# REPORT

OF THE

## STATE BOARD OF CONTROL.

---

HON. EDWARD SCOFIELD,  
*Governor of Wisconsin.*

GOVERNOR:—The State Board of Control of Wisconsin Reformatory, Charitable and Penal Institutions respectfully submits its Fifth Biennial Report covering the term ending September 30th, 1900, containing statements of the facts and conditions which the statute (R. S., sec. 561*d*) requires shall be contained therein. These will be found chiefly in the statistical tables the Board has the honor to submit to you as a part of its report.

The Board also submits the last biennial reports of the chief officers in immediate charge of the State Institutions under its direct control, which reports will be hereto annexed. These reports contain much valuable information of the operations of those institutions during the term and the present condition and wants of each. The Board begs leave to refer to them for specific information on those subjects. No other extended consideration thereof is necessary or will be attempted in this report, although some special observations along the same lines may be admissible.

The State Institutions governed directly by the Board are the following: The State Hospital for the Insane at Mendota, The Northern Hospital for the Insane at Winnebago, The School for the Deaf at Delavan, The School for the Blind at Janesville, The

---

*General Report.*

---

Industrial School for Boys at Waukesha, The State Prison at Waupun, The State Public School for Dependent and Neglected Children at Sparta, The Home for Feeble Minded at Chippewa Falls and the Wisconsin State Reformatory at Green Bay.

These institutions are managed and operated by 632 officers and employes at an aggregate expense for salaries and wages, exclusive of subsistence, of about \$21,000 per month. The number of inmates in those institutions on September 30th, 1900, exclusive of officers and employes, aggregated 2,784. Besides these there were absent from the institutions on paroles or leave of absence 2,016 persons who had been inmates thereof and were liable to be returned thereto at the discretion of the respective Superintendents without further judicial proceedings. Those from the State School for Dependent and Neglected Children have been placed in families under contracts for their maintenance and education as required by law, but still liable to be returned to the school. It is not probable that more than twenty-five per cent. of the persons so absent will ever be returned to the institutions.

The number of such persons belonging to each institution is as follows:

State Hospital for the Insane.....	342
Northern Hospital for the Insane.....	262
Industrial School for Boys.....	352
State Public School.....	1,038
Wisconsin State Reformatory.....	22
Total .....	2,016

We refer to the reports of the respective Superintendents for valuable information concerning such former inmates.

The Board believes that, in the main, all these institutions are in very good condition and that the governing officers are making diligent and intelligent efforts to improve the discipline therein, to increase the efficiency of the service, and to promote in all practicable ways the best interests of the State and the welfare of the inmates for whose custody and care the institutions are maintained.

---

*General Report.*

---

## CURRENT EXPENSES.

The appropriation year of the respective state institutions is not coincident with the fiscal year. That of the two hospitals for the insane, of the Industrial School for Boys and Home for Feeble Minded commence January 1st; of the Schools for the Deaf and Blind, the State Prison and the State Public School, March 1st; and the State Reformatory April 1st.

The last Legislature appropriated to these institutions for current expenses, including painting and necessary repairs, for the two years commencing on the above dates, respectively, in the year 1899, the following sums: State Hospital, \$135,000; Northern Hospital, \$165,000; School for the Deaf, \$85,000; School for the Blind, \$65,000; Industrial School for Boys, \$115,000; State Prison, \$70,000; State Public School, \$35,000; Home for Feeble Minded, \$75,000, and State Reformatory, \$100,000. Total for two years, \$895,000. These sums are exclusive of certain other resources, accruing mainly from taxes upon counties for the benefit of some of these institutions, and the proceeds of certain industries carried on in the State Prison, amounting by estimate to \$404,238. Total known and estimated current expense resources of all the institutions for the two appropriation years ending at the above dates in 1901, \$1,299,238.

The above appropriations for current expenses are based upon estimates submitted by the Board to the Governor and Legislature, and were believed to be as low as they could safely be made without entirely exhausting the Current Expense Fund of any of the institutions. They were made upon the basis of current expenses for former years. No allowance was made for the fact that the market price of nearly all commodities used in the institutions was increasing and likely to go much higher, as such prices afterwards did. The Board acted upon the belief that by purchasing supplies in the open market upon competitive bids it could save an amount of money as compared with the current

---

*General Report.*

---

expenses of former years, equal to the aggregate of such increase of values. In this view the result has shown that the Board was not mistaken, except it underrated the savings by the new mode of making purchases. The appropriations, which were thought when made to be very close to the danger line of deficiencies, have not only proved ample to supply all of the institutions, but the Board has been able out of them to make many improvements in the institutions, the cost whereof amounted to many thousands of dollars, which, although properly chargeable to current expenses, is usually paid from special appropriations. And still a considerable surplus of the appropriations to some of the institutions will remain unexpended at the close of the appropriation year, and will go to reduce the required appropriations to such institutions for the next two years in a sum equal to such surplus.

A more definite statement of the change of policy in the methods of purchasing supplies, and the demonstrable results of such change, will be found under the next head.

#### PURCHASE OF SUPPLIES.

During the last biennial term which commenced October 1, 1898, the Board has purchased many of the supplies, particularly staple articles, required by the several institutions, and has inaugurated the practice of making such purchases upon competitive bids. These purchases include coal, flour, meats, groceries, soap, toilet paper, machinery and electrical appliances, and frequently many other articles, especially lumber and other building materials of which the State is a heavy purchaser. Most of these purchases are made in the open market, without regard to the residence of the sellers. In all cases such residents are preferred to non-residents if the bids are substantially equal.

The principle upon which the Board has acted is, that in the absence of a legislative declaration of a different policy, it is

---

*General Report.*

---

the duty of the Board to observe the approved methods of business by purchasing such supplies in the cheapest market with little regard to municipal or State lines. Whatever sum is paid for a commodity above its fair market price is simply a donation of that sum to the seller. The law has not conferred upon the Board authority to donate the money of the State to individuals or corporations, either directly or indirectly. If that power exists it is vested in the legislature only.

The practice of the Board in the matter of purchasing supplies has been severely criticised by some of those citizens who were accustomed to sell supplies to the State. The point of such criticism is that those citizens are tax-payers of the State and ought to be preferred to non-residents who are not such tax-payers, even to the extent of paying a much higher price for the commodity than the non-resident would ask for it. The criticism is manifestly without merit for the reason that the excess of price must be paid by the other tax-payers of the State, a very large majority of whom never sell supplies to or deal with the State. Thus the great body of tax-payers would be required to make donations to the few tax-payers who might enjoy the patronage of the State institutions, receiving no return for their bounty.

The question of the best mode of purchasing supplies for the State Institutions was much considered by the Board during the last year of the biennial term ending in 1898, and the methods which now prevail were settled upon, and a commencement made in that year to put them in practice. It was found that abuses, expensive to the State, had crept into that branch of the public service. Many purchases were made without adequate knowledge on the part of the persons making them of the qualities of the commodities purchased, or without proper information of market values. In such cases the State was at the mercy of the sellers, and, of course, was usually the loser. Besides there were reasons to fear that some purchases were made of personal

---

*General Report.*

---

or political favorites without much regard to qualities or prices. It is believed that these abuses have been corrected by the present methods. That large sums of money have thereby been saved to the State is easily demonstrated by the comparative tables to be annexed hereto of current expenses for the last two biennial terms — the first of which is a fair average term showing the results of the old methods, and the last showing the results of the present methods of purchasing supplies. These tables also show the average population of the institutions during each year of these terms. As a matter of course the current expenses and the average population of the institutions are the essential factors in making the comparison of the relative expenses of the two terms.

Such population during the last three years remained substantially the same. During 1897 it was nearly two hundred less. Hence, for the purpose of the comparison the rate of expenses of that year should be computed on a per capita basis. The annual per capita in 1897 was \$225.45. At that rate the cost of maintaining 2,608 inmates for that year (which is the average of the other three years) would have been \$587,973,60. This, therefore is the rate of expenditure.

On the basis of the tables before mentioned the computation shows the following results:

Average number of inmates in all the state institutions governed by the Board in each fiscal year of the last two biennial terms:

*During the year ending Sept. 30th.*

In 1897	1898	1899	1900
2,414	2,615	2,617	2,593

Rate of Current Expenses in 1897, and current expenses in each of the other years of such biennial terms:

In 1897....	\$537,793 60	In 1899....	\$555,382 44
In 1898....	624,898 77	In 1890....	536,116 78
	<u>\$1,212,692 37</u>		<u>\$1,091,499 22</u>
	1,091,499 22		

\$121,183 15 Difference in favor of last biennial term.

---

*General Report.*

---

A computation on a per capita basis throughout, or on any other proper basis will give substantially the same result.

A comparison of the two years constituting the last biennial term with the current expenses in 1898 alone will show an increased comparative rate of reduction in current expenses during 1899 and 1900. But inasmuch as the current expenses in 1898 were considerably increased by the cost of replacing supplies destroyed by fire at the Industrial School in that year, it was thought more accurate to include in the comparison the current expenses in 1897, which were very moderate in amount. This mode of computation considerably reduces the difference between the current expense accounts of the two biennial terms.

It should be observed in this connection that the above figures do not cover all of the savings during the last biennial term, as compared with the preceding term, for the reason that the market price of all or nearly all the supplies purchased for the institutions were much higher during the last than during the former term. This difference in price has been overcome. Had prices remained unchanged the expenditures of the last term would have been many tens of thousands of dollars less than they actually and necessarily were, and the figures would have shown the savings for that term correspondingly increased.

The Board desires to say that it does not claim that all the above mentioned reduction of current expenses should be attributed to the better methods adopted for the purchase of supplies. Money has been saved in other ways. The services of an architect and of an electrical and mechanical engineer employed at quite liberal compensation, besides expenses, have been dispensed with. Such service is employed when needed, and its cost is now comparatively small.

The Board also thinks that money has been saved to the State, without impairing the efficiency of the service or the comfort or welfare of the inmates of the institutions, by increased care as respects qualities and prices, in purchasing such sup-

---

*General Report.*

---

plies as are usually purchased at private sale, and by closer consideration of the necessity for making proposed purchases. Yet after making due allowance for these conditions, a very large percentage of the reduction in current expenses may fairly be credited to the present methods of purchasing supplies.

This subject may be dismissed with the observation that the practice inaugurated by the Board in respect to the purchase of supplies is fully upheld by the statute authorizing and providing for such purchases. The mandate of that statute is "All materials and supplies shall be purchased at the lowest practicable price." R. S., Sec. 561*m*.

APPROPRIATIONS FOR SPECIAL PURPOSES MADE BY THE LAST LEGISLATURE.

By Chapter 294, Laws of 1899, the Legislature appropriated \$341,900 to the several state institutions governed by this Board for certain improvements specified in the law. Of this sum \$158,000 was appropriated to the Home for Feeble Minded for new buildings, equipments and supervision; and \$150,000 to the State Reformatory to continue the erection and furnishing of reformatory buildings. Of the remaining \$33,900 there was appropriated \$10,000 to the Northern Hospital for the Insane for new bath rooms and alterations of buildings, and the residue to different institutions for twelve other minor improvements.

These appropriations were, of course, payable out of the general fund in the State Treasury. But it transpired that the general fund was not only exhausted, but largely overdrawn. Hence, there was no money in the Treasury which could lawfully be used to pay the appropriations. This condition of the general fund continued a year after the enactment of Ch. 294 of 1899. Hence for the first year of the last biennial term the Board was unable, for want of funds, to make any of the improvements for which the money was thus appropriated.

---

*General Report.*

---

During the past year the condition of the general fund has so improved that the Board has been able, with your approval, to make most of the minor improvements before mentioned, and to erect and equip a bath house for each sex at the Northern Hospital. Such improvements are either completed or progressing to an early completion. The boilers and furnaces for the State Prison, and the duplicate engine and dynamo for the Home for Feeble Minded have also been purchased.

The Board with like approval has erected and equipped an additional dormitory at the Home for Feeble Minded of sufficient capacity for about one hundred inmates, which is now nearly ready for occupancy. The estimated cost thereof is about \$50,000 leaving unexpended about \$108,000 of the appropriation to that institution.

The Board is also erecting a building for shops, dining room and other purposes at the State Reformatory at an estimated cost of the building and for furnishing thereof of \$35,000. This leaves about \$115,000 unexpended of the appropriation to the latter institution to continue the erection and furnishing of reformatory buildings. The building thus being erected will considerably increase the capacity of the Reformatory which is already nearly filled to its present capacity.

The pressing necessity for additional buildings at both the Home for Feeble Minded and the Reformatory is fully shown in the annexed reports of the Superintendents of those institutions respectively. You have recently assured the Board that, doubtless, the condition of the general fund will permit the Board to make contracts for the erection of such necessary buildings during the spring and summer of 1901, the cost being limited to the unexpended balance of such appropriations unless the Legislature directs a larger expenditure.

It is the present impression of the Board that the expenditure at the Home for Feeble Minded should be for additional dormitories for inmates, congregate dining room and a school house; and at the Reformatory to complete the north cell wing, which

---

*General Report.*

---

when completed will have a capacity for 300 inmates, instead of about 104, which is the capacity of the portion already erected.

## INSPECTIONS.

The annual inspection of county jails, lock-ups and poor houses; of municipal police stations, prisons and houses of correction, and of incorporated hospitals, industrial schools and asylums, as well as all other charitable and correctional institutions aided by the State, have been made, or are in process of being made, and will be substantially completed by the close of the present year. The inspection year terminates with the calendar, instead of the fiscal year. These inspections of minor county institutions have been and are now being made by persons appointed by you under Section 562*a*, R. S., to make investigation of those institutions. The late Attorney General gave the Board an opinion, upon which it is acting, to the effect that it might lawfully accept the reports of such investigating agent as a compliance with the statutes requiring such inspections.

The Board has, or members thereof have, during the biennial term just closed made monthly inspections of the State Institutions governed by it, and quarterly inspections of the County Asylums for the Chronic Insane, as required by law. A committee of the Board has also under like requirement visited and inspected the Veterans' Home at Waupaca semi-annually and made due report thereof to you. The last of these inspections of the Home was made in September last. It disclosed no material change in the condition of the Institution affecting the welfare of the inmates or the interests of the State.

## APPOINTMENT OF OFFICERS IN THE SEVERAL INSTITUTIONS.

It is common knowledge that in former years there was much outside interference with the appointment of officers and employes in the various State Institutions governed by this

---

*General Report.*

---

Board. It frequently occurred that men holding important official positions therein were appointed without consultation with the Superintendents of those institutions, or against their wishes, and even against the best judgment of members of the Board of Control. It is not the purpose of the Board to trace the causes which led to this condition, or to censure any particular person or class of persons therefor. It is sufficient to say that it proved disastrous to the public service. The fact that an officer, or employe owed his appointment solely to some person or class possessing greater power or influence than the Superintendent and Board charged with the responsibility of governing and operating the institution naturally produced on the part of such employe indifference to the authority of the Superintendent and Board, sometimes contempt thereof and rebellion against any attempt to exercise such authority. Yet, the Superintendent and Board were held responsible for the injury to the institution inevitably resulting from such disloyalty.

The evil became almost intolerable in some of the institutions and it seemed quite impossible to correct it without positive legislation along the lines of practicable civil service rules. However, after an investigation of the management of the Industrial School at Waukesha, ordered by you, which showed how deep set was the evil and how disastrous its effect upon the public service, the Board addressed a communication to you asking that you suggest the name of some capable man for the position of Superintendent of that Institution, which was then about to become vacant and that you make to the Board such suggestions as you might deem desirable.

Your reply dated September 27, 1897, has had a controlling influence for good in the matter of these appointments. You there said:

"I have no one in mind to suggest for the position, and do not feel that it would be proper for me to make the suggestion if I had one; furthermore, I have confidence that your Board, upon which solely the law places the responsibility for the

---

*General Report.*

---

management of the State Charitable and Penal Institutions, understands clearly what is required, and will make a fit selection. I know the members of your Board will agree with me that fitness only should govern in the selection of persons to fill positions in the institutions under your control. The welfare of the institutions demands, and the people of the State expect first of all that the persons selected to positions in those institutions should be competent in all ways to fill them. This does not apply merely to the heads of institutions, but to all employes, and I believe it will tend to improve the character of the public service if your Board will make it known to those who seek such employment that competency to fill the position sought must be the first and chief recommendation of every candidate."

This reply relieved the Board from many embarrassments it had theretofore encountered in the way of making appointments upon correct principles, and from that time forward it has endeavored to establish a procedure which will effectually put in practice your wise advice that all appointments in our institutions should be made solely on the merits of the appointees. In these efforts the Board has always had your earnest support. The Board thinks it has achieved a good measure of success in its efforts in that direction, which, without such support, would have been impossible.

In order to establish and confirm the merit system of appointments it became necessary to systematize and in some respects to change the methods and principles by and upon which appointments had theretofore been made. After careful consideration, and after making some practical tests, the Board reached the conclusion that the object sought could be best attained by providing that all appointments, which the law requires the Board to make, should be made only on nominations by the chief officers of the respective institutions; that such officers should have the power to suspend and in some cases to remove any such subordinate for cause; that the term of office which in some

---

*General Report.*

---

cases is fixed at one year by statute should be made one year in all cases; and that the power to appoint or employ all other subordinate officers and all employes, and to remove or discharge the same, should be vested in such chief officers respectively. These provisions ensure the appointment of subordinate officers and employes having the confidence of the chief officer who is primarily responsible for their conduct, and gives him power to discharge or relieve them from service if they prove incompetent or unfaithful. Also, once a year at least, it subjects all subordinate officers to the liability of being dropped from the service without removal. The principle of these provisions is that the chief officer of any institution has the best possible means of ascertaining the capacity of his subordinates and the greatest possible interest in securing competent and trustworthy assistants for whose conduct he is held responsible. Hence, in selecting such assistance he is less liable than almost any other person would be to make an improper choice. The foregoing views of the proper procedure in making these appointments are enforced in an order made by the Board, which will be appended hereto and marked No. 1. This order is being faithfully executed and with satisfactory results.

LIMITATIONS OF SALARIES OF OFFICERS AS AFFECTING THE SUBSISTENCE IN THE SEVERAL INSTITUTIONS OF THE SUPERINTENDENTS AND THEIR FAMILIES.

Section 561*l*, R. S., provides that the salary of no officer in any of the state institutions in charge of the Board shall exceed twenty-five hundred dollars per annum. This statute was first enacted in Ch. 298, Laws of 1881. When that statute was enacted and before, and during all the time since, the Superintendents of all those institutions, and their families have been and still are subsisted at the expense of the State. Such subsistence in most cases includes food, rent, house furnishings, fuel, lights, medical and domestic service, use of carriage, car

---

*General Report.*

---

riage team, equipment and driver, and unrestricted entertainment of guests. Considering the cost of all these as a part of the officer's salary, it increases the salary of several of the superintendents to a figure much in excess of \$2,500 per annum, each, for the fixed salaries of two of the superintendents is \$2,500 per annum, and of four others \$2,000 per annum, each. The Board has been unable to find any express provision of statute which authorizes such expenditure for subsistence of an officer's family to an amount which, added to the fixed salary of the officer, exceeds \$2,500 per annum, except in the case of the Warden and Deputy Warden of the State Prison. R. S., Section 4890.

In view of the uninterrupted usage above mentioned it is quite obvious that the cost of such subsistence has not been regarded as "salary" but as a mere perquisite incident to the office and not increasing the salary of the officer within the meaning and intention of the statute. This view obtains some support from the fact that in Sec. 4890 above cited, such family subsistence is, by implication at least, referred to as a "perquisite." However unsatisfactory this construction of the statute may be to a lawyer, the unchallenged acquiescence in such construction for twenty years is entitled to much weight. At any rate the Board deemed it sufficient to prevent any attempt on its part to change the existing conditions without some affirmative action of the Legislature calling for such change.

The Board will be permitted to add that it inclines to the opinion that the present system is not the best, either for the superintendents, or the State, in any of the institutions except perhaps in some of the smaller schools, as the schools for the deaf, the blind, and dependent children. To make an effectual change of the present system it will be necessary to erect a suitable residence for the Superintendent adjacent to each institution subject to the change of system, except at some of the institutions where residences have already been erected which are available for that purpose. Residence of the superintend-

---

*General Report.*

---

ent's family in the institution will be quite incompatible with the changed conditions proposed, and should not be continued after the change is effected. It will also be necessary to authorize the payment to superintendents of certain fixed sums in addition to annual salaries, in place of family subsistence.

Until the erection of such residences it is not perceived how the change of system above considered can be effectual without incurring the peril of doing serious injury to the service.

**PROVISIONS FOR THE DANGEROUS, VIOLENT AND CRIMINAL INSANE.**

In each of the hospitals and county asylums are inmates who are violent, or dangerous to themselves or others, and who are an annoyance—frequently a terror—to the other more quiet and peaceable inmates. The former ought to be isolated from the latter class. This cannot be effectually done in the existing institutions. Moreover, there are always in the State hospitals—usually in the Northern—several convicts who have been adjudged insane and committed from the State Prison. Convicts sometimes successfully feign insanity in order to get to the Hospital with a view of escaping therefrom. The hospitals have no sufficient appliances to prevent escapes of this class, and further provision should be made therefor. This subject has been alluded to in former reports, but the Board believes the time has come when it should be pressed upon the attention of the Executive and Legislature that some additional facilities for the care and safekeeping of the violent, dangerous and criminal insane should be provided.

It is believed that the above object can be effectually and the most economically attained by the erection of a building for those classes on the grounds of one of the state hospitals, such building to be connected with the heating, lighting, water and sewerage systems of the hospital, but to be located at a sufficient distance from the other hospital buildings to pre-

---

*General Report.*

---

vent its inmates from mingling with or disturbing those in such other buildings. Such proposed building to constitute a component part of the hospital, and its inmates to be governed and cared for by the Superintendent and officers of the Hospital.

It is probable that a building having a capacity for 150 inmates costing from \$125,000 to \$150,000 would be sufficient to meet the demands upon it for some years to come.

#### COUNTY ASYLUMS FOR THE CHRONIC INSANE.

Our system of caring for the chronic insane in county asylums, originated in and is peculiar to this State. The system is gradually making its way to popular favor elsewhere. In this State it is found, after thorough trial, to work so well that few or none of our people favor its abandonment or material alteration.

The value of the system is demonstrated by the fact, which is the result of it, that there is no insane person in this State who is necessarily kept in a prison, or poor house, or private asylum or family, and such are the expansive properties of the system that these conditions will doubtless remain unchanged in the future. Besides, the County Asylums are cheaply maintained without disregarding the best interests of the inmates, the minimum of restraint is employed consistent with their safety and welfare, and a large measure of the elements of home life and influence is brought into their daily lives. Moreover, each of these asylums has a farm containing from 100 to 500 acres of land, which furnishes an ample field for the labor of the inmates, besides being a source of revenue to the institution. The value of judicious labor in promoting the comfort, health, and sometimes the cure of the insane, is well understood by all who are familiar with the subject.

There are now 27 of these county asylums in operation containing 3,397 inmates adjudged insane. (See Table No. 5. Besides these, one is now in process of erection in Eau Claire

---

*General Report.*

---

county, and another is authorized in Waupaca county which will probably be erected during the year 1901. The Board is of the opinion that these 29 County Asylums, the two State Hospitals, the Milwaukee Hospital for the Insane and the proposed annex to one of the state hospitals for the criminal, violent and dangerous insane, will afford proper and sufficient accommodations for all our insane until the commencement of the year 1905. Hence, the Board believes that, except for very special reasons, the erection of no additional County Asylums to be opened for the reception of inmates very long before the date last mentioned, should be authorized. In authorizing the erection of those asylums the Board has adopted the policy (other conditions being equal) of preferring the counties which have the largest number of insane residents in the different hospitals and asylums toward whose support such counties respectively are required to contribute.

The subject of the increase of insanity is involved in the question of the necessity for additional asylums in the near future. The statistics of population in the hospitals and asylums for the insane, say for the last eight or ten years, will show an increase of inmates far in excess of the ratio of increase of population of the State. But this increase of inmates does not necessarily measure the increase of cases of insanity in the State. With the increase of the number of public institutions for the cure of the insane, with the more humane and constantly improving methods of treatment which now prevail, and with the liberality of the State and its counties in bearing the chief burden of the expense of such care and treatment, the old horror of the "mad house" has disappeared, and the insane who were kept in families under more or less restraint or who were confined in prisons and poor houses, are now freely allowed by their families and friends to be committed to the hospitals or asylums. Thus it is that the number of inmates therein is largely increased without any corresponding increase of the

---

*General Report.*

---

number of insane persons in the State. Another element to be considered in this connection is the fact that the better, more humane and more scientific treatment of the insane which now prevails tends to lengthen their lives, thus increasing the number of insane at a given time without a corresponding increase of new cases. Thus if in a community having a fixed population ten persons become and continue insane each year, and if the average life of the insane is ten years, at the end of the first ten years such community will have 100 insane. Thereafter the deaths will equal the new cases and the number of insane will remain at 100. But if such lives are prolonged to 20 years, the number of insane will constantly increase until at the end of the first 20 years the community will have 200 insane, and that number will continue instead of 100. Yet in the latter case only 10 go insane in each year, and there has been no increase in the ratio of new cases to the population of such community.

It is reasonable to assume that neither of the foregoing conditions will be as efficient in the future as it has been in the past to cause an apparent increase in the ratio of cases of insanity to populations but that for the next few years population and cases of insanity will increase in about the same ratio. Population increases about  $2\frac{1}{2}$  per cent. a year. There will soon be 5,000 insane persons in our hospitals and asylums. Two and one-half percent. of this number is 125, which may reasonably be assumed as the rate of increase per annum of the insane in those institutions for the next few years. This addition of 500 inmates before the commencement of 1905 can be well and easily cared for in the institutions now in operation, in the new asylums in Eau Claire and Waupaca Counties and in the proposed structure (if erected) for the criminal, dangerous and violent insane.

The increase in the population of the county insane asylums has been made up quite largely of cases of that form of insanity known as *senile dementia*. The statute (R. S., 584) provides that

---

*General Report.*

---

a person physically infirm or mentally imbecile, and not deemed dangerous when at large, shall, not be admitted to either hospital solely because of such infirmity or imbecility. This diagnosis is applicable doubtless to most cases of *senile dementia*. But if such patient is adjudged insane the statute does not prohibit his commitment to the County Asylum. If the case arises in a county having an asylum the county judge may commit such insane person directly thereto. But if the proceeding is in a county not having an asylum the statute requires the commitment to be to a state hospital. In order to place all of the counties on the same footing in such cases the Board has adopted the practice of having the commitment made in form to the state hospital. The county judge then reports the fact to the Board — retaining the insane person — and the Board, if satisfied that it is a proper case therefor, orders his removal to a County Asylum usually under the direction of the county judge, and the patient is taken directly to such asylum. This practice saves the trouble and expense of taking such insane persons to the hospital, and at the same time meets the requirements of the law.

During the biennial term just closed the Board has given special and particular attention to these institutions, and has endeavored to introduce uniformity of administration and to bring them to the highest possible condition of efficiency. In these efforts the Board has received the hearty co-operation of the Asylum authorities. It has been found necessary to define the legal relations of the State and counties to each other in respect to their management and support, and to correct certain practices and omissions in a few of them which were deemed opposed to the well-being and safety of the inmates. The subjects upon which the Board has acted, and the necessity for such action, are stated and explained in circulars to County Asylum officials annexed hereto and numbered II and III.

*General Report.*

---

APPROPRIATION TO MILWAUKEE COUNTY FOR CARE OF INSANE IN  
MILWAUKEE HOSPITAL FOR THE INSANE.

From the enactment of Chap. 233, Laws of 1881, to the adoption of the revised statutes of 1898, the county of Milwaukee was paid by the State the sum of \$2.75 per week for the maintenance and care of each patient in the Milwaukee Hospital for the Insane. The statute providing for such payment was inadvertently omitted from the revision of 1898, and the last Legislature was asked to re-enact it.

The action of the Legislature on such petition resulted finally in the enactment of Chapter 271, Laws of 1899, which restored the former rate of \$2.75 per week until July 1, 1899, for the care and maintenance of each patient in said hospital and continued the same rate thereafter for the acute insane therein. But the chapter reduces the appropriation for the care and maintenance of the chronic insane therein to \$1.50 per week each, and requires the Board of Control to make classification twice in each year of the number of acute and the number of chronic insane maintained in such Hospital, and certify thereto to the Secretary of State. Until this certificate is issued the county is not entitled to credit on the books of the State Treasurer for such appropriation.

In January, 1900, the Board made such classification according to the best lights it could obtain and certified the same to the Secretary of State in attempted compliance with the statute. The classification was made on the following principles: All patients who had been inmates of the hospital for less than two years (except perhaps a few unmistakable chronic cases) were classed as acute insane. So also were those who had been such inmates more than two years, but who by reason of the severity of their malady required special care and treatment which they could not reasonably have in the asylums for the chronic insane. All others were classed as chronic insane.

---

*General Report.*

---

The result of this classification was that about two-fifths of the inmates of the hospital were classified and certified as acute insane, and the remainder thereof as chronic insane—the average appropriation to the county towards their care and maintenance being two dollars per week each. It scarcely need be said that the excellent and zealous officials of the hospital were not satisfied with this classification.

No list of inmates has since been furnished us for classification, and hence no classification has since been made. Presumably the County of Milwaukee will appeal to the next Legislature to so change the law, or the rules of classification, that the county will receive a larger credit on account of the care and maintenance of these inmates of its hospital. Whether this should be done is a question of State policy to be determined by the law making power of the State.

**SUBJECTS UPON WHICH ADDITIONAL LEGISLATION IS SUGGESTED.**

1. Under Sec. 5734, R. S., the county in which an inmate of the Home for Feeble Minded last resided before being brought to the Home is required to pay the State at the rate of one dollar and fifty cents per week for the support of such inmate and thirty dollars per year for his or her clothing. The statute gives no remedy for such expenditure against the estate of the inmate, no matter how ample it may be; nor against any person who under the existing laws of the State is liable to be charged with the cost of maintenance of pauper or insane relatives. Those laws are stated in Order No. II, hereto annexed.

It is suggested that a statute should be enacted giving such county the same remedy against the estate or relatives of any such inmate for the sums charged to such county for his or her maintenance in the home as is now given by law to a county for the maintenance of its insane in a state hospital or county asylum for the insane.

---

*General Report.*

---

¶ This will be but an extension of the provisions of Sections 600, 604e and 1,500 to 1,505, inclusive, R. S., to the cost of the maintenance of inmates of the Home for Feeble Minded.

2. During the past summer an inmate of the State Reformatory attempted to escape therefrom. He broke from the custody of his keeper and fled towards a tract of timber and brush near the institution. Had he reached it he could easily have effected his escape. He disregarded the orders of his officers to halt and was likely to reach the cover towards which he was fleeing. An armed guard thereupon fired upon the escaping inmate and killed him. A legal inquest was held and such killing was adjudged to have been necessary and justifiable.

At the common law a homicide necessarily committed by a prison guard or other officer under such circumstances is justifiable. The State, acting through its constituted authorities, has maintained armed guards at the State Prison ever since it was occupied as a prison, and has instructed such guards to prevent escapes of prisoners by the use of every means in their power, even by shooting the escaping convict if that were necessary to prevent his escape.

We cannot doubt that the common law in this respect is in force in this State, and that it applies to the Reformatory as well as the State Prison. Yet there is no statutory provision upon the subject in this state. Other states have such statutes. In view of the responsibility laid upon prison and reformatory officers to prevent escapes and other crimes attempted by convicts, many of whom are most desperate men, and in view of the fact that those officers are liable to be confronted with the terrible alternative of allowing the crime to be committed or slaying the convict who attempts to commit the same, it seems but reasonable that a statute should be enacted which will remove all question of the right and duty of the officer to prevent the crime by the use of all necessary means to that end, even to taking the life of the offender. Such statute should be care-

---

*General Report.*

---

fully drawn and all proper limitations upon the right to take life should be clearly expressed. With such a statute no prison or reformatory officer need be in doubt as to his duty in any emergency when called upon to resist and defeat attempts by convicts to commit crimes.

3. The practice has heretofore prevailed at the State Prison of allowing escaped convicts, as a part of their term of imprisonment, the time which may have elapsed after their escape and before recapture. Thus, a convict sentenced for a given term, say one year, may escape from the prison immediately after he is committed thereto, and may be able to avoid recapture until the year has expired. Under the above practice he cannot be returned to the prison to serve his sentence of imprisonment for one year at hard labor which he has avoided by his own criminal act of escaping. Thus he avoids any punishment under his sentence.

The existence of such a practice would be inexplicable were it not for the fact that there is no statutory provision on the subject. Because of such omission the prison officials in former years probably thought there could be no break in the running of a convict's term of imprisonment after it had once commenced.

We doubt not the view is erroneous because the common law, which we think is in force in this State, is that the time during which a convict avoids imprisonment by escaping must not be computed as a part of his term of imprisonment.

Acting upon this view the Board has directed the Warden of the State Prison to change the practice in that behalf by withholding from escaping convicts any allowance for time during which they were absent from the prison after their escape and before recapture. Such is now the statutory law of the State Reformatory. (Sec. 4944~~l~~, R. S., as amended by Ch. 28, Laws of 1899.)

To prevent further question as to what the law is the Board

---

*General Report.*

---

suggests that a similar statute be enacted placing convicts in the State Prison (and perhaps those in all other prisons) on the same footing as inmates of the Reformatory are placed by the above statute.

4. In the statutes authorizing the granting of leave of absence to persons committed to the Hospitals or County Asylums as insane (Sec. 587c, R. S., as amended by Ch. 327, Laws of 1899), it was manifestly intended to provide that a continued absence for a term of two years from the institution pursuant to such leave, whether such leave was granted before or after the enactment of the statute, should operate as a discharge of such person from the institution, and a removal of the presumption of insanity arising from the original adjudication that such person was insane. Section 587c as amended carries out that intention in respect to paroles granted from the State Hospitals and the Milwaukee Hospital for the Insane, whether before or after the enactment of the statute, and in respect to paroles granted from County Asylums before but not after such enactment. This is clearly an unintentional omission which ought to be supplied by an amendatory act.

Before the enactment of Sec. 587c there were hundreds of persons in the State who had been judicially determined to be insane, but who had recovered and had returned to their usual avocations. Yet the adjudication that they were insane still stood against them. Had the validity of a deed or will executed by one of these persons been contested in the courts, the presumption that the person executing the instrument was insane would remain, and the burden of proof would be upon the party asserting the validity of such instruments to show that the grantor or testator had recovered his reason before the instrument was executed by him.

The purpose of the above statute was to change the presumption of insanity in such cases to one of sanity, if the person whose sanity is in question had been at large under a parole from

---

*General Report.*

---

any hospital or asylum for two years. This statute of limitation relieves from the necessity of instituting a judicial proceeding to re-examine the question of sanity in any case covered by the statute and avoids the delay and expense of such proceeding.

To prevent misapprehension it should here be noted that in past years the superintendents of the Hospitals, have reported that large numbers of patients in those institutions have been discharged cured. These reports doubtless include many patients whom the superintendents have undertaken to discharge on their own responsibility.

When those reports were made the Board was not aware of any then existing statute which conferred upon those superintendents the powers of a Commission in Lunacy, or that any such law has ever existed. No court, tribunal or person, not vested with such powers, was then, or is now authorized to adjudge a person sane who had theretofore been adjudged insane by competent authority.

Hence the assumed discharge by them of patients as cured, that is, as restored to sanity, amounts only to paroles of such patients, and does not relieve them from the presumption of insanity, if lawfully adjudged insane in the first instance.

Probably this apparent excess of authority by the superintendents ought to be attributed mainly to defective blank returns sent out from this office in past years, calling for just such returns as they have made.

Only those patients should be reported *cured* who have been adjudicated sane by some tribunal or person having the powers of commissioners in lunacy, or have been on parole for two years from a hospital or asylum.

The necessary bills for the legislation above proposed will be prepared for submission to the next legislature.

---

*General Report.*

---

OBJECTS FOR WHICH SPECIAL FUTURE APPROPRIATIONS ARE DEEMED  
DESIRABLE.

In addition to the proposed appropriations for the erection of a suitable building as a part of one of the State Hospital for the Insane for the separate care of the criminal, violent and dangerous insane, the Board, as at present advised, is of the opinion that it will not be necessary to ask for any considerable special appropriation for any other permanent improvements during the next biennial term except as follows:

1. The last Legislature appropriated four thousand dollars for extension of dining-room at the State Prison. This improvement has not been made for the reason that certain other proposed improvements at that institution can best be made in connection with, or in place of it, and the Board thought it best to defer the extension until the Legislature should determine whether it would authorize the making thereof.

The proposition is to build an entire new dining-room, utilizing the present one for a necessary re-arrangement of kitchen and bakeries. Also, to put a second story over the new dining-room for a chapel, retaining the present chapel for a school room. The warden estimates the cost of these improvements at \$14,500.

It is also proposed to remodel the old stone building in the prison enclosure now used as a stable, so it shall contain a general bathing room, six detention cells, six solitary cells, office for deputy warden, room for the use of a Bertillion operator, and a store room. This cost of such improvement is estimated at \$2,500. This proposed improvement is one of pressing necessity.

2. The Board recommends that appropriations be made to install an electric light plant, and to erect a one story building for a chapel or assembly room at the State Public School at Sparta. The estimated cost of the plant is \$7,500 and of the chapel \$4,000.

---

*General Report.*

---

3. There seems a necessity for the erection in the near future at the Home for the Feeble Minded of four dormitories with a capacity of about one hundred inmates each, a school house and a general refectory. To erect these buildings will require an additional appropriation, the amount of which will be estimated later.

The question of making the above mentioned improvements will, in the first instance, be considered by the legislative visiting committee, and if that committee deems it desirable to do so, more specific estimates of the cost of such proposed improvements will be procured for the use of the Governor and Legislature.

We have thus referred, although in a somewhat desultory manner, to some of the leading subjects of immediate interest to the State upon which the Board is required to act, without attempting any general survey of the work of the Board. We again beg leave to refer to the reports of the several superintendents and the warden, which will form a part of this report, for information on subjects affecting their respective institutions, not herein discussed. These are worthy of careful perusal, and will be found profitable and interesting.

We conclude this report with the acknowledgment that if the Board has succeeded in the work assigned to it — if it has improved the service in the promotion of the comfort and welfare of the thousands of afflicted people placed in its charge — if it has been instrumental in raising the several institutions which it controls to a condition that enables them to do better reformatory or restoring work, and thus more effectually accomplishing the great purposes for which they were created — if it has aided to banish carelessness, improvidence and incompetency from those institutions — if it has not wasted the money so freely furnished it by the State with which to do its work — the Board owes much of its success to your wise counsels when difficult questions have arisen for solution, and to your unwav-

## ORDER NO. 1.

## OFFICE STATE BOARD OF CONTROL.

MADISON, WIS., April 26, 1898.

"For the purpose of establishing and more clearly defining the functions of the Superintendents and Wardens of the several State Charitable, Penal and Reformatory Institutions governed by the Board of Control, and the officers and employes therein, their relations to each other and to the Board of Control, and the tenure of their respective offices, the following order is promulgated for the information and guidance of all concerned:

*First* — Superintendents, wardens, stewards and general matrons shall be appointed directly by the Board of Control.

*Second* — The following officers shall be appointed by the Board upon the nomination of the proper superintendent or warden: Chaplains, physicians, and assistant physicians, principals and teachers of schools, assistant wardens and stewards, head engineers, and agents at the State Public School and the Industrial Schools for Boys.

The superintendent or warden may suspend any of the officers mentioned in this paragraph, and may remove any of them except the assistant warden, principal of schools, chaplain and the agents above mentioned, promptly reporting to the Board such removal, or suspensions, and the causes therefor.

*Third* — Each superintendent or warden shall appoint, and in his discretion may remove, all other subordinate officers, and all employes, not officers, in his institution. The superintendent or warden shall monthly report to the Board, with his estimate for the ensuing month, all changes of subordinate officers during the past month, and the dates of such changes.

*Fourth* — The regular term of office of each officer or person mentioned in paragraphs No. 1 and 2 shall be one year from July 1st next after appointment. The nominations required in paragraph No. 2 shall be submitted to the Board May 20th in each year. Appointments to fill vacancies terminate on July first, next after they were made, and nominations therefor shall be submitted to the Board as soon as practicable after the vacancy occurs.

*Fifth* — Superintendents and wardens are charged with the duty of giving all subordinates in their respective institutions affected by this order timely notice of its contents."

## ORDER NO. 2.

## OFFICE STATE BOARD OF CONTROL.

MADISON, WIS., January 3, 1900.

"A careful examination of the law fixing liability for the expense of the care and maintenance of the insane in the State Hospital and County Asylums seems to lead to the following conclusions:

## 1.

The only statute giving the State a right of action against individuals for such expense is Section 6047, R. S. It applies alike to all persons committed as insane whether inmates of a State Hospital or a County Asylum,

---

*Orders Issued by the Board.*

---

but it only reaches the case of an inmate who has an estate sufficient to pay for his or her maintenance, the cost of which must not exceed \$3.00 per week. The judge has the power in his discretion to refuse to charge the estate for the cost of maintenance of the owner, even though sufficient for that purpose, if such owner has a parent, wife or child dependent upon such estate for future support.

If a proceeding is instituted under the above Section, whether by State or County authority, it should be prosecuted before the judge in behalf both of the State and County, and his order for the payment should probably be in the name of the State and County, although perhaps action in behalf of each might be allowed.

II.

Pursuant to Section 607, R. S., the sums charged any county for maintaining a patient in the State Hospital, chargeable to it, may be collected by such county, by suit, out of the property of the patient, or from any person legally bound to support such patient. The State has no interest in, or concern with, any such proceeding. It is merely designed to reimburse the county for its expenditures for maintaining such patient in the State Hospital.

III.

If an insane person resident of and chargeable to any given county is maintained in the asylum of some other county, it seems quite certain that the county so chargeable may recover, in like manner, the sums legally paid by it for such maintenance, out of the estate of such insane person, or from any person legally liable for his or her support.

If the patient is maintained in the asylum of the county chargeable for his maintenance the recovery should be limited to \$3.00 per week for such maintenance, and in addition thereto, the cost of clothing, necessarily furnished such insane person by the county.

IV.

If the county collects a sum equal to \$1.50 per week for the maintenance of such insane patient no part of the expense of his maintenance can properly be charged to the State. If less than \$1.50 per week be so collected the State is chargeable only for the difference between the sum collected and \$1.50 per week.

V.

Under the provisions of Section 604d, and 604e, R. S., the State is not chargeable with the \$1.50 per week specified in Section 604d. for the care of an insane inmate of any county asylum who is a resident of the county maintaining such asylum, "whose support is not properly a public charge."

The support of any such inmate is not properly a public charge: (1) if some responsible person within the reach of the process of our courts is liable therefor, as in the case of a wife or minor child of a responsible husband or father; or (2) if such inmate has a father, mother or child in like manner amenable to the process of our court of sufficient ability under Section 1504, R. S. to maintain and care for such inmate or (3) if such inmate has an estate sufficient under section 604q, R. S., to defray the cost of his or her maintenance and care.

---

*Orders Issued by the Board.*

---

This paragraph applies only to the maintenance of insane inmates of a county asylum who are residents of, and chargeable to the county maintaining such asylum.

## VI.

For the purpose of protecting the State from being charged for the support of insane persons for whose maintenance it is not legally chargeable, county asylum trustees are required to certify in their reports upon which State allowances, under section 604d, R. S., are claimed, that after diligent inquiry they believe no such claim is made therein on account of any insane person, whose support is not properly a public charge under the laws.

Each board of trustees will also report to this Board the name of each inmate in their asylum, and in the State Hospital, chargeable to their county, for whose maintenance in whole or in part their county has been reimbursed during the time covered by their report, and the amount thus recovered on account of each such inmate.

## VII.

In determining whether some responsible person is liable, or may by legal proceedings be made liable, for the support of an inmate of any county asylum who is a resident of the county maintaining such asylum, or whether such inmate has a sufficient estate to pay for his or her own maintenance, this Board does not insist upon nor desire the application of any rigid rules in favor of the State. In making such determination the officials of the asylum should consider the nature of the property of the person sought to be charged, its productiveness and the probable income which may be derived from it, the size and reasonable cost of maintaining the family of the owner and all other conditions which may reasonably be supposed to effect the liability of the owner to support such inmate. The mere fact that the cost of such support can be collected by legal proceedings against some person does not, of itself, necessarily prove that such person ought to be charged with the maintenance of such inmate and the State thereby relieved of such charge. All that the Board requires is that the asylum officials exercise a discriminating and just discretion in making their classifications of the inmates of their asylums who are residents of their county. Such is believed to be the true intent and spirit of the statute in that behalf.

## VIII.

Under section 604f, for all inmates of a county asylum whose support is not chargeable to the county maintaining such asylum, the State pays such county \$3 00 per week each and the amount necessarily expended for clothing them. The liability to pay this sum, and the liability of counties to refund to the state a portion of it, does not depend upon the question (as in the former paragraph) whether or not the expense of the support of such patient is properly a public charge. The obligation of the State is absolute to pay the stipulated sum for each patient of that class, and it is equally absolute that the county chargeable with the maintenance of any such inmate shall refund to the State \$1.50 per week, and the amount necessarily expended for clothing him or her.

STATE BOARD OF CONTROL,  
By W. P. LYON, President."

---

*Orders Issued by the Board.*

---

## ORDER NO. 3.

 COUNTY ASYLUMS FOR THE CHRONIC INSANE — DIRECTIONS CONCERNING  
 THEIR MANAGEMENT IN CERTAIN PARTICULARS.

OFFICE STATE BOARD OF CONTROL.

MADISON, Wis., April 5, 1900.

Although the County Asylums for the Insane are erected, organized and managed by county authority, are primarily maintained by the respective counties, and, properly speaking, are county institutions, yet because the State contributes largely toward the support of all the inmates therein and has the necessary authority to prescribe proper care and treatment of such inmates (each of whom is a ward of the State) such asylums are also in a large sense State, or quasi-state institutions.

The State exercises its functions in respect to these asylums chiefly through the agency of this Board. In the discharge of its duty in that behalf this Board has from time to time requested county asylum officials to adopt certain policies and methods of procedure in their respective asylums for the purpose of improving the condition and promoting the welfare of the inmates thereof. Such requests have the force of orders made by authority of the State, and must be so regarded. This Board has also decided to give some additional directions concerning the management of such asylums. These, with the directions heretofore given, are briefly as follows:

## I.

Asylum physicians should not be selected and contracts for the medical care of the insane awarded upon competitive bids. The Trustees should appoint some competent physician and fix his salary. The selection should be made with the care and consideration that might reasonably be expected in the selection of a family physician.

The asylum physician should visit the asylum at least twice in each week. At each visit he is expected in addition to attending to the sick inmates to examine the sanitary condition of the asylum and grounds and the condition of the patients, their health, diet, clothing and cleanliness, the work required of them and any other condition affecting their welfare and comfort. He will advise and direct the Superintendent as to which of the patients should be required to labor and the kinds and amount of work each working patient is able to perform. At each visit to the asylum the physician shall enter in a book, furnished by the Superintendent, the date of his visit, the name, age and malady of each patient treated by him, the treatment prescribed and the name of each patient he has advised the Superintendent should not be required to labor. At least once in each month the physician should also enter in said book statements of the sanitary condition of the institution, and the general condition of the patients in respect to matters herein mentioned. He is invited to enter therein any suggestions he may think proper to make for the improvement of the institution and the promotion of the welfare of the inmates. Each report book should be properly ruled and the required entries affecting individual patients should be made under the following heads:

Date of visit.	Name of patient.]	Age.	Malady.	Treatment.	Remarks.
----------------	-------------------	------	---------	------------	----------

*Orders Issued by the Board.*

Patients excused from labor may be named in second column or under the head of "Remarks." A separate portion of the book may be set apart for the monthly report above mentioned.

II.

Each County Asylum shall have upon its staff of employes a female night attendant who shall be constantly on duty during each night in the apartments occupied by the female inmates. Such attendant shall make a daily report to the Superintendent, to be written in a book provided by him for that purpose, stating the name of each patient who was sick or disturbed during the night, the nature of her sickness or cause of her disturbance and what was done for her relief; and stating also any unusual occurrence in the female apartments during the night. The Superintendent should see that this rule is faithfully complied with. The reports of the physician and female night attendant shall be kept by the Superintendent for the inspection of all persons entitled to see them.

III.

The Trustees of each County Asylum are required to employ and keep on duty a competent night watchman at their institution through each night during the whole year.

When it is considered that each of these institutions is inhabited by from one hundred to one hundred and fifty, and more, irresponsible persons, many of them prone to mischief, and nearly all incapable of self preservation in case of fire or other peril, it seems absolutely necessary to their proper protection that some intelligent man in full possession of his faculties be with them and upon the grounds of the institution constantly.

IV.

Regulations for ascertaining the amounts chargeable for clothing furnished by the Trustees of any County Asylum to the inmates thereof, a portion of whose maintenance is charged to counties other than that in which such asylum is situated, or wholly to the State, pursuant to Section 604f, R. S.

1. An accurate account shall be kept of the clothing furnished each such inmate and the same shall be charged to the proper county, at the actual cost thereof. The asylum authorities are expected to use reasonable diligence to make purchases of such clothing in the cheapest available market.

2. Clothing accounts made pursuant to Section 604f, R. S., must be verified by the affidavit of the proper Superintendent (or in case of his inability, by a Trustee) substantially in the following form:

"State of Wisconsin, }  
 .....County } ss.

....., being first duty sworn, deposes and says that he is the Superintendent (or a Trustee) of the..... County Asylum for the Chronic Insane and has the keeping and custody of its accounts for clothing furnished the inmates therein, that the above and foregoing statement of clothing account charged to other counties, or to the State is accurate and just, that the value of such clothing so chargeable necessarily furnished each inmate of said asylum during the fiscal year ending Sept. 30th,....., and the sums necessarily expended there-

---

*Orders Issued by the Board.*

---

for are correctly stated therein and that no part of such sums has been paid or previously audited.

Subscribed and sworn to before me  
this .....day of.....

.....  
Notary Public."

3. The Board of Supervisors of any county charged with a portion of the expense of maintaining any person or persons in the Insane Asylum of some other county may at any time request the Trustees of such asylum to furnish it with an itemized account of the articles and cost of clothing furnished such person, and such Trustee when so requested will be expected to promptly furnish the same. The Board of Control will adjust any controversy as to the accuracy of such account.

v.

If the County Asylum and the County Poor House are under the same management, the salaries and wages of all officers and employes whose duties are common to both institutions should be apportioned to such institutions on the basis of the average population of each. The monthly report of wages and salaries should be made, and the per capita cost of maintenance in the annual report should be computed on this basis.

There shall also be kept an account of all the products of the asylum farm used or consumed in the asylum, or disposed of and the proceeds so used. The fair market value thereof, or the money received from the same and so used in each year, shall be deducted from the annual interest at 4 per cent. of the cost of the asylum plant and equipment, excluding cost of poor-house and equipment, if there be a poor-house under the same management. The balance represents the net annual interest on the investment at 4 per cent. This balance should be included in the current expense account of the asylum upon which the per capita cost of maintenance is computed.

vi.

Section 601, R. S., provides that every female over ten years of age committed to any hospital or asylum for the insane shall be accompanied by a competent female. This Board has been astonished to learn that this most salutary law, demanded by common decency for the protection of helpless insane women from possible outrage or neglect, has recently been disregarded in two instances, in each of which an insane woman was brought to the hospital, in one case by a sheriff alone, and in the other by the sheriff and a male assistant only.

Failure to obey this law cannot be tolerated. Hence, superintendents of hospital and asylums are directed to report any such failure to this Board with the name of the delinquent officer, to the end, that a representation of the facts may be made by this Board to the authority having power to remove such officer.

The above directions were adopted and ordered printed and distributed April 14th, 1900.

STATE BOARD OF CONTROL,  
By WM. P. LYON, President.

Statistical Tables.

COMPARATIVE TABLE.

Showing current expense expenditures, current expenses, average population and per capita cost per week at the various institutions for years 1895 to 1900 inclusive. (The current expenses are determined by taking into account the supplies on hand at the beginning and close of each year and receipts and transfers from different departments.)

		Current Expense Expendi- tures.	Current Expenses.	Average popu- lation.	Per cap- ita cost per week.

## SUPERINTENDENT'S REPORT.

---

*To the Honorable State Board of Control:*

Gentlemen: I herewith submit for your consideration this, the Ninth Biennial Report of the State Hospital for the Insane.

It is my privilege to state that, from a medical standpoint, I feel the Institution during the past two years has fulfilled its mission. Of the number of patients who have been paroled, 150 from a medical standpoint would be considered as recovered, and 270 as greatly improved.

The number of patients received during the past year reminds us again that it will be necessary at once to increase the capacity of this institution for disturbed patients, and I would recommend for consideration the advisability of building in the state a suitable building for treatment of the disturbed and violent insane.

I should not feel that I had relieved myself of responsibility did I not again refer to the fact that we are using gas for lighting and are the only state institution that is not provided with electric light. With gas it is impossible to light the rooms in the wards, so that we have not a patient's room with light in it and at night the night-watches are obliged to use oil lanterns when waiting upon the disturbed and untidy class of insane, which is accompanied by danger and much inconvenience.

A fully equipped Turkish bath room would add very materially to our facilities for treating patients.

I again refer to the fact that the land included in the farm connected with the Institution is becoming very depleted and it seems to me it would be economy, as well as policy, for the state to install a plant for disposing of the sewage. from the building and putting it upon the land rather than to have it wasted in the lake,

---

*State Hospital.*

---

Am pleased to report that the coal carrier, for which a special appropriation was made, has been installed and is very satisfactory.

I submit herewith tables concerning the economics of the Institution, which are self-explanatory.

I wish to speak of the efficiency of the Hospital staff and my assistants and assure you that to them belongs any credit of which we are worthy in conducting the affairs of this institution. I also desire to thank the Board of Control for the hearty support they have given me and for the broad policy they have adopted in the management of this institution and congratulate them upon the civil service basis which has been established.

Respectfully submitted,

WM. B. LYMAN,

*Superintendent State Hospital for Insane.*

## SUPERINTENDENT'S REPORT.

---

WINNEBAGO, WIS., October 1, 1900.

*To the Honorable State Board of Control.*

GENTLEMEN: The Ninth Biennial Report of the Northern Hospital for the Insane is herewith submitted.

The humane mission of the Hospital has been carried on with economy and, I believe, with success. The true history of an insane hospital can not be set down in a formal report. Its work and influences are scattered throughout the state. It affects distant homes.

To administer the affairs of the Hospital so that anxious friends and relatives who are far away may be thoroughly assured that everything that can be done is being done to promote the physical comfort and the mental welfare of those they love has been one of the constant efforts of all the officers and physicians connected with this institution. Kindness, sympathy, and honest manly interest in those committed to our care and professional skill in their treatment is promptly recognized by the friends of patients and removes much of the former fear and dread of sending relatives to the Hospital. Thus the Hospital benefits not only those under its roof but hundreds whom we never see or know. In the majority of cases of insanity there is more sorrow and actual suffering in the home than in the Hospital. The exercise of patience, toleration, tact, courtesy, benevolence, and sympathy with the sensibilities of the suffering extends the influence of the Hospital almost indefinitely. More than a mere cold perfunctory performance of duty is required of those who would successfully care for the insane. The frequent visits of former patients and the occasional letters from others are gratifying evidences of the esteem in which the Hospital is held by at least some of those who have been inmates.

---

*Northern Hospital.*

---

The rule excluding mere curiosity seekers from the wards has been rigidly enforced. Those who are honestly interested in knowing our methods have been given every opportunity to inspect the Hospital. Lawyers, judges, preachers, and physicians as being especially interested have been invited to look through every department of the Hospital.

There has been a growing sentiment in favor of changing the official title of the Hospital from "Hospital for the Insane" to "State Sanitorium." The ancient ideas of mad-houses still exist and they would be largely put in the background by a change of name. There are several reasons why a change of name would be beneficial and there are none, that I know, for retaining the outgrown title.

Since the last report a new surgical room with the best modern disinfecting and sterilizing appliances has been built at the south end of the women's wards. This addition to our resources is a permanent and invaluable improvement.

The bath rooms, for which \$10,000 was appropriated by the last legislature, are nearly completed. They will be ready for use by the first of January. These rooms will greatly increase the comfort of the patients and will also increase the efficiency of the Hospital. They are a credit to the state. As heretofore, each patient will be placed on a table and then thoroughly scrubbed, twice a week. The steam bath, electric light bath, the hot pack, the cold pack, needle bath, Sitz bath, and shower bath will be given as prescribed by the physicians. Hydropathic measures constitute one of the most potent devices at the service of the Hospital physician. The princes of the earth are not bathed more effectually than are our patients.

The new electric switch board enables our patients to have the benefits of an electro-therapy.

There have been new walks laid out and these increase the opportunity for out-door exercise.

The new steam pump in the old air shaft has removed the

---

*Superintendent's Report.*

---

condensed steam from the return pipes and thus stopped the noises that formerly were so annoying.

The building of a large silo thirty feet in diameter will undoubtedly increase the milk supply and thus be a direct and positive benefit.

Many trees have been planted about the farm. A nursery where we can raise our own trees has been started. There are now over 10,000 trees raised in the nursery. Black walnut, butternut, box elder, soft maple, locust, elm, beech, and ash trees have been grown and are doing well.

For the last five years the quantity of meat used has been less than in former years. The reduction has amounted to 60,000 pounds a year. I am positive that the change of diet has been beneficial. There has been an increase in the quantity of milk consumed. More eggs have been eaten. More vegetables have been used. The farm and gardens have been very productive. Strawberries, raspberries, Hubbard squash, Lima beans, string beans, onions, pieplant, rutabagas, turnips, celery, radishes, summer squash, cucumbers, spinach, asparagus, sweet corn, cabbage, potatoes, kohlrabi, musk melons, lettuce, tomatoes, beets, carrots, and parsnips have been raised in great quantities. The use of cornmeal has been greatly increased and it is a very satisfactory addition to our dietary. A great deal of cocoa has been used. The use of coffee and tea has been curtailed, not for financial but for physiological reasons.

The result of it all has been that the patients sleep better; the wards are quieter; the quantity of hypnotics required has been diminished.

There has been, as heretofore, a constant change of attendants. This is one of the most vexatious features in the administration of the hospital. One reason for the changes is that the wages are not sufficient to induce persons to make a business of the work. A good attendant is simply priceless. The strength of body and the serenity of spirit, the delicacy, tact,

*Northern Hospital.*

---

and thoughtfulness, which co-exist in the ideal attendant, are not found together very frequently.

The occupation is a noble one. It deals directly with human life. The state is not doing its duty by its unfortunate wards as long as the present haphazard catch-as-catch-can system of employing attendants for the insane is permitted to exist.

There are only two ways to improve the personnel of this service. One is to increase the pay so that the positions will be worth keeping. The other is to have an enlisted service where the attendants are sworn in for a specified term of service as in the regular army.

During the biennial period there have been 31 convicts and 9 criminals in the Hospital. These undesirable patients have been a source of constant anxiety. There should be a separate building for this class of insane. At Mendota or at this place there should be a building with a capacity sufficient to care for the convict and criminal insane and for certain state at large cases that are now in the county asylums and for certain boisterous chronic patients that are to be found in nearly every county asylum. A building capable of accommodating two hundred persons would be large enough for present purposes and would relieve all the existing institutions of persons who are a constant menace to their peace and comfort.

To "Pluck from the memory a rooted sorrow:  
Raze out the written trouble of the brain."

Variety of entertainment has always been recognized as an efficient therapeutic measure. During the last biennial period much labor has been given to this important feature of Hospital life.

Upon various occasions, especially on stormy days when the patients were necessarily confined to the house, singers and instrument players have gone from ward to ward beguiling the leaden hours with songs and melodies. On other days groups of patients have been sent to the chapel where a mild "continuous vaudeville" was kept up throughout the day, the same

---

*Superintendent's Report.*

---

performances entertaining several different audiences. Riding about the country in the omnibus has been used as opportunity offered. Herewith is a list of the other entertainments: 40 Home Talent Concerts; 10 Theatrical Performances by Home Talent; one entertainment by a Crayon Artist; one by the Blind Orchestra Glee Club; one by the Beak Sisters; one by Mr. Phipps, Musical Virtuoso; one by Mr. W. G. Richards, Impersonator; 18 Picnics; one concert by the Imperial Mandolin Club; one by Misses Wright and Jackson; one by Mr. W. H. Dale and class; one Graphophone Concert, 2 Mask Balls by the Attendants, 7 Ball Games, and 70 Dances.

There are now two deer, two badgers, two monkeys, Belgian hares, Guinea pigs, English pheasants, and canary birds on the premises. These are quite a source of pleasure to the patients. This meager zoological collection could be enlarged at a trifling expense, and I hope this will be done.

The Hospital School, which was established four years ago, has been continued except during the months of June, July, August, and September in each year. The school has come to be an indisputable feature in the daily life of the Hospital. It is a practical, efficient, cheap, wholesome addition to our armamentarium. Many patients are eager to attend. Melancholy patients have often taken the first step towards mental health under the helpful influence of the school-room. The singing exercises have been a comfort and an aid to many a distracted spirit. There are always fifty or sixty patients in the singing class. During the summer evenings they have always assembled on the lawn in front of the Hospital and sung for an hour or more.

Many patients of foreign birth have obtained valuable knowledge of the English language in the school. This is particularly true of our German patients.

The school, which was begun as an experiment, has proved itself to be of real value as a means of education, entertainment, and discipline and it should be continued.

The old frame dwelling house, which has been used for a

---

*Northern Hospital.*

---

reception and sterilizing house, should be supplanted by a neat one story brick structure especially adapted for the reception and bathing of patients and the sterilizing of their clothes. The legislature should be requested to make a special appropriation of \$2,500 for this building.

The congregate dining-room should be made forty feet longer towards the south and a permanent stage built in the north end thereof. The legislature should be requested to make a special appropriation of \$5,500 for this purpose.

The present pumping station is very inadequately equipped. The old steam pump is worn out and the small electric pump has not the capacity to furnish enough water should there be a serious fire. It is certain that new pumps will have to be bought. If they are installed in the boiler-room, the exhaust steam could be used for heating and thus save fuel enough to more than pay for the cost of putting in a large water main from the lake to the boiler-room. It has been estimated that \$4,000 will pay for bringing the water to the house. Two thousand dollars will put in two steam pumps of sufficient capacity.

There should, in my opinion, be an organic union between the State University and the State Hospitals for the Insane. Both are working for the same master—the people of Wisconsin. The Hospital farms should be experiment stations for the agricultural department of the University. Only the most advanced scientific methods of agriculture should be employed on the public farms.

In the raising of stock, the breeding of fowls, in the dairy industries, in fruit raising, and in tree planting, the state farms should be models. If they were under the guidance of the University teachers, they would become object lessons for those interested in progressive agricultural methods.

In the departments of animal chemistry, psychology, experimental physiology, and bacteriology, a close union between the University and the Hospitals would redound to the advantage of both institutions and to the increase of knowledge. In the

---

*Superintendent's Report.*

---

past, physicians have devoted enormous labor to the study of morbid anatomy, to the study of the dead body. In the future, the study of the living body will surely give more practical results than those obtained from the pathologies of the past. There are many insanities that are the result of chemical conditions or of toxic elements in the blood, which must be investigated while the body is alive. These investigations could be most advantageously conducted by the University. They require elaborate laboratory appliances, which the hospitals do not have. The state has spent several millions of dollars in caring for the insane but nothing to promote a scientific study of insanity. The various diseases that are grouped under the term insanity will, in the immediate future, cost the people of Wisconsin some millions of dollars. Not a dollar nor a thought has been given to prevent insanity.

The Hospital system as conducted throughout the civilized world increases the amount of insanity. Alcohol, syphilis, and heredity are the three great causes of insanity. "Civilization and Syphilization" appear to be permanently united. They are marching arm in arm across the years and no legislation is directed against the unholy alliance because it is an indelicate question. This with the vast and unrestricted extension of the liquor traffic, the enormous increase in the use of tobacco, the enervating life of cities, and the regular output of the hospitals guarantee an increasing amount of insanity for the state to care for. For the state to go on indefinitely paying immense sums of money to counteract the results of diseases without doing anything to lessen the causes—utterly ignoring prophylactics—is certainly a very short-sighted policy.

There have been several changes in the medical staff since the last report.

Dr. W. P. Broderick, who came in April, 1897, resigned in March, 1899.

Dr. T. B. Curran and Dr. John McIlwain were here for short periods.

---

*Northern Hospital.*

---

Dr. T. R. Jones has been appointed as Second Assistant Physician and Dr. R. J. Dysart as Third Assistant Physician.

Mr. E. E. Finney, after four years of service as Steward, resigned on the first of February, 1900. Mr. Finney left the Hospital with the best wishes and good will of all connected with the institution. He was succeeded by Mr. A. P. Aller, former superintendent of the Rock County Asylum.

The following newspapers have been sent gratuitously and have been distributed to the patients: Amerika, Appleton Weekly Post, Bayfield County Press, Berlin Weekly Journal, Brown County Democrat, Chilton Times, Depere News, Der Nord Western, Excelsior, Elkhorn Independent, Folkets Avis, Green Bay Review, Kewaunee Enterprise, Montello Express, Manitowoc Citizen, Omro Herald, Phillips Times, Sheboygan Zeitung, Slavie, Skandinaven, Sheboygan County News, Stevens Point Journal, The New North, The Gazette, The Advocate, The Germania, Wisconsin Free Press, Waupaca Republican, Waupun Times, Waukesha Freeman, Waupaca Post, Winnebago Anzeiger, Wisconsin Christian Advocate, and Watertown Weltburger.

The sincere thanks of all are extended to the proprietors of these publications for their generosity.

Mr. S. M. Eaton of Watertown presented the Hospital with a live badger which has been a constant source of pleasure.

Mr. Clyde Buckstaff of Oshkosh presented us with four English pheasants. The birds have attracted a great deal of attention from the patients.

My gratitude is due all the officers and employes of the Hospital for their fidelity, zeal, and efficiency in carrying on the important labor assigned to us.

For the unfailing kindness and courtesy that I have received from the Board of Control as a body and from its members as individuals I desire to here record my sincere appreciation.

Very respectfully,

W. A. GORDON,  
*Superintendent.*

---

*Matron's Report.*

---

## MATRON'S REPORT.

(For the biennial period, ending September 30, 1900.)

DR. W. A. GORDON, Superintendent.

*Sir:*—Herewith is an account of the foods and delicacies prepared in the kitchen during the last two years. Also a list of articles made and repaired in the mending and sewing rooms.

Yours respectfully,

MINNIE SCHIRIBER,

*Matron.*

*Preserves.*—Blackberries, 77 qts.; blueberries, 30 qts.; cherries, 58 qts.; currants, 24 qts.; gooseberries, 36 qts.; peaches, 206 qts.; raspberries, 131 qts.; strawberries, 194 qts.; spiced currants, 15 qts.; blackberry jam, 10 qts.; strawberry jam, 10 qts.

*Sweet Pickles.*—Crab apple, 35 qts.; peach, 30 qts.; pear, 45 qts.; currant jelly, 522 glasses.

*Pickles.*—Cucumbers, 53 gal.; peppers, 11 gal.; salad pickles, 3 gal.; Chutney, 4 qts.; tomatoes, canned, 1,682 gal.; Chilli-sauce, 493 gal.; Piccililli, 205 gal.; sauer kraut, 23 barrels.

## MENDING ROOM.

*Articles Made.*—Aprons, for men, 91; clothes bags, 150; napkins, hemmed, 48; stand covers, 72; towels, hemmed, 178; sheets, 96.

*Articles Repaired.*—Aprons, for men, 293; blankets, strong, 6; clothes bags, 143; coats, 285; drawers, 4,921; hose (pair), 7,720; pants, 680; pillow cases, 12; sheets, 99; shirts, 534; strong dresses, 50; strong suits, 132; table cloths, 21; vests, 189; vests, under, 4,165.

---

*Northern Hospital.*

---

## SEWING ROOM.

*Goods Repaired.*—Billiard table covers, 5; blankets, bound, 123; camisoles, 32; curtains (pairs), 10; coffee sacks, 18; dresses, 21; straight dresses, 9; straight suits, 9; shirt waists, 6; shirts, 10.

*Goods Made.*—Aprons, for men, 391; aprons, rubber, 9; aprons, feeding, 2; aprons, for women, 788; apron dresses, 9; aprons, barber, 2; blankets, strong, 6; blanket shoes (pairs), 35; billiard table covers, 5; bibs (dozen), 2; bath robes, 72; bed dresses, 4; corset covers, 10; chemise, 9; curtain cloths, 35; coffee sacks, 12; clothes bags, 22; camisoles, 6; cook's caps, 12; cook's jackets, 36; carriage cover, 1; covers, store tables, 4; covers, furniture, 9; curtains, hemmed (pair), 59; camisole string (yards), 80; dresses, 1,017; drawers, for men, 22; drawers, for women, 12; iron holders, 88; infants' slips, 6; dolls, for entertainments, 1; dresses for entertainments, 5; mattress ticks, 124; night dresses, 501; night caps, 13; napkins table, 350; napkins, cotton flannel, 1,129; pillow cases, 1,236; pillows, feathers, 6; pants, for men, 6; pudding bags, 50; rubber dresses, 3; restraint mitts (pair), 13; sheets, 2,086; shirts, 1,253; skirts, 951; sofa pillow covers, 4; straight dresses, 18; straight suits, 32; shirt waists, 13; screens, 18; shades, eye, 2; surgical baskets, 2; silence cloth, 1; sleeves, half (pair), 12; sausage bags, 24; towels, roller, 444; towels, 1 yd., 2,387; towels, 1½ yd., 88; towels, ½ yd., 141; table cloths, 354; wrappers, for women, 15; wrappers, for men, 6.

## SUPERINTENDENT'S REPORT.

---

*To the State Board of Control:*

GENTLEMEN: The close of another biennial period makes it my duty to lay before you the Ninth Biennial Report of the Wisconsin School for the Deaf; and, in so doing, it is a pleasure to present the following statement of its condition and progress during the biennial period which closes with the fiscal year ending September, 30th, 1900, it being my twenty-first, and the forty-ninth annual report of the school.

There were one hundred and ninety-three pupils present at the date of the last report, September 30th, 1898, and one hundred and seventy-two in attendance September 30th, 1899; the entire number present during the last year has been two hundred and seventeen (217); one hundred and ninety names still appear on the roll of the school, with one hundred and ninety present at this date, September 30th, 1900.

Since September 30th, 1898, sixty-two (62) new pupils have entered the school (28 girls and 34 boys), and thirteen (13) former pupils have returned. Of the fifty-one pupils who have left school within the last two years, sixteen were graduated, pursuant to examinations at the completion of the course of study; eight have received honorable discharges, when for various reasons their available time in the school had expired; three were discharged as incapable of receiving instruction, and one boy was dismissed. Others are detained at home by sickness or work; some have moved out of the state and six have gone to other schools, leaving twenty-seven absentees unaccounted for.

The average monthly attendance for 1899 was 195.2; for 1900 it was 175.7; the total cost of support for 1899 was \$37,850.05; for 1900 it was \$37,836.42, making a total cost per capita \$193.44 in 1899 or \$3.72 per week; and, on account of

---

*Wisconsin School for the Deaf.*

---

diminished attendance and extensive repairs, \$215.80 for 1900, which is \$4.15 per week. This statement includes the sum total expended for all purposes during two years; it covers the painting, renewals and repairs of buildings, the construction of new cement walks, and the erection, in front of the grounds, of that portion of the capital fence which was sent from Madison.

The names of graduates and honorably discharged pupils appear elsewhere; they have returned to their homes and taken up the duties of life in the communities in which they live. Two of the young men are now in Gallaudet College, Washington, D. C., pursuing higher courses of study; seven are supporting themselves at trades and farming, while the young women of the class do not lack testimonials from the home folks of their worth in domestic life.

Members of the school have enjoyed uniformly good health since the last report. Although many who have been the victims of accident and disease are left with enfeebled bodies, and others have inherited constitutional weakness, there have been very few cases of serious or alarming illness and no death has occurred at the school within the last three years.

The last visit of Drs. Solon Marks and U. O. B. Wingate, of the state board of health, was made October 20th, 1898; and, in their subsequent report, they stated that the sanitary and hygienic conditions at this school were the best in the state.

Pursuant to the appointment of the governor, the school was inspected by the legislative committee, composed of Senator Charles H. Baxter and Assemblymen P. H. Cashin and W. J. Wheeler, January 5th, 1899.

Governor Edward Scofield, accompanied by Lieutenant Governor Jesse Stone and Colonel William J. Anderson, carefully inspected the school in November, 1899; and the school was again honored by the presence of Governor Scofield, accompanied by Col. Daniel Starkey, March 14th, 1900.

State Superintendent L. D. Harvey, accompanied by Hon.

---

*Superintendent's Report.*

---

W. D. Parker, State Inspector of High Schools, made a thorough examination of the school in March, 1900, and both gentlemen were pleased to approve much that they saw in and about the school. The Course of Study is not included in this report, but remains the same as two years ago. Several unimportant changes have been made in the hours of recitation, but practically the daily program remains the same as before reported.

The principal buildings of this school were erected in 1880, and first occupied September 16th of that year, so that they are now twenty years old; but continued repairs and renewals have kept them in good condition, and the extensive painting of roofs and wood work authorized by the Board maintains their exterior appearance as fresh and attractive as when they were new. The most valuable improvement which the grounds have had in many years was the erection of a portion of the Capital fence in front of the grounds and the laying of 10,000 square feet of excellent cement walks. These substantial improvements suggest that further decoration of the beautiful grounds of the school and a more extensive cultivation of flowers would be in accord with the spirit of the times.

A detached hospital is needed for contagious diseases. Although the school can usually present a clean bill of health there are times when the welfare of pupils and a proper regard for their protection from epidemics would be completely subserved only by the provision of better hospital arrangements in connection with isolation.

The school is entirely dependent upon one dynamo for light and power; otherwise the light plant is adequate, safe and reliable; the installation of a second dynamo as a protection against accident is suggested by the possibility of a break down in the dynamo now in use, which would leave us without light. The employment of the second dynamo may require the enlargement of the engine room and the attention of the Board is invited to a consideration of this, our most urgent need.

*Wisconsin School for the Deaf.*

---

In this connection I would also call your attention to the old, out-of-date Prouty Press, which is still in use in our printing office, and urge most respectfully that the members of the board take any necessary action to secure a modern Power Press.

The usual work of the school has continued through the past two years without interruption or hindrance, special efforts have been made to employ the latest and best methods of instruction, without displacing those which have stood the test of time, and the results obtained are shown in the intelligence of its pupils, which amply compensate the state for its generous provisions in support of the school. The law contemplates an education that will fit the deaf for the duties of intelligent citizenship and prepare them for lives of useful industry and independent support. The school is endeavoring to do this by a course of study, an arrangement of classes, a division of the day into periods for study and work, and by the application of its teaching force in such a manner that symmetrical growth may ensue. There is no reflection on home influence in saying that the discipline of the school should, and does, produce strength of character, freedom of thought and action, self control and a practical knowledge of human nature beyond that which the average home affords. The homes of our pupils are good homes, but not always good schools, and the pupils themselves are usually the first to discover the superior advantages which the boarding school provides. The regularity, system and order which the school insists upon is, at first, irksome, but it soon becomes pleasant and easy, especially when it develops health, power and influence. With the acquisition of knowledge the deaf mute rises in his own estimation, as well as in the estimation of his fellow-men; he becomes a more valuable member of society, and although his life may be set with difficulties unknown to others, he also has compensations which others do not receive.

Educated deaf people are prepared to meet the obligations

---

*Superintendent's Report.*

---

of business, and to enjoy domestic and social life as others do; they may contribute to literature, be distinguished in art and occupy prominent pulpits and influential teachers' desks.

While public schools have been improving, courses of study and methods of teaching in schools for the deaf have improved still more. Every phase of the work is carefully considered, freely criticised and conscientiously applied by faithful and devoted teachers.

The rapid growth of oral teaching, the study of natural science by experiment, wider readings in general literature, and manual training, each contributes to the increased efficiency of the better way. Smaller classes permit more personal work; our classes now average eleven members, and in so doing employ constant and more general use of speech. The speech of many is defective, and their utterances often indistinct, but the aggregate of plain speech is enlarged, at least, in proportion to increasing oral instruction. There were ten oral classes in the school, composed of one hundred and seven pupils in 1898, and there are now eleven oral classes instructing one hundred and twenty-one pupils.

Drawing and writing, with studio work for advanced pupils, receive careful attention, and the gymnasium contributes its share toward promoting the health and discipline of the school. At the close of the gymnasium season in April, 1900, an exhibition was given which drew the warmest praise in commendation of the faithful and efficient training shown by the classes of Miss Carney and Mr. Hagerty.

The school realizes in manual training all that was expected of it. It has become one of the important parts of our educational system contributing to manual dexterity, mental acuteness and moral rectitude. Prof. E. J. Bending, in charge of this work with the boys, deserves special mention for the excellent effects which he has produced. I take pleasure in appending his report.

The periods allotted to recitation, work and study are so

---

*Wisconsin School for the Deaf.*

---

arranged that pupils in advanced classes have four hours daily for recitation, two hours for evening study and reading, and three and one-half hours for manual training and trades; intermediate pupils have four and one-half hours for recitation, with two and one-half hours for manual training and work; the lower grades have four and one-half hours in the school room, divided into short periods, with one hour for work and the rest of the day for recitation and play.

I would again most respectfully ask the Board to consider favorably the engagement of a competent oculist and aurist to assist the officers of the school in examining the organs of speech and hearing of new pupils, when they are admitted, so that the actual condition of each case may be more clearly understood.

Although a portion of the public may be misled by the alluring promises of the zealous adherents of the pure oral day-school movement for the education of the deaf, it is evident to many that pupils of these pure oral schools do not show sufficient intelligible speech to justify the state in limiting its instruction of the deaf to that method.

That there is advancement all along the educational line goes without saying; but improvement is not confined to speech, nor is it largely attributable thereto; it is rather distributed throughout the educational field and is seen in broader foundations in primary grades, more practical instruction in intermediate classes, and more thorough study near the end of the course. While we have better talkers, there also appears a greater familiarity with literature and language, a more intelligent knowledge of science, a wider reading of the information-giving subjects, and with it all increasing powers of observation, a better use of hands and feet, and consequently a more remunerative use of self in individual support.

In this school, work and its worth is recognized and insisted upon as the only suitable preparation for the subsequent activities of life, and the combined forces of the school are so di-

---

rected that boys and girls may be fitted for the proper discharge of home duties, domestic relations or for business. Immediately after admission new pupils are placed in oral classes in which the elementary sounds of the English language are taught. As soon as they are able to proceed in the acquisition of spoken language they are taught words and sentences expressive of ideas which they already possess and in this way are led on to colloquial exercises with the teacher. Speech and writing complement each other in the class, and, as ideas increase, the effort is made to express them orally. Speech and lip-reading also go together. Teacher and pupil soon understand each other, but strangers do not usually read the speech of deaf children with facility, as the ability to produce plain speech is not always evident, until after years of practice and experience.

The lines which mark intelligible speech are not clearly defined so that there is often room for differences of opinion relative to distinctness of utterance. What is plain to one is obscure to another, that which one apprehends with ease another may fail to understand; then again parents and those who expect but limited speech from the deaf are satisfied with less of distinctness than the school, or the more exacting public would demand; consequently there is often want of agreement among those most interested relative to what shall be considered successful efforts at speech. Parents often say that they see great improvement in voices when it is scarcely apparent to the teacher; but when parents are satisfied the school feels repaid for whatever effort it has made.

The speech of deaf people must of necessity continue to be imperfect, notwithstanding all that modern science and art may do so long as the vocal organ is defective. Deafness at and subsequent to birth interferes with the acquisition of natural tones, because hearing is a part of speech, an essential to its acquisition and retention, hence it follows that there will be some who are finally unable to acquire plain oral speech. Ob-

---

servation of many cases most favorable to the cultivation of speech justifies the above conclusion, and the consensus of public opinion, whenever it is familiar with the actual attainments of the deaf in vocal utterances will arrive at the same conclusion.

Endeavoring to teach speech as long as, and whenever, practicable to all classes of the deaf above the feeble-minded, this school instructs its pupils in the branches of a common school education, and feels amply repaid for all its labor when the foundations for a good English education are well laid.

There have been but few changes in the teaching force since the last report. Miss Florence Parry, after three years of efficient work, resigned February 1st, 1899, to become Mrs. Gledhill, and her place has since been filled by Miss Cornelia S. Goode of Madison, Ind., an experienced teacher, thoroughly familiar with the oral method of instruction, whose engagement has proved to be a valuable addition to the school.

Mrs. Florence Long resigned her position as teacher of gymnastics at the close of the term in 1899, after several years of eminently satisfactory work with the girls, and the duties of that position have since been assumed by Miss Julia Carney, one of our own graduates, who carries on the work with many indications of popularity and success.

Miss Lillian Sorrenson withdrew from the service of the school in June, 1900, for the purpose of taking advanced instruction in art, and is now a student in the celebrated Julien School of Art in Paris. Miss Sorenson expects to return to duty a year hence, and the school will then have the benefit of her broader experience. Miss Stella Fiske, an artist of recognized ability and a teacher of experience, has taken her place.

A. C. Bloodgood, foreman of the carpenter shop, declined an engagement for the ensuing year and has since gone to Waukegan, Ill., under an engagement to teach manual training in the public schools of that city, whither our best wishes attend him. D. E. Lee, a former instructor in the cabinet shop, has been engaged to take up his work.

---

*Superintendent's Report.*

---

A regular supply of the successive issues of city, country and institution papers has contributed much to the promotion of lively interest in reading among the pupils of the school. Home papers, which seem like personal letters to many, are eagerly perused; the news of the day is gleaned from the daily press, and exchanges from other schools for the deaf are greatly appreciated. In thanking publishers of papers for contributions in the past, we would bespeak a continuance of like favors in the future.

Public acknowledgment is hereby made of the courteous treatment which the pupils of the school have had in their annual trips to and from their homes for the summer vacations by the C., M. & St. P. R. R., C. & N. W. R. R., C., St. P., M. & O. R. R., and the Wisconsin Central. In twenty years' travel, no pupil of this school has ever gone astray, met with an accident or suffered any neglect or injury on any of these roads, for all of which we are most sincerely thankful.

In closing permit me to offer a well deserved tribute of appreciation and praise to the officers and teachers of the school who, with unflinching zeal and unceasing devotion, have carried on its arduous work from month to month and from year to year. Whatever attainments have been secured by the pupils of the school proceed, in large degree, from the constant inspiration and intelligent instruction of faithful teachers.

I am deeply conscious of the generous support and cordial co-operation in the work of the school, which members of the Honorable Board of Control have constantly furnished, and gratefully acknowledge all such assistance and advice as essential and valuable contributions to the success of the school.

Respectfully submitted,

JOHN W. SWILER,  
*Superintendent.*

Delavan, Wis., October 31st, 1900.

## REPORT ON MANUAL TRAINING.

J. W. SWILER,

*Superintendent Wisconsin School for the Deaf.*

DEAR SIR:—I have the honor to submit to you the following report of the Manual Training Department:

Since the establishment of this department in 1896, seventy-four boys have received instruction in the various branches. There are now six boys in the first year knife work; nine in the second year knife work; twelve in the second year carpentry and light construction; seven in drawing, bench work, turning and carving; eleven in advanced drawing, pattern work and molding, and six in forge work; a total of fifty-one boys receiving daily instruction in this department.

During the past year there has been quite a number of new exercises added to our course in wood work and forging. In arranging these exercises I have aimed to select those that would interest the boys and hold their attention and at the same time be practical and inexpensive.

I attended the Eastern Manual Training Teacher's Convention, June 28th, at Cleveland Ohio, and there saw a very fine display of work done by boys in some of the leading manual training schools, and I am proud to say that the work done by our boys in knife work, joiner work, cabinet work, wood turning or pattern work will compare favorably with any I saw at the exhibition.

In most of the manual training schools the boys only receive instruction from two to three hours per week and pass through the branches in four years; while in our school the boys receive from five to ten hours per week and remain in school eight or ten years. Thus it will be seen that it requires a great number and variety of exercises or the boys are making the same

---

*Report on Manual Training.*

---

exercises over and over again, and in so doing lose interest in the work; so we feel the need of a Band-Saw in the wood working room more than ever before to open up a larger field and greater variety of work.

The turning lathes, combination saw, forges and in fact all the tools and equipment have stood the test of four years' use and are in excellent condition.

In conclusion, I wish to thank you for the many words of encouragement and kindly interest shown in the work of my department.

Very respectfully submitted,

E. J. BENDING,

*Principal of Manual Training for Boys.*

## CLASS OF 1899.

*Names of the Graduates.*

Enga C. Anderson, North Cape.  
 Almon Hamilton Bell, Madison.  
 William H. Burmeister, Sparta.  
 Duncan Angus Cameron, LaCrosse.  
 Julia Isabella Carney, Russell.  
 Bridget Ella Doyle, Truman.  
 Gertrude Fleming, Jefferson.  
 Thomas Abram Irving, Russell.

Nettie Emily Hopkins, Weyauwega.  
 Arthur John Meehan, Darlington.  
 Joseph Mullen, Shullsburg.  
 Anna Northrop, Platteville.  
 Karl Julius Olson, Prairie Farm.  
 Catherine Peterson, Luck.  
 Mary Reynolds Stiles, Beloit.  
 Otis T. Zentzis, New Centerville.

*Class Honors.*

First Honor, Valedictory—Enga Anderson.  
 Second Honor, Salutatory—Julia I. Carney.  
 Industrial Employment: Four Carpenters, four Printers, one Shoemaker, seven Art Students.

*Honorably Discharged.*

## In 1899—

Clara Childs, New Richmond.  
 Cora Newell, Eau Claire.  
 Pearl Marks, Phillips.  
 Charles Marvin, Menomonie.  
 Carl Diers, Milwaukee.

## In 1900—

Bertha Eckerson, Delavan.  
 Fannie Jagla, Langlade.  
 Edward Nesting, Coon Valley, Wis.

**COUNTY REPRESENTATION.**

*By actual attendance of pupils September 30, 1900.*

Ashland—Charles Hallada, Ashland.

Barron—Matt Anderson, Dallas; Hattie McChesney, Turtle Lake; Edward Svacina, Dobie; John Woolhouse, Cumberland.

Burnett—Jennie Peterson, Grantsburg.

Caulmet—Bertha Thiessen, New Holstein.

Chippewa—Theresa Long, Chippewa Falls; Marie Moreau, Chippewa Falls; Amelia Rasmus, Bloomer; Herman Rasmus, Bloomer.

Clark—Annie Mostedt, Abbotsford.

Columbia—Carl Hamre, Joseph Hamre, Kyser; John Roembach, Kilbourn City.

Crawford—Amelia Seigert, Wauzeka.

Dane—Gerhard Brakke, Primrose; Clara Erdahl, Earl Erdahl, Stoughton; Malina Jerdee, Stoughton.

Dodge—Walter Dowe, Horicon; Harold Linde, Beaver Dam.

Dunn—Clara Anderson, Colfax; Robert Dickson, Waneka; Haldora Helgerson, Tonnar; Etta Phillips, Boyceville; Ralph Sutcliffe, Boyceville.

Eau Claire—Joseph Beisang, Eau Claire.

Forence—Eskil Fernquist, Commonwealth; Eric Johnson, Homestead.

Grant—Gertrude Ostrander, Boscobel; Frank Russell, British Hollow.

Green—Orville Adleman, Eldora Adleman, Oakley; Gwendolin Broderrick, Brodhead; Louisa Heibner, Monroe; Bernice Hopkins, Attica.

Green Lake—John Doro, Jere Epstein, Matilda Nimke, Evan Robinson, Berlin.

Iowa—Patrick Downey, Hollandale; Raphael Motelet, Ernest Rekow, Avoca.

Iron—Archie Trudeau, Saxon; Heys Borski, Hurley.

Jefferson—Carrie Fleming, Minnie Schweiger, Ida Negus, Jefferson; Edna Tyler, Aztalan; Emma Thelke, Farmington.

Kewaunee—Stephanie Wery, Thiry-Daems; John Wettering, Krok.

Lafayette—Joseph Ryan, Argyle.

Langlade—Fannie Jagla, Antigo.

Lincoln—Elizabeth Hermann, Tomahawk; Ole Sorrenson, Merrill.

Manitowoc—Herbert Commers, Two Rivers.

Marinette—Adolor Bone, Marinette.

Milwaukee—May Busby, Charles Feldt, Katharine McGarry, Elizabeth Zerving, Milwaukee.

Monroe—Emily Hirte, Norwalk.

Oconto—Frederick Christianson, Hickory; George Gilkey, Oconto; Clarence Herald, Oconto.

---

*Statistical Tables.*

---

Oneida—George Gross, Rhinelander.

Outagamie—Henry Berholz, Appleton; George Hahner, Kaukauna; Rudolph Kuehnl, Dale; Nona Maahs, Appleton; John Otto, Binghamton; Lawrence Schoess, Appleton.

Pierce—Grace Scroggie, Jennette Scroggie, William Brown, Louise Clobes, River Falls; Floyd Bulmer, Rock Elm; Fred Emmons, Prescott; Helmer Hanson, Spring Valley.

Polk—Efhel Decker, Clear Lake; Ray B. Foster, Luck; Carl Knutson, Richardson; Charles Larson, Duerholm.

Portage—Ray Higgins, McDill.

Richland—Curtiss Kidd, Bloom City; Harvey Sommars, Viola.

Rock—George Anderson, Roy Grimsee, Clinton; Gertie Lawrence, Janesville; Albert Reimer, George Reimer, Ruth Rockwood, Milton; Dennie Sullivan, Janesville.

Racine—Frederika Due, Racine; Elmer Rolfson, Emma Rolfson, Anna Rolfson, Waterford; Mida Wilson, Racine.

St. Croix—John Amondson, Deer Park; Eliza Brickley, Bridget Dieveney, New Richmond; Laura Broton, Hudson; Mary Boback, Annie Boback, Mabel Landry, Nora Landry, Woodville.

Sauk—Laura Blackman, North Freedom; James Sprague, Prairie du Sac; Rosa Wartzok, Emma Wartzok, Leland.

Shawano—Charles Kuschel, Anima; Archie Williams, Gresham; Isabel Tousey, Gresham.

Taylor—Anna Gersdorf, Caroline Gersdorf, Medford.

Trempealeau—Ole Hougstad, Glasgow; Carl Luken, Blair; Ferdinand Smith, Arcadia.

Vernon—Adela M. Gillardi, Rest; Caroline A. Jacobson, Debello; Edward N. Nesting, Coon Valley; Josephine Thompson, Viroqua; Daisy Wood, Liberty; Don Worman, De Soto; Henry Spears, Stoddard.

Walworth—Alvina Berndt, Allens Grove; Ernst Blumer, East Delavan; Willard Chapman, Little Prairie; Bertha Eckerson, Leon Fiske, Delavan; William Gosso, Darien; Arrill Herrick, East Troy; Eliazbeth Schoepski, Sharon; Maud Stryker, Tibbits; Eunice Taylor, La Grange; Jennie Williams, Delavan; Guy Vergeront, Elkhorn.

Washington—Gustav Schaefer, Kewaskum; Barbara Zuerst, Hartford.

Waukesha—Clara Baker, Monterey; Charles W. Klein, Minnie Schaetzel, Waukesha.

Waupaca—Guy Miller, Waupaca; Silas Phillips, Clintonville.

Winnebago—Leslie Barlow, Omro; Ethel Snider, Neenah; Mary Williams, Neenah.

## TERMS OF ADMISSION.

Located at Delavan, in Walworth county, Wisconsin, on the southwestern division of the Chicago, Milwaukee & St. Paul Railway, incorporated by act of Legislature, April 19, 1852. The school buildings stand on the hill west of the village, which secures perfect drainage, and gives a commanding view of one of the most beautiful landscapes in all Wisconsin, diversified by forest, prairie, river and lake. Remarkable immunity from disease through a long series of years attests the healthfulness of the place, while the quiet, orderly village in which the school is located affords the ideal site for an institution of learning.

Deafmutes of Wisconsin of proper age are admitted to all the privileges of the school free of charge, being furnished tuition, books, board and washing. There is no charge for board and tuition of children living in this state. Friends are expected to pay traveling and incidental expenses, and to provide clothing, a sufficient supply of which should be furnished at the beginning of the school year or sent by express as needed. All articles should be distinctly marked with the owner's name. Five dollars should also be deposited with the superintendent at the commencement of the year to defray incidental expenses, such as repair shoes, postage, etc.

Bear in mind this is not a hospital, an asylum for the dependent, or a reform school for the vicious, but simply a School for the Deaf. The school is maintained by the state of Wisconsin for the education of those children within her borders who, on account of deafness, are unable to receive instruction in the common schools. It has two departments:

FIRST—The school: in which the pupils are taught writing, reading, composition, arithmetic, geography, history, natural science, penmanship and drawing. In the oral department, composed of eight full classes, instruction in lip-reading and speech is given to semi-mutes and capable congenital mutes. The course of training also includes calisthenics and light gymnastics.

SECOND—Manual training in connection with trade schools: in which bench-work and all sorts of joinery in wood, forging and mouding, needework, baking, cooking, carpentry, shoemaking and printing are taught.

The law provides that all deaf residents of this state, of proper age and suitable capacity to receive instruction, shall be received and taught free of charge. The regular course of instruction occupies about ten years. The latest and best charts, etc., so far as they are

---

*Wisconsin School for the Deaf.*

---

adapted to deafmute instruction, are employed. Articulation and lip-reading is taught by teachers of skill and experience, with very gratifying success. The day is divided into hours for labor, study and recreation, with the design of securing habits of industry and promoting health as well as intellectual and moral development. No leave of absence is granted during the term except in cases of sickness or extreme necessity. A blank form of application is sent to anyone wishing to send a child to this school. No child should be sent or brought to school until the application, properly filled, has been accepted and notice of the same returned to the person making application. Candidates for admission should not be under seven nor more than twenty years of age of sound mind and good morals. Imbecile, idiotic or feeble-minded children will not be received. Each pupil should be provided with a trunk containing a year's supply of plain, comfortable clothing, marked in indelible ink, with the name in full. The annual session begins the second Wednesday in September and continues forty weeks. The proper time for the admission of pupils is the beginning of the term, and under ordinary circumstances, none will be received at any other time. Except in cases of sickness, all pupils are expected to remain during the entire term; but the Superintendent may require the removal, at any time, of pupils whose condition, moral, mental, or physical, is not such as to warrant their continuance. The summer vacation extends from June to September. Pupils are sent home promptly at the close of the term, accompanied to prominent railroad points by messengers from the Institution. Friends will be expected to meet them at places designated. Ten terms will be required to complete the course of study by most of those without previous instruction. Pupils from other schools will be examined before being classified. All letters and packages for pupils should be marked "Wisconsin School for the Deaf, Delavan, Wis." Express matter and telegrams should be prepaid. Letters in regard to pupils or application for admission should be addressed to the Superintendent. Any information or letters of inquiry in regard to deaf children or their education should be addressed,

JOHN W. SWILER, *Superintendent,*

Delavan, Wis.

In this connection city and county superintendents of schools should read sec. 3, chapter 331, laws of Wisconsin, session of 1891, as follows:

"SECTION 3. It shall be the duty of each county and city superintendent of schools to send to the superintendent of the state school for the deaf at Delavan and to the superintendent of the state school

*Statistical Tables.*

for the blind at Janesville, the address of parents with the name and age of each deaf or blind child known to be in his county, and to inform parents, guardians and custodians of deaf mutes and blind children in his county or city respecting the several schools for deaf mutes and blind in the state, and the conditions of admission to them; and for this purpose, the superintendents of such institutions shall provide each such superintendent with sufficient printed information and with the names and residences of all deaf mutes and blind children known to be in his county or city. And each such superintendent shall include in his annual report to the county board of supervisors or the city board of education, a statement of the number of deaf mutes and blind children of school age in such county or city then receiving an education, or the number of each not receiving an education, and of the number of personal visits he has made during the year, upon the parents, guardians or custodians of such children, to induce them to give such children a proper education."

## SUPERINTENDENT'S REPORT.

---

*To the State Board of Control:*

GENTLEMEN: Agreeable to custom I submit herewith the fifteenth annual and ninth biennial report of the State School for the Blind.

The two years just closed have not been remarkable, except in the development of child life which is always an interesting study in the institution. The various departments of work have been faithfully handled, and while results have not always realized our ambitions, yet substantial progress has been made.

### LITERARY DEPARTMENT.

The work in this department has been emphasized by a desire to store the mind with useful knowledge, and both pupil and teacher have worked together with an interest that has been very gratifying. Thorough advancement has been made, and the rating of the individual scholar has been uniformly good. The brain of the blind like the brain of the seeing is not always capable of mastering and retaining a knowledge of books, yet the percentage of our scholars that graduate from this department is much larger than the percentage of graduates from the public schools. This is due to the fact that they are persistently held to their work until experience determines that they lack ability in this direction. If it were possible for the blind to enter the universities and colleges and receive the advantages of higher education, they would make a good showing in literary attainment. Yet, aside from the culture and satisfaction that this kind of development furnishes, there would be nothing practical in it for every-day life, because of the fact that almost every avenue in the literary field is closed to them.

---

*Wisconsin School for the Blind.*

---

While I am thoroughly alive to the refining influences that a purely literary education brings to the blind, yet I am as thoroughly convinced that if they are to become in any degree self-supporting after they leave school, the education of the hand and a practical knowledge of some industry that may be within their grasp is of vital importance. I do not feel warranted at this time in recommending any radical changes, but am confident that industrial training for the blind should be emphasized and more intelligently administered.

**MUSIC.**

The progress in music, both vocal and instrumental, has been very satisfactory. Almost every pupil that comes to us brings a request from his parents that he be instructed in music, and this faculty is cultivated and developed with untiring patience. More than half the school receives piano instruction. Fourteen boys are members of the orchestra; the pipe organ is in daily use; the entire school are members of chorus classes, and individual voice culture is given whenever special talent is discovered.

Music as an accomplishment for the blind is more marked than any other faculty, and a small percentage of pupils from this department succeed in turning their knowledge to practical account. I am satisfied, however, that aside from the sentiment and sympathy that is always associated with our thought for the blind, much of the time spent by the indifferent scholar in an attempt to acquire a musical education, could be employed to better advantage along more practical lines. This is of course assuming that the education of the blind means more than sentiment and sympathy for their condition, and I am not prepared to believe but that many of them with the right kind of training can be made self-supporting.

**PIANO TUNING.**

The work in this department has been very gratifying, and the school has graduated some excellent tuners who are taking

---

*Superintendent's Report.*

---

care of themselves and doing good work. The boys for this class are selected with reference to their ability and adaptability, and a larger percentage of them succeed than from any other department of the school. The best workmen possess some musical talent, mechanical genius, a spirit of independence and self reliance, tact in meeting and approaching people, and an ambition for business. Where these qualities are combined under the guidance and instruction of a good teacher who possesses them all, the result in a reasonable time is a successful workman.

The class at present numbers twelve bright young men who will be heard from after they leave school.

## INDUSTRIAL DEPARTMENT.

No changes of great importance have been made in this department during the past two years, and the usual progress, which is far from satisfactory, has been made. This branch of work occupies, as it always has in the institution, a secondary place, and will doubtless continue to, so long as the present popular sentiment and ignorance prevail concerning the practical education of the blind.

The boys' workshop is the loft of what is known as the boys' building. It is filled with a lot of out-of-date machinery, and occupied by the men who come to us through accidental blindness, to be taught some light handicraft that may help them to gain a livelihood. There is also in attendance quite a large class of boys from twelve to fifteen years of age, who find time before they reach the age when literary work and music absorb all their time, to spend an hour or two each day in learning to make hammocks and perform other light work. The work is in charge of a blind man who for many years has acted as teacher. He is faithful and competent for the incomplete work demanded of him.

The weaving room is on the first floor of the same building, and is also quite ancient in its equipment. A few men and

---

*Wisconsin School for the Blind.*

---

occasionally a young woman who lacks the mental capacity to take a literary course, are the occupants of this room. The results from the weaving room are, however, satisfactory, and the graduates from this department usually do something for themselves after they leave us.

The more I study the conditions of the blind the more thoroughly I am convinced that industrial education, not only in this state, but in all states, is sadly neglected. Our boys and girls leave us after a long term of years, many of them mentally and musically well equipped,—they go back to the humble homes and plain environments from which a large majority of them came, filled with ambition to apply the education that they have acquired, yet doomed almost invariably to disappointment because the hand that might have helped them work out a destiny has been neglected. They have passed the formative years when the moulding of the mind and the education of the hand is easy, and with the passing they have also lost the ambition for humble work, a difficult thing to regain. As a result, they frequently become helpless citizens. Conditions would be different if, during the years of school life, there had been instilled into their blood and brains a little less of the literary and musical and more of the industrial and practical.

If I were authorized to suggest radical changes, they would be along this line. The industrial department should be as prominent and as thoroughly equipped as any department of the work. To accomplish this a modern building that would accommodate at least half of the school at one time, under the supervision of the best teachers that could be employed, would be necessary. It would contain weaving rooms that would accommodate twenty girls, who would be required to learn a trade that would mean to many of them a means of self-support. Independence with a carpet loom is a better companion for life, than dependence and a head full of unapplied knowledge.

I am aware that these radical views are not popular with

*Superintendent's Report.*

the average educator, but they are forced upon me as the result of observation and a limited experience in an effort to help in a practical way a class of citizens that the state is so generously providing for.

ATTENDANCE.

The attendance of the school has not varied much from the two preceding years. More young children have come to us than at any time before and the average of the school makes a much better showing. The matron made a partial tour of the state during the summer vacation, in the interests of the school, and succeeded in finding quite a large number of children who should be in the institution. Some of them are already enrolled and others will follow.

ENROLLMENT.

The enrollment Oct. 1st, 1898, was .....	105
Admitted to Oct. 1, 1899 .....	27
Total .....	132
Graduated .....	7
Dropped during the year .....	17
Remaining on roll Oct. 1, 1899 .....	108
Admitted to Oct. 1, 1900 .....	33
Total .....	141
Dropped during the year .....	30
Remaining on roll Oct. 1, 1900 .....	111

HEALTH.

The health of the school has been remarkably good, owing in part to the faithful work of the matrons, the improved sanitary conditions of the buildings, a wholesome and liberal diet, and the excellent physical training under the intelligent direction of one of the best teachers in the state.

---

*Wisconsin School for the Blind.*

---

## DEATHS.

Two deaths have occurred in the institution since my last report. Arthur Edwards, of Oconto, aged 17 years, one of our brightest boys, died suddenly in May, 1899, as the result of an injury sustained before he entered the school. Mrs. Ellen Hansen, who for more than half her life was connected with the school, was found dead in her room one Sunday morning, early in March of this year. She had been in usual health and her sudden death was caused by the bursting of a varicose vein. At the time of her death and for many years previous she had been the teacher of the weaving department. She was a faithful worker, and enjoyed the love and confidence of the entire household. The impress of her life will be reflected in the lives of her pupils for many years to come.

## THE STATE PROPERTY.

Nothing new has been added in the way of buildings during the past two years, but under the direction of the Board, many permanent improvements have been made. The buildings have been painted and thoroughly renovated. The bath rooms and toilet rooms are supplied with modern fixtures. New cement walks have replaced the old wooden ones. The kitchen has been equipped with new oven, range, steam cookers, and modern appliances. The wants of the school have not been overlooked. A typewriting department with modern machines has been added. Three Chickering pianos and a number of fine orchestral instruments have reinforced our musical equipment. The institution is modern and up-to-date as compared with schools of this class in other states.

## THE JUBILEE.

The semi-centennial jubilee was celebrated at the close of school in June, 1900. The program was arranged by the alumni, and was very interesting. About fifty of the adult blind

---

*Superintendent's Report.*

---

of the state, former pupils, were in attendance, as was also Mrs. Sarah C. Little, their former superintendent. It was the most notable gathering of blind people that ever occurred in the state, and will long be remembered by those who were present.

## CONCLUSION.

In conclusion permit me to say that whatever of success has come to the work is due to the intelligent and loyal co-operation of a splendid board of teachers, who have been faithful to their trust, and to the generous policy pursued by your honorable body in promptly anticipating and meeting the wants of the institution.

Thanking you for the many courtesies extended, I am

Very cordially,

H. F. BLISS,

*Superintendent.*

H. R. RAWSON.....	STATE AGENT.
E. L. BULLARD .....	PHYSICIAN.

## SUPERINTENDENT'S REPORT.

---

*To the State Board of Control:*

I hereby submit to you the report of the Wisconsin Industrial School for Boys, for the biennial period ending September 30th, 1900.

### GENERAL ADMINISTRATION.

The resolution of the Board giving to the superintendent the entire power of appointment and removal of employes, rigidly adhered to in this institution in every instance, has not failed in the results intended. Employes have been selected only for fitness, without regard to political, religious or other foreign conditions, and have been dismissed for incompetency only. This has created a larger feeling of personal freedom among those employed, while at the same time increasing the merit of their service and their loyalty to the work. The need of the continuance of the operation of this resolution cannot be too greatly emphasized. Faithfulness in work, with undivided attention to the same can never be obtained from employes who hold their places by virtue of any "pull" apart from the pull that comes from superior work. Few changes are necessary in a work of this kind and few have been made. In no instance has any employe been discharged to make a place for anyone's favorite. The co-operation of employes has been given earnestly in most cases, and the intelligent appreciation of the character of the work is a source of constant satisfaction. This institution has few if any employes who are simply holding jobs, and it needs none.

### HEALTH.

The general health of the boys has been excellent. There have been no contagious diseases or epidemics nor has there been

---

*Industrial School for Boys.*

---

any death during the two years. The men and women in charge of families have shown a kind interest in the boyish complaints that the boys of their families have had and have almost uniformly tried to supply the loss that a boy feels when he is sick away from his mother. Every effort has been made to give home-like care to every lad.

During the past year the method of the employment of the physician has been changed. The old method of paying for each call for actual service was found cumbersome and not always wise. Calls would sometimes be delayed to save expense even when the best care was taken.

Consequently the physician was placed upon the pay roll at a definite salary based upon previous average bills. I wish especially to commend the services of the physician, Dr. E. L. Bullard, whose patient and painstaking care of our homeless and too often friendless boys, has been no less faithful than that that is usually rendered to the richest and most influential.

A physician's record is kept in which is noted by the physician a history of every case treated.

#### DISCIPLINE.

A chief element in an industrial school is its discipline. A school does the work for which it was created, in proportion as its discipline is suited to its conditions. It is not a jail, nor a place of detention, but a place where a boy, uncontrollable at home, finds order and control his daily atmosphere. The discipline, therefore, does not consist of punishment, angrily and spasmodically administered, but of steady, even-tempered insistence upon a boy's walking along right lines, made comparatively easy for him to find. Regularity of living, the formation of habits of industry, and the removal of often-times nagging temptations to wrong doing, are the lines along which the boy must move to better manhood.

An element absolutely necessary to the healthy discipline of an institution is the spirit of mutual confidence between the

---

*Superintendent's Report.*

---

employes and the boys. Many boys, indeed most of those who come, have the spirit of "every man's hand against them and their hands against everybody." The law is to them not a protector but an enemy. It is very satisfactory to state that during the past two years a feeling of mutual interest, between boys and employes, has been brought about so completely as to be almost surprising. More and more the employes have been able to believe in the future possibility of the boys, and more and more the boys have accustomed themselves to regard the employes as his best friends.

## PUNISHMENT.

Many good people seriously believe that an industrial school should be the possessor of some secret, but blessed and beautiful system, whereby a boy, a terror to his family and neighbors, from dear love for the officers of the school, entire strangers to him, would at once cease his meanness and become docile and lamblike. This school has not discovered the secret. Various modes of punishment are employed, suited to the offense, and to the age and disposition of the boy. But whatever the mode, an offense that is committed wilfully is followed by swift and sure punishment. All cases of corporal punishment are reported to the superintendent and the merits of the case investigated. While it is believed here that whipping will always continue to be the best method of severe punishment, the number of such punishments has been greatly decreased during the last few years, until now the number of whippings is only about three a week, and of these almost none are inflicted upon small boys.

## THE GRADING SYSTEM.

Since December 1st, 1897, the school has used what is called "The Demerit System." Upon entering the school each boy is given from twenty to sixty demerits, based upon a careful study of the evidence in the commitment papers and the history of

---

*Industrial School for Boys.*

---

the boy. One of these he removes each month in which he receives no report for misconduct. A report in any month adds to the number of demerits. The system is cumulative, allowing a boy to remove an extra demerit for each successive quarter in which he receives no report. Extra demerits are also removed for especial merit in school or at work. Reports are made daily to the superintendent and an accurate record is kept of every boy's conduct.

The success of this system up to date has been quite satisfactory. It required some time for the boys to learn that bad conduct meant certain increase of the period of detention. But the lesson has finally been pretty thoroughly learned and cannot fail in helping the boy to learn that larger lesson of life, that one is pretty sure to pay for his deeds. Indeed the whole system of discipline of this institution seeks this end of clearly teaching boys whose environment has been lawless, that law is simply the return of the deed to the doer of the same.

No system of grading, however, can be absolutely perfect. Hence the superintendent reserves the right of arbitrary grading when found necessary.

#### PAROLE.

November 1st, 1897, the board meeting for parole purposes was abolished by the State Board of Control. Parole is no longer granted upon petition, but only upon recommendation by the superintendent. The mode of parole is as follows: When, by good conduct, a boy has removed all his demerits his name is given to the field agent, who visits his home. Careful investigation is made into the fitness of the home and the probabilities of the boy's falling into his old ways and among his old companions. If the home is found to be a proper one, and we are always prejudiced in its favor, the boy's name is sent to the Board of Control, with a description of the case, when he is passed upon according to the law and sent to his home.

---

*Superintendent's Report.*

---

## HOMELESS BOYS.

A large number of the boys who are sent to the school are homeless or come from vicious homes. It is not our policy to allow these to congest in the institution by long periods of detention. Boys may become victims of a life in an institution if that life is too long continued there. Correction, not mere existence, is the excuse for our work. As soon as consistent a boy must be given a chance in the outside life of the world. Hence, for these homeless lads, homes are found by the field agent, carefully investigated as to their needs and character, and suitable boys are placed therein. We are very glad to say that no trouble is experienced in finding a sufficient number of good country homes. The one need is a closer relationship to a few large manufactories and machine shops where places could be secured for such older boys who have shown a special fitness for mechanical employment. Not all our boys will make good farmers.

## FUTURE HISTORY OF BOYS.

Constant care is being taken in looking after paroled boys. This is done by two methods. Boys are required to write us at least once a quarter, stating in detail what they are doing. These letters are kept on file and a separate record of dates of letters received and answered is also kept. By this means the whereabouts of the boy is always known. The field agent visits each boy at least once a quarter giving such counsel and encouragement as is needed. An accurate account of all these visits is kept in the agent's record, so that they can be referred to at any time.

As a partial answer to the question "Do Reform Schools reform?" heard so often by people with a new hobby, the following statement of the whereabouts of our boys is given. The period selected is from Nov. 1st, 1897, to Jan. 1st, 1900. The first date is chosen because no future history was kept before

*Industrial School for Boys.*

that time; and the last one, in order that nearly a year may be given for the outside movement of the last boy considered:

Total number paroled.....	352
Returned .....	31
Known to have been under arrest since, but not returned.....	13
Whereabouts unknown, but under 21 .....	29
Of age.....	41
Of age known to be doing well .....	21
In the army.....	10
Dead.....	5
Still out but not doing very well .....	4
Out of state.....	12
Out of state but known to be doing well.....	4
Doing well at home .....	150
Doing well on place.....	63

The fact that some names are found in more than one class will account for the apparent discrepancy in the total. This gives a total of over 70 per cent. who are known to be doing creditably, leaving out of the reckoning the unknown and the dead. Or from another standpoint, 70 per cent. doing well, 13½ per cent. doing badly and the balance dead, of age and unknown.

The institution does not claim to be responsible for the entire well being of the 70 per cent., as many would have done well without us. The table above may, however, serve to show that we are not the feeders of prisons and jails that irresponsible police officers and reformers sometimes represent institutions of this character to be.

The importance of the work of caring for paroled boys will be better understood when it is known that there are 727 boys out on parole still under twenty-one years of age, as shown by table elsewhere.

## INDUSTRIES.

The school maintains a large number of varied industries. It, however, sells few products, as the work is largely for our own needs. The boys make their own clothing, shoes and

---

*Superintendent's Report.*

---

socks, run their own laundry, do the general repair work for the school, and furnish all the labor for the farm and garden. The distribution of labor is shown in the statistical tables. Some boys learn trades, but the prevailing notion that all boys or that any considerable number, can learn trades here that they will follow through life is incorrect.

## HOURS OF EMPLOYMENT.

The active work of the day is divided into four sessions of two hours each. Each boy attends school two of these sessions and works two. Saturday forenoon is devoted to letter writing, and Saturday afternoon is a half holiday. During this afternoon the boys indulge in the usual games of boys anywhere. The school sustains a baseball team and a football team in the season and makes schedules of games both on our own grounds and return games with teams in neighboring villages. During the past two years the record of our teams has been quite to our credit and the games have been a source of enjoyment as well as an aid to cheerful discipline.

## DEPARTMENT OF EDUCATION.

Mr. J. K. McGregor, appointed assistant superintendent December 1st, 1897, still remains in direct charge of the distinctly educational work of the institution. His high standing among the educators of the state gives assurance of excellent work in this department. His report follows:

The schools of this institution have made commendable progress in several directions during the last two years. Particular stress has been laid on reading for the thought and on reproducing the thought, orally and by writing, in an intelligent manner. A large proportion of our boys come with little training of this kind probably on account of irregular attendance or non-attendance at the schools of their homes, and are inclined to make of the reading exercise a mechanical performance. To overcome this defect a large amount of reading matter is used;

---

*Industrial School for Boys.*

---

three books in six months being the minimum for a grade. Nearly all use four and some select from even a greater number.

Penmanship has also received close attention and it is gratifying to note the appreciation of parents expressed in letters to their boys, wherein they so often commend them for their progress and urge them to make further improvement.

The course of study is substantially what it was two years ago. A few minor changes have been made from time to time as circumstances seem to warrant or require.

## COURSE OF STUDY.

*First Grade.*

Reading: First half of reading by grades, first year. First half of Appleton's First Reader.

Language: Every oral or written lesson to be a lesson in the correct use of language. Exercises specially arranged to correct faulty expressions. Use of capitals, periods, and interrogation points taught and practiced.

Arithmetic: Simple operations, mental and written. To section IV., arithmetic by grades, book I.

Spelling: All words of reading lessons.

Penmanship: Daily lessons, Spencerian No. I., vertical system.

*Second Grade.*

Reading: Second half of reading by grades, first year. Appleton's First Reader finished. Lane's stories for children, Around the World, Harper's First Reader.

Language: Use subject matter of reading lessons for language lessons. Pupils copy, memorize and reproduce suitable parts. Teach memory gems and have pupils recite them in concert. Notice errors most commonly made and plan corrective work.

Arithmetic: Finish No. I., and to section III., No. II. Daily drills and reviews.

---

*Superintendent's Report.*

---

Spelling: All words used.

Penmanship. No. I.

*Third Grade.*

Reading: First half of Harper's Second, Appleton's Second, Fables and Folk Stories, Feathers and Furs.

Language: Use of correct forms of words. Dictation exercises with special attention to capitals and terminal marks. Story reproduction. Special work to secure correct use of *is* and *are*; *was* and *were*; *has* and *have*; *this* and *these*; *that* and *those*, etc.

Arithmetic: Finish book II. Drill on previous work. Insist on neat work and accurate statements as well as correct results.

Geography: Oral lessons and occasional talks on geographical subjects. Shape of earth. Continents and oceans named and located on artificial globe.

Spelling: All words used.

Penmanship: No. II.

*Fourth Grade.*

Reading: Finish Harper's Second. Reading by grades, second year. Stories of Great Americans for Little Americans.

Language: Continue as in third grade. Dictation and observation work. Reproductions, stories, and letters. Use of commas, quotation marks, and terminal marks. Plurals formed by adding *s* or *es* to singular form. Correct use of parts of verbs with which mistakes are likely to occur, such as *saw*, *see*, *break*, *broken*, *went*, *gone*, *come*, *came*, *hear*, *heard*, etc.

Arithmetic: To section VI., Book III., or Werner's Book I., 94 pages. Review frequently. Work for neatness, speed, and accuracy. Prefer mental to written work.

Geography: Points of compass. Directions on maps and globes. Teach rivers, mountains, lakes, and cities on map of United States.

---

*Industrial School for Boys.*

---

Spelling: All words used.

Penmanship: No. II. Make every written exercise an exercise in penmanship.

*Fifth Grade.*

Reading: First half of Harper's Third. Reading by grades, third year. Stories Mother Nature Told Her Children. Stories of American life and adventure.

Geography: Shape of earth. Divisions of surface into zones and continents. Position and shape of divisions. Map of Wisconsin.

Language: Maxwell's First Book in English, Part I. Keep up reproduction work. Correct errors in capitalization, punctuation, etc.

Arithmetic: Finish book III., and to section IV., book IV., or Werner's book I., to page 175.

Spelling: All words used.

Penmanship. No. III.

*Sixth Grade.*

Reading: Second half of Harper's Third, Story of Henry Clay, Historical Reader, Wings and Fins.

Geography: Werner's Introductory to Alaska, page 102.

Language: Maxwell's first book, part II. Supplementary work as in fifth grade.

Arithmetic: Finish book IV., Prince, or Werner's No. I. Use many problems not found in text, selected or made with reference to the needs of your class.

Spelling: All words used.

Penmanship: No. III.

*Seventh Grade.*

Reading: First half of Harper's Fourth, Snow Bound, Story of George Washington, Flyers and Creepers.

Language: Maxwell's First Book in English, Part III.

---

*Superintendent's Report.*

---

- Geography: Introductory geography finished.  
Physiology: To page 60, Smith's Primer.  
Arithmetic: To section V., book V., or to page 100, Werner's No. II.  
Spelling: As in previous grades.  
Penmanship: No. IV.

*Eighth Grade.*

Reading: Second half of Harper's Fourth, Lady of the Lake, Story of Abraham Lincoln, Story of Our Country.

Language: Introductory lessons in English to lesson XXI. Reproductions, abstracts, compositions, letter writing, and business forms.

Geography: Werner's School Geography, 174 pages.

Physiology: Finish primer.

Arithmetic: Finish book V., and to section IV., book VI., or finish Werner's No. II.

Spelling: All words used.

Penmanship: Book IV.

*Ninth Grade.*

Reading: American Classics, Story of Franklin, Carpenter's Asia, Sketch book.

Language: Introductory lessons, to lesson XXXIV.

Geography: Finish Werner's School Geography.

Physiology: To page 98, "The Human Body."

Arithmetic: Finish Book No. VI., or first half of Werner's No. III.

Spelling: All words used.

Penmanship: No. V.

*Tenth Grade.*

Reading: British Classics, Four Patriots, American Citizen, Claws and Hoofs.

Language: Introductory lessons, to chapter XXXIV.

---

*Industrial School for Boys.*

---

U. S. History: Discovery and settlement to revolutionary war.

Physiology: Finish "The Human Body."

Arithmetic: To section VI., book VII., or finish Werner's No. III. Supplement where needed in all grades.

Spelling: All words used.

Penmanship: No. VI.

*Eleventh Grade.*

Reading: Hiawatha, Evangeline, Story of Webster, Kingsley's Greek Heroes.

Language: Introductory lessons, to lesson XLVI.

U. S. History: To civil war.

Arithmetic: Finish book VII. and 60 pages of No. VIII., or review Werner No. III.

Spelling: As in previous grades.

*Twelfth Grade.*

Reading: Ivanhoe, Courtship of Miles Standish, A Hunting of the Deer.

Language: Introductory lessons finished. Composition writing in all grades.

U. S. History: Finish.

Arithmetic: Kennedy's Mensuration.

U. S. Constitution: Townsend's Shorter Course.

Book Keeping: Single entry.

EXTRA GRADE.

It occasionally happens that a class of boys complete the regular course before being paroled in which case an extra class is provided wherein they receive instruction in advanced subjects such as algebra, physical geography, physics, and shorthand. A class of eleven belonging to the eleventh and twelfth grades is now instructed in the last named subject by the stenographer of the institution, a young man who, as an inmate of the school,

---

*Superintendent's Report.*

---

received the training that qualifies him for the position he now holds.

Semi-annual promotions based on proficiency are in the main satisfactory. The lock-step features are eliminated by promoting individuals or classes whenever the good of the pupils seems to require it. Every boy understands that promotions are not regulated by the calendar but by his progress and he is encouraged to push ahead and to overtake the grade next above him.

#### MANUAL TRAINING.

Within the last two years the manual training department has been thoroughly reorganized and fully equipped. The wood working shop is at present arranged for classes of twelve each. In a few days conveniences for classes of sixteen each will be completed.

The course of study in the wood working department embraces the most desirable features of the Russian and the Swedish systems. General cultivation of the hand such as will enable it to respond quickly and rightly to right impulses from the brain is what is aimed at, rather than the ability to produce a variety of domestic articles for the money value of such production. It must not, however, be thought that such articles are not produced. On the contrary the boy is encouraged at every point of his progress to put his acquired skill into practice in the construction of some article of use or of ornament that challenges the exertion of his best efforts.

The work in wood turning forms a valuable part of the course. It trains the hand to accurate manipulation of tools and the eye to correct appreciation of proportion and of symmetry and so of beauty and the endless variety of articles produced never fails to thoroughly interest the operator.

The iron working department is also well equipped. The course is arranged to give elementary instruction in the properties of iron and steel as well as to teach the usual processes of manipulation. In this department where no machinery and

---

*Industrial School for Boys.*

---

few tools are used so much depends upon the boy that his hands, his eyes, and his judgment are responsible for the results, and he finds a satisfaction in his work that fully compensates him for the severe labor, the ever present dirt, and the fervent heat.

The work on the metal working lathe requires a variety of tools that he must forge, temper, and shape for himself. He must grind and adjust them to the requirements of the work on hand, and he must carefully and thoughtfully direct the machine while in obedience to his guidance it smooths, drills, countersinks, polishes, cuts threads, and does many other things with more than intelligent exactness.

Every piece attempted in the shops is first drafted and the elements of mechanical drawing are so taught that the boys are enabled to express intelligently the shape, size, position, and use of each part, as well as to produce a complete picture of the piece as a whole.

Boys in this department spend two hours a week in the drawing room and an equal time in some one of the shops of the department.

SLOYD SCHOOL.

The sloyd school furnishes to the forty-eight boys enrolled an excellent introduction to the use of tools and a preparation for the heavier work of the shops. The time used in this department is taken from the working sessions instead of from the school sessions as is the case in the other departments of the manual training school. Here the few tools used are made to do a great variety of work, and here, too, deftness, skill, exactness, and taste are developed. The half day's work of the class is interspersed with a variety of exercises calculated to develop mind and body and to keep his interest and attention from flagging. Equipped with the indispensable sloyd knife, with pencil, try square, saw, rule, hammer, gauge, awl, and dividers for general use, and with bits, chisels and planes, to be used where these will best subserve his purpose, the boy is taught by precept and example to manipulate one tool after another in the pro-

---

*Superintendent's Report.*

---

duction of articles of which the following is but a partial list: Flower stick, pen-holder, key label, paper knife, ruler, tooth brush rack, match safe, sand paper file, towel rack, letter box, weather vane, sugar scoop, cake beater, salt box, and shoe brush box.

No boy makes all the articles in this list nor is any boy confined to these alone. Tasks are assigned in such a way that each pupil may do as much and advance as rapidly as his ability will permit. He is encouraged to contrive and to make articles of use or of ornament, model, or full size, as may seem best for his interest.

## LIBRARY.

Since my last report the school library has been moved into more suitable quarters, fine roomy cases have been built for it, and best of all, substantial additions aggregating five hundred volumes have been made. It consists at the present time of 781 volumes in good condition covering a great variety of subjects, and adapted to all ages and capacities. Every boy who is able to read is allowed to draw one book a week and an unfinished book may be kept two weeks and re-drawn for an additional week.

Since March 12, 1899, 7,412 volumes have been drawn for home reading. As a popular book is often read by several boys besides the one who draws it, the above number may safely be increased by one-third of itself, and the number of volumes read be called 9,883, instead of 7,412, as the cards show.

Boys of the age of those in this school are especially fond of books of the adventurous, heroic, daring type. While the library cards do not show a decided preference for books of this class as might be expected, the fact that such books are retained longer when drawn and are passed along from the original drawer to his friends in the family, will partly account for the comparatively small number of times some of the greatest favorites have passed through the librarian's hands. Books that have been drawn by at least 25 boys in eighteen months may

*Industrial School for Boys.*

safely be classed as favorites and the order in which they rank as favorites may be learned from the following table.

Title of book.	Author.	No. times drawn.
Westward Ho!	Kinston	25
From school to batt'le field	King	25
The story of George Washington	Baldwin	25
Boots and saddles	Custer	25

About 60 per cent. of all boys able to read draw books regularly and half the remainder irregularly. Many of the most popular of the list just given have been read aloud in the cottages and probably all have been read by four to five times as many boys as have drawn them.

In addition to the reading derived from the library, each family is supplied with daily and weekly newspapers, juvenile papers, and standard periodicals. In the selection and purchase of all these the greatest care is exercised to secure the very best of its class for the use of the young boys as for the more mature, and nothing of a character doubtful in the least degree, whether newspaper article, history, or romance, is ever allowed to pass to an inmate through the hands of any officer.

## MUSIC.

The institution sustains a brass band made up of the boys of the institution. There are usually about thirty pieces in the band, and under the leadership of their instructor, Mr. R. D. Booth, their work has invited a good deal of favorable comment. Six times a day the band plays while the boys march to and from their meals, and their music has come to be almost a city institution. The following taken from the Waukesha columns of *The Evening Wisconsin* will be pertinent: "The Industrial School Band, which is heard every morning, noon and evening, has gained no small reputation for the boys who form the members of the orchestra. The band-master, Mr. Booth, has succeeded in interesting the boys in the progress of the band and the repertoire of pieces which they now play is no small one. The services of the band have been required on several occa-

---

*Industrial School for Boys.*

---

sions of late and they always answer willingly to the requests made of them." An orchestra is also sustained which is not only a help to the boys who are members, but which also renders much assistance in all entertainments.

In accordance with recommendations made in the last report vocal music has come to be one of the subjects of instruction in the institution. Mr. Alexander Ball, a man of much experience as a trainer of boy choirs, has charge of this department and gives instruction in all of the grades twice each week. Mr. Ball also has charge of our Sunday and special music and organizes entertainments among the boys from time to time. It has been the custom during the past two years to have a considerable number of these entertainments either given by our own people or by outside organizations.

IN CAMP.

June 18-23, 1900, our boys went into camp at Waukesha Beach on Pewaukee lake, seven miles from the school. Every boy in the school spent the entire week in a splendid outing and nothing happened by way of accidents or disorder to mar a week of happy outdoor life. Fifty tents were rented for the occasion and chartered steamers, boats, etc., afforded facilities for a good time. The general program of sports is appended hereto:

DAILY PROGRAM.

5:30 A. M.	Serving Co's and Captains rise.	
6:30 A. M.	Rise--roll call .....	Reveille

## THE YARD FENCE.

In the last report a recommendation was made for the purchase of a suitable iron fence to take the place of the old and unsightly twelve foot high board fence surrounding the main yard. In accordance therewith \$2,000 was appropriated for this purpose by the legislature. Shortly after the adjournment of the legislature the old fence was removed and the experiment of an open yard was put in operation. So satisfactory has the removal of this sign of restraint and prison government proved that no need of a fence exists. The institution now stands upon entirely open ground and thus testifies more strongly that it is a school and not a jail.

## ESCAPES.

The question is often asked "Do boys ever try to escape?" Of course boys try to escape. It would be entirely unreasonable to suppose that 350 boys, unmanagable at home, almost always

*Industrial School for Boys.*

vagrants and runaways before coming here, would at once settle down quietly to healthy discipline in school and work. Most attempts are by boys comparatively new or by repeaters at the business who will too often never be other than tramps. As a matter of interest the following list of escapes per month is given, beginning six years ago. Previous to that time no record seems to have been kept. Of course it will be understood that these are merely attempts, nearly all of them having been returned sooner or later and most of these upon the same day.

October, 1894.....	4	October, 1895.....	3	October, 1896.....	15

## THE FARM AND GARDEN.

These continue to be both sources of supplies for the institution and opportunity for healthy employment for the boys. Work for homeless boys can always be found most easily upon a farm. Our own farm work serves as a preparation for this employment. Besides this large quantities of grain, fruit and vegetables are raised each year. Of the latter, of such as are suited to our soil, enough is raised for our entire need. The

---

*Superintendent's Report.*

---

farm has been carefully looked after by a competent overseer who is anxious to keep in touch with the best practical developments. An important change has been made in the last two years in the character of the herd of milk cows. At that time it was composed of several different breeds of inferior milking quality. Now the school owns a herd of about forty thoroughbred and fine grade Holsteins that compares favorably to any herd in our community.

## REPAIRS AND IMPROVEMENTS.

The older buildings of the institution will always continue to need much renewal in various parts. Doors, windows, floors, etc., in old structures increase the bills for repairs. During the past two years all of the slate roofs have been entirely overhauled and a new steel roof put on one of the stock barns. Others will need it next year. Sanitary range closets have been placed in three of the cottages making all but one of these thus supplied. About 400 yards of cement walk have been built and the condition of the grounds generally improved with a view to both beauty and convenience. Arrangements were made with the city whereby a six inch city water main was run through the main yard affording the service of three city hydrants. This in addition to our own hydrant system should supply ample fire protection.

The old unsightly and unsanitary wash troughs have been displaced by enameled iron stand range lavatories in each cottage. The advantage in cleanliness and decency cannot be appreciated by one not familiar with the old condition. The cost of this improvement was \$1,358.75.

In the establishment of the electrical plant six years ago, the buildings were wired with material taken from the buildings of the World's Fair at Chicago. These were found to be defective in many places both as to character and workmanship, and indeed were the chiefly suspected cause of our fire of March, 1898. The legislature appropriated \$3,000.00 for re-

---

*Industrial School for Boys.*

---

wiring and while the work was delayed because of the fund being at first unavailable, work is now fairly under way. By the time this report is issued it is hoped the entire work will be done. All outside work will be underground and all inside will be inclosed in flexible steel tubing, the best material being used throughout.

A commodious carriage shed has been built at a cost of \$700.00, exclusive of our labor, supplying a need of long standing. In it may be housed all our wagons, carriages, farm implements, etc. Soon after the last report was made the new dining room was completed and the institution began for the first time a general dining hall system. Together with the general kitchen and bakery it is one of the best equipped in the country and its use is very satisfactory. The assembly hall has been completed and equipped with several sets of stage scenery, quite ample for amateur needs. By the time this report is printed the hall will have been seated with over four hundred oak arm chairs made in our own carpenter shop.

The remodelling of number seven together with the partitioning of the old assembly hall, now affords ample living quarters for our own employes who room on the grounds.

#### RECOMMENDATIONS.

Since the last report the recommendations therein have been largely carried out. The library, music, entertainments, increased teaching force, enlarged equipment in manual training and sloyd have enabled the institution to more largely carry on definite work. Recommendations for the future could be many or few. Many, if we are to have the largest opportunity and equipment, few if it is merely a question of necessities.

The matter of improvement of dormitories has been postponed because of the apparent architectural impossibilities. Six of the oldest cottages are so constructed as to make it impossible to ever have in them other than small, uncomfortable and illy ventilated dormitories. To ask the condemnation and

---

*Superintendent's Report.*

---

abandonment of these buildings would seem extravagant at the present time. But the time is near when advanced thought as to the health and decency of environment of the boys will demand that these old buildings, prison-like reminders of days gone by, shall be replaced by new and properly equipped cottages. A pressing need of the institution, and one that cannot be easily ignored longer, is a small but properly furnished hospital. We are at present, and for several years have been entirely without any thing of this kind at all. The good fortune and care that have spared us from any epidemic during these years have likewise saved us from what might have been charged as careless neglect. There is positively no place on the grounds where a patient with a contagious disease could be isolated and cared for. A hospital with a suitable separate contagion ward, quite adequate to our needs, could be built for \$10,000.00. It would seem beyond question that this should be done at once during the coming year.

Other needs the institution may have. Others indeed may appear that will prove to be pressing. But it is believed that the current funds of the institution, wisely expended, will provide for all these wants.

## PROSPECTIVE.

We are not visionary enthusiasts. We have not done everything in the best way, perhaps not even well. Some boys have left us to lead lives of crime and to be a menace to society. Some there will always continue to be who will do thus. Perhaps new views may open in the future, we welcome all that are the proved results of actual experience. Perhaps we may do better as the days increase the opportunities and enrich the outlook. May it be so. But we are not wasting time in regrets. Our attitude is the same as when two years ago we said "When we consider the broken, vicious or careless homes; when we consider the succession of unkempt, crime-caught and vice-taught lads who generally come to us, we may not be satisfied,

*Industrial School for Boys.*

---

but we take up our work with hope." The reward in the added number of decent, self-respecting and self-supporting men, is large enough to save us from defeat. It may be victory.

In conclusion, I wish to express my thanks for your positive support, for the undisturbed and necessary power which you have conferred upon me, for your counsel and confidence, and to bespeak a continuance of these most pleasant mutual relations, so long as our official association may continue.

Respectfully submitted,

CHAS. O. MERICA,

NINTH BIENNIAL REPORT

OF THE

**Wisconsin State Prison**

FOR THE

**Two Fiscal Years Ending September 30, 1900.**

---

**OFFICERS.**

C. C. McCLAUGHRY,	WARDEN
E. S. HARVEY,	DEPUTY WARDEN
JACOB FUSS,	CLERK
REV. GEO. HOWARD S. SOMERVILLE,	CHAPLAIN
REV. J. C. HARTMAN,	CATHOLIC CHAPLAIN
G. F. MESSER, M. D.,	PHYSICIAN
MISS ELLA B. GRIDER,	MATRON FEMALE PRISON

## WARDEN'S REPORT.

---

*State Board of Control, Madison, Wisconsin.*

GENTLEMEN: I beg leave to submit the report of the warden of the Wisconsin state prison for the two years from September 30th, 1898 to October 1st, 1900, and to transmit the report of the prison physician and chaplains.

On July 1st, 1899, I relieved my predecessor Mr. John J. Roberts. The period covered by the report from September 30, 1898 to that date belongs to his administration. On Mr. Robert's retirement the property, money, books and papers of the institution were turned over with everything properly accounted for.

The changes in population during the two years were as follows:

Number of prisoners in the prison Oct. 1, 1898.....	601
Number of prisoners in the prison Sept. 30, 1899.....	567
Number of prisoners in the prison Sept. 30, 1900.....	496
Average daily population Oct. 1, 1898, to Sept. 30, 1899.....	592
Average daily population Oct. 1, 1899 to Sept. 30, 1900.....	532

### IMPROVEMENTS.

The root cellar, which was in process of construction at the round barn on the farm when I entered upon my duties, was finished at a total cost of \$710.00, and was used for the storage of vegetables last winter.

A comfortable two-story house, 28x36, containing nine rooms and a cellar, was erected on the farm for the use of the farmer at a cost of \$1,339.00. A stable for the horses 30x60 was built at a cost of \$985.74. This stable contains 12 ordinary stalls, 2 box stalls, harness room, sleeping room for convict hostler, carriage room, hay loft, grain bins, and was built on the balloon frame plan. Joining to this stable is a tool

---

*Wisconsin State Prison.*

---

house 28x64, in which all the wagons, tools, machinery, etc., are now housed from the weather, a thing formerly very sadly needed. The cost of this tool house was \$242.00. A poultry house on the latest plan has been built, and equipped with incubator, brooder, separate pens and yards, cost \$578.12. A six-inch drain traversing the northwest 40 of the farm for about 2,400 feet, and running north 5, east for 2,100 feet from the north line of the farm, empties into the branch of Rock river which flows through Waupun. This with its three laterals will properly drain and greatly improve the northern half of the 165.7 acres which comprise our farm. The total cost for tile for this purpose was \$124.20. A new cement floor has been laid in the corridor of the south cell house and another floor is very nearly completed in the north cell house. The old flagstones were removed. In this a great improvement has been made. The cement floors have been laid with about two inches fall away from the cells across the fourteen foot corridor, and a gutter next to the outer wall, with a total fall of about six inches in the length of the cell house has been provided so that the water used in scrubbing the floors now finds its way speedily into the sewer. The old flagstones were laid level and because of a (seeming) disintegration of the stone in spots were filled with small holes from which it was almost impossible to get the dirt, and in which some water from the scrubbing stood in spite of efforts to wipe the floor dry. The same trouble exists in the flagstones which form the floors of the cells, which are pitted with holes one-half or three-fourths of an inch in diameter and nearly as deep. From these holes the dirt can only be scraped with a knife or wire. After one of the cells had been scrubbed and polished with unusual care, I had a prisoner spend several hours in collecting all of a black gummy substance he could get out of the holes in the floor of a cell (4 feet by 7 feet). He collected about one-half a pint. An idea of the unsanitary condition of such a cell, and the number of microbes or germs of disease which so much filth would contain I will leave to

---

*Warden's Report.*

---

some scientist to determine. An effort will be made this winter to cement the holes in these cell floors and reduce the danger from this source. The 560 cells this prison contains are of ancient construction, and entirely faulty in their planning—if viewed in the light of modern prison building and treatment of prisoners. Absence of sanitary plumbing, poor ventilation, cracks and holes in the walls and old wooden galleries in which vermin finds lodgment, are features which render the proper care of the prison extremely difficult, even with great pains, and are not to the credit of a great state like Wisconsin.

A boiler, provided for by an appropriation made by the last legislature, has been contracted for, and foundations are now being laid for its setting.

The amount of \$4,500, appropriated by the last legislature for an extension of the present dining room was not expended. On mature consideration of the project it was found that a total rearrangement of plans would give us a chance to so consolidate and condense our present kitchens, bakeries, etc., as to provide for better efficiency and economy in the preparation and serving of food, and also obviate a very serious objection now met with in having the floor of the dining room four feet below the ground level. This feature in our present dining room makes it almost impossible to secure any ventilation in summer time without admitting to the dining room vast quantities of dust which the wind blows along the ground and straight in at the open windows. Just before the food is placed on the table the dishes and chinaware are frequently covered with grime dust from the cinder-covered streets.

#### IMPROVEMENTS NEEDED.

First. In view of the conditions recited above I have advised the Board to plan a new dining room completely, and to utilize the present dining room for a rearrangement of the kitchens and bakeries so that the handicap under which the prisoner of

---

*Wisconsin State Prison.*

---

ficer now labors of having his work divided among eight rooms shall be removed and better service and economy obtained. I submit plans herewith for the proposed new building.

I have planned a second story for this building for the purpose of providing a proper chapel. Our present chapel is in badly dilapidated condition, and is too small for assembling all of our population comfortably or with proper facilities for handling and discipline. It is about the proper size and in about the right location for a model school room for the 100 or more prisoners who ought to receive all the educational help we can give them. We are able to take about eighty into our present chapel now for school work, three evenings each week during the fall and winter, but lack of the necessary black boards, desks, maps, globes, charts, etc., to make this branch of our service efficient and in keeping with the state's duty towards those who are largely victims of ignorance. In the new chapel it is hoped to have stage room enough to admit outsiders who by voice and example can aid in making the chapel exercises more attractive and more devotional in character, and enable the prisoners to feel that they are neither despised nor forgotten by the outside world. It is true that we are now able to admit a few visitors to a dingy and unsafe gallery, where they are out of sight of and consequently out of sympathy with the men. I have investigated the cost of building in the prison yard, which involves going down 13 feet through filled ground to obtain foundations, and, figuring on the cost of the old dining room as a basis, find that the total cost for the new dining room and chapel as planned would be \$14,500.

Three other improvements are very badly needed, a proper bath room, a set of detention cells for insane men, or those whose dangerous natures make it unsafe to employ in contact with others, and a few cells where offenders against the discipline of the prison can be confined on bread and water.

The old building formerly used as a stable can be remodeled and a very fine bath room, under-clothing store room, set of six

---

*Warden's Report.*

---

detention cells and six solitary cells, with a convenient office for the deputy warden and rooms for the use of a Bertillon operator, provided at a cost of about \$2,500.00. In the first plans of the reconstruction of this building I contemplated a second story for a prison hospital but the excellent showing made in our present quarters in comparison with other prisons, and the fact that the removal of the Bertillon work to where it can be very properly supervised by the deputy warden will relieve the present hospital, may make the second story unnecessary. With the second story the cost would be about \$6,500. If the hospital should be built in as planned some changes to the opening of the prison sewer and in the place in which the cell buckets are now handled would be made, but at so small cost as to obviate any objection to this location for the purpose. As this is a *prison* hospital it is necessary to consider not alone medical preferences which might be urged, but also the strategical questions involved and the necessity for complete supervision by the prison authorities as well as the medical officer. All of the provisions necessary for an outside hospital of the same size which would handle many times the number of patients we handle and where advanced methods would attract a wide range of cases regardless of the expense of such methods, are not necessary in a prison, where the service is more on the plane of an army hospital. Extensive provisions against infectious or contagious diseases are not possible in a prison except in the matters of cleanliness, diet, ventilation and general sanitation which are also matters of daily care and faithful administration.

Our present bath room is a disgrace to the institution. When a gang of men are bathing there is no chance for the official supervision necessary to prevent the indecency always to be combated in a prison, and there is no suitable dressing space for the men where the clothing may be put off and on in comfort. A very fine bath house, well ventilated and lighted,

---

*Wisconsin State Prison.*

---

affording proper supervision and proper space for dressing, hair cutting and shaving, and all the necessities for cleanliness and decency, can be provided at small cost.

## DISCIPLINE.

With the aid of Mr. E. S. Harvey, an officer of some twenty-seven years' experience in handling prisoners, appointed deputy warden in September, 1899, a very satisfactory state of discipline has been arrived at considering the advantages in point of equipment under which we labor. By the fencing in of the land immediately adjacent to the walls with a high fence of barbed wire strong enough to enable us to safely work outside the main wall some of the men whom long years of confinement or other causes have rendered mentally weak or physically incompetent for shop work, it is hoped that garden work, beneficial to them and financially helpful to the institution may be entered into next year. There are some seven and one-half acres available for this purpose.

## ESCAPES.

Laro L. Wilson, No. 6816, sentenced to five and one-half years for manslaughter, second degree, from Adams county, June 5th, 1900, escaped from the prison boiler house at 10 P. M., August 15th, 1900. He was captured about a week later at his home in Adams county.

Frank McHugh, No. 6417, reported by Warden Roberts as having escaped May 31st, 1897, was arrested on his discharge from the Missouri state penitentiary and returned to this prison.

Three men, Charles McCauley, No. 7771, sentenced to five years for burglary from Portage county, June 5th, 1899, and John Wilson, No. 7020, sentenced to fifteen years from Milwaukee county, February 27th, 1897, and Ferdinand Knaak, No. 4928, sentenced to life for murder from Waukesha county,

---

*Statistical Tables.*

---

April 30th, 1890, escaped from the tower window of the south cell house, January 25th, 1900. These men were aided in this escape by two burglars who had been discharged the month before, who returned to Waupun and sawed the grating in the front wall. Knaak was recaptured the next evening. McCauley was captured at Bloomington, Ill., but was held by the U. S. authorities for the burglary of a post office at Wapella, Ill., and sentenced to two years' imprisonment in the Southern Illinois penitentiary at Chester. He will be returned to this prison on the expiration of his sentence in Illinois. John Wilson was captured at Woodland, Cal., and returned to this prison on August 1st, 1900.

Wm. McLean, No. 7843, sentenced to two years from Sheboygan county for horse stealing, escaped from the prison farm May 4th, 1900 and has not yet been captured.

Michael Reiter, No. 6805, sentenced to seven years from Racine county, May 29th, 1896, for obstructing rail road tracks, escaped from the coal shed outside the west wall September 4th, 1900, and was recaptured about three and one-half miles south of the prison the same evening.

#### CONTRACTS.

Owing to the low number of our prison population and the scarcity of able-bodied men we have not been able to keep the quotas of the contract shops full, and the prison has lost considerable of revenue which aids in its support.

The receipts from M. D. Wells & Co., for the year ending September 30th, 1899, were \$48,291.67; for the year ending September 30, 1900, were \$43,444.40. A contract with the Paramount Knitting Co., whereby light labor was provided for a number of men of inferior physique, cripples, etc., who would otherwise have been kept in idleness, was entered into the first of the present year and has been in full operation since January 1st. The receipts for the forty-five or fifty men of this shop have thus far reached a total of \$2,797.15.

---

*Wisconsin State Prison.*

---

The tailor shop machinery was removed to the Green Bay reformatory in March, 1900. We have continued with half a dozen prisoners (one or two of them tailors) to manufacture all our prison uniforms and the suits for discharged men very acceptably.

In connection with the tailor shop and store room I have established a small tobacco shop, where we now manufacture our own plug and smoking tobacco at a cost (for the plug of  $8\frac{1}{2}$  cents per pound as against 30 cents per pound formerly paid for all the plug tobacco bought. The smoking tobacco we make from the natural leaf and the waste resulting from breakage of the tobacco handled in making the plug.

A notable saving in fuel has been made in the purchase of two Reid portable ovens and the abandonment of the old-fashioned brick ovens, and also in fitting our stoves and ranges for the use of hard coal instead of wood.

## INSANE.

As reported by the physician several insane men have been removed to the Northern Hospital during the past two years. There are to be found in every prison a number of prisoners who are mentally weak or partially insane. These people greatly complicate the problems of discipline and safety, and require most careful consideration and handling. Some of them develop suddenly and without warning very dangerous moods, and then the result is murder or assault. One of the greatest difficulties we have is to teach the average officer the difference between wilful viciousness and mental aberration, and to so govern his own conduct that neither is needlessly aggravated. The criminal insane form a distinct class, for, while the misfortune of insanity demands treatment as patients, and all the sympathy and kindness which sick men should receive, the majority of them still retain their criminal habits and tendencies which involve more or less of danger to others. I am therefore of the opinion that they ought neither to be mixed with the

---

*Warden's Report.*

---

non-criminal insane in our state hospitals, nor ought they to be deprived of the skill in treatment which is to be found in these hospitals. Provisions should be made for some special ward or department for the criminal insane at a state hospital. This ward should be a separate or detached building with the strength of a prison and the conveniences of a hospital. There must always be taken into account the tendency among prisoners to feign insanity and secure removal to a hospital where escape is a comparatively easy matter. And also the ever present idea on the part of the insane criminal to secure his liberty by violence and force. We therefore have a class of prisoners for whom I wish to make provision in the detention cells I have planned. These cells will be 10 feet by five feet (or as large as our room will allow), and when a man becomes dangerous to his fellows he can be given light work of some kind in these cells instead of being locked up in absolute idleness as at present.

## TRANSFERS.

Several young men under the age of thirty have been received in this prison since I became warden. These I have carefully examined with reference to their previous history and in an endeavor to arrive at an idea of their susceptibility to reformatory influences, and where I found them not too strongly criminal in their present conditions of mind, or in their aims, habits and tendencies, have recommended to the Board their transfer to the Wisconsin State Reformatory at Green Bay. Care in this matter will secure the separation of those susceptible of reform from those who are vicious, and prevent the introduction into the reformatory of those whose presence will only tend to destroy the good which may be done for others. An indeterminate sentence plan for all prisoners sent to this prison, based on the very practical and successful method now pursued in Indiana would prove of vast benefit to Wisconsin in her efforts to suppress crime. I would respectfully call the

---

*Wisconsin State Prison.*

---

attention of the Board to Indiana's recent advances in this matter, and urge that some similar plan be devised for this state.

On my recommendation the Board has transferred eleven young men to Green Bay since July 1st, 1899.

Having been repeatedly asked for statistics on both sides of the question as to whether the absence of capital punishment is productive of any reduction or increase in the number of cases of murder or manslaughter, I have had prepared the following table which may throw some light on the subject as applied to the history of such crimes in this state. This table does not show, however, the change in the morals of the people produced by Christianity and advancing civilization, nor the increased facilities for the detection of crime and apprehension of criminals. Nor does it show the waves of financial depression, war or pestilence which are operative in producing violent crimes, nor the prosperity and possession of money which incites some crimes. All of these elements are important in the consideration of the question.

Warden's Report.

TABLE.

Statement of proportion of prisoners committed for murder and manslaughter each year to the population of the state.

## PRISON PHYSICIAN'S REPORT.

For the fiscal year beginning October 1st, 1898, and ending September 30th, 1900.

*To the Honorable State Board of Control,*

GENTLEMEN: Our tabulated reports will show in a condensed form, the vast and constant amount of work done in this department. We have been unusually fortunate in that we have had a less number of accidents, fewer serious surgical operations, less frequency of epidemic tendencies, a less average number in attendance at the regular morning sick calls, and a higher standard of the general health.

We have had instituted, official supervision for exercise at stated hours for the convalescent, epileptic and insane, twice daily. Already the beneficial effects of such an added means in treatment are noticeable, several of the insane having recovered their mental balance sufficiently to be again assigned to regular work; in others it has helped to mitigate the severity and frequency of violent manifestations, and has generally proven itself to be a boon to the afflicted.

We have been able, because of the reduction of population, to use a number of cells for temporary detention, for

---

*Wisconsin State Prison.*

---

cases of slight indisposition, when not sick enough to require hospital care, yet not in condition to work. These cells being in a row in the first tier, admit of closer observation and more satisfactory results, for obvious reasons, and will, no doubt, be continued. The disturbance of a whole cell house population at night, depriving men of a quiet and much needed rest, by the insane because of present conditions, needs amelioration. Cells built elsewhere, with such construction as to prevent escape of sounds and noises, giving immunity from disturbance, and answering the purpose also of temporary detention quarters, would fill the requirements. These could be occupied until an improvement or transfer to an asylum for insane takes place.

Insanity among criminals and cranks as a factor in causation of crime is becoming more and more recognized; and there seems to be an increasing tendency among prisoners towards insanity.

It is a commonly accepted idea that solitary vice is productive of much of the insanity of prisoners. It is a cause in about 3.17 per cent. of known cases only; however, among criminals as a class, sexual depravity and disease is not uncommon. There are also those addicted to drug habits, using morphine, opium, chloral, etc.

I find that the following diseases and sequelae occur: syphilis, 11 per cent., chancroids, 16 per cent., gonorrhoea, 38 per cent., stricture, 8 per cent., gleet, 11 per cent.

41 per cent. have had some venereal disorder in their career, and some have had all in the above list. The true percentage would undoubtedly run higher, were we able to obtain it. Among this class, 95 $\frac{1}{8}$  per cent. drink, 97 $\frac{1}{2}$  per cent. smoke, and 93 per cent. chew tobacco.

Thus we see that vice and crime go hand in hand, and, of children born of such parents, in surroundings of drunkenness and moral debauchery we cannot expect much else but defectives, cranks, insane, feeble-minded, idiots, cretensism and criminals.

---

*Physician's Report.*

---

There are conditions in the situation of the bakery, officers' kitchen and prisoners' dining room that demand correction from a sanitary standpoint.

Being built on a half-basement plan, these rooms are more or less damp; but worst of all is the constant conveyance by the dust blown in from the yard, of livigated filth, bearing germs from dried sputa and other noxious matter.

It is impossible to keep dust and dirt entirely out of any house, and it is still more difficult where clouds of dust sweep in from a level into doors and windows of basements. This evil is intensified, when, on account of hot weather, it becomes necessary to have open doors and windows, the amount of dust blowing into the bakery when preparing bread, and when food is in preparation in the kitchen, or being served in the prisoners' dining room, is very noticeable. This condition calls for reconstruction, which will without doubt be permitted.

Feeling under obligations to the gentlemen of the State Board of Control, warden, and other officers, for their uniform courtesies and co-operation, I have the honor to remain,

Yours respectfully,

G. F. MESSER,  
*Prison Physician.*

## CHAPLAIN'S REPORT.

WAUPUN, WIS., Oct. 1st, 1900.

*The Honorable State Board of Control,*

GENTLEMEN: I have the honor to present to you my report for the biennial period, from October 1st, 1898, to September 30th, 1900. In looking over the past two years I feel much encouraged by the growing interest and increased perseverance of those who are striving to regain their manhood which for a time is submerged 'neath overshadowing clouds.

I have especially noticed an increased earnestness in the faces of some who attend divine service, this may not be apparent to the casual observer, but, by careful observation, I have been able to take mental notes, while standing before the men and preaching to them.

I have been careful to emphasize the thought, that the growth of true manhood comes from a conscious realization, of the higher and nobler aspects of life, and that in the desire to build up true manhood there are manifold blessings. In connection with this thought, it has been with sincere thankfulness that I have noticed a decided change in the tenor of the letters written by some of the men, in expressing an earnest desire to do better, and to make life brighter for their families; and it was with an added pleasure, that I noticed the unwritten joy, which like a golden thread, was interwoven in the answers.

Then the school work has been of a very gratifying nature; men who could neither read nor write have learned to do so; and others, to whom the multiplication table was unknown, an enigma, a painful puzzle, have grown to know that perseverance conquers all difficulties.

The system of periodical examinations which I introduced

---

*Wisconsin State Prison.*

---

and mentioned in my last report, has been a stimulant, with creditable results.

The teachers have done excellent work and were themselves encouraged by the evident desire on the part of scholars to progress. A steady and satisfactory advancement has marked the school period.

During the past year I have, at the warden's request, held special Sunday afternoon services at the female prison; I think this has proved a move in the right direction. I have baptized three of the women.

The choir has rendered efficient service in the chapel meetings and added much to the good influences ever to be derived from sacred music.

We have been graciously remembered by friends outside, who have sent magazines and papers for the use of the men. The prison band has done good work, and has been a great assistance to the choir in the Sunday services.

At this point, a suggestion comes to me, of the great usefulness a small book bindery would be, as many of the magazines we receive would make capital reading in the future, and if bound, would make a constantly increasing addition to the library. There has been an addition of 807 new books to the library. These are read with avidity and are a great help in supplying reading to the men. There are over 800 volumes in the library which are withheld from circulation, being in such condition that they must be rebound before they can be re-issued.

During the past year the City band has very generously given concerts which have been highly appreciated by the men.

In conclusion, I wish to extend my thanks for the courtesies I have received from the State Board of Control, the warden and the officers of the institution.

Yours respectfully,  
GEO. HOWARD S. SOMERVILLE,

*Chaplain.*

D. G. WILLIAMS ..... BOYS' SUPERVISOR.  
L. K. SANDS ..... ENGINEER.

## SUPERINTENDENT'S REPORT.

---

*To the State Board of Control:*

GENTLEMEN:—In accordance with the requirements of your honorable body, I submit herewith a report of the state public school for dependent and neglected children, indicating such features as may seem to be essential for an understanding of our work.

My term as superintendent commenced July 1st, 1899. One hundred sixty-one children were inmates of the school at that date and one hundred fifty-four were with us September 30th, 1900.

### A CLEARING HOUSE.

In its best sense the state school is simply a clearing house. A place where children may be received only for the purpose of placing in homes. I am sure I voice the sentiments of the members of the Board of Control, and all who know even a little of child nature, when I say that the children should be placed in homes whenever their physical, mental and moral natures are in the required healthy condition which would give reasonable hope of their success. But to place some in homes in the condition they are received at the school, would be an imposition on those who receive them. It seems to me most important that many of these children should remain here some months, or as long as is necessary, for the training they receive here in cleanliness, in growth and in moral thought.

Then the school is very important in providing a home, temporary though it be, for those who have failed and have to be returned. They are kept here until a fitting place is found for them.

In short, without this temporary home, it would seem impossible to care for children in the proper manner. No boarding house could take the place of the State School, even for a week.

---

*State Public School.*

---

## PLACING CHILDREN.

Our children are placed on written applications. When an application is received the agent visits the home of the applicant, carefully noting all features which tend to make a good home. After a careful examination, if satisfied, the agent accepts the home and looks for the proper child to assign.

By this care on the part of the agent, comparatively few "misfits" are made, and a large proportion of our children find good homes where good treatment is given them, and where they grow up and become respectable factors of the community in which they have been placed.

This is the history of at least ninety per cent. of our children and the best evidence of the good work the school has done since its establishment fourteen years ago.

## SUPERVISION OF CHILDREN.

The problem which confronts the conscientious officers of the State School is the care of the children in their homes. While in care of matrons and teachers at the school, it is easy for any interested person to see that their physical and mental faculties receive proper attention and their moral training is equal to or it may be superior to the average home. But when away from the school, in homes, scattered over the state, then these children who have had little but neglect during their lives, need as close supervision as possible. To this end our faithful agents, Mr. A. F. Brandt and Miss Elsie M. Loomis, devote nearly all of their time. They visit each child at least twice each year, and in needed cases, five or six times per year. They visit the home, and the school, talk with the child in private, examine his clothing, in short, see that the child is well treated, and is receiving all that his indenture papers call for. No details are too insignificant for these faithful agents, and they seem to be tireless in their efforts in the most important work of the State School. When they return from their trips, which often lasts more than

---

*Superintendent's Report.*

---

two weeks, they make a written report of their investigations, and go over the details of their trip with the superintendent.

In case they find a child is not well treated, he is promptly taken and returned to the school.

Supplementary to the excellent work the agents are doing, the superintendent has issued a blank form on a postal card, requiring the guardians to report on the health, conduct, work, attendance at school, and any other information of interest in the case. These cards are sent to the guardians monthly and nearly all are promptly returned, giving the superintendent information from the guardian's standpoint. Many of the reports lead to correspondence with the children and guardians, and oftentimes much good to the child is the result.

I consider this system of reporting a valuable auxiliary in the supervision of the child, and with the co-operation of your Board, I shall continue it.

#### OUR SCHOOL WORK.

The next day after the arrival of a child at the institution he is placed in school and during the weeks and months he may be here, before being ready for a home, he attends every day. We find many of the children very backward, and the awakening process is slow; but our teachers are patient and faithful and in time are rewarded by noting improvement. The teachers are earnest and conscientious and have a heartfelt interest in the care of these unfortunate children. And the children are receptive and thankful, many of them meeting with such interest for the first time in their young lives.

Miss Edna Jones, of Sparta, who has been a teacher in the school for nearly ten years, has charge of the older pupils, in the fifth and sixth grades.

Miss Lola W. Billings is teacher of the intermediate department.

Miss Margaret Harris, of Wausau, is in charge of the primary department, and Miss Daisie M. Buckstaff has the kindergarten.

---

*State Public School.*

---

Miss Caroline Harris, of Appleton, has charge of our Domestic Science department where girls are taught to sew and cook, and perform such other household duties as they may need to know in the years to come. If a person will consider that these poor girls come to us from homes where nothing was taught them, either by practice or observation, where they could not drink in knowledge of domestic affairs, it will be seen that this department of our school is most essential and necessary.

Considerable stress is laid upon vocal music in our school. Not only are the pupils taught to sing, they are taught the rudiments of vocal music by two of the teachers, Miss Jones and Miss Billings. The latter is also giving eight of the large girls instruction on the organ and piano, thus giving them a start in an accomplishment which may help them to make their way in the homes to which they may be assigned.

In all of our school work, considering the departure of bright pupils from time to time to go to homes, and the arrival of new and crude material, the work needed to mold into shape, our school work will compare favorably with that in the average public school of the state.

Up to July, 1899, a principal teacher had been employed, who taught a few classes and did the supervisory work. Since that date, the principal teacher has been dispensed with, and the superintendent does what supervisory work he deems is necessary. He visits the school every day and thus keeps in touch with the children.

THE LIBRARY.

Previous to September, 1899, the books for the children had been kept in the cottages. At that time these books were brought to the office, and duly catalogued and placed in a case. With the assistance of Miss Schreiber, the librarian of the state superintendent's office, one hundred new books were added and we now have a small library of two hundred and sixty-two volumes. We hope to add to the number each year.

---

*Superintendent's Report.*

---

The library is under the care of the general matron, who supplies books to the various cottages Saturday afternoons—charging to the matrons, crediting when returned.

The library is a valuable auxiliary in the lives of all of our children,—not only a means of entertainment. We try to select books that are uplifting, inciting to good lives.

#### COTTAGE LIFE.

The cottage life of these unfortunate children will bear the closest scrutiny, and the more one studies it, the more he will become convinced that the matrons, the "Mothers of the cottages," are giving these children the care and attention that only conscientious, christian ladies can give. No children in Wisconsin are kept under better sanitary regulations than the children of the State Public School. The cottages are models of cleanliness, the clothing is clean, and each child is bathed regularly. In addition to the physical care and comfort given in the cottages, there is indeed a homelike feeling which pervades. One can see that the boys and girls look to the matrons as the mothers, and to them they go for advice, assistance and consolation. And the children are never turned away. Many a little boy and girl are taken in the matron's arms, where they feel they have a safe protector, a firm friend.

While the discipline must needs be firm, love dominates, and the children are led in the same manner that they would be if they were in well regulated homes.

When I came to the institution, I found but three cottages open, with 161 children as inmates, an average of 53+ in each cottage. Considering this too many, permission was given me by the Board to open another cottage, and the results have been gratifying. At this writing we have 150 children in four cottages, an average of 37, certainly enough for one matron and her assistant to care for, and the direct benefits would be greater even, if the number in each cottage were decreased. However,

---

---

*State Public School.*

---

as we now are, the matron can give some attention to each child, a condition impossible when 55 to 65 were grouped together.

Each cottage has a sitting room and a reading room adjoining. These rooms are commodious, well furnished, and kept neat and clean. In the cottages where the larger children reside, the reading room is furnished with books and papers and materials for writing. In the girls' cottage there is an organ. All children in the cottages have access to these reading rooms and they are well patronized and enjoyed.

In the cottages where there are smaller children these "reading rooms" are more of the nature of play rooms,—although they have books and papers suited to the children, and which the matrons read to them.

The dormitories in the cottages are as clean as any rooms in the best residences in the state. Each child sleeps on a hair mattress, spring bed, single iron bedstead.

In all the details of the cottage life of the State Public School, the system seems to me as nearly perfect as can be with from thirty to thirty-five children in each cottage. The matrons are christian ladies, educated and refined, earnest in their work, speaking of their children and working for them as an own mother would. Our matrons are Mrs. Annie B. Williams, who has had charge of cottage C, large boys, for ten years; Miss Angie Fanning, who has cottage B, the girls, and who has been in the school about four years. Mrs. Alta E. Braley came to cottage A, small boys, in May, 1899; Miss Mary Henry has charge of second grade boys in cottage E, which was reopened in July, 1899.

Many boys and girls come back to the school, after years of absence, and speak good words of the lessons taught by these faithful matrons, of the help they were to them in lifting them from the lives of neglect they came from, up into the ways of manhood and womanhood.

---

*Superintendent's Report.*

---

## MEDICAL AND HOSPITAL SERVICE.

We have two hospitals,—the new hospital erected a few years since, and the old hospital which is kept for isolation when an epidemic prevails. I am glad to say that the old hospital has been in use only a few days since July, 1899, and then as a precautionary measure, fearing some of the children were threatened with scarlet fever. Happily the fears were groundless, and the children returned to their cottages.

The hospital is well cared for by Mrs. Ida Corey and assistant, and no child considers it a hardship to be sent there for a few days' treatment for some slight ailment.

Dr. W. T. Sarles, the physician of the school, visits the hospital every morning, and oftener if necessary, and the healthfulness of the children is due, in great measure, to his watchful care and skillful treatment.

The death rate in the school since establishment in 1886 has been very low. With an average of two hundred children in attendance but seventeen deaths have occurred in more than fourteen years, but little more than one per year. This shows a lower mortality rate in the state school than in homes, especially in large cities.

## FARM TRAINING.

The farm of 234 acres affords ample opportunities for training the larger boys in this important industrial pursuit. Under direction of D. G. Williams, boys' supervisor, from ten to fifteen of the larger boys are having regular work on the farm. They are taught to plow and plant, to cultivate and gather the crops consisting of corn and hay, potatoes and many garden vegetables. Mr. Williams has been in his position ten years, and thoroughly understands boy nature. He handles them kindly but firmly, never permits the boys to slight their work nor get into lazy habits. Under his management the boys work when they work and play when they play, and many a boy who had been permitted to loaf around the streets before he was committed here, has been led into habits of regularity and industry.

---

*State Public School.*

---

## IMPROVEMENTS AND REPAIRS.

Last year a hen house was built and poultry yards made, and we now have nearly three hundred chickens, fifty fine young turkeys and ten ducks. While insufficient for poultry and eggs for our tables, the product has been as large and satisfactory as could be expected for the first year. The cost of the hen house was \$300.

A spacious root cellar has been constructed, with a capacity of 5,000 bushels, which is filled to overflowing this year with the potatoes, beets, mangels for the cattle, cabbages, carrots, onions, pumpkins, etc., which have been produced in great abundance. The cost of the root cellar was \$600.00, and I consider it an excellent investment, something which the school had needed for years.

In front of the grounds, for a distance of 2,300 feet, now stands the iron fence which did duty around the capitol so many years. The fence was shipped here in May, 1899, and erected in July, August and September, under the immediate direction of L. K. Sands, the engineer of the school, who did excellent service in erecting it in the most substantial manner. The fence is an ornament to the grounds of the institution, as well as a protection, and I consider it a most valuable improvement.

Last spring the old board walk in front of the buildings was removed and in place was laid a cement walk, five feet wide. The work seems to have been done in a workmanlike manner, contributing to the general appearance of the school buildings, as well as the comfort of the pedestrians. Sixteen hundred feet of board walk have been relaid during the last year.

Several of the buildings were in great need of painting on the outside, and two coats have been applied to the school house, to the Main building and to cottage E, which have greatly improved the appearance and acted as protection to the wood work. We have also done considerable painting in dormitories, halls and sitting rooms in the cottages. The reception room, matron and teachers' dining room, employees' dining room, the chil-

---

*Superintendent's Report.*

---

dren's dining room, the chapel, the offices and hall in Main building have been repainted during the summer, adding to the appearance and contributing to the comfort and healthfulness of children and officers.

Our ice house was of insufficient capacity for the needs of the institution, so an addition 22x14 has been made this fall. With this addition we expect to be able to store sufficient ice for our needs for the year.

#### THE FARM.

The soil of our farm is very light, and requires a vast amount of fertilizing. It is best adapted to small fruit and vegetables, and it is our purpose to increase in producing the latter. For this year's product we have more than 6,000 bushels of vegetables, consisting of potatoes, beets, onions, etc., supplying all that our population requires.

We raised more strawberries than our population could consume and sold \$47.50 worth. Our melon crop was enormous, and more than supplied the demands. We sold \$134.28 worth, besides furnishing children and employees all that they would eat.

In all ways our farm has been very productive during the last year, probably producing as much in quantity and more in variety than ever before. A glance at the tabulation of farm products will sustain this statement.

In addition to supplying the school with milk, vegetables and poultry, it is a valuable adjunct in training and educating the children, who by reason of some physical, mental or moral infirmity cannot be placed in homes; but must be cared for at the school. In this sense the farm is most valuable, and could not be dispensed with without injury to the class of children I have written of above.

---

*State Public School.*

---

## APPRECIATION.

In closing this report I feel it incumbent upon me to express my gratitude and appreciation of the courteous treatment, helpful suggestions and co-operation of members of your Board. Not alone in words of advice and encouragement, but in deeds, in practical details, in many ways have you assisted and helped me in the responsible duties of the position, and I thank you.

I am also under obligations to the clerical force in my office, in fact, to other employees for the faithful discharge of their duties. Very few instances have come to my knowledge where employees have carelessly neglected their duties or failed in the responsibilities resting upon them. They have performed their labors cheerfully and well.

I have the honor to be,

Most respectfully yours,

M. T. PARK,

*Superintendent.*

## SUPERINTENDENT'S REPORT.

---

*To the State Board of Control.*

GENTLEMEN: I herewith submit the second biennial report of the Wisconsin Home for Feeble Minded.

As no portion of the appropriation granted by the last legislature was available until the present year, there has been no marked change in our number since my last report. The movement of population has been as follows:

Remaining September 30, 1898.....	373
Admitted Oct. 1, 1898, to Sept. 30, 1899.....	48
Died.....	12
Discharged.....	8
Out on visit home.....	17
Remaining Sept. 30, 1899.....	384
Admitted Oct. 1, 1899 to Sept. 30, 1900.....	39
Returned from visit.....	21
Died.....	12
Discharged.....	5
Eloped.....	1
Out on visit.....	32
Remaining Sept. 30, 1900.....	304

It will be noticed that the number of admissions is limited, as we have not been able to admit a new case except when some of our children were removed either by the friends, or by death. In receiving an occasional child, we have tried to give a fair representation to each county; but this has had to be modified somewhat by the fact that we would have to admit a child of the same grade and sex as that of the inmate removed. We have been especially careful to take, as far as practicable, females of child bearing age wherever applications for such were made. I might quote the fact that three of our present inmates have together been mothers of thirteen illegitimate children, while the unlawful offspring of twelve of our girls in one department numbers twenty-seven. No more economical measure could be de-

---

*Home for Feeble-Minded.*

---

vised by the state than the timely care of these girls and young women.

The children admitted are graded as follows:

High grade imbeciles.....	14
Middle grade imbeciles.....	34
Low grade imbeciles.....	17
Idio imbeciles.....	10
Excitable idiots.....	6
Apathetic idiots.....	6

While no completed buildings have been added to the institution, many permanent improvements have been effected. Old roads have been rebuilt and new ones constructed. An unusually fine bed of mixed clay and gravel has been discovered on the premises, and has furnished us a convenient and abundant supply of material for that purpose. New trees and shrubs have been planted to replace the native trees, which are rapidly dying as the ground about them is cultivated. The wild land in the park has been subdued and now yields an abundant crop of excellent grass. Beds of flowering shrubs have been placed in conspicuous places. We now have between 1,300 and 1,400 young trees and shrubs in good growing condition. A second story has been built over the dining room of the Girls' Epileptic Building, giving a good suite of rooms for employees. The barn has been enlarged so that it will now accommodate 71 cows. A large hen house has been erected, and a cold storage building has been built. The piggery has been doubled in capacity, the old lodge house removed from its former location to the rear of the power house, remodeled and painted until it makes a comfortable home for our entire force of male employees whose work lies outside of the main buildings.

From the portion of the appropriation which has become available a new cottage has been erected, which we expect to occupy in November. This will have a capacity of 96 beds. A second dynamo and engine have been placed. All our machinery is now in duplicate, protecting us from loss of light and power in case of accident. From this same appropriation we have also

---

*Superintendent's Report.*

---

replaced our old walks with cement, laying the entire 20,000 square feet provided for with the exception of a portion about the new building. This will have to be postponed until spring, as it has to be laid upon newly filled earth, and it must be given time for settling before the cement can be put down.

The internal administration of the Home also shows marked improvement. The shoemaker's class has progressed from repairing to new work, until at present all the children's shoes are made in our own shop. At the laundry better work is being continually done, and the 8,000 pieces a week sent there are easily handled by the laundry class of 25 girls and three boys, under the direction of two employed people. In the dress-making department many of the girls have learned to fit as well as make garments, and the exhibit of fine needle work at the Northern Wisconsin Fair was examined with much interest by the thousands of visitors. In the outdoor work, four boys, under the direction of a competent gardener, have cultivated sixteen acres of land and raised \$2,000.00 worth of excellent vegetables. These boys, who include two epileptics and one boy whose acts of malicious mischief will long be remembered by the inhabitants of the city in which he lived, take such pride in their work that they can be left on their own responsibility to work earnestly all day. They have been aided occasionally by groups of small boys of kindergarten grade, whose chief delight during the vacation months was to don overalls and become "farm boys." Large crops have also been raised on the farm, as will be seen in the proper table, where the boys are also becoming a factor in the work.

Our schools have not increased in capacity to any marked extent owing to lack of necessary room. A bed room in one of our buildings has been transformed into a small school room where excellent work is being done in sloyd by several classes which come in for periods during the day.

The general health of the institution has been good. Since the opening of the institution we have not had a case of diph-

---

*Home for Feeble-Minded.*

---

theria, typhoid fever, or other serious infectious disease. The only epidemics from which we have suffered have been from mumps and whooping cough, which were introduced by incoming children, and no deaths or serious after effects followed either. No better recommendation could be had of the admirable system of plumbing with which the Board has equipped the buildings. Our death rate has been low when we consider the large proportion of paralyzed and epileptic children, and those of very low mental grade in our population. Contrary to the custom in some institutions, we have never made any distinction in the admission of epileptic and non-epileptic children. We now have sixty-two active epileptics under treatment. Our freedom from illness is probably due in part to the careful regulation of diet and exercise, but it is largely due also to the fine dry atmosphere and exceptionally pure water of this location.

In reciting our needs for the coming two years, the most imperative is more room. The single building erected during this summer will only suffice to admit one-third of our applicants, and we have as many pending as we had at the time of my last report. Nearly three hundred of this afflicted class are now appealing to the state for protection and care. From this number 96 will be selected for admission to the building erected the past summer, leaving 200 still unprovided for. To accommodate this number it will require two additional cottages to receive approximately 100 children each. To feed the increased number to be accommodated in additional cottages, we should erect the general refectory. This should be a one-story building with trussed roof, or with the roof supported by central columns, having about 7,500 square feet of floor space. This will enable us to feed 600 children, which will be approximately the number which will be cared for in the general refectory when our remaining cottages are completed. The others, which consist of custodial and epileptic cases, will be provided for in dining rooms in the buildings already erected. Your frequent visits have enabled you to see our need of in-

---

*Superintendent's Report.*

---

creased office room, and also larger quarters for our official family. Our ever increasing stock of papers and records are now entirely without protection from fire, and this need is becoming yearly more imperative. For this purpose our administration building is needed even more than it was two years ago. Last, but not by any means least, we should erect the school house intended to be built last year. Our institution cannot reach its highest field of usefulness if converted into a mere house of detention. If it is the right of the family to be aided in the care of an afflicted child, which is a greater burden than they can rightly bear, it is equally the right of the child that it should be compensated for the separation by being educated, as far as is practicable, to a wider field of usefulness, which is the only true road to a higher degree of happiness. To this end their feeble power of attention and dull perception must be aroused by interesting object lessons. Since ordinary methods of teaching do not reach them, special methods which appeal to their sense organs must be tried and repeatedly tried. How often, no one but the patient teacher of this class can ever realize. Their slow, awkward muscular action must be quickened and controlled by calisthenic exercises, dancing, and the quick, accurate movements of the military drill. The delicate exercises of the kindergarten train the awkward fingers and develop the deficient tactile sense. The sloyd school and shops continue this training into profitable occupation. This is not a profitless waste of time and money, for under this system many a child becomes a useful member of the small community in which he has hitherto been a dependent unit. His self-respect increases with his increased usefulness, and with it grows his ambition to become a still more important factor in the development of his institution home. They will, in time, return a large portion of the money expended by the state for their training, by furnishing supplies for the institution from the farm and from our work shops. This has already been demonstrated by the results of their work in the manual train-

---

*Home for Feeble-Minded.*

---

ing department of this institution. So large a number of children will have come to us before the end of this year, that our present school accommodations will be entirely inadequate and our need of a special building for this purpose is even greater than at the time of my last report. Moreover, we have no place for the children to assemble for entertainment, divine service, or for any other useful purpose. I would respectfully suggest that a two story building be erected, the lower floor to be subdivided into four school rooms, while the upper shall be left free from partitions, giving us a general assembly hall.

The system of cement walks begun this past summer should be continued to any new buildings erected. The discovery, this year, of a very large deposit of clear gravel on the north side of the park, has lowered the cost of laying the side walk to a very reasonable figure.

A silo should be added to our farm buildings. Our land is admirably adapted to the raising of corn; but the early advent of cold weather in this section, makes it difficult to cure the stalks by any other method than converting it into ensilage. I would respectfully recommend that a silo be built to enable us to utilize this feed to the best advantage.

I take this occasion for thanking the many friends of the institution for their generous contributions for the entertainment of the children. The papers and magazines sent us, and the generous donations towards our Christmas fund have all been most gratefully appreciated. We also desire to thank the proprietors of the "Tomahawk" who have regularly sent us their paper. Our consulting surgeon, Dr. J. V. R. Lyman, of Eau Claire, has been unremitting in his attentions to those of our children requiring his care, and by a uniformly successful series of operations has very materially benefited a considerable number of them.

To the officers and other employees who have given their best efforts for the advancement of our common work, I extend hearty thanks, and I appreciate thoroughly the patience and

---

*Superintendent's Report.*

---

sympathy they have shown towards those committed to their direct care. No better endorsement of their work could be shown than the general improvement of our children physically, mentally and morally.

To the members of the Board I wish to express my grateful appreciation of the instant support given every suggestion pointing towards the growth of the institution, or the benefit of our wards. To my many appeals they have never failed to give their prompt attention and most kindly interest.

Respectfully submitted,

A. W. WILMARTH,

*Superintendent.*

S. F. BRUNETEE.....CHIEF ENGINEER

## SUPERINTENDENT'S REPORT.

---

*To the State Board of Control:*

I have the honor to transmit herewith my report for the two years ending September 30th, 1900, which period virtually covers the entire life of the institution.

During this time there have been 149 prisoners sentenced by the courts, 37 have been transferred to the Reformatory from the State Prison, and 8 have been transferred from the Industrial School for Boys. The discharges on parole or by expiration of sentence have been 79, leaving 115 on hand September 30th, 1900.

The two years just past have been wearing ones. To organize any institution is a difficult task; but to organize an institution, the principles of which are only slightly understood by the people, or possibly entirely misunderstood, and at the same time to construct the buildings, is a doubly difficult work. Ninety days from the time the first brick was laid on the Reformatory buildings, prisoners were transferred from the State Prison. Some of them were old in crime, though young in years, and had served terms in various other penal institutions. All were contaminated more or less by their experience in prison. Their terms of commitment were, for the most part, quite short, some being for less than six months, and nearly all of them too short to enable the Reformatory to eradicate the evil influences of years of wrong doing and living. But in spite of these discouraging facts, all but three of these original prisoners (24 in number) have left the Reformatory and the large majority are living honest and upright lives. Correspondence is maintained with nearly all of these who have served their full terms, as well as those who have gone out on parole.

---

*Wisconsin State Reformatory.*

---

Many people do not understand the objects and designs of this institution. Some think that the Reformatory system recently inaugurated in Wisconsin is a new idea. But this is a mistake. The general principle has been in successful operation in a number of states: in New York since 1876; in Massachusetts for about fifteen years; in Minnesota for nearly ten years, and in other states for shorter periods. The old idea that so much punishment must be meted out for so much crime, is no longer believed in among advanced communities. The prisoner who goes to prison under such a law of compensation, leaves it as bad a man, if not worse, as when he entered. He feels that he has paid the penalty and is free to again prey upon the community. In prison, the inmates are considered as a whole, to suffer so much restraint, to do so much work. In the Reformatory, however, the prevailing idea is how best to return to society, in the shortest time possible, some person who through ignorance, bad environments, poor training or naturally vicious habits, has committed some offense against the law. He is considered in his individual capacity; his past life, his heredity, his mental ability are all closely investigated, as well as the causes of his downfall, the temptations and steps that brought him under the law's clutches.

The design of the Reformatory, in short, is to give to every one within it a chance, by good conduct and his own efforts, to shorten his stay therein; to give proper schooling; to teach industrious and honest habits; and, by all available means to advance his material, mental and moral interests.

Strict rules and regulations are necessary and will be enforced in order to secure the best interests of each and every one. Constant employment is required to promote skill, health and personal improvement. Prompt and cheerful obedience to the rules is demanded, to obtain that discipline so essential to the class of men received here. Let me here correct a wrong impression of the inmates of this institution, found to exist with the public to a considerable extent. There are no females here.

---

*Superintendent's Report.*

---

It is not a juvenile reformatory. It is not a State Prison or Penitentiary in the ordinary sense of these terms. The young men here ranging from 16 to 30 years in age, are criminals who would have been sent to Prison if the Reformatory did not exist. But the institution is, or is intended to be in its true ideal, a sort of industrial school in which the training is compulsory.

Upon the sentence of a criminal from any court of record to the Reformatory, the clerk of such court is required to notify the Superintendent, who at once dispatches an officer to bring him in. No mileage or other expense is incident to the service, save ordinary traveling expenses, which are paid from the funds of the Refomatory. Upon his reception the prisoner undergoes a very rigid and minute examination; his name, age, parentage, birthplace, educational advantages, occupation, habits, mental proclivities and antecedents are all inquired into, and verified by correspondence as much as possible, and the result entered into a register for future reference, and additions made from time to time as the man develops, thus to enable the Board and the Superintendent to know how to adapt their course of treatment to the circumstances of each individual case. Each prisoner on entering the Reformatory, is placed in the middle grade. By six consecutive months of good behavior, diligence in work and progress in school, he is promoted to the first grade. Six months of perfect record in the first grade entitles him to a parole, providing suitable occupation is found for him in advance. Failure to reach the standard required, or flagrant violations of the regulations, will reduce a prisoner to the third grade, from which he must laboriously work his way up, before he can ask or even think of parole.

Whenever the conduct of any inmate, for a reasonable time, has inspired the Board of Control and the Superintendent with the belief that he will be honest and industrious, he may be granted a parole to leave the institution and go at large. This

---

*Wisconsin State Reformatory.*

---

is the reading of the law. Employment is provided for him for a specified term with some approved person. He is given a complete outfit of new clothing; sufficient money to pay his expenses until his first pay day and is started on his new life with every encouragement and incentive to be an honest citizen. Once a month he is required to send a report to the office, showing the time he has worked, the amount he has earned, how much he has spent and for what, also to give in a general way, his prospects and surroundings. This report is certified to by his employer and often other people are requested to state how the paroled man is conducting himself.

The agency of the parole to restrain men from the commission of crime, is extraordinarily effective. The operations of this legal expedient have proven of the highest value to men subject to its provisions, and it is rare indeed, that the conditions of a parole are violated. In such violations as have occurred, the men have not fallen back into criminal ways, but in leaving their places of employment or associating with bad characters have forfeited their right to remain at large. Fortunately even such cases are remarkably rare.

The power of restraint over paroled men, in all the features in which it may be regarded, is helpful and ordinarily sufficient in proving a strong incentive to a better course of life. The knowledge that evil conduct and courses not actually criminal, but inclining that way, such as idleness, intemperance, loose company and late hours, reported to the Superintendent, will surely lead to his return to the Reformatory to pass through a further period of imprisonment and discipline, is an ever-present check and reminder to the man, that the way of the transgressor is hard and certain to be made harder by reason of the penalties imposed upon him. This thought and these conditions cause the parole of men to possess a potency which no other restraining or repressing operation could possibly equal. Let a man know that by fulfilling certain conditions as to conduct, labor, study, etc., he can obtain a parole, and that by ob-

---

*Superintendent's Report.*

---

servance of the easy conditions of parole he can gain liberty, and rarely will he fail to respond to the incentive. The chances that a bad man will behave well under parole are greater than that a fairly good man will do so after serving his full sentence. So effective, indeed, is the parole principle in restraining men under it from crime, that its application to convicts in the State Prison would be a step in the right direction. For one thing it would help the authorities to more properly adjust sentences, so that two men serving for the same offense would not have to serve, the one a long term, and the other a very short one, as is now often the case.

With the first appropriation made for the Reformatory, a portion of the cell-room was constructed. This contains 102 available cells. For some months past all of these cells have been occupied and we have had from fifteen to twenty men sleeping on cots in the corridors. Every available foot of school room has been filled, while the dining room and work shops have been more than crowded. The fall terms of courts will certainly bring us many new prisoners, while the number to go out, either by expiration of sentence or on parole, is comparatively small. The room is wholly lacking at present to simply maintain any further increase in numbers, to say nothing of providing satisfactory reformatory facilities and agencies. The Governor has consented to the use of \$30,000 of the appropriation of \$150,000 made by the last Legislature and this will enable us to erect a large shop building fifty by three hundred feet, two stories high and which, when completed, will be utilized, for a time, for school rooms, work shops, kitchen, dining room, chapel, offices, and hospital, while the present office building will be used for industrial purposes, such as laundry, tailor shop, shoe shop, and the teaching of industrial work, as cabinet making, carpentry, black smithing, steam fitting, and the like.

But the lack of cell room still confronts us. To finish the cell room, a part of which is built, will cost about \$100,000 and will take nearly two years to complete. In the meanwhile,

---

*Wisconsin State Reformatory.*

---

what are we to do? There is little doubt that as soon as this cell room can be made ready for occupancy, the commitments to the Reformatory continually increasing in ratio, will fill every cell, 300 in number, in it. Public sentiment, at first somewhat against the Reformatory idea, mainly so because it was not understood, is rapidly turning in its favor, when its scope and workings are more fully comprehended. The judiciary see a happy solution to the question that has so often disturbed its members, whether to send a first offender to jail for a long term or to prison for a short term. The responsibility of protecting society against criminals is eagerly shared by them with the Board of Control and the Superintendent of the Reformatory, who have far greater opportunity to learn when a criminal is ready to take a place in society as a citizen, than has any judge, in the brief period that a criminal is before him on trial. Hence the judges are generally quite ready when a prisoner has plead guilty or has been proved guilty, to sentence him to the Reformatory for not less than the minimum or more than the maximum term for the offense for which he has been convicted, and leave to the Reformatory authorities to say when society will be protected in his return to it.

## INDUSTRIES.

Prior to March last, we had no work for our inmates except the domestic requirements of the institution, and we were obliged to employ the men in clearing the land, cutting brush, and in grading. Since the Reformatory was started, not one man has been idle a day, unless he was too ill to work, but at times it has been a perplexing matter to find work to do. This was particularly true in the depth of winter with the thermometer fifteen or twenty degrees below zero, when it would have been cruel to have sent men to work on the farm clearing off the underbrush.

Many of the inmates, especially the younger class from the

---

*Superintendent's Report.*

---

cities, were unfitted for this sort of work at any time, and, moreover, it afforded many opportunities for escape. Hence, it was a great relief when the Board of Control decided to transfer the tailor shop plant from Waupun to the Reformatory. This was done in March and the entire plant was immediately set in operation in the manufacture of overalls on the piece-price plan, all the materials being furnished by the contractor, who takes the full output of the factory, whatever it may be. While the making of overalls is not an ideal work for a reformatory, yet it provides work, steady work, and makes it possible to give each man a daily task, which he must reach and beyond which he may go by earnest application, with a knowledge that he will be a sharer in the profits, by his overwork. To learn to work, to learn how to work, and to like work, is the great desideratum with a large majority of prisoners and especially the youthful offender, who has too often fallen into evil ways through idleness and shiftlessness. At present we are working about sixty men making overalls, the average earnings of the men being a trifle over 61 cents a day. A daily task is required. For work done beyond the task, the Reformatory divides equally the amount received from the contractor. This overwork money belongs absolutely to the prisoner earning it. He can spend it for any article permitted by the regulations, such as a musical instrument, a tooth brush, tooth powder, handkerchief, necktie, or the like. A number send the money home to aid their families and others let it remain until their release. Some men have earned as much as eight dollars a month, but this is not common.

In addition to those at work in the overall factory, a number of men are employed in making pants for inmates of other state institutions, and a number of men are making tables and other simple furniture, not for the purpose of making money, but incidental to the teaching of these industries as trades. Thus far we have been able to produce but little work in these industries, owing to the lack of room, but both present so many

---

*Wisconsin State Reformatory.*

---

elements of skill, that we hope to considerably increase the output as soon as further room is obtained, and at the same time teach more men these two useful trades. I cannot too strongly emphasize our lack of facilities for preparation to earn well when released. It is true, some learn trades, all learn to apply themselves to work. We have too few branches of manufacture and those we have are either unremunerative when followed in free life or are unsuitable for many of the men. No Reformatory system is complete that does not train each specific subject for the specific industry for which he has natural adaptation. In spite of all our efforts and because of the limits of our industrial organization we are obliged to send men, naturally qualified for something better, to menial or cheap employment, with which they will not and ought not to be content. The right conduct of reformed criminals depends greatly upon the readiness with which they can suitably support themselves. Industries aiding the re-habilitation of a mass of prisoners must be varied to meet the different capacity, inherent or otherwise. Two things are essential to a prisoner's reformation. He must gain the *will* to live honestly and the *power* to earn an honest living.

Quite a proportion of the young men sent here by the courts are farmers' boys or farm workers. This is not generally true of reformatories, but for some reason we are getting quite a number of this class. Believing that the farm laborer is about the best paid and most independent of those doing ordinary labor, and fully convinced that hard out-door work is really a reformatory agent, I have tried to find suitable work of this kind, for as many of our men as possible. From a tract of about twenty-five acres which was cleared and broken this year, we have raised all the vegetables needed for the next year and considerably more. Among other products we obtained about 1,100 bushels of potatoes, 1,500 bushels of mangel-wurtzel, 700 bushels of carrots, 200 bushels of beets, 5,000 heads of cabbage, 175 bushels of onions, 15 barrels of cucumber pickles, 200 gal-

---

*Superintendent's Report.*

---

lons tomato products, and a great amount of other products which I need not itemize here.

There are two hundred and two acres in the land belonging to the Reformatory, only twenty-five of which are cleared. This land is nine hundred and fifty-four feet wide by nearly two miles long, being composed of three old French claims which extended from Fox river to East river. This land lies mainly east of the electric railway and is much too far from the institution to work to advantage. If the state would sell this portion of its land and buy the excellent tracts on the north and south of the Reformatory buildings, the institution would be greatly benefited. As it now is, our pigs and cows are over half a mile away, while the time lost in going to and from the further end of our land is considerable. The adjoining farms mentioned can now be purchased at a reasonable figure, which, when present conditions change, will make it difficult to procure. The lands are under-drained and in a high state of cultivation, and what is important, also afford excellent watered grazing land for cattle. I sincerely hope that steps may be taken to procure these lands and thus enable us to employ in farming and dairying, at least that portion of our inmates to whom such labor is natural and advantageous. There is no better soil in Wisconsin than the land surrounding the Reformatory. The gardens and farm could easily be made the most profitable department of the institution, if convenient of access and suitably worked.

The general health of the institution has been exceedingly good and the discipline has been excellent. Last winter we had several cases of scarlet fever and about the same time nearly every inmate was ill with tonsilitis. With this exception, however, there have been no serious cases of illness. With an average population of about one hundred, the sick calls have not amounted to more than ten per month for the past year, except at the time mentioned above. It is fortunate that we have had so little sickness because we have no hospital and no

---

*Wisconsin State Reformatory.*

---

place that can possibly be used as such at present. Dr. D. J. O'Connor, the Reformatory physician, has been indefatigable in maintaining the good health of the inmates.

There have been no escapes that have not been re-captured. Owing to the fact that we have had to work a large body of prisoners in dense thickets, and that our work shops and dining room are 1,200 feet distant from the cell room, with no walls or even fence between, a number of men found opportunity to slip away and escape, but in every instance have these been re-captured. For some months not even an attempt has been made to escape, and danger in this direction will be minimized when the new shop building is completed.

It will be noticed from the statistical report herewith that seventy-seven out of the one hundred and ninety-four prisoners were committed for terms of one year or less. This is altogether too short to accomplish permanent results in the majority of cases. The Reformatory has been established for the purpose of re-forming those who have been improperly formed as to habits and character, or neglected physically, intellectually or morally. It must begin where the parent and society have failed. It must surround the inmates with a favorable environment and keep them long enough to eradicate the evil habits which they have formed and to implant good habits and higher ideals of life. Short terms of detention such as a year or two, are not enough for the eradication of habits that it took from sixteen to twenty-five or thirty years to form, and for the foundation of requisite good habits. It is a mistaken kindness to sentence young men here for terms of six months to a year as many judges do. They should be sent for the maximum term permitted for the crime which they have committed, and be compelled to earn their release on parole, by their conduct, work and school standing while here. Better still, if it could be brought about would be a strictly indeterminate sentence. Penal institutions are for the protection of society first of all. Whatsoever, therefore, in criminal law goes beyond or falls short of

---

*Superintendent's Report.*

---

affording this protection, is wrong as well as unwise. Whenever any person will live and remain at liberty without prejudice to the welfare of his fellowmen, then he is entitled to release, and, what is just as important, not till then. We have seen many a man go out of prison, as has every prison officer, whom we felt positive would continue in criminal ways until again behind the bars. Long sentences to a prison, definite sentences, should not be given to first offenders but the parole system neutralizes the effect of a long sentence to a Reformatory. Short sentences for recidivists and long definite sentence for first offenders are in my opinion the greatest promoter of crime to be found.

Of the 79 men discharged from the Reformatory, two were afterwards sent to Prison at Waupun, one to the House of Correction in Milwaukee, one to the Industrial School at Waukesha and two resentenced to the Reformatory. Every one of these men were of the thirty-seven prisoners transferred to the Reformatory from the State prison. All of them were sentenced to Prison for short terms originally and had served a considerable share of their terms before they were transferred here.

Under the present rules of the Board transfers of such prisoners are not likely to be made. On entering Prison now, the warden makes an immediate examination and if considered eligible to the Reformatory, the transfer is ordered by the Board of Control at once, and in the meantime the prisoner is kept apart from the rest. It is a notable fact, however, that every relapse into crime of those released from this institution thus far, has been on the part of men sent here from Prison. When this fact is considered in connection with the shortness of their sentences, the Reformatory would almost seem to be absolved from the responsibility for their relapse. At the same time, however, I would be far from claiming that the Reformatory will be likely to "reform" all but ten or fifteen per cent. of its inmates.

Mr. Brockway, Superintendent of the Elmira Re-

---

*Wisconsin State Reformatory.*

---

formatory, the father of the Reformatory idea in this country, and whose twenty-five years of experience in reformatory work and many years previous in prison work, make him a specialist entitled to speak with authority, claims that from eighty to eighty-five per cent. of the inmates of the Elmira Reformatory go out to honest lives. I cannot believe that it is possible to reform so large a percentage. I believe that if he could learn positively the career of all of his men for two years after leaving the institution, he would find that the percentage of relapses is larger. But suppose it is twenty-five or even forty per cent., what of it? It is said by scientists that in the ordinary prison, forty per cent. of the population is sure to be returned; of thirty-five per cent. more, the probability is that they will be returned, while of only twenty-five per cent. does even a reasonable probability exist that they will live honest lives. If against this, the reformatories can send back to free life sixty per cent. of its inmates, to be industrious and honest citizens, *with a probability* in favor of at least twenty-five per cent. more, all due to the segregation of first offenders, together with proper discipline and the parole law, who can say that the Reformatory idea is a fad and an experiment and the system a failure?

Of the one hundred and ninety-four men sent to this institution, twenty-nine have been in reform schools for juvenile delinquents. But condemnation of Reform Schools for this reason is as unwise as it is foolish. The number forms a large proportion of our population, but these boys come from the institutions of several states and form but a very small proportion of the numbers that are treated in those institutions. And many of this number, it must be conceded, are those moral anomalies, which are the legitimate and logical outcome of preconditions over which the juvenile subjects themselves have little or no control, and which make it virtually impossible for them to become other than moral degenerates. "No being," says a recent scientist, "is responsible for the inborn weight

---

*Superintendent's Report.*

---

of heredity attached to him, or for the untoward social conditions under which he was ushered into existence," nor can any being be held responsible for the unsuccessful regeneration of these, the unfortunates of society, who are defective rather than delinquent, and who, some time, will be treated as such.

The cost of maintenance, these two years, has been large. But it must be borne in mind that the current expense fund has been burdened not only with the purchase of every requisite about the institution from furniture and equipment, to cattle, horses and wagons, etc., but barns, pig pens, five houses, rented to officers, cold storage house, coal sheds, school rooms, guard room, and even the present power house and shop buildings were constructed from the maintenance fund. Our water works, electric light, and in fact, nearly the entire power plant, as well as the machinery of the overall factory were paid for from the current expense fund.

The expense of sending after prisoners from the place of conviction is quite a burden and is one that falls on no other institution in the state. To outfit paroled prisoners for their work is also expensive but unavoidable; it also costs money to watch over them and see that they are walking in straight paths. At present with an average of one hundred and fifteen men, we are turning about \$1,000 a month of net earnings into the state treasury. While this does not pay much more than a third of the running expenses, it is a remarkably good showing for a new institution and one with so small a population. An increase in numbers will not mean a proportionate increase in expenses, but it will mean a considerable increase in the ratio of earnings. At no time can the Reformatory be operated as cheaply as the Prison, because the Reformatory must have everything that a prison has and much more, such as trade schools, and the like, but I see no reason to believe that the expense of conducting the Reformatory will be unreasonably large after it shall be thoroughly equipped, fairly well built up, and with a population of three hundred or more,

---

*Wisconsin State Reformatory.*

---

A study of the statistical tables herewith will prove not only interesting but instructive. The table showing the nationality of the parents of the prisoners is particularly so. It is difficult to understand why the children of certain nationalities should form so large a proportion of the whole number. The original immigrants from Germany, England and Poland, for instance, are not criminal to any such degree as shown by the children of these classes. Why? Does the relaxation from the rigid customs and laws of the old country, degenerate into license in the following generation? Is there too much liberty for their own good? Or is it that there is a difficulty on the part of the parents in adjusting themselves to new conditions which results in throwing the children out of balance? Whatever it may be, some great reason must exist why offspring of foreigners should form ninety per cent. of the population of the Reformatory. Wisconsin has the lowest criminal population in proportion to its whole population, of the states of the Union. Its foreign population forms the larger percentage of its entire people and this portion has been so industrious and law abiding in the past that the small number of criminals has been accounted for, because of the high grade of the foreign element. Is there to be a change now in the second generation, or has the more recent immigration brought in a less desirable class of citizens?

Of the prisoners claiming American parentage, the larger percentage were sentenced because of crimes committed by reason of intemperance. Of the foreign descendants this is not generally true but the fact that forty per cent. cannot read nor write or can barely do so, is highly significant.

In closing this report, I beg to acknowledge the many courtesies and valuable advice extended to me by your honorable Board, and the deep interest manifested in the affairs of the institution as an official body.

To the employes of the Reformatory, and especially to the assistant superintendent, W. J. Thomas, I am deeply indebted.

*Statistical Tables.*

for loyal service, and I take this opportunity to express my sincere thanks for the assistance and co-operation I have received.

Respectfully submitted,

JAMES E. HEG,  
*Superintendent.*

## STATISTICS OF PAUPERISM.

The years 1899 and 1900—Ending September 30th.

Movement of population in poor houses.	1899.	1900.
Number in poor house at the beginning of the year.....	1,569	1,533
Of whom were males.....	1,122	1,103
And females.....	447	430
There were received during the year.....	1,158	1,104
Of whom were males.....	900	837
And females.....	258	267
There were born in poor houses.....	13	15
Of whom were males.....	7	8
And females.....	6	7
Making the total in poor houses during the year.....	2,740	2,652
Of whom were males.....	2,029	1,948
And females.....	711	704
There were discharged during the year.....	990	904
Of whom were males.....	758	686
And females.....	232	218
There were placed out during the year.....	22	19
Of whom were males.....	10	10
And females.....	12	9
Ran away during the year.....	24	18
Of whom were males.....	22	17
And females.....	2	1
There died in poor houses during the year.....	181	181
Of whom were males.....	131	133
And females.....	50	48
Total loss of population during the year.....	1,217	1,122
Of whom were males.....	921	846
And females.....	296	276
Number remaining in poor houses at the end of the year.....	1,523	1,530
Of whom were males.....	1,108	1,102
And females.....	415	428

*Statistical Tables.*

FINANCIAL STATEMENT OF POOR HOUSES.

EXPENDITURES.	1899.	1900.
Salaries of overseers and matrons.....	\$23,828 09	\$23,071 45
Wages of employes.....	25,316 37	27,662 55
Medical attendance.....	4,559 22	4,020 80
Groceries and provisions.....	40,519 21	40,553 60
Fuel and lights.....	11,987 73	16,424 11
Clothing.....	10,219 86	10,214 59
Furniture.....	2,514 14	3,355 04
Ordinary repairs.....	7,815 20	6,982 48
Other ordinary expenses.....	27,481 49	30,158 13
<b>Total current expense.....</b>	<b>\$154,241 31</b>	<b>\$162,442 76</b>
<b>RECEIPTS.</b>		
From sales of farm produce.....	\$11,938 34	\$13,504 95
From expenses of inmates refunded.....	2,519 90	3,244 13
From other sources.....	4,650 61	5,930 68
<b>Total receipts.....</b>	<b>\$19,108 85</b>	<b>\$22,679 76</b>
<b>The net expenses therefore were.....</b>	<b>135,132 46</b>	<b>139,763 00</b>
<b>Total number of weeks board furnished.....</b>	<b>83,855</b>	<b>83,104</b>
<b>Average cost of support per week.....</b>	<b>1 61</b>	<b>1 65</b>

COUNTY JAILS, 1900.

COUNTIES.	Material of which constructed.	Date of construction	Original cost of jail, including additions.	NO. OF CELLS.		How many can properly be accommodated.	REMARKS.
				For males.	For females.		
Ashland.....	Stone and brick ....	1885	\$35,000 00	16	4	50	<p>First class jail, in good condition and well managed. The ventilation and sanitation are good. Cells are of steel, with corridors three feet wide around cage. Water closets in each cell and in outer room. Room for women in sheriff's residence. Considered fire proof.</p> <p>This is a new jail and a credit to Bayfield county. Prisoners were moved in November 11th, 1893.</p> <p>Basement jail with apartment above. Defective and unsafe. Sanitary condition bad.</p> <p>A very good brick building. Covered buckets are used. Ventilation fair. Room upstairs for female prisoners.</p> <p>Not often used. A very poor jail. Not very well kept.</p> <p>A small jail, but answers fairly well as there are not many prisoners confined therein.</p> <p>New jail of brick and stone. Has all modern improvements, including steam heating and electric light. Is a first class jail.</p> <p>A well constructed jail, but defective in regard to sewerage. Female cells above sheriff's residence. This jail is in fair condition and fairly well kept.</p> <p>A new jail with modern improvements. Facilities for separation of sexes.</p> <p>A practically fireproof and very complete jail. One of the best in the state.</p> <p>A good jail with modern improvements.</p> <p>A well built jail with separate cell for women.</p> <p>Of approved construction with steel cage, but too small for the needs of the county.</p> <p>A very well kept jail.</p> <p>A very good jail, supplied with city water. A work-house has been built in jail yard.</p> <p>Sufficiently large for present needs. Closets out of repair; new closets ordered put in.</p> <p>A good jail, lacking, however, facilities for the proper separation of sexes.</p>

18 Condition fair at last inspection.

28 Steel cage with twelve cells. Ventilation poor. A new sheriff's residence contiguous to this jail was erected in 1894.

22 A very good jail and safe. Not many prisoners confined in this jail.

6 Jail is old and unsafe and poorly ventilated. Should be replaced by new jail.

10 A fairly good building with separate apartment for women.

30 A first-class jail in all appointments. Fine cage and good beds. Well supplied with water and well ventilated.

10 Ventilation and sewerage good. City water. Separate rooms for females.

36 A fair jail kept in good order.

40 This jail is of good construction and fully meets the requirements of the county.

24 Two cages, one above the other. Separate room which may be used for females. Fairly well kept.

6 A good jail, except that there are no facilities for the separation of sexes.

52 A very fine jail. Heated by steam and lighted by electricity. Department for females. Finely kept.

16 New jail with all modern improvements and is a first-class jail. Has separate apartments for women.

12 Two steel cages on each floor. The jail is too small for the needs of the county and is unsafe.

10 A fair jail with good facilities for the separation of sexes but poor facilities for the classification of offenders.

36 A fine jail furnished with all modern conveniences. Separate cell for females.

72 A first-class jail in every particular. Facilities for separation of sexes.

52 New with all modern improvements, well kept and in good condition. Separate cells for insane.

4 Steel cage in one room of basement of court house. This jail is not constructed according to law as it is dark, low and unhealthy.

100 This is the best jail in the state and its capacity is sufficient. All women or girl prisoners are confined in what is known as the female ward, which is separate from the part occupied by the males. Capacity of female department is 16.

*Statistical Tables.*

COUNTY JAILS, 1900.—Continued.

COUNTIES.	Material of which constructed.	Date of construction	Original cost of jail, including additions.	NO. OF CELLS.		How many can properly be accommodated.	REMARKS.
				For males.	For females.		
Monroe .....	Stone and brick.....	1891	\$16,500 00	16	6	44	A very satisfactory jail and hitherto has had good management; needs repairing.
Oconto .....	Stone and brick.....	1887	9,000 00	7	.....	20	A very good jail, well supplied with water closets and bath rooms. Separate room for females.
Oneida.....	Stone and brick.....	1888	15,000 00	6	.....	12	A good building with iron cages. Large room for the temporary detention of women and boys.
Outagamie	Brick and wood.....	1886	30,000 00	23	.....	43	This is what is called a rotary cage and is fairly satisfactory.
Ozaukee.....	Brick and iron.....	1894	17,500 00	5	2	12	New building, having five double cells for males and two single cells for women. Bath tubs. Building heated by steam.
Fepin.....	Stone and brick.....	1895	.....	.....	.....	.....	Is a good jail and sufficient for needs of county.
Pierce.....	Brick.....	1870	18,000 00	3	.....	9	On the first floor of the court house. Considered safe.
Polk.....	Stone.....	1881	2,000 00	2	.....	6	Located in basement of stone building, the two upper floors of which are occupied by county offices. The jail part is damp and unsuitable for occupancy.
Portage.....	Brick and steel.....	1897	17,500 00	22	.....	71	A very good jail with all modern improvements. Facilities for separation of sexes.
Price.....	Brick, stone and iron	1894	15,000 00	6	3	18	This is a very good little jail and well kept. Has separate cells for females.
Richland....	Stone.....	1868	8,000 00	2	.....	4	A very poorly constructed jail. Steel cage with four cells in second story. Two cells on ground floor not used, having been condemned. There are not cells enough.
Racine.....	Stone and brick.....	1893	23,000 00	24	.....	37	This is a new jail, first class in every respect and well kept.
Rock.....	Brick, stone and steel	1900	23,000 00	18	1	60	First class jail, modern in all details. Facilities for separation of sexes. Hospital ward over office.
St. Croix....	Stone.....	1900	10,000 00	6	.....	10	A new jail with all modern improvements. Facilities for separation of sexes.

Statistical Tables.

Sauk .....	Stone and brick.....	1890	20,000 00	18	3	26	This is a model jail and one of the best in the state for the money expended.
Sawyer.....	Wood .....	1884	3,500 00	6	.....	30	Three steel cells for males and one wooden cell for women. Answers the purposes and is neatly kept.
Shawano....	Stone.....	1880	18,000 00	10	.....	10	In a very unsanitary condition and unfit for use.
Sheboygan...	Stone and brick .....	1893	21,500 00	18	4	39	Undoubtedly one of the best jails in the state. Ventilation system perfect.
Taylor. ....	Brick.....	1892	14,000 00	12	.....	40	Good substantial building. Sewerage poor.
Trempealeau	Brick and iron.....	1884	9,000 00	2	1	4	Not large but sufficient for the needs of the county. A very serviceable jail.
Vernon.....	Stone and brick.....	1880	5,000 00	8	.....	16	A fair jail with separate apartments for females.
Vilas .....	Stone and brick.....	1895	12,000 00	4	1	11	A good substantial jail with modern improvements.
Walworth...	Stone and brick.....	1878	10,000 00	11	3	33	Altogether the jail is creditable to Walworth county being as it is in every way superior to the average.
Washburn...	Wood.....	1883	4,500 00	5	.....	8	
Washington.	Stone and brick.....	1887	14,000 00	5	.....	20	This is a very good jail, with steel cage and cells. Separate cell for women.
Waupaca....	Brick .....	1896	12,000 00	12	.....	50	New jail with all modern improvements. Facilities for separation of sexes.
Waushara...	Brick.....	1882	2,000 00	5	.....	5	Not very secure and of small proportion. Females kept in cell on upper floor.
Winnebago..	Stone and brick.....	1900	24,000 00	23	.....	50	This is a first class jail, one of the best in the state. Facilities for separation of sexes. Has hospital ward, insane ward and three cells for juveniles.
Wood .....	Stone and iron.....	1882	.....	6	.....	6	A basement jail with comparatively few prisoners.
Waukesha...	Stone and iron.....	1885	22,000 00	8	2	18	Very complete. Large enough to accommodate all classes of offenders except tramps.

FIFTH ANNUAL REPORT

OF THE

BANK EXAMINER

OF THE

STATE AND PRIVATE BANKS

OF WISCONSIN.

---

Submitted to the Governor December 12, 1899.

MADISON, WIS.:

DEMOCRAT PRINTING COMPANY, STATE PRINTER

1900.

# REPORT OF THE BANK EXAMINER.

---

BANK EXAMINER'S OFFICE,

MADISON, WIS., Dec. 12, 1899.

HON. EDWARD SCOFIELD,

*Governor of Wisconsin.*

SIR:—In compliance with the provisions of section 2023r, Wisconsin Statutes 1898, I transmit herewith the fifth annual report of this department showing the financial condition of the state, private, and savings banking institutions of this state, at the close of business, December 2nd, 1899, as compiled from reports received in response to the call made upon the date named.

CHANGES IN STATE AND PRIVATE BANKS SINCE DECEMBER 1ST,  
1898.

*Changed from Private to State Bank.*

	Capital.
The L. C. Hyde & Brittan Bank..... Beloit .....	\$50,000 00

*New State Banks.*

The Port Washington State Bank..... Port Washington .....	\$25,000 00	
Department State Bank .....	Stoughton .....	25,000 00

*New Private Banks.*

Cuba City Bank .....	Cuba City .....	\$20,000 00
Bank of Cashton .....	Cashton .....	5,000 00
Bank of New Lisbon.....	New Lisbon .....	20,000 00
Bank of Cambridge.....	Cambridge .....	10,000 00
Citizens Bank .....	Stanley .....	10,000 00
Farmers Bank .....	Cuba City .....	5,750 00
The Belmont Bank .....	Belmont .....	2,000 00
The Necedah Bank .....	Necedah .....	15,000 00
Bank of Oregon .....	Oregon .....	10,000 00
Loan & Deposit Bank .....	Turtle Lake .....	None.
The Wilton Bank .....	Wilton .....	5,000 00
The Home Bank of Blair.....	Blair .....	2,500 00
Bank of Colfax .....	Colfax .....	3,000 00
Bank of Hancock .....	Hancock .....	10,000 00

*Banks, the Capital of which was reduced by act of the Legislature of 1899.*

Bank of Burlington, Burlington .....	from \$50,000 to	\$25,000
Security Savings Bank, La Crosse .....	from 50,000 to	30,000
City Bank, Portage .....	from 100,000 to	50,000
Bank of Commerce, West Superior.....	from 250,000 to	150,000

*Closed Banks.*

		Capital.
Dane County Bank.....	Stoughton .....	\$60,000 00
Exchange Bank .....	Alma .....	10,000 00
Bank of W. H. Jones.....	Black Earth .....	1,000 00
Bank of Dorchester.....	Dorchester .....	6,000 00

By comparing the number and condition of the banks reporting on December 1st, 1898, the following increase is shown:

## NUMBER OF BANKS.

	Dec. 1, 1898.	Dec. 2, 1899.	Increase.
State banks.....	133	135	2
Private banks .....	114	124	10
Savings banks.....	1	1	.....
Total .....	248	260	12

There have been, as by law required, three statements called for during the year, the aggregate resources and liabilities of the several institutions on the dates upon which reports were called for being as given in the table following:

RESOURCES.	April 5, 1899.	Sept. 7, 1899.	Dec. 2, 1899.
Loans and discounts.....	\$34,485,408 85	\$36,886,591 17	\$39,751,101 88
Unpaid capital.....	618,150 00	583,150 00	583,150 00
Overdrafts.....	798,687 60	677,940 26	740,173 26
Banking house.....	1,071,220 94	1,592,049 66	1,081,504 71
Other real estate.....	1,455,022 74	1,448,665 67	1,447,606 76
Furniture and fixtures.....	284,698 47	285,089 12	295,110 82
Bonds, stocks, etc.....	4,327,850 08	4,978,516 52	4,978,679 93
Cash items.....	168,119 87	137,172 59	141,826 09
Checks on other banks.....	345,897 31	438,687 27	565,141 40
Due from banks and bankers.....	12,983,548 22	12,623,446 28	11,900,801 41
U. S. and National currency.....	1,941,281 65	1,981,601 91	2,037,148 00
Specie.....	1,757,644 16	1,807,403 38	1,888,531 06
Nickels and cents.....	31,232 75	32,968 54	33,223 81
Loss and expense account.....	183,541 63	191,309 46	285,670 15
Revenue stamp account.....	21,662 91	51,922 77	32,368 85
Other resources.....	53,791 08	86,478 38	65,231 73
	<b>\$60,528,758 26</b>	<b>\$63,302,392 98</b>	<b>\$65,827,269 86</b>
<b>LIABILITIES.</b>			
Capital.....	\$7,930,660 69	\$7,777,239 89	\$7,953,914 63
Surplus fund.....	1,598,369 53	1,601,132 14	1,587,287 46
Undivided profits.....	1,022,586 15	1,099,071 28	1,462,302 60
Deposits subject to check.....	20,625,824 18	20,785,399 11	19,808,760 83
Certificates of deposit.....	27,439,750 58	30,291,791 55	23,874,040 77
Savings deposits.....			9,379,606 64
Due to banks and bankers.....	1,633,116 62	1,424,740 47	1,423,601 28
Dividends unpaid.....	697 00	4,669 50	380 00
Certified checks.....	22,734 33	30,591 37	44,412 61
Cashiers' checks.....	104,528 91	114,272 32	89,474 20
Bills re-discounted.....	20,500 00	28,487 50	79,062 45
Bills payable.....	76,264 63	86,355 84	85,107 63
Other liabilities.....	53,785 61	58,642 01	44,338 76
	<b>\$60,528,758 26</b>	<b>\$63,302,392 98</b>	<b>\$65,827,269 86</b>

By a comparison of the December 1st, 1898, returns with those of December 2nd, 1899, the table given below shows an increase in items named as follows:

Increase in:	State banks.	Private banks.	Savings bank.	Total.
Resources.....	\$3,497,166 22	\$2,171,709 26	\$135,083 90	\$10,803,959 39
Loans and discounts.....	6,912,876 49	1,398,543 27	30,500 63	8,341,920 39
Capital, surplus and profits.....	174,071 72	66,840 99	4,090 78	245,003 49
Deposits.....	8,399,648 70	2,125,419 79	130,993 12	10,656,061 61
Available cash.....	923,977 46	684,467 47	19,466 26	1,627,891 19

In reviewing the figures above given, attention centers upon the increase, in all of the items named, in the aggregate volume of business and the number of banks. The increase in deposits and volume of business is unparalleled in the financial history of the state, and the increase in the number of banks is the largest in recent years.

The following comparative table shows the volume of business at each of the dates named therein since the organization of this department:

	Nov. 16, 1895.	Nov. 21, 1896.	Nov. 6, 1897.	Dec. 1, 1898.	Dec. 2, 1899.
State banks .....	125	130	130	133	135
Private banks .....	107	109	110	114	124
Savings bank .....	1	1	1	1	1
<b>Total</b> .....	<b>233</b>	<b>240</b>	<b>241</b>	<b>248</b>	<b>260</b>

RESOURCES.

	November 16, 1895.	November 21, 1896.	November 6, 1897.	December 1, 1898.	Dec. 2, 1899.
Loans and discounts.....	\$28,062,796 67	\$25,905,481 71	\$27,141,604 77	\$31,409,181 49	\$39,751,101 88
Unpaid capital.....	675,014 67	671,017 59	678,500 00	619,150 00	583,150 00

Report of the Bank Examiner.

In calling for reports last made, an additional item showing the number of depositors in the state institutions was called for, which shows the aggregate number of depositors to be 158,340 or an average of \$344.07 for each depositor.

Through the courtesy of the officials of the national banks of this state (79 in number), who have favored this department with a copy of the reports made by them to the Comptroller of the Currency at Washington, upon the same date, I am enabled to submit herewith a statement showing the aggregate resources and liabilities of all of the banking institutions of the state, both state and national, which, as compiled, are shown to be as follows:

RESOURCES.		LIABILITIES.	
Loans and discounts....	\$89,279,333 91	Capital paid in .....	\$17,062,414 63
Overdrafts .....	1,206,311 09	Surplus fund .....	3,854,031 48
Banking house, furniture and fixtures .....	2,285,604 61	Undivided profits net...	2,413,759 61
Other real estate.....	1,864,867 77	Individual deposits ...	62,325,279 22
Bonds, stocks, etc.....	15,437,909 57	Certificates and savings deposits .....	50,589,064 74
Cash items and checks..	2,178,824 79	Due to banks .....	8,589,644 07
Due from banks .....	25,777,384 85	Dividends unpaid .....	4,545 00
U. S. and national cur- rency .....	3,962,659 00	Certified and cashiers' checks .....	477,371 77
Specie .....	6,055,657 55	Bills re-discounted and payable .....	164,170 08
Nickels and cents .....	61,701 94	National bank notes out- standing .....	2,776,657 50
Other resources .....	232,521 78	Other liabilities .....	85,838 76
<b>Total .....</b>	<b>\$148,342,776 86</b>	<b>Total .....</b>	<b>\$148,342,776 86</b>

The aggregate of the resources of all of the banking institutions of the state on December 2nd, 1899, as shown above, is \$148,342,776.86 and compared with returns of the same date in 1898, shows an increase of \$19,449,243.76. There is also shown an increase of \$19,574,654.19 in individual deposits, and an increase in loans and discounts of \$18,550,110.63. It is notable that the increase in loans does not keep pace with the increase in deposits, which indicates a safe and healthy growth in business

and that, notwithstanding the abundance of funds and the temptation at such times to invest in speculative ventures, the banks of the state are conducting their business in a conservative manner.

The cash reserve held by the state institutions is approximately 30 73-100 per cent., and that of the national banks 29 33-100 per cent. of their deposits.

#### REAL ESTATE LOANS.

A classification of the loans and discounts indicates that \$31,012,220.37 or 77 98-100 per cent. of this class of assets consists of paper with one or more individual or firm names, with or without other personal security, and \$8,749,881.51 or 22 1-10 per cent., on mortgage or other real estate security. By a further classification of the real estate loans it may be noted that in cities of more than 6,000 inhabitants, real estate loans constitute 8 26-100 per cent., and in towns and cities of less than 6,000 inhabitants 19 91-100 per cent., of the aggregate capital, surplus and deposits.

Reference is made to the percentage of real estate loans for the reason that the banking act which was submitted to a vote of the people at the general election in 1898, was strenuously opposed in some quarters because, as was alleged, it curtailed unnecessarily the power of banks to loan funds upon real estate security. The act named provided that in the smaller towns and cities, by action of the board of directors, a bank might loan 33 1-3 per cent. of its capital, surplus and deposits, which, as shown above, is one-third more than is actually being loaned upon securities of this class at the present time.

The desirability of real estate loans as bank assets has been and is a subject of much honest controversy, and regarding which there is a wide difference of opinion among bankers. It may well be conceded, however, that a reasonable percentage of loans

of this class made upon improved agricultural lands or upon inside village or city property, based upon a careful and conservative valuation, is a safe investment and as nearly proof against loss as any other class of securities which are usually carried by banks.

#### OVERDRAFTS.

In making a comparison of the relative strength of the state and private banks with that of the national banks, it is noted that the proportionate strength of each class is not dissimilar save in the one specific item of overdrafts.

The aggregate of the loans and discounts of the national banks is \$49,528,232.03 and the aggregate of the overdrafts carried is \$466,137.83, while the state and private banks report loans and discounts of \$39,751,101.88 and aggregate overdrafts of \$740,173.26. In other words, although the aggregate loans in national banks exceed those of the state and private banks over twenty per cent., the aggregate overdrafts of the state and private banks exceed those of the national banks nearly forty per cent.

Temporary overdrafts in moderate sums in certain localities can hardly be avoided,—although this is, in a great measure, a matter of education in which the local banker is the tutor—but the granting of this privilege, in amounts limited only by the needs of the party who overdraws and for an indefinite length of time without exacting security therefor, cannot be too strongly condemned, is foreign to every principle of conservative banking, and is practically a misapplication of the bank's funds. As a rule the safe patron of a bank will not ask for such accommodation; no other class of patrons should be allowed them. The number of the state institutions which habitually allow excessive overdrafts is comparatively small, and the above comparison is made for the purpose of forcibly calling the attention of this class of bankers to the matter and urging upon

them the necessity of materially reducing this line of undesirable, if not intangible, assets.

CLOSED BANKS.

Since the date of my last report, two private banks, namely, The Exchange Bank of Alma and the Bank of Dorchester, and one incorporated bank, The Dane County Bank of Stoughton, have failed.

The immediate cause of the failure of the Exchange Bank of Alma was the destruction by fire of property, upon which the funds of the bank had been loaned. The primary cause, however, was bad investments in the way of loans on western and northern lands and village lots in boom towns previous to the panic of 1893, and in mining ventures, in all of which the proprietors of the bank suffered heavy losses.

The proprietors of the Bank of Dorchester were engaged in other business pursuits in addition to that of banking and incurred liabilities in excess of their ability to pay; attachment suits ensued and this being a private institution the attachments not only covered other lines of business in which the proprietors were engaged but the assets of the bank as well, and while the assets of the bank, as shown by the examinations made, were nearly, if not quite, sufficient to meet its liabilities, they could not legally be held for that purpose but were by law required to be divided pro rata among all persons who were creditors of the firm, whether such person was a creditor of the bank or any other branch of the firm's business.

In former reports I have recommended the enactment of laws authorizing the incorporation of banks with a less capital than \$25,000.00 in the smaller towns of the state. Should this be done a majority of the private banks would incorporate, thereby making it possible to arrive more nearly at their real condition. The main difficulty in supervising the private bank is, that

while the assets and liabilities as shown by its books may show the bank proper to be in a safe condition, the individual or firm or the individual members of the firm which operates it may be indebted to outside parties to such an extent as to cause the person or firm to be insolvent, and any examination which could reasonably be made would fail to disclose such insolvency.

While good lawyers are in doubt as to the validity of a law which would seek to make of the depositor in a private bank a preferred creditor, and also doubt the power of the state to prohibit a private banker from engaging in any other business, there are good and sufficient reasons, aside from the fact that it would greatly improve the system of state supervision, why the legislature should give this subject serious consideration.

The Dane County Bank of Stoughton closed its doors June 10th last. In the month of December previous, an examination of this bank was made which showed that large sums were being loaned by the bank to its officers and to those with whom they were financially interested without adequate security. Written instructions were given the officers and directors to at once call a meeting and insist that all large loans be reduced in amount or properly secured. On March 26th the bank was again visited and the examination disclosed the fact that these loans not only remained unsecured and unpaid, but, contrary to instructions given, had been largely increased. A few days thereafter the Board of Directors was called to the Bank Examiner's office, and after going over the affairs of the bank in detail a resolution was drafted authorizing the President of the bank to take active charge of its affairs with instructions to the Board to hold a meeting upon their return to their banking house, adopt the same, and proceed to at once collect or secure the large loans to which reference has been made.

This resolution was adopted April 1st, after which time the President was in charge of the bank until it closed. Upon the same day, April 1st, legal written notice was given calling upon

the officers and directors to place the bank in a safe condition under penalty of causing publication of its condition to be made in the local papers as by law required.

At the expiration of the thirty days a consultation was held with the President, who stated that advices received indicated that prospects were favorable for the payment of a major portion of the large loans, and an extension of time was granted.

Frequent correspondence gave hopes that the statements of the President might prove correct. On June 10th, however, he received advices to the effect that no funds could be expected, and wisely concluded to close the bank.

The responsibility for the failure of this bank rests with its officials, and chiefly with its cashier, as that official was implicitly trusted in the management of its affairs. As is too frequently the case with bank officials he went to the extreme of recklessness in using the funds of the bank to bolster up speculative ventures in which he was largely interested. It can hardly be presumed that these methods would have been practiced had he not become personally involved in these transactions. The other officers and directors of the bank failed to give the required attention to its management for they had ample warning of the reckless methods which were being practiced.

---

On August 16th last, it became my duty to make official publication that the condition of the Stoughton State Bank was such that the interests of the depositors therein were seriously jeopardized because of its unbusiness-like methods and the serious impairment of its capital.

The events which led up to this unpleasant duty may be briefly stated as follows: On December 1st, 1898, an examination of this institution which was made by myself showed it to be in an unsatisfactory condition because of excessive overdrafts and ab-

normally large lists of paper which was long past due. Instructions were given to reduce this class of undesirable assets by demanding notes for overdrafts and renewals with ample security for past due paper. To more correctly ascertain whether such instructions had been complied with, I caused another examination to be made on the 30th day of March following. This examination disclosed the fact that no effort had been made to comply with the instructions given. After further correspondence with its cashier and failing to receive favorable response, on the 25th of April, I gave the legal notice of thirty days, as by law required, for it to make good the impairment of its capital. Repeated extensions of time were granted, and in the meantime a complete inventory of all assets of every kind and nature, as certified to in writing by its cashier, was made. A meeting of the stockholders was called, at which time they were made conversant with the bank's real condition and urged to place the bank in a safe condition. A final request was made that instructions given be complied with on August 16th, nearly four months after the first notice was given, which request was refused, after which the public was notified of the bank's real condition as required by law.

With the aid of the cash reserve which was at that time carried by the bank, and other available assets, it was able to meet the demands of its depositors.

This action was not taken until a thorough, exhaustive and painstaking investigation of the affairs of the bank had been made, and after having obtained accurate knowledge of the value of the bank's assets and of the financial standing of its stockholders.

That no undue haste was exercised and that extreme leniency was shown is evidenced by the fact that nearly four months elapsed between the time the first legal notice was given and the publication through the press.

That no injustice was done to the bank, either before or at the time of making the publication of its condition, the records of the office will furnish ample proof. That its condition fully warranted the action taken there is not a shadow of doubt.

CONCLUSION.

I have not felt called upon to pay but little heed to criticisms which have been made in relation to the conduct of this office, knowing, as I do, that such criticism has been, in the main, the result of misunderstanding of the powers conferred by law. It may not be irrelevant, however, in this connection, to refer in a general way to the duties of the Bank Examiner and the powers conferred upon him, in the supervision of banks, and the work which he is required to perform.

Until the office of Bank Examiner was created there was no provision of law for any supervision of state and private banks. There was and is no provision of law requiring any uniformity in the keeping of the books of account, limiting the amount which should be loaned to any individual or firm, limiting the time at which past due paper should be charged off, or requiring that a specific proportionate sum should be carried as cash reserve, etc. Each bank had been a law unto itself in these matters, and had conducted its business and kept its accounts as it chose.

When the office of Bank Examiner was created in 1895, it found 240 banks (the number of which has increased to 260), to which have been added 52 building and loan associations, and another unnumbered class of investment associations, making a total of over 325 institutions which the law requires him to supervise.

Until recently, the examining force (which now consists of three persons including the Bank Examiner) of the office has been the Bank Examiner and his deputy, which made it neces-

sary for each to examine or supervise over 150 institutions at stated intervals, and in addition perform the numerous duties required at the home office.

When we compare the labor exacted of this small examining force with that of the State of Michigan which has but 182 banks to supervise under a wholesome banking law, with an examining force of a Commissioner, deputy, and three examiners (about sixty banks to each examiner), and with the examining force of the national government which employs one examiner for each seventy or seventy-five banks, the labor involved is strikingly manifest. It is obvious that this cannot be done with the present force and the work of the home office receive that attention which it should receive, if more than a limited time is spent in the examination of each institution.

Notwithstanding the absence of the legal requirements above stated, a very large majority of the banks of the state have not been and are not now open to unfavorable criticism.

The difficulties encountered in my efforts to bring about a greater uniformity in book-keeping and accounting, and, in individual instances, the adoption of more conservative and business-like methods can only by experience be appreciated.

The difficulty and delicacy of the Bank Examiner's office is obvious. It is not more his duty to protect the people against a fraudulent bank or a bank whose officials are reckless in its management than to see that no undue suspicions are cast upon a bank which is being fairly conducted although not in all respects in conformity with approved banking methods. There have been times when hasty or indiscreet action on his part would have carried down numbers of perfectly solvent institutions and thereby wrought disaster. It has been my earnest endeavor since assuming the duties of this office to, as far as possible, improve the condition of the several institutions under my supervision, and, notwithstanding the defects of the law, the good

which has been accomplished in the way of improvement in methods of conducting business and bringing about improved system of keeping the books of account has been of incalculable benefit to this state. A large part of the labor performed is, for obvious reasons, of a confidential character and for prudential reasons is not disclosable even in official reports. Instances have not been rare, yet I am pleased to state not numerous, where the capital of banks has been found to be impaired and the legal notice served, and save in one conspicuous instance, the officials have with a commendable energy and willingness placed their banks, within the time limit, in a safe condition. Of the individual instances of this character the general public do not and should not have knowledge.

A law, however, that does not make it possible to correct a wrong is incomplete. Anything short of the power to take possession of an institution, which is the custodian of the people's money, which is found insolvent, is insufficient. A bank's ability to meet the demands of depositors in a time of local distrust does not of itself constitute solvency, and being able to allay distrust by a sufficiency of available assets may cause the average depositor to have confidence in an institution which may be absolutely insolvent. A simple amendment to the existing law, authorizing the Bank Examiner in case a bank is found to be insolvent to institute proceedings, with the approval of the Attorney General, for the appointment of a receiver to wind up its affairs, would compel obedience to instructions and prove a safeguard against reckless management.

The present prosperous era is an opportune time for those banks which have been suffering from losses incurred in the past to place themselves in a strong and healthy condition, and unless a bank is able to make rapid progress in this direction at the present time, its ability to do so may well be doubted.

It is a duty which they owe to their patrons to use every pos-

sible effort to accomplish this result. It is the duty of the Bank Examiner to co-operate with all such, and when necessary enforce the law looking to that end.

In closing, I take pleasure in acknowledging the faithful and efficient services of Deputy Bank Examiner J. H. Rogers, ex-Deputy Bank Examiner G. D. Bartz, Chief Clerk Thaddeus Wild, and Clerk W. A. Richter, and to express my appreciation of the energy and industry which has characterized their labor during the year which has just closed.

Very respectfully,

EDWARD I. KIDD,

*Bank Examiner.*

and that, notwithstanding the abundance of funds and the temptation at such times to invest in speculative ventures, the banks of the state are conducting their business in a conservative manner.

The cash reserve held by the state institutions is approximately 30 73-100 per cent., and that of the national banks 29 33-100 per cent. of their deposits.

#### REAL ESTATE LOANS.

A classification of the loans and discounts indicates that \$31,012,220.37 or 77 98-100 per cent. of this class of assets consists of paper with one or more individual or firm names, with or without other personal security, and \$8,749,881.51 or 22 1-10 per cent., on mortgage or other real estate security. By a further classification of the real estate loans it may be noted that in cities of more than 6,000 inhabitants, real estate loans constitute 8 26-100 per cent., and in towns and cities of less than 6,000 inhabitants 19 91-100 per cent., of the aggregate capital, surplus and deposits.

Reference is made to the percentage of real estate loans for the reason that the banking act which was submitted to a vote of the people at the general election in 1898, was strenuously opposed in some quarters because, as was alleged, it curtailed unnecessarily the power of banks to loan funds upon real estate security. The act named provided that in the smaller towns and cities, by action of the board of directors, a bank might loan 33 1-3 per cent. of its capital, surplus and deposits, which, as shown above, is one-third more than is actually being loaned upon securities of this class at the present time.

The desirability of real estate loans as bank assets has been and is a subject of much honest controversy, and regarding which there is a wide difference of opinion among bankers. It may well be conceded, however, that a reasonable percentage of loans

of this class made upon improved agricultural lands or upon inside village or city property, based upon a careful and conservative valuation, is a safe investment and as nearly proof against loss as any other class of securities which are usually carried by banks.

#### OVERDRAFTS.

In making a comparison of the relative strength of the state and private banks with that of the national banks, it is noted that the proportionate strength of each class is not dissimilar save in the one specific item of overdrafts.

The aggregate of the loans and discounts of the national banks is \$49,528,232.03 and the aggregate of the overdrafts carried is \$466,137.83, while the state and private banks report loans and discounts of \$39,751,101.88 and aggregate overdrafts of \$740,173.26. In other words, although the aggregate loans in national banks exceed those of the state and private banks over twenty per cent., the aggregate overdrafts of the state and private banks exceed those of the national banks nearly forty per cent.

Temporary overdrafts in moderate sums in certain localities can hardly be avoided,—although this is, in a great measure, a matter of education in which the local banker is the tutor—but the granting of this privilege, in amounts limited only by the needs of the party who overdraws and for an indefinite length of time without exacting security therefor, cannot be too strongly condemned, is foreign to every principle of conservative banking, and is practically a misapplication of the bank's funds. As a rule the safe patron of a bank will not ask for such accommodation; no other class of patrons should be allowed them. The number of the state institutions which habitually allow excessive overdrafts is comparatively small, and the above comparison is made for the purpose of forcibly calling the attention of this class of bankers to the matter and urging upon

them the necessity of materially reducing this line of undesirable, if not intangible, assets.

## CLOSED BANKS.

Since the date of my last report, two private banks, namely, The Exchange Bank of Alma and the Bank of Dorchester, and one incorporated bank, The Dane County Bank of Stoughton, have failed.

The immediate cause of the failure of the Exchange Bank of Alma was the destruction by fire of property, upon which the funds of the bank had been loaned. The primary cause, however, was bad investments in the way of loans on western and northern lands and village lots in boom towns previous to the panic of 1893, and in mining ventures, in all of which the proprietors of the bank suffered heavy losses.

The proprietors of the Bank of Dorchester were engaged in other business pursuits in addition to that of banking and incurred liabilities in excess of their ability to pay; attachment suits ensued and this being a private institution the attachments not only covered other lines of business in which the proprietors were engaged but the assets of the bank as well, and while the assets of the bank, as shown by the examinations made, were nearly, if not quite, sufficient to meet its liabilities, they could not legally be held for that purpose but were by law required to be divided pro rata among all persons who were creditors of the firm, whether such person was a creditor of the bank or any other branch of the firm's business.

In former reports I have recommended the enactment of laws authorizing the incorporation of banks with a less capital than \$25,000.00 in the smaller towns of the state. Should this be done a majority of the private banks would incorporate, thereby making it possible to arrive more nearly at their real condition. The main difficulty in supervising the private bank is, that

while the assets and liabilities as shown by its books may show the bank proper to be in a safe condition, the individual or firm or the individual members of the firm which operates it may be indebted to outside parties to such an extent as to cause the person or firm to be insolvent, and any examination which could reasonably be made would fail to disclose such insolvency.

While good lawyers are in doubt as to the validity of a law which would seek to make of the depositor in a private bank a preferred creditor, and also doubt the power of the state to prohibit a private banker from engaging in any other business, there are good and sufficient reasons, aside from the fact that it would greatly improve the system of state supervision, why the legislature should give this subject serious consideration.

The Dane County Bank of Stoughton closed its doors June 10th last. In the month of December previous, an examination of this bank was made which showed that large sums were being loaned by the bank to its officers and to those with whom they were financially interested without adequate security. Written instructions were given the officers and directors to at once call a meeting and insist that all large loans be reduced in amount or properly secured. On March 26th the bank was again visited and the examination disclosed the fact that these loans not only remained unsecured and unpaid, but, contrary to instructions given, had been largely increased. A few days thereafter the Board of Directors was called to the Bank Examiner's office, and after going over the affairs of the bank in detail a resolution was drafted authorizing the President of the bank to take active charge of its affairs with instructions to the Board to hold a meeting upon their return to their banking house, adopt the same, and proceed to at once collect or secure the large loans to which reference has been made.

This resolution was adopted April 1st, after which time the President was in charge of the bank until it closed. Upon the same day, April 1st, legal written notice was given calling upon

the officers and directors to place the bank in a safe condition under penalty of causing publication of its condition to be made in the local papers as by law required.

At the expiration of the thirty days a consultation was held with the President, who stated that advices received indicated that prospects were favorable for the payment of a major portion of the large loans, and an extension of time was granted.

Frequent correspondence gave hopes that the statements of the President might prove correct. On June 10th, however, he received advices to the effect that no funds could be expected, and wisely concluded to close the bank.

The responsibility for the failure of this bank rests with its officials, and chiefly with its cashier, as that official was implicitly trusted in the management of its affairs. As is too frequently the case with bank officials he went to the extreme of recklessness in using the funds of the bank to bolster up speculative ventures in which he was largely interested. It can hardly be presumed that these methods would have been practiced had he not become personally involved in these transactions. The other officers and directors of the bank failed to give the required attention to its management for they had ample warning of the reckless methods which were being practiced.

---

On August 16th last, it became my duty to make official publication that the condition of the Stoughton State Bank was such that the interests of the depositors therein were seriously jeopardized because of its unbusiness-like methods and the serious impairment of its capital.

The events which led up to this unpleasant duty may be briefly stated as follows: On December 1st, 1898, an examination of this institution which was made by myself showed it to be in an unsatisfactory condition because of excessive overdrafts and ab-

normally large lists of paper which was long past due. Instructions were given to reduce this class of undesirable assets by demanding notes for overdrafts and renewals with ample security for past due paper. To more correctly ascertain whether such instructions had been complied with, I caused another examination to be made on the 30th day of March following. This examination disclosed the fact that no effort had been made to comply with the instructions given. After further correspondence with its cashier and failing to receive favorable response, on the 25th of April, I gave the legal notice of thirty days, as by law required, for it to make good the impairment of its capital. Repeated extensions of time were granted, and in the meantime a complete inventory of all assets of every kind and nature, as certified to in writing by its cashier, was made. A meeting of the stockholders was called, at which time they were made conversant with the bank's real condition and urged to place the bank in a safe condition. A final request was made that instructions given be complied with on August 16th, nearly four months after the first notice was given, which request was refused, after which the public was notified of the bank's real condition as required by law.

With the aid of the cash reserve which was at that time carried by the bank, and other available assets, it was able to meet the demands of its depositors.

This action was not taken until a thorough, exhaustive and painstaking investigation of the affairs of the bank had been made, and after having obtained accurate knowledge of the value of the bank's assets and of the financial standing of its stockholders.

That no undue haste was exercised and that extreme leniency was shown is evidenced by the fact that nearly four months elapsed between the time the first legal notice was given and the publication through the press.

That no injustice was done to the bank, either before or at the time of making the publication of its condition, the records of the office will furnish ample proof. That its condition fully warranted the action taken there is not a shadow of doubt.

#### CONCLUSION.

I have not felt called upon to pay but little heed to criticisms which have been made in relation to the conduct of this office, knowing, as I do, that such criticism has been, in the main, the result of misunderstanding of the powers conferred by law. It may not be irrelevant, however, in this connection, to refer in a general way to the duties of the Bank Examiner and the powers conferred upon him, in the supervision of banks, and the work which he is required to perform.

Until the office of Bank Examiner was created there was no provision of law for any supervision of state and private banks. There was and is no provision of law requiring any uniformity in the keeping of the books of account, limiting the amount which should be loaned to any individual or firm, limiting the time at which past due paper should be charged off, or requiring that a specific proportionate sum should be carried as cash reserve, etc. Each bank had been a law unto itself in these matters, and had conducted its business and kept its accounts as it chose.

When the office of Bank Examiner was created in 1895, it found 240 banks (the number of which has increased to 260), to which have been added 52 building and loan associations, and another unnumbered class of investment associations, making a total of over 325 institutions which the law requires him to supervise.

Until recently, the examining force (which now consists of three persons including the Bank Examiner) of the office has been the Bank Examiner and his deputy, which made it neces-

sary for each to examine or supervise over 150 institutions at stated intervals, and in addition perform the numerous duties required at the home office.

When we compare the labor exacted of this small examining force with that of the State of Michigan which has but 182 banks to supervise under a wholesome banking law, with an examining force of a Commissioner, deputy, and three examiners (about sixty banks to each examiner), and with the examining force of the national government which employs one examiner for each seventy or seventy-five banks, the labor involved is strikingly manifest. It is obvious that this cannot be done with the present force and the work of the home office receive that attention which it should receive, if more than a limited time is spent in the examination of each institution.

Notwithstanding the absence of the legal requirements above stated, a very large majority of the banks of the state have not been and are not now open to unfavorable criticism.

The difficulties encountered in my efforts to bring about a greater uniformity in book-keeping and accounting, and, in individual instances, the adoption of more conservative and business-like methods can only by experience be appreciated.

The difficulty and delicacy of the Bank Examiner's office is obvious. It is not more his duty to protect the people against a fraudulent bank or a bank whose officials are reckless in its management than to see that no undue suspicions are cast upon a bank which is being fairly conducted although not in all respects in conformity with approved banking methods. There have been times when hasty or indiscreet action on his part would have carried down numbers of perfectly solvent institutions and thereby wrought disaster. OF THE

State and Private Banks

OF WISCONSIN.

---

Submitted to the Governor December 24, 1900.

MADISON  
DEMOCRAT PRINTING COMPANY, STATE PRINTER  
1901

# REPORT OF THE BANK EXAMINER.

BANK EXAMINER'S OFFICE,  
MADISON, WIS., December 24, 1900.

HON. EDWARD SCOFIELD,  
*Governor of Wisconsin.*

SIR:—In compliance with the provisions of section 2023r, Wisconsin Statutes of 1898, I submit herewith the sixth annual report of this department showing the condition of the state, private and savings banks of Wisconsin at the close of business, December 13th, 1900, as compiled from reports received from these institutions as of that date.

Since the date of the last report of the Bank Examiner there have been the following changes in the state and private banks:

CHANGES IN STATE AND PRIVATE BANKS SINCE THE DATE OF  
LAST REPORT, DECEMBER 12, 1899.

*Changed from State to Private Banks.*

		Capital.
Montford State Bank.....	Montfort.....	\$30,000 00

*Changed from Private to State Bank*

The Belmont Bank.....	Belmont.....	\$30,000 00
State Bank of Durand.....	Durand.....	25,000 00
State Bank of Elroy.....	Elroy.....	25,000 00
Iron River Bank.....	Iron River.....	25,000 00
Citizens State Bank.....	Stanley.....	25,000 00
Vernon County Bank.....	Viroqua.....	50,000 00

*Changed to National Banks.*

		Capital.
German American Bank.....	Marshfield.....	\$25,700 00
Wisconsin Marine & Fire Ins. Co., Bank.....	Milwaukee.....	500,000 00
Bank of Omro.....	Omro.....	25,000 00
Commercial Bank.....	Oshkosh.....	100,000 00
Shawano County Bank.....	Shawano.....	30,000 00
The Cuba City Bank.....	Cuba City.....	20,000 00

*New State Banks.*

The Bank of Athens.....	Athens.....	\$25,000 00
Brooklyn State Bank.....	Brooklyn.....	25,000 00
Colby State Bank.....	Colby.....	25,000 00
German American Bank.....	Manitowoc.....	100,000 00
Buffalo County Bank.....	Mondovi.....	25,000 00
Montello State Bank.....	Montello.....	30,000 00
Rio State Bank.....	Rio.....	25,000 00
Bank of Turtle Lake.....	Turtle Lake.....	25,000 00
Wautoma State Bank.....	Wautoma.....	25,000 00

*New Private Banks.*

New Bank of Alma.....	Alma.....	\$1,000 00
Polk County Bank.....	Balsam Lake.....	5,000 00
Cobb Bank.....	Cobb.....	7,113 59
Farmers & Merchants Bank.....	Chetek.....	3,000 00
Glidden Exchange Bank.....	Glidden.....	2,000 00
Bank of Hillsboro.....	Hillsboro.....	5,000 00
Farmers Bank.....	Iola.....	10,000 00
Marathon City Bank.....	Marathon.....	10,000 00
Bank of Osseo.....	Osseo.....	None.
C. E. Macomber & Co.'s Bank.....	Prentice.....	None.
Readstown Bank.....	Readstown.....	5,500 00
Citizens Bank.....	Rice Lake.....	3,000 00
Westfield Bank.....	Westfield.....	5,000 00
The German Bank.....	Clintonville.....	10,000 00

Banks which have liquidated, paid depositors and ceased doing business:

Department State Bank.....	Stoughton.....	\$25,000 00
Cassville Bank.....	Cassville.....	6,639 63

*Closed Bank.*

Bank of Brillion.....	Brillion.....	\$4,500 00
-----------------------	---------------	------------

Comparing the number and condition of banks reporting on December 2d, 1899, the following increase is shown:

NUMBER OF BANKS.

	Dec. 2, 1899.	Dec. 13, 1900.	Increase.
State Banks.....	135	143	8
Private Banks.....	124	130	6
Savings Bank.....	1	1	.....
Total.....	260	274	14

During the year there have been three reports called for from the state, private and savings banks, the aggregate of the several items of resources and liabilities reported on the several dates named being as shown in the following table:

RESOURCES.	Apr. 26, 1900.	Sept. 5, 1900.	Dec. 13, 1900.
Loans and discounts.....	\$42,800,465 60	\$41,969,876 28	\$43,005,570 30
Unpaid capital.....	591,270 00	640,650 00	76,050 00
Overdrafts.....	704,039 23	585,549 64	776,829 40
Banking house.....	1,104,193 63	1,045,400 42	1,119,798 42
Other real estate.....	1,333,429 85	837,791 47	827,312 06
Furniture and fixtures.....	293,755 00	294,586 07	313,011 06
Bonds, stocks, etc.....	5,324,071 10	4,743,117 28	5,042,373 99
Cash items.....	175,248 23	182,802 74	165,415 97
Checks on other banks.....	481,564 83	332,312 84	383,560 80
Due from banks and bankers.....	12,519,831 32	12,298,351 43	11,738,509 37
U S and Nat. currency.....	2,320,409 12	1,858,637 67	2,222,305 45
Specie (gold.....)	1,906,050 03	1,807,358 40	1,463,030 50
(silver.....)			26,731 68
Nickels and cents.....	30,172 04	22,818 56	24,304 33
Revenue stamps account.....	33,919 55	38,010 89	27,282 54
Other resources.....	41,331 59	42,486 68	79,200 03
Total.....	\$69,664,753 16	\$66,739,756 37	\$68,323,185 80
LIABILITIES.			
Capital.....	\$8,012,275 00	\$7,493,114 00	\$7,698,738 59
Surplus.....	1,618,103 76	1,506,961 42	1,503,515 15
Undivided profits.....	1,071,941 81	962,667 01	1,342,151 83
Deposits subject to check.....	21,369,654 56	19,749,392 87	19,276,724 25
Certificates of deposit.....	25,807,752 30	25,240,608 10	25,525,355 96
Savings deposits.....	9,806,999 87	9,953,815 25	10,696,957 23
Due to banks and bankers.....	1,717,562 76	1,439,03 14	1,290,939 74
Dividends unpaid.....	1,213 50	2,881 00	2,484 50
Certified checks.....	7,470 86	38,19 31	41,631 30
Cashier's checks.....	88,050 65	64,181 62	78,996 77
Bills re discounted.....	54,637 64	58,681 12	127,590 00
Bills payable.....	87,121 51	213,611 78	306,373 37
Other liabilities.....	22,568 94	15,842 75	21,707 12
Total.....	\$69,664,753 16	\$66,739,756 37	\$68,323,185 80

A comparison of the returns of December 2d, 1899, with those of December 13th, 1900, shows an increase in the several items as appears in the subjoined table, except in the item of cash, to-wit:

Increase in:	State banks.	Private banks.	Savings banks.	Total.
Resources .....	\$1,107,621 22	\$1,359,285 96	\$93,589 57	\$2,560,496 75
Loans and discounts .....	1,950,604 25	1,289,092 70	31,771 47	3,254,468 42
Capital, surplus and profits .....	57,045 15	10,291 50	5,536 50	72,873 15
Deposits .....	1,344,179 95	1,417,020 07	90,391 17	2,851,629 19
Available cash.....	*337,476 68	134,350 51	*17,277 58	*20,403 65

\* Decrease.

In view of the fact that five state banks and one private bank (some of which were among the largest state institutions) have been reorganized as national banks, the increase in the items shown in the above table is remarkable.

The comparative table given below shows the increase in the volume of business at each of the dates named therein since the organization of the department:

	Nov. 15, 1893.	Nov. 21, 1896.	Nov. 6, 1897.
State banks.....	125	130	130
Private banks.....	107	109	110
Savings bank.....	1	1	1
Total.....	233	240	241

## RESOURCES.

Loans and discounts .....	\$28,062,796 67	\$25,905,481 71	\$27,141,804 77
Unpaid capital .....	675,014 67	671,017 39	678,500 00
Overdrafts.....	443,284 46	396,335 52	511,456 57
Banking house, furniture, and fixtures.....	1,355,016 33	1,385,502 34	1,324,510 32

Total.....	\$55,023,310 48	\$65,827,269 86	\$68,323,185 80

At the time of calling for the last report for the current year (December 13th, 1900), the several national banks of the state, (84) eighty-four in number, were asked to favor this department with a copy of the report made by them to the comptroller of the currency at Washington of the same date. Through the courtesy of these national institutions, I am enabled to submit herewith statement showing the aggregate resources and liabilities of all the banking institutions of the state, both state and national, which as compiled are shown to be as follows:

RESOURCES.		LIABILITIES.	
Loans and discounts.....	\$97,093,770 50	Capital stock.....	\$17,896,288 59
Unpaid capital.....	762,050 00	Surplus fund.....	3,977,814 41
Overdrafts.....	1,319,467 62	Undivided profits.....	2,963,217 66
Banking house, furniture and fixtures.....	2,399,869 80	Due depositors.....	121,024,311 13
Other real estate.....	1,123,943 17	Circulation.....	3,986,864 80
Bonds, stocks, etc.....	16,527,029 88	Due banks and bankers.....	8,734,201 80
Cash items and checks.....	1,275,891 18	Dividends unpaid.....	5,395 50
Due from banks.....	27,190,539 64	Certified and cashier's checks.....	214,926 42
U. S. and national currency	4,945,161 85	Bills re discounted and bills payable.....	433,963 37
Specie.....	6,393,413 02	Other liabilities.....	23,055 44
Nickels and cents.....	56,109 88		
Revenue stamps.....	62,362 35		
Other resources.....	108,515 23		
<b>Total.....</b>	<b>\$159,260,131 12</b>	<b>Total.....</b>	<b>\$159,260,131 12</b>

The above table shows the aggregate resources and liabilities of all the banking institutions of the state upon the date named to be \$159,260,131.12. Compared with the returns of the same month in 1899, there is shown an increase of \$10,917,354.26. There is also shown an increase in deposits of \$7,109,999.17 and an increase in loans and discounts of \$7,814,436.59.

The cash reserve held by the state institutions is approximately 28 4-100 per cent., and that of the national banks 30 65-100 per cent. of their deposits, and the percentage of cash reserve of all of the banking institutions of the state, including state, private, savings and national banks, is 29 34-100 per cent. of their deposits.

CLOSED BANK.

During the past year there has been but one bank failure, viz.: The Bank of Brillion, a private institution which closed its doors on December 11th. The immediate cause of the failure of this bank was a rumor which gained circulation to the effect that it was in an insolvent condition causing depositors in large numbers to withdraw their funds which exhausted the cash resources of the institution. From the best information obtainable, it is thought that the scheduled assets of this bank will very nearly pay its depositors in full.

This bank was last examined on October 4th, 1900, at which time the items of assets and liabilities which were carried upon its books were \$29,577.72 and the assets were, with reasonable certainty, determined to be sufficient to meet its liabilities.

Under existing laws, however, it is extremely difficult for an examiner in the time which can be given to any one private institution to form a correct estimate of its real condition.

Referring to the matter of the supervision of private banks, I quote from the annual report of the Bank Examiner for the year 1899, as follows:

“The main difficulty in supervising the private banks is that while the assets and liabilities as shown by its books may show the bank proper to be in a safe condition, the individual or firm or the individual members of the firm which operates it may be indebted to outside parties to such an extent as to cause the person or firm to be insolvent, and any examination which could reasonably be made would fail to disclose such insolvency.”

In the case of The Bank of Brillion, it is shown that the schedule of assets and liabilities which was filed at the time the proprietor filed his petition in bankruptcy, contains both assets and liabilities which were not carried upon the books of this bank.

I quote further from the annual report above named, in reference to the matter of private banking as follows:

“While good lawyers are in doubt as to the validity of a law which would seek to make of the depositor of a private bank a preferred creditor, and also doubt the power of the state to prohibit a private banker from engaging in any other business, there are good and sufficient reasons, aside from the fact that it would greatly improve the system of state supervision, why the legislature should give this subject serious consideration.”

In former reports the Bank Examiner has repeatedly called attention to the inefficiency of existing banking laws. Experience has emphasized the necessity for their revision. The law for the supervision of banks at present in force does not empower the Bank Examiner to close a bank which may be found insolvent. Anything short of the power to take possession of an institution which is the custodian of the people's money, when found insolvent, is insufficient. A bank's ability to meet the demands of depositors in a time of local distrust does not of itself constitute solvency, and being able to allay distrust by a sufficiency of available assets naturally causes the average depositor to have confidence in an institution which may be absolutely insolvent.

The legislature at its session in 1899 passed a joint resolution for the submission of a constitutional amendment to a vote of the people, empowering the legislature by a two-thirds vote to amend or enact banking laws. It is, in the judgment of the Bank Examiner, of the utmost importance that said resolution be again passed by the incoming legislature as by the constitution required, and provision made for its submission to a vote of the people at the next general election.

A proper regard for the safety of the funds of depositors, the business interests of the state, and the stability of its banking institutions, demands the enactment of a sound, wholesome, con-

servative law for the organization and supervision of these institutions at the earliest practical moment.

I again call attention to the necessity for a larger examining force, as the present force is inadequate to give to the work of examinations the time and labor which its importance demands.

In closing, the Bank Examiner desires to express his appreciation of the faithful and valuable services rendered the state during the past year by Deputy Bank Examiner G. D. Bartz, Chief Clerk Thad. Wild, and Clerk and Stenographer W. A. Richter.

Very respectfully,

EDWARD I. KIDD,  
*Bank Examiner.*

BIENNIAL REPORT

OF THE

State Board of Arbitration  
and Conciliation

OF THE

STATE OF WISCONSIN.

MADISON  
DEMOCRAT PRINTING COMPANY, STATE PRINTER  
1901

# REPORT

OF THE

## STATE BOARD OF ARBITRATION AND CONCILIATION.

---

January 3rd, 1901.

To His Excellency, ROBERT M. LA FOLLETTE,  
*Governor of the State of Wisconsin.*

SIR:—The State Board of Arbitration and Conciliation herewith submit to you, in accordance with law, their biennial report.

The amendment to the law providing that notices requiring the services of the board be addressed to the governor, and by him communicated to the board, has been beneficial in securing their prompt attention in many cases where trouble was threatened or already existed.

In compliance with these amendments the board has been successful in many instances in bringing about a settlement of misunderstandings and differences, which if they had been permitted to continue, would have resulted in serious trouble. In such instances it is impossible to correctly or fully estimate the losses that might have occurred to employers by the enforced stoppage of their business, and to employes by the loss of wages caused by a strike.

As a result of experience in this work, the board earnestly desires to call the attention of employers of labor, and those who we believe are honestly seeking to better their condition by forming themselves into organizations known as labor unions, to the great importance of settling any differences which may occur, by means of arbitration, either by representatives

---

*General Report.*

---

selected and agreed to by both parties, or by submitting all questions in dispute to the State Board of Arbitration, thus avoiding the disastrous effects of a strike, and of using every endeavor to promote a feeling of harmony and friendship between employer and employed.

Since the date of our last report, the board has been successful in a great many instances in settling strikes by inducing employes to defer or modify their demands for increase of wages or changes in conditions governing their employment. In several disagreements the services of the board has been requested by one or both parties to the controversy, or, as provided by law, by some civil official resident in that locality. However, this has not been done in as many instances as the board could have desired. By far the great majority of cases in which the board has interested themselves have been taken up through information received from the daily press. In such cases the board has promptly proceeded to the place where the trouble existed and tendered their services to both parties in controversy. While in some cases its friendly offices have been accepted, it has been necessary in others, to bring about the desired result by persistent effort upon our part, to induce the persons most interested to meet and in a friendly manner attempt by mediation to adjust their differences. In many such cases, even though the board has not been called in by either party, after an explanation of the position of the board in these matters, one or both have been willing to submit the points in dispute for arbitration.

In view of the great increase in industrial affairs which has existed in our state for the past two years, the great demand for labor has caused a feeling of restlessness on the part of employes generally and a demand for an increase in wages, which has resulted in trouble in several of our large manufactories. The board has been very successful in securing an increase in the majority of cases.

The most serious strikes which have occurred in our state during the past two years were the employes of the Chas. H.

---

*General Report.*

---

Seige Manufacturing Company at Kenosha, which occurred in December, 1898; the J. I. Case Threshing Machine Company's employes, of March 11, 1899; the strike of the employes of five Marinette lumber companies, which occurred June 6th, 1899; the Rice Lake Lumber Company, the Freight Handlers of West Superior, and the Moulders of Milwaukee. Detailed reports of these strikes are embodied in this report.

The controversies of which the board has had cognizance during the two years included in this report involved more or less directly employes whose yearly earnings are estimated at \$3,000,000.00. The total amount of earnings under ordinary conditions of the corporations, factories, etc., involved, it is estimated, would amount to about \$10,000,000.00. The total expenses incurred by the State Board of Arbitration from September 30, 1898, to September 30, 1900, covering the two fiscal years, are \$1,746.98.

#### EXHIBIT NO. 1.

The attention of manufacturers, corporations, and other employers of labor, and of all employes and labor organizations throughout the state, is invited to the following provisions of law, for the settlement of differences between employers and their employes.

#### BOARD, HOW APPOINTED.

The State Board of Arbitration consists of three persons, appointed by the governor, as follows: One shall represent employers of labor; one shall be an employe, a member of some labor organization and not an employer of labor; the third member shall be appointed upon the recommendation of these two. The members of the board shall be sworn to the faithful discharge of their duties.

---

*General Report.*

---

## MEDIATION AND CONCILIATION.

The law provides for proceeding by *mediation* and *conciliation*, when neither party has seen fit to call upon the board in a formal way. Such cases are provided for as follows:

Whenever it is made to appear to a mayor of a city, the village board of a village, or the town board of a town, that a strike or lock-out, such as is described in section 9 of the act creating the board, is seriously threatened or actually occurs, the mayor of such city, or the village board of such village, or the town board of such town, shall at once notify the state board of such facts, together with such information as shall be available.

Whenever it shall come to the knowledge of the state board by notice as provided, or otherwise, that a strike or lock-out is seriously threatened, or has actually occurred, which threatens to do or does involve the business interests of any city, village or town of this state, it shall be the duty of the state board to investigate the same as soon as may be and endeavor by mediation to effect an amicable settlement between employer and employes, and to endeavor to persuade them, provided a strike or lock-out has not actually occurred or is not then continuing, to submit the matter in dispute to a local board of arbitration and conciliation, or to the state board.

Said state board may, if it deems advisable, investigate the cause or causes of such controversy, ascertain which party thereto is mainly responsible or blameworthy for the existence or continuance of the same, and may make and publish a report finding such cause or causes and assigning such responsibility or blame.

The method of mediation and conciliation has been successfully adopted in many cases, when neither party was willing to appear to show weakness by suggesting a settlement. The board acts in such cases as a mutual friend, desirous of bringing the parties together for a conference, and for the clearing away of misconception and misunderstanding.

---

*General Report.*

---

## ARBITRATION.

Whenever any controversy or difference, not involving questions which may be the subject of a suit at law or bill in equity, exists between an employer, whether an individual, co-partnership or corporation, and his employes, if at the time he employs not less than twenty-five persons in this state, the board shall, upon application as hereinafter provided, and as soon as practicable thereafter, visit the locality of the dispute and make careful inquiry into the cause thereof, hear all persons interested therein, who may come before them, advise the respective parties, what, if anything, ought to be done or submitted to by either or both to adjust said dispute, and make a written decision thereof.

The application must be signed by said employer, or by a majority of his employes in the department of the business in which the controversy or difference exists, or by both parties, and shall contain a concise statement of the grievances complained of, and a promise to continue in business or at work without any lock-out or strike until the decision of said board, if it shall be made within thirty days of the date of filing said application.

As soon as may be after the receipt of the application, the secretary of the board is required to cause public notice to be given of the time and place fixed for a hearing. But the public notice may be omitted whenever both parties so request in writing.

The board may summon persons in the department of business affected to act as experts.

The board has power to summon as witnesses any operative in the departments of business affected, and any person who keeps the records of wages earned in those departments, and to examine them under oath, and to require the production of books containing the record of wages paid.

In cases regularly submitted on written applications, according to law, it is the duty of the board to make a written de-

---

*General Report.*

---

cision thereof, such decision to be made public at once, and to be recorded in a book of record kept by the secretary of the board, and a copy to be filed with the clerk of the city or town where the business is carried on. The law does not, in terms, prescribe the time within which the decision of the board shall be rendered, but from the requirements concerning the form of the application, it may be inferred that the decision, under ordinary circumstances, should be rendered within thirty days from the date of the application. Unavoidable delays may be caused by press of public business, or for the convenience of the parties to the application, but the board will, in all cases, act with as much promptness as is consistent with a just disposition of the matters involved.

The law provides that the decision shall be binding for the term of six months upon the parties who join in the application, or until either party has notified the other, in writing, of his intention not to be bound by the same at the expiration of sixty days from the giving of the notice.

For printed forms of application or for other information, the board may be addressed at Madison, Wis.

## CHAS. H. SIEGE MANUFACTURING CO., KENOSHA.

Through the daily press, it was brought to the notice of the board that a strike of the Chas. H. Siege Manufacturing Co., makers of bicycles, had occurred at Kenosha. The cause of the strike was the discharge of two polishers on Dec. 13th whom the committee of the Union wanted reinstated. The committee waited on the company and made their demand, which was refused. They carried the result of the interview back to the Union, and they decided to go on a strike to enforce their demand. The board arranged a joint conference between the company and employes and the difficulty was satisfactorily settled.

Herewith is an agreement entered into Dec. 24th, 1898, by and between the Chas. H. Siege Manufacturing Co., of Kenosha, Wis., party of the first part, and the Local Union No. 45 of the Metal Polishers, Buffers, Platers and Brass Workers' Union of North America, of Kenosha, Wis., parties of the second part. Witnesseth, that whereas, members of the said party of the second part are employes of the said party of the first part, and whereas trouble over wages has arisen between them and said company, and whereas, such employes as members of said Union, are now and for several days have been out on a strike, and whereas, it is desired to settle and end said trouble and strike, and whereas, this agreement is entered into by said parties for that purpose; Now, therefore, in consideration of the premises and the mutual promises and agreements herein contained, said party of the first part covenants and agrees to pay as wages to the metal polishers employed by it in its factory at Kenosha, Wis., 22½ cts. per hour for day work, and 35 cts. per hour for piece work for journeymen, and to pay as wages to buffers, so employed by it, 22½ cts. per hour for day work for first class journeymen. That said parties of the first part further covenants and agrees to reinstate the two

---

*Strikes.*

---

polishers discharged Dec. 13th, 1898, and employ them in said factory and not to discriminate against them in the future for any cause or reason arising from the trouble that this agreement ends. That said party of the first part further covenants and agrees not to discriminate against the Union above named or any of its members and to recognize said Union and to employ in said factory the members of said Union when they can be procured in preference to others and to reinstate all the men that went out on the 14th of December, 1898, and to reinstate said men before hiring others. And the said party of the second part covenants and agrees to furnish for said parties of the first part for employment in said factory as many polishers and buffers, who shall be first class mechanics and steady men as the said party of the first part shall require. It is further covenanted and agreed by and between said parties, that this agreement and all covenants herein contained shall bind said parties and their successors and assigns for the period of one year from and after the date hereof.

In witness whereof said parties have caused these presents to be signed by their proper officers respectively and to be sealed by their respective seals for and in the name of said parties respectively.

## BADGER BRASS MFG. CO., KENOSHA.

The Board was called upon by the Badger Brass Mfg. Co. to adjust a grievance of the employes, their demand being an increase in wages. Minutes of the meeting held at the Badger Brass Mfg. Company's office, Kenosha, Wis., Dec. 24, 1898, the object being the adjustment of differences between the company and its employes.

There were present Messrs. Williams and Frost, representing the company, a committee from the local Union among whom were Mr. White, International Executive, and Mr. Harris, local executive of the Polishers and Brass Workers Union and the State Board of Arbitration and Conciliation.

Mr. Williams moved that Thos. Waddell act as chairman and R. H. Edwards, secretary. The motion prevailed.

Mr. White stated that the employes' grievances were, that in some instances the price paid for piece work was too low, to which Mr. Williams replied that they were the prices agreed upon recently by the company and representatives of the International Polishers and Brass Workers Union.

Mr. Redline, the company's foreman at this time, was called in and stated that he himself had worked on a job that the men complained of and found they could make from \$2.50 to \$3.00 per day. Mr. Harris representing the union, in reply to this, said that the men did not consider this a fair test and questioned Mr. Redline's ability to continue at this rate for ten consecutive hours. Mr. Redline, however, maintained that he could. Mr. Williams then presented figures of what the men had been earning, which ranged as follows: \$2.75, \$2.72, \$2.25, \$2.79, \$2.59, \$2.42, \$1.55, \$1.85, \$2.29, \$2.02, \$1.82, for each person, averaging \$2.28 per day. He also stated that it was possible the list might need adjustment, to which the company were agreeable. The men, Mr. Williams also claimed, violated agreement by leaving their work and that the company were now at liberty to employ such men as they desired and did not wish to take back all of the men who went on strike. A member of the committee made the statement that when the factory first started, he was employed and found after getting accustomed to the work that he could make good wages. For the first year, however, he could not do as well for the reason that the work was a little more difficult. Mr. Burns stated that he was satisfied and for the past year had earned from \$2.75 to \$3.00 per day.

*Strikes.*

Mr. White claimed that in view of the fact that the company were unwilling to take back all of the men who struck, that no tlement could be arrived at and suggested an adjournment of the meeting. Mr. Williams claimed that he could get plenty of men to do the work at the present prices.

After a few remarks by different ones, the meeting adjourned without settlement.

R. H. EDWARDS, Secretary.

## WEYENBURG BROS'. SHOE FACTORY, CHIPPEWA FALLS.

Through the daily press, the attention of the State Board of Arbitration and Conciliation was called to a strike in Weyenburg Bros'. shoe factory at Chippewa Falls. The Board called on the parties to the controversy on Jan. 6th and found there had been a misunderstanding of stock numbers and they had dropped the manufacture of certain kinds of shoes. The stock numbers became disarranged and the men did not understand it and walked out without asking an explanation of why stock numbers had been changed on certain kinds of work. When the committee called on Mr. Weyenburg and were shown there was not a cut in prices, they returned to work perfectly satisfied. He thanked us for coming to see them and helping them out of their difficulty.

---

## COOPERS' STRIKE, MILWAUKEE.

Through the daily press our attention was called to a strike of coopers in Milwaukee, of the following firms, consisting in all of ninety men: Julius Hansel, 729 11th Ave., Henry Koch, 813 Central Ave., Frank Reinhardt, Cudahy, Matthew Frietschek, 508 21st St., John Gemeirhardt, 936 4th St., and Frank Schueppert, 575 2d Ave. The Board called on the above gentlemen and found they had been paying 21 cts. for barrels and 23 cts. for tierces. About two weeks previous to the strike they had raised the prices to 23 and 25 cts. respectively. On Jan. 9th the president of the coppers' union, with a committee of men, called on the above gentlemen and demanded a raise to 28 and 30 cents respectively, which the firms said they could not pay at the present prices of barrels and tierces. The president of the union said "if their demand was not granted the men would go out of the shops when he did," which they did in every instance. The Board called on employers and found them perfectly willing to meet in joint conference with a committee of the employes. The board waited on the coopers' union at their hall and they positively refused to have anything to do with us, therefore we could not bring about a joint conference.

## GEORGE AND HEYER, UPHOLSTERING, MILWAUKEE.

It having come to the notice of the Board that a strike had occurred at the upholstering factory of George & Heyer in the city of Milwaukee, the resident member of the Board called upon the firm to ascertain the cause. Mr. Heyer made the following statement:

The men had quit work because he had put some apprentice boys to work. He said there was no question of wages. The question was asked, "Did the boys take the work from the journeymen?" His answer was, "No." No member of the Board called upon the men and had them state their grievance. There was a difference in the two statements; the men were willing to go with the Board and meet Mr. Heyer but Mr. Heyer would not agree to meet them but asked the board to let it rest a day or two. Called two days after but Mr. Heyer would not consent to have the Board called. Finally a compromise was agreed on by both employer and employes on Friday, March 17th, and the men returned to work on the following morning.

*Strikes.*

---

## THE J. I. CASE THRESHING MACHINE CO., RACINE.

Through the daily press the attention of the Board was called to a strike of the employes of the J. I. Case Threshing Machine Co. at Racine, March 11th. The Board arrived as soon as possible thereafter to try and effect a settlement. They waited upon the foreman and got his statement of the trouble. Mr. John Pebbles, foreman J. I. Case T. M. Co., at first claimed he did not know of any trouble but finally admitted there were some of the men not at work, but did not know what was the trouble as the men had made no demand of him, neither had the committee waited on him, but Mr. Wilson, master machinist, had called on him and said the men were to blame for going out without first making a demand on the company. Then Mr. Pebbles admitted that he understood the men objected to the employment of new men. There was but one man they objected to, for they said he was not a skilled workman. He started him to work on what is called "frames," the man running two lathes, as none of the old men cared to run them, and later they called on him and objected to one man running two lathes. He said it would go no further; they would put in no more new men and he hoped the old men would return to work with the exception of two or three whom he had been ordered to discharge previous to the trouble. He was very glad to have the members of the Board call on him and would give them any information he could. Mr. Linck, chairman of the committee representing the union, asked some questions as to the stand Mr. Pebbles had taken, which the Board answered. Mr. Bell stated that Jan. 12th a committee of shopmen tried to wait upon Mr. Pebbles and Mr. Sewell and they said they did not care to see the committee, and that Mr. Pebbles knew the men objected to one man running two lathes and that it was not offered to any of the old men but was given to the new man to run, and that he could make good wages, and was not a skilled workman, for one of the old men staid with him six hours the first night of his work to get him started and called every evening for some time to see how he was getting along. A committee of the men went with Mr. Wilson to see Mr. Pebbles but he would not see them. **At last** he took Mr. Wilson into the room alone, and after Mr. Wilson left, Mr. Pebbles passed through the room without speaking to them.

---

*Strikes.*

---

The Board arranged with the committee for a joint conference with Mr. Pebbles at 10 a. m., March 16th, at which there were three grievances presented. The first, the employment of unskilled labor. Second, objection to one man running two lathes. Third, in regard to taking all men back to work. The three questions were discussed pro and con. The question of the employment of new men, if the committee could furnish skilled labor the company would employ them in preference. That one point was conceded the men. In regard to one man running two lathes, it would not be introduced any further under the present management. Another point conceded the men. The question of taking back all of the men, they could all but three go to work; these Mr. Pebbles did not wish to name but the committee insisted, which was bad for the men in question. After the Board had failed to secure the reinstatement of these men through Mr. Pebbles they held an interview with Mr. Bull, President, Mr. Robinson, Vice President, Mr. Robinson, Secretary, and Mr. McIntosh, but failed to reach any conclusion. Therefore arranged a conference with Mr. Pebbles and the committee in the evening to discuss the matter of reinstating the men. At this meeting Mr. Pebbles told the Board emphatically that he could not put the three men to work, thereupon the meeting was adjourned to allow the Board to see the officers of the company and see if anything could be done toward reinstating the men.

On March 17th the Board called on the officials of the company, Mr. Robinson, Vice President, Mr. Robinson, Secretary, and Mr. McIntosh being present. The question of reinstating the three men was taken up and discussed thoroughly. They finally said they would not reinstate the three men in question; that was their ultimatum. The Board then held a conference with the committee that had the matter in charge and stated to them the result of their conference with the officials. The committee took a vote as to whether they should return to work without the three men and it was unanimous to stay out unless the three men were re-employed. The Board made another call upon the officials and exhausted every argument they could use to have them yield this point and even appealed to their sympathy, but nothing they could say would move them to reconsider their decision as they claimed the men had left their employ and they did not consider them in their employ. Therefore the

---

*Strikes.*

---

Board let the matter rest for a time. On April 5th the Board again called on the officers of the J. I. Case Co. to try and bring about a settlement of the strike but they still maintained the firm stand of not reinstating the three men. After discussing the matter, they called in their foreman, Mr. Pebbles, and we had a short interview with him in regard to the matter and he said he could under no consideration take the men back to work, but upon the urgent request of the Board, he decided to let them come back to work. We thereafter met a committee of the employes and they refused to accept the proposition and said they could not settle the matter because it was in the hands of the grand officers of the union. The strike was settled on the lines the Board proposed.

## BEEBE MANUFACTURING CO., RACINE.

On March 26th the attention of the Board was called to a strike of the Beebe Manufacturing Company employes at Racine, involving a question of wages. The Board met the proprietors and a committee of the strikers and Mr. Mulholland. After hearing both sides of the question discussed it was agreed that the men should return to work at the same wages they had been receiving.

This agreement made and entered into in duplicate this 28th day of March, 1899, by and between the International Union of Bicycle Workers, Local No. 30, and the Beebe Manufacturing Co. of Racine, Wis.

WITNESSETH: The following are hereby agreed upon and accepted for the filing of frames:

Flush diamond .....	18 cts. each.
Flush drop .....	28 cts. each.
Outside diamond .....	12 cts. each.
Outside drop .....	22 cts. each.

The following price is hereby accepted and agreed upon for grinding:

Per frame .....	5 cts. each.
-----------------	--------------

All work to be done according to sample submitted and all men to be allowed to return to work without discrimination.

---

*Strikes.*

---

It is further agreed that in consideration of the men returning to work without discrimination on the part of the Beebe Manufacturing Company that the future relations between union and non-union men employed in the company's plant shall be peaceable and conservative. This agreement to be in force until August 1st, 1899.

INTERNATIONAL UNION OF BICYCLE WORKERS.

By J. T. MULHOLLAND.

BEEBE MANUFACTURING Co.,

By C. G. BEEBE, Secretary.

In the presence of

THOS. WADDELL,

R. H. EDWARDS,

G. E. WILLOTT.

*State Board of Arbitration.* )

In the face of the agreement made Mar. 28th, the employes of the Beebe Bicycle Manufacturing Co.,—two weeks after signing said agreement,—went out on a second strike. April 24th, the Board called on Mr. Beebe to find out who first violated this agreement. Mr. Beebe claimed the men violated the contract by the filers quitting work the first day after the agreement was signed and that the union polishers refused to accept work that non-union men had filled. These non-union men were employed at the shop at the time of signing the contract and that some of the union men hissed at the non-union men, and the president of the union at this time wrote on a card "scab" and told one of the boys to pin it on the non-union filer and he did so. As the filer went out of the shop with the card on his back the union men all jeered at him. The man did not know till then that the card was on his back. Mr. Beebe called the boy into the office and asked him why he did this thing. He admitted that the president of the union told him to. Mr. Beebe then called the president of the union into the office and asked him why he did this, and as he did not give any satisfactory answer, he discharged him.

The Board called upon a committee of the strikers at their hall to get a statement from them. They admitted the card was written by the president of the union but did not approve of his conduct, and a union man was discharged for calling a non-union man names, and when Mr. Beebe laid off men they were union men instead of non-union men, thus discriminating.

---

*Strikes.*

---

against union men and that he only requested union men to sign the personal contract. The filers could not make day wages at 12 cts. a piece and he raised the price without being asked, but the filers were the first to quit work, and he took two men from the lathes and put them on filing and hired two non-union men to take the place of two union men he had discharged; that Mr. Beebe claimed the contract was void after the men went to work and that the second clause did not apply at all. In the afternoon they called a joint meeting of the filers, bicycle workers and wood workers and after the meeting was opened, the Board was invited to attend and discuss such questions as might come before the meeting and try and get at the facts of the case. The chairman of the meeting called upon different members of the union to make statements in regard to the cause of the trouble. They admitted that the filers, or one of them, quit work at two o'clock the first day after signing the contract, as he could not make day wages at the price stated in the contract, 12 cts. a piece for grinding frames. Some said that the personal contract was presented them to sign but they refused, and after they refused Mr. Beebe laid them off. The Board requested them to appoint a committee to wait on Mr. Beebe with them. They were arranging such a committee when Mr. Willott of the Board telephoned Mr. Beebe to know if he would meet with them but he refused. Mr. Waddell of the Board was called upon to make some remarks and he told them that in the face of the contract they had no right to quit work without first calling in the president of the union, Mr. Mulholland, as he had signed this contract for them to return to work at the prices fixed by him and that it was not good unionism for members to quit work without first giving it a fair test as to whether they could make day wages or not.

Mr. Beebe afterward stated that he laid off other men and told them that if business should pick up he would put them to work again. The first he knew of any trouble a strike was announced the next day in the press, in the face of the agreement made March 28th. Mr. Beebe requested some of the men to sign a personal agreement that they would not go on a strike for six months. Some of the men he asked refused. The foreman then overstepped his authority by insisting that the men sign this personal contract, saying he would keep back three days' wages to insure him that the men were signing in good faith.

---

*Strikes.*

---

The Board requested Mr. Beebe to meet a committee of the strikers with them and he refused. Having held a conference with the three unions at their hall, the Board returned to see Mr. Beebe. He contradicted some of the statements of the unions but the Board are of the opinion that the employes violated the contract first by leaving their work without first notifying Mr. Mulholland and very soon after by Mr. Beebe by presenting to the men the personal contract to be signed by them, thus discriminating between union and non-union men, which he had no right to do as per contract.

## COAL HEAVERS, MILWAUKEE.

On May 6th, the attention of the Board was called to a strike of coal heavers in Milwaukee. The secretary of the Board interviewed the following coal dealers in regard to the strike: The Northwestern Coal Co., H. M. Benjamin, Uhrig & Co., and Cox Bros. They all said they were having no difficulty in getting all the men they could work. The trouble was one of wages. Last season they paid 5 and 7 cts. per ton and this spring they concluded they would give the men an advance to 6 and 8 cents per ton without any demand from the men. Then, on top of this, the men made a demand of 7 and 9 cents per ton, which would make an increase in wages of 40 per cent., which the dealers refused to pay, and they wanted them to recognize the union. This the dealers were willing to do this far,—to employ men and not ask whether they belonged to the union or not. The new men employed to take the place of strikers were averaging 42 cents per hour for unloading soft coal and 50 cents per hour for chestnut coal, and when they did not have boats to unload they kept the men in their employ at \$1.50 per day in the yard. Having seen the dealers separately, they all made the same statement. The board tried to find the headquarters of the union, but were unsuccessful.

## IRON-WORKERS, MILWAUKEE.

Through the daily press of May 25th, the attention of the board was called to a strike of iron-workers on the electric power house being erected in Milwaukee. Members of the board called upon the contractor and found that they had refused to work with the masons then employed on the building.

---

*Strikes.*

---

because they did not belong to the Federated Trades Council but they did belong to a union. The contractor said there were two factions and that the masons belonged to the smaller faction. Mr. Reises, the contractor, said they were trying to get a conference with the men, but did not succeed, but he thought the strike would be settled satisfactorily. They finally had to discharge the masons before the iron-workers would return to work. The masons had the privilege of joining the Federated Trades Council and returning to work on the building.

## SHINGLE SAWYERS, MARINETTE.

On June 6th, the attention of the board was called to a strike of shingle sawyers at Marinette, Wis., which the board proceeded to investigate. They found the strike was caused by a demand of an increase in wages. The schedule of wages and demands was as follows:

	Wages.	Demand.
Double block sawyers .....	\$2.75	\$3.00
Single block sawyers or double block requiring not more than four knot sawyers ...	2.35	2.50
Knee bolters .....	1.75	2.00
Knot sawyers .....	1.75	2.00
Packers—shingles turned on bench .....	.07	.08

Mr. Willott of the board held an interview with Mr. Murphy, president of the Wood-Weavers and Sawyers Union. Mr. Murphy, after stating his demands as above, said he wanted the union recognized and all the men reinstated, but if a union man did not fill the bill, the company need not keep him; if they could hire experienced sawyers they were at liberty to do so and the men would take care of the rest. He was willing to meet the company in joint conference. Mr. Willott then met the following gentlemen representing the different companies and laid before them the demands of the union: Mr. A. C. Merreman, Mr. R. A. Merreman, Mr. Quinlan, Mr. O'Connor, Mr. Donovan, Mr. Daley, Mr. Smith and Mr. F. A. Brown. After discussing the matter pro and con, they refused to take some of the men back and they would not recognize the union; but before the conference ended they consented that the men might return to work in a body. One point gained by the

---

*Strikes.*

---

union. They then consented that the union men might all return to work and they would not ask any questions. Second point gained by the union. When the question of wages was brought up, they said the men must return to work at the old prices, but finally offered a compromise by meeting the men more than half-way. They then offered to leave the matter of settlement entirely to Mr. Willott. It was suggested that they appoint Mr. Brown to co-operate with him, to which they agreed, the result being a complete and satisfactory settlement. They tendered the board a vote of thanks for being so fair between capital and labor.

## COOPERS, MILWAUKEE.

Through the daily press of July 12th, 1899, the attention of the board was called to a strike of coopers of the Pabst Brewing Company in Milwaukee. The board called upon Mr. Pabst to learn the cause of the strike and he informed them that they were 15,000 kegs short, and that he had bought all the union-made kegs in Milwaukee and Minneapolis and still had not enough to fill the demand. He went to the Coopers Union and asked them to increase their force to fill his order. He waited two weeks and, as their force was not increased, he went again and requested that they increase the force and work overtime, as he was willing to pay good price for all overtime work, but must have the kegs. After waiting another week, the coopers not increasing their force, he started his machinery to manufacture kegs, and the coopers went out on a strike. He requested the board to wait a few days, as he thought everything would be adjusted satisfactorily.

## RICE LAKE LUMBER CO., RICE LAKE, WIS.

On August 12th, the attention of the board was called to a strike of the employes of the Rice Lake Lumber Co. They were working eleven hours per day and struck for ten hours. The board were on the ground as soon as possible after seeing the notice and held a conference with both parties. The board found that the company had established a custom of paying the men by the month and they would have to sign a contract and the company would pay them \$30.00 and \$4.00. The \$4.00

---

*Strikes.*

---

they held until the last of the season, and if a man quit before the mill was closed, he forfeited the \$4.00 per month. The men objected to this and wanted it done away with, and made the following proposition to the company:

This agreement made and entered into this — day of August, 1899, by and between the Rice Lake Lumber Co. of the one part, and their employes in and about their mills and yards in the city of Rice Lake, Wis., of the other part, Witnesseth, that,

Whereas, said employes did on the 9th day of August, 1899, strike for a ten-hour day of labor and are now out, the said Rice Lake Lumber Co. in consideration of said employes returning to work, hereby agree with them as follows:

1st.—That a day of labor in and about said mills and yards shall consist of ten hours and shall never be increased.

2nd.—All employes to be taken back to work as prior to strike, at same wages, which shall not be reduced during this milling season, but men who have or may, during the present strike, commit acts of violence or threaten destruction of the company's property, may be discharged.

3rd.—No man shall be, at any time hereafter, discharged by reason of joining or participating in the present strike.

4th.—Scale of wages under which men were working prior to present strike is hereby declared to be in force, and no four dollars per month discount allowed, but full pay monthly.

5th.—Wages shall never be reduced on account of the ten-hour day.

The company refused to grant the above, but came back with a proposition to the men which is as follows, but they refused to accept it:

MR. HENRY PERKINS, CHAIRMAN, AND GENTLEMEN OF  
THE COMMITTEE,  
*Rice Lake, Wis.*

GENTLEMEN:—After careful deliberation of the questions at issue between the employes of the Rice Lake Lumber Company and the Company, we are disposed to make you the following propositions. We fully appreciate the reasons which led to the request which has been made to the company and fully realize the part of the company to make any other terms with the considered good and sufficient reasons. We realize, too, that business conditions have improved since the date of our contracts

---

*Strikes.*

---

made in the spring, and while there is no legal obligation on the part of the company to make any other terms with the employes than those already provided for in the contract, we feel that there is a moral obligation on our part to permit the employes to share in the improved business conditions. We feel, however, that the question of the shorter day will materially affect the interests of the company, as has been explained to your committee, and reasons that we think the employes will all concede when matters are fully explained to them, and wish, therefore, to make you the following proposition: Dating from August 1st, wages to be advanced three dollars per month for the balance of the sawing season. While the company feel that they cannot make the ten-hour concession asked without working damage to themselves, they are willing to pay for the additional hour. We would also agree to discharge no man for the part which he has taken in the so-called strike, provided the men return to work not later than Monday next.

While the original request of the employes has not been granted, we feel that our proposition to them will more than repay them for the non-compliance with their request.

We also wish to thank the committee, as well as the entire force of employes, for the very gentlemanly manner in which the matter has been handled, and are very much in hopes that an early and satisfactory settlement will be reached.

Yours truly,

RICE LAKE LUMBER CO.

By W. H. BUNDY, Sec.

The board held a conference with Mr. Bundy, Secretary of the company and he would not make any further concessions, therefore we could reach no agreement; but he requested the board to remain in Rice Lake over Sunday. Thinking we could reach a settlement, we consented, but on Monday, August 14th, found the company more determined than ever not to make any further concessions and the men were just as determined to hold out for their request; therefore the board could do nothing further and withdrew.

On Wednesday, August 16th, received a telegram from H. L. Perkins, chairman of the committee, asking the board to come to Rice Lake at once. We left for the seat of trouble that night and arrived at Rice Lake Thursday morning, held a con-

---

*Strikes.*

---

ference with the men, and they left it for the board to make as good a settlement for them as possible, which we did as follows:

TO THE HONORABLE STATE BOARD OF ARBITRATION,  
*Rice Lake, Wis.*

GENTLEMEN:—Agreeable to our verbal understanding and with a view to terminating the differences now existing between our employes and the company, we are disposed to make the following proposition: In case the strike is called off, and all interference with men wanting work is stopped, we will allow our old employes who have not made a settlement to resume work on their old contract with an addition in wages of three dollars per month from the first of August provided they report for duty at our office before six o'clock tonight, as it is distinctly understood that this proposition is to expire at that time. In view of the fact that we have shut down our water mill, it is probable that we will not have work for all of the old employes, but in case we have more men report for duty than we have places to fill we will allow such men to go as we cannot put to work and we will settle with them at their full rate of wages.

All of the above is to apply to only such men as report at our office for duty before six o'clock tonight and to go to work at six o'clock tomorrow morning. We must have a full crew, and the balance we will pay in full.

(Signed) RICE LAKE LUMBER Co.

W. H. BUNDY, Sec.

The board presented the agreement they had reached with the company to the employes who were in session at their hall, and they accepted it and returned to work the next morning.

MOULDERS, MILWAUKEE.

On September 25th, the board was notified that a strike of moulders had occurred at Filer & Stowell's Foundry, and the board at once proceeded to investigate the cause. Called upon the company, and Mr. Read, Secretary, informed them that it was not a question of wages, for they were willing to grant that, as they had only asked to have a minimum of wages, \$2.75 for floor moulders and \$2.50 for bench moulders, but there was a

---

*Strikes.*

---

clause in the agreement that the union wanted them to sign that they objected to which was in regard to having a shop committee. Therefore the strike occurred. The board then held a conference with the members of the union and their business agent, Mr. Turner, at their hall, and their statement was the same as that of Mr. Read. The board then asked them if they could not offer a compromise, but they said it must be the original agreement or nothing.

The board then returned to see Mr. Read and asked if he could offer something as a compromise, and he said he could do nothing until he heard from the National Foundrymen's Association of which they were members.

Called upon the firm on Wednesday, September 27th, and found the situation the same, as they had heard nothing from the Association and still remained firm as the day before.

The board then waited upon Mr. Turner and the members of the union at their hall and found them still firm and holding out for what they had asked. The board conferred with them for about two hours, but accomplished nothing.

September 28th, called upon Mr. Turner and the union men, but they still remained firm. Then waited upon Mr. Read. He would offer nothing, nor let the board, as he had received a letter from Mr. Hoyt, Secretary National Foundrymen's Association, which said that Filer & Stowell had taken the right step and that steps had been taken to have the men ordered back to work by the National Foundrymen's Association.

On Friday, September 29th, the board again called upon the firm, but they would listen to no kind of compromise and were firmer than ever in the stand they had taken. The board then went to see Mr. Turner and the union men and held a long conference, went over the ground thoroughly, but they would not agree to anything less than they had asked. That afternoon we were notified that Mr. Read wished to see the committee and board. On arriving at the office he showed us a message he had just received from Mr. Hoyt and one from Mr. Penton, saying the men had been ordered to return to work. They did so on Monday, October 2nd, pending an investigation of the N. F. A.

September 30th, the board were informed that the moulders in Greenslade's Foundry had gone out on a strike, and they called on the company and found the same condition existing as

---

*Strikes.*

---

had been at Filer & Stowell's, the signing of the agreement. It had been presented to the Greenslade company in the morning with a request that it be signed at once or the men would walk out. The company could not sign without considering it and asked time. They were informed that no time would be given; it must be signed at once. They refused, and the men were called out by Mr. Turner.

## AGREEMENT.

Milwaukee, Wis., Sept. 22, 1899.

We, the undersigned Foundrymen of Milwaukee and vicinity and the Iron Moulders conference board representing Iron Moulders Unions Nos. 121, 125, 166, 310, believing that labor disputes, and strikes or lockouts, are a disturbing factor in a foundry industry that should as far as possible be eliminated and that the question of labor is one of the most fruitful sources of such strikes or lockouts, do hereby agree in behalf of our respective firms and unions to be governed in determining the wages to be paid to moulders in the future by the provisions of the following articles of agreement:

1st.—That on and after September 25th, 1899, the minimum of wages of the floor moulders in Milwaukee and vicinity shall be \$2.75 per day, of bench moulders \$2.50 per day, and all piece work moulders at the rate of ten per cent. increase on present prices paid.

2nd.—All over time except in case of accident or causes beyond control not consuming more than thirty minutes time, to be paid to its moulders, time and one-half time.

3rd.—That when any difference arises between the individual moulder and the foreman, the company and the foreman agree to receive and treat with the committee of the Iron Moulders Union in an endeavor to amicably adjust said difference.

4th.—This agreement to continue and be in force until May 1st, 1900, and unless thirty days previous thereto notice of a desire to change any of the conditions of this agreement be given by either party hereto, this agreement to continue and be in force until May 1st, following.

5th.—The above parties hereto pledge their best efforts to carry out this agreement in good faith and with the understanding that during this life, the iron moulders conference

---

*Strikes.*

---

board of Milwaukee and vicinity shall make no further demands upon the foundrymen, in agreement, we subscribe ourselves this 25th day of September, 1899.

In behalf of the Iron Moulders conference board of Milwaukee and vicinity, comprising the Iron Moulders Unions Nos. 121, 125, 166, 310.

In behalf of the Foundrymen of Milwaukee and vicinity.

WILLIAM SUMMERS, President.

GEORGE H. TURNER, Bus. Agt.

The men remained out four days. The board tried to have them hold a joint conference, but that neither the company nor the union men were willing to do, both parties seeming inclined to ignore the board; but on Friday, October 6th, the Moulders Association of Milwaukee, Mr. Keogh, Mr. Turner and the president of one of the local unions held a conference at the Plankinton House at 2 P. M. The board had a few minutes before leaving Mr. Greenslade and he informed us that he did not know when the conference would be held; at the same time he was waiting to attend said conference. They came to a settlement by striking out the third clause in the agreement. The men accepted it and returned to work the following day. This settled the existing trouble at all the other foundries in Milwaukee.

FREIGHT HANDLERS, WEST SUPERIOR.

Through the press of October 4th, the attention of the board was called to a strike at West Superior of freight handlers, or longshoresmen local union, and the Eastern Railway Company of Minnesota. Mr. Edwards, president of the board, wired the mayor of West Superior and by his reply it was found that the men could not effect a settlement; so the secretary of the board undertook to bring about a settlement. Arrived there October 30, 1899. At 3 P. M. held a conference with the following members of the Longshoresmen's Union No. 131: C. Wilcox, president of the union, C. C. Simons, H. L. Miller, and P. Foley. After a long conference with them, found the company had commenced to handle their freight about August 16th, and through the failure of Mr. Promberger, only about fifteen men had received their back pay. The demand the union made on the company was their back pay and that they recognize the

---

*Strikes.*

---

union; if they would, the union would furnish all the men the company wanted. The company refused to grant the request, therefore the strike was ordered. After the men had been out four weeks, they offered the following compromise:

That they receive \$2.50 per day for day work and 30 cents per hour for over time, and the company assume the debt of Mr. Promberger. This was presented to the company October 31st.

Monday night was the regular meeting of the union and Mr. Willott, secretary of the board of arbitration, was requested to attend and address the men. October 31st Mr. Willott called upon Mr. Slade, division superintendent of the Eastern Minnesota Railway, and went over the situation of the strike: and while he did not want to recognize the union, he would not discriminate against union men, and if they would call the strike off and return to work, while he could not guarantee them their back pay, he did not doubt for one minute that they would all receive their pay in full in time. At 3 P. M. of the same day, Mr. Willott held a conference with Mr. Hill, second vice president and general manager of the Eastern Minnesota Railway, and went over the strike situation with him.

He claimed the longshoremen had not been to see him; that he did not know what their demand was, as the committee of the union had not called on him, and that he would have been glad to meet them at any time. He would make no concessions, neither would he make any propositions to the men, but he said he would give work to such of them as he could if they called the strike off, but some of the men he would not take back as they had enough men to handle all their business without delay. Mr. Willott asked him if he would meet a committee of the union with him and he consented. We therefore arranged for a conference of the committee and Mr. Willott at 10 A. M., November 1st. The union appointed the following: C. Wilcox, J. Carrell, J. C. Moran, M. McGinnis, C. C. Simons and H. L. Miller. The second proposition was presented, which was \$2.00 per day for days' work and 25 cents per hour for over-time, and recognize home labor. Mr. Hill wanted to know what was meant by home labor, and they told him by employing residents of Superior. He refused to accept the second proposition and thereupon the committee left the office. Mr. Willott then asked them if they had anything further to offer, but they did not know what they could offer. Mr. Willott suggested as

---

*Strikes.*

---

a last effort that a certain number of men be put to work, and they authorized him to make a third proposition to Mr. Hill, which was that he put 75 men to work, and if he could not see his way clear to do that, to put 60 men to work Monday morning, and assume the debt of Mr. Promberger. Mr. Willott told Mr. Hill that he hoped he could see his way clear to do this and the union would wire the unions at the lower end of the lake that the strike was declared off and they would load freight for the Eastern Minnesota R. R.

The following is Mr. Hill's reply:

"Our attitude toward the men, ever since they went on a strike, has been to take back all the good men and would furnish work to such as were trustworthy. Some of the men we will not re-employ, but the others,—a few each day,—we will until they are all employed. If the men think they can hurt us at the lower end of the lake, all right, but they have not been able to do so as yet."

Mr. Hill did not say anything about the number of men he would take back; therefore we took it for granted that he refused the third proposition and the strike would be continued for some time.

After carefully considering the matter, Mr. Hill concluded to assume the Promberger debt, paying two-thirds of it in December, 1899, and the remainder in January, 1900, and that he would put the men to work.

#### IRON WORKERS, MILWAUKEE.

Through the daily press of November 9th, 1899, the notice of the board was called to a strike of the iron workers on the new power house in Milwaukee. The cause of the strike was as follows: Mr. Frank Niezorawski, who is a contractor and does the mason work, had two men working for him who did not belong to the union and the iron workers refused to work with them, and Mr. James Harvey called the iron workers off the building. The board called upon Mr. Niezorawski and found that these men had belonged to the union but had been expelled for some reason not known to him, but the union had imposed a fine on these men which they could not afford to pay and they had formed a union of their own. He had no objection to the men joining the union if they wanted to. There were some non-union men working on the iron work,

---

*Strikes.*

---

and as they had only a few more days' work to do, he thought they would have no trouble in finishing it. Mr. Niezorawski said he did not feel like discharging his men, as they had worked for him for fifteen years. Through the influence of the board, after considering the matter for a few days, they returned to work.

## MOULDERS, SOUTH MILWAUKEE.

November 24th, 1899, the attention of the board was called to a strike of moulders at the Stowell Company's Foundry at South Milwaukee. Mr. Willott, secretary of the board, called upon the company to find out what was the trouble, and found that one hundred men had walked out. Their grievance was that they wanted a man discharged because he did not belong to the union and did not want to join any. The company refused to discharge him. Mr. Sammond, secretary of the company, said the man that the men wanted discharged was an old employe and a very faithful man and they would not discharge him.

The company were members of the National Foundrymen's Association and the men were ordered back to work and told that they had no right to strike in order to have a man discharged who did not belong to the union; therefore the men returned to work.

## THE BRADLEY &amp; METCALF SHOE CO., MILWAUKEE.

November 29th, the attention of the board was called to a strike in the shoe factory of Bradley & Metcalf in Milwaukee. The cause was a disagreement of wages. Mr. Willott, secretary of the board, called upon the company, and Mr. Heinrichs, president of the company, went over the situation with him. Some time ago, the men known as the pullers over asked for an advance in wages of three cents per dozen on piece work at which they then were engaged, but the company said Mr. Heinrichs had already granted them an advance in July and August of from 8 to 10 per cent. and said he had got out a new price list which was an advance all the way through for the pullers over, a reduction however being made in wages paid three machine men who were getting from \$18 to \$28 per week. The men, he said, told him they would return to work last

---

*Strikes.*

---

Saturday at 7 o'clock, but instead a committee called upon him at 9:30 o'clock. Later the men returned and said the committee had not been authorized to represent them. Thereupon the board asked Mr. Heinrichs if he would meet a committee of the strikers with the board and see if an agreement could be reached, which he agreed to do.

December 1st, Mr. Willott called upon the strikers to see if they would appoint a committee to go with him and see Mr. Heinrichs, to see if an agreement could be arrived at. They were to hold a meeting at 9 A. M., December 2nd, and then they would appoint a committee, which they did, the board arranging to meet Mr. Heinrichs, and at 11 o'clock, Dec. 2d, the Board with the committee met Mr. Heinrichs and revised the price list securing a raise of from 8 to 12 per cent. on all classes of work, which was satisfactory to employer and employe. The men were to commence work Monday, Dec. 4th. Thus, through the influence of the Board, the strike was satisfactorily settled.

#### MOULDERS, RACINE.

Through the daily press of Dec. 7th, 1899, the attention of the Board was called to a strike of moulders at Racine. The Board were on the ground without delay and found that the moulders in the following foundries had walked out or been called out by one Mr. Turner: The J. I. Case, Freeman & Son, The Racine Hardware Co., and The Racine Wrought Iron and Malleable Works.

The Board on investigation found the same trouble existed that had existed at Milwaukee and that was in regard to an increase in wages and the signing of an agreement. The companies were willing to give the men the advance in wages, but did not want to sign the agreement as it was, which was the same agreement that was presented in the Filer and Stowell strike in Milwaukee. The companies offered an agreement that they would sign but the men would not accept it. The Board was informed that Mr. Walker, of the J. I. Case Co., had the matter in hand and they called upon him and he informed them that the matter was out of his hands and that the National Foundrymen's Association would have to settle it. The strike was settled by both sides making concessions.

---

*Strikes.*

---

## THE M. WINTER LUMBER CO., SHEBOYGAN.

Dec. 18th, the attention of the Board was called to a strike of the men employed by the M. Winter Lumber Co. at Sheboygan. The Board called upon the company and found that the strike was caused by the discharge of four men. The statement of C. F. Kade, manager of the company, was as follows: On Dec. 2d, he asked one of the yardmen and three men in the shipping room to work over time. They did not tell him they would not, but when the whistle blew at 5:30 p. m. they left the shop and would not work and gave no reason for so doing. When they came to work Monday, Dec. 4th, the company discharged the four men. The reason they asked them to work over time was that they wished to finish loading four cars which were four days late in the shipment and they were willing to pay time and one-half for over time. The president of the local union called out the men that belonged to the Woodworkers' union. The company thought the men had not treated them fairly by not telling them they would not work. The company refused to meet a committee of the union and they would not take all of the strikers back in a body but would employ them individually and would not discharge the new men in their employ.

The Board wanted the company to meet a committee of the strikers. To this they would not consent but wanted the Board to talk with the men. At 9 a. m., Dec. 19th, the Board had a conference with the Woodworkers' Union No. 53 of Sheboygan and heard their side of the question and their was very little difference between their statement and that of the company's officers, Mr. C. F. Kade and Mr. A. Winters, and that was in regard to the time they should work and the pay for over time. Mr. Willott, secretary of the Board, requested them to appoint a committee to hold a joint conference with the company, which they did. All the men asked was that they be taken back in a body, but if the company could present sufficient charges and sustain them they would not insist on their being reinstated. At 2 p. m., Dec. 19th, Mr. Willott held a conference with Mr. Winters and Mr. Kade and stated the position of the men who were willing to call the strike off providing the company would take them all back and they would return and work six hours per day if necessary to furnish them all work, but Mr. Winters refused to entertain this proposition but said he would furnish work for thirty of the men and possibly thirty-five if they applied in a gentlemanly manner.

---

*Strikes.*

---

Mr. Willott reported the fact to the union and they voted to stand by their proposition that all or none of the men would return to work, and at the request of the union Mr. Willott remained until Wednesday to see if something could be done to bring about a settlement.

On Dec. 20th, the last proposition Mr. Winters made to the men was that he put thirty-five of them to work at once and the balance as fast as there were vacancies. The men took a vote and were unanimous in standing by their first proposition, all to go to work or none, and as there was nothing more for the Board to do, they withdrew.

Jan. 9th, 1900, the Board was called to Sheboygan to hold a conference with Mr. Kidd, 5th Vice President of the Amalgamated Woodworkers of America, to try and settle the difficulty which had existed for some time between the Winters Lumber Co. and the Woodworkers' Union No. 53 of Sheboygan. Mr. Kidd and Mr. Willott held a conference with Mr. Kade and Mr. Winters of two hours' duration and finally succeeded in getting them to agree to take all the men back that they possibly could. They agreed to give employment to fifteen men and the others as fast as there were vacancies without discrimination.

Thereupon Mr. Kidd and Mr. Willott repaired to the hall where the men were in waiting to hear the result of the interview. Mr. Kidd stated to the union that we had secured for them and advised them to accept the proposition and told them that the strike was ill-advised and he was sorry they had not accepted the terms Mr. Willott had secured for them three weeks previous, which was that the Winters Lumber Co. would put thirty-five men to work and the remainder as soon as there were vacancies. Mr. Willott spoke to the union and advised them from a union standpoint what he thought would be best for them to do, and after a very stormy discussion Mr. Kidd and Mr. Willott retired to allow the men to discuss the matter as best they could and to take a vote as to whether they would accept it or not. They voted to accept it, and Mr. Willott with a committee was to present a list of the men to Mr. Kade and let him select the men he had positions for at present. Thereupon Mr. Willott presented the list to Mr. Kade and he selected fifteen men to go to work at once and he would put ten more to work the next week, and the men who had not secured work elsewhere and made application he would put to work as fast as there were

---

*Strikes.*

---

places for them. The strike was declared off Jan. 11th, 1900. Another settlement effected by the Board.

AMAZEEN & CO., SHOE MANUFACTURERS, MILWAUKEE.

On Jan. 27, 1900, the attention of the Board was called to a strike of shoemakers in the factory of Amazeen & Co., Milwaukee. The men had asked an increase in wages which the company refused to grant, and the men that last the shoes walked out. The Board found that fifteen men had gone on the strike. They called upon Mr. Amazeen and demanded that an increase of one and one-half cents be given for lasting and one cent on low shoes. The company refused, but after a conference with the Board they finally granted the request and the men returned to work.

CHAS. ABRESCH CO., CARRIAGE AND WAGON WORKS, MILWAUKEE.

April 10th, 1900, the attention of the Board was called to a lockout at the Chas. Abresch Co.'s Carriage and Wagon Works. The Board called upon the members of the Wagon Workers' Union No. 25 and heard their side of the trouble which was that on Monday, April 9th, when they went to work, the doors of the factory were locked and they were advised by Mr. Abresch that they had better settle their difficulty before he started up the shop. The men took it for a lockout.

The Board called upon the company to hear their side of the difficulty and the company informed them that they had been told by some of the men that they were going to work on Monday and at nine o'clock were going to strike. Mr. Schweller, superintendent, told the Board that the company thought it better to adjust the trouble and they so informed the men and also to be on hand to go to work Tuesday morning but only a few of them reported for work. He said he would meet a committee of the men and talk the matter over with them. The Board tried to prevail on the men to appoint a committee to go and see the officers of the company.

On Wednesday, April 11th, the Board waited on the men and tried to have them send a committee to see if the trouble could not be adjusted, but they did not seem inclined to do so as they had sent for their national organizer and wished to wait for him.

---

*Strikes.*

---

The Board then called on the company and had a conference with Mr. Abresch and found that he regretted having locked the doors against the men and was willing to effect a settlement and asked the Board to do what they could to bring it about.

Thursday, April 12th, the Board called upon the union but with no better success as they still wished to wait for their national organizer, and their committee seemed to think that the Board had been called by the company, which was not a fact, as the Board called from official duty without solicitation from any one. The company was still willing to adjust matters and would give the men a few more days for consideration.

April 14th, Mr. Peter Damm, National Organizer, arrived in Milwaukee and held a meeting with the union and they decided to call upon Mr. Abresch, which he did with a committee before the Board arrived in Milwaukee. After the Board arrived and interviewed Mr. Abresch, found him still willing to meet a committee of the men with the Board and adjust the trouble but Mr. Damm would not allow the committee to meet him. The Board are satisfied that if the men had appointed a committee and given them full power to act, the trouble could have been satisfactorily settled.

After having been out twenty-one weeks, they returned to work receiving no more than they could have had if they had gone with the Board and settled the trouble the first week.

MOULDERS, MILWAUKEE.

May 1st, 1900, the Board was notified of a strike of the moulders at the E. P. Allis shop in Milwaukee and got on the ground as soon as possible. They met the men at their hall and were informed of the situation by the president of the Moulders' Union No. 125. They had struck to have a moulder discharged because he would not join the union. The men had waited on the officers of the company April 30th, and told them that if said non-union men were at work May 1st they would strike, for they would not work with non-union men. The officers of the company informed the committee that they would not discharge any employe or force them to join the union. The men were at work May 1st and some 200 of the union men did not go to work. Thereupon the Board called upon the officers of the company, Mr. Chas. Allis and Mr. Reynolds, and they main-

---

*Strikes.*

---

tained their former position as non-union men had worked for them twenty years.

On May 3d, the Board called upon the men at their hall and found that the national officer, Mr. Keogh, had arrived and the Board was invited to attend the meeting, which they did, taking no part in the discussion until the union went into secret session. Mr. Keogh told the members of the union that they were in the wrong in quitting work, for according to agreement with the National Foundrymen's Association they could not strike but must wait until the national officers had investigated their case and that they could not expect the company to live up to their agreement if the men did not live up to theirs.

As a result of the meeting, the committee called upon the company and the men were to return to work Monday, May 7th, pending an investigation.

PHOENIX TANNERY, MILWAUKEE.

Through the daily press of May 16th, 1900, the attention of the Board was called to a strike of splitters and shavers at the Phoenix Tannery in Milwaukee. The Board called upon the company and found that the trouble had been caused by one of the workmen spoiling two hide in one day, and they have a rule in the tannery that the men are held responsible; if a workman spoils a hide, he has to pay a certain price for it, and he having spoiled two, was told to stop. Instead of his going to the office and fixing the matter up, he quit work and the rest of the splitters and shavers quit also.

The company had not enforced the rule for the last six months but the men thought they were going to be very strict in the future and they would not stand it. The company informed the board that the amount of damage the men had had to pay in the last year would not amount to five dollars. The board called just as it was and arranged with the company to meet a committee of the men with them to see if a settlement could not be reached. They were successful in reaching an amicable adjustment of the trouble. The company would not relieve the men of their responsibility but agreed not to enforce the rule any more strictly than heretofore and the men being satisfied, returned to work.

---

*Strikes.*

---

## HAMILTON MANUFACTURING CO., TWO RIVERS.

May 21st, 1900, the attention of the Board was called to a strike of the men employed by the Hamilton Mfg. Co., at Two Rivers, Wis., which involved ninety men. The Board called upon Mr. Hamilton and found the men had made a demand to have the shop made a union shop and for him to hire none but union men. This Mr. Hamilton refused to do and the men walked out. Mr. Hamilton said he had no faith in the men keeping their agreement, as they made an agreement with him in February and broke it in less than three months.

The Board asked Mr. Hamilton if he would meet a committee of the men with them, which he at first refused to do, as he would not recede from the position he had taken, but after they had talked with about an hour he agreed to meet a committee of the strikers with the Board and talk over the situation and thus clear up some of the stories which were in circulation. The Board then found the president of the Woodworkers' Union No. 95, who made the same statement as Mr. Hamilton except that he thought Mr. Hamilton had discharged two or three men because they were members of the union. He told the Board that they had a committee appointed who had full power to act and he would have them meet the Board on May 22d and hold a joint conference. The Board arranged to meet Mr. Hamilton at 10 a. m. the same day. They thought they were in a fair way to reach a settlement, when after all arrangements were completed the union committee refused to go to the office of the Hamilton Co. Thereupon the Board called upon Mr. Hamilton and asked if he would meet the committee at the hotel. He said his office was his place of business and he would meet them there at any time. The Board then tried to have the committee reconsider their decision and go to Mr. Hamilton's office but they would not go.

## EGGERS VENEERING CO., TWO RIVERS.

On May 21st, the Frank Eggers Veneering Company's men walked out without making a demand and the company did not know what they wanted. The company called two of the strikers into their office and asked what was the cause of their walk out but they would not say. Mr. Eggers asked them if they had any fault to find with them and they said no, they had been treated

---

*Strikes.*

---

all right. He then asked them if the foreman had done anything to them and they said no, he was a nice man and had treated them first class, so nothing could be found out from that source and they came to the conclusion that the men had struck in sympathy with the Hamilton men as they belonged to the same union.

Mr. Eggers told the Board they had nothing to arbitrate but finally agreed to meet a committee of the strikers with the Board and talk the matter over, but the committee took the same stand that the Hamilton committee did. Mr. Eggers was willing to meet the men at his office at any time but refused to go to the hotel. Therefore, nothing could be done.

GISHOLT MACHINERY CO., MADISON.

May 23d, the attention of the Board was called to a strike at the Gisholt Machinery Company's shop at Madison. The Board called upon the company and Mr. Johnson, manager, said the trouble arose over the discharge of two men who were not doing their work satisfactorily. A committee of the men waited on him and wanted to know what the two men were discharged for. He told them he would not meet them as a committee but as individuals. Thereupon they retired. They wanted to know if they were discharged because they were union men and he told them they were not. The Board asked him if he would meet a committee of the men with them and he said no, not as a committee, and said there were some of the men that he would not take back. The Board then proceeded to find the men and learn their side of the trouble.

On May 24th, the Board called upon the strikers at their hall and heard their version of the trouble which was about the same as that told by Mr. Johnson. The men remained firm and said they would not return to work until the Gisholt Company recognized the union. Mr. Willott, Secretary of the Board, addressed them and advised them to do nothing that they would regret and told them they had better return to work, but they did not take kindly to his advice. He then retired to give them a chance to discuss the matter and to wait a few days and see if they would accept his advice. Some did this and others found employment elsewhere.

---

*Strikes.*

---

## SAILORS, MILWAUKEE.

June 15th the Board was notified of a strike in Milwaukee and thirty-four schooners were tied up. The Board called on the union sailors at their hall and found that they had struck for an increase of wages. They were getting \$1.75 per day and wanted \$2.00 and the captains refused to grant their demand. The Board called on the captains and got their side of the trouble and found there was no difference in the statement of the two parties. The captains could not understand why the men should want \$2.00 per day when sailors in Chicago were getting only \$1.75 for the same kind of work. They were willing to pay Chicago prices but no more. One of the captains made a motion that the matter be left with the Board to settle and whatever the Board said they would abide by. The motion was carried unanimously.

June 16th, after the Board had decided what would be right, they called upon the Lake Seamens' union and asked if they were willing the Board should settle their trouble for them. They wanted to know what assurance they would have that the Board would decide in their favor. The Board answered by asking what assurance the captains had that they would decide in their favor. The captains placed implicit confidence in the ability of the Board, for they wished to have a satisfactory settlement.

On June 18th, the Board called upon the captains and told them the union refused to leave the matter in their hands to settle and the captains decided to hold out for a time and see if the sailors would come to terms. The strike was continued three weeks and finally settled as the Board would have settled it at first.

## BRASS MOULDERS, MILWAUKEE.

July 25th, the attention of the Board was called to a strike of brass moulders in the Hoffman & Billings Foundry in Milwaukee. The Board called upon the firm and found the cause of the trouble was that the company had posted notices in the shop reducing the wages of the moulders. A committee waited on the company and asked if the prices as posted were to be enforced and they were told that the cut would have to stand.

*Strikes.*

	Old price.	New price.
All flange and bath tub work (overflow, etc.)	.7 cts.	4½ cts.
All cored work (green sand cores)	.6½ cts.	4½ cts.
All solid work	.6 cts.	3½ cts.
All cored loose work	.7½ cts.	6½ cts.
30 flasks or over	.8 cts.	7 cts.
All solid loose work	.7 cts.	6 cts.
30 flasks or over	.7½ cts.	6½ cts.

The company told the Board that with the improved machinery and the new prices the men could make the same wages as formerly. The Board asked Mr. Linderman, superintendent, if he could not vary from the scale and increase it a little but he said he could not. The Board arranged for a joint conference with the company to see if some conclusion could be reached. They went over the matter carefully and Mr. Hoffman agreed that if the men returned to work and found any patterns on which they could not make good, fair wages, he would adjust the price per piece satisfactory. The committee were to lay the matter before the union and give the company an answer on July 27th. The Board met with the committee and the men voted to return to work for two days to demonstrate to the company that they could not make the same wages as they had at the old prices, but the company would not agree to it. The Board then tried to have the company re-adjust the scale of wages and give the men a small raise. They said they could not do that as they were now paying more than their competitors. As there was nothing more that the Board could do and as they had exhausted all arguments both with the company and the union, they withdrew.

All of which is respectfully submitted,

R. H. EDWARDS,  
G. E. WILLOTT,  
A. McMILLAN,

*Board of Arbitration and Conciliation.*

---

*Arbitration Laws.*

---

THE WISCONSIN STATE BOARD OF ARBITRATION  
AND CONCILIATION.

Section 1729b. The state board of arbitration and conciliation as heretofore established is recognized and continued. On the expiration of the terms of the two members thereof appointed by the governor, or sooner if a vacancy shall otherwise occur, the governor shall appoint one member of such board who shall be an employer of labor or be selected from some association representing employers of labor; the other shall be selected from the members of some labor organization and shall not be an employer of labor. The terms of such members shall be for two years unless they are sooner removed by the governor. Vacancies shall be filled for the unexpired term. The third member of said board shall be appointed by the governor upon the recommendation of those previously appointed; provided, that if such recommendation is not made to the governor within thirty days after their appointment he may appoint any person such third member. Each member shall, before entering upon the duties of his office, take the oath prescribed by the constitution; such oath shall be filed in the executive office. Said board shall organize by choosing one member as chairman and another as secretary, and shall adopt rules of procedure and submit them to the governor and attorney-general, which rules shall be in force on approval thereof by them. All requests and communications intended for said board may be addressed to the governor at Madison, who shall at once refer the same to the board for their action.

Section 1729c. Whenever any controversy or difference, not the subject of litigation, exists between an employer, whether an individual, copartnership or corporation, and his employees, if at the time he employs not less than twenty-five persons in the same general line of business in any one place, said board may, without any application therefor or upon application, and as soon as practicable thereafter, visit the locality where the controversy exists and make careful inquiry into the cause thereof, hear all persons interested therein who may come before them, advise the respective parties what, if any-

---

*Arbitration Laws.*

---

thing, should be done or submitted to by either or both to adjust the same and make a written decision thereof. Such decision shall at once be made public by publication in two or more newspapers published in the locality where such controversy exists, shall be recorded upon books of record to be kept by the secretary of said board, and a succinct statement thereof published in the report hereinafter provided for, and said board shall cause a copy of such decision to be filed with the clerk of the city, village or town where said business is carried on.

Section 1729d. Said application shall be signed by such employer or by a majority of his employees in the department of the business in which the controversy exists, or by their duly authorized agent, or by both parties, and shall contain a concise statement of the grievances complained of and an agreement to continue in business or at work without any lock-out or strike until the decision of said board is made known; provided, that said board shall render its decision within thirty days after the date of filing such application. As soon as may be after the receipt of said application the secretary of said board shall cause public notice to be given of the time and place for the hearing thereof; but such notice need not be given when both parties to the controversy join in the application and request in writing that it be not given. When notice has been given or dispensed with as aforesaid the board may in its discretion appoint two expert assistants, one to be nominated by each of the parties to the controversy, and such additional expert assistants as they may deem necessary. Such assistants shall be sworn to the faithful discharge of their duty. Should the petitioner or petitioners fail to perform the agreements made in said application the board shall proceed no further thereupon without the written consent of the adverse party. The board shall have power to subpoena as witnesses any operative in the departments of business affected by the controversy and any person who keeps the record of wages earned in such departments to examine them under oath and require the production of books containing the record of wages paid. Subpœnas may be signed and oaths administered by any member of the board.

Section 1729e. The decision of said board shall be binding upon the parties who join in the application therefor for six months after the same is filed with the proper city, village or

---

*Arbitration Laws.*

---

town clerk or until either party has given the other notice in writing of his intention not to be bound thereby from and after the expiration of sixty days from the date thereof. Said notice may be given by serving it upon the employer or his representative, and upon the employees by posting it in three conspicuous places in the shop, factory, yard or upon the premises where they work.

Section 1729f. Whenever any mayor, board of village trustees or town board shall believe that a strike or lockout is seriously threatened or has actually occurred, and that it threatens to or does involve the business interests of the city, village or town represented by said mayor, trustees or board, such mayor, trustees or board shall at once notify the secretary of the state board of arbitration and conciliation of the fact and furnish him with such information as may be available; and it shall be the duty of the state board to investigate the condition there prevailing as soon as may be, and endeavor by mediation to effect an amicable settlement between the employer and employees directly concerned in such strike or lockout, and to endeavor to persuade them to submit the matters in controversy to the local board of arbitration and conciliation as hereinafter provided for, or to the state board; but the latter may, if it deems it advisable, investigate the cause or causes of such controversy, ascertain which of the parties is mainly or wholly responsible for the existence or continuance thereof and may make and publish a report stating its conclusions in the premises.

Section 1729g. Witnesses subpoenaed by the state board shall be allowed for their attendance and travel the same fees as are paid witnesses in the circuit courts; each such witness shall certify under oath in writing the amount of his travel and the length of time of his attendance; and upon the approval of such statement by the board and the presentation thereof to the secretary of state a warrant shall be drawn in his favor therefor.

Section 1729h. The members of said board shall be reimbursed the actual and necessary expenses incurred in the performance of their duties and be paid five dollars per day each every day actually and necessarily occupied therein, accounts for which, properly verified, shall be audited by the secretary of state.

*Arbitration Laws.*

---

Section 1729i. The state board shall, at the close of every biennial fiscal term, make a report to the governor which shall contain a succinct statement of the decisions made by them during the preceding two years and such recommendations as they may deem proper; such report shall be printed to the number of two thousand copies in the style other official reports are printed and be distributed in the same way.

## LOCAL BOARDS OF ARBITRATION.

Section 1729j. The parties to any controversy within the provisions of section 1729c may submit the same, by an instrument in writing, for adjustment to a local board of arbitration and conciliation which may either be mutually agreed upon or the employer may designate one of such arbitrators, the employees or their duly authorized agent another, and the two so designated may choose a third, who shall be chairman thereof; such board shall in respect to the matters referred to it have and exercise all the powers which the state board might have and exercise, and its decision shall have such binding effect as may be agreed upon by the parties to the controversy in the submission. The jurisdiction of such local board shall be exclusive in respect to the matters submitted to it, but it may ask and receive the assistance of the state board. Such local board shall render its decision in writing within ten days after the close of any hearing held by it and file a copy thereof with the secretary of the state board. Each member of the local board shall be entitled to receive from the treasurer of the city, village or town in which the controversy or difference that is the subject of arbitration exists, if such payment is approved in writing by the mayor, the board of trustees or the town board, three dollars for each day of actual service, not exceeding ten days for any one arbitration.

---

*Arbitration Laws.*

---

## ARBITRATION LAWS OF OTHER STATES.

State boards of mediation and arbitration were established in New York and Massachusetts in 1886; those states being the first to try official mediation and arbitration as a means of adjusting disputes between employers and employees. Since then similar boards have been established in California, Connecticut, Illinois, Louisiana, Minnesota, Montana, New Jersey and Ohio. An act of the legislature of the state of Michigan, approved July 3, 1899,, authorized the governor of that state to appoint a state board of mediation and arbitration, but the law is inoperative because the governor has failed to exercise such authority. The constitution of Utah, which was admitted to the union as a sovereign state on January 4, 1896, directs the legislature to provide by law for a board of labor, conciliation and arbitration. The law creating the bureau of labor statistics of the state of Colorado provides that when differences arise between employer and employees threatening to result or resulting in a strike or lockout, it shall be the duty of the commissioner to mediate between the parties to the controversy, if either party requests his intervention. Similar powers are conferred upon the commissioners of labor statistics of the states of Missouri and Nebraska, and they are also authorized, under certain circumstances, to form local boards of arbitration. The laws of Iowa, Kansas, Maryland and Pennsylvania simply authorize the courts to appoint tribunals of voluntary arbitration when the parties to labor disputes petition for or consent to their appointment; the jurisdiction of such tribunals being limited to the county or portion of the state in which the dispute may arise. The parties to such controversies have seldom, if ever, availed themselves of the provisions of such laws, in states in which there are no regularly constituted boards of arbitration. The last state to adopt arbitration statutes was Idaho. The act was approved in February of 1899.

Following are the arbitration laws of the several states:

*Arbitration Laws.*

---

## NEW YORK.

## CHAPTER 63.

An act to provide for the amicable adjustment of grievances and disputes that may arise between employers and employes, and to authorize the creation of a state board of mediation and arbitration.

Section 1. Whenever any grievance or dispute shall arise between any employer and his employes, it shall be lawful to submit the same in writing to a board of arbitrators for hearing and settlement. Said board shall consist of three persons. When the employes concerned are members in good standing of any labor organization which is represented by one or more delegates in a central body, the said body shall have power to designate one of said arbitrators, and the employer shall have power to designate one other of said arbitrators, and the said two arbitrators shall designate a third person, as arbitrator, who shall be chairman of the board. In case the employer concerned in any grievance or dispute are members in good standing of a labor organization which is not represented in a central body, then the organization of which they are members shall have the power to select and designate one arbitrator for said board, and said board shall be organized as hereinbefore provided. And in case the employes concerned in any grievance or dispute are not members of any labor organization, then a majority of said employes, at a meeting duly held for that purpose, shall designate one arbitrator for said board, and the said board shall be organized as hereinbefore provided. In all cases of arbitration the grievance or matter of dispute shall be succinctly and clearly stated in writing, signed by the parties to the arbitration, or some duly authorized person on their behalf and submitted to such board of arbitration.

Section 2. Each arbitrator so selected shall sign a consent to act as such, and shall take and subscribe an oath before an officer authorized to administer oaths, to faithfully and impartially discharge his duties as such arbitrator, which consent and oath may be filed in the office of the clerk of the county where such dispute arises. When the said board is ready for the transaction of business it shall select one of its number to act as secretary, and the parties to the dispute

---

*Arbitration Laws.*

---

shall receive notice of a time and place of hearing. The chairman shall have power to administer oaths and to issue subpoenas for the production of books and papers, and for the attendance of witnesses, to the same extent that such power is possessed by the courts of record or the judges thereof in this state. The board may make and enforce the rules for its government and the transaction of the business before it, and fix its sessions and adjournment, and shall hear and examine such witnesses as may be brought before the board, and such other proof as may be given relative to the matter in dispute.

Section 3. After the matter has been fully heard, the said board or a majority of its members shall, within ten days, render a decision thereon in writing, signed by them, giving such details as will clearly show the nature of the decision and the points disposed of. Such decision shall be a settlement of the matter referred to said arbitrators unless an appeal is taken therefrom as is hereinafter provided. The decision shall be in duplicate, one copy of which shall be filed in the office of the clerk of the county and the other transmitted to the secretary of the state board of mediation and arbitration, hereinafter mentioned, together with the testimony taken before said board.

Section 4. When the said board shall have rendered its decision its power shall cease, unless there may be in existence at the time other similar grievances or disputes between the same classes of persons, and in such cases such persons may submit their differences to the said board, which shall have power to act and arbitrate and decide upon the same as fully as if said board was originally created for the settlement of such other difference or differences.

Section 5. Within three days after the passage of this act the governor shall, with the advice and consent of the senate, appoint a state board of mediation and arbitration, to consist of three competent persons, each of whom shall hold his office for the term of three years, to commence immediately upon the expiration of the term of office for the members of the present state board of arbitration, created under chapter four hundred and ten of the laws of eighteen hundred and eighty-six. One of said persons shall be selected from the party which, at the last general election, cast the greatest number of votes for governor

---

*Arbitration Laws.*

---

of this state; and one of said persons shall be selected from the party which, at the last general election, cast the next greatest number of votes for governor of this state; and the other of said persons shall be selected from a bona-fide labor organization of this state. If any vacancy happens by resignation or otherwise, he shall in the same manner appoint an arbitrator for the residue of the term. If the senate shall not be in session at the time any vacancy shall occur or exist, the governor shall appoint an arbitrator to fill the vacancy, subject to the approval of the senate when convened. Said board shall have a clerk or secretary, who shall be appointed by the board to serve three years, whose duty it shall be to keep a full and faithful record of the proceedings of the board, and also all documents and testimony forwarded by the local boards of arbitration, and perform such other duties as the said board may prescribe. He shall have power, under the direction of the board, to issue subpoenas, to administer oaths in all cases before said board, to call for and examine books, papers and documents of any parties to the controversy, with the same authority to enforce their production as is possessed by the courts of record, or the judges thereof in this state. Said arbitrators and clerk shall take and subscribe the constitutional oath of office, and be sworn to the due and faithful performance of the duties of their respective offices before entering upon the discharge of the same. An office shall be set apart in the capitol by the person or persons having charge thereof, for the proper and convenient transaction of the business of said board.

Section 6. An appeal may be taken from the decision of any local board of arbitration within ten days after the rendition and filing of such decision. It shall be the duty of said state board of mediation and arbitration to hear and consider appeals from the decisions of local boards and promptly proceed to the investigation of such cases, and the decision of said board thereon shall be final and conclusive in the premises upon both parties to the arbitration. Such decision shall be in writing, and a copy thereof shall be furnished to each party. Any two of the arbitrators shall constitute a quorum for the transaction of business, and may hold meetings at any time or place within the state. Examinations or investigations ordered by the board may be held and taken by and before any one of their number, if so directed. But the pro-

---

*Arbitration Laws.*

---

ceedings and decisions of any single arbitrator shall not be deemed conclusive until approved by the board or a majority thereof. Each arbitrator shall have power to administer oaths.

Section 7. Whenever any grievance or dispute of any nature shall arise between any employer and his employes, it shall be lawful for the parties to submit the same directly to said state board in the first instance, in case such parties elect to do so, and shall jointly notify said board or its clerk, in writing, of said election. Whenever such notification to said board or its clerk is given, it shall be the duty of said board to proceed with as little delay as possible, to the locality of such grievance or dispute, and inquire into the cause or causes of grievance or dispute. The parties to the grievance or dispute shall thereupon submit to said board, in writing, succinctly, clearly and in detail, their grievances and complaints, and the cause or causes thereof, and severally agree in writing to submit to the decision of said board as to matters so submitted, and a promise or agreement to continue on in business or at work without a lockout or strike until the decision of said board, provided it shall be rendered within ten days after the completion of the investigation. The board shall thereupon proceed to fully investigate and inquire into the matters in controversy, and to take testimony under oath in relation thereto, and shall have power, by its chairman or clerk, to administer oaths, to issue subpoenas for the attendance of witnesses, the production of books and papers, to the same extent as such power is possessed by courts of record or the judges thereof, in this state.

Section 8. After the matter has been fully heard, the said board, or a majority of its members, shall, within ten days, render a decision thereon in writing, signed by them or a majority of them, stating such details as will clearly show the nature of the decision and the points disposed of by them. The decision shall be in triplicate, one copy of which shall be filed by the clerk of the board in the clerk's office of the county where the controversy arose, and one copy shall be served on each of the parties to the controversy.

Section 9. Whenever a strike or lockout shall occur, or is seriously threatened in any part of the state, and shall come to the knowledge of the board, it shall be its duty, and it is

---

*Arbitration Laws.*

---

hereby directed to proceed, as soon as practicable, to the locality of such strike or lockout, and put itself in communication with the parties to the controversy, and endeavor, by mediation, to effect an amicable settlement of such controversy; and, if in its judgment it is deemed best, to inquire into the cause or causes of the controversy, and to that end the board is hereby authorized to subpoena witnesses, compel their attendance, and send for persons and papers, in like manner and with the same powers as it is authorized to do by section seven of this act.

Section 10. The fees of witnesses shall be fifty cents for each day's attendance, and four cents per mile traveled by the nearest route in getting to or returning from the place where attendance is required by the board. All subpoenas shall be signed by the secretary of the board, and may be served by any person of full age, authorized by the board to serve the same.

Section 11. Said board shall make a yearly report to the legislature, and shall include therein such statements, facts and explanations as will disclose the actual working of the board, and such suggestions as to legislation as may seem to them conducive of harmonizing the relations of and disputes between employers and the wage earning masses and the improvement of the present system of production.

Section 12. Each arbitrator shall be entitled to an annual salary of three thousand dollars payable in quarterly installments from the treasury of the state. The clerk or secretary shall receive an annual salary of two thousand dollars, payable in like manner.

Section 13. Whenever the term "employer" or "employers" is used in this act it shall be held to include "firm," "joint-stock association," "company" or "corporation," as fully as if each of the last named terms was expressed in each place.

Section 14. This act shall take effect immediately.

---

MASSACHUSETTS.

The law of this state concerning arbitration is given below, being chapter 263 of the act of 1886, entitled, "An act to provide for a state board of arbitration, for the settlement of differences between employers and their employes," as amended

---

*Arbitration Laws.*

---

by Stat. 1887, chapter 269; Stat. 1888, chapter 261, and Stat. 1890, chapter 385; also Stat. 1892, chapter 382.

Section 1. The governor, with the advice and consent of the council, shall, on or before the first day of July in the year eighteen hundred and eighty-six, appoint three competent persons to serve as a state board of arbitration and conciliation in the manner hereinafter provided. One of them shall be an employer or selected from some association representing employers of labor, one of them shall be selected from some labor organization and not an employer of labor; the third shall be appointed upon the recommendation of the other two; provided, however, that if the two appointed do not agree on the third man at the expiration of thirty days, he shall then be appointed by the governor. They shall hold office for one year, or until their successors are appointed. On the first day of July in the year eighteen hundred and eighty-seven the governor, with the advice and consent of the council, shall appoint three members of said board in the manner above provided, one to serve for three years, one for two years and one for one year, or until their respective successors are appointed; and on the first day of July in each year thereafter the governor shall in the same manner appoint one member of said board to succeed the member whose term then expires, and to serve for the term of three years or until his successor is appointed. If a vacancy occurs at any time, the governor shall in the same manner appoint some one to serve out the unexpired term; and he may in like manner remove any member of said board. Each member of said board shall, before entering upon the duties of his office, be sworn to a faithful discharge thereof. They shall at once organize by the choice of one of their number as chairman. Said board may appoint and remove a clerk of the board, who shall receive such salary as may be allowed by the board, not exceeding twelve hundred dollars a year.

Section 2. The board shall, as soon as possible after its organization, establish such rules of procedure as shall be approved by the governor and council.

Section 3. Whenever any controversy or difference not involving questions which may be the subject of a suit at law or bill in equity, exists between an employer, whether an individual, co-partnership or corporation, and his employes, if at the time he employs not less than twenty-five persons in the same general line of business in any city or town in this com-

---

*Arbitration Laws.*

---

monwealth, the board shall, upon application as hereinafter provided, and as soon as practicable thereafter, visit the locality of the dispute and make careful inquiry into the cause thereof, hear all persons interested therein who may come before them, advise the respective parties what, if anything, ought to be done or submitted to by either or both to adjust said dispute, and make a written decision thereof. This decision shall at once be made public, shall be recorded upon proper books of record to be kept by the secretary of said board, and a short statement thereof published in the annual report hereinafter provided for, and the said board shall cause a copy thereof to be filed with the clerk of the city or town where said business is carried on.

Section 4. Said application shall be signed by said employer or by a majority of his employes in the department of the business in which the controversy or difference exists, or their duly authorized agent, or by both parties, and shall contain a concise statement of the grievances complained of, and a promise to continue on in business or at work without any lockout or strike until the decision of said board, if it shall be made within three weeks of the date of filing said application. When an application is signed by an agent claiming to represent a majority of such employes, the board shall satisfy itself that such agent is duly authorized, in writing, to represent such employes, but the names of the employes giving such authority shall be kept secret by said board. As soon as may be after the receipt of said application the secretary of said board shall cause public notice to be given of the time and place for the hearing thereon; but public notice need not be given when both parties to the controversy join in the application and present therewith a written request that no public notice be given. When such request is made notice shall be given to the parties interested in such manner as the board may order; and the board may, at any stage of the proceedings, cause public notice to be given, notwithstanding such request.

When notice has been given as aforesaid, each of the parties to the controversy, the employer on the one side and the employes interested on the other side, may, in writing, nominate, and the board may appoint, one person to act in the case as expert assistant to the board. The two persons so appointed shall be skilled in and conversant with

---

*Arbitration Laws.*

---

the business or trade concerning which the dispute has arisen. It shall be their duty, under the direction of the board, to obtain and report to the board information concerning the wages paid and the methods and grades of work prevailing in manufacturing establishments within the commonwealth of a character similar to that in which the matters in dispute have arisen. Said expert assistants shall be sworn to the faithful discharge of their duty; such oath to be administered by any member of the board, and a record thereof shall be preserved with the record of the proceedings in the case. They shall be entitled to receive from the treasury of the commonwealth such compensation as shall be allowed and certified by the board, together with all necessary traveling expenses.\* Nothing in this act shall be construed to prevent the board from appointing such other additional expert assistant or assistants as it may deem necessary. Should the petitioner or petitioners fail to perform the promise made in said application, the board shall proceed no further thereupon without the written consent of the adverse party. The board shall have power to summon as witnesses any operative in the departments of business affected and any person who keeps the records of wages earned in those departments, and to examine them under oath, and to require the production of books containing the record of wages paid. Summonses may be signed and oaths administered by any member of the board.

Section 5. Upon the receipt of such application and after such notice the board shall proceed as before provided, and render a written decision, which shall be open to public inspection, shall be recorded upon the records of the board, and published at the discretion of the same in an annual report to be made to the general court on or before the first day of February in each year.

Section 6. Said decision shall be binding upon the parties who join in said application for six months, or until either party has given the other notice in writing of his intention not to be bound by the same at the expiration of sixty days therefrom. Said notice may be given to said employes by posting the same in three conspicuous places in the shop or factory where they work.

Section 7. The parties to any controversy or difference as described in section three of this act may submit the matters in dispute, in writing, to a local board of arbitration and conciliation; such board may either be mutually agreed upon, or the employer may designate one of the arbitrators, the employees or their duly authorized agent another, and the two arbitrators so designated may choose a third, who shall be chairman of the board. Such board shall, in respect to the matters referred to it, have and exercise all the powers which the state board might have and exercise, and its decision shall have whatever binding effect may be agreed by the parties to the controversy in the written submission. The jurisdiction of such board shall be exclusive in respect to the matters submitted to it, but it may ask and receive the advice and assistance of the state board. The decision of such board shall be rendered within ten days of the close of any hearing held by it; such decision shall at once be filed with the clerk of the city or town in which the controversy or difference arose, and a copy thereof shall be forwarded to the state board. Each of such arbitrators shall be entitled to receive from the treasury of the city or town in which the controversy or difference that is the subject of the arbitration exists, if such payment is approved in writing by the mayor of such city or the board of selectmen of such town, the sum of three dollars for each day of actual service not exceeding ten days for any one arbitration. Whenever it is made to appear to the mayor of a city or the board of selectmen of a town that a strike or lockout such as described in section eight of this act is seriously threatened or actually occurs, the mayor of such city or the board of selectmen of such town shall at once notify the state board of the facts.

Section 8. Whenever it shall come to the knowledge of the state board, either by notice from the mayor of a city or the board of selectmen of a town, as provided in the preceding section or otherwise that a strike or lockout is seriously threatened or has actually occurred in any city or town of the commonwealth, involving an employer and his present or past employes, if at the time he is employing, or up to the occurrence of the strike or lockout was employing, not less than twenty-five persons in the same general line of business in any city or town in the commonwealth, it shall be the duty

---

*Arbitration Laws.*

---

of the state board to put itself in communication as soon as may be with such employer and employe, and endeavor by mediation to effect an amicable settlement between them, or to endeavor to persuade them, provided that a strike or lock-out has not actually occurred or is not then continuing, to submit the matters in dispute to a local board of arbitration and conciliation, as above provided, or to the state board; and said state board may, if it deems it advisable, investigate the cause or causes of such controversy, and ascertain which party thereto is mainly responsible or blameworthy for the existence or continuance of the same, and may take and publish a report finding such cause or causes, and assigning such responsibility or blame. The board shall have the same powers for the foregoing purposes as are given it by section three of this act.

Section 9. Witnesses summoned by the state board shall be allowed the sum of fifty cents for each attendance and the further sum of twenty-five cents for each hour of attendance in excess of two hours, and shall be allowed five cents a mile for travel each way from their respective places of employment or business to the place where the board is in session. Each witness shall certify in writing the amount of his travel and attendance, and the amount due him shall be paid forthwith by the board, and for such purpose the board shall be entitled to draw from the treasury of the commonwealth, as provided for in chapter one hundred and seventy-nine of the acts of the year eighteen hundred and eighty-four.

Section 10. The members of said state board shall, until the first day of July in the year eighteen hundred and eighty-seven, be paid five dollars a day for each day of actual service; and on and after said date they shall each receive a salary at the rate of two thousand dollars a year, to be paid out of the treasury of the commonwealth; and both before and after said date they shall be allowed their necessary traveling and other expenses, which shall be paid out of the treasury of the commonwealth.

Stat. 1892, Chapter 382.

An act relating to the duties and compensation of expert assistants appointed by the state board of arbitration and conciliation.

Section 1. In all controversies between an employer and

*Arbitration Laws.*

---

his employes in which application is made to the state board of arbitration and conciliation, as provided by section four of chapter two hundred and sixty-three of the acts of the year eighteen hundred and eighty-six, as amended by section three of chapter two hundred and sixty-nine of the acts of the year eighteen hundred and eighty-seven, and by section one of chapter three hundred and eighty-five of the acts of the year eighteen hundred and ninety, said board shall appoint a fit person to act in the case as expert assistant to the board. Said expert assistants shall attend the sessions of said board when required, and no conclusion shall be announced as a decision of said board in any case where such assistants have acted, until after notice given to them, by mail or otherwise, appointing a time and place for a final conference between said board and expert assistant on the matters included in the proposed decision. Said expert assistants shall be privileged to submit to the board, at any time before a final decision shall be determined upon and published, any facts, advice, arguments or suggestions which they may deem applicable to the case. They shall be sworn to the faithful discharge of their duties by any member of said board, and a record thereof shall be preserved with the record of the proceedings in the case. They shall be entitled to receive for their services from the treasury of the commonwealth the sum of seven dollars for each day of actual service, together with all their necessary traveling expenses.

Section 2. This act shall take effect upon its passage.

Approved June 15, 1892.

---

MICHIGAN.

No. 238.

An act to provide for the amicable adjustment of grievances and disputes that may arise between employers and employes, and to authorize the creation of a state court of mediation and arbitration.

Section 1. The people of the state of Michigan enact, That whenever any grievance or dispute of any nature shall arise between any employer and his employes, it shall be lawful to

---

*Arbitration Laws.*

---

submit the same in writing to a court of arbitrators for hearing and settlement in the manner hereinafter provided.

Section 2. After the passage of this act the governor may, whenever he shall deem it necessary, with the advice and consent of the senate, appoint a court of mediation and arbitration to consist of three competent persons who shall hold their terms of office respectively one, two and three years and upon the expiration of their respective terms the said term of office shall be uniformly for three years. If any vacancy happens by resignation or otherwise he shall, in the same manner, appoint an arbitrator for the residue of the term. If the senate shall not be in session at the time any vacancy shall occur or exist, the governor shall appoint an arbitrator to fill the vacancy, subject to the approval of the senate when convened. Said court shall have a clerk or secretary who shall be appointed by the court to serve three years, whose duty it shall be to keep a full and faithful record of the proceedings of the court and also all documents, and to perform such other duties as the said court may prescribe. He shall have power under the direction of the court, to issue subpoenas, administer oaths in all cases before said court, to call for and examine all books, papers and documents of any parties to the controversy, with the same authority to enforce their production as is possessed by the courts of record or the judges thereof, in this state. Said arbitrators and clerk shall take and subscribe the constitutional oath of office, and be sworn to the due and faithful performance of the duties of their respective offices before entering upon the discharge of the same. An office shall be set apart in the capitol by the person or persons having charge thereof, for the proper and convenient transaction of the business of said court.

Section 3. Any two of the arbitrators shall constitute a quorum for the transaction of business, and may hold meetings at any time or place within the state. Examinations or investigations ordered by the court may be held and taken by and before any one of their number, if so directed. But the proceedings and decisions of any single arbitrator shall not be deemed conclusive until approved by the court or a majority thereof. Each arbitrator shall have power to administer oaths.

*Arbitration Laws.*

---

Section 4. Whenever any grievance or dispute of any nature shall arise between any employer and his employes, it shall be lawful for the parties to submit the same directly to said state court, and shall jointly notify said court or its clerk, in writing, of such grievance or dispute. Whenever such notification to said court or its clerk is given, it shall be the duty of said court to proceed, with as little delay as possible, to the locality of such grievance or dispute, and inquire into the cause or causes of grievance or dispute. The parties to the grievance or dispute shall thereupon submit to said court in writing, succinctly, clearly and in detail, their grievances and complaints, and the cause or causes thereof, and severally agree in writing to submit to the decision of said court as to matters so submitted, and a promise or agreement to continue on in business or at work, without a lockout or strike, until the decision of said court, provided it shall be rendered within ten days after the completion of the investigation. The court shall thereupon proceed to fully investigate and inquire into the matters in controversy, and to take testimony under oath in relation thereto, and shall have power by its chairman or clerk to administer oaths, to issue subpoenas for the attendance of witnesses, the production of books and papers, to the same extent as such power is possessed by court of record or the judges thereof, in this state.

Section 5. After the matter has been fully heard, the said board, or majority of its members, shall, within ten days render a decision thereon in writing, signed by them or a majority of them, stating such details as will clearly show the nature of the decision and the points disposed of by them. The decision shall be in triplicate, one copy of which shall be filed by the clerk of the court in the clerk's office of the county where the controversy arose, and one copy shall be served on each of the parties to the controversy.

Section 6. Whenever a strike or lockout shall occur, or is seriously threatened in any part of the state, and shall come to the knowledge of the court, it shall be its duty, and it is hereby directed to proceed, as soon as practicable, to the locality of such strike or lockout and put itself in communication with the parties to the controversy, and endeavor by mediation to effect an amicable settlement of such controversy; and if in its judgment it is deemed best, to inquire into the cause or causes of the controversy, and to that end the court is hereby authorized to subpoena witnesses, compel their attendance, and send

---

*Arbitration Laws.*

---

for persons and papers, in like manner and with the same powers as it is authorized to do by section three of this act.

Section 7. The fees of witnesses shall be one dollar for each day's attendance and seven cents per mile traveled by nearest route in getting to and from the place where attendance is required by the court to be allowed by the board of state auditors upon the certificate of the court. All subpoenas shall be signed by the secretary of the court, and may be served by any person of full age authorized by the court to serve the same.

Section 8. Said court shall make a yearly report to the legislature, and shall include therein such statements, facts and explanations as will disclose the actual working of the court, and such suggestions as to legislation, as may seem to them conducive to harmonizing the relations of, and disputes between, employers and wage-earners.

Section 9. Each arbitrator shall be entitled to five dollars per day for actual service performed, payable from the treasury of the state. The clerk or secretary shall be appointed from one of their number, and shall receive an annual salary not to exceed twelve hundred dollars, without per diem, per year, payable in the same manner.

Section 10. Whenever the term "employer" or "employee" is used in this act, it shall be held to include "firm," "joint stock association," "company" or "corporation," as fully as if each of the last named terms was expressed in each place.

Approved July 3, 1889.

---

NEW JERSEY.

An act to provide for the amicable adjustment of grievances and disputes that may arise between employers and employes, and to authorize the creation of a state board of arbitration.

Section 1. That whenever any grievance or dispute of any nature growing out of the relation of employer and employes shall arise or exist between employer and employes, it shall be awful to submit all matters respecting such grievance or dispute, in writing, to a board of arbitrators, to hear, adjudicate and determine the same; said board shall consist of five persons; when the employes concerned in any such griev-

---

*Arbitration Laws.*

---

ance or dispute as aforesaid are members in good standing of any labor organization, which is represented by one or more delegates in a central body, the said central body shall have power to designate two of said arbitrators; and the employer shall have the power to designate two others of said arbitrators, and the said four arbitrators shall designate a fifth person as arbitrator, who shall be chairman of the board; in case the employes concerned in any such grievance or dispute as aforesaid are members in good standing of a labor organization which is not represented in a central body, then the organization of which they are members shall have the power to select and designate two arbitrators for said board and said board shall be organized as hereinbefore provided; and in case the employes concerned in any such grievance or dispute as aforesaid are not members of any labor organization, then a majority of said employes, at a meeting duly held for that purpose, shall designate two arbitrators for said board, and the said board shall be organized as hereinbefore provided.

Section 2. That any board as aforesaid selected may present a petition to the county judge of the county where such grievances or disputes to be arbitrated may arise, signed by at least a majority of said board, setting forth in brief terms the nature of the grievance or dispute, between the parties to said arbitration, and praying the license or order of such judge establishing and approving said board of arbitration; upon the presentation of said petition it shall be the duty of the said judge to make an order establishing such board of arbitration and referring the matters in dispute to it for hearing, adjudication and determination; the said petition and order or copy thereof shall be filed in the office of the clerk of the county in which the said judge resides.

Section 3. That the arbitrators so selected shall sign a contract to act as such, and shall take and subscribe an oath before an officer authorized to administer oaths, to faithfully and impartially discharge his duties as such arbitrator, which consent and oath shall be immediately filed in the office of the clerk of the county wherein such arbitrators are to act; when the said board is ready for the transaction of business, it shall select one of its members to act as secretary, and the parties to the dispute shall receive notice of a time

---

*Arbitration Laws.*

---

and place of hearing; the chairman shall have power to administer oaths and to issue subpoenas for the production of books and papers, and for the attendance of witnesses, to the same extent that such power is possessed by the courts of record or the judges thereof in this state; the board may make and enforce the rules of its government and transaction of the business before it and fix its sessions and adjournments, and shall hear and examine such witnesses as may be brought before the board, and such other proof as may be given relative to the matter in dispute.

Section 4. That after the matter has been fully heard, the said board or a majority of its members shall, within ten days, render a decision thereon, in writing, signed by them, giving such details as will clearly show the nature of the decision and the matters adjudicated and determined, such adjudication and determination shall be a settlement of the matter referred to said arbitrators, unless an appeal is taken therefrom as hereinafter provided; the adjudication and determination shall be in duplicate, one copy of which shall be filed in the office of the clerk of the county, and the other transmitted to the secretary of the state board of arbitration hereinafter mentioned, together with the testimony taken before said board.

Section 5. That when the said board shall have rendered its adjudication and determination its powers shall cease unless there may be in existence at the time other similar grievances or disputes between the same classes of persons mentioned in section one, and in such cases such persons may submit their differences to the said board, which shall have power to act and adjudicate and determine the same as fully as if said board was originally created for the settlement of such other difference or differences.

Section 6. That within thirty days after the passage of this act the governor shall appoint a state board of arbitration, to consist of three competent persons, each of whom shall hold his office for the term of five years; one of said persons shall be selected from a bona fide labor organization of this state. If any vacancy happens, by resignation or otherwise the governor shall, in the same manner appoint an arbitrator for the residue of the term. Said board shall have a secretary, who shall be appointed by and hold office during:

---

*Arbitration Laws.*

---

the pleasure of the board, and whose duty it shall be to keep a full and faithful record of the proceedings of the board, and also possession of all documents and testimony forwarded by the local boards of arbitration, and perform such other duties as the said board may prescribe; he shall have power under the direction of the board, to issue subpoenas, to administer oaths in all cases before said board, to call for and examine books, papers and documents of any party to the controversy, with the same authority to enforce their production as is possessed by the courts of record, or the judges thereof in this state. Said arbitrators of said state board and the clerk thereof shall take and subscribe the constitutional oath of office, and be sworn to the due and faithful performance of the duties of their respective offices before entering upon the discharge of the same. An office shall be set apart in the capitol by the person having charge thereof, for the proper and convenient transaction of the business of said board.

Section 7. That an appeal may be taken from the decision of any local board of arbitration within ten days after the filing of its adjudication and determination of any case. It shall be the duty of the said state board of arbitration to hear and consider appeals from the decisions of local boards and promptly to proceed to the investigation of such cases, and the adjudication and determination of said board thereon shall be final and conculsive in the premises upon all parties to the arbitration; such adjudications and determinations shall be in writing and a copy thereof shall be furnished to each party. Any two of the state board of arbitrators shall constitute a quorum for the transaction of business, and may hold meetings at any time or place within the state. Examinations or investigations ordered by the state board may be held and taken by and before any one of their number, if so directed; but the proceedings and decision of any single arbitrator shall not be deemed conclusive until approved by the board or a majority thereof. Each arbitrator shall have power to administer oaths.

Section 8. That whenever any grievance or dispute of any nature shall arise between any employer and his employes, it shall be lawful for the parties to submit the same directly to said state board in the first instance, in case such parties elect to do so, and shall jointly notify said board or its

---

*Arbitration Laws.*

---

clerks, in writing, of such election. Whenever such notification to said board or its clerks is given, it shall be the duty of said board to proceed with as little delay as possible, to the locality of such grievance or dispute and inquire into the cause or causes of grievance or dispute. The parties to the grievance or dispute shall thereupon submit to said board, in writing, succinctly, clearly, and in detail, their grievances and complaints, and the cause or causes thereof, and severally agree, in writing, to submit to the decision of said board as to matter so submitted, and a promise or agreement to continue on in business or at work, without a lockout or strike, until the decision of said board, provided it shall be rendered within ten days after the completion of the investigation; the board shall thereupon proceed to fully investigate and inquire into the matters in controversy, and to take testimony under oath in relation thereto, and shall have power, by its chairman or clerk, to administer oaths, to issue subpoenas for the attendance of witnesses, the production of books and papers, to the same extent as such power is possessed by courts of record or the judges thereof, in this state.

Section 9. That after the matter has been fully heard, the said board, or a majority of its members, shall within ten days, render a decision thereon in writing, signed by them or a majority of them, stating such details as will clearly show the nature of the decision, and the points disposed of by them. The decision shall be in triplicate, one copy of which shall be filed by the clerk of the board in the clerk's office of the county where the controversy arose, and one copy shall be served on each of the parties to the controversy.

Section 10. That whenever a strike or lockout shall occur or is seriously threatened in any part of the state, and shall come to the knowledge of the board, it shall be its duty, and it is hereby directed to proceed, as soon as practicable, to the locality of such strike or lockout and put itself in communication with the parties to the controversy, and endeavor by mediation to effect an amicable settlement of such controversy; and, if in its judgment it is deemed best, to inquire into the cause of the controversy, and to that end the board is hereby authorized to subpoena witnesses, compel their attendance, and send for persons and papers, in like manner

---

*Arbitration Laws.*

---

and with the same powers as it is authorized to do by section eight of this act.

Section 11. That the fees of witnesses of aforesaid state board shall be fifty cents for each day's attendance and four cents per mile traveled by the nearest route in getting to or returning from the place where attendance is required by the board; all subpoenas shall be signed by the secretary of the board and may be served by any person of full age, authorized by the board to serve the same.

Section 12. That said board shall annually report to the legislature and shall include in their report such statements, facts and explanations as will disclose the actual working of the board, and such suggestions with regard to legislation as may seem to them conducive to harmonizing the relations of and disputes between employers and employes, and the improvement of the present system of production by labor.

Section 13. That each arbitrator of the state board and the secretary thereof shall receive ten dollars for each and every day actually employed in the performance of his duties herein and actual expenses incurred, including such rates of mileage as are now provided by law, payable by the state treasurer on duly approved vouchers.

Section 14. That whenever the term "employer" or "employes" is used in this act it shall be held to include "firm," "joint stock associations," "company," "corporation," or "individual and individuals," as fully as if each of said terms was expressed in each place.

Section 15. This act shall take effect immediately.

Approved March 24, 1892. P. L., Chap. 137.

A supplement to an act entitled, "An act to provide for the amicable adjustment of grievances and disputes that may arise between employers and employes, and to authorize the creation of a state board of arbitration," approved March twenty-fourth, eighteen hundred and ninety-two, and to end the term of office of any person or persons appointed under this act.

1. Be it enacted by the senate and general assembly of the state of New Jersey, That Samuel S. Sherwood, William M. Doughty, James Martin, Charles A. Houston, Joseph L. Moore be and they are hereby constituted a board of arbitration, each to serve for the term of three years from the approval of this supplement, and that each arbitrator herein

---

*Arbitration Laws.*

---

named shall receive an annual salary of twelve hundred dollars per annum, in lieu of all fees, per diem compensation and mileage, and one of said arbitrators shall be chosen by said arbitrators as the secretary of said board and he shall receive an additional compensation of two hundred dollars per annum, the salaries herein stated to be payable out of the moneys in the state treasury not otherwise appropriated.

2. And be it enacted, That in case of death, resignation or incapacity of any member of the board, the governor shall appoint, by and with the advice and consent of the senate, an arbitrator to fill the unexpired term of such arbitrator or arbitrators so dying, resigning or becoming incapacitated.

3. And be it enacted, That the term of office of the arbitrators now acting as a board of arbitrators, shall upon the passage of this supplement, cease and terminate, and the persons named in this supplement as the board of arbitrators shall immediately succeed to and become vested with all the powers and duties of the board of arbitrators now acting under the provisions of the act of which this act is a supplement.

4. And be it enacted, That after the expiration of the terms of office of the persons named in this supplement, the governor shall appoint, by and with the advice and consent of the senate, their successors for the length of term and at the salary named in the first section of this supplement.

5. And be it enacted, That this act shall take effect immediately.

Approved March 25, 1895.

---

OHIO.

An act to provide for a state board of arbitration for the settlement of differences between employers and their employes.

Section 1. Be it enacted by the general assembly of the state of Ohio, that within thirty days after the passage of this act, the governor of the state, with the advice and consent of the senate, shall appoint three competent persons to serve as a state board of arbitration and conciliation, in the manner herein-after provided. One of them shall be an employer, or selected from some association representing employers of labor; one of

---

*Arbitration Laws.*

---

them shall be selected from some labor organization and not an employer of labor, and the third shall be appointed upon recommendation of the other two; provided, however, that if the two appointed do not agree on the third man at the expiration of thirty days, he shall be appointed by the governor; and provided, also, that appointments made when the senate is not in session, may be confirmed at the next ensuing session.

Section 2. One shall be appointed for one year, one for two years, and one for three years, and all appointments thereafter shall be for three years or until their respective successors are appointed, in the manner above provided. If, for any reason, a vacancy occurs at any time, the governor shall, in the same manner, appoint some person to serve out the unexpired term, and he may remove any member of said board.

Section 3. Each member of said board shall, before entering upon the duties of his office, be sworn to a faithful discharge thereof. They shall organize at once by the choice of one of their number as chairman, and one of their number as secretary. The board shall, as soon as possible after its organization, establish such rules of procedure as shall be approved by the governor.

Section 4. Whenever any controversy or difference not involving questions which may be the subject of a suit or action in any court of the state exists between an employer, whether an individual, copartnership or corporation, and his employes, if at the time he employs not less than twenty-five persons in the same general line of business in this state, the board shall, upon application as hereinafter provided, and as soon as practical thereafter, visit the locality of the dispute and make careful inquiry into the cause thereof, hear all persons interested therein who may come or be subpoenaed before them, advise the respective parties what, if anything, ought to be done or submitted to by either or both to adjust said dispute. The term employer in this act includes several employers co-operating with respect to any such controversy or difference, and the term employes includes aggregations of employes of several employers so co-operating. And when any strike or lockout extends to several counties, the expenses incurred under this act not payable out of the state treasury shall be apportioned among and paid by such counties as said board may deem equitable and may direct.

---

*Arbitration Laws.*

---

Section 5. Such mediation having failed to bring about an adjustment of the said differences, the board shall immediately make out a written decision thereon. This decision shall at once be made public, shall be recorded upon proper books of record to be kept by the secretary of said board, and a short statement thereof published in the annual report hereinafter provided for, and the said board shall cause a copy thereof to be filed with the clerk of the city or county where said business is carried on.

Section 6. Said application for arbitration and conciliation to said board can be made by either or both parties to the controversy; and shall be signed in the respective instances by said employer or by a majority of his employes in the department of the business in which the controversy or difference exists, or the duly authorized agent of either or both parties. When an application is signed by an agent claiming to represent a majority of such employes, the board shall satisfy itself that such agent is duly authorized in writing to represent such employes, but the names of the employes giving such authority shall be kept secret by said board.

Section 7. Said application shall contain a concise statement of the grievances complained of, and a promise to continue on in business or at work in the same manner as at the time of application, without any lockout or strike, until the decision of said board, if it shall be made within ten days of the date of filing said application; provided, a joint application may contain a stipulation that the decision of the board under such joint application shall be binding upon the parties to the extent so stipulated, and such decision to such extent may be made and enforced as a rule of court in the court of common pleas of the county from which such joint application comes, as upon a statutory award.

Section 8. As soon as may be after the receipt of said application, the secretary of said board shall cause public notice to be given of the time and place for the hearing therein, but public notice need not be given when both parties to the controversy join in the application and present therewith a written request that no public notice be given. When such request is made, notice shall be given to the parties interested in such manner as the board may order, and the board may, at any stage of the proceedings, cause public notice to be given, notwithstanding

---

*Arbitration Laws.*

---

such request. Should the petitioner or petitioners fail to perform the promise made in said application, the board shall proceed no further therein without the written consent of the adverse party.

Section 9. The board shall have power to summon as witnesses any operative in the departments of business affected, or other persons shown by affidavit on belief or otherwise, to have knowledge of the matters in controversy or dispute, and any person who keeps the records of wages earned in such departments, and examine them under oath, and to require the production of books or papers containing the record of wages earned or paid. Subpoenas may be signed and oaths administered by any member of the board. A subpoena or any notice may be delivered or sent to any sheriff, constable or police officer, who shall forthwith serve or post the same, as the case may be, and make due return thereof according to directions, and for such service he shall receive the fees allowed by law in similar cases, payable from the treasurer of the county wherein the controversy to be arbitrated exists, upon the warrant of the county auditor, issued on the certificate of the board that such fees are correct and due. And the board shall have the same power and authority to maintain and enforce order at its hearings and obedience to its writs of subpoena as by law conferred on the court of common pleas for like purposes.

Section 10. The parties to any controversy or difference, as described in section four of this act, may submit the matters in dispute, in writing, to a local board of arbitration and conciliation; such board may either be mutually agreed upon, or the employer may designate one of the arbitrators, the employes or their duly authorized agent another, and the two arbitrators so designated may choose a third, who shall be chairman of the board.

Section 11. Such local board of arbitration shall, in respect to the matters referred to it, have and exercise all the powers which the state board might have and exercise, and its decision shall have whatever binding effect may be agreed by the parties to the controversy in the written submission. The jurisdiction of such local board shall be exclusive in respect to the matters submitted to it, but it may ask and receive the advice and assistance of the state board. The decision of said board shall be rendered within ten days of the close of any hearing

---

*Arbitration Laws.*

---

held by it; such decision shall at once be filed with the clerk of the city or county in which the controversy or difference arose, and a copy thereof shall be forwarded to the state board.

Section 12. Each of such arbitrators of such local board shall be entitled to receive from the treasury of the city or county in which the controversy or difference that is the subject of the arbitration exists, if such payment is approved in writing by the city council or the administrative board of such city or board of county commissioners of such county, the sum of three dollars for each day of actual service, not exceeding ten days for any one arbitration.

Section 13. Whenever it is made to appear to the mayor or probate judge in this state that a strike or lockout is seriously threatened, or has actually occurred in his vicinity, he shall at once notify the state board of the fact, giving the name and location of the employer, the nature of the trouble, and the number of employes involved, so far as his information will enable him to do so. Whenever it shall come to the knowledge of the state board, either by such notice or otherwise, that a strike or lockout is seriously threatened, or has actually occurred in this state, involving an employer and his present or past employes, if at the time he is employing, or up to the occurrence of the strike or lockout was employing not less than twenty-five persons in the same general line of business in any city or county in the state, it shall be the duty of the state board to put itself in communication as soon as may be with such employer and employes.

Section 14. It shall be the duty of the state board in the above described cases to endeavor, by mediation or conciliation, to effect an amicable settlement between them, or if that seems impracticable, to endeavor to persuade them to submit the matters in dispute to a local board of arbitration and conciliation, as above provided, or to the state board; and said board may, if it deem it advisable, investigate the cause or causes of such controversy and ascertain which party thereto is mainly responsible or blameworthy for the existence or continuance of the same, and may make and publish a report finding such cause or causes, and assigning such responsibility or blame. The board shall have the same powers for the foregoing purposes as are given it by section nine of this act; provided, if neither a settlement nor an arbitration be had because of the opposition

*Arbitration Laws.*

---

thereto of one party to the controversy, such investigation and publication shall, at the request of the other party, be had. And the expense of any publication under this act shall be certified and paid as provided therein for payment of fees.

Section 15. Witnesses summoned by the state board shall be allowed the sum of fifty cents for each attendance, and the further sum of twenty-five cents for each hour of attendance in excess of two hours, and shall be allowed five cents a mile for travel each way from their respective places of employment or business to the place where the board is in session. Each witness shall state in writing the amount of his travel and attendance, and said state board shall certify the amount due each witness to the auditor of the county in which the controversy or difference exists, who shall issue his warrant upon the treasury of said county for the said amount.

Section 16. The said state board shall make a yearly report to the governor and legislature, and shall include therein such statements, facts and explanations as will disclose the actual workings of the board, and such suggestions as to legislation as may seem to the members of the board conducive to the friendly relations of, and to the speedy and satisfactory adjustment of disputes between employers and employes.

Section 17. The members of the State Board of Arbitration and Conciliation hereby created shall each be paid five dollars a day for each day of actual service, and their necessary traveling and other expenses. The chairman of the board shall, quarterly, certify the amount due each member, and on presentation of his certificate the auditor of the state shall draw his warrant on the treasury of the state for the amount. When the state board meets at the capitol of the state, the adjutant-general shall provide rooms suitable for such meeting.

Section 18. That an act entitled "An act to authorize the creation and to provide for the operation of tribunals of voluntary arbitration to adjust industrial disputes between employers and employes," of the revised statutes of the state, passed February tenth, eighteen hundred and eighty-five, is hereby repealed.

Section 19. This act shall take effect and be in force from and after its passage.

## CALIFORNIA.

An act to provide for a State Board of Arbitration for the settlement of differences between employers and employes, to define the duties of said board, and to appropriate the sum of twenty-five hundred dollars therefor.

Section 1. On or before the first day of May of each year, the governor of the state shall appoint three competent persons to serve as a State Board of Arbitration and Conciliation. One shall represent the employers of labor, one shall represent labor employes, and the third member shall represent neither, and shall be chairman of the board. They shall hold office for one year and until their successors are appointed and qualified. If a vacancy occurs, as soon as possible thereafter the governor shall appoint some one to serve the unexpired terms; provided, however, that when the parties to any controversy or difference, as provided in section two of this act, do not desire to submit their controversy to the state board, they may by agreement each choose one person, and the two shall choose a third, who shall be chairman and umpire, and the three shall constitute a board of arbitration and conciliation for the special controversy submitted to it, and for that purpose have the same powers as the state board. The members of the said board or boards, before entering upon the duties of their office, shall be sworn to faithfully discharge the duties thereof. They shall adopt such rules of procedure as they may deem best to carry out the provisions of this act.

Section 2. Whenever any controversy or difference exists between an employer, whether an individual, copartnership, or corporation, which, if not arbitrated, would involve a strike or lockout, and his employes, the board shall, upon application, as hereinafter provided, and as soon as practicable thereafter, visit, if necessary, the locality of the dispute and make careful inquiry into the cause thereof, hear all persons interested therein who may come before them, advise the respective parties what, if anything, ought to be done or submitted to by either, or both, to adjust said dispute, and make a written decision thereof. This decision shall at once be made public, and shall be recorded upon proper books of record to be kept by the board.

Section 3. Said application shall be signed by said em-

---

*Arbitration Laws.*

---

ployer, or by a majority of his employes in the department of the business in which the controversy or difference exists or their duly authorized agent, or by both partes, and shall contain a concise statement of the grievances complained of, and a promise to continue on in the business or at work, without any lockout or strike, until the decision of said board, which must, if possible, be made within three weeks of the date of filing the application. Immediately upon the receipt of said application, the chairman of said board shall cause public notice to be given of the time and place for hearing. Should the petitioners fail to keep the promise made therein, the board shall proceed no further thereupon without the written consent of the adverse party. And the party violating the contract shall pay the extra cost of the board entailed thereby. The board may then reopen the case and proceed to the final arbitration thereof as provided in section two hereof.

Section 4. The decision rendered by the board shall be binding upon the parties who join in the application for six months, or until either party has given the other written notice of his intention not to be further bound by the conditions thereof after the expiration of sixty days or any time agreed as a part of the decision. Said notice may be given to the employes by posting a notice thereof in three conspicuous places in the shop or factory where they work.

Section 5. Both employers and employes shall have the right at any time to submit to the board complaints of grievances and ask for an investigation thereof. The board shall decide whether the complaint is entitled to a public investigation, and if they decide in the affirmative, they shall proceed to hear the testimony, after giving notice to all parties concerned, and publish the result of their investigations as soon as possible thereafter.

Section 6. The arbitrators hereby created shall be paid five dollars per day for each day of actual service, and also their necessary traveling and other expenses incident to the duties of their office shall be paid out of the state treasury; but the expenses and salaries hereby authorized shall not exceed the sum of twenty-five hundred dollars for the two years

Section 7. The sum of twenty-five hundred dollars is hereby appropriated out of any money in the state treasury not otherwise appropriated, for the expenses of the board for the first two years after its organization.

---

*Arbitration Laws.*

---

Section 8. This act shall take effect and be in force from and after its passage.

Approved March 10, 1891.

---

## LOUISIANA.

An Act to provide for a State Board of Arbitration for the settlement of differences between employers and employes.

Section 1. Be it enacted by the general assembly of the state of Louisiana, that within thirty days after the passage of this act, the governor of the state, with the advice and consent of the senate, shall appoint five competent persons to serve as a board of arbitration and conciliation in the manner hereinafter provided. Two of them shall be employers, selected or recommended by some association or board representing employers of labor; two of them shall be employes, selected or recommended by the various labor organizations, and not an employer of labor, and the fifth shall be appointed upon the recommendation of the other four; provided, however, that if the four appointed do not agree on a fifth man at the expiration of thirty days, he shall be appointed by the governor; provided, also, that if the employers or employes fail to make their recommendation as herein provided within thirty days, then the governor shall make said appointments in accordance with the spirit and intent of this act. Said appointments, if made when the senate is not in session, may be confirmed at the next ensuing session.

Section 2. Two shall be appointed for two years, two for three years, and one, the fifth member, for four years, and all appointments thereafter shall be for four years, or until their successors are appointed in the manner above provided. If, for any reason, a vacancy occurs at any time, the governor shall in the same manner appoint some person to serve out the unexpired term.

Section 3. Each member of said board shall, before entering upon the duties of his office, be sworn to the faithful discharge thereof. They shall organize at once by the choice of one of their number as chairman and one of their number as secretary. The board shall, as soon as possible after its organization, establish rules of procedure.

---

*Arbitration Laws.*

---

Section 4. Whenever any controversy or difference not involving questions which may be the subject of a suit or action in any court of the state exists between an employer, whether an individual, copartnership or corporation, and his employes, if at the time he employs not less than twenty persons in the same general line of business in any city or parish of this state, the board shall, upon application as hereinafter provided, and as soon as practicable thereafter, visit the locality of the dispute and make careful inquiry into the cause thereof, hear all persons interested therein who may come before them and advise the respective parties what, if any thing, ought to be done or submitted to by either or both to adjust said dispute.

Section 5. Such mediation having failed to bring about an adjustment of the said differences, the board shall immediately make out a written report. This decision shall at once be made public, shall be recorded upon proper books of record, to be kept by the secretary of said board, and a short statement thereof published in the annual report hereinafter provided for, and the said board shall cause a copy thereof to be filed with the clerk of the court of the city or parish where said business is carried on.

Section 6. Said application for arbitration and conciliation to said board can be made by either or both parties to the controversy, and shall be signed in the respective instances by said employer or by a majority of the employes in the department of the business in which the controversy or difference exists, or the duly authorized agent of either or both parties. When an application is signed by an agent claiming to represent a majority of such employes, the board shall satisfy itself that such agent is duly authorized in writing to represent such employes, but the names of the employes giving authority shall be kept secret by said board.

Section 7. Said application shall contain a concise statement of the grievances complained of, and a promise to continue on in business or at work in the same manner as at the time of the application without any lockout or strike until the decision of said board, if it shall be made within ten days of the date of filing said application.

Section 8. As soon as may be after the receipt of said application the secretary of said board shall cause public notice to be given of the time and place for the hearing therein, but

---

*Arbitration Laws.*

---

public notice need not be given when both parties join in the application and present therewith a written request that no public notice be given. When such request is made notice shall be given to parties interested in such manner as the board may order, and the board may, at any stage of the proceedings, cause public notice to be given, notwithstanding such request. Should the petitioner or petitioners fail to perform the promise made in said application the board shall proceed no further therein until said petitioner or petitioners have complied with every order and requirement of the board.

Section 9. The board shall have power to summon as witnesses any operative in the department of the business affected, and any person who keeps the records of wages earned in those departments, and examine them under oath, and to require the production of books and papers containing the record of wages earned or paid. Summons may be signed and oaths administered by any member of the board. The board shall have the right to compel the attendance of witnesses or the production of papers.

Section 10. Whenever it is made to appear to the mayor of a city or the judge of any district court in any parish, other than the parish of Orleans, that a strike or a lockout is seriously threatened or actually occurs, the mayor of such city or judge of the district court of such parish shall at once notify the state board of the fact. Whenever it shall come to the knowledge of the state board, either by the notice of the mayor of the city or the judge of the district court of the parish, as provided in the preceding part of this section, or otherwise, that a lockout or strike is seriously threatened, or has actually occurred, in any city or parish of this state, involving an employer and his present or past employes, if at the time he is employing, or up to the occurrence of a strike or lockout was employing not less than twenty persons in the same general line of business in any city or parish in the state, it shall be the duty of the state board to put itself in communication as soon as may be with such employer and employes.

Section 11. It shall be the duty of the state board in the above-described cases to endeavor, by mediation or conciliation, to effect an amicable settlement between them, and to endeavor to persuade them, provided a strike or lockout has not actually occurred or is not then continuing, to submit the

---

*Arbitration Laws.*

---

matters in dispute to the State Board of Arbitration and Conciliation; and the state board shall, whether the same be mutually submitted to them or not, investigate the cause or causes of such controversy, and ascertain which party thereto is mainly responsible or blameworthy for the existence or continuance of the same, and shall make and publish a report finding such cause or causes and assigning such responsibility or blame. The board shall have the same powers for the foregoing purposes as are given it by section nine of this act.

Section 12. The state board shall make a biennial report to the governor and legislature, and shall include therein such statements, facts and explanations as will disclose the actual workings of the board, and such suggestions as to legislation as may seem to the members of the board conducive to harmonizing the relations of and disputes between employers and employes.

Section 13. The members of said State Board of Arbitration and Conciliation, hereby created, shall each be paid five dollars a day for each day of actual service, and their necessary traveling and other expenses. The chairman of the board shall quarterly certify the amount due each member, and, on presentation of his certificate, the auditor of the state shall draw his warrant on the treasury of the state for the amount.

Section 14. This act shall take effect and be in force from and after its passage.

Approved July 1, 1894.

---

CONNECTICUT.

An Act Concerning a State Board of Arbitration and Mediation.

Section 1. During each biennial session of the general assembly, the governor shall, with the advice and consent of the senate, appoint a State Board of Mediation and Arbitration, to consist of three competent persons, each of whom shall hold his office for the term of two years. One of said persons shall be selected from the party which at the last general election cast the greatest number of votes for governor of this state, one of said persons shall be selected from the party which at the last general election cast the next greatest number of votes

---

*Arbitration Laws.*

---

for governor of this state, and the other of said persons shall be selected from a bona fide labor organization of this state. Said board shall select one of its number to act as clerk or secretary, whose duty it shall be to keep a full and faithful record of the proceedings of the board, and also to keep and preserve all documents and testimony submitted to said board; he shall have power, under the direction of the board, to issue subpoenas, and to administer oaths in all cases before said board, and to call for and examine the books, papers and documents of the parties to such cases. Said arbitrators shall take and subscribe to the constitutional oath of office before entering upon the discharge of their duties.

Section 2. Whenever any grievance or dispute of any nature shall arise between any employer and his employes, it shall be lawful for the parties to submit the same directly to the State Board of Mediation and Arbitration, in case such parties elect to do so, and shall notify said board, or its clerk, in writing, of such election. Whenever such notification to said board or its clerk is given, it shall be the duty of said board to proceed, with as little delay as possible, to the locality of such grievance or dispute, and inquire into the cause or causes of the grievance or dispute. The parties to the grievance or dispute shall thereupon submit to said board, in writing, succinctly, clearly and in detail, their grievances and complaints, and the cause or causes thereof, and severally promise and agree to continue in business, or at work, without a strike or lockout, until the decision of said board is rendered; provided, it shall be rendered within ten days after the completion of the investigation. The board shall thereupon proceed fully to investigate and inquire into the matters in controversy, and to take testimony under oath in relation thereto, and shall have power, by its chairman or clerk, to administer oaths, to issue subpoenas for the attendance of witnesses, and the production of books and papers.

Section 3. After a matter has been fully heard, the said board, or a majority of its members, shall, within ten days, render a decision thereon in writing, signed by the members of the board, or a majority of them, stating such details as will clearly show the nature of the decision and the points disposed of by said board. The decision shall be in triplicate, one copy of which shall be filed by the clerk of the board in

---

*Arbitration Laws.*

---

the office of the town or city clerk in the town where the controversy arose, and one copy shall be served on each of the parties to the controversy.

Section 4. Whenever a strike or lockout shall occur, or is seriously threatened in any part of the state, and shall come to the knowledge of the board, it shall be its duty, and it is hereby directed to proceed, as soon as practicable, to the locality of such strike or lockout and to put itself in communication with the parties to the controversy, and endeavor by mediation to effect an amicable settlement of such strike or lockout; and if in the judgment of said board it is best it shall inquire into the cause or causes of the controversy, and to that end the board is hereby authorized to subpoena witnesses, and send for persons and papers.

Section 5. Said board shall, on or before the first day of December in each year, make a report to the governor, and shall include therein such statements, facts and explanations as will disclose the actual working of the board, and such suggestions as to legislation as may seem to it conducive to harmony in the relations between employers and employed, and to the improvement of the present system of production.

Section 6. Whenever the term "employer" or "employers" is used in this act it shall be held to include "firm," "joint-stock association," "company" or "corporation," as fully as if each of the last named terms was expressed in each place.

Section 7. The members of the board shall receive as compensation for actual services rendered under this act the sum of five dollars per day and expenses, upon presentation of their voucher to the comptroller, approved by the governor.

Section 8. This act shall take effect from its passage.

---

MINNESOTA.

An act to provide for the settlement of differences between employers and employes, and to authorize the creation of boards of arbitration and conciliation, and to appropriate money for the maintenance thereof.

Section 1. That within thirty days after the passage of this act the governor shall, by and with the advice and consent of the senate, appoint a state board of arbitration and concilia-

---

*Arbitration Laws.*

---

tion, consisting of three competent persons, who shall hold office until their successors are appointed. On the first Monday in January, eighteen hundred and ninety-seven, and thereafter, biennially, the governor, by and with advice and consent, shall appoint said board, which shall be constituted as follows: One of them shall be an employer of labor, one of them shall be a member selected from some bona fide trade union and not an employer of labor, and who may be chosen from a list submitted by one or more trade and labor assemblies in the state and the third shall be appointed upon the recommendation of the other two as hereinafter provided and shall be neither an employe or an employer of skilled labor; provided, however, that if the two first appointed do not agree in nominating one or more persons to act as the third member before the expiration of ten days, the appointment shall then be made by the governor without such recommendation. Should a vacancy occur at any time, the governor shall in the same manner appoint someone having the same qualifications to serve out the unexpired term, and he may also remove any member of said board.

Section 2. The said board shall as soon as possible after their appointment, organize by electing one of their members as president and another as secretary, and establish, subject to the approval of the governor, such rules of procedure as may seem advisable.

Section 3. That whenever any controversy or difference arises relating to the conditions of employment or rates of wages between an employer, whether an individual, a copartnership or corporation, and whether resident or non-resident, and his or their employes, if at any time he or it employs not less than ten persons in the same general line of business in any city or town in this state, the board shall, upon application, as hereinafter provided, as soon as practicable thereafter, visit the locality of the dispute and make a careful inquiry into the causes thereof, hear all persons interested therein who may come before them, advise the respective parties what, if anything, ought to be submitted to by either or both to adjust said dispute, and within ten days after said inquiry make a written decision thereon. This decision shall at once be made public and a short statement thereof published in a biennial report hereinafter provided for, and the said board shall also cause

---

*Arbitration Laws.*

---

a copy of said decision to be filed with the clerk of the district court of the county where said business is carried on.

Section 4. That said application shall be signed by said employer or by a majority of his employes in the department of the business in which the controversy or difference exists, or their duly authorized agent, or by both parties, and shall contain a concise statement of the grievance alleged, and shall be verified by at least one of the signers. When an application is signed by an agent claiming to represent a majority of such employes, the board shall, before proceeding further, satisfy itself that such agent is duly authorized in writing to represent such employes, but the names of the employes giving such authority shall be kept secret by said board. Within three days after the receipt of said application the secretary of said board shall cause public notice to be given of the time and place where said hearing shall be held. But public notice need not be given when both parties to the controversy join in the application and present therewith a written request that no public notice be given. When such request is made notice shall be given to the parties interested in such manner as the board may order; and the board may at any stage of the proceedings cause public notice to be given, notwithstanding such request.

Section 5. The said board shall have power to summon as witnesses any clerk, agent or employe in the departments of the business who keeps the record of wages earned in those departments, and require the production of books containing the records of wages paid. Summons may be signed and oaths administered by any member of the board. Witnesses summoned before the board shall be paid by the board the same witness fees as witnesses before a district court.

Section 6. That upon the receipt of an application, after notice has been given as aforesaid, the board shall proceed as before provided, and render a written decision which shall be open to public inspection, and shall be recorded upon the records of the board and published at the discretion of the same in a biennial report which shall be made to the legislature on or before the first Monday in January of each year in which the legislature is in regular session.

Section 7. In all cases where the application is mutual, the decision shall provide that the same shall be binding upon the parties concerned in said controversy or dispute for six months,

---

*Arbitration Laws.*

---

or until sixty days after either party has given the other notice in writing of his or their intention not to be bound by the same. Such notice may be given to said employes by posting the same in three conspicuous places in the shop, factory or place of employment.

Section 8. Whenever it shall come to the knowledge of said board, either by notice from the mayor of a city, the county commissioners, the president of a chamber of commerce or other representative body, the president of the central labor council or assembly, or any five reputable citizens, or otherwise, that what is commonly known as a strike or lockout is seriously threatened or has actually occurred, in any city or town of the state, involving an employer and his or its present or past employes, if at the time such employer is employing, or up to the occurrence of the strike or lockout was employing, not less than ten persons in the same general line of business in any city or town in this state, and said board shall be satisfied that such information is correct, it shall be the duty of said board, within three days thereafter to put themselves in communication with such employer and employes and endeavor by mediation to effect an amicable settlement between them or to persuade them to submit the matter in dispute to a local board of arbitration and conciliation, as hereinafter provided, or to said state board, and the said state board may investigate the cause or causes of such controversy and ascertain which party thereto is mainly responsible for the continuance of the same, and may make and publish a report assigning such responsibility. The said board shall have the same powers for the foregoing purposes as are given them by sections three and four of this act.

Section 9. The parties in any controversy or difference, as specified in this act shall submit the matter in dispute in writing to a local board of arbitration and conciliation; such board may either be mutually agreed upon, or the employer may designate one of the arbiters, the employes or their duly authorized agent another, and the two arbiters so designated may choose a third, who shall also be the chairman of the board. Each arbiter so selected shall sign a contract to act as such, and shall take an oath before an officer authorized to administer oaths to faithfully and impartially discharge his duty as such arbiter, which consent and oath shall be filed in the office of the

---

*Arbitration Laws.*

---

district court of the county where such dispute arises. Such board shall, in respect to the matters submitted to them, have and exercise all the powers which the state board might have and exercise, and their decisions shall have whatever binding effect may be agreed to by the parties to the controversy in the written submission. Vacancies in such local boards may be filled in the same manner as the regular appointments are made. It shall be the duty of said state board to aid and assist in the formation of such local boards throughout the state in advance of any strike or lockout, whenever and wherever in their judgment the formation of such local boards will have a tendency to prevent or allay the occurrence thereof. The jurisdiction of such local boards shall be exclusive in respect to the matters submitted to them; but they may ask and receive the advice and assistance of the state board. The decisions of such local boards shall be rendered within ten days after the close of any hearing held before them; such decision shall at once be filed with the clerk of the district court of the county in which such controversy arose, and a copy thereof shall be forwarded to the state board.

Section 10. Each member of said state board shall receive as compensation five dollars a day, including mileage, for each and every day actually employed in the performance of the duties provided for by this act; such compensation shall be paid by the state treasurer on duly detailed vouchers approved by said board and by the governor.

Section 11. The said board in their biennial reports to the legislature, shall include such statements, facts and explanations as will disclose the actual workings of the board, and such suggestions with regard to legislation as may seem to them conducive to harmonizing the relations of and the dispute between employers and employes; and the improvement of the present relations between labor and capital. Such biennial reports of the board shall be printed in the same manner and under the same regulations as the reports of the executive officers of the state.

Section 12. There is hereby annually appropriated out of any money in the state treasury not otherwise appropriated the sum of two thousand dollars or so much thereof as may be necessary for the purpose of carrying out the provisions of this act.

---

*Arbitration Laws.*

---

Section 13. All acts and parts of acts inconsistent with this act are hereby repealed.

Section 14. This act shall take effect and be in force from and after its passage.

Approved April 25, 1895.

---

ILLINOIS.

An act to create a state board of arbitration for the investigation or settlement of differences between employers and their employes, and to define the powers and duties of said board.

Section 1. As soon as this act shall take effect the governor, by and with advice and consent of the senate, shall appoint three persons, not more than two of whom shall belong to the same political party, who shall be styled a state "board of arbitration," to serve as a state board of arbitration and conciliation; one and only one of whom shall be an employer of labor and one and only one of whom shall be an employe and shall be selected from some labor organization. They shall hold office until March 1st, eighteen hundred and ninety-seven, or until their successors are appointed, but said board shall have no power to act as such until they and each of them are confirmed by the senate. On the first day of March, eighteen hundred and ninety-seven, the governor, with the advice and consent of the senate, shall appoint three persons as members of said board in the manner above provided, one to serve for one year, one for two years, and one for three years, or until their respective successors are appointed, and on the first day of March in each year thereafter the governor shall in the same manner appoint one member of said board to succeed the member whose term expires, and to serve the term of three years or until his successor is appointed. If a vacancy occurs at any time, the governor shall in the same manner appoint some one to serve out the unexpired term. Each member of said board shall, before entering upon the duties of his office, be sworn to a faithful discharge thereof. The board shall at once organize by the choice of one of their number as chairman and they shall, as soon as possible after such organization, establish suitable rules of procedure. The board shall have power to select and remove a secretary, who shall be a stenographer, and

---

*Arbitration Laws.*

---

who shall receive a salary to be fixed by the board, not to exceed twelve hundred dollars per annum and his necessary traveling expenses, on bills of items to be approved by the board, to be paid out of the state treasury.

Section 2. When any controversy or difference not involving questions which may be the subject of an action at law or bill in equity, exists between an employer, whether an individual, copartnership or corporation, employing not less than twenty-five persons, and his employes in this state, the board shall, upon application as herein provided, and as soon as practicable thereafter, visit the locality of the dispute and make a careful inquiry into the cause thereof, hear all persons interested therein who may come before them, advise the respective parties, what, if anything, ought to be done or submitted to by both to adjust said dispute, and make a written decision thereof. This decision shall at once be made public, shall be recorded upon the proper books of record to be kept by the secretary of said board, and a short statement thereof published in the annual report hereinafter provided for, and the board shall cause a copy thereof to be filed with the clerk of the city, town or village where said business is carried on.

Section 3. Said application shall be signed by said employer or by a majority of his employes in the department of the business in which the controversy or difference exists, or by both parties, and shall contain a concise statement of the grievances complained of and a promise to continue on in business or at work without any lockout or strike until the decision of said board, if it shall be made within three weeks of the date of the filing said application. As soon as may be after the receipt of said application, the secretary of said board shall cause public notice to be given of the time and place for the hearing thereon, but public notice need not be given when both parties to the controversy join in the application and present therewith a written request that no public notice be given. When such request is made, notice shall be given to the parties interested in such manner as the board may order, and the board may, at any stage of the proceedings, cause public notice to be given notwithstanding such request. The board shall have the power to summon as witnesses any operative or expert in the departments of business affected and any person who keeps the records of wages earned

---

*Arbitration Laws.*

---

in those departments, or any other person, and to examine them under oath, and to require the production of books containing the record of wages paid. The board shall have power to issue subpoenas, and oaths may be administered by the chairman of the board.

Section 4. Upon the receipt of such application, and after such notice, the board shall proceed as before provided, and render a written decision, which shall be open to public inspection, shall be recorded upon the records of the board and published at the discretion of the same in an annual report to be made to the governor before the first day of March in each year.

Section 5. Said decision shall be binding upon the parties who join in said application for six months or until either party has given the other notice in writing of his or their intention not to be bound by the same at the expiration of sixty days therefrom. Said notice may be given to said employes by posting in three conspicuous places in the shop or factory where they work.

Section 6. Whenever it shall come to the knowledge of the state board that a strike or lockout is seriously threatened in the state, involving an employer and his employes, if he is employing not less than twenty-five persons, it shall be the duty of the state board to put itself in communication as soon as may be with such employer or employes, and endeavor by mediation to effect an amicable settlement between them, or to endeavor to persuade them to submit the matters in dispute to the state board.

Section 7. The members of the said board shall each receive a salary of one thousand five hundred dollars a year and necessary traveling expenses, to be paid out of the treasury of the state, upon bills of particulars approved by the governor.

Section 8. Any notice or process issued by the state board of arbitration shall be served by any sheriff, coroner or constable to whom the same may be directed or in whose hands the same may be placed for service.

Section 9. Whereas an emergency exists, therefore it is enacted that this act shall be in force from and after its passage.

Approved August 2, 1895. Special session.

## MONTANA.

There was a law in Montana, approved February 28, 1887, entitled "An act to provide for a territorial board of arbitration for the settlement of differences between employers and employees." The legislative assembly of the territory, on March 14, 1889, created a commission to codify laws and procedure, and to revise, simplify and consolidate statutes; and Montana became a state on November 8 of the same year.

The following is the law relating to arbitration of industrial disputes, as it appears in "The Codes and Statutes of Montana in force July 1, 1895:

## THE POLITICAL CODE.

## (Part III, Title VII, Chapter XIX.)

Section 3330. There is a state board of arbitration and conciliation, consisting of three members whose term of office is two years and until their successors are appointed and qualified. The board must be appointed by the governor, with the advice and consent of the senate. If a vacancy occurs at any time the governor shall appoint some one to serve out the unexpired term, and he may in like manner remove any member of said board. (Section 3330. Act approved March 15, 1895.)

Section 3331. One of the board must be an employer, or selected from some association representing employers of labor; and one of them must be a laborer, or selected from some labor organization, and not an employer of labor, and the other must be a disinterested citizen.

Section 3332. The members of the board must, before entering upon the duties of their office, take oath required by the constitution. They shall at once organize by the choice of one of their number as a chairman. Said board may appoint and remove a clerk of the board, who shall receive such compensation as may be allowed by the board, but not exceeding five dollars per day for the time employed. The board shall, as soon as possible after its organization, establish such rules or modes of procedure as are necessary, subject to the approval of the governor. (Section 3332. Act approved March 15, 1895.)

---

*Arbitration Laws.*

---

Section 3333. Whenever any controversy or dispute, not involving questions which may be the subject of a civil action, exists between an employer (if he employs twenty or more in the same general line of business in the state) and his employes, the board must, on application, as hereinafter provided, visit the locality of the dispute and make inquiry into the cause thereof, hear all persons interested therein who may come before them, advise the respective parties what, if anything, ought to be done, by either or both, to adjust said dispute, and the board must make a written decision thereon. The decision must at once be made public, and must be recorded in a book kept by the clerk of the board, and a statement thereof published in the annual report and the board must cause a copy thereof to be filed with the clerk of the county where the dispute arose.

Section 3334. The application of the board of arbitration and conciliation must be signed by the employer, or by a majority of his employes in the department of the business in which the controversy or difference exists, or their duly authorized agent, or by both parties, and shall contain a concise statement of the grievances complained of, and a promise to continue on in business or at work without any lockout or strike until the decision of said board, if it shall be made within four weeks of the date of filing said application. When an application is signed by an agent claiming to represent a majority of such employes, the board shall satisfy itself that such agent is duly authorized in writing to represent such employes, but the names of the employes giving such authority shall be kept secret by said board; as soon as may be after the receipts of said application the secretary of said board shall cause public notice to be given of the time and place of the hearing thereon; but public notice need not be given when both parties to the controversy join in the application and present therewith a written request that no public notice be given; when such request is made notice shall be given to the parties interested in such manner as the board may order; and the board may, at any stage of the proceedings, cause public notice to be given, notwithstanding such request. When notice has been given as aforesaid, each of the parties to the controversy, the employer on one side and the employes interested on the other side, may in writing nominate, and the board may appoint one

---

*Arbitration Laws.*

---

person to act in the case as expert assistant to the board. The two persons so appointed shall be skilled in and conversant with the business or trade concerning which the dispute has arisen. It shall be their duty under the direction of the board, to obtain and report to the board information concerning the wages paid, the hours of labor and the methods and grades of work prevailing in manufacturing establishments, or other industries or occupations within the state of a character similar to that in which the matters in dispute have arisen. Said expert assistants shall be sworn to the faithful discharge of their duty; such oath to be administered by any member of the board, and a record thereof shall be preserved with the record of the proceedings in the case. They shall be entitled to receive from the treasury of the state such compensation as shall be allowed and certified by the board, not exceeding ——— dollars per day, together with all necessary traveling expenses. Nothing in this act shall be construed to prevent the board from appointing such other additional expert assistant or assistants as it may deem necessary, who shall be paid in like manner. Should the petitioner or petitioners fail to perform the promise made in said application, the board shall proceed no further thereupon without the written consent of the adverse party. The board shall have power to summon as witness any operative or employe in the department of business affected, and any person who keeps the records of wages earned in those departments, and to examine them under oath, and to require the production of books containing the record of wages paid. Summons may be signed and oaths administered by any member of the board. (Section 3334. Act approved March 15, 1895.)

Section 3335. Upon the receipt of such application and after such notice, the board shall proceed as before provided, and render a written decision, which shall be open to public inspection, shall be recorded upon the records of the board, and published at the discretion of the same in an annual report to be made to the governor on or before the first day of December in each year. (Section 3335. Act approved March 15, 1895.)

Section 3336. Any decision made by the board is binding upon the parties who join in the application for six months, or until either party has given the other notice in writing of his intention not to be bound by the same at the expiration of sixty days therefrom. The notice must be given to employes by

---

*Arbitration Laws.*

---

posting the same in three conspicuous places in the shop, office, factory, store, mill, or mine where the employes work.

Section 3337. The parties to any controversy or difference as described in section thirty-three hundred and thirty-three of this code may submit the matters in dispute, in writing, to a local board of arbitration and conciliation; such board may either be mutually agreed upon, or the employer may designate one of the arbitrators, the employes, or their duly authorized agent, another, and the two arbitrators so designated may choose a third, who shall be chairman of the board. Such board shall, in respect to the matters referred to it, have and exercise all the powers which the state board might have and exercise, and its decision shall have whatever binding effect may be agreed by the parties to the controversy in the written submission. The jurisdiction of such board shall be exclusive in respect to the matters submitted to it, but it may ask and receive the advice and assistance of the state board. The decision of such board shall be rendered within ten days of the close of any hearing held by it; such decisions shall at once be filed with the clerk of the county in which the controversy or difference arose, and a copy thereof shall be forwarded to the state board and entered upon its records. Each of such arbitrators shall be entitled to receive from the treasury of the county in which the controversy or difference that is the subject of the arbitration exists, if such payment shall be approved by the commissioners of said county, the sum of three dollars for each day of actual service, not exceeding ten days for any one arbitration. Whenever it is made to appear to the mayor of any city or two commissioners of any county, that a strike or lock-out such as described hereafter in this section is seriously threatened or actually occurs, the mayor of such city, or said commissioners of such county, shall at once notify the state board of the fact. Whenever it shall come to the knowledge of the state board, either by notice from the mayor of a city or two or more commissioners of a county, as provided in this section, or otherwise, that a strike or lockout is seriously threatened or has actually occurred in any city or county of this state, involving an employer and his present or past employes, if at the time he is employing or up to the occurrence of the strike or lockout was employing not less than twenty persons in the same general line of business in any city, town or county in this state, it

---

*Arbitration Laws.*

---

shall be the duty of the state board to put itself in communication as soon as may be with such employer and employes, and endeavor by mediation to effect an amicable settlement between them, or to endeavor to persuade them, providing that a strike or lockout has not actually occurred or is not then continuing, to submit the matters in dispute to a local board of arbitration and conciliation as above provided, or to the state board; and said state board may, if it deems it advisable, investigate the cause or causes of such controversy, and ascertain which party thereto is mainly responsible or blameworthy for the existence or continuance of the same, and may make and publish a report finding such cause or causes, and assigning such responsibility or blame. The board shall have the same powers for the foregoing purposes as are given it by section thirty-three hundred and thirty-three of this code. Witnesses summoned by the state board shall be allowed the sum of fifty cents for each attendance, and the further sum of twenty-five cents for each hour of attendance in excess of two hours, and shall be allowed five cents a mile for travel each way from their respective places of employment or business to the place where the board is in session. Each witness shall certify in writing the amount of his travel and attendance, and the amount due him shall be (see section nine of Massachusetts act and make such provisions as deemed best) certified to the state board of examiners for auditing, and the same shall be paid as other expenses of the state from any moneys in the state treasury. (Section 3337. Act approved March 15, 1895.)

Section 3338. The arbitrators hereby created must be paid five dollars for each day of actual service and their necessary traveling expenses and necessary books of record, to be paid out of the treasury of the state, as by law provided.

---

**COLORADO.**

Section 9 of the law creating the Bureau of Labor Statistics of the state of Colorado makes the following provisions for the settlement of labor disputes:

Section 9. If any difference shall arise between any corporation or person, employing twenty-five or more employes, and such employes, threatening to result or resulting in a strike

---

*Arbitration Laws.*

---

on the part of such employes, or a lockout on the part of such employer, it shall be the duty of the commissioner, when requested so to do by fifteen or more of said employes, or by the employers, to visit the place of such disturbance, and diligently seek to mediate between such employer and employes.

---

IOWA.

An act to authorize the creation and to provide for the operation of tribunals of voluntary arbitration to adjust industrial disputes between employers and employes.

Section 1. That the district court of each county, or a judge thereof in vacation, shall have power, and upon the presentation of a petition or of the agreement hereinafter named, it shall be the duty of said court, or a judge thereof in vacation, to issue, in the form hereinafter named, a license or authority for the establishment within and for each county of tribunals for voluntary arbitration and settlement of disputes between employers and employed in manufacturing, mechanical or mining industries.

Section 2. The said petition or agreement shall be substantially in the form hereinafter given, and the petition shall be signed by at least twenty persons employed as workmen, and by four or more separate firms, individuals or corporations within the county, or by at least four employers, each of whom shall employ at least five workmen, or by the representative of a firm, corporation, or individual employing not less than twenty men in their trade or industry; provided, that at the time the petition is presented the judge before whom such petition is presented, may, upon motion require testimony to be given as to the representative character of said petitioners, and if it appears that said petitioners do not represent the will of a majority, or at least one-half of each party to the dispute, the license for the establishment of said tribunal may be denied, or may make such other order in this behalf as to him shall seem fair to both sides.

Section 3. If the said petition shall be signed by the requisite number of both employers and workmen and be in proper form and contain the names of the people to compose the tri-

---

*Arbitration Laws.*

---

bunal, being an equal number of employers and workmen, the judge shall forthwith cause to be issued a license, substantially in the form hereinafter given, authorizing the existence of such tribunal and fixing the time and place of the first meeting thereof, and an entry of the license so granted shall be made upon the journal of the district court of the county in which the petition originated.

Section 4. Said tribunal shall continue in existence for one year from date of the license creating it, and may take jurisdiction of any dispute between employers and workmen in any mechanical, manufacturing or mining industry or business who shall have petitioned for the tribunal or have been represented in the petition therefor, or who may submit their disputes in writing to such tribunal for decision. Vacancies occurring in the membership of the tribunal shall be filled by the judge or court that licensed said tribunal from three names presented by the members of the tribunal remaining in that class in which the vacancies occur. The removal of any member to an adjoining county shall not cause a vacancy in either the tribunal or post of umpire. Disputes occurring in one county may be referred to a tribunal already existing in an adjoining county. The place of umpire in any of said tribunals, and vacancies occurring in such place, shall only be filled by the mutual choice of the whole of the representatives of both employers and workmen constituting the tribunal immediately upon the organization of the same, and the umpire shall be called upon to act after disagreement is manifested in the tribunal by failure during three meetings held and full discussion had. His award shall be final and conclusive upon such matters as are submitted to him in writing and signed by the whole of the members of the tribunal or by parties submitting the same.

Section 5. The said tribunal shall consist of not less than two employers or their representatives and two workmen or their representatives. The exact number which shall in each case constitute the tribunal shall be inserted in the petition or agreement, and they shall be named in the license issued. The said tribunal when convened, shall be organized by the selection of one of their members as chairman and one as secretary, who shall be chosen by a majority of the members, or, if such majority cannot be had, after two votes, then by secret ballot or by lot, as they prefer.

---

*Arbitration Laws.*

---

Section 6. The members of the tribunal shall receive no compensation for their services from the city or county, but the expenses of the tribunal, other than fuel, light and the use of the room and furniture, may be paid by voluntary subscription, which the tribunal is authorized to receive and expend for such purposes. The sessions of said tribunal shall be held at the county seat of the county where the petition for the same was presented, and a room in the court house, or elsewhere, for the use of said tribunal, shall be provided by the county board of supervisors.

Section 7. When no umpire is acting, the chairman of the tribunal shall have power to administer oaths to all witnesses who may be produced, and a majority of said tribunal may provide for the examination and investigation of books, documents and accounts pertaining to the matter in hearing before the tribunal, and belonging to either party to the dispute; provided, that the tribunal may unanimously direct that, instead of producing books, papers and accounts before the tribunal, an accountant agreed upon by the entire tribunal may be appointed to examine such books, papers and accounts, and such accountant shall be sworn to well and truly examine such books, documents and accounts as may be presented to him, and to report the results of such examination in writing to said tribunal. Before such examination, the information desired and required by the tribunal shall be plainly stated in writing and presented to said accountant, which statement shall be signed by the members of said tribunal or by a majority of each class thereof. Attorneys at law or other agents of either party to the dispute shall not be permitted to appear or take part in any of the proceedings of the tribunal or before the umpire.

Section 8. When the umpire is acting he shall preside, and he shall have all the power of the chairman of the tribunal, and his determination upon all questions of evidence or other questions, in conducting the inquiries there pending, shall be final. Committees of the tribunal, consisting of an equal number of each class, may be constituted to examine into any question in dispute between employers and workmen which may have been referred to said committee by the tribunal, and such committee may hear and settle the same finally, when it can be done by an unanimous vote; and otherwise the same shall be reported to the full tribunal and be there heard, as if the question had

---

*Arbitration Laws.*

---

not been referred. The said tribunal, in connection with the said umpire, shall have power to make or ordain and enforce rules for the government of the body when in session, to enable the business to be proceeded with in order, and to fix its sessions and adjournments, but such rules shall not conflict with this statute nor with any of the provisions of the constitutions and laws of Iowa.

Section 9. Before the umpire shall proceed to act, the question or questions in dispute shall be plainly defined in writing and signed by the members of the tribunal, or a majority thereof of each class, or by the parties submitting the same, and such writing shall contain the submission of the decision thereof to the umpire by name, and shall provide that his decision thereon, after hearing, shall be final. The umpire shall be sworn to impartially decide all questions that may be submitted to him during his term of office. The submission and his award may be made in the form hereinafter given, and said umpire must make his award within ten days from the time the question or questions in the dispute are submitted to him. Said award shall be made to the tribunal, and if the award is for a specific sum of money, said award may be made a matter of record by filing a copy thereof in the district court of the county wherein the tribunal is in session. When so entered of record it shall be final and conclusive, and the proper court may, on motion of any one interested, enter judgment thereon; and when the award is for a specific sum of money, may issue final and other process to enforce the same.

Section 10. The form of the joint petition or agreement praying for a tribunal under this act shall be as follows:

To the district court of \_\_\_\_\_ county (or to a judge thereof, as the case may be):

The subscribers hereto, being the number and having the qualifications required in this proceeding, being desirous of establishing a tribunal of voluntary arbitration for the settlement of disputes in the (here name the branch of industry) trade, and having agreed upon A, B, C, D and E, representing the employes, and G, H, I, J and K, representing the workmen, as members of said tribunal, who each are qualified to act thereon, pray that a license for a tribunal in the \_\_\_\_\_ trade may be issued to said persons named above.

*Arbitration Laws.*

EMPLOYERS.	Names.	Residence.	No. employed.

EMPLOYEES.	Names.	Residence.	By whom employed.

Section 11. The license to be issued upon such petition may be as follows:

STATE OF IOWA. )  
 )ss.  
 \_\_\_\_\_ County, )

Whereas, The joint petition and agreement of four employ-  
 ers (or representatives of a firm, corporation or individual  
 employing twenty men, as the case may be) and twenty work-  
 men have been presented to this court (or if to a judge in vaca-  
 tion so state), praying the creation of a tribunal of voluntary  
 arbitration for the settlement of disputes in the \_\_\_\_\_  
 trade within this county, and naming A, B, C, D and E, rep-  
 resenting the employers, and G, H, I, J and K, representing

---

*Arbitration Laws.*

---

the workmen; now, in pursuance of the statute for such case made and provided, said named persons are hereby licensed and authorized to be and exist as a tribunal of voluntary arbitration for the settlement of disputes between employers and workmen, for the period of one year from this date, and they shall meet and organize on the \_\_\_\_\_ day of \_\_\_\_\_, A. D. \_\_\_\_\_.

Signed this \_\_\_\_\_ day of \_\_\_\_\_, A. D. \_\_\_\_\_.

Clerk of the District Court of \_\_\_\_\_ County.

Section 12. When it becomes necessary to submit a matter in controversy to the umpire, it may be in form as follows:

We, A, B, C, D and E, representing employers, and G, H, I, J and K, representing workmen, composing a tribunal of voluntary arbitration, hereby submit and refer unto the umpirage of L (the umpire of the tribunal of \_\_\_\_\_ trade), the following subject-matter, viz.: (Here state fully and clearly the matter submitted), and we hereby agree that his decision and determination upon the same shall be binding upon us and final and conclusive upon the questions thus submitted, and we pledge ourselves to abide by and carry out the decisions of the umpire when made.

Witness our names this \_\_\_\_\_ day of \_\_\_\_\_ A. D. \_\_\_\_\_

(Signatures.) \_\_\_\_\_  
\_\_\_\_\_

Section 13. The umpire shall make his award in writing to the tribunal, stating distinctly his decision on the subject-matter submitted, and when the award is for a specific sum of money, the umpire shall forward a copy of the same to the clerk of the county court.

Approved March 6, 1886.

KANSAS.

An act to establish boards of arbitration and defining their powers and duties.

Section 1. That the district court of each county, or a judge thereof in vacation, shall have the power, and upon the presentation of a petition, as hereinafter provided, it shall be the duty

---

*Arbitration Laws.*

---

of said court, or judge, to issue a license, or authority, for the establishment, within and for any county within the jurisdiction of said court, a tribunal for voluntary arbitration and the settlement of disputes between employers and employed, in the manufacturing, mechanical, mining and other industries.

Section 2. The said petition shall be substantially in the form hereinafter given, and the petition shall be signed by at least five persons employed as workmen, or by two or more separate firms, individuals or corporations within the county, who are employers within the county; provided, that at the time the petition is presented, the judge before whom said petition is presented may, upon motion, require testimony to be taken as to the representative character of said petitioners, and if it appears that the requisite number of said petitioners are not of the character they represent themselves to be, the establishment of the said tribunal may be denied, or he may make such other order in that behalf as shall to him seem fair to both sides.

Section 3. If the said petition shall be signed by the requisite number of either employers or workmen, and be in proper form, the judge shall forthwith cause to be issued a license, authorizing the existence of such a tribunal and containing the names of four persons to compose the tribunal, two of whom shall be workmen and two employers, all residents of said county, and fixing the time and place of the first meeting thereof; and an entry of the license so granted shall be made upon the journal of the district court of the county in which the petition originated.

Section 4. Said tribunal shall continue in existence for one year from the date of the license creating it, and may take jurisdiction of any dispute between employers and workmen in any mechanical, manufacturing, mining or other industry, who may submit their disputes in writing to such tribunal for decision. Vacancies occurring in the membership of the tribunal shall be filled by the judge or court that licensed said tribunal. Disputes occurring in one county may be referred to a tribunal already existing in an adjoining county. Said court at the time of the issuance of said license shall appoint an umpire for said tribunal, who shall be sworn to impartially decide all questions that may be submitted to him during his term of office. The umpire shall be called upon to act after

---

*Arbitration Laws.*

---

disagreement is manifested in the tribunal by failure to agree during three meetings held and full discussion had. His award shall be final and conclusive upon such matters only as are submitted to him in writing and signed by the whole of the members of the tribunal or by parties submitting the same. And the award of said tribunal shall be final and conclusive upon the questions so submitted to it; provided, that said award may be impeached for fraud, accident or mistake.

Section 5. The said tribunal when convened shall be organized by the selection of one of their number as chairman, and one as secretary, who shall be chosen by a majority of the members.

Section 6. The members of the tribunal and the umpire shall each receive a compensation for their services, out of the treasury of the county in which said dispute shall arise, two dollars for each day of actual service. The sessions of said tribunal shall be held at the county seat of the county where the petition for the same was presented, and a suitable room for the use of said tribunal shall be provided by the county commissioners.

Section 7. All submissions of matters in dispute shall be made to the chairman of said tribunal, who shall file the same. The chairman of said tribunal shall have power to administer oaths to all witnesses who may be produced, and a majority of said tribunal may provide for the examination and investigation of books, documents and accounts necessary, material, and pertaining to the matters in hearing before the tribunal, and belonging to either party to the dispute. The umpire shall have power when necessary to administer oaths and examine witnesses, and examine and investigate books, documents and accounts pertaining to the matters submitted to him for decision.

Section 8. The said tribunal shall have power to make, ordain and enforce rules for the government of the body when in session, to enable the business to be proceeded with in order, and to fix its sessions and adjournments; but such rules shall not conflict with this statute, nor with any of the provisions of the constitution and laws of the state; provided, that the chairman of said tribunal may convene said tribunal in extra session at the earliest day possible in cases of emergency.

Section 9. Before the umpire shall proceed to act, the question or questions in dispute shall be plainly defined in writing, and signed by the members of the tribunal or a majority there-

---

*Arbitration Laws.*

---

of, or by the parties submitting the same; and such writing shall contain the submission of the decision thereof to the umpire by name and shall provide that his decision thereon after hearing shall be final; and said umpire must make his award within five days from the time the question or questions in dispute are submitted to him. Said award shall be made to the tribunal; and if the award is for a specific sum of money, said award of money or the award of the tribunal when it shall be for a specific sum, may be made a matter of record by filing a copy thereof in the district court of the county wherein the tribunal is in session. When so entered of record it shall be final and conclusive, and the proper court may, on motion of any one interested, enter judgment thereon; and when the award is for a specific sum of money, may issue final and other process to enforce the same; provided, that any such award may be impeached for fraud, accident or mistake.

Section 10. The form of the petition praying for a tribunal under this act shall be as follows:

To the district court of \_\_\_\_\_ county (or a judge thereof, as the case may be): The subscribers hereto, being the number and having the qualifications as required in this proceeding, being desirous of establishing a tribunal of voluntary arbitration, for the settlement of disputes in the manufacturing, mechanical, mining and other industries, pray that the license for a tribunal of voluntary arbitration may be issued to be composed of four persons and an umpire, as provided by law.

---

MARYLAND.

An act to provide for the reference of disputes between employers and employes to arbitration.

Section 1. Be it enacted, by the general assembly of Maryland, that whenever any controversy shall arise between any corporation incorporated by this state in which this state may be interested as a stockholder or creditor, and any person in the employment or service of such corporation, which, in the opinion of the board of public works, shall tend to impair the usefulness or prosperity of such corporation, the said board of

---

*Arbitration Laws.*

---

public works shall have power to demand and receive a statement of the grounds of said controversy from the parties to the same; and if, in their judgment, there shall be occasion so to do, they shall have the right to propose to the parties to said controversy, or to any of them that the same shall be settled by arbitration; and if the opposing parties to said controversy shall consent and agree to said arbitration, it shall be the duty of said board of public works to provide in due form for the submission of the said controversy to arbitration, in such manner that the same shall be finally settled and determined; but if said corporation or the said person in its employment or service, so engaged in controversy with the said corporation, shall refuse to submit to such arbitration, it shall be the duty of said board of public works to examine into and ascertain the cause of said controversy, and to report the same to the next general assembly.

Section 2. All subjects of dispute arising between corporations, and any person in their employment or service, and all subjects of dispute between employers and employes in any trade or manufacture may be settled and adjusted in the manner heretofore mentioned.

Section 3. Whenever such subject of dispute shall arise as aforesaid, it shall be lawful for either party to the same to demand and have an arbitration or reference thereof in the manner following, that is to say: When the party complaining and the party complained of shall come before, or agree by any writing under their hands, to abide by the determination of any judge or justice of the peace, it shall be lawful for such judge or justice of the peace to hear and finally determine in a summary manner the matter in dispute between such parties; but if such parties shall not come before, or agree to abide by the determination of such judge or justice of the peace, but shall agree to submit their said cause of dispute to arbitrators appointed under the provisions of this article, then it shall be lawful for any such judge or justice of the peace, and such judge or justice of the peace is hereby required, on complaint made before him, and proof that such agreement for arbitration has been entered into, to appoint arbitrators for settling the matters in dispute; and such judge or justice of the peace shall then and there propose no less than two nor more than four persons, one-half of whom shall be employers and the other half em-

---

*Arbitration Laws.*

---

ployes, acceptable to the parties to the dispute, respectively, who, together with such judge or justice of the peace, shall have full power finally to hear and determine such dispute.

Section 4. In all such cases of dispute as aforesaid, as in all other cases, if the parties mutually agree that the matter in dispute shall be arbitrated and determined in a mode different from the one here prescribed, such agreement shall be valid, and determination thereon by either mode of arbitration shall be final and conclusive between the parties. It shall be lawful in all cases for an employer or employe, by writing under his hand, to authorize any person to act for him in submitting to arbitration and attending the same.

Section 5. Every determination of dispute by any judge or justice of the peace shall be given as a judgment of the court over which said judge presides, and of the justice of the peace determining the same; and the said judge or justice of the peace shall award execution thereon as upon verdict, confession or nonsuit; and every award made by arbitrators appointed by any judge or justice of the peace under the provisions of this article shall be returned by said arbitrators to the judge or justice of the peace by whom they were appointed; and said judge or justice of the peace shall enter the same as an amicable action between the parties to the same in the court presided over by said judge or justice of the peace, with the same effect as if said action had been regularly commenced in said court by due process of law, and shall thereupon become a judgment of said court, and execution thereon shall be awarded as upon verdict, confession or nonsuit; and in all proceedings under this article, whether before a judge or justice of the peace or arbitrators, costs shall be taxed as they are now allowed by law in similar proceedings, and the same shall be paid equally by the parties to the dispute; such award shall remain four days in court during its sitting, after the return thereof, before any judgment shall be entered thereon; and if it shall appear to the court within that time that the same was obtained by fraud or malpractice in or by surprise, imposition or deception of the arbitrators, or without due notice to the parties or their attorneys, the court may set aside such award and refuse to give judgment thereon.

---

## MISSOURI.

An act to provide for a Board of Mediation and Arbitration for the settlement of differences between employers and their employes.

Section 1. Upon information furnished by an employer or laborer, or by a committee of employes, or from any other reliable source, that a dispute has arisen between employers and employes, which dispute may result in a strike or lockout, the commissioner of labor statistics and inspection shall at once visit the place of dispute and seek to mediate between the parties, if, in his discretion, it is necessary so to do.

Section 2. If a mediation cannot be effected, the commissioner may, at his discretion, direct the formation of a board of arbitration, to be composed of two employers and two employes engaged in a similar occupation to the one in which the dispute exists, but who are not parties to the dispute, and the commissioner of labor statistics and inspector, who shall be president of the board.

Section 3. The board shall have power to summon and examine witnesses and hear the matter in dispute, and within three days after the investigation, render a decision thereon, which shall be published, a copy of which shall be furnished each party in dispute, and shall be final, unless objections are made by either party within five days thereafter; provided, that the only effect of the investigation herein provided for shall be to give the facts leading to such dispute to the public through an unbiased channel.

Section 4. In no case shall a board of arbitration be formed when work has been discontinued, either by action of the employer or the employes; should, however, a lockout or strike have occurred before the commissioner of labor statistics could be notified, he may order the formation of a board of arbitration upon resumption of work.

Section 5. The board of arbitration shall appoint a clerk at each session of the board, who shall receive three dollars per day for his services, to be paid, upon approval by the commissioner of labor statistics, out of the fund appropriated for expenses of the bureau of labor statistics.

Approved April 11, 1889.

## PENNSYLVANIA.

An act to establish boards of arbitration to settle all questions of wages and other matters of variance between capital and labor.

Whereas, The great industries of this commonwealth are frequently suspended by strikes and lockouts, resulting at times in criminal violation of the law and entailing upon the state vast expense to protect life and property and preserve the public peace; and,

Whereas, No adequate means exist for the adjustment of these issues between capital and labor, employers and employes, upon an equitable basis where each party can meet together upon terms of equality to settle the rates of compensation for labor, and establish rules and regulations for their branches of industry, in harmony with law and a generous public sentiment; therefore,

Section 1. Be it enacted, et cetera, That whenever any differences arising between employers and employes in the mining, manufacturing or transportation industries of the commonwealth which cannot be mutually settled to the satisfaction of a majority of all parties concerned, it shall be lawful for either party, or for both parties jointly, to make application to the court of common pleas wherein the service is to be performed about which the dispute has arisen, to appoint and constitute a board of arbitration, to consider, arrange and settle all matters at variance between them, which must be fully set forth in the application; such application to be in writing and signed and duly acknowledged before a proper officer by the representatives of the persons employed as workmen, or by the representatives of a firm, individual or corporation, or by both, if the application is made jointly by the parties; such applicants to be citizens of the United States; and the said application shall be filed, with the record of all proceedings had in consequence thereof, among the records of said court.

Section 2. That when the application, duly authenticated, has been presented to the court of common pleas, as aforesaid, it shall be lawful for said court, if in its judgment the said application allege matters of sufficient importance to warrant the intervention of a board of arbitrators, in order to preserve the public peace or promote the interests and harmony of labor

---

*Arbitration Laws.*

---

and capital, to grant a rule on each of the parties to the alleged controversy, where the application is made jointly, to select three citizens of the county, of good character and familiar with all matters in dispute, to serve as members of the said board of arbitration, which shall consist of nine members, all citizens of this commonwealth; as soon as the said members are appointed by the respective parties to the issue the court shall proceed at once to fill the board by the selection of three persons from the citizens of the county of well-known character for probity and general intelligence, and not directly connected with the interests of either party to the dispute, one of whom shall be designated by the said judge as president of the board of arbitration. Where but one party makes application for the appointment of such board of arbitration, the court shall give notice, by order of court to both parties in interest, requiring them each to appoint three persons as members of said board within ten days thereafter, and in case either party refuses or neglects to make such appointment, the court shall thereupon fill the board by the selection of six persons, who, with the three named by the other party in the controversy, shall constitute said board of arbitration. The said court shall also appoint one of the members thereof secretary to the said board, who shall also have a vote and the same powers as any other member, and shall also designate the time and place of meeting of the said board. They shall also place before them copies of all papers and minutes of proceedings to the case or cases submitted.

Section 3. That when the board of arbitration has been thus appointed and constituted, and each member has been sworn or affirmed, and the papers have been submitted to them, they shall first carefully consider the records before them, and then determine the rules to govern their proceedings; they shall sit with closed doors until their organization is consummated, after which their proceeding shall be public. The president of the board shall have full authority to preserve order at the sessions, and may summon or appoint officers to assist, and in all ballotings he shall have a vote. It shall be lawful for him, at the request of any two members of the board, to send for persons, books and papers, and he shall have power to enforce their presence and to require them to testify in any matter before the board, and for any wilful failure to appear and testify before said board, when requested by the said board, the

---

*Arbitration Laws.*

---

person or persons so offending shall be guilty of a misdemeanor, and on conviction thereof in the court of quarter sessions of the county where the offense is committed, shall be sentenced to pay a fine not exceeding five hundred dollars and imprisonment not exceeding thirty days, either or both, at the discretion of the court.

Section 4. That as soon as the board is organized, the president shall announce that the sessions are opened, and the variants may appear with their attorneys and counsel, if they so desire, and open their case; and in all proceedings the applicant shall stand as plaintiff, but when the application is jointly made, the employes shall stand as plaintiff in the case; each party in turn shall be allowed a full and impartial hearing and may examine experts and present models, drawings, statements and any proper matter bearing on the case, all of which shall be carefully considered by the said board in arriving at their conclusions, and the decision of the said board of arbitration shall be final and conclusive of all matters brought before them for adjustment; and the said board of arbitration may adjourn from the place designated by the court for holding its sessions, when it deems it expedient to do so, to the place or places where the dispute arises, and hold sessions and personally examine the workings and matters at variance, to assist their judgment.

Section 5. That the compensation of the members of the board of arbitration shall be as follows, to-wit: Each shall receive four dollars per diem and ten cents per mile, both ways, between their homes and the place of meeting, by the nearest comfortable routes of travel, to be paid out of the treasury of the county where the arbitration is held; and witnesses shall be allowed from the treasury of the said county the same fees now allowed by law for similar service.

Section 6. That the board of arbitrators shall duly execute their decision, which shall be reached by a vote of a majority of all the members by having the names of those voting in the affirmative signed thereon and attested by the secretary, and their decisions, together with all the papers and minutes of their proceedings, shall be returned to and filed in the court aforesaid for safe keeping.

Section 7. All laws and parts of laws inconsistent with the provisions of this act, be and the same are hereby repealed.

Approved the 18th day of May, A. D. 1893.

## IDAHO.

An act to provide for a state board of arbitration for the settlement of differences between employees and their employers and to provide for local boards of arbitration subordinate thereto.

Section 1. The governor, with the advice and consent of the senate, shall, on or before the fourth day of March, eighteen hundred and ninety-seven, appoint three competent persons to serve as a state board of arbitration and conciliation in the manner hereinafter provided. One of them shall be an employer or selected from some association representing employers of labor; one of them shall be selected from some labor organization and not an employer of labor; the third shall be appointed upon the recommendation of the other two; Provided, however, That if the two appointed do not agree on the third man at the expiration of thirty days, he shall then be appointed by the governor. On or before the fourth day of March, eighteen hundred and ninety-seven, the governor, with the advice and consent of the senate, shall appoint three members of said board in the manner above provided; one to serve for six years; one for four years; and one for two years; or until their respective successors are appointed; and on or before the fourth day of March of each year during which the legislature of this state is in its regular biennial session thereafter, the governor shall in the same manner appoint one member of said board to succeed the member whose term then expires and to serve for the term of six years or until his successor is appointed. If a vacancy occurs at any time, the governor shall in the same manner appoint some one to serve out the unexpired term; and he may in like manner remove any member of said board. Each member of said board shall, before entering upon the duties of his office, be sworn to a faithful discharge thereof. They shall at once organize by the choice of one of their members as chairman. Said board shall choose one of its members as secretary and may also appoint and remove a clerk of the board, who shall receive pay only for time during which his services are actually required and that at a rate of not more than four dollars per day during such time as he may be employed.

Section 2. The board shall, as soon as possible after its organization, establish such rules of procedure as shall be approved by the governor and senate.

---

*Arbitration Laws.*

---

Section 3. Whenever any controversy or difference, not involving questions which may be the subject of a suit at law or bill in equity, exists between an employer, whether an individual, co-partnership or corporation, and his employees if at the time he employs not less than twenty-five persons in the same general line of business in any city or town or village or county in this state, the board shall upon application as hereinafter provided, and as soon as practicable thereafter, visit the locality of the dispute and make careful inquiry into the cause thereof, hear all persons interested therein who may come before them, advise the respective parties what, if anything, ought to be done or submitted to by either or both to adjust said dispute, and make a written decision thereof. This decision shall at once be made public, shall be recorded upon proper books of record to be kept by the secretary of said board, and a short statement thereof published in the annual report hereinafter provided for, and the said board shall cause a copy thereof to be filed with the county recorder of the county where such business is carried on.

Section 4. Said application shall be signed by said employer or by a majority of his employees in the department of the business in which the controversy or difference exists, or their duly authorized agent or by both parties and shall contain a concise statement of the grievance complained of, and a promise to continue in the business or at work without any lockout or strike until the decision of said board if it shall be made in three weeks of the date of filing said application, when an application is signed by an agent claiming to represent a majority of such employees, the board shall satisfy itself that such agent is duly authorized in writing to represent such employees, but the names of the employees giving such authority shall be kept secret by said board. As soon as may be after the receipt of said application, the secretary of said board shall cause public notice to be given of the time and place for the hearing thereof; but public notice need not be given when both parties to the controversy join in the application and present therewith a written request that no public notice be given. When such request be made, notice shall be given to the parties interested in such manner as the board may order and the board may, at any stage of the proceedings, cause public notice to be given, notwithstanding such request. Should the petitioner or petitioners fail to perform

---

*Arbitration Laws.*

---

the promise made in said application, the board shall proceed no further thereupon without the written consent of the adverse party. The board shall have the power to summons as witness any operative in the departments of business affected, and any person, who keeps the records of wages earned in those departments and to examine them under oath and to require the production of books containing the record of wages paid. Summons may be signed and oaths administered by any member of the board.

Section 5. Upon the receipt of such application and after such notice, the board shall proceed as before provided and render a written decision which shall be open to public inspection, shall be recorded upon the records of the board and published at the discretion of the same, in an annual report to be made to the governor of the state on or before the first day of February of each year.

Section 6. Said decision shall be binding upon the parties who join in said application for six months, or until either party has given the other notice in writing of his intention not to be bound by the same at the expiration of sixty days therefrom. Said notice may be given to said employees by posting the same in three conspicuous places in the shop or factory, mill or at the mine where they work or are employed.

Section 7. The parties to any controversy or difference as described in section 3 of this act may submit the matters in dispute, in writing to a local board of arbitration and conciliation, such board may either be mutually agreed upon, or the employer may designate one of the arbitrators, the employees or their duly authorized agent, another, and the two arbitrators so designated may choose a third who shall be chairman of the board.

Such board shall in respect to the matters referred to it, have and exercise all the powers which the state board might have and exercise, and, its decision shall have whatever binding effect may be agreed by the parties to the controversy in the written submission.

The jurisdiction of such board shall be exclusive in respect to the matters submitted to it, but it may ask and receive the advice and assistance of the state board. The decision of such board shall be rendered within ten days of the close of any hearing held by it; such decision shall at once be filed with the recorder of the county in which the controversy or difference

---

*Arbitration Laws.*

---

arose, and a copy thereof shall be forwarded to the state board. Each of such arbitrators shall be entitled to receive from the treasury of the county in which the controversy or difference that is the subject of the arbitration exists, if such payment is approved in writing by the board of commissioners of such county, the sum of three dollars for each day of actual service, not exceeding ten days for any one arbitration, whenever it is made to appear to the mayor of a city or the board of commissioners of a county that a strike or lockout, such as described in section 8 of this act is seriously threatened or actually occurs, the mayor of such city or the board of commissioners of such county shall at once notify the state board of the facts.

Section 8. Whenever it shall come to the knowledge of the state board, either by notice from the mayor of a city or the board of commissioners of a county, as provided in the preceding section or otherwise, that a strike or lockout is seriously threatened or has actually occurred in any county or town of the state involving an employer and his present or past employees, if at the time he is employing or up to the occurrence of the strike or lockout was employing not less than twenty-five persons in the same general line of business in any county or town in the state, it shall be the duty of the state board to put itself in communication as soon as may be with such employer, and employees, and endeavor by mediation to effect an amicable settlement between them, or to endeavor to persuade them; Provided, That a strike or lockout has not actually occurred or is not then continuing, to submit the matters in dispute to a local board of arbitration and conciliation, as above provided, or to the state board; and said state board may, if it deems it advisable, investigate the cause or causes, of such controversy and ascertain which party thereto is mainly responsible or blameworthy for the existence or continuance of the same, and may make and publish a report finding such cause or causes and assigning such responsibility or blame. The board shall have the same powers for the foregoing purposes as are given it by section 3 of this act.

Section 9. Witnesses summoned by the state board shall be allowed the sum of fifty cents for each attendance, and the sum of twenty-five cents for each hour of attendance in excess of two hours and shall be allowed five cents a mile for travel each way from their respective places of employment or business to the

---

*Arbitration Laws.*

---

place where the board is in session. Each witness shall certify in writing the amount of his travel and attendance, and the amount due him shall be paid forthwith by the board, and for such purpose the board shall be entitled to draw from the treasury of the state for the payment thereof any of the unappropriated moneys of the state.

Section 10. The members of said board shall be paid six dollars per day for each day that they are actually engaged in the performance of their duties, to be paid out of the treasury of the state, and they shall be allowed their necessary traveling and other expenses, which shall be paid out of the treasury of the state.

Section 11. Whereas an emergency exists therefor this act shall take effect and be in force from and after its passage.

Approved on the 18th day of February, 1899.

*BIENNIAL REPORT*

OF THE

BOARD OF TRUSTEES

OF

Milwaukee Hospital for Insane

FOR THE

Two years ending September 30, 1900.

MADISON, WIS.:  
DEMOCRAT PRINTING COMPANY, STATE PRINTER,  
1901

## LETTER OF TRANSMITTAL.

---

WAUWAUTOSA, WIS., January 25, 1901.

*To His Excellency, ROBT. M. LA FOLLETTE, Governor:*

We have the honor to submit herewith a complete statement of all facts relating to the government of the Milwaukee Hospital for Insane, during the two fiscal years ending September 30, 1900.

Very respectfully yours,

B. B. HOPKINS, *President,*

A. F. WALLSCHLAEGER, *Secretary.*

## REPORT OF VISITING COMMITTEE.

---

WAUWATOSA, WIS., Dec. 19, 1900.

*To the Honorable Board of Trustees:*

GENTLEMEN:—The undersigned committee appointed by your Honorable Board would respectfully report that we have made monthly visits to the Hospital during the past biennial period. We take pleasure in stating that we found the Hospital in good condition on each occasion, the patients presenting a well nourished appearance and an air of contentment generally and the ventilation and hygienic conditions exceptionally good. We also found the food supply for the patients to be ample and of good quality and well prepared and the patients properly clothed at all seasons of the year. The plan recently established by the Superintendent of providing a separate dining room for the laboring class of men patients, with wash room adjoining, elicits our hearty commendation. We would recommend that a new range of much larger capacity be provided in the general kitchen and a brass washer and sterilizer combined for the laundry; also a detached building for hospital purposes.

Respectfully submitted,

LILLIAN W. WAHL,

ANNA L. WALL,

ERNEST COPELAND,

*Visiting Committee.*

## REPORT OF THE SUPERINTENDENT.

---

*To the Honorable Board of Trustees:*

GENTLEMEN:—I take pleasure in presenting for your consideration my seventh biennial report of the operations of the Hospital under your control for the two fiscal years ending September 30, 1900.

The statistical tables hereto appended show the following facts with reference to the movement of the population:

There were remaining under treatment September 30, 1898, 193 men and 213 women, making a total of 406. During the year there were admitted on new orders, 80 men and 58 women; total, 138. Readmitted from parole, men 22; women, 17; total, 39. The total number treated during the year was: men 255; women 288; total 583, and the average daily number under treatment, 412 $\frac{2}{3}$ .

The discharges during the year were as follows: recovered, men 26; women 21; total 47. Improved, men 23; women 20; total 43. Unimproved, men 9; women 8; total 17. Transferred to County Asylum for Chronic Insane, men 3; women 5; total 8. Not insane, men 3; women 1; total 4. Making the whole number of discharges, men 64; women 55; total 119. The deaths during the year were, men 21; women 19; total 40. There remained under treatment September 30, 1899, men 210; women 214; total 424.

The following year the number of admissions on original orders was: men 68; women 71; total 139. Readmissions for the year, men 19; women 18; total 37. Whole number treated men 297; women 303; total 600; and the average daily number, 431 $\frac{2}{3}$ .

The number discharged during this year was, recovered, men 30; women 18; total 48. Improved, men 9; women 6; total

---

*Superintendent's Report.*

---

15. Unimproved, men 10; women 16; total 26. Not insane, men 2; women 1; total 3. Transferred to County Asylum for Chronic Insane, men 14; women 8; total 22. Whole number of discharges during the year, men 65; women 49; total 114. The number of deaths during this period was, men 16; women 14; total 30; and there remained under treatment September 30, 1900, men 216; women 240; total 456.

Analysis of the foregoing facts will show the percentage of recoveries to new admissions, during the past biennial period to be  $34\frac{1}{4}$  per cent. and the ratio of deaths to the whole number treated during the same period  $6\frac{1}{2}$  per cent.

The general health of the patients has been exceptionally good and the operation of the Hospital, in all its departments, characterized by the usual degree of harmony. This state of affairs has contributed in a very material degree to the general efficiency of the Hospital and to the accomplishment of gratifying results in the matter of the recovery and death rate.

The medical and moral treatment of the patients has been pursued along the same lines as in former years and with satisfactory results as evidenced by the statistics of recoveries and deaths set forth in the foregoing statement. With the exception of one suicide we have enjoyed immunity from casualties, infectious diseases and other untoward events.

Many improvements of great value to the institution have been made during the past biennial period.

The work of laying a concrete floor throughout the entire basement was accomplished last winter and spring by our own labor; simply at the cost for material, the best quality of which was used. This flooring renders the basement perfectly sanitary and is capable of being kept as clean as one of our wards, a condition which was impossible for years, owing to the crumbled state of the remnant of flooring in use for so many years. The basement walls are whitewashed regularly and the heating boxes painted, so that altogether the basement now presents a most attractive appearance, and from a sanitary stand-

---

*Superintendent's Report.*

---

point is all that can be desired. There can be no doubt that a scrupulously clean and dry basement is essential to the healthfulness of any Hospital or any dwelling, for that matter.

Space in the basement directly under the Hospital wards, formerly used as trunk storage room, has been utilized for dining rooms for these wards, thus increasing their capacity sixteen patients in the aggregate. The walls are plastered, painted and stenciled and scullery facilities supplied, rendering them very tasty and attractive as well as useful adjuncts to the Hospital. The system of ward dining rooms is thus entirely abolished and all food aside from individual trays on the Hospital wards, is now served outside of the wards.

The work of painting the exterior woodwork of the building and the greater part of the interior, which was greatly needed, has been completed. This was done by an attendant detailed for the purpose, assisted by four patients. In the new building there remains to be done the walls of the ironing room, laundry, drying room and bakery and they will receive attention as soon as the paint work in the Superintendent's residence is finished.

Woodworking machinery, consisting of circular saws, scroll saws, lathe, emery wheels, etc., propelled by a five horse power electric motor, has been set up in the carpenter shop for the employment and diversion of patients whose tastes and abilities lie in this direction. This equipment has been found to be a most useful auxiliary to the other industrial methods inaugurated from time to time.

In the engineer's department a pipe thread cutting machine also operated by the motor used in the carpenter shop, has been installed and has proven both useful and economical, enabling us to make use of small remnants of pipe for nipples, which were formerly sold as scrap.

A valve seating machine has lately been added to the equipment and has proven a money saving device, permitting us to use our water and steam valves indefinitely instead of discarding them as soon as the valve seat is worn out.

---

*Superintendent's Report.*

---

Exhaust fans, operated by electric motors, have been installed in the officers' kitchen and in the general kitchen, rendering the former quite cool and comfortable as compared with previous conditions; also preventing the odor of cooking from permeating the building as formerly. In the general kitchen the chopping machine has been belted to the same shafting and thus a great amount of arduous labor has been taken off the patients employed there.

A dough mixing and kneading machine of three barrel capacity, propelled by a five horse power motor, has been set up in the bakery and has been found to be of advantage, not only in the way of labor saving but in the summer obviating the necessity of the sponge being handled by the operators and thus preventing the introduction of perspiration into the dough, the thought of which is so distasteful.

Ice water has been piped to the wards from central supply tanks in the basement of the wings, thus doing away with the necessity of coolers on each ward as well as the attendant labor of replenishing them sometimes twice daily. This system has also proven a measure of economy in the consumption of ice.

A watchman's time clock, with a capacity of thirty stations, has been connected with the different wards, attics, basement, new building, barns and outbuildings. It has been found to be a most reassuring device; the record each morning furnishing an infallible evidence of duty faithfully performed by the night force during the sleeping hours. Likewise acting as a protection to the nurse against any charge of dereliction of duty. I regard the adoption of this system as of the greatest benefit to the patients and as insuring the general efficiency of the service in the highest degree.

The general night watches are required to register their departure and return from rounds of the building as well as every ten minutes from rear ward and every fifteen minutes from front wards. Thus the risk of casualties, such as suicide, also acci-

---

---

*Superintendent's Report.*

---

dents, sickness or sleeplessness on the part of patients is as thoroughly safeguarded as is possible.

The internal telephone system has been thoroughly renewed by the establishment in the central office, adjoining the assistant physician's office, of a modern twenty-five drop switchboard with foot pedals, plugs for making an indefinite number of connections at one time, and every latest attachment calculated to render perfect service. The wiring of the entire system was thoroughly overhauled and a metallic circuit established in place of ground wires as under the old system, so that the service in its present shape is nearly as perfect as is possible of accomplishment. An additional feature introduced is the extension of the line to the quarters of the Superintendent and to those of the assistant physicians, thereby placing the medical officers in direct and instant communication with the nurses during the night as well as in the day time. The importance of this feature in a Hospital of this character cannot be overestimated by those familiar with the many contingencies and emergencies arising from time to time.

The entire telephone system is operated by a central magneto which is belted to the shaft in the engine room, thus obviating the necessity of ringing up in originating a call, simply requiring to plug in to make the desired connection.

The latest and most satisfactory improvement installed is the central storage battery plant. By this system power is furnished for the electric door opening system, for all annunciator bells and fire alarm gongs; for the internal telephone system; for the electric hall clock and the cigar lighter in the smoking room. The use of Salammoniac cells which were a constant source of annoyance and expense have been abolished and the storage system has so far proven its vast superiority. The cells are arranged in series and are charged alternately every twenty-four hours direct from the dynamos, so that the source of power is practically unfailing.

At the Hospital gate, which is now the terminus of the Wells

---

*Superintendent's Report.*

---

St. and Lake Park line of the Milwaukee Electric railway, a tasty and commodious station has been erected by us which contributes very much to the comfort of visiting relatives and the general public as well as to the convenience of the employes of the four surrounding institutions. The station or "Shelter," as it is called, is lighted by electricity, heated by an oil stove or heater and is connected by telephone with the Hospital office. It is our purpose in the spring to cultivate a lawn around the building, set out flower beds and make it a beautiful and attractive spot.

The new piggery, for which appropriation was made, is practically completed at present and occupied by the stock. This forms a most valuable and substantial improvement and one which has been needed for some time past. The building including the slaughter house, is two hundred feet long by forty feet wide and contains twenty pens, each with a capacity of fifteen pigs. The slaughter house is furnished in a most complete manner, including a steam boiler for heating the food and the granary is capacious and ample for all requirements. The construction throughout is most substantial and is calculated to stand as a permanent improvement. The entire flooring is of concrete, which is unquestionably more sanitary and will last for all time. The building is supplied with running water and lighted by electricity and contains a watchman's clock station. The construction and equipment altogether outrivals anything with which I am familiar in this part of the country. I would add that for the past four years no pork, bacon or ham has been purchased, all being supplied from our own product.

This improvement, together with the railway station, was accomplished by our own labor exclusively. The carpenter work was performed by our carpenter with the aid of five patients adapted to that kind of work; the concrete flooring was all laid by our laundryman with the assistance of patients, and the plumbing and wiring by our engineer, consequently the cost of construction, considering the magnitude of the work,

---

*Superintendent's Report.*

---

was greatly reduced. It also furnished much needed employment to a class of patients calculated to be benefited thereby as is evidenced by the fact that three of them were restored to their normal condition and sent home. I would add that hydrants have been placed convenient to this building and to the barn giving protection in case of fire which has not heretofore existed.

The new residence for the Superintendent, south of the Hospital building and near the highway, which has been in process of construction since last May, is rapidly approaching completion. The site is very picturesque, being on a high knoll and in a dense grove of trees, affording a charming view of the surrounding country.

The house, consisting of fourteen rooms, is constructed of St. Louis brick, with capacious porches, balcony, and lookout deck and porte cochere, the interior arrangement is thoroughly modern and up-to-date, including a complete electrical outfit, in the way of lighting, telephone, bells, etc. The heating is by means of hot water supplied from the institution plant. All of the laboring work on the house was furnished by the patients and the mechanical part largely by our own force of employes assisted by patients skilled in the various trades. The removal of the Superintendent's family from the Hospital building will increase its capacity for patients to the number of one hundred and thirty approximately, making the total capacity of the Hospital about six hundred and fifty. The third and fourth floors of the administration building will be devoted to patients, on the dormitory plan, the officers being then installed in the present quarters of the Superintendent, on the second floor. The change from the Hospital building to less public surroundings and more privacy will be most acceptable to the Superintendent and his family after a continuous residence within the Hospital walls extending over fourteen years. From a financial standpoint the expenditure in providing space for one hundred or more patients under this plan is almost nothing as compared with the cost of erecting buildings for that number at a per capita cost of six hundred dollars which is the lowest

---

*Superintendent's Report.*

---

cost considered practicable for such purpose. A separate dining room, with a capacity of forty patients, has recently been established for the exclusive use of the laboring class of men patients. This arrangement provides additional accommodation in the largest general dining room for a like number, which with our present population is greatly needed. It also proves advantageous in many respects, viz.: the objectionable odor emanating from the clothing of this class who are engaged in farm, barn and garden work has been removed from the general dining room; the food extras supplied to this class of patients, which has ever been a source of envy and irritation to the patients in the large dining room and has at times caused disturbance in the room, can now be served to them without being observed.

Again this dining room, as it adjoins and connects with the smoking room, will be a more agreeable arrangement, in that the laboring men can go directly from work to that room at the noon hour to await dinner instead of repairing to their ward as formerly; thus approximating more closely, conditions outside of a Hospital.

A room adjoining the Turkish bath room, which was formerly used as a store room for groceries, has been connected with the bath rooms and will be used as an additional dressing room providing space for this purpose which has recently been demanded by the increase in our population.

The space formerly occupied by the bakery has been converted into store rooms and admirably fulfills the purpose. The small room adjoining has been connected with the food elevator shaft and is used as a scullery annex to the general kitchen.

This completes the list of improvements made during the past two years leaving nothing remaining to be done except the porch over the south side of the new building, leading to the bakery, which I recommended in my last annual report.

In the way of improvements for the future, I would recom-

---

*Superintendent's Report.*

---

mend the establishment of a gymnasium and bowling alleys for the use of the patients and employes equally. This provision would tend to promote both the health and pleasure of our people and would fill a long felt want, particularly during the inclement seasons.

A synchronized system of time throughout the wards and departments, regulated by a master clock in the main hall, would be a very desirable, as well as necessary, improvement over the varied time furnished by the present time pieces.

The work of wiring and making connections could be done by our own employes, necessitating the purchase of the clocks only.

I would recommend that at some future day the carpenter shop be established in a detached building, a safe distance from the group of Hospital buildings. In its present location it cannot be regarded other than a menace to the plant and would in case of fire prove disastrous to the operation of the Hospital, as the engines and dynamos directly under it would be irretrievably ruined. An inexpensive frame building would sufficiently fulfill the requirements and would, if attacked by fire, entail no great loss and absolutely no embarrassment in the running of the engineering department. I would add that the space now occupied by the carpenter shop will within a year or two be required by the demands of the sewing room, as the present sewing room will eventually be crowded out by the encroachment of the ironing room which will have to grow year by year and which at the present is in fact somewhat restricted in space for the demands made upon it.

Among the renewals that will probably have to be made during the coming year are the replacement of the large wooden washing machine in use for many years, and which has been repeatedly repaired. I would recommend that at such time as may be necessary, a metal washer and sterilizer combined be substituted. The sterilizing feature would be found exceedingly useful in case of infectious disease occurring in the Hospital.

A new range of double the present capacity, in the general

---

---

kitchen, is a pressing need, both to replace the old range in use since the opening of the Hospital and to provide for the increase in population during the past years; likewise a coffee urn of one hundred and fifty gallon capacity to replace that of fifty gallons, at present in use and which is entirely inadequate.

A new and modern green house of ample size for the increased demands of the Hospital is a necessity which cannot longer be avoided. The old building which has been in use for the past sixteen years is absolutely beyond the possibility of restoration or repair.

The weekly per capita cost for the past biennial period is \$3.30. At the last session of the legislature a bill was passed allowing one dollar and a half per week for chronic cases and two dollars and seventy-five cents for acute insane. Inasmuch as this Hospital contains no greater proportion of chronic insane than similar institutions throughout the country, this may justly be regarded as an unfair discrimination as applied to this Hospital. However, admitting that the chronic insane should be entitled to only \$1.50 per week, comparing our per capita cost with that of similar hospitals, it will readily be seen that a much larger allowance should be made for maintaining the acute insane of our county. I would consider it no more than just and proper, if distinction is to be made between the classes, that an allowance of at least four dollars per week should be made for one-half of the population and \$1.50 per week for the remainder, based on the total number of days' board furnished. At a conference held recently with the State Board of Control the members of that board agreed that this would be an equitable adjustment of the matter and readily offered to support a bill containing this provision. I would recommend that efforts tending to bring this about be put forth at the next session of the legislature.

The industrial departments organized some years ago, consisting of mat and basket, broom and brush work, knitting factory, tailor shop, mattress making and willow work, have all been

---

*Superintendent's Report.*

---

carried on with the accustomed zeal and with untold good to the patients employed therein. During the summer months the patients in these departments are employed in the garden to the greatest benefit to their physical and mental health.

The training school has been ably conducted by the assistant physicians during the past two years, five nurses being graduated. Lectures on insanity, by the superintendent, were given the students of the Wisconsin College of Physicians and Surgeons during the same period.

Entertainment has been furnished the patients weekly at least during the entire year. Dances were held in the electric lighted pavillion in the grove during the summer, alternating with concerts on the front lawn by the Hospital band. At these entertainments root beer is served. In the winter season phantom parties varied the regular programme and special entertainments, consisting of concerts by the Hospital orchestra, by the Arlington quartette, graphophone recitals, magic lantern show, impersonations and ventriloquism by Prof. French, kinetoscope and stereopticon views of the Klondike with vocal selections by the Surrieks, an entertainment by the Novelty Comedy Company, consisting of descriptive song recitals and moving pictures, readings and impersonations by Mrs. Helen Stuart Richings, character sketches and songs by Gavin Spence, and a minstrel performance by the Trinity church choir of Wauwatosa, all of which were heartily enjoyed by the patients in attendance.

During the summer also base ball games by our Hospital nine with teams from Milwaukee, Waukesha, Menominee Falls and other towns were played on the grounds weekly and sometimes semi-weekly, and were attended by on an average of two hundred of our patients, men and women, both of whom enjoyed thoroughly the diversion and showed their appreciation by lusty applause. Seating capacity for two hundred and fifty patients was provided on the grounds last year and the games have become an established feature of our Saturday half holiday, at which time none of the working class are permitted to labor, but are encouraged to frequent the ball grounds,

*Superintendent's Report.*

---

Patients to the number of two hundred and seventy-five were taken each year to the state fair exhibit in the Hospital bus and treated to soda water and peanuts; a considerable number were permitted to walk about the grounds and visit the exhibits. The privilege of admission to the fair was secured through President B. B. Hopkins and his kindly efforts on behalf of the patients were greatly appreciated by them. Parties of patients, accompanied by nurses, were taken on trolley rides to Lake Park and elsewhere; a bus load of patients was taken to the Soldiers' Home to view President McKinley; a large number were taken to Milwaukee to see the carnival; one lady patient, with a nurse, was allowed to witness the Wisconsin and Beloit football game. Lastly, the regular Fourth of July, Thanksgiving and Christmas festivities were held to the great enjoyment of many.

The usual number of magazines and periodicals, English and German, have been furnished and the Hospital library, to which two-hundred volumes have been added, has been well patronized by the patients. We are again under obligations to Mrs. Edward Cramer of Milwaukee for a donation of books and magazines, likewise to the ladies of the Flower Mission for similar contributions.

The changes in the official staff during the period were the resignation of Dr. O. E. Lademan, second assistant physician, and Miss Ada Maxon, matron. The vacancy in the position of second assistant was filled by the appointment of Dr. B. S. Spork of Milwaukee. The assistants have performed the duties assigned to them with unswerving fidelity and with a zeal truly commendable, and they are entitled to great credit for whatever measure of success has been obtained in the treatment of the patients. Mr. C. F. Reed, a senior student in medicine, served the Hospital as clinical assistant during the usual term and with perfect satisfaction.

Our acknowledgments are due the consulting staff of physicians and surgeons for visitations and service when required; likewise to our local visiting committee, whose report is hereto

---

*Superintendent's Report.*

---

annexed. The additions to the consulting staff of physicians and surgeons are Doctors Louis Frank, G. A. Kletzch and F. C. Rogers of Milwaukee and J. S. Cutler of Wauwatosa.

I desire to express to your honorable board my sense of appreciation of your kindly aid and counsel extended by you uniformly and at all times.

Very respectfully,

MOSES J. WHITE, M. D.,

*Medical Superintendent.*
