(Copy attached.)

President Fred presented the offers of the Wisconsin Alumni Research Foundation and the University of Wisconsin Foundation for the establishment of two endowed professorships at the University of Wisconsin. President Fred read the following resolutions adopted by the Board of Trustees of the Wisconsin Alumni Research Foundation and the Executive Committee of the University of Wisconsin Foundation respectively:

Resolution adopted by the Trustees of the
Wisconsin Alumni Research Foundation

"CHARLES SUMNER SLICHTER has, throughout his life of outstandingly high scholarship in many fields of knowledge, long served the University of Wisconsin as a member of its faculty, as a Dean and as a loyal, able leader in its educational endeavors.

He was a great teacher and a fine cultured gentleman. He deservedly won the admiration and gratitude of his fellows and of generations of students.

It is proposed that in his memory the Wisconsin Alumni Research Foundation provide funds for the establishment of a professional chair at the University of Wisconsin to be designated 'THE CHARLES SUMNER SLICHTER RESEARCH PROFESSORSHIP IN THE NATURAL SCIENCES'.

This proposal has been approved by a Faculty Committee of the University, and the plan therefor is set forth in said Faculty Committee's report presented to this Board of Trustees at a meeting held on March 22, 1947.

NOW, THEREFORE, BE IT RESOLVED, That the sum of Twelve Thousand Dollars (\$12,000) annually, for a period of twenty-one (21) years, commencing July 1, 1947, be allocated by the Wisconsin Alumni Research Foundation out of funds expected to be provided by it to the University of Wisconsin annually for research in the Natural Sciences, such funds to be used for the establishment of a professorship at the University of Wisconsin to be known as 'THE CHARLES SUMNER SLICHTER RESEARCH PROFESSORSHIP IN THE NATURAL SCIENCES'.

BE IT FURTHER RESOLVED, That the plan with reference to said 'THE CHARLES SUMNER SLICHTER RESEARCH PROFESSORSHIP IN THE NATURAL SCIENCES', as set forth in a Faculty Committee report presented to the Board of Trustees of the Wisconsin Alumni Research Foundation at a meeting thereof held on March 22, 1947, be, and the same is, hereby approved."

Resolution adopted by the Executive Committee
of the University of Wisconsin Foundation

"FREDERICK JACKSON TURNER was a native son of Wisconsin, an alumnus of the University of Wisconsin, and for more than twenty years a distinguished member of the faculty. His theory of the significance of the frontier in American History not only revolutionized the study and teaching of the history of our own country but profoundly affected historical scholarship throughout the world.

IT IS PROPOSED THAT in his memory the University of Wisconsin Foundation will provide funds for the establishment of a chair at the University of Wisconsin to be designated 'THE FREDERICK JACKSON TURNER PROFESSORSHIP IN HISTORY.' It is anticipated that this proposal will be approved in the very near future by a faculty committee of the University and the plan therefor as formulated by such committee will be substantially in the form of a plan for the 'Charles Sumner Slichter Research Professorship in the Natural Sciences' recently adopted by the Wisconsin Alumni Research Foundation, which was submitted at this meeting.

NOW THEREFORE BE IT RESOLVED that the sum of Twelve Thousand Dollars (\$12,000.00) annually for a period of ten years commencing July 1, 1947, be allocated by the University of Wisconsin Foundation, such funds to be used for the establishment of a professorship at the University of Wisconsin to be known as 'THE FREDERICK JACKSON TURNER PROFESSORSHIP IN HISTORY.'

BE IT FURTHER RESOLVED that the plan with reference to said 'FREDERICK JACKSON TURNER PROFESSORSHIP IN HISTORY,' substantially in the form for the 'Charles Sumner Slichter Research Professorship in the Natural Sciences' which was presented to this meeting, be and the same hereby is approved."

Upon motion of Regent Holmes, seconded by Regent Kleczka, it was VOTED, That the gift of the Wisconsin Alumni Research Foundation for the establishment of the endowed professorship to be known as THE CHARLES SUMNER SLICHTER RESEARCH PROFESSORSHIP IN THE NATURAL SCIENCES and the gift of the University of Wisconsin Foundation for the establishment of a University of Wisconsin professorship to be known as THE FREDERICK JACKSON TURNER PROFESSORSHIP IN HISTORY be accepted, that the establishment of these endowed professorships be approved, and that the President of the University be directed to convey to the donors the appreciation of the Regents for these generous and worthwhile contributions to the development of the University of Wisconsin. (It is understood that the annual appropriations of \$12,000 are available for expenses and assistants in addition to the salaries of the professors.)

Upon recommendation of President Fred, and upon motion of Regent Jones, seconded by Regent Grady, it was

VOTED, That Professor Merle Curti be appointed to hold the first Frederick Jackson Turner Professorship in History, beginning July 1, 1947, at a salary to be determined in the 1947-48 budget.

RECOMMENDATIONS OF THE DIRECTOR OF BUSINESS AND FINANCE

I. Contracts, Leases and Agreements

1. That the Director of Business and Finance be authorized to sign a lease to the University by Walter B. Chilsen and Joseph A. Chilsen of Merrill, Wisconsin,

for a tract of forty acres in Lincoln County to be used in the forestry extension program. (The offer of Mr. Walter B. Chilsen to lease this land to the University, without cost, was accepted by the Regents of the University on December 14, 1946.)
Adopted.

2. That the Director of Business and Finance be authorized to sign a sub-lease with the Veterans Administration for the use of approximately 1783 square feet on the second floor of the building at 448 State Street, Madison, for use as a Veterans' Testing and Counseling Unit at an annual rental of \$3020.40 for the period August 15, 1946 to June 30, 1952, subject to termination on thirty days' notice.

Tripp, deceased, said mortgage being recorded in the office of the Register of Deeds of Columbia County, Wisconsin, on the 10th day of June, 1924, Vol. 107 of Mortgages, Page 382, which mortgage was subsequently assigned by O. E. Stone in his capacity as such trustee to The Regents of the University of Wisconsin by assignment dated December 29, 1924, and recorded in the office of Register of Deeds of Columbia County, Wisconsin, on January 16, 1935, Vol. 99 of Mortgages, Page 29, and

WHEREAS, said mortgage is in the sum of \$10,000 and interest payments are current, and

WHEREAS, the State Highway Commission of Wisconsin proposes to widen and improve a road adjoining the mortgaged premises which project will require the taking of approximately 2.09 acres of said mortgaged property, and

WHEREAS, said highway improvement will enhance the value of the mortgaged premises and will not in any way jeopardize the security of said mortgage,

NOW, THEREFORE, BE IT RESOLVED, that the President and Secretary of The Regents be and they hereby are authorized and directed to join with the owners of the mortgaged premises in executing a conveyance to Columbia County for highway purposes of the following described lands to wit:

A parcel of land in T 10 N, R 8 E, Section 26, the NW¹/₄-NW¹/₄, the NE¹/₄-NW¹/₄, the NW¹/₄-NE¹/₄, the SW¹/₄-NE¹/₄, the SE¹/₄-NE¹/₄, and the NE¹/₄-NE¹/₄, thereof.

The centerline of the highway is described as follows:

Commencing at a point on the north-south quarter line of said Section 26, 1390 feet north of the center;

Thence N68°-46' W 1658.4 feet;

Thence S 45°-57' W, 917.7 feet to a point of curve;

Thence northeasterly on a curve to the right, radius 1432.5 feet, 654.8 feet to the point of beginning of this parcel and an extended westerly property line of the owner;

Thence continuing on said curve to the right 977.3 feet to a point of tangency;

Thence S 68°-46' E 1503.8 feet to a point of curve;

Thence easterly on a curve to the left, radius 1146.3 feet, 1598.7 feet to a point of tangency;

Thence N 31°-18' E 701.3 feet to a point of curve;

Thence northeasterly on a curve to the right, radius 1146.3 feet, 266.9 feet to the extended east property line of the owner.

Said parcel includes all land lying between a south property line of the owner and the north limits of the existing right of way from the point of beginning easterly, 324 feet measured along the above-described centerline to a west property line of the owner;

Also all land lying between the northeasterly limits of the existing right of way and a new highway right-of-way line located parallel to said centerline and 50 feet southerly therefrom, for the next 1394 feet along said centerline to an east property line of the owner.

Also all land lying between a southerly property line of the owner and

the northerly limits of the existing right of way for the next 2075 feet along said centerline to a line normal thereto;

Also all land lying between a southeasterly property line of the owner and a new highway right-of-way line located parallel to said centerline and 70 feet northwesterly therefrom, for the next 504 feet along said centerline to a line normal thereto;

Also all land lying between a southeasterly property line of the owner and the northwesterly limits of the existing right of way, for the next 751 feet along said centerline to an east property line of the owner.

Said parcel, exclusive of all land already in use for highway purposes and encroachments, contains 2.09 acres, more or less.

Upon motion of Regent Holmes, seconded by Regent Werner, recommendation No. 2 listed under the recommendations of the Director of Business and Finance (III. Miscellaneous) was adopted.

3. That the bequest by the late William S. Marshall to the Regents of the University of Wisconsin of "my collection of beetles and all of my books, pamphlets, reprints or other printed matter relating to zoological subjects" which were located in the Zoology Department at the time of Professor Marshall's death, be accepted by the Regents in accordance with the terms and conditions of the Last Will and Testament of William S. Marshall, deceased; that the Secretary, the Assistant Secretary, or the Trust Officer be authorized to sign receipts in the name of the Regents for the articles and items received from the Executors and Trustees of the Estate; and that the Zoology Department be authorized to use or dispose of the items received in accordance with the terms of the bequest.

Upon motion of Regent Campbell, seconded by Regent Callahan, recommendation No. 3 listed under the recommendations of the Director of Business and Finance (III. Miscellaneous) was adopted.

ADDITIONAL RECOMMENDATIONS OF THE DIRECTOR OF BUSINESS AND FINANCE

1. That authority be granted to advertise for bids for remodelling office and coat room space in the Memorial Union Building.

Upon motion of Regent Werner, seconded by Regent Kleczka, recommendation No. 1 listed under the additional recommendations of the Director of Business and Finance was adopted.

2. That the University Housing Bureau be authorized and directed to take necessary action to make available as soon as possible for faculty housing all apartments and other housing units owned by the University or the Wisconsin University Building Corporation and which are not presently occupied by University faculty, staff or student.

Upon motion of Regent Jones, seconded by Regent Kleczka, recommendation No. 2 listed under the additional recommendations of the Director of Business and Finance was adopted.

Upon recommendation of the Director of Business and Finance, and upon motion of Regent Jones, seconded by Regent Kleczka, it was

VOTED, That the authorization voted by the Regents on December 14, 1946, to the Wisconsin University Building Corporation for the construction of a University Central Garage on the McNees property at an estimated cost of \$25,000 be modified to authorize the erection of the University Central Garage in the Service Building area at an estimated cost of \$25,000; and that authority be granted for the following steps to be taken to accomplish this change in location:

(1) That the Regents of the University of Wisconsin accept title from the Wisconsin University Building Corporation to the North 72' of the West 35' of Lot 11; the North 72' of the East 17.9' of Lot 11; the South 27' of the North 72' of the West 17.1' of Lot 10; and the South 27' of the North 72' of the East 35.8' of Lot 10, all in Block 5, Brooks Addition to the City of Madison;

(2) That the President and Secretary be authorized to sign a lease from the Regents of the University of Wisconsin to the Wisconsin University Building Corporation, for a term of twenty-five years, covering the following described land on which the Wisconsin University Building Corporation is to construct the University Central Garage, and to sign a lease from the Wisconsin University Building Corporation to the Regents of the University of Wisconsin covering the following described land and the buildings to be erected thereon, for a term of twenty-five years, at an annual rental of \$1435.70, which is sufficient to amortize over a period of twenty-five years the cost of constructing the University Central Garage:

The North 72' of Lot 9; the North 72' of Lot 10; the North 72' of Lot 11; the North 72' of the East 16' of Lot 12; and the East 154' of the South 13' of Lot 8, all in Block 5, Brooks Addition to the City of Madison;

(3) That the Wisconsin University Building Corporation be authorized to borrow not to exceed \$25,000, at an annual interest rate of 3%, to be amortized over a period of twenty-five years, to cover the cost of the University Central Garage, and that the Wisconsin University Building Corporation, from the proceeds of the loan on the above described leasehold, be authorized to reduce the amount of the mortgage on the McNees property by the amount borrowed thereon for the purchase of the buildings to be erected for the University Central Garage.

President Fred called to the attention of the Regents the difficulty of conducting the Commencement exercises for the large number of students graduating from the University and invited the Regents to offer any suggestions which they might have for revising the Commencement exercises to facilitate the handling of the increased number of graduates.

Regent Jones presented the report of the Constructional Development Committee, and upon motion of Regent Jones, seconded by Regent Campbell, it was

VOTED, That in view of the probability that the cost of constructing a three-story addition to the Milwaukee Extension building will far exceed the allotment of \$400,000 made by the Regents for this project, the authority to proceed with the preparation of final plans and specifications given by the Regents on January 17,

1947, is rescinded and the administration is directed to review the situation in consultation with the appropriate faculty sub-committee of the Campus Planning Commission and to report its recommendations to the Constructional Development Committee of the Regents at a subsequent date.

At the request of President Fred, Mr. Luberg explained a new map of the campus which had been prepared showing the present campus area and the area in which property is being purchased for the expansion program, and reported that copies of the map would be sent to each Regent.

Upon motion of Regent Kleczka, seconded by Regent Holmes, it was VOTED, That the by-laws be suspended and that when this meeting adjourns it adjourn subject to the call of the President.

THE UNIVERSITY OF WISCONSIN
COLLEGE OF LETTERS AND SCIENCE

A PROGRAM OF INTEGRATED LIBERAL STUDIES

The Report of Curriculum Committee B
Part I

Madison, Wisconsin

May 5, 1947

PART I

SECTION I. INTRODUCTION

1. The Committee's Appointment and Mandate

On January 15 of 1946 a committee of the College of Letters and Science of the University of Wisconsin presented to the faculty of the college a report entitled Report of the Curriculum Committee. The committee, presided over by Professor Frederic Ogg, consisted of Professors Myron P. Backus, Merle Curti, Stephen L. Ely, John Guy Fowlkes, Norris F. Hall, Julian E. Harris, Rudolph E. Langer, H. Scudder Mekeel, Ricardo Quintana, and Joel Stebbins. The heart of the report was the proposal of two forms of curriculum for the College of Letters and Science, which were labelled respectively Curriculum A and Curriculum B. Curriculum A consisted of several patterns or programs of study formed by the arrangement and allocation of specific courses of the departments of the college to meet the needs of students preparing for liberal and vocational degrees. Curriculum B was offered to provide "a program of studies at once more general and more integrated than that embraced in Curriculum A."

By action of the Faculty of the College of Letters and Science on January 28, 1946, Curriculum A, with minor modifications, was adopted to go into effect in the Summer Semester of the same year. Following considerable discussion of Curriculum B, the faculty on January 31, 1946, passed the following resolution:

"THAT the Faculty approve in principle the establishment of an alternative closely integrated B.A. curriculum of the general character of Curriculum B, provided that the senior staff for the new courses involved be drawn chiefly, at the start, from the present Faculty; THAT the Faculty authorize the Dean of the College to appoint a committee to work out the plan of this curriculum for submission to the Faculty and to suggest ways for putting it into effect; and THAT the curriculum so submitted, if adopted by the Faculty, be put into operation in the fall of 1948."

2. Work of the Committee.

From April to May 1946, and from September 1946 to April 1947, the committee has met regularly for sessions of from two to three hours. Throughout this period, the committee has profited from the suggestions and opinions of Dean Ingraham and Professor Ogg. The committee acknowledges, with thanks, the suggestions and criticisms of many members of the faculty who as individuals or in small groups discussed aspects of the program at all stages of its growth. The chairman, on invitation of the Dean, presented the plans of the committee as of that time to the University Board of Visitors at their regular meetings of December and January. Joint meetings with representatives of the Student Board of the Wisconsin Student Association were held on two different occasions. In February 1947, a hearing on the proposed program was held with the Faculty of the College of Letters and Science, following the distribution of a progress report dated February 10, 1947.

The programs of many colleges and universities which have adopted, or are considering adopting a plan of integrated studies, were collected and read by the committee, as well as a large number of articles in current scholarly journals. The chairman of the committee was empowered to visit several campuses where integrated programs are in action or are under consideration. He met with the chairmen of curriculum committees and other interested persons at the University of Michigan, Harvard University, Wellesley College, Boston University, Columbia University, and Princeton University.

3. Report of the Committee

The committee presents this report to the faculty as the outcome of its work and the fulfillment of its mandate. All specific recommendations have been gathered together at the end of Part I to facilitate discussion

and action. Part II contains the background of the report and does not require specific action.

SECTION II. THE INTEGRATED PROGRAM OF LIBERAL STUDIES

A. Introduction and Point of View

The program of courses described below is an integrated curriculum designed to satisfy the general education requirements of students in the College of Letters and Science. If accepted by the faculty, it will go into effect in the fall semester of 1948 as an optional alternate to the general requirements set forth in the curriculum adopted by the faculty in March 1946, sometimes called "Curriculum A".

The majority of students entering the program will follow the sequence of courses as outlined below, completing the requirements of the integrated program in the first two years of undergraduate work. However, students who must carry a reduced program, or who wish to meet specific departmental requirements in introductory courses, may extend the integrated program over the four years of undergraduate work by postponing entrance to one of the three major sequences.

The program will be offered at first to a limited number of students (perhaps 300 in the first class). It is hoped that they will represent a cross-section of Letters and Science students, as far as is possible. Those who elect the course should expect to pursue the entire plan of studies as presented below. Upon satisfactory completion of the program they will have met the general (i.e., non-departmental) requirements of the College of Letters and Science for the B.A. and B.S. degrees with the exception of the foreign language requirement for the B.A. degree. By the use of elective hours (see schedule, pp. 6, 7) or by the postponement of one of the sequences, students may easily plan programs to meet special requirements preparatory to majoring in a department, or entrance to another college.

It is intended that the courses briefly outlined below will be so designed and taught as to avoid the weaknesses of the "survey" approach by a selection of a relatively small number of closely related topics, with reasonably thorough instruction in each. The course descriptions, therefore, merely indicate the general fields from which the topics would be selected. It is the view of the committee that the actual selection, and the detailed organization of the courses should be determined by the persons responsible for their presentation.

2. The Pattern of Studies

Humanities

First semester: Classical Culture - 4 cr. A comparison of Greek culture (550-350 B.C.) and Roman culture (50 B.C. to 50 A.D.) emphasizing a few literary classics, with some attention to art.

Second semester: Medieval and Renaissance Culture - 3 cr. A comparison of the two eras in art, literature, and philosophy.

Third semester: Modern European Culture - 4 cr. The literature of ideas and values (principally English literature, 1750-1900) with supplementary lectures on 19th century painting, music, and philosophy.

Fourth semester: American Culture - 3 cr. American literature from 1850 to 1950, with supplementary lectures on American architecture and philosophy.

Social Studies

First semester: Early Man and His Society - 3 cr. The aim of the course should be to show the relationship of man to his environment, and the role of social groups as organizations for the satisfaction of man's physical and psychological needs.

Second semester: Transition to Industrial Society - 4 cr. Pre-industrial agrarian society and the impact on it of developing industrial techniques and resources.

Third semester: Modern Industrial Society (with special reference to the United States) - 4 cr. American society: population, economy, political organization, and social philosophies.

Fourth semester: The International Scene - 4 cr. Comparative government and economy; bases of international cooperation and conflict; international organizations.

Physical Science (First year)

First semester: Introduction to the Physical Universe - 4 cr. The aim of the course would be to acquaint the student with some of the physical and chemical aspects of the universe; the nature of time, matter, energy and light; the laws governing the principal movements of the astral bodies and planetary systems; with illustrations of the methods by which our knowledge of the physical universe has been established.

Second semester: Earth Science - 3 cr. The nature of the physical earth as the home of man: its materials, surface features and atmosphere, and the history of its evolution; with illustrations of the methods by which this knowledge has been obtained.

Biological Sciences (Second year)

A seven-credit course of one year (3 credits first semester, 4 credits second semester) called "Life Science," divided into three segments:

1. Structural and Functional Variations and Adaptations
in Plants.
2. Structural and Functional Variations and Adaptations
in Animals.

Selected cases showing types of structural and concomitant functional variations by which plants and animals have attained their present complexities, and are now co-adapted to their varying physical environments and to each other.

Elementary aspects of animal psychology.

3. Heredity and Variation.

The principal mechanisms of heredity and their role in the origin, preservation and recombination of variations to produce the structural and functional adaptations of plants and animals.

English

First semester: English Composition - 2 cr. Mechanics of composition, usage, and the planning and writing of exposition. This course will contain no literature, because literature is provided in the humanities.

Second semester: The Nature and Functions of Language - 2 cr. Continued practice in composition, with lectures introducing elementary semantics and some language history.

The course in English composition will ordinarily not be postponed, but will be required as first-year work of all students entering the program. No exemptions will be granted (for the first year at least) but students who are seriously deficient will be required to take preparatory work without credit before entering the course.

3. Notes and comments

a. Electives. Provision is made in this program for some individual selection of courses (up to about 20 credits if the program is completed in two years, or more if part of the program is carried into the third year). By means of this provision students may arrange to meet some of the specific requirements for advanced work in various departments. Students may prepare for the B.A. requirements in foreign languages by electing a language course each semester of the first two years.

b. Instructional procedures. This program is based upon the assumption that instruction will be given in large lecture groups (about 300 students) with quiz and discussion sections of about 25 students, conducted by instructors and assistants. Each semester course will normally be directed and taught by one faculty member, who may call upon specialists for particular lectures if desired.

c. Use of Library Materials.

Any person interested in obtaining a liberal education should learn to make the best possible use of library materials in the humanities, social studies and sciences. Consequently, each student should early develop the ability to use library materials well. By doing so, the student will be enabled to get the most out of his university education, and will be prepared to add to that education in later life.

Experience has shown that formal guidance by trained librarians in the first part of the student's university career yields the best results. It is believed that, for maximum effectiveness, the training in use of library materials should be related closely to the student's course work.

Students taking the integrated curriculum will therefore receive instruction in the use of library materials during the first term of the freshman year. This instruction will be provided in connection with the humanities course, by the Library School and the staff of the University library, working in cooperation with the students' course instructors. Students will be introduced to library techniques and materials, and will be required to apply their training to specific assignments in the courses they are taking.

SECTION III. RELATIONSHIP OF THE INTEGRATED PROGRAM TO THE COLLEGE OF LETTERS AND SCIENCE

The success of the Integrated Program will rest very largely upon the degree to which it becomes an organic part of the College of Letters and Science. In administration, in staff, and in student body, the Program should be thoroughly assimilated into the College so as to make the fullest use of the resources of the College, and to make the greatest contribution to the students who elect the program. This assimilation will be the more easily realized in that the staff of the Integrated Program will consist almost entirely of professors borrowed from existing departments of the College for the giving of particular courses in the Integrated Program.

1. Administration

To facilitate the administration of the Integrated Program, the committee recommends the creation of a Department of Integrated Liberal Studies. This department will have as members all teachers of professorial

rank of the College of Letters and Science (and possibly members of other colleges), any part of whose time is assigned to the Program of Integrated Liberal Studies. To it may be added such other teachers as are needed for the conduct of the courses.

As the Program of Integrated Liberal Studies is an elective course within the framework of the College of Letters and Science, it is not necessary for the budget of the department to carry independently all instructional costs. At the discretion of the Dean the salaries of professors giving courses in the Program may continue on the budgets of their several departments, or may be assigned pro rata to the Department of Integrated Liberal Studies. Presumably the salary of the chairman, and the salaries of instructors and assistants attached to the department, as well as secretarial and administrative costs, will constitute the budget of the department.

2. Student Body

It is the recommendation of the committee that the student body of the Program of Integrated Liberal Studies consist of a fairly normal sampling of students in the College of Letters and Science. The Program as presented in this report is designed neither for high level students nor low level students exclusively, but for a portion of the normal student body, excepting those admitted to the College "without mathematical preparation." The committee recommends that students be permitted to elect the Program up to the number that can be taken care of adequately by the staff and facilities available.

In the initial years of the course the committee recommends setting the limit of admission to 300 students; this limit would provide a student body of approximately 300 for the first year and approximately 600 in succeeding years until the limit at entrance is changed or removed.

Students electing the program will normally be expected to remain in it for the two-year period. In the initial years of the program, at least, students with advanced standing credits earned in the University of Wisconsin or in other institutions will not be admitted to the Program unless they are willing to start from the beginning.

All general regulations of the College of Letters and Science applying to students of the College in all courses and programs will apply similarly to students in the Program of Integrated Liberal Studies.

3. Satisfaction of Requirements

Students who complete the two-year Program of Integrated Liberal Studies will be considered to have met the general (i.e., non-departmental) requirements of the College of Letters and Science for the B.A. and B.S. degrees with the exception of the foreign language requirements for the B.A. degree.

Admission to junior standing will be determined by the number of credits and grade-points earned, as in all other courses of the college.

The committee recommends that departments, schools, and colleges of the University study the program of Integrated Liberal Studies as finally adopted by the faculty of the College of Letters and Science, and take action as early as possible for the guidance of students, as follows:

- a. Departments should indicate what courses of the Program, if any, will be accepted as fulfillment of the requirements for a major in the department,
- b. Schools and Colleges should indicate what portion of the program will be accepted as meeting the general (i.e., non-departmental) requirements of students entering the school or college by transfer from the College of Letters and Science.

When the program of Integrated Liberal Studies has been put into operation, it would be helpful to students and advisers if departments, schools, and colleges would indicate the elective courses which, together with the integrated program, would prepare a student for advanced work in the department or entrance to the school or college.

FOR ACTION

Specific Recommendations to the Faculty and Dean1. To the Faculty of the College of Letters and Science for Legislative Action.

Your committee requests action on the following points:

- a. That the report of the committee submitted herewith be accepted.
- b. That the Program of Integrated Liberal Studies, as outlined in Section II of this report, be authorized by the Faculty to become an alternative program of studies leading toward the B.A. and B.S. degrees; that completion of this program be accepted as satisfaction of the general (i.e., non-departmental) course requirements of the College, with the exception of the foreign language requirements for the B.A. degree.
- c. That the Program go into effect with the fall semester of 1948.
- d. That the enrollment in the first year of the program be limited to 300 students.
- e. That the committee be continued for purposes of consultation until a new department of Integrated Liberal Studies is set up.

2. General Recommendations to the Faculty of the College of Letters and Science.

- a. That the principles of integrated courses in general education be extended by the creation of more inter-departmental courses, or cooperative lecture courses shared by a number of lecturers, at the junior and senior levels.
- b. That departments of the College, after a study of the Program of Integrated Liberal Studies, indicate by departmental action the elective courses which, together with the integrated program, would prepare a student for advanced work in the department.

- c. That when detailed outlines of courses in this program are available, departments of the College indicate which courses of the Program of Integrated Liberal Studies, if any, overlap sufficiently with departmental courses to exclude students from those particular departmental courses.

3. Recommendations to the Dean of the College.

- a. That the Dean recommend to the President of the University the creation of a Department of Integrated Liberal Studies, with the organization and procedures common to departments of the College.

NOTE:

The complete report of the Committee on Curriculum B includes a second part in which is presented a discussion of the movement taking place in the American colleges in the direction of the creation of integrated courses. Anyone interested in Part II of the report may secure a copy at the Office of the Secretary of the Faculty.

Exhibit B

REPORT OF THE SPECIAL COMMITTEE ON
ADMISSIONS AND PLACEMENT OF FOREIGN STUDENTS

Your ad hoc policy committee on admission and placement of foreign students submits the following recommendations:

I. Advisory committee on admission and placement of foreign students.

That a continuing committee to advise the admissions office and the dean on admission and placement of foreign students be appointed by the Dean of the College. We suggest that the committee consist of one faculty member for each of the principal countries or areas from which foreign students ordinarily come. It is assumed that this committee will meet only so often as may be necessary for the coordination of its work, but that its members will be available individually as consultants to the admissions office or to the advisor of foreign students. As far as is practicable, each member of this committee should be chosen for his special knowledge of the educational system of the country or area from which those students come concerning whose admission or placement he is to be consulted, and should endeavor to keep his information abreast of current changes there.

II. Advisor of foreign students.

- A. That a member of the faculty be appointed advisor of foreign students, his teaching load being reduced on that account by one-third or one-half. (It is suggested that this be done as a university service and that the appointment be made by the President of the University. If this should not be found feasible, it is suggested that the appointment be made for the College of Letters and Science by the dean of that college.)
- B. That the functions of the advisor should include:
 1. The chairmanship of the committee on admission and placement of foreign students;
 2. Consultation with the admissions office and the dean of the college as to admission and placement of foreign students;
 3. General counseling of foreign students, supplementing but in no way restricting or replacing the services of the faculty advisor or major professor to whom each should be assigned in his own field;
 4. Preparation of materials for guidance of foreign students;
 5. General orientation of foreign students at the beginning of their residence.

(over)

Edith C

III. Admission and placement of foreign students.

A. Canadian students:

1. That the term "foreign student" as used in this report shall not apply to students entering the University from Canadian schools or universities.

B. Proficiency in English:

1. Proficiency in the use of spoken and written English adequate to the student's needs in the work which he proposes to do at Wisconsin is presupposed. It is recommended that testing for this purpose shall be primarily the responsibility of the Department of English, in consultation with the department of the student's major, and that all students whose native tongue is not English be required upon admission to take a proficiency examination in English unless exempted by the Department of English.
2. It is recommended that a student who at the beginning of his first semester of residence cannot demonstrate such proficiency in English as is indicated in III-B-1, above, shall be given the status of an auditor, but upon demonstration of the necessary proficiency in English, and with the consent of his instructor, he may change from auditor to credit status in any course other than English 9 at any time not later than eight weeks after the beginning of a semester.

C. Admission with provisional junior standing:

1. That foreign students be admitted to the University of Wisconsin with provisional junior standing, provided in each case that the applicant is eligible for matriculation in a university in his own country on the basis of an examination equivalent to the Baccalaureat in France, the leaving-certificate examination at a German Gymnasium or Realschule, the Artium in Norway, or one of those required for matriculation in Oxford or Cambridge University.
2. If a candidate for a degree, the student so admitted must subsequently satisfy the stated requirements of his major field as they are interpreted for him by his major department or by the committee administering his major.
3. It is recommended that, for the benefit of students so admitted, general course requirements other than those of the major or directly related to the major shall be waived.

D. Admission with provisional senior standing:

1. That a student who has attained senior standing at Oxford University be passing the First Public (Intermediate) Examination, or similar standing at another university by equivalent examination, be admitted with provisional senior standing.
2. If a candidate for a degree, the student so admitted must subsequently satisfy the stated requirements of his major field as they are interpreted for him by his major department or by the committee administering his major.
3. It is recommended that, for the benefit of students so admitted, general course requirements other than those of the major or directly related to the major shall be waived.

E. Admission with provisional sophomore standing:

That a foreign student who presents evidence of being, on the basis of normal expectation, within one academic year of the achievement of the academic status indicated in Section III-C-1, above, as qualifying for provisional junior standing be admitted with provisional sophomore standing.

F. Admission with freshman standing:

1. That a foreign student who presents evidence of successful completion of academic work equivalent to that of a standard American college-preparatory school be admitted with freshman standing.
2. That a foreign student who cannot meet the requirement stated in Section II-F-1, above, be admitted upon examination only. (The committee hopes that special entrance examinations adapted both to the purposes and standards of the university and to the educational experience of the foreign student may be found or devised for this purpose.)

G. Consultation on cases not covered:

That on questions concerning the admission and placement of foreign students which are not covered by Sections II-B to F, inclusive, above, the admissions office shall seek the advice of the advisor of foreign students and/or the competent member of the faculty committee on admission and placement of foreign students.

STATEMENT BY PRESIDENT E. B. FRED re DEAN C. J. ANDERSON

C. J. Anderson has served the State of Wisconsin in connection with public education for more than forty years. Successively and successsfully he has been high school principal, city school superintendent, assistant state superintendent of public instruction, associate professor of education, professor of education, director of the school of education, and dean of the school of education. This varied and responsible career reflects efficient and highly satisfactory service both directly and indirectly to all levels of public education in Wisconsin. He has also made significant contributions in the form of professional books in the fields of supervision and reading. He has also contributed greatly directly to the school children of the nation in the form of collaborating on distinctive series of elementary textbooks in reading and arithmetic. He has served as a member of state survey commissions on public education in Virginia and New York.

During the last twenty years Dean Anderson has devoted himself largely to the problems of improving the preparation of teachers. He is responsible for the organization and operation of a School of Education at the University of Wisconsin, which in many respects is distinctive. His skillful leadership has stimulated a high degree of cooperation between professional educators and the various subject matter specialists involved in the training of prospective teachers. He has for many years been foremost in the educational councils of the State.

He has enjoyed and taken pride in being an educator. The State of Wisconsin and particularly the University of Wisconsin have benefited greatly by his effort. We hope his retirement from the deanship here will not deprive Wisconsin of his interest in and advice on the problems involved in furthering Wisconsin's program of public education.

On behalf of the faculties and the students, Dean Anderson, we wish you well.

STATEMENT SUMMARIZING MR. KENNETH LITTLE'S REMARKS

Madison, Wis. (Special)--All students from the State of Wisconsin who meet the normal entrance requirements will be admitted to the University of Wisconsin this summer and fall, it was revealed today by the State University registrar in a statement of admission policy which in general continues the rules laid down a year ago.

In order to meet crowded postwar conditions with the maximum fairness and justice to all, Registrar Kenneth Little explained, no new undergraduates from states other than Wisconsin will be admitted to the University, except during the 15 and 8 week summer sessions. Out-of-state residents who attend the summer session will have no assurance of being admitted in the regular fall semester.

Each student is responsible for arranging for his own housing, Little emphasized, but more student housing units are expected to be available in Madison than there were last fall.

The six-point statement follows:

1. The University of Wisconsin will issue permits to register to all students from the State of Wisconsin who meet the normal entrance requirements of the University.
2. The permit to register will entitle the student to attend the University of Wisconsin at Madison, at Milwaukee, at Racine, or at any one of the Freshman extension centers which the University operates in cities around the state.
3. A permit to register does not guarantee that the University will supply the student with a housing accommodation at Madison. Each student is responsible for arranging for his own housing, within the student housing regulations of the University.
4. The University Student Housing Bureau, 434 Sterling Court, Madison 6, Wisconsin, will supply current housing information and will help students in finding rooms. Students should not plan to come to Madison next fall unless they have secured their rooms in advance.
5. Veterans are given preference in all University-operated housing projects. Space is still available for single veterans at the Truax student housing project. Some apartments for married veterans are still available at Badger Village, 34 miles from Madison, and the University will have a limited amount of space available for privately-owned trailers. The situation is tight for single non-veteran men, single women, and married couples. Students are finding rooms by personal canvass and solicitation, not by mail. Students who are willing to work have a much better chance to secure a room.
6. In general, permits to register will not be issued to applicants who are not residents of the State of Wisconsin, except those who are admitted to the Graduate School.
