burnished. A sign may be composed of any number of plates.

Plates bearing the names given below are carried in stock. All the plates for any particular name are alike in color and design, and a sign of various names will comprise an assortment of styles. Plates differing from our regular styles can be supplied to order at an advance of 50 cents each to the list price.

Vanilla.	Coffee.	Lemon Phosphate.
Lemon.	Orange Phosphate.	Fruit Phosphate.
Strawberry.	Orange.	Grape.
Sarsaparilla.	Nectar.	Blackberry.
Pineapple.	Peach.	Currant.
Chocolate.	Ginger.	Milk Shake.
