The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

Annual Research Reviews

COMPLETE LITERATURE SEARCHES AND MORE!

- **DETAILED/OBJECTIVE** critical monographs of recent advances in medicine - 95% of all published papers (from Index Medicus) reviewed by authors for each one year period.
- **SERIAL** publications - a new review appears each year in most cases - where the rate of publication is less, reviews may be published biennially or triennially.
- **ECONOMICAL** - considerably less expensive than a literature search for considerably more information. Each review lists all titles, all authors, and all first and last pages of the articles reviewed.
- **QUICK PUBLICATION** - ARR's are published within 4-6 months of receipt of typescript which ensures the most up-to-date information available.
