NAVY PERSONNEL ON THE CAMPUS JOINED WITH MEMBERS OF THE UNIVERSITY BAND TO CELEBRATE NAVY DAY WITH A DRILL FEATURING THE FLAGS OF ALL NATIONS BEFORE THE FOOTBALL GAME WITH GREAT LAKES.

The Wisconsin ALUMNUS

MAILBAG . . .

from our Fighting Badgers

Italy—

"Last week, I took a few days off to accept a luncheon invitation with another former Madison resident who is stationed quite a ways from here. We spent an enjoyable afternoon discussing the university, among other things. I was particularly surprised to learn that this chap, a few days previous to my arrival, had received a letter from Prof. Miles Hanley, under whom I majored in English as an undergraduate. Oh, yes, this former Madison resident is a Lt. Col. who used to teach at the University of Chicago. He gave that up to dabble in writing. Maybe you've heard of him—Thornton Wilder."

LT. RICHARD H. GOLDSTONE, '38

* * *

China, as usual—

"To add to your collection I am enclosing a Chinese \$10 bill. These are called Yuan here but Americans refer to dollars as C.N. which stands for Chinese National Currency. The legal rate of exchange here is 40 CN for each American dollar. The black market in money however allows us to exchange our American money at an average of 200 CN . . . Bear in mind that I am speaking of the hinterland where I am stationed. We are many and you can underline that, miles away from any Chinese city with such modern things as automobiles, electric lights, stores, etc. In fact we are 13 hours by pack horse away from a road that is able to accommodate a jeep and they go almost anywhere, as you know. I am told that in some of the larger cities the prices almost go out of sight they are so high."

MAJ. J. D. O'CONNELL, '32

* * *

New Guinea—

"At present am fulfilling the duties of a squadron Engineering Officer and getting a great kick out of it. Outside of keeping our ships in the air this squadron has a penchant for rebuilding wrecked planes and using them for "Fat Cat" missions to Australia. After fixing up three American planes, we finally got a chance at a Jap ship. After four months hard work, my section had this Jap recco ship, a "Dinah", ready to go for Air Intelligence. The day before yesterday it made its maiden flight and performed perfectly. It caused quite a lot of excitement and everybody in the area was on hand to see it fly. After a few more test hops the plane will be shipped south and then to the states, as it is the only plane of this type ever captured and resurrected. Needless to say, we are pretty proud of our job."

CAPT. HOMER VOREL, '39

* * *

Pacific Theater—

"This has been a rather busy theater of late and I have managed to take part in two shows as a member of the Press Relations staff of this unit. We try to turn out as complete a picture as possible for the professional press to base their stories on, so naturally we flit around quite a bit. Taken in total, I would say

that it is a fine thing for a university man to see battle action from the viewpoint of the enlisted man. I have found out a lot of things about people that I never would have learned in Bascom,—things which I think that the fellows I know who never have or will see action as enlisted men ought to see. They in turn are getting a great deal out of the Army that I never can because they are given more responsibilities than I. There, in my opinion, is the fundamental difference in being commissioned and not being commissioned. I think the biggest job of the university man like myself in the ranks is to be able to overcome the liability of years of not being given responsibility when we return to civilian life. Other than the above, I'll take the enlisted man's life 100%."

SGT. FRED BAXTER, '40

* * *

Somewhere in the Pacific—

"The safe and comfortable law business is a million miles away now and instead of "I object, your honor," it's "Rudder amidships; all ahead full—man your battle stations."

Have brought the 1074 (a sweetheart of a ship) about 9000 miles toward where "they're a-carrying on". We are getting set to plunge right through that line. As Roundy Coughlin says, "Gimme them touchdowns between 2 and 4 on Saturday afternoon." We hope to make them."

LT. (j.g.) R. G. HARVEY, '32

* * *

Holland—

"Received your letter in England, and the "Cardinal Communique" was the first bit of mail I got here in Holland. It's rather rough here now but I hope the whole show will be over soon. However, I like the country better than I do that in England; at least in the vicinity I'm in now. It's more Wisconsin-like. My Dutch is not any good at all so the people don't understand me nor I them. In Italy you could use your hands and wave them all over three blocks while talking. The Dutch are content to talk without any physical exertion or gestures. The invasion was really a fight to behold and I doubt if anyone can imagine the magnitude and thrill of it unless they saw it for themselves."

PVT. GEORGE E. MARKWARDT, '44

* * *

France—

"The 7th Army has had a whirlwind campaign but now we have settled down somewhat. France is a marvelously beautiful country and this particular area reminds me vividly of Wisconsin—land of butter, cheese, and eggs. The French are most gracious—we even bartered a chicken off them yesterday. "C'est la guerre" can be delightful. France is far better off than Italy and one can easily see why it is a great nation—primarily agricultural with a close network of small villages, small farms and the thrifty hard-working peasant. Not rich and certainly not poor. Intensely patriotic, our reception has been

tremendously enthusiastic. They have small bypasses built over streams where the Germans have blown out bridges even before our engineers arrived. They are indeed worth fighting for!"

LT. ROBERT O. UEHLING, '39

* * *

Galveston, Texas—

"I've not done much flying since I got back from England, but last week I was one of the pilots to fly a group of Hollywood stars and starlets back to Hollywood from Galveston here where they'd put on a show for the combat men. The master of ceremonies was Jimmy Fidler, and I had quite a talk to him. He sure wanted to talk combat, and Edgar Bergen seemed to get a big kick out of talking to the boys about their close call. I guess I'll have to say I was co-pilot to Ray Bolger, because he flew the ship nearly from the take-off to Burbank. He'd flown some in lighter planes and after we got squared away at our altitude we had him fly it. He did a fine job, and I sat there doing the navigation. We had him worrying about his ability as we let him take it through the mountain pass. I was entertained out in Hollywood by the Bolgers; they have a beautiful home in Beverly Hills. It's high up in the hills, and we went swimming at his private pool one night.

Guess I told you I got the Presidential Citation for the Schweinfurt raid. I just wonder if it'll be any good if we change presidents.

"I sat next to Stephen Crane at a luncheon counter, but now that Lana Turner's given him the gate, I guess that makes him about as unimportant as I am.

1ST LT. GENE WELCH, '39

* * *

Dutch East Indies—

"I have no complaints about distance from the Japs now. We are no longer "Somewhere in New Guinea", but "Somewhere in Netherlands East Indies," and right up where the rockets red glare means something other than the Fourth of July."

We came in this time soon enough to collect some Jap souvenirs and hope to get some place else soon enough to do the same thing."

MAJ. R. H. PADDOCK, '26

* * *

European Theater, in a hospital—

"Thank you so much for your nice letter and the Cardinal Communique. News from home is greatly appreciated. Life in an army hospital is never dull, but it seems appreciation of little things is even keener here.

There have been several Wisconsin patients here who have read and reread the literature from the university.

While you at home must at times feel you are doing a tremendous amount of detail work getting out the mail, you may be sure your efforts are not in vain.

MRS. BESS M. RUNEY, ARC

(Continued on page 17)

University Building Program

Program Requested By Regents

A. Recommended by the Legislative Interim Committee:

Fireproofing Bascom Hall -----	\$ 125,000
Library -----	1,791,400
Dairy Building -----	580,800
Engineering Buildings -----	1,424,400
Home Economics -----	209,600
Chemistry -----	1,702,500
Increased cost allowance -----	636,040
	<hr/>
	6,469,740

B. Recommended additions for the Biennium:

Biology wing -----	500,000
Bascom enlargement -----	535,000
Bacteriology -----	250,000
Administration and Extension -----	500,000
Heating, electricity, etc. -----	1,000,000
Physical Education -----	1,000,000
Milwaukee Extension Addition -----	470,000
Dormitories and Housing -----	1,000,000
Increased Cost Allowance -----	460,660
	<hr/>
	5,715,660

C. Short Course Dormitory:

Appropriated in 1941 -----	200,000
Revised estimated cost -----	348,600
Additional appropriation needed -----	148,600
	<hr/>
	517,200

Grand Total ----- \$12,334,000

Regents Request

AFTER carefully considering the report of the Finance Committee, the Board of Regents have voted to ask the 1945 legislature for \$12,334,000 for new construction and permanent improvements in buildings on the campus.

Recognizing the urgent need and acknowledging the fact that no State appropriations have been available to use for new construction since 1929, the finance committee has analyzed the requests made by administrators of the university in a report submitted to the Regents in September, and has decided to recommend acceptance of the twelve million dollar program.

The finance committee also evaluated the administration's request in terms of present day increased costs and revised their request in accordance.

The Finance Committee briefly reported: "The Regents have given careful consideration to the building needs . . . There is a large backlog of laboratory and classroom building needs which must be remedied as quickly as possible. The Finance Committee recommends, therefore, that the Legislature be asked to appropriate funds for the following new construction and permanent improvements:" [Listed in box at left]

Building Conference

University administrators, regents, and members of the board of visitors conferred with directors of the Alumni Association and presidents of alumni clubs at a dinner meeting held in the Union on Oct. 13.

The conference marked the beginning of an organized effort among university people to back the building plan which the regents will present to the legislature.

Speakers at the conference were Pres. C. A. Dykstra, Michael J. Cleary, chairman of the finance committee of the board of regents, Frank O. Holt, head of the department of public service, and George I. Haight, former president of the Alumni Association who had served during a building crisis some 25 years ago. Philip H. Falk, president of the Alumni Association was toastmaster.

Dinner preceding the building conference
Haight, Cleary, Dykstra, Falk and Holt

THE PRESIDENT

President Clarence A. Dykstra

"The university has been good to me and I've enjoyed serving it"

Challenge For U. W.

(An Editorial)

Excerpts reprinted from the Wisconsin State Journal

The resignation of Pres. Clarence T. Dykstra puts before the University of Wisconsin regents another perplexing problem—and another golden opportunity to initiate a great renaissance of the Hill.

The Wisconsin State Journal has no candidate for the presidency of the University of Wisconsin. But in our humble opinion, the man who now is to be handed the helm of this, the state's most vital institution, should be a scholar.

He will have to be a man of other notable qualities as well, but his distinguishing signet should be that of a man of thought and inspiration in contrast to one of pure administration and money-raising.

He can and must be a man of the highest scholastic attainments, of distinguished learning, a man whose name stands for something of both academic areas and the body politic, and still be a figure of inspiration and ideals, fearless of imagination, adventure, but with sympathy, understanding, and eagerness for the practical tradition of the great Wisconsin Idea.

* * *

It is of utmost importance to the future of the university and thus to the people of Wisconsin and their children to come that he be a man who can command the trust and respect of the faculty, who can inspire it and lead it, not necessarily to bigger budgets, to finer buildings, to larger enrollments alone, but to the scientific and scholastic spirit that places the inquiry and pursuit of truth above all other considerations. It is only in the constance of such spirit that it can give to the people of its state the service for which it was founded and for which it lives.

A superlative faculty, which more than bricks and mortar must make a university's skyline, cannot be maintained without such scholarly leadership. It will not stay, it will not follow, it will not create, and it will not attract the best of other states and other countries with any less.

* * *

The golden days of Wisconsin, after all, were the years of the great scholars, the men with the noble passion of learning and the broad conception of its service. Those days can be brought again to the Hill in a world whose horizons are being pushed far beyond the old dreams, whose boundaries are limitless, only if a man of those conceptions and capacities to realize them is now brought to its head.

The regents hold in their choice for the immediate years the choice for generations to come.

Dykstra Resigns

to go to UCLA

Clarence A. Dykstra, president of the university since July 1, 1937, has resigned from that position and will be the provost at the University of California at Los Angeles.

The Board of Regents have unanimously accepted Dykstra's resignation.

Dykstra's complete statement read as follows: "I herewith give you my resignation as president of the University of Wisconsin to accept the position of provost at the University of California at Los Angeles.

"I am taking this action after long and serious consideration. The post at Los Angeles is the only university position in the country which could take me from the University of Wisconsin. It is the university which I left to become city manager of Cincinnati. I have deep roots in the Los Angeles community. It was my home for many years.

"I take this action with very real regret. Leaving will be very difficult, for this university has been good to me, and I have enjoyed serving it.

"I thank this board for its consideration and support, and I am grateful for the continuous and consistent aid I have had from the faculty, the students, and citizens of Wisconsin. I ask you to accept this resignation and release me from my present responsibility by approximately Feb. 1, 1945."

Dykstra became the 11th president of the university after serving as city manager of Cincinnati. He was born in 1883 in Cleveland and received his bachelor's degree from the University of Iowa in 1903.

After graduation he became a fellow in history and an assistant in political science for a year at the University of Chicago. Then he taught in private schools in Florida for two years, and in 1907 became an instructor in history at Ohio State.

In 1908 he was made professor and department head in political science at the University of Kansas where he remained until 1918 when he became executive secretary of the Cleveland Civic League. In 1920 he became secretary of the Chicago City Club.

Two years later he was made secretary of the Los Angeles City Club and a year later added the position of the commissioner of the water and power department to his work. From 1926 to 1930 he was the department's director of personnel.

From 1923-29 he was also professor of municipal administration at the University of California. He became city manager of Cincinnati in 1930.

Dykstra served as the director of the country's selective service law from 1940 to April of 1941 when he was named chairman of the National Defense Mediation Board.

Official notice of his appointment was received here on Oct. 28, the date the board of Regents met. Dykstra had accepted the position in advance.

The provost position is comparable to that of president on an independent campus. The University of California has a number of campuses, each headed by a provost.

Fredrick H. Clausen, '97
Passed away Oct. 20th

Clausen Dies

Fred H. Clausen, '97, prominent Wisconsin alumnus and state figure, died unexpectedly of a heart ailment on Oct. 20 in a Fond du Lac, Wis. hospital.

Clausen served his alma mater in many capacities. He was a member of the Board of Regents, having been president of the board from 1933 to 1935; president of the Alumni Association; and president of the Memorial Union Executive committee at the time the Union was being built and financed.

In 1937 he was presented with a testimonial of appreciation from the Alumni Association for the 40 years of distinguished service he had given to the university. In May of this year he returned to the campus to celebrate the 45th reunion of his class.

A widely known industrialist, Clausen was president of the Van Brunt Manufacturing Co., Horicon, Wis. His first job after graduating from law school was with that company where he was a clerk.

Mr. Clausen won the Republican nomination for U. S. senator in a field of seven candidates in 1940. He was defeated in the general election by Sen. Robert M. LaFollette, Jr.

Survivors include his wife, the former Eleanor Bliss, '98, and three daughters, Mrs. C. J. Manning, Mrs. J. Karsten, '28, and Mrs. R. W. Hadley, '32.

Enrollment is Up

It would seem as if the leanest year of this war, as far as university enrollment is concerned, has just passed, for the fall registration figures now show that over one thousand more students are enrolled on the campus than were enrolled a year ago.

There are 622 more freshmen this year than last. The increase in enrollment in the College of Letters and Science is 783. However, there is a very slight decrease in the number of graduate students enrolled this year as compared with a year ago.

Total enrollment is 5,585. There are now 1,803 freshmen registered. Men students on the campus total 1,286.

Gifts Accepted

The board of Regents accepted gifts and grants amounting to a total of about \$26,400 at their recent meetings.

The gifts are the following:

\$4,800 from the Lederle Laboratories, Inc., Pearl River, N. Y. for renewal of a fellowship for an extension of penicillin production studies during the ensuing year.

\$3,300 from the Wisconsin Alumni Research Foundation, Madison, for the renewal of a fellowship for a study of the activation of milk by ultra-violet light.

\$3,300 from the Rhinelander Paper Co., Rhinelander, Wis., for establishment of a fellowship to study the fermentation of waste sulfite liquor from paper mills to determine the possibility of its profitable use in the manufacture of lactic acid, butyl alcohol or other useful chemicals.

\$1,600 from Wilson and Co., Inc., Chicago for the study of the effects of processing upon the nutritive value of meat and meat by-products.

\$5,200 from the National Live Stock and Meat Board, Chicago, for renewal and expansion of a fellowship to study the vitamin and nutritional value of meats.

\$2,200 from Red Star Yeast and Products Co., Milwaukee, for the study of factors affecting the activity of dried bakers' yeast.

\$500 from the Ludlow Manufacturing and Sales Co., Boston, for continuation of a fellowship to study the improvement of quality and yield of hemp fiber, a new state industry.

\$2,000 from the National Dairy Council, Chicago, for establishment of a fifth fellowship to study the relationship between nicotinic acid content of milk and its antipellagra activities.

\$200 from the Milwaukee sewage commission to study the suitability of sewage wastes as mushroom composts.

\$1,500 from the Borden Co., New York, for a five-year period to provide \$300 scholarships for outstanding seniors in the College of Agriculture.

\$1,500 from the Borden Co. for five \$300 scholarships to outstanding home economics students.

\$198 from the W. H. Scott estate at Stanley, Wis., to be used for cancer research at the McArdle laboratory.

Club from the Minneapolis Alumnae Club to be added to the Henrietta Wood Kessenich scholarship fund.

Short Course Dorms

The board of Regents decided against following through their plan to seek rush priorities on materials for the construction of a \$200,000 short course dormitory.

Comptroller A. W. Peterson reported that the state chief engineer and the state architect both had advised the regents not to attempt immediate construction because the manpower situation is very critical and also because many substitute or poor quality materials would have to be used.

The dormitories are needed to accommodate the large enrollment.

School of Social Work?

The question of whether or not the university should establish a graduate school in social work has been referred to the education committee of the Board of Regents.

It had been proposed by A. W. Bayley, director of the state Public Welfare department that the university consider establishing such a school because it would be of great help to the welfare department which is in need of trained field and institutional workers.

Bayley proposed that state experts in various phases of the work, such as child welfare, institutional management, and public assistance, could be used as lecturers for the school in order to keep the expenses down.

Upon the motion of Regent John D. Jones who felt that the university might have an obligation to the state with this regard, the matter was referred to the education committee.

Veteran Center

The University has been selected as a war veterans' vocational rehabilitation and education center, to be conducted in cooperation with the federal Veterans' Administration. It will serve veterans residing in the 21 counties surrounding the Madison area.

The university's Personnel council which has been helping returning veterans get themselves located in the university program of affairs will give preliminary tests diagnosing the veterans with regard to their occupational aptitudes so as to determine whether or not they are eligible for training and education under the program initiated by the federal government.

Preliminary interviews will be followed by detailed examinations and even physical examinations if necessary. After the Personnel Council has made sufficient analysis and recommendation, they will transfer the records to the Veterans' Administration offices in Madison. Here they will receive information about the particular training program which they are qualified to participate in.

During the period during which the veterans are going through this process of examination and placement, they will be housed at the University YMCA and will eat at the Memorial Union. If they are selected for university work they need not necessarily take their courses at the University of Wisconsin, but may go to the school of their own choice.

The center opened around the middle of October and at present only several veterans daily use the facility on the average.

The WISCONSIN ALUMNUS is published monthly, October through July, by the Wisconsin Alumni Association and is entered as second class matter at the post office at Madison, Wis., under the act of March 3, 1879. Subscription to the ALUMNUS (included in the membership dues of the Wisconsin Alumni Association) is \$2. a year; subscription to non-members is \$4. per year.

Babcock's Will

The will of Dr. Stephen Moulton Babcock, one of Wisconsin's greatest scientists, has provided for the purchase of specialized books and journals on various phases of agriculture.

During the war few purchases can be made from foreign countries, but the committee in charge of making the purchases intends to complete broken sets of scientific journals, to add special research publications, to buy new sets of scientific journals, and to establish a reserve fund for the purchase of book collections that have been unavailable and out of print.

C. S. Hean, chief agricultural librarian, explained that many foreign books are the best sources of research material.

Many Graduate

A grand total of 6,130 students received diplomas of one sort or another from the university during the past year.

The army and navy contributed some 4,500 students of that total.

The Navy Radio School alone held 12 graduations, one each month, with some 3,000 men receiving diplomas. The Army Specialized Training Program held four graduations, with a total of 1,500 soldiers graduating.

The regular May commencement found a total of 881 students receiving university degrees, either undergraduate or graduate.

115 students from the School of Medicine were graduated in two graduations, and the Engineering College granted degrees to 222 students, although they held no special graduation. A number of degrees were given at the end of summer school also, and no commencement was held.

No Sale

When the city of Madison's planning commission recently requested that the university sell the city a strip of its land so that a new highway could be constructed from the biochemistry building to the overpass on the Middleton road, the board of Regents voted not to sell the property.

A regents subcommittee reported that the project involved "essential university property" and that a seed storage building, greenhouses, the old short course dormitory, and other university structures would have to be removed or torn down.

The city planning commission was proposing a new highway running parallel to University avenue and branching off at the point where the tracks cross the avenue.

Books to China

Forty-four cartons of books, bulletins, and periodicals have just been shipped to China by the library of the College of Agriculture. They will help supply the need in China for educational books and periodicals made necessary by Japanese destruction of Chinese libraries.

The cartons contain bulletins and records of the Wisconsin agricultural experiment station, scientific periodicals, and volumes of Science which were donated by G. W. Keitt plant pathologist.

China plans to establish twelve regional libraries.

FACULTY

NEWS AND VIEWS OF THE
FACULTY, STAFF, RESEARCH

Ira L. Baldwin
New Dean of Graduate School

Dean Baldwin

Prof. Ira L. Baldwin, head of the department of agricultural bacteriology, has been named dean of the Graduate School by the board of Regents recently.

Dean Baldwin is now on leave of absence from the university to direct important research work regarding tropical disease for the war department. He will remain there until Dec. 1 in accordance with the urgent request of Secretary of War Henry L. Stimson. However, he will return to the campus periodically to take care of administrative work here.

Dean Baldwin, 49, received his PhD. from Wisconsin in 1926. He had taken his bachelor's and master's degrees at Purdue university, where he taught from 1919 to 1926.

He came to Wisconsin as assistant professor of bacteriology in 1927, was made associate professor in 1929 and full professor in 1932. From 1932 to 1940 he served as assistant dean of the College of Agriculture.

The position of dean of the Graduate school was vacated when Edwin B. Fred was appointed dean of the College of Agriculture, and when his successor, Prof. Harold W. Stoke, was named president of the University of New Hampshire.

New Faculty

New appointments to the faculty have recently been approved by the board of regents. They are: Parker D. Trask, professor of geology, Carl A. Brandy, professor of veterinary science in the College of Agriculture; Dr. Wayne B. Slaughter, associate professor of plastic surgery in the medical school; Elizabeth Grimm, associate professor of physical medicine.

Prof. Trask is a Texas university graduate, and a specialist in petroleum geology. He will come to Wisconsin in Sept. 1945.

Prof. Brandy is a graduate of Kansas State college and has been a research worker for the United States department of agriculture at Harvard.

Dr. Slaughter has been on the faculty of the Loyola university medical school.

Faculty Leaves

Faculty members recently granted leaves of absence by the regents include the following:

James K. Little, education; Farrington Daniels, chemistry; Henry Bakken, agricultural economics; Delmar W. Nelson, mechanical engineering; Churchill Eisenhart, political science; H. Gordon Skilling, political science;

Mary C. Devereaux, library school; John D. Workman, German; Philip H. Gray, English; Janet R. McCarter, agricultural bacteriology; Frank V. Burcalow, agronomy; Dorothy L. Husseman, home economics; Paul Sheats, education; Celia F. Abry, home economics; Paul Jones, music; and Louis Busse, pharmacy.

Prof. Little is now doing research work for a Chicago personnel agency. Prof. Daniels has been doing highly confidential work for the Office of Scientific Research and Development.

Prof. Bakken is a price advisor for OPA. Prof. Gray has joined the staff of the World-over Press, Wilton, Conn. as executive editor.

Extension Head

Dr. Wilbur M. Hanley, former assistant professor of geography, has taken over the post of director of extension teaching in the Extension Division. In this position he will have general supervision of the correspondence—study and extension class programs, including the services supplied for the Armed Forces Institute in Madison.

Dr. Hanley succeeds Prof. W. H. Lighty who retired some time ago.

Hanley received his BA degree here in 1932, his MA in 1933 and his PhD in 1941. He has been teaching geography both on the campus and in the extension division and has taught in the government war-training courses here.

Visual Education

Walter A. Wittich is the new acting head of the Bureau of Visual Education, succeeding Freeman Brown.

Wittich was formerly director of visual education in the Madison school system and was principal of Marquette school in Madison.

Wittich received his BA degree at Wisconsin in 1932, his MA in 1934, and his PhD in 1943.

Chorus Director

William F. Kugel, Carroll College, Waukesha, has been appointed director of the university chorus and instructor in the Music school. A successor to William F. Pfeiffer, Kugel will divide his teaching time between Wisconsin and Carroll during this school year.

Other Music school appointments include that of R. B. Duncan of the extension division, as manager of the Pro Arte quartet and Helen Stratman-Thomas director of the women's chorus.

Enrollment in the music school is up fifty per cent over last year.

Prof. J. H. Mathews

Developed a rifling meter to help determine which gun fired the bullet

Poser Chief Resident

Dr. Rolf F. "Chub" Poser, former Badger basketball star, has been appointed chief resident physician at the Wisconsin General Hospital, succeeding Dr. Meade Burke who recently resigned.

Dr. Poser was graduated from the Medical School in 1938 and has been on the hospital staff for the last three years.

Lectures For Veterans

The Extension Division is arranging a series of twelve lectures to be given for veterans of World Wars I and II under the sponsorship of the American Legion.

The series is based on the problems of reconstruction at home and abroad.

Faculty members who are now giving the series include Professors L. H. Adolphson, C. V. Easum, Selig Perlman, Gaines Post, A. P. Fernbach, William Ebenstein, Philo Buck, Walter Agard, A. P. Miles, J. L. Miller, and R. J. Colbert.

Neuro-Psychiatrists

Dr. Hans H. Reese, professor of neuro-psychiatry, has just completed his work as special consultant and technical observer to the Allied general staff. He was on a six month leave of absence from the university, where he is head of his department.

Dr. Reese worked in a civilian capacity with Dr. James V. May of Harvard, and has been overseas. He has just reported his findings to the medical corps chief of staff.

Col. William J. Bleckwenn, also professor of neuro-psychiatry now on leave of absence, has been appointed neuro-psychiatric consultant to the Sixth Service Command in Chicago. He has just returned from over two years of service in the South Pacific.

Chemists

Three members of the chemistry department, H. A. Schuette, D. A. Roth, and R. M. Christensen, attended the 18th annual meeting of the American Oil Chemists' society held in Chicago late last month.

They presented two technical papers to the session on fats and oils.

RESEARCH RE...

Butterfat Important

If milk were manufactured in such a way that the butterfat content were removed and a cheaper variety of fat were substituted, the milk would lose a large part of its health value and consumers health would be impaired, it was recently declared by four university biochemists, R. K. Boutell, Robert Geyer, C. A. Elvehjem, and E. B. Hart.

Experimentation on white rats revealed that vitamin-building intestinal bacteria can work much more satisfactorily when supplied with a butterfat and milk sugar diet than when supplied with a vegetable fat and milk sugar diet.

There is some definite connection between the kind of fat used and the amount of synthesizing of B-complex vitamins done by the intestinal bacteria.

Those rats which had a vegetable fat diet were found to be in critical need of B-complex vitamins, whereas those rats fed on a butterfat diet did not need the B-complex vitamins because such vitamins were manufactured by their own systems.

If these findings apply to human beings, then it may be declared that it would be a health hazard to permit the manufacture of filled milk.

Vicland Oats

Vicland Oats, the new high-yielding, disease resistant variety recently developed at the university, has proven its value already, according to H. L. Shands of the college of agriculture.

"This is the first year that the state has had an opportunity to realize the full impact of Vicland production," he declared.

"With close to 90 per cent of the oat acreage devoted to Vicland this year, con-

trasting to the 55 per cent last year, the Wisconsin crop has increased nearly 18 million bushels," Sands said.

Since the introduction of Vicland oats to growers, the expansion of acreage devoted to its growth "has been the most rapid of any grain variety in the history of agriculture," Shands explained.

Chocolate Milk

C. A. Elvehjem and Gordon Newell, both of the biochemistry department, have recently completed an experiment concerning the nutritional value of chocolate milk.

They fed laboratory animals nothing but chocolate milk to which minerals had been added, and found that the growth of these animals was just as good as that of animals fed plain milk to which minerals had been added.

Previously a study had shown that people drink more milk if given a choice between ordinary milk and chocolate than if they were limited to "white" milk alone.

Dr. Elvehjem pointed out that "Although we can find nothing injurious about large quantities of chocolate milk, of course there may be individual differences in ability to tolerate cocoa."

The study was done with milk containing 1.05 per cent cocoa, the amount in most chocolate milk.

Tooth Decay

Experimental evidence has been found to support the theory that too much sugar promotes dental decay, according to nutritionists working on the problem.

C. A. Elvehjem and Paul Phillips headed the project and were aided by James Shaw, B. S. Schweigert, and J. M. McIntire.

In working with cotton rats, they noticed that a large number of molar cavities consistently developed among those rats which were placed on a diet in which ordinary

Julius Olson Scholarship-Loan Fund

In order to carry on the great work done by the late Prof. Julius Olson in providing financial assistance to needy students, a scholarship-loan fund has been set up in his honor. Contributions to the fund should be sent to:

WISCONSIN ALUMNI ASS'N.
Memorial Union, Madison 6, Wis.

I am enclosing my check made out to the Julius Olson Scholarship-Loan Fund in the amount of \$_____

Signed _____

sugar is the only carbohydrate for fourteen weeks.

Decay is prevented when the sugar is replaced by dextrin, a carbohydrate similar to starch, or when the diet is made up of natural foodstuffs including whole grains.

Of course these findings may not turn out to apply to man, and yet they "may well turn out to be important", the scientists said.

It is particularly significant that dental cavities can be produced so promptly and regularly by merely regulating the diet of the rats.

Penicillin by Faculty

With scientists in universities and private laboratories all over the country proclaiming the virtues of the wonder-mold, penicillin, efforts are being constantly made to improve the production of the drug.

Since January the full staff of men in the biochemistry department's fermentation section have been working entirely on penicillin. Dr. W. H. Peterson is coordinator of the work.

In addition to these biochemists, Dr. Peterson reports that Dr. W. C. Frazier, Dr. Elizabeth McCoy and Dr. Robert Burris, of the bacteriology department and Dr. M. P. Backus and Dr. J. F. Stauffer of the botany department have been experimenting on penicillin.

Here the original strain of Penicillin Notatum is being cultured in hundreds of test tubes and fermentation flasks to learn the nutrient culture medium in which it will grow best.

In addition the research experts are taking the most productive of hundreds of strains of the drug and are growing them and testing them in large fermentation bottles. Finally the best are cultured in what are termed "pilot plant tanks"—each of which holds 80 gallons of the broth in which the mold is grown. Different strains of penicillin need different conditions for optimum growth, so these factors are being discovered in order that growth of the mold can be speeded up.

University scientists are also working on the foaming problem. When the penicillin grows it creates a foam on the surface of the culture medium which often takes up a good portion of the tank.

By reducing the amount of foam to grow along with the penicillin, manufacturers could devote more tank space to the actual growing of the mold. Scientists here have developed a nontoxic defoaming agent which has enabled them to increase production considerably.

Penicillin by Alumnus

A Wisconsin alumnus, working through the private RCA research laboratories, has made an extremely advantageous contribution to speeding along penicillin production.

He is Dr. George H. Brown, Ph.D. '33, who has invented an electronic oven which is used to evaporate off surplus moisture from the penicillin solution.

Once the penicillin is purified and partly reduced in bulk, it has to be reduced more so that the solution is strong. Conventionally this was done by "freeze-drying" the solution.

Dr. Brown's method instead boils away the solution at a low temperature, by means of a radio current operating in an oven that contains a partial vacuum. The low temperature does no harm to the drug.

THE CAMPUS

Dr. Paul Wiley, center, and Latin-American students
Class is a practice session, informal and conversational

English For Foreigners

Wisconsin again leads the field in recognizing that foreign students attending the university may need a little more work in the English language. This year two courses have been initiated for foreign students. One sponsored by Prof. Ricardo Quintana of the English department and taught by Dr. P. Paul Wiley, is for Spanish-speaking students. The other, sponsored by Prof. W. F. Twaddell of the German department, and taught by I. Fang Sun is for Chinese students.

Both courses are non-credit. Only four other schools in the country teach special English to foreign students.

Charge to Medics

President Dykstra presented the charge to the recent graduating class in the Medical School, urging them to live up to their obligations.

He said, "As you leave us to take on new obligations, I bid you to take along the things that are precious to your Alma Mater—the obligation to serve your country and your generation, the high duty of sifting truth from chaff, and a love for freedom.

"Participate in our common concerns as citizens of our country and of the world which is and is to be. The University bids you a temporary farewell and a good voyage."

Fraternities Return?

Eight fraternities are making a strong attempt to come back after having been on the inactive list, Dean Goodnight's office reported.

They have petitioned to be allowed to resume their chapters on the campus and

to pledge new members even though they do not as yet have houses.

The university has given approval and now action depends upon the chapters. If they can get together enough members and win the approval of their alumni advisors and their national officers, they will be active again.

Fraternity Finance

The counterproposal which fraternity men submitted in answer to the faculty plan for operation of fraternities by the university department of residence halls, has been vetoed in a series of objections made by Dean Scott H. Goodnight.

Now the fraternity representatives are at work revising their plan in order that it might meet faculty approval.

Goodnight expressed the view that the university wants "business operational control that will insure the stability of fraternities." He spoke for the faculty committee saying that "we think the best way of maintaining an intelligent, efficient, and economical operation of the houses is to put them under close control."

Fraternity representatives are still determined not to relinquish control of their finances to the university because it would initiate a severe curb on their independence.

Veterans Club

A new organization may make its appearance on the campus this fall. The World War II veterans who are enrolled here are thinking about organizing a club.

A committee consisting of Aleron Larson, Michael Couture, Quentin Soik, John Jacques, William Lewis, and E. G. Cnare has been formed to study the needs and possibilities of such an organization.

ASSOCIATION NEWS

Alumni Club Assembly

Wisconsin Alumni Clubs all over the country have banded together to adopt a constitution uniting them into the Wisconsin Alumni Club Assembly.

Presidents of the various clubs met on Oct. 14, with the directors of the Alumni Association and decided that the Assembly would enable the clubs to become stronger and more plentiful.

The constitution as drawn up by an organization committee was adopted.

Serving in the capacity of Assembly members, the presidents at the meeting elected their executive committee. Members of this committee are Herbert G. Schwahn, Milwaukee; Irving Rice, St. Paul; Harold L. Geisse, Wausau; Lynn Tracy, Chicago; and W. G. Aschenbrenner, Racine.

Club presidents who drew up the constitution are Schwahn, chairman; Aschenbrenner; Tracy; Robert Lauson, West Bend; and Mrs. R. E. Lynch, La Crosse.

The executive committee's first meeting was held in Milwaukee on Nov. 3d.

Mrs. Meloche

Mrs. V. W. Meloche, '18, Madison, was elected a director of the Alumni Association by the board of directors at their meeting on Oct. 14, following the resignation of Polly Coles Haight, '39.

CLUBS

Superior

New officers of the Wisconsin Alumni Club of Superior, Wis. were elected at a meeting held Sept. 27. They are as follows: Vernon W. Sell, '22, president; Mrs. Howard S. Russell, '25, vice president; Eleanor J. Orchard, '28, secretary; and Mr. O. E. S. Roeseler, '15, treasurer.

Range Alumni

A Range Wisconsin Alumni club has just been organized for all alumni of the Hurley, Ironwood, Bessemer, Ramsay and Wakefield area.

Pony Edition

Some of you are well acquainted with ponies. Perhaps you got through your language requirements because of a pony, or perhaps you have read the pony editions of topflight national magazines. Not to be outdone,—and also in order that our Fighting Badgers might receive the Stuhldreher Football Letters as promptly as possible, we have established a new publication—the special pony edition of the Football letters for overseas Badgers.

Last year the football letters were sent by regular mail, and they arrived along with the Christmas packages. This year they are being sent by air mail so that they'll arrive at their destinations as promptly as possible. Two regular letters are put together, the advertising is removed (Badgers overseas can't patronize those advertisers anyway) and the 5 x 6 1/2 inch miniature can be tucked in a red, white and blue airmail envelope.

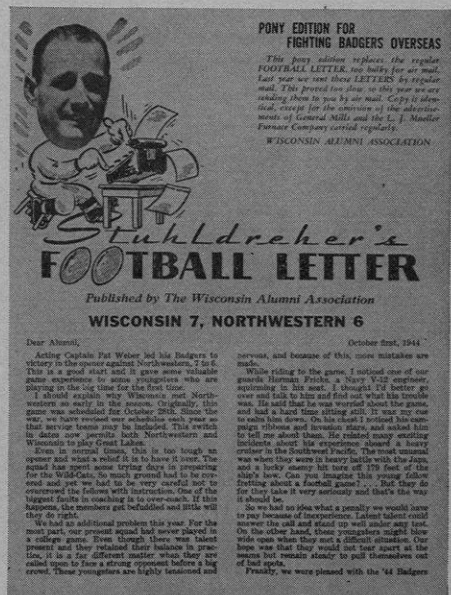

Mrs. William G. Cloon, '15, has been serving as acting chairman. A nominating committee consisting of Rose Castagna, '37, Dr. A. O. Hendrickson, '34, and Mrs. Cloon has been appointed to select nine members for a board of directors of the club.

Minneapolis Alumnae

New officers of the Alumnae Club of Minneapolis are as follows: Mrs. William R. Marsh, '11, president; Jane Lewis, '17, vice president, Mrs. G. E. McKay, '32, secretary, and Helen Kober, '27, treasurer.

The club held its first meeting on Oct. 21 at the home of Mrs. Marsh in the form of a musical tea for the benefit of the Henrietta Wood Kessenich scholarship fund. Mrs. H. H. Ratcliff, '24, was chairman of the tea.

The next meeting will be held on Nov. 17 at the home of Mrs. Gerald Koepcke, '26. It will be a buffet supper and card party for members and their husbands. Mrs. W. G. Fisher, '22, will be chairman of the party.

PONY EDITION FOR FIGHTING BADGERS OVERSEAS

The pony edition replaces the regular FOOTBALL LETTER, too bulky for air mail. Last year we sent these LETTERS by regular mail. This proved too slow, so this year we are sending them to you by air mail. Copy is identical, except for the omission of the advertisements of General Mills and the L. J. Mueller Finance Company carried regularly.

WISCONSIN ALUMNI ASSOCIATION

Stuhldreher's FOOTBALL LETTER

Published by The Wisconsin Alumni Association
WISCONSIN 7, NORTHWESTERN 6

Dear Alumni,

October 21, 1944

As the Captain Pat Weber led his Badgers to victory in the game against Northwestern, I sat in the bleachers and saw some valuable game moments for many generations who are playing in the big time for the first time.

I should mention Wisconsin's first Northwestern win in the season. Originally this game was scheduled for October 20th. Since then we have revised our schedule each year so that we have been able to schedule this which is dates now permits both Northwestern and Wisconsin to play Great Lakes.

Even in normal times this is too tough an opponent and what a relief it is to have it over. The crowd has spent some trying days in preparing for the game. So much ground has to be covered and yet we had to be very careful not to overdo it. The game will be finished and little will they do right.

So we had an additional problem this year. For the most part, our personal squad had never played in a college game. Even though there was talent present and they retained their balance in practice, it was a different matter when they were called upon to face a strong opponent before a big crowd. These youngsters are highly talented and nervous, and because of this, some mistakes are made.

While riding to the game, I noticed one of our guards Herman Fink, a Navy V-12 engineer, explaining to his seat. I thought I better go over and talk to him and find out what his trouble was. He said that he was worried about the game, and had a hard time getting into it. I went over to calm him down. On his chest I noticed his college ribbon and I went over and asked him to tell me about them. He related many amusing incidents about the experience. About a heavy center in the Southwest Pacific. The most amusing was when they were in heavy traffic with the ship, and a lucky enemy hit tore off 175 feet of the ship's bow. Can you imagine this young fellow fretting about a football game? But they do for they take it very seriously and that's the way it should be.

So we had to show what a family we would have to pay because of incurrence. Later letters could be over this and making up will make my job. On the other hand, those youngsters might have relations when they are in a difficult situation. We hope was that they would not tear apart at the seams, but remain steady to pull themselves out of last year.

Finally, we were pleased with the '44 Badgers

Northern Ohio

Northern Ohio alumni held a luncheon meeting in Cleveland recently in connection with the National Metal Congress session held there. Dean T. Ellis Johnson and Prof. George Barker of the College of Engineering were special guests at the meeting.

Milwaukee Alumni

The Milwaukee Club has prepared a printed program of the events scheduled on their 1944-45 calendar and has sent them to all members of the group.

The program includes luncheon football meetings with movies and commentary by George Fox, end coach; monthly meetings with guest faculty members as speakers; and the regular Founder's Day dinner in February.

Officers of the club are H. J. Schwahn, president, Eugene C. Meng, and George Grabin, vice presidents, R. H. Myers, secretary, and Harold A. Peterson, treasurer.

The Story behind one Victory Membership

From Italy came the following letter: "When our boys began to receive their Army Institute courses from Madison, I felt proud of my school.

Having had almost two years' opportunity directly to witness the effects upon good human material of education for death, I have been deriving solid satisfaction from the knowledge of the expansion and dissemination throughout the world of education for life. Our great schools can now carry the torch of true learning to the institutions which once helped kindle the flame for us.

On, Wisconsin!
Enclosure—Victory membership dues."
SGT. SOLLIS J. SCHUB, '36

A 1000 lire note of Italian Invasion Money
This equals ten dollars, the cost of a victory membership

"THIRD RATE COLLEGE" . . . Dan Hoan, '05*

Wisconsin is now a "third rate college", according to a statement made recently by Daniel W. Hoan, '05, in speaking to a Madison audience. Dan also suggested that the board of regents appointed by Governor Heil was largely responsible for this deterioration at the University of Wisconsin; too many industrialists on this board, he claimed.

Let's look at both of these claims for a moment. First, let's take a look at this board of regents that Mr. Hoan says was overloaded with industrialists.

The board of regents has ten members: nine are appointed by the governor, and the state superintendent of public instruction serves as the tenth member, ex-officio. Governor Heil's nine appointees were—

Frank J. Sensenbrenner, president of the Kimberly-Clark Corp.

A. T. Holmes, B. A., '09, La Crosse attorney.

Michael J. Cleary, LL. B., '01, president of the Northwestern Mutual Life Insurance Company.

A. Matt Werner, Sheboygan attorney.

Leonard Kleczka, Milwaukee attorney.

Herman L. Ekern, LL. B., '94, Madison, insurance attorney and counselor.

Mrs. Barbara Vergeront, B. A., '06, Viroqua.

Walter J. Hodgkins, S. S. '15, Ashland, president of the Lake Superior District Power Company.

A. J. Glover, Fort Atkinson, Hoard's Dairyman.

A glance at this list shows clearly that the industrialists are very much in the minority. Lawyers are in the majority, and the other members come from widely scattered fields—insurance, farming, public utilities and publishing.

Board Replacements

During Governor Goodland's administration, three changes have been made in the membership of this board. Herman Ekern, Mrs. Barbara Vergeront and A. J. Glover have been replaced by the following regents: William J. Campbell, Oshkosh lumberman; Daniel Grady, Portage attorney; and John D. Jones, Jr., Racine county farmer. Even with these changes, the industrialists are still in the minority, so Mr. Hoan's second claim is not supported by facts.

Now let's look at his first claim: the University of Wisconsin has descended to a "third rate college".

Such statements are too important to be made without supporting evidence. As an alumnus, Mr. Hoan should not make such claims unless he has the facts to prove them. We suspect he would have a tough time to find such facts.

Three factors determine a University's greatness: faculty, student body and physical plant.

Wisconsin will never become a third rate institution as long as our faculty has Bill Kiekhofler, Frank Holt, E. B. Fred, Olaf Hougén, Helen C. White, Chester V. Easum, Matty Mathews, W. H. Twenhofel, Gladys Borchers, Mark Ingraham, Frances Zuill, Larry Graber, Blanche Trilling, John Guy Fowlkes, Conrad Elvehjem—and a host of other leaders in every department of the University.

There's nothing wrong, either, with the students on our campus. Their record as Fighting Badgers proves this.

206 have already made the supreme sacrifice. Each year the cream of the high school senior classes comes to Wisconsin.

Buildings Below Par

This brings us to the third factor: our physical plant and equipment. Here, unfortunately, Mr. Hoan hits the nail squarely on the head.

These conditions, however, are not the fault of the board of regents. This board started its work in 1939, just after the University's appropriation for 1939-41 biennium had been slashed almost a million dollars.

Shortly after taking office in 1939 the regents made an intensive study of the University's building needs. Every building was carefully studied and the needs of each department surveyed and analyzed. Based on these facts, the regents presented a comprehensive building program to the 1941 legislature and urged that legislative action be taken to get this construction program underway. Several bills were introduced to provide new buildings, but none received legislative approval except one: \$200,000 for short course dormitories. War time priorities, of course, made it impossible to erect this building.

During the 1943 legislature, the regents again asked the legislature to provide funds for a University building program. Again, the legislature adjourned without providing for this building program. The regents have done their part, but they are stymied as long as the legislature fails to act.

So far, Wisconsin has remained a great university in spite of these obsolete buildings. Each year, however, these antiquated structures become greater and greater handicaps. Each year they make it increasingly difficult to carry on the teaching and research that characterizes a great university.

Wisconsin has a distinguished faculty and a splendid student body. It has some fine buildings, but new buildings are needed badly. It's up to all Wisconsin alumni, Dan Hoan included, to support the University's building program so that Wisconsin will never become a "third rate college".

—JOHN BERGE.

* Mr. Hoan was granted an honorary degree, LL. D., in 1939.

HOMECOMING

Wisconsin celebrated (by a good time though not by victory,) its third wartime Homecoming, the 34th of an unbroken sequence, in a game Ohio State won 20-7. The week-end of October 14th was probably the earliest date that Homecoming has been held in many a year.

In keeping with the wartime atmosphere so evident at this predominantly co-ed campus, the entire Homecoming schedule was planned to honor the Fighting Badgers and Fighting Buckeyes, particularly those former students of both schools who are counted among the honored dead and missing of World War II.

The traditional pep rally on Friday night was held, but the usual bonfire (which took the form of a scrap heap last year) was not attempted. Enthusiasm was limited to the meeting itself at which Coach Harry Stuhldreher, Acting Captain Bob Hecker, and Ed Sprague, who broadcast the game to Columbus, Ohio, were speakers. The university band was out too, and an approximate 3,000 students attended. After the game it was reported that students made their annual march up State street, but those in attendance claimed that the marching contingent was comprised chiefly of high school students. More refined celebrants attended the band concert held in the Union right after the pep rally.

Many also walked up and down Langdon Street to see the decorations on the sorority houses and dormitories. It was quite unanimous that Kappa Delta really had the winner, with their enormous bassinet and array of diapers all labeled in accordance with the caption, "You need a change, Ohio."

Unfortunately, though a change was needed in Ohio State's unbroken record, it was not accomplished at the game Saturday afternoon. Spectators marveled at the skill the under-dog Badgers used to score against Ohio State and also to hold them until the last few minutes of play.

Still No Red W

After a blackout of three years it was announced that once again the lights playing on the dome of the capitol would be turned on. For the last two years there has been no red W atop the capitol to welcome alumni returning for Homecoming.

Gov. Walter S. Goodland revoked the order put out by former Gov. Julius P. Heil shortly after Dec. 7, 1941 which called for the blackout. So, it was expected that the red W would be turned on again in time for the Homecoming game.

But, the W did not appear. The order had been revoked too late. There was not time to install the necessary wiring.

During the half, Gold Star Badgers were honored by a tribute in verse which was accompanied by music. Richard Church of the music school read the tribute while the band formed a huge star on the field and while the Navy V-12 chorus massed at the north side of the stadium and sang appropriate accompaniment.

The football program listed all former W men who are now in service, and the honor roll of those killed in action or missing in action was read just after the tribute.

A beautiful warm afternoon welcomed some 40,000 people to Camp Randall and the sun shining on the service sections reflected sparkling gold belts and brilliant white caps. Last minute attempts to get tickets were rather difficult, and at least one man was foiled in his attempt to sell seats at above ceiling prices when he tried his scalper's technique on a detective in a downtown hotel. The Alumni Association

was favored with a number of returning Fighting Badgers who stopped in for tickets they had ordered in advance. One lieutenant wired the office for tickets upon his arrival in New York after an eighteen month stay overseas.

Though the theme of the week-end centered around our servicemen who are alumni and former students, several soldiers from Pennsylvania who are stationed at Madison's Truax Field caught the mood prevailing and contributed a catching melody to the success of the week-end. Their song "Reunion at the Union", was featured at the Homecoming Ball, sung by Sgt. Ed Singer, who has sung it many times on the "Truax Field Calling" radio program. The composers of the song are Corp. Edward Krushinski and Staff Sgt. Gerry Lestz, and while "Reunion at the Union" means one thing to them, it means quite a different thing, though equally important to all Fighting Badgers and Homecoming celebrants.

At the half of the game it was announced that all servicemen were invited to attend the Homecoming Ball which the Wisconsin Student Board sponsored. The party decorations carried over the theme of honoring our Fighting Badgers. Ray Patterson, chairman of the week-end, and his Queen, Theta pledge Mary Lou Peyla, could enjoy themselves fully in the realization that all had gone off smoothly according to schedule.

By Sunday evening the last of the visiting alumni were waiting in depots and crowding into trains, talking among themselves about what a good time they'd had, and wondering whether or not next year's Homecoming would mark a return of alumni who served their country in a war just won.

Our Guest Book at Homecoming

As many Fighting Badgers as could, arranged their leaves in order to return to the campus for Homecoming.

Among those who signed our guest book during the week preceding Homecoming, are the following:

Staff Sgt. Philip B. Korst, '42, who had just flown back from India and was on his way to Officer Candidate School.

Lt. Burleigh E. Jacobs, Jr., USNR, '42, who had just returned from Hawaii.

1st Lt. Arthur H. Voss, '42, on leave from Ft. Douglas, Utah.

Lt. (j.g.) Milton Fredman, '42, on leave after 14 months of anti-submarine patrol duty on the Atlantic. His ship is a private yacht which the navy has taken over.

Staff Sgt. Gerald Lestz, Cpl. Ed Krushinski

Present their song, "Reunion at the Union" to Anne Boegholt, Union president

Want to please your mail man?

Then please drop us a card with your new zone number included in your address. We know where you live, but we don't know the postal zone. Now that zone numbers are here to stay, we really ought to know what yours is. And your mail man would be more than appreciative.

IN LINE OF DUTY

They Gave Their Lives So That Freedom in This Country and Abroad Might Not Perish

2nd Lt. Warren G. RAESE, '43, son of Gustave F. Raese, 101 Twelfth St., Wausau, was killed in action over Germany June 21. He enlisted in the army air corps March 19, 1943 and received his commission and wings at Lubbock Field, Tex.

★

Cpl. Kurt D. MEYER, '40, son of Chas. Meyer, 3247 N. Bartlett Ave., Milwaukee, was killed in an airplane crash Sept. 11 in France. He served as a teletype operator with an air corps ground crew in North Africa, Italy and Corsica.

★

Pvt. Olney A. DANKS, '39, son of Dell Danks, Stoughton, was killed in action in France July 11. He entered service in Nov., 1943. He is survived by his wife, Ruth and daughter, Barbara Ann, 22 months.

★

Capt. Don R. URQUHART, '43, son of Norman Urquhart, 131 South 3rd, Medford, was killed in Corsica on July 20.

★

Lt. Kenneth J. CALLIGARO, '44, son of Mr. and Mrs. Bert L. Calligaro, 2660 N. 18th St., Milwaukee, was killed in action in France. He had been reported missing in action in August. Lt. Calligaro was the center figure in a transfer of captured German nurses from the American to the German lines near Cherbourg in July. He had received his commission in Jan., 1943 and went overseas in March.

★

Cpl. Kenneth L. MARTINSON, '44, son of M. A. Martinson, Hayward, was killed in action.

★

Capt. Robert S. WILSON, '36, native of Sterling, Kans., and husband of Nannie Diehl, Long Beach, Calif., was killed in action in Belgium. Capt. Wilson was stationed with the supreme Allied headquarters in London, England, before going to the continent.

★

1st Lt. Harley E. KLEIST, '42, son of Mr. and Mrs. Charles Kleist, Lake Mills, was killed in infantry action in France Sept. 18. His wife is the former Janet Brockhaus, Milwaukee. While at the University he played guard on the basketball team in 1938, 1939 and 1940.

★

Lt. Eugene N. DILLE, '38, son of Mr. and Mrs. Roy Dille, 157 E. McWilliam St., Fond du Lac, was killed in action in France, Sept. 11. Lt. Dille had been overseas with the infantry for two years in Ice-

land and France. He was a member of the University boxing team in 1936 and captain of the swimming team in 1938.

★

Capt. Frank J. FISCHER, '31, son of Mrs. Rose Fischer, 1315 Laurel Ave., Janesville, was killed in a plane crash Sept. 22. Prior to entering the service in 1941, Capt. Fischer had practiced medicine in Cleveland, where his wife, Martha Forbes, '34, and their four children are living. He had been stationed in army hospitals at Mitchell Field, N. Y., Randolph Field, Tex., and in Washington, D. C.

★

1st Lt. John F. PRITZLAFF, '38, son of Mr. and Mrs. William Pritzlaff, 710 Clyman St., Watertown, was killed in action in France July 12. His wife, Mary, is living at 2362 N. 59th St., Milwaukee. Before entering the army he had been employed by the Wisconsin Electric Power Co., Milwaukee.

★

Pfc. Harold R. FRAUENHEIM, '38, Random Lake, was killed in Italy August 13. He was assistant district attorney of Sheboygan county before entering service. He is survived by his wife, Vivian.

★

Capt. Richard W. STONE, '42, son of Mr. and Mrs. J. Riley Stone, Baraboo, died of wounds received in France, Sept. 8. His wife is the former Lucille Kay. He had been with an infantry unit.

★

1st Lt. Gerald R. ANDERSEN, '44, son of Mr. and Mrs. James J. Andersen, 416—6th St., Neenah, was killed in action May 29. His death was reported by the German Government through the International Red Cross. He had been a navigator on a B-24 and reported missing on May 29. Lt. Andersen had completed at least 38 bombing missions, many over the oil fields in Rumania.

★

Lt. John M. CATE, '39, son of Mrs. Walter S. Cate, Stevens Point, formerly of Ashland, was killed in action on New Guinea on Sept. 10. Lt. Cate had been attached to an infantry unit and wounded twice before. After the first injury he was awarded the Purple Heart and the second time, an Oak Leaf Cluster.

★

Lt. Charles R. WERNER, '43, son of Mr. and Mrs. Fred M. Werner, Sun Prairie, was killed in England Sept. 17. He had graduated from the advanced navigators' school at Hondo, Tex. Feb. of 1944 and was sent overseas in Aug. of 1944.

MISSING IN ACTION

Maj. Gordon K. SMITH, '38, has been reported missing in action in the European area. He was with a paratroop unit. His wife, Martha, lives at 91 Hamilton Place, Fond du Lac, Wis.

★

Capt. Charles R. HOWELL, '41, has been reported missing in action in the China-Burma-India theater. He was with a bomber group. He is the son of E. L. Howell, 1801 Cumberland St., Rockford, Illinois.

★

1st Lt. Leonard L. HILSENHOFF, '43, son of Mr. and Mrs. T. E. Hilsenhoff, 1038 Williamson St., Madison, has been reported missing in action over Germany since Sept. 9. He was a pilot of a Flying Fortress, and had received the Air Medal for flights over Germany.

★

1st Lt. Charles W. GILMORE, '38, has been reported missing in action over Holland since Sept. 17. He was pilot of a C-47 transport plane and had piloted one of the first troop carriers over Normandy on D-Day. His wife, Jean, lives at 4250 N. Woodburn St., Milwaukee.

★

Flight Officer Frederick P. OTTO, Jr. '45, has been reported missing in action following a bombing mission over Germany. He had been stationed in Italy and was a navigator on a Flying Fortress. This was his first mission. He is the son of Mr. and Mrs. Frederick Otto, Prairie du Chien, Wis.

★

Lt. Roger L. BERNARD, '46, has been reported missing in action over Germany since Sept. 9. He was a navigator on a Flying Fortress and had won the Air Medal. He is the son of Mr. and Mrs. John Bernard, Viola, Wis.

PRISONER OF WAR

R. Don WENDROFF has been reported a prisoner of war held by the Japanese since the fall of Manila. No direct word from him had reached his parents since then.

BOOMER, PhM 2/c is at Shoemaker, Calif. Pfc. Joseph M. BRADLEY reports from the Aleutians "This place is a desolate wasteland which has no beauty whatsoever. There isn't even a tree here, just grass. And there are no women to remind you of home and civilization." With the Marines at FPO,

1st Lt. Kenneth Palmer, '43
Finished 50 missions as B-24 navigator

Frisco is James A. CARMAN, PhM 2/c. Cadet Edward COLBERT of the navy air corps is in Minneapolis getting further training in cross country flying. Pfc. David D. DRAVES just newly wed, is stationed at Camp Howze, Tex. Lt. John R. DUCKWITZ has arrived at a 15th air force P-38 Lightning base to begin combat flying against the Axis. Cpl. Donald B. EASUM has an APO, San Francisco. Former UW athlete, Lt. Edwin J. HELMICKS is now an army air force pilot. Walter J. KRAUS, V-12 at N. Carolina Univ. has won an appointment to Annapolis. Lt. Warren E. LOEHN-DORF is with a combat crew det. at Gulfport, Miss. Pfc. Ben B. PRESTON was awarded a medal for volunteering as a scout into enemy-held territory in the South Pacific. Pvt. Paul TRUAX is receiving further training as a gunner on a P-29 at Pratt, Kas. Lt. John C. LUDDEN was just awarded wings of a pilot at Napier Field, Ala. With one of the oldest P-38 Lightning Fighter groups of the 15th AAF is Lt. Alan V. MOHR. It's APO, N. Y. for Joseph J. SINISKY with an Engineering Maintenance Co.

Rear Admiral

Ingolf N. Kiland, x '16, has been promoted to rear admiral in the navy and is now on duty as commander of an amphibious group in the Pacific.

Ironically, Kiland, as a lieutenant in the last war, was complimented by the Empress of Japan for his part in the saving of Japanese subjects who were torpedoed in October 1918. Kiland was on the destroyer Sterrett at the time.

In this war, Kiland, known to his friends as "Ing", was awarded the Navy Cross when the task force he commanded successfully countered a Jap night torpedo plane attack in the Solomons.

Kiland attended the university as a freshman and then graduated from the U. S. Naval Academy at Annapolis in 1917.

BADGER MAILBAG

(Continued from page 2)

France—

I have been enjoying grandstand seats on hills overlooking numerous battlegrounds, throwing artillery fire where and when it is needed, rounding up some of the slower Germans who can't or don't want to move fast enough to get out of our way, and generally doing little odd jobs. We passed up about 70 enemy vehicles yesterday abandoned so quickly that they had no time to destroy them. Among them were several civilian vehicles, red leather push button top, jobs that we have been running around in all day today. In order to get a car all you have to do is drive it away. When we leave to push forward we'll leave them with the rear guard to give to the Free French as they aren't as mobile as our own four-wheel drive vehicles. But it surely is an easy way to secure a high priced car."

CAPT. L. DEWITT ATKINSON '41

* * *

Guadalcanal—

"Hardly a day goes by but that the Seabees in this battalion realize the importance of the University of Wisconsin. They are instituting a comprehensive educational program; many have begun USAFI courses. Interest is so high that a "schoolhouse" is under construction—only the roof remains to be built. It's a 16 x 50 tent. I've been taking a course in conversational Spanish, hoping that it might prove helpful with the civilians in the Philippines. Our Filipino stewards discount its usefulness with the statement that English would get better results."

LT. (jg) ARTHUR H. WORMET, '42

* * *

Italy—

"Another fellow and I were able to spend a five day leave in Fez, a delightful place to be. As soon as we stepped inside the walls of the Arab part of town, we were as though transported back about six centuries. One of the first things we heard was the mournful sound of chanting, virtually indistinguishable from that I heard at the only Arab funeral procession we witnessed. But this time it was not a funeral; it was a Koranic school, attended by boys from the ages of about five to ten. During these five years they do nothing but memorize the Koran, without learning to read or what they are memorizing means. The last hour of each morning and afternoon session they do their chanting in unison, as we heard it, and the rest of the time it is every pupil for him self. You can imagine the babble at such times."

LT. ROBERT B. HOLTMAN, '35

* * *

Southwest Pacific—

"An Australian soldier here and I exchanged views on the relative merits of rugby and football, and the result was a stalemate. He alienated any affection I had for him when he crudely said something about football being a "stupid game with everyone bumping heads together". I choked back my angry words and as calmly as I could, I told him that rugby was child's play where brains were desirable but totally unnecessary. On the whole I rather like the Aussies, but that particular fellow was on the stubborn side. I saw the game of rugby and it is fairly interesting, but does not have the intricate plays and the wonderful timing that football does.

CPL. CARMINE PAPARA, '41

TRAILING THE BADGERS

Mrs. Krueger Dies

Mrs. Sophie Schmedeman Krueger, oldest former student at the university, died Oct. 19 in Minneapolis, just one month after celebrating her 100th birthday.

Mrs. Krueger, the mother of seven children, outlived all but one of them and always regretted that she had been forced to leave school before obtaining her degree because university authorities thought her health would break if she continued her lively pace.

Last month the Minneapolis Alumnae club's president, Mrs. William R. Marsh, and its remembrance committee attended her 100th birthday party and reported that it was an inspiration to find her mind so alert and her retrospections regarding Wisconsin so interesting.

1878 W

Mrs. Fred B. SEVILLE (Rosalie Knutson) who made her home in Berkeley, Calif. until a few years ago, died Sept. 23. She was the mother of Mrs. Harry LAMB (Flavia Seville, '09) who resides in Oklahoma City, Okla.

1887 W

Mr. and Mrs. John H. GABRIEL (Mina Stone, '85), Denver, Colo. celebrated their fiftieth wedding anniversary on September 11.

1890 W

Mrs. Winfield R. SMITH (Susie Wegg) died in New York City on July 25.

1893 W

Lavold is stationed in Rochester as financial analyst for the Price Adjustment Board and Asst. Demobilization officer for the Rochester

Distinguished Scientists

Wisconsin alumni rank high in the field of science, according to a survey taken from the 1944 edition of AMERICAN MEN OF SCIENCE. The following alumni were not only mentioned in the book, but their names were starred to indicate that they are "distinguished in research":

Botany

- George S. AVERY, Jr. Ph.D. '27
Charles DRECHSLER, B.S.A. '13, M.S. '14
G. W. KEITT, M.S. '11, Ph.D. '14
A. J. RIKER, Ph.D. '22

Chemistry

- Ralph CONNOR, Ph.D. '32
Arthur C. COPE, Ph.D. '32
Karl FOLKERS, Ph.D. '31
J. L. ONCLEY, Ph.D. '33
G. K. ROLLEFSON, B.A. '20, M.A. '21

Geology

- Wm. O. HOTCHKISS, B.S. '03, C.E. '08, Ph.D. '16, L.D. '37

Physics

- R. G. HERB, B.A. '31, Ph.D. '35
D. W. KERST, B.A. '34, Ph.D. '37

Physiology

- C. A. ELVEHJEM, B.S.A. '23, M.S. '24, Ph.D. '27

Zoology

- H. W. BEAMS, Ph.D. '29
Alan BOYDEN, B.A. '21, Ph.D. '25
C. L. TURNER, Ph.D. '18

Ordinance Dist. . . . Irene VARNEY, Ft. Atkinson, married Oscar H. METKE, Ft. Atkinson, on Oct. 14. Mrs. Metke has been librarian at the Dwight Foster library in Ft. Atkinson.

1933 W

Burke F. FLICK, Racine, disabled veteran of World War II, has been appointed justice of the peace. Prior to military service, Mr. Flick was attorney for Deer Lodge county, Montana . . . Edwin B. The "electrical brain" which is attached to our anti-aircraft guns causing them to spot enemy planes and steer the gunfire to them, is the invention of a young Wisconsin scientist, DR. DAVID PARKINSON, '33.

Technically known as the M-9 electrical gun director, the device originated in a dream Dr. Parkinson had in 1940. That dream has been converted into a nightmare for the Axis.

Dr. Parkinson, originally from Green Bay, took his doctorate in physics in 1937, after which he became associated with the Bell Telephone Laboratories and was assigned to acoustical research.

In 1938 he was married to Alberta M. Steinfeldt, Green Bay, a member of the class of 1939. Dr. and Mrs. Parkinson and their two sons live in Maplewood, N. J. now.
