The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

PUBLIC DOCUMENTS

OF THE

STATE OF WISCONSIN.

Being the Biennial Reports of the Various State  
Officers, Departments and Institutions,

FOR THE

FISCAL TERM ENDING SEPTEMBER 30, 1894.

---

VOL. I.

---

MADISON, WIS.:  
DEMOCRAT PRINTING COMPANY, STATE PRINTER,  
1895.

# PUBLIC DOCUMENTS

FOR 1893-94.

## CONTENTS OF VOL. I.

1. Message of the Governor.
2. Report of the Secretary of State.
3. Report of the State Treasurer.
4. Report of the State Superintendent.
5. Report of the Railroad Commissioner.
6. Report of the Commissioner of Insurance.
7. Report of the Regents of the University.
8. Report of the State Supervisor of Inspectors of Illuminating Oils

## CONTENTS OF VOL. II.

1. Report of the State Board of Control.
2. Report of the Commissioner of Labor Statistics.
3. Report of the Regents of Normal Schools.
4. Report of the Commissioners of Public Lands.
5. Report of the Commissioners of Fisheries.
6. Report of the Trustees of the Milwaukee Hospital for the Insane.
7. Report of the Adjutant General.
8. Report of the Quartermaster General.

# MESSAGE

OF

## WILLIAM H. UPHAM,

### GOVERNOR OF WISCONSIN,

*Delivered to the Legislature January 10, 1895.*

---

TO THE HONORABLE THE LEGISLATURE:

It becomes my duty at this time, as the executive of the state, to briefly review the condition of state affairs and to submit to you such recommendations as seem to me to be called for.

You are assembled under conditions which are unique in the history of the state and nation. The country has been subjected to one of the most disastrous financial disturbances ever known; yet such are the recuperative qualities of the American people that from the very depths of financial disaster they are emerging hopeful and courageous.

Our own state has suffered less, perhaps, than many others. We have reason to be thankful to the Providence which has shaped our affairs and allotted to us such a diversity of nationalities and so great a variety of resources, that no ordinary disaster can seriously disturb our financial or social economy. We have reason, also, to be grateful that our state has been so free from dangerous epidemics; and exempt from those manifestations of lawlessness which have distressed other states. We may well be proud of our varied and enormous resources. In them the people have a rich heritage, which it becomes your duty to so husband by wise legislation that it may be transmitted unimpaired to future generations.

There will be submitted to you detail reports of the various departments of the state government and the institutions under their charge. These, I doubt not, will receive your careful attention.

## GOVERNOR'S MESSAGE.

## STATE FINANCES.

I append hereto a statement of the condition of our state finances on December 31, 1894:

	<i>Balances.</i>	<i>Overpayments.</i>
General Fund.....		\$329 65
School Fund.....		1,055 73
School Fund Income.....	\$640,035 11	
University Fund.....	3,237 65	
Agricultural Fund.....	158 73	
Normal School Fund.....	7,987 00	
Drainage Fund.....	2,452 24	
Deposit Fund.....	11,220 52	
Delinquent Tax Fund.....	465 37	
St. C. & L. S. R. R. Deposit Fund.....	408 02	
Redemption Fund.....	127 68	
Columbia and Sauk Co. Ind'y Fund.....	3,752 42	
Wis. R. R. F. M. Land Co. Fund.....	4,513 57	
Indemnity Fund.....	2,897 88	
Allotment Fund.....	916 54	
		<u>676,787 35</u>
Total.....	<u>\$678,172 73</u>	<u>\$678,172 73</u>

## GENERAL FUND INVESTMENTS.

Loan to State Agricultural Society.....	\$30,000 00	
Mortgage on State Fair Grounds (taken from E. C. McFetridge).....	47,782 03	
Total.....		<u>\$77,782 03</u>

## OTHER FUND INVESTMENTS.

School Fund, bonds and loans.....	\$3,964,276 00	
University Fund, loans.....	216,500 00	
Agricultural College Fund, loans.....	240,993 06	
Normal School Fund, loans.....	1,802,471 85	
Total.....		<u>\$5,224,240 91</u>

It will be seen that while there are two mortgages to the credit of the general fund aggregating \$77,782.03, the cash of that fund is actually overdrawn to the amount of \$329.65.

On October 1, 1894, three months ago, there was in the general fund the sum of \$977,315.71. Thus in three months the disbursements from the general fund have aggregated \$899,862.33.

## EDUCATION.

No surer evidence of the growth of a people is to be found than its interest in and support of education. This

is especially true of a people who govern themselves. The framers of our constitution wisely provided a permanent system of popular education to be supported by taxation. This has been supplemented by grants from the national domain. Wisconsin has long indulged a just pride in its system of public schools and in the high standard of scholarship which has been attained and held by them. I know it will be your pleasure to foster the system in every way which in your judgment is needed.

The last legislature made provision for revising the present school laws of the state, thus affording an opportunity to remedy such defects as past experience may have disclosed. The report of the state superintendent of public instruction, recently issued, indicates that in compliance with the provision above referred to, a bill is to be submitted at this session embodying important modifications of existing laws.

The annual loss to the school fund from the failure on the part of cities to properly return the proceeds of penal fines merits your serious attention. Obedience to the law should be enforced, at least until provisions of the constitution relating to the subject can be amended and the laws are repealed.

During the past eight years, according to the report of the state superintendent of public instruction, over three thousand small libraries have been established in the country schools of the state. These libraries are broadening and bettering not only the schools, but the homes of multitudes of children, and they should be extended until their influence reaches all the children in the commonwealth.

*The University of Wisconsin.*

The growth and progress of the state university has been so marked that it is with pleasure I call your attention to it. Because of its growth and its enlarging usefulness, the university is entitled to your most generous consideration. There has been so large an increase in the number of students from the state who pay no fees for tuition, that there is urgent need for additional provision to meet the increased expenses. The increased attendance from our own state is one of the most promising features of the growth of the institution, and will be appreciated as a direct fulfillment of its primary purpose.

*State Historical Society.*

There exists an urgent necessity for some provision for the safe housing of the historical society collections. The valuable character of these collections need hardly be dwelt upon. The leading scholars of the continent and

many from the centers of learning abroad have given testimony to their value and importance. Their destruction by fire would not only be a loss to the state, but to every historical student and scholar in the country. The rooms occupied by the collection in the capitol building are not fire-proof, and there is the constant danger that the state and country may suffer an irreparable loss. A fire-proof building for the protection of these collections should be provided for at once. If the university library and the historical society's collections could be placed under one roof, it would be an economical and convenient arrangement.

#### *Normal Schools.*

Some additional legislation will be required to make provision for maintaining the efficiency of our normal schools. The year will close with a deficit in the normal school fund. This subject should receive prompt attention.

The present board of normal school regents appear to be a rather cumbersome body. The real work of the board necessarily falls upon a few members. I recommend a reduction in the number of regents to, perhaps, five. A board consisting of only five members would be able, I believe, to perform its work with greater expedition than is possible with a larger number. Of whatever number the board may consist, the clerk of the board should not be a member.

#### *State Superintendent.*

The salary of the state superintendent of public instruction as now provided for by the constitution is inadequate. It should be increased to a sum which shall bear a proper relation to the importance and responsibility of the office. The last legislature, by the adoption of a resolution known as "Joint Resolution No. 10," took the preliminary step toward increasing the salary. I recommend that your honorable body supplement this with the proper measures.

#### STATE BANKS.

While the calamity which has befallen a number of the banks of our state has been but the natural result of the generally disastrous condition of the country, it has been made clear, I believe, that a proper supervision of the financial institutions of the state might have averted the disaster in many cases. This is a question which affects profoundly all classes of citizens. Upon the integrity of the banks of the country depends to a great extent the industrial fabric. I am convinced that there is a pronounced sentiment throughout the state in favor of some sort of

bank supervision. Whether such supervision may be provided for without a revision of the banking code, is a matter for you to determine; but that some measure should be adopted looking to a supervision of the state banks in a manner similar to the method employed by the general government in the examination of national banks is, I believe, clearly demanded for the protection of the public and for the proper maintenance of the financial institutions themselves.

#### CHARITABLE, REFORMATORY AND PENAL INSTITUTIONS

From the biennial report of the state board of control, which is before you, you will learn the condition in detail of the charitable, reformatory and penal institutions of the state. The report emphasizes, as former reports have, the needs of certain of these institutions. I desire to call your attention to some of the most pressing of these necessities.

##### *The State Prison.*

Notwithstanding that, during the last biennial period, there have been added to the capacity of the state prison at Waupun seventy-two cells, the prison is now greatly overcrowded. The following statement from the last report of the state board of control explains the situation:

"A large number of cells are now occupied by two convicts. This condition is both illegal and inhuman. The prison is too small for the number confined therein. The present prison must be enlarged or a new one erected. The board will strongly recommend the latter remedy.

The remedy for such condition should, and I have no doubt will, be promptly provided by your honorable body. If a penal institution may not be to some degree reformatory, it should not at least be made a means of cultivating vice. The opportunities afforded for the latter in the state prison under the conditions named are appalling. In that institution are many men who are suffering the penalty of their first criminal offense. The close association of these in cells with hardened criminals precludes the possibility of their being inspired to reform, and makes it extremely probable that they will emerge at the expiration of their term confirmed criminals.

In this connection I desire to quote another recommendation made in its report by the state board of control:

"Provision should be made for a reformatory for first offenders at the earliest possible day. This would relieve the crowded condition of the prison, and would be a long stride in the right direction toward attempting the reformation of criminals."

This latter recommendation of the board may contain a solution of the problem presented in the condition of the state prison. By providing a reformatory for first offenders, relieved of the most degrading features of the state prison discipline, and where the primary duty of the wardenship would be the reform of the inmates, the crowded condition of the state prison might be relieved, and a more wise and humane treatment of first offenders be instituted.

I recommend, in view of the urgency of the needs recited, that the legislature provide for the appointment, early in the session, of a committee which shall investigate the condition of the state prison, and report before the close of the session, that there may be no unnecessary delay in determining what should be done in the premises.

#### *School for Feeble-Minded.*

In most respects Wisconsin has been generous and humane in the treatment of the unfortunate and criminal classes, but in its care of the feeble-minded it is far behind many other states. A majority of the unfortunates named of the poorer class, are kept in almshouses; some are in insane asylums, and others are cared for at their homes. In the seventeen states in which homes for the feeble-minded have been established, the most benign results have been attained. It has been demonstrated that even the lowest grades of imbeciles are capable of some degree of cultivation, while a large percentage have developed an ability for self-support and become a blessing rather than a burden to their fellows.

The report of the state board of control says of this class of unfortunates:

"It is an absolute necessity that some provision be made for their care, as there is now no place in the state where they can be legally committed."

It is not necessary that a large appropriation be made for the establishment of a school home for the feeble-minded. It would be the wiser plan, I believe, to make a small beginning; but for economical as well as humane reasons, that beginning should be made as soon as practicable.

#### AGRICULTURE.

The importance to the people of the highest possible diversification and development of agriculture cannot be overestimated. The growth of Wisconsin in this respect during the past ten years has been more marked than in any other decade in our history. Many thousands of acres in the northern portion of the state have been cleared and developed into profitable farms; and in the older farming

sections progress has been marked by the adoption of the most improved methods, and a wider diversity of products.

*Dairying.*

Especially has the growth been notable in the dairy industry. It is estimated that there is now invested in the dairy industry of Wisconsin more than \$160,000,000; and according to the last report of the state dairymen's association the milk products of the state for 1894 aggregated \$30,000,000.

With this growth, however, there have appeared serious dangers to the future of the industry. The high reputation which the Wisconsin cheese product earned, and for a long period maintained in the market, has been injured by the manufacture within the state, and sale, of what is called filled cheese, greatly inferior in quality, but not distinguishable from the better product by ordinary inspection. While not favoring paternalistic legislation, I deem it to be the duty of the legislature to protect by adequate measures this great industry against permanent injury by fraud, and to protect the people against imposition. I recommend, therefore, the enactment of some well-considered law which shall, under appropriate penalty, compel the manufacturers and vendors of such cheese to so brand, mark or color it that it shall no longer be sold for what it is not.

In this connection I commend to your attention the necessity for legislation which shall protect the butter-makers of the state from unfair competition with substances manufactured in the similitude of butter, and sold as butter, which are not made from milk or cream. If oleomargarine and other elements can be combined into an article which people are willing to use as a substitute for butter, and not detrimental to public health, I know of no principle of public policy which should prohibit its manufacture and sale. To say, however, that no one can claim the right to manufacture and sell it as butter is simply to say that no one can claim the right to perpetrate a fraud. Whether the object of manufacturing it is to render it in color, taste and otherwise difficult to distinguish from genuine butter is not for me to say; that such is its effect, however, cannot be doubted.

Those who wish to buy butter and who suppose they are paying for butter, the product of the dairy, are entitled to what they buy and pay for. Those who wish to buy oleomargarine or other substitutes for butter are entitled to what they pay for; but the farmer and other dairymen ought not to be, in the manufacture and sale of the genuine article, brought into competition with any substitute not distinguishable from butter.

There has been, until recently, some question as to the power of the legislature to enact and enforce legislation which will protect the people in this respect against deception, and honest dairy products against fraudulent competition. All questions have been recently put at rest by the supreme court of the United States, in its decision in a case appealed from the supreme court of Massachusetts. The Massachusetts statute upon which the original suit was brought contained provisions which seem to me to offer ample protection to the butter manufacturers and to the public. It was held by the supreme court of the United States that the Massachusetts statute was valid, and within the province of state legislation. I recommend the enactment of a similar measure. That measure allows oleomargarine and other substitutes for butter to be sold for what they really are to those who, knowing what they are, desire to buy them, but prohibits the coloring of the artificial product in the similitude of the genuine article. The statute, moreover, has the great advantage of having been passed upon and sustained by the highest tribunal in the land.

I recommend the usual appropriation of \$2,000 per annum for the state dairymen's association; also the usual annual appropriation for the state agricultural society.

#### *To Develop Agricultural Resources.*

The mineral and lumber interests have for so many years claimed the attention of capitalists and workingmen that the agricultural interests of a portion of our state have been somewhat neglected. Agriculture exceeds greatly all the other interests combined. The time has come, it seems to me, when the state itself should adopt some means to call attention more directly to its wonderful agricultural possibilities, yet undeveloped.

We have, in the northern half of the state, thousands of acres of vacant lands which need but labor to be transformed into prosperous and fruitful homes. The problem presented in the overcrowded condition of many of the cities might, I believe, find at least a partial solution in the cultivation of the vacant lands. From a moral as well as a material standpoint the question of encouraging the settlement of our idle lands by the unemployed from the overcrowded cities may well receive consideration.

I commend to your attention the feasibility of providing in some manner for the bringing to the public attention the agricultural possibilities of the unsettled portions of our state, and the opportunities offered there to persons of small means to secure homes and a measure of prosperity.

## ENFORCEMENT OF SANITARY LAWS.

The enforcement of sanitary laws in certain portions of the state during the past year has called attention to the fact that the statutes make no provision for the reimbursement by municipalities of families whose household goods are destroyed through that enforcement. It often happens that contagious diseases prevail in portions of cities which are overcrowded, among those who depend on their daily labor for sustenance; and the welfare of the public requires, in order to prevent the spread of the disease, that the bedding and clothing of the household infected shall be destroyed. Authority should be given to municipalities to reimburse those families to whom such a destruction of household goods may be a calamity. To compel them to sacrifice for the public welfare what they cannot spare and cannot well replace seems like imposing a penalty upon misfortune.

I commend the subject to your careful consideration, quite aware that the doctrine might be carried too far; and at the same time convinced that, within certain limits, it involves only manifest justice.

## THE NATIONAL GUARD.

The system instituted in our state militia a number of years ago has been productive of a high state of efficiency in the national guard of the state. The system has received the compliment of being duplicated by other states. The people of Wisconsin have reason for congratulation that their militia has been brought to so high a plane of efficiency that, should its services be required by the national government, no state in the Union could furnish a more efficient quota. The general government has recognized the necessity for co-operation in maintaining a well-disciplined national guard in each state. It is the least expensive standing army that can be maintained, and its generous support is, I believe, a wise provision.

The maintenance of a permanent camp of instruction and rifle practice at Camp Douglas has proven a wise measure, and provision should be made for its continued maintenance on a scale that will further enhance its value and importance.

*The Roster Law.*

The legislature, in 1887, passed a law making provision for the printing and publication of the roster containing the names and record of Wisconsin soldiers. This law is still in force, and it should be repealed, as it serves no

useful purpose. There is no occasion for continuing the statutory authority which the law confers upon the executive. If at any time there should be such a demand for a roster as would in the judgment of the legislature warrant its publication, it can easily be provided for. If ever it be authorized, the number should be limited, and the provision should be made that it be printed under the general contract for public printing, or that the contract for its printing be let, upon publishing notice, under proper restrictions, to the lowest responsible bidder.

#### AID FOR FIRE SUFFERERS.

You will be asked to make an appropriation to assist the fire sufferers from the forest fires of last summer by providing for them seed for their spring planting. Many of the people in the fire district, I am informed, while they have been furnished with necessary food and clothing to carry them through the winter, through the generosity of the public, wisely and promptly administered, have not the means to secure the necessary seed for the planting of their season's crop. An appropriation for this purpose, carefully expended, would not only be a humane act, but would seem to be founded on sound public policy. I commend the subject to your kindly consideration.

#### MUNICIPAL GOVERNMENT.

There may come before your honorable body measures having in view a reform in the method of managing municipal affairs. These measures should receive kindly attention. The revelations made by investigating committees in several of the large cities recently, serve to emphasize the necessity for radical changes in some of the methods of municipal government. Some cities will seek help by asking for laws empowering them to apply and extend civil service methods in their various departments. There is evident a very general desire for improved and more business-like methods in conducting city affairs. It lies in your power to encourage materially, by wise measures, the furtherance of such reform.

#### SOLDIER AND STUDENT VOTE.

There is located within this state, established and maintained by the general government, a home for disabled veteran soldiers. This property is owned by the United States, and the right of the inmates of the home to vote has sometimes been questioned. Our laws should render impossible any further doubt upon this subject. I earn-

estly recommend that those inmates of the home who are citizens of the United States, and who shall have resided one year in the state, shall be expressly authorized to vote at the nearest election precinct. Men who have been disabled in the service of this republic ought not to be disfranchised upon any purely technical grounds.

There is also a grave question as to the right of students, otherwise qualified, to vote in the community where the college or seminary is located at which they are prosecuting their studies. I see no good reason why thousands of intelligent young men, spending nearly all of the year and generally several successive years in educational institutions within the state, should not be permitted to exercise the right of franchise where they are obtaining their education. Very many of them are unable, without an expenditure which they are unwilling to add to the burden of parents, to return to their homes to vote. There would seem to be no reason founded in public policy why the law should not be so changed as to authorize such students to vote in the city, village or town wherein is located the institution of learning which they attend.

#### THE STATE BOARD OF CONTROL.

The state board of control as now organized consists of six members. In case of an equal division upon any question there is no means of reaching a decision. I suggest to you the wisdom of making the board to consist of either five or seven members, that there may be a majority decision on all questions.

If a reorganization of the board should be deemed by you advisable, I commend to your attention the wisdom of providing either for a woman member of the board, or for a woman visitor to work in connection with the board. In all the charitable, reformatory and penal institutions there are women whose needs could much better be learned by one of their own sex.

#### AN APPORTIONMENT COMMISSION.

The present legislative apportionment is very unsatisfactory in many respects. What the people demand is an apportionment based fairly upon population and territory, regardless of partisan demands. I recommend, therefore, that the legislature provide for the appointment of a non-partisan commission to prepare a bill to submit to the legislature at the earliest possible day.

#### *Judicial Re-apportionment.*

There is a growing demand among the judges and others who are interested in the administration of law for a re-

arrangement of the judicial circuits of the state. Such a readjustment should take into consideration population and territory, which are little regarded in the present adjustment. The change should be affected, if at all, without increasing the number of circuits.

#### FORESTRY.

Measures may come before you having in view the preservation of the forests of our state. The danger which threatens not only our own state but the entire country through the denudation of our forest lands is claiming the attention of people everywhere. There has been organized in Wisconsin a forestry association to work in conjunction with the American forestry association, in arousing a more active public interest in the subject. The claims of these associations are deserving of attention, and I doubt not that the measures to come before you will receive the consideration to which they are entitled.

#### ROAD IMPROVEMENT.

The subject of the improvement of country roads is one which should interest every citizen of the state. It is of special importance, however, to farmers and to those living in rural communities. A very active interest is being taken, and measures looking to a systematic effort to improve the public highways will probably come before you. The matter is of so general an interest that I am assured it will be carefully considered by you.

#### REPORT OF LEGISLATION COMMISSION.

At the last session of the legislature the governor was authorized to appoint a commission for the promotion of uniformity of legislation in the United States. The commission was appointed, performed its labor, and its report will be submitted to you. I bespeak for the report your candid consideration. The question of uniform legislation is one which is claiming the attention of the bar and the legal fraternity throughout the country.

#### LABOR AND CAPITAL.

Notwithstanding the widespread distress which has resulted from industrial stagnation, our state has been singularly free from those manifestations of lawlessness which have brought discredit upon several states. This fact bears witness to the law-abiding character of our citizens. It emphasizes, also, the obligation which rests upon the

law-making body of the state to watch carefully and impartially the interests of all classes of citizens, and to enact laws as they may become necessary, to meet the changing industrial conditions; laws which shall ensure to labor the just and fair recompense of toil, and at the same time encourage capital in the development of our enormous resources.

It has been charged that there has come to be among corporations employing large numbers of men, a system of blacklisting so called, under which an employer having a grievance against a former employe advises or warns other employers not to give employment to the person against whom the grievance exists. While there may be cases in which incapacity or a reckless disregard of duty by an employe, leading to his discharge on that ground, might justify an employer in warning other employers from taking such person into their service; or, where an employe has betrayed in a dishonest manner a trust, a former employer might be justified in protecting others by proper notification; nevertheless, it would seem to be true that where an employe, entirely faithful and competent, quits service in a manner not to endanger public safety, because of a grievance real or supposed; or, because compelled to do so by the action of an association to which he belongs, simply exercises his right to quit, and neither commits nor incites violence, it is without justification.

It is for the public interest that, so far as may be, every industrious, sober and competent man should be employed. I cannot but regard an arrangement among a large number of employers not to employ or permit to be employed, if they can prevent it, competent and faithful men, simply because they quit the service of some other employer, as a conspiracy which ought not to be tolerated by the law.

This concedes the right of employers to choose their employes and to discharge them at will, unless restrained by contract. The right of employes, unless similarly restrained, is just as complete and just as sacred. The employer is not to be punished by boycott or blacklisting for exercising his right to discharge, and the employe is not to be punished by boycott or blacklisting for simply exercising his right to quit. The employer has no more right to be protected by the law from a conspiracy on the part of employes than employes have to be protected by law against a conspiracy on the part of employers.

This exemption of employes or laboring men from persecution by employers for quitting is peculiarly important in this day of commercial distress. If the law as it now stands does not protect men who have quit the service of employers from blacklisting, such as I have indicated, it

should, in my judgment, be so amended as to plainly include it.

It is of the highest importance that the best possible relations should exist between capital and labor. Neither should be permitted to invade the rights of the other; each should deal with the other in the spirit of conciliation, and in the settlement of differences, arbitration should, so far as possible, be made to take the place of strikes and lock-outs.

I confess I do not see my way clear to any efficient scheme of compulsory arbitration, under existing constitutional provisions; nor am I certain that such a scheme is possible, without involving the surrender, by both labor and capital, of rights which men hold to be very sacred. It must be borne in mind that the right of men to contract with each other is fundamental in our constitution, and that any subrogation of this right must work serious disadvantage to all concerned. I am not willing to admit, however, that the state may not, through the investigation and conciliatory intervention of officials provided for by law, do much toward bringing about the adjustment of differences between labor and capital which shall be at once honorable and fair to both sides.

The object is so important of accomplishment as to justify experimental legislation upon the matter. I bespeak for the subject your most thoughtful and careful deliberation, with assurance of earnest executive co-operation in any feasible plan which your wisdom may devise.

#### CONCLUSION.

In conclusion permit me to express the hope that the session now opening may be characterized throughout by a sincere regard for the public interest. Economy may well be the watchword of the servants of a commonwealth so well endowed with material resources as ours; but it is a true economy which the people desire; an economy which tends rather to a wise expenditure of public funds than to a niggardly provision for those purposes which a high conception of the public welfare demands.

Every avenue of expenditure should be carefully scrutinized. Every department of the state government should be watched with a jealous eye. Unnecessary and superfluous offices in all departments should be abolished, and no new offices should be created for which there is not an unmistakable demand in the interest of the public service.

The session should be as short and expeditious as is compatible with an honest and thorough consideration of the measures which shall come before you

In all your efforts to advance the moral and material welfare of the people of the state you will have, I assure you, my hearty co-operation.

WILLIAM H. UPHAM.

EXECUTIVE CHAMBER,

STATE OF WISCONSIN.

---

REPORT OF THE SECRETARY OF STATE.

---

DEPARTMENT OF STATE,  
October 10, 1894.

*To His Excellency, GEORGE W. PECK,*  
*Governor of the State of Wisconsin.*

SIR:—In compliance with the requirements of law, I have the honor to present the biennial report of this department, showing the condition of the several funds, with a complete statement of receipts and disbursements of said funds for the biennial fiscal term closed September 30, 1894.

I have also appended the usual detailed statements and statistical tables deemed of interest to the people of the state.

T. J. CUNNINGHAM,  
*Secretary of State.*

## GENERAL STATEMENT.

The aggregate result of the financial transactions during the fiscal years ending Sept. 30, 1893 and 1894, is as follows:

	Balance Sept. 30, 1892.	Receipts for 1893.	Receipts for 1894.	Total.	Disburse- ments for 893.	Disburse- ments for 1894.	Total dis- bursements for 1893 and 1894.	Balance Sept. 30, 1894.

General Statement.

SECRETARY OF STATE.

---

*General Fund.*

---

## GENERAL FUND.

This fund embraces all the revenues of the state applicable to the payment of the ordinary expenses of the state government.

The sources from which it is derived are, a tax on civil actions, license of railroad companies, plank road companies, log driving and booming companies, savings, loan and trust companies, telegraph and telephone companies, insurance companies, and hawkers and peddlers; fees received from notaries public and from the various state offices, and from the sale of books and reports.

The expenditures therefrom are authorized by permanent and temporary appropriations, and by the several laws requiring the Secretary of State to audit accounts.

A statement of the transactions of this fund will be found in detail under appendix "A" in this report.

The receipts and disbursements have been as follows:

## RECEIPTS.

	1893.	1894.

*School Fund Income.*

## SCHOOL FUND INCOME.

The interest received on school fund investments and on the principal due for sales of school lands, and the mill tax on all assessable property in the state (287-1885), constitutes the school fund income.

The amount of this fund in the treasury on the first day of June is annually certified by the Secretary of State to the State Superintendent of Public Instruction, and by him apportioned under the provision of section 554 of the Revised Statutes.

The receipts and disbursements during the last two years have been as follows:

## RECEIPTS.

	1893.	1894.
Interest on land certificates and loans.....	\$21,202 90	\$24,092 87
Interest on certificates of indebtedness.....	109,301 18	109,616 82
One mill tax.....	653,057 00	654,943 00
Interest on bonds.....	48,663 30	48,431 92
Interest on special loans.....	14,569 93	16,871 80

Loan to board of education, city of Ripon....	.....	2,500 00
Total.....	<u>\$229,922 00</u>	<u>\$230,663 00</u>

### UNIVERSITY FUND INCOME.

This fund is derived chiefly from the annual tax levy authorized by section 390, Revised Statutes, and from the interest on university land certificates and loans, and the 1-8 mill tax on all assessable property in the state, chapter 300, laws of 1885 — with an additional 1-10 mill tax annually for six years, to be used for building purposes — chapter 21, laws of 1891 — and is perpetually appropriated to the support and endowment of the state university by section 389, Revised Statutes. By provision of said section, this entire fund is placed at the disposal of the board of regents by transfer to the treasurer of said board and the detailed record of its expenditures is kept by said treasurer distinct and independent of the accounts of the state.

*University Fund Income.*

The receipts and disbursements during the last two years have been as follows:

RECEIPTS.

	1893.	1894.

## DRAINAGE FUND.

This fund consists of one half the proceeds of sales of all swamp and overflowed lands received by the state from the United States, and is distributed on the 30th day of September, under the provisions of section 254, Revised Statutes, as amended by chapter 264, laws of 1883, among the several counties wherein such lands lie, in proportion to the amount of sales in the respective counties. The moneys so paid are then apportioned by the county clerks to the several towns in their respective counties, and are expended under direction of the town board in draining and reclaiming the swamp lands in such town, and in constructing roads and bridges over such swamp lands. The number of acres of unsold land is 230,439.52.

The cash receipts and disbursements during the last two years have been as follows:

RECEIPTS.		
	1893.	1894.
Interest on land certificates....	\$145 34	\$4,004 48
Sales of land.....	22,306 24	10,743 86

WISCONSIN RAILROAD FARM MORTGAGE LAND COMPANY.

Chapter 235, laws of 1882, authorizes the Commissioners of the Wisconsin Railroad Farm Mortgage Land Company to close up the business of said corporation, and to turn over and to pay to the State Treasurer all its money and bank accounts, and to take his receipt therefor, and at the same time to make its report in writing, to the Secretary of State, of its proceedings under this act. Accordingly the said commissioners paid the sum of \$8,935.09 into the Treasury, and deposited with the Secretary of State, the books, together with a list of claimants to whom dividends are yet due with the amount set opposite their respective names.

## ALLOTMENT FUND.

Section 3, of chapter 190, general laws, 1862, directed the State Treasurer to receive such sums of money, as might be placed in his hands by any volunteer making an allotment,

*Appropriations.*

as provided by the act of congress, approved December 24, 1861, and dispose of the same according to the order and direction of such volunteer. This fund consists of moneys so received by the State Treasurer and yet unclaimed by the beneficiaries named by the volunteers. There having been no payments made from the fund during the year, the account stands as follows:

Balance, September 30, 1892 .....	\$916 54	
Balance, September 30, 1894 .....	.....	\$916 54
	<u>          </u>	<u>          </u>

APPROPRIATIONS.

The following table exhibits the balance due on the direct appropriations made to the several charitable and penal institutions of the state for the years 1893 and 1894, the payments therefrom, including the amounts set apart for the salaries and expenses of the State Board of Control, and the balances remaining unexpended at the end of the fiscal year:

	Remaining due on appropriations Sept. 30, 1892.	Appropriations 1893 and 1894, including am't paid by counties.	Paid to Sept. 30, 1894.	Remaining unexpended Sept. 30, 1894.

*Estimates of Expenditures and Revenues.*

---

## STATE DEBT.

The bonded debt of the state, created in 1861-63, for the purpose of carrying on the war for the maintenance of the Union, has now all been paid or converted into certificates of indebtedness to the Trust Funds, except one thousand dollars, which was paid from the General Fund, August 13, 1888.

The distribution of the debt on the 30th *ultimo*, was as follows:

Certificates of indebtedness, school fund.....	\$1,563 700 00
Certificates of indebtedness, normal school fund....	515,700 00
Certificates of indebtedness, university fund.....	111,000 00
Certificates of indebtedness, agricultural college fund.....	60,600 00
	<hr/>
	\$2,251,000 00
	<hr/> <hr/>

## ESTIMATES OF EXPENDITURES AND REVENUES.

In accordance with the requirements of subdivision 13, section 144, Revised Statutes, I append the following detailed estimate of expenditures to be defrayed from the treasury during the years beginning January 1st, 1895, and January 1st, 1896, based on expenses of former years, in which are shown the amounts provided by permanent or temporary appropriations and the amount required to be provided for as before stated.

I also submit a careful estimate of the revenues from which such expenditures are to be defrayed.

*Estimate of Expenditures.*

## EXPENDITURES FOR GENERAL PURPOSES.

Governor's office .....	\$7,000 00
Lieutenant Governor.....	1,000 00

Wisconsin School for Deaf.....	40,000 00
Wisconsin School for Boys.....	55,000 00
State Prison.....	10,000 00
State Public School.....	40,000 00
	<hr/>
	\$380,000 00
	<hr/> <hr/>

## EDUCATIONAL PURPOSES.

One mill tax, School Fund income.....	\$600,000 00
State University.....	135,000 00
Free high schools.....	50,000 00
Interest on certificates of indebtedness.....	157,570 00
Fifth normal school.....	10,000 00
New normals.....	30,000 00
	<hr/>
Total.....	\$982,570 00
	<hr/> <hr/>

---

*Estimate of Revenues.*

---

## REVENUES.

1. Estimated balance in general fund .....	\$10,000 00
<hr/>	
2. Licenses and fees.	
Railway companies, license .....	\$1,200,000 00
Insurance companies, license .....	130,000 00
Telegraph and telephone companies, licenses .....	20,000 00
Hawkers and peddlers .....	15,000 00
State tax on suits .....	7,000 00
From counties for maintaining insane in state hospitals, and the Industrial School for Boys .....	158,000 00
Railway car companies.....	1,000 00
Miscellaneous sources .....	70,000 00
<hr/>	
Total .....	\$1,601,000 00
<hr/>	
3. Taxes authorized by law.	
Interest on state indebtedness .....	\$157,570 00
Annual levy for State University .....	135,000 00
Annual levy for free high schools .....	50,000 00
Annual levy for fifth normal school .....	10,000 00
Annual levy for new normal schools.....	30,000 00
One mill tax for common school income.....	600,000 00
<hr/>	
Total .....	\$982,570 00
<hr/>	

## TAX REDUCTION.

From the foregoing estimates it appears that the receipts of the general fund will be ample to meet the necessary expenses of the state government during the next biennial term. Of the \$977,315.71 now on hand in the general fund of the State Treasury, the sum of \$742,570 has been transferred to reduce the state tax levy under the following resolution:

WHEREAS, It appears that after reserving sufficient moneys for defraying the entire expense of state government from this date to January first, 1895, there is a surplus in the general fund in the State Treasury of \$742,570 derived as follows:

Recovered in judgments from former state treasurers, to the credit of the general fund.....	\$327,902 55
Direct war tax refund .....	89,466 10
Interest from bank deposits on general fund .....	46,644 78
Railroad and insurance license and office fees .....	278,556 57

---

*Tax Levy.*

---

and that such surplus without detriment to the public service can be applied as a portion of the state tax levy; now, therefore,

*Resolved*, That we, the undersigned, Governor, Secretary of State and State Treasurer, in pursuance of Section 1069 a. of Sanborn & Berryman's Annotated Statutes, do hereby apply as a portion of the state tax levy, the sum of \$742,570 to be applied as follows:

The one mill tax for the support and maintenance of the Common	
Schools .....	\$600,000 00
Fifth Normal School tax .....	10,000 00
State University tax.....	132,570 00

Leaving to be levied in accordance with section 1070 of chapter 48 of the Revised Statutes of the state of Wisconsin, the sum of \$240,000.00, being \$157,570.00 to pay the interest upon the certificates of state indebtedness incurred between the years 1866 and 1886.

For the support and maintenance of Free High Schools.....	\$50,000 00
For one twentieth mill tax for Normal Schools . . . . .	30,000 00
For the support and maintenance of the State University.....	2,430 00

IN WITNESS WHEREOF we have hereunto set our hands, and the Great Seal of the State of Wisconsin, this 20th day of July, in the year of our Lord One Thousand Eight Hundred and Ninety-four.

GEO. W. PECK, Governor.

T. J. CUNNINGHAM, Secretary of State.

JOHN HUNNER, State Treasurer.

## DETAILS OF REPORT.

For the purpose of easy reference, the full financial details required by law, and such tabular statistics as may be deemed of interest, are classified as follows:

## "A"

Includes detailed statements of the receipts and disbursements of the several funds belonging to the state for the years 1893 and 1894.

## "B"

Showing the relative value of real and personal property as assessed by the State Board of Assessment for the year 1894.

## "C"

Showing the valuation of taxable property of the several counties of the state, as determined by the State Board of Assessment for the years 1893 and 1894, and the apportionment of the state tax, and special charges for said years.

## "D"

Abstract of assessment rolls of the several counties as returned to this department for the year 1893, showing the average assessed value of live stock and real estate by counties, and total assessed value of all property in the state.

## "E"

Valuation of property in the different counties in the state as fixed by the county boards of supervisors and

---

*Details of Report.*

---

town assessors, and the amount of state, county, town, city and village taxes levied in 1894.

"F"

Statement showing for what purposes the county tax was expended in the several counties for the year ending December 31, 1893.

"G"

Statement showing all indebtedness of towns, cities, villages and school districts, December 31, 1893.

"H"

Statement showing all indebtedness of the several counties, December 31, 1893.

"I"

Statement of the principal farm products grown in 1893, and statement of the principal farm products growing at the time of making the annual assessment for the year 1894.

"J"

Report of agricultural societies for 1893.

"K"

Abstracts of marriages, births and deaths reported to this department during the two years ending December 31, 1893.

"A."—General Fund Receipts for 1893.

*Report of the Commissioners of Public Printing.*

---

STATE OF WISCONSIN.

## REPORT

OF THE

## COMMISSIONERS OF PUBLIC PRINTING.

DEPARTMENT OF STATE,

October 10, 1894.

To His Excellency, GEO. W. PECK,

*Governor of the State of Wisconsin.*

SIR:—In conformity to law we have the honor herewith to submit our second biennial report of the transactions in public printing, publishing, and the purchase of paper for the fiscal term from October 1st, 1892, to September 30th, 1894.

The respective amounts paid for publishing and advertising are as follows.

Publishing general laws in newspapers.....	\$42,100 00
Publishing local laws in newspapers .....	478 80
Advertising sales of land.....	915 05
Publishing, advertising, etc .....	1,955 15
Publishing laws in state paper.....	1,461 00
Total .....	<u>\$46,910 00</u>

## COST OF PRINTING, BINDING, ETC.

The total cost of all printing for the legislature since the last report was \$6,671.66,

The cost of printing the Blue Book was \$5,594.72.

---

*Report of the Commissioners of Public Printing.*

---

The cost of all other printing required by the state in its several departments including reports, blanks, etc., was \$47,623.67.

The grand total being \$59,890.05.

As the cost of printing for each department is given in detail in the Secretary of State's report it is unnecessary to repeat it here. A detailed statement of the cost of each job, together with a specimen of the same is filed in the Secretary of State's office and is open for inspection. For detailed statement of the cost of printing for the several departments see Secretary of State's report, pages, 61, 71, 146 and 154.

#### COST OF PAPER.

There has been paid for paper during the past two years the sum of \$29,204.79. Of this sum \$15,467.49 was for paper purchased under the contract of September 2nd, 1892.

#### STATE PRINTER.

During the past two years the Democrat Printing Company, of Madison, has been the State Printer; the contract having been taken at  $63\frac{1}{2}$  per centum of discount from the maximum rates established by law. The Democrat Printing Company will succeed itself as State Printer, having been awarded the contract for two years, commencing January 1st, 1895, at  $61\frac{2}{3}$  per centum discount from established rates.

*Report of the Commissioners of Public Printing.*

The following schedule shows the maximum and contract rates for 1893 and 1894:

	Maximum Rate.	Contract Price.
<b>COMPOSITION PER 1,000 EMS.</b>		
Plain.....	\$0.60	\$.22
Figure work.....	.90	.33
Rule and figure work.....	1.20	.44
<b>PRESS WORK.</b>		
Per token of 250 impressions.....	.60	.22
<b>FOLDING.</b>		
Per 100 sections of 16 pages....	.10	.03667
<b>STITCHING, TRIMMING AND COVERING PAMPHLETS.</b>		
Per 100 copies.....	1.25	.45837
<b>BINDING, INCLUDING STOCK, PER VOLUME.</b>		
In paste-board, 16 mo. or 12 mo.....	.35	.12834
In cloth, 16 mo. or 12 mo.....	.45	.165
In full sheepskin, 16 mo. or 12 mo.....	.80	.29336
In full calfskin, 16 mo. or 12 mo.....	1.25	.45837
In Turkey Morocco, 16 mo. or 12 mo.....	1.50	.55
In half Turkey Morocco, 16 mo. or 12 mo.....	.75	.275
Flat cap or cap, half binding, sheep back.....	3.00	1.10
Flat cap or cap, Russia ends and bands.....	6.00	2.20
Medium or folio post, half binding, sheep back.....	5.00	1.8335
Medium or folio post, full sheep.....	9.00	3.30
Medium or folio post, Russia ends and bands.....	10.50	3.85
Medium or folio post, extra Russia ends and bands.....	12.00	4.40
Medium or folio post, full Russia.....	18.00	6.60
<b>BINDING BLANK BOOKS PER QUIRE, INCLUDING RULING AND STOCK FOR BINDING.</b>

*Report of the Commissioners of Public Printing.*

---

## BIDS FOR PRINTING.

Pursuant to the notice of the letting of the contract for doing the Public Printing for the term of two years from the first day of January, 1895, advertised in accordance with law, the Commissioners of Public Printing met July 27th, 1894, at the office of the Secretary of State, and proceeded to publicly open and consider the bids submitted. Proposals were received as follows:

Taylor & Gleason, Madison, 48 *per centum* of discount from the maximum rates established by law.

Tracy, Gibbs & Co., Madison, 55 *per centum* of discount from the maximum rates.

M. J. Cantwell, Madison, 58½ *per centum* of discount from the maximum rates.

Democrat Printing Co., Madison, 61½ *per centum* of discount from the maximum rates.

King, Fowle & Co., Milwaukee, 70 *per centum* of discount from the maximum rates.

King, Fowle & Co., of Milwaukee, the lowest nominal bidder, having stipulated in its proposal that the printing should be done in Milwaukee, contrary to the law, and to the terms of the advertisement calling for bids, the Commissioners, after hearing argument by the firm's attorneys, and by counsel in opposition for the Democrat Printing Company, of Madison, the next lowest bidder, determined that the proposal of King, Fowle & Co. was irregular, and accordingly awarded the contract for doing the state printing from January 1st, 1895, to December 31st, 1896, to the Democrat Printing Company.

The *per centum* of discount from the maximum rates fixed by law under the new contract is 1½ per cent. less than under the previous printing contract, which was the lowest ever let under the present law. The contract, how-

*Report of the Commissioners of Public Printing.*

ever, is a very favorable one for the state, though it will slightly increase the cost of printing for the ensuing two years.

### PURCHASE OF PAPER.

There was but one general purchase of paper during the past two years. In addition to this two small purchases were made of paper not regularly carried in stock nor ordinarily needed by the state, and the quantity purchased was too small to warrant the expense of advertising.

The regular advertised purchase was February 23rd, 1894. For this purchase sealed bids were received by the Commissioners of Public Printing, as follows:

DESCRIPTION OF PAPER.	H. Niedecken Co., Milwaukee.	Standard Paper Co., Milwaukee.	C. B. Walworth, Eau Claire.	Chicago Paper Co., Chicago.	Bradner, Smith & Co., Chicago.
<b>FIRST CLASS.</b>					
4,000 reams sized and calendered Book Paper, 25x38 inches, weighing 60 pounds per ream . . .	\$.0425	\$.0449	\$.0470	\$.0443	\$.0440
100 reams sized and calendered Book Paper, 21x32 inches, weighing 40 pounds per ream . . . . .	.0425	.0449	.0470	.0443	.0440
<b>SECOND CLASS.</b>					
100 reams extra wove Folio Post, 17x22 inches, weighing 20 pounds per ream . . . . .	.05	.0860	.0650	.08	.0650
150 reams extra wove Folio Post, 17x22 inches, weighing 24 pounds per ream . . . . .	.10	.1035	.09	.09	.0875
100 reams extra wove Folio Post, 17x22 inches, weighing 28 pounds per ream . . . . .	.10	.1035	.09	.09	.0875
350 reams extra wove Double Flat Cap, 17x28 inches, weighing 28 pounds per ream . . . . .	.1030	.1064	.09	.09	.0995
200 reams extra wove Double Flat Cap, 17x28 inches, weighing 36 pounds per ream . . . . .	.0860	.0860	.09	.09	.0995
100 reams Granite Cover Paper, 20x25 inches, weighing 40 pounds per ream . . . . .	.05	.0525	.0550	.0550	.0525
100 reams (either Crane's, Weston's or Parson's Record Medium, 18x23 inches, weighing 40 pounds per ream . . . . .	.17	.22	.1650	.1790	.19
10,000 sheets No. 29 Glazed Board Paper, 17x22 inches per 1,000 sheets . . . . .	15.00	21.25	18.84	18.84	22.18

C. B. Walworth of Eau Claire, was the lowest nominal bidder on the second class papers, but his proposal was found to be insufficient and irregular as the accompanying

*Report of the Commissioners of Public Printing.*

bond contained but one surety, two being required by law. The contract for both classes of papers was accordingly awarded to H. Niedecken Co., of Milwaukee. The contract called for the delivery of the paper at the Capitol, free of all charges, on or before May 1, 1894.

The following exhibit shows the paper purchased, consumed and on hand for the past two years:

DESCRIPTION OF PAPER.	ON HAND SEPT. 30, 1892.		RECEIVED DURING TWO YEARS.		CONSUMED DURING TWO YEARS.		ON HAND OCTOBER 1, 1894.

REPORT  
OF THE  
SUPERINTENDENT PUBLIC PROPERTY.

---

MADISON, WIS., October 2nd, 1893.

To His Excellency, GEO. W. PECK, *Governor*:

I herewith submit to you the annual report of this office.

The annexed tabular statements will explain themselves.

The legislature by chapter 53 of the laws of 1893 extended the provisions of chapter 205 of the laws of 1891 so that this office has distributed in accordance with said law five copies each to Vilas and Iron county for county officers; eleven copies to town clerks of new towns and sixteen copies to the village clerks of new villages. At present there are three copies on hand for distribution. This law also appropriated money to pay for 192 copies of the S. & B. Ann. Statutes for the legislature of 1893.

By chapters 267 and 299 of the laws of 1893 I was authorized to purchase copies of the S. & B. Ann. Statutes to replace such copies as had been lost to the following named members: D. Jennings, J. W. Parkinson, S. A. Peterson, G. A. Abert, O. W. Bowe and A. A. Leissring.

Chapter 70 of the laws of 1893 authorized the purchase of Simons' Digest and Wisconsin Reports to complete sets for new counties and new courts of record, and the counties of Vilas and Iron were furnished at a cost of \$284.90.

The painting and recarpeting of the two legislative

---

*Report of Superintendent of Public Property.*

---

chambers became necessary, which accounts for the heavy expenses in carpets, paint, labor and painters. Painting, \$1,100; carpet in Senate chamber, \$1,577.38; in Assembly chamber, \$1,184.00.

Besides this, the rooms in the basement used by the State Treasurer and Secretary of State have been furnished with steel floors and new iron shelving and filing cases thereby making the records more secure against fire and also providing for more shelf room which will soon be needed.

The cost of new brick work and resetting three boilers, with new pipe coverings over same, amounts to about \$1,000.00, and about \$1,050.00 were expended for new water closets and sewerage.

As to books in my charge, I have received the laws of the second extra session of 1892, the laws of 1893, and the journals of both sessions and they were distributed according to law. I have also received and distributed 250 copies each of the Supreme Court Reports, volumes 81, 82 and 83.

The sales from books in my charge amount to \$399.05.

Yours very respectfully,

E. V. BRIESEN,

*Superintendent Public Property.*

MADISON, WIS., October 1st, 1894.

To His Excellency, GEO. W. PECK, *Governor.*

I herewith submit the report of this office for the year ending September 30th, 1894.

The accompanying statements show the purchase and distribution of stationery and also the amounts expended for labor and all expenses.

By chapter 304 of the laws of 1893, the sum of \$6,000.00 was appropriated for the purchase of new desks for both chambers and new chairs for the Assembly chamber. The legislative committee (Hon. G. W. Pratt, Hon. P. Bechtner, Hon. G. A. Abert, Hon. W. H. Wheelihan, Hon. H. C. Putnam) submitted drafts and specifications under Joint Resolution No. 49 Senate. I advertised for proposals according to these plans and specifications and with consent of your excellency submitted the proposals to the committee in March. The committee recommended that the proposals for desks be rejected and that new bids for desks with a sample desk be asked for from the following parties in this state: The Phoenix Manufacturing Co. of Eau Claire, O. J. Schoenleber, The Northwestern Furniture

---

*Report of Superintendent of Public Property.*

---

Co., The Wollaeger Manufacturing Co. and Clement, Williams & Co., of Milwaukee. The committee met July 2nd, 1894, and recommended the purchase of desks from the Wollaeger Manufacturing Co. of Milwaukee as follows: 36 Senate desks at \$32.50,—\$1,170.00 and 102 Assembly desks at \$24.50,—\$2,499.00, and the purchase of 105 Assembly chairs from Clement, Williams & Co., of Milwaukee, at \$8.50,—\$892.50. The furniture is to be delivered at the capitol before December 15th, 1894.

The painting of the Assembly chamber commenced in November of 1892 was completed and I estimate the expense at \$1,500.00.

New steel files were furnished in the vault of the State Treasurer and in the vault of the Adjutant General at a cost of \$2,154. This was necessary in order to better utilize the room and provide more file room so that other rooms would not be necessary.

Sanborn & Berryman annotated statutes were furnished under chapter 205 of the laws of 1891, as amended, one copy each to city clerk of Rhinelander, seven village clerks, six town clerks, superior court of Douglas county, newly organized state normal school at Stevens Point, and four copies to the county officers of Price county to replace copies destroyed in recent fire at Phillips.

The session laws and revised statutes were also furnished to the county officers of Price county. But no Wisconsin Reports have yet been furnished to the county judge or clerk of the circuit court, of said county.

The amount received for books sold during the year is \$327.45.

Yours very respectfully,

E. V. BRIESEN,

*Superintendent of Public Property.*

# REPORT OF STATE TREASURER.

---

MADISON, Oct. 13, 1894.

To His Excellency, GEORGE W. PECK,

*Governor of the State of Wisconsin:*

SIR: In accordance with the requirements of law, I have the honor to respectfully submit herewith the biennial report of the receipts and disbursements of this office during the fiscal years ending September 30, 1893 and 1894, exhibiting a full statement of the financial transactions of this department and including also a detailed statement of the operations of the bank department.

I desire to again call your attention to the law which directs that the treasurers of the counties of Douglas, Polk, Bayfield, Ashland, Burnett and Marathon shall pay the amount of state taxes (charged to their respective counties), on or before the second Monday in July in each year, and would suggest that the legislature be asked to amend the law, so that the payment of taxes from all counties shall be made on the first Monday in February in each year.

Uniformity in the collections would thereby be secured and much annoyance saved to this department and to the Secretary of State.

In view of the fact that the banking laws of the State are very defective, I would recommend that the legislature be requested to enact a proper law (to be voted upon by the people), which would place Wisconsin on a level with Illinois, Michigan, Iowa and Minnesota.

I am sir, very respectfully,

JOHN HUNNER,

*State Treasurer.*

*Balance Sheet.*

## BALANCE SHEET.

The balances to the credit of the several funds Oct. 1, 1893, were as follows:

General .....	\$463,041 41	
School .....	5,336 23	
School Income .....	37,014 63

## RECEIPTS AND DISBURSEMENTS IN DETAIL.

---

GENERAL FUND.

This fund embraces all the revenue of the state applicable to the payment of the ordinary expenses of the State Government.

The sources from which it is derived are, from the annual tax levied for the support of Free High Schools, Fifth Normal School, Hospitals for the Insane, and the Industrial School for Boys, tax on civil actions, license on railroad companies, plank road companies, telegraph companies, telephone companies, insurance companies, trust companies, boom companies, hawkers and peddlers, notary public fees, office fees, sales of laws and reports, and apportionment of interest on deposit with Bank Depositories. The expenditures therefrom are authorized by permanent and temporary appropriations, and by the several laws requiring the Secretary of State to audit accounts.

The receipts and disbursements have been as follows:

## GENERAL FUND RECEIPTS.

## ANNUAL TAX.

Section 496, Revised Statutes, and Chapter 352, Laws of 1885, direct a levy of a tax for the support of Free High Schools.

Chapter 364, Laws of 1885, directs a levy of a tax for the support of the Fifth Normal School, located at Milwaukee.

There is also charged to each county and included in the

*General Fund Receipts.*

tax, such sum as is properly chargeable to such county on account of its insane in the hospitals, and the inmates in the Industrial School for Boys.

The tax collected from the several counties for above purposes during the fiscal years ending September 30, 1893, and September 30, 1894, is as follows:

## COUNTIES.

## SCHOOL FUND.

The school fund is composed of:

1. Proceeds of land granted by the United States for support of schools.
2. All moneys accruing to the state by forfeiture or escheat.
3. All penalties for trespass on school lands.
4. All fines collected in the several counties for breaches of penal laws.
5. All funds paid as an exemption from military duty.
6. Five *per cent.* of net proceeds of sale of United States public lands.

The unsold land, the proceeds of which are applicable to this fund, is 47,831.47 acres. The cash receipts and disbursements during the last two years have been as follows:

## RECEIPTS.

	October 1, 1892, to Sept. 30, 1893.	October 1, 1893, to Sept. 30, 1894.

*School Fund Income.*

## SCHOOL FUND INCOME.

The interest received on School Fund investments, on the principal due for sales of school lands and on moneys belonging to the School Fund and School Fund Income on deposit in Bank Depositories and the mill tax levied under chapter 287, laws of 1885, constitute the School Fund Income.

The amount of this fund in the treasury on the 1st day of June, is annually certified by the Secretary of State to the State Superintendent of Public Instruction, and by him apportioned under the provisions of section 554, of the revised statutes, among the several counties of the state, for the use of common schools in the manner provided by law. The apportionment is made according to the number of children in each town, village and city over the age of four and under the age of twenty years, as shown by the report of the State Superintendent during the year preceding. The rate for the present year was one dollar, thirty-five cents and seven mills *per capita*.

The receipts and disbursements during the last two years have been as follows:

## RECEIPTS.

	Oct. 1, 1892, <i>to</i> Sept. 30, 1893.	Oct. 1, 1893, <i>to</i> Sept. 30, 1894.
One mill tax.....	\$653,057 00	\$654,000 00
Interest on certificates of indebtedness, State of Wisconsin.....	109,301 18	109,459 00

*Drainage Fund.*

## DRAINAGE FUND.

This fund consists of one-half the proceeds of sales of all swamp and overflowed lands received by the state from the United States, and one-half of the amount received from the sale of indemnity lands, chapter 340, laws of 1889, and is distributed on the first Monday of October among the several counties, wherein such lands lie, in proportion to the amount of sales in the respective counties. The moneys so paid are then apportioned by the county clerks to the several towns in their respective counties, and are expended under direction of the town board in draining and reclaiming the swamp lands in such town, and in constructing roads and bridges over such swamp lands. The number of acres of unsold land is 230,438.52. The cash receipts and disbursements during the last year have been as follows:

## RECEIPTS.

	Oct. 1, 1892, to Sept. 30, 1893.	Oct. 1, 1893, to Sept. 30, 1894.
Sale of lands.....	\$22,306 24	\$14,576 97

Cash items.....	371,727 61	392,503 36
U. S. currency.....	1,695,674 63	519,785 13
Due from banks.....	5,898,438 34	5,227,627 23

OFFICE OF STATE TREASURER,

MADISON, WIS., July 16, 1894.

I hereby certify that the foregoing statement is an abstract of the semi-annual reports made to this office by the state banks as far as it was practicable to arrange the items under general heads, in pursuance of the provisions of the 41st section of the act entitled, "An act to authorize the business of banking," approved April 19, 1852.

JOHN HUNNER,

*State Treasurer.*

# SIXTH BIENNIEL REPORT

OF THE

# STATE SUPERINTENDENT.

---

Office of the State Superintendent,

Madison, Wis., November 15, 1894.

It is the design of this report to present in general statements and in statistical tables the condition of the educational affairs of the state, so far as they come within the purview of the state superintendent. Private schools that are not incorporated are not required by law to report to this office, and while the requests for information have generally elicited courteous responses from those in charge of these schools, these statistics are still incomplete. The statistical tables embodied in this report cover the two years ending June 30, 1894. Its general statements are applicable to the years ending December 31, 1894.

Steady progress has been made in every branch of the public school service. It is gratifying to report increased efficiency in the university, the normal and free high schools of the state. The constantly augmenting numbers that crowd the halls of these and of other institutions of learning show that the material prosperity that has caused Wisconsin to take high rank among her sister states has incited her people to achieve equal success in mental and moral progress. If the rural

---

*Introductory.*

---

schools have shared but slightly in this advance the causes that retard their progress are not far to seek. Many of them lie in eddies that are affected but little by the general currents of thought. A brief statement of the condition and prospects of the various public school interests of the state may be found under their appropriate titles.

Many school problems were discussed in the last biennial report, and as the conditions remain substantially the same, and as my views regarding them have undergone no material modification, I refer to the last report as embodying views which it is not thought necessary to repeat.

*Statistics.*

## CENSUS STATISTICS.

CENSUS.	1893.	1894.
Number between 4 and 20 residing in the state .....	637,681	665,268
Number between 7 and 13 residing in the state .....	287,566	296,841

*Some Evidences of Progress.*

---

**SOME EVIDENCES OF PROGRESS.**

The political years beginning with January, 1891, and closing with January, 1895, have witnessed marked progress in the material equipment of our institutions of higher learning. At the university the expenditures for buildings, grounds and equipment are in excess of \$400,000. The principal items may be approximately stated as follows:

Dairy Building.....	\$35,000
Law Building.....	85,000
Horticultural Building.....	23,000
Chemical Laboratory, ventilation.....	5,000
President's House, addition and repairs.....	12,000
Armory and Gymnasium Building.....	130,000
Machine Shops, extension.....	30,000
Machine Shops, new machinery.....	10,000
Central Heating Plant.....	40,000
Phys. & Chem. Apparatus, special appropriations.....	5,000
Library, special appropriation.....	5,000
Camp Randall, purchase.....	25,000

The accommodation for pupils in the normal schools of the state have been nearly doubled within the same period. For building, repairing, and equipping the expenditure exceeds \$200,000 and may be stated in round numbers as follows:

Platteville.....	\$25,000
Whitewater, including rebuilding of burned wing.....	30,000
Milwaukee.....	35,000
Oshkosh.....	35,000
River Falls.....	2,500
Stevens Point, new building.....	80,000

At the same time the salaries of the instructional force have been increased:

At the University.....	\$80,000
At the old Normal Schools.....	20,000
Salaries at the new Normal School amount to.....	17,000

The total increase of expenditure for new buildings, extensions, equipment and salaries exceeds \$730,000.

---

*Some Evidences of Progress.*

---

The legislature of 1891 gave to the university a one-tenth mill tax for six years for the construction of new buildings and the repair of old ones. The income from this source, including this fall's tax levy, is about \$260,000. The additional income from this source will be not less than \$120,000. In 1893, for similar purposes, general expenses and the purchase of Camp Randall, the legislature gave the university \$165,000.

In 1891, the legislature made special appropriations of \$10,000 each to Whitewater and Platteville for additions to their buildings which the board supplemented with \$5,000 to each from its own funds. At the last session \$70,939.02 was appropriated from the drainage fund to the normal school fund income to aid in establishing two new normal schools. A one-twentieth mill tax was also authorized to aid in the maintenance of these schools. The income from this source last year was \$32,000 and was paid from the general fund. For the current year, owing to the reduction in the valuation of the state, it will be \$30,000.

Of the direct war tax (\$441,333.67) refunded by the general government, the legislature of 1891 gave to the

Common school fund.....	\$141,672.04
Common school fund income.....	23,568.57
Normal school fund.....	70,939.03
Normal school fund income.....	44,748.91
Drainage fund.....	70,939.02

This latter sum the legislature of 1893 transferred to the normal school account, as above mentioned. One hundred and one thousand dollars of the first item was devoted to the liquidation of state indebtedness to the school fund on account of a debt of the state to this fund, resulting from a settlement between the state and the United States government, by which the United States government withheld the sum of \$101,262.33 from the state on account of Rock River canal lands.

---

*Some Evidences of Progress.*

---

This amount was due the state from the proceeds of the sales of public lands, five per centum of which was made a part of the school fund by the constitution. This addition to the school fund rendered unnecessary the further levy of \$7,080.36 as an annual tax to pay the interest on this indebtedness which was required by section 247, R. S. The application was made under chapter 453, laws of 1891.

From the interest received from money on deposit in banks the land commissioners have credited to the

Common school fund income.....	\$29,865.39
Normal school fund income .....	14,906.26
University fund income .....	7,774.91

From the proceeds of the judgments against ex-treasurers the special commissioners gave the

University .....	\$52,214.80
Normal Schools .....	47,787.20

By keeping the school funds almost continuously and completely loaned the commissioners have been able to credit the various school funds with an amount in excess of former years of more than \$160,000.

Gratifying as is the progress of the university in material things, the change in its standards and aims is much more gratifying. The increased interest of the students in their studies, their desire for greater excellence in scholarship, and their generous cooperation with the president and faculty in their efforts to beget enthusiasm for sound learning and right conduct are manifest in all the phases of university life. Recalling the fact that the annual expenditure by the state and the students is more than three quarters of a million of dollars it is evident that the change is second to no reform accomplished within the state in recent years; but the financial gain is of little consequence when compared with the gain or loss of the only opportunity for an education and of a better chance in life for those who enter the university's doors.

---

*Some Lines of Effort.*

---

## SOME LINES OF EFFORT.

The changes in the law which require the state superintendent's approval of the legal qualifications of instructors in free high schools have resulted in a decided improvement in the character of the instructional force. The increasing vigilance and strictness of supervision, having regard not only to the courses of study, quality of instruction and necessary apparatus and library facilities but also to the comfort and decency of the accommodations afforded, has awakened a deeper interest in these schools and improved their character. Since in them more teachers in the common schools receive help than are directly aided by the university and normal schools together, any improvement is a matter of public congratulation.

I record with much satisfaction the state's abandonment of provincialism in the matter of certificates and diplomas. Heretofore none but documents granted in Wisconsin and successful teaching in her public schools were recognized by law, and no training that our best institutions could give was sufficient to qualify for teaching a single probationary year. Now Harvard, Yale and Williams have legal equality with Ripon, Lawrence and Beloit. An equivalent life certificate granted in another state has legal equality with our own, and our own university, college and normal school diplomas are a legal license to teach for at least one year. Wisconsin is now hospitable to talent and culture irrespective of state lines.

The record of certificates granted and diplomas and certificates countersigned is as follows:

*Some Lines of Effort.**Diplomas and certificates countersigned by the State Superintendent during the four years ending September 30, 1894.*

	From Sept. 30, 1890, to Sept. 30, 1892.	From Sept. 30, 1892, to Sept. 30, 1894.

Milwaukee female college . . . . .	1
Unlimited state certificates issued . . . . .	103
Limited state certificates issued . . . . .	91
Total . . . . .	1,208

The number of cases of appeal heard and determined between January, 1891, and December 1st, 1894, is ninety-one. The amount and perplexity of the labor involved can be appreciated only from a knowledge of the magnitude and importance of the interests involved and the desperation and bitterness with which these contests are waged. It is a matter of no little satisfaction to be able to state that no decision rendered has been called in question in the courts. This fact is largely due to the patient and painstaking effort, wisdom and fair-mindedness of the assistant superintendent, Mr. Charles A. Hutchins.

The Manual of the Course of Study for Common Schools was revised and largely rewritten in 1891. An edition of 15,000 copies was exhausted in about two years, necessitating republication. It has been again carefully revised and largely rewritten. An edition of 20,000 copies was published in July, 1894, which after supplying the counties this fall should meet all reasonable demands for two or three years.

A new edition of the school code, published in 1892, has received high commendation.

---

*Some Lines of Effort.*

---

A circular entitled "Architecture, Ventilation and Furnishing of Schoolhouses" was issued from this department in the fall of 1892. It was designed to aid school officers in the construction of suitable school buildings and to encourage provision for more healthful and pleasant surroundings. It has received a cordial welcome and evidence of its usefulness is abundant. It is hoped that it will lead to material increase in the comfort and convenience of the schools.

A High School Manual, a pioneer in this field, was published early in the present term. An edition of 1,500 copies was exhausted within a year of its publication and urgent demands for additional numbers had to be denied. A careful revision has been made and an edition sufficient for several years will be received from the press before the close of the month. The stability of the high schools requires that their courses should not be frequently changed.

A faithful attendance upon the meetings of both boards of regents and their committees, together with the protracted and perplexing labors incident to the execution of the laws relating to high schools, has directed the attention and effort of the state superintendent more exclusively to the institutions for secondary and higher learning than seemed to him desirable. It had been his ambition to do more than had heretofore been attempted for the common schools; but this seeming diversion may not be without compensations. No great system of public schools has ever yet been developed from below upwards. The order of growth has not been common schools, high schools and academies, normal schools, colleges and universities, but, in a general way, the reverse. Whatever, therefore, tends to strengthen the foundations upon which a vigorous system of public schools can be built cannot be lost effort. With a goodly proportion of cultured people in every community no portion of the state will long be content with an inefficient system of common schools.

---

*Some Lines of Effort.*

---

It must not be inferred, however, that the common schools have not received an unusual share of attention. The commission of the last legislature to revise the laws relating to schools has directed the chief effort of the department during the past two years to the condition of these schools and the method of their improvement. The school laws of all the states have been collected and carefully studied. The superintendent has visited all the New England states, New York, Pennsylvania, Ohio, Indiana, Illinois and Iowa, and consulted their superintendents in regard to their laws and administration. Naturally much has been gathered from these conferences regarding the defects of school systems and the judgment of school officers as to the best way to remedy them. The reports of a long line of able men who have had to do with the supervision of the schools in our own state have been a mine of information as to the inherent and perhaps ineradicable defects in our own system. The results of this study, observation and reflection have been embodied in a code which will be submitted at the proper time to the legislature. No more conscientious and painstaking labor has been performed in this office. It is a matter of keenest regret that its perfection cannot be proportionate to the honesty and faithfulness of the effort. Four men in the department who come to their present position through almost every grade of office below,—district officer and teacher, village and high school principal, town, city and county superintendent, no one of these positions being without its representative, have given their best thought and effort to the work after long experience with the administration of the system as a whole. I am confident that the adoption of this code without essential modification will give Wisconsin the most simple, consistent and efficient system of common school laws in the union.

---

*Missing Funds and the State Debt.*

---

## MISSING FUNDS AND THE STATE DEBT.

During my first term I caused a prolonged and careful examination of the records in the office of the secretary of state relating to the management of the school funds, to be made. The results of this investigation were published in the last biennial report. The revelation of heavy losses to these funds in former years and of failure properly to account for large sums shown to have been received enabled and doubtless prompted the attorney general to institute proceedings against the general government, from which, if the claim shall prove to be well founded, several millions of dollars may be recovered. The prosecution of the case should at least result in balancing the books in the secretary of state's office and showing the destination of more than a million of dollars. Chapter 453 of the laws of 1891, is unique in the legislation of Wisconsin in that it is the only statute relating to the disposition of money repaid by the general government, for aid in suppressing rebellion. The amount previously returned is variously reported at \$1,059,162.02, \$1,147,175 and \$1,394,206.59, and yet there is no law or contemporary report of secretary of state or treasurer indicating its destination. If it ever reached the treasury it seems to have drifted through, leaving no trace of its coming or going. Since more than five and a quarter millions of dollars is reported as having been spent for war purposes it is not apparent why only one and a quarter millions was collected.

It is not to the credit of the state that its books should balance month by month for sixteen years with a debit of \$206,133.04 to the United States. In spite of wise constitutional limitations of state indebtedness and urgent provisions for freeing the state from debt, we still maintain a state debt of two and one-quarter millions of dollars upon which we annually pay seven per cent. interest. Upon this debt we have already paid more than

---

*Penal Fines.*

---

four and one-half millions of dollars and the beginning of the end is not yet in sight.

In spite of the necessity for extraordinary expenditures in excess of usual receipts it has been found possible to devote this year nearly three-quarters of a million of dollars to the reduction of taxes. If the affairs of the state be economically administered and the present laws relating to taxes remain, it is evident that a large surplus of revenue can be devoted to the cancellation of the certificates of indebtedness. I recommend immediate legislation to this end.

#### PENAL FINES.

Our research also revealed an annual loss to the school funds probably in excess of \$60,000 from the failure properly to return the clear proceeds of penal fines as required by section 2 of article X of the constitution. I was instrumental in securing the passage of more drastic laws by the last legislature for the collection and return of these fines. There has been a moderate increase in the receipts from this source but not enough to warrant expectation of future obedience to the law. As a basis of future action, I requested the inspector of high schools, Mr. J. A. Sheridan, to examine the records of municipal courts and city and county clerks and treasurers, and am thus able to present important information.

The following table, copied from the books of the city comptroller, shows the amount of fines collected in Milwaukee during the last eleven years.

c—Supt.

*Penal Fines.*

YEAR.	Am't city.	State.
1883.....	\$12,298 50	\$2,176 08
1884.....	12,398 50	2,201 65
1885.....	11,997 96	3,685 31
1886.....	21,624 36	3,433 71
1887.....	16,236 53	4,172 62
1888.....	18,680 90	4,360 17
1889.....	19,546 62	3,486 42
1890.....	30,432 78	3,528 70
1891.....	32,734 69	*937 33
1892.....	23,132 56	*58 70
1893.....	31,683 32	*23 45
	\$230,816 70	\$28,064 09

\* It should be noted that the amount in so-called state cases for each of the years '91, '92, and '93 is unusually small. The comptroller stated, after computation, that \$4,673.07 should be deducted from the amount credited to "city" cases in those years and added to the receipts in "state" cases. This would make the aggregate of city cases \$226,143.63, and of state cases \$32,837.16.

A member of the legislature from Milwaukee who had been for six years city attorney stated in committee that Milwaukee owed the state five or six hundred thousand dollars on this account.

Forgery, embezzlement, assault and battery and larceny are classed by the clerk as "state cases"; all others are classed as "city cases."

Minutes of the court for the month of August, 1894, showed that fines were imposed in 192 cases for "drunk and disorderly conduct," 151 cases for "disorderly conduct," 67 cases for drunkenness, 2 cases of forgery, 1 for playing ball upon the street, 2 for cruelty to animals, 1 for embezzlement, 28 for assault and battery, 1 for indecent exposure, 7 for carrying concealed weapons, 3 for resisting officers, 1 for shooting inside city limits, 9 for keeping unlicensed dogs, 2 violation of boulevard ordinances, 2 keeping houses of ill-fame, 12 inmates of such houses, 1 keeping disorderly house, 1 selling liquor without license.

The character of offences for which fines are imposed under the provisions of the various city charters does not differ materially, but the amounts imposed for similar offences differ widely. In La Crosse, as the records show, they are heavy, in Eau Claire light.

*Penal Fines.*

No division of receipts into state and city fines was made previous to last year; all fines were turned in gross sum into the city treasury. Section 2512, R. S., provides that "All fines and penalties collected in criminal cases, and paid into the treasury of said city, shall be accounted for and paid over to the treasurer of said county. Section 715, R. S., subdivision 5, requires the county treasurer to transmit the same to the state treasurer. The clerk estimates the amount annually collected in state cases at \$5,000 and in city cases at \$25,000 or \$26,000.

The comptroller for the city of La Crosse reported the following amounts turned into the city treasury for the years named:

1888 .....	\$4,079 45
1889 .....	4,550 48
1890 .....	3,968 22
1891 .....	4,200 00
1892 .....	3,488 80
1893 .....	2,870 75
1894 .....	2,075 00
Total, 7 years .....	\$25,832 20

The reports of the city comptroller at Eau Claire show the following amounts received from the municipal court for the years named:

1888 .....	\$535 15
1889 .....	1,248 55
1890 .....	567 40
1891 .....	622 25
1892 .....	383 15
1893 .....	618 65
Total, 6 years .....	\$3,975 15

At Racine the fines are collected by the chief of police and accounted for by him to the city treasurer. The amounts reported for the past five years are:

1890 .....	\$99 49
1891 .....	226 44
1892 .....	206 92
1893 .....	384 51
1894 .....	319 13
Total .....	\$1,236 49

---

*Penal Fines.*

---

At Green Bay the records show the balance due the city after the justice has deducted his fees and the fees paid to witnesses, both improperly charged to this account.

1889 .....	\$50 00
1890 .....	190 00
1891 .....	150 00
1892 .....	250 00
1893 .....	0 00
Total .....	<u>\$640 00</u>

At Oshkosh no separate account of fines is kept; information is therefore meager. There was reported in

1891 .....	\$193 75
1892 .....	363 50
1893 .....	877 83
Total .....	<u>\$1,735 08</u>

Investigation was also made at Appleton, Fond du Lac, Kenosha and Chippewa Falls, but the additional information is not sufficiently significant to warrant cumbering the report with the tabulations.

At Appleton the county board was so dissatisfied with the reports of justices that the district attorney was directed to bring suit to secure a proper accounting and return of the money, but prosecutions have not yet been begun. In one county two years ago the county board refused to allow the claim of a single justice and not one of them dared to sue on the bill which he had sworn was just and true.

The inquiry shows that, in some cases, dockets are not kept, justices pocket the fines, cities and counties appropriate them—some for the support of the poor, some for the police, some for schools and others for general purposes. City charters contain sections similar in effect with the penal statutes of the state. In some places impecunious culprits are taken in the name of the state, while those able to pay a fine are taken in the name of the city or village.

---

*Township Libraries.*

---

Were we to assume that all the facts are ascertained and that they fairly represent the average annual receipts for the past twenty years, we should have an aggregate balance due the state from the ten counties inspected exceeding \$700,000. It must not be forgotten that the process of depletion has been going on for more than forty years and that not ten counties alone but the whole state is involved. How much is due the school fund cannot be approximately estimated; that the amount is large cannot be doubted. The constitution is plain, the laws are explicit, the decisions of our highest courts sweeping; faithful administration alone is wanting. We are stealing from our children the security of a priceless heritage. The administration of justice is corrupted at the fountain. We should be peculiarly sensitive against committing crime when punishing crime. What hope of justice can the accused have when he knows the justice is pecuniarily interested in his conviction? How can we expect the vicious to become virtuous if the representatives of justice are dishonest and the public condones the offense?

If the constitution and laws are wrong or inexpedient, let them be changed in lawful ways; but let us, pending the decision, be law abiding. If the initiative be not taken by the proper state officers I recommend such legislative action as will ensure the recovery of the amount due, and obedience to the laws so long as they may be permitted to stand.

**TOWNSHIP LIBRARIES.**

A love of good reading by a people is regarded as one of the best guaranties of good government and therefore of general prosperity and happiness. It gives not only the diffusion of knowledge that causes general intelligence, but it promotes right living and thinking. One of the best founded causes

---

*Township Libraries.*

---

of complaint against our schools, both public and private, has been the fact that the masses of our people, who have obtained their education in these schools, are not habitual readers of good literature. They have not formed such habits and tastes in childhood as to make all the years of their lives add knowledge by reading. They do not draw inspiration and information easily, lovingly and habitually from books, the great cold storage houses of the best of the world's experience. They believe in good reading but in their homes many of them read little or go by choice to literature that is worthless or morally and socially debilitating. The schools have trained children in the mechanics of reading but have not given that enjoyment in good literature, that zest for books that comes only from continued interest and pleasure in their perusal. Recent experience in the schools has proved, what has long been claimed by our wisest teachers, that the study of text-books must be supplemented by much practice in reading interesting books. Children need plenty of opportunity to read attractive stories, biographies, tales of travel and adventure, till the zest for information and interest, growing by what it feeds upon, begets a craving for wholesome knowledge which can best be satisfied by reading.

Children need opportunity in order to become habitual readers. They must not only know how to read but must have plenty of fresh and interesting material to read while the mind is most rapidly developing and fixing its habits. Give the average child mental food for good wholesome thoughts and he will build up a healthy, vigorous mind. The opportunity to read somewhat widely should be offered to every boy and girl in Wisconsin, no matter how poor their parents may be. The text-book work of every school should be supplemented by a good school library.

The pioneers of Wisconsin believed this and in their consti-

---

*Township Libraries.*

---

tution dedicated the income of the school fund "to the support and maintenance of common schools in each district and suitable libraries and apparatus therefor."

In the early days of the commonwealth the school fund income was small and the first legislatures were content to give the districts authority to use ten per cent. of this income for library purposes. About the time of the commencement of the civil war the legislature set apart a large sum to provide better libraries for the schools, but the money was finally used to help carry on the war and the law was repealed to await the return of better times. Nothing was done, except by individual effort, to provide better school libraries, until 1887, when the legislature passed a law authorizing the town treasurers to withhold, annually, from the school fund income which passes through their hands, ten cents for each person of school age in their respective towns.

The records of the purchases made under this law in 1894 are not complete. Excluding this year the records show purchases by 538 towns classified according to the number of purchases made as follows:

No. towns purchasing seven years .....	28
No. towns purchasing only six years .....	32
No. towns purchasing only five years .....	54
No. towns purchasing only four years .....	97
No. towns purchasing only three years .....	113
No. towns purchasing only two years .....	110
No. towus purchasing only one year .....	104

Twenty-four townships have already reported first purchases in 1894 so that 562 towns have purchased libraries under this law. These towns have 3,643 district schoolhouses located in them. The more populous towns have, as a rule, been most easily persuaded to comply with the law, partly because they are usually wealthier in proportion to their population and partly because many of them contain graded schools whose

---

*Township Libraries.*

---

teachers have been more earnest and active in their efforts to secure libraries. Waukesha, Wauwatosa, Brandon and Palmyra are among the districts supplied under the law.

In many cases where teachers and county superintendents have failed to induce township officers to purchase libraries they have aroused an interest that has caused district officers to buy. A careful estimate shows that nearly two-thirds of the pupils who are attending the district schools in Wisconsin have the use of fair school libraries. The interest in such libraries has been even more marked in the cities and a large proportion of them have fair and some of them excellent libraries.

Under the law it is the duty of the state superintendent to recommend lists of books suitable for such libraries. When these lists were first compiled, the needs of the high schools were considered and they included a large proportion of volumes suited to such schools. Unfortunately some town clerks failed to confine their selections to books adapted to their schools and in their towns the books were little read and there grew up a prejudice against the law. During the administration of the present state superintendent a list of books, all of which are suitable to district libraries, has been compiled, leaving the books better adapted to graded and high schools to be included in a list less widely circulated. The books for these lists have been selected with great care. The department has first decided upon a number of books which are worthy in style, matter and form. The experience of teachers, librarians and parents is then drawn upon to find which of these worthy books have the crowning merit of being interesting to children.

An illustration of the interest excited by such volumes is found in the fact that of the eighty townships which made their first purchases of town libraries in 1891, sixty-seven have made other purchases and in the remaining thirteen the failure

---

*Normal School Libraries.*

---

to buy has been due to other causes than popular disapproval of the books.

When the list of books recommended is prepared, responsible jobbing houses are asked to state the prices at which they will furnish them to schools. Fortunately there has been considerable rivalry among these houses and they have offered even better than wholesale prices. A careful comparison of these prices with those offered under similar circumstances in other states shows that our prices are lower than those offered to schools in any other state in the Union.

Unfortunately more than one-third of the pupils in our district schools have no access to school libraries; and many of them are children who have the fewest home advantages. The towns now unprovided with libraries are the least progressive in school matters and, from present appearances, some of them are not likely to get libraries until the present generation of pupils have gone out from school.

It is high time for the state to decree that even the poorest boys and girls may have access to small libraries of the best children's books, that some small portion of our great school fund income shall be set aside until every district has a small free library. The library law should say "the town treasurer shall set aside ten cents for every person of school age for the purchase of school libraries," and not leave it, as now frequently happens, to time-serving officials to deprive the boys and girls of a birthright which the state constitution intended to guarantee to them.

#### NORMAL SCHOOL LIBRARIES.

During the past four years the libraries in the normal schools at Milwaukee, Oshkosh, Whitewater, River Falls and Platteville have been classified and provided with subject card catalogues made by professional cataloguers. These catalogues have made the collections of books which were for-

---

*The University Library.*

---

merly housed in these schools real libraries, because they have indexed their treasures so as to make them readily accessible to teachers and students. The result has been evident in the greatly increased use of these libraries by students and in their growing appreciation of the value of good books other than text-books. The young people who are going out from these schools as teachers are contributing to the increasing interest in school and public libraries, because they know how to use them intelligently and because they understand how modern methods of classifying and cataloguing have multiplied the opportunities of making books and libraries useful.

#### THE UNIVERSITY LIBRARY.

Something more than a year ago the work of classifying and cataloguing the library of the university was commenced. It has progressed so far as to prove its great value. Whole classes of books have been catalogued at once so that those who used the library might have results promptly. The books of general reference, philosophy, religion, ecclesiastical history, history, geography and travels, biography, economics, political science, music, fine arts, English language and literature, rhetoric and education are already classified and the catalogue is complete for that part of the library which is most largely used. Work on the remaining classes is steadily progressing.

The catalogue is the usual card catalogue of authors, titles and subjects. The classifying has been done on the lines of the expansive classification system of Mr. Charles A. Cutter. The class-mark or call-number entered on each card guides the reader to the exact place in the library where the book in question may be found. The classification is quite close; the subdivision of books based on subjects is minute. This feature, which is always important in a reference library, is especially valuable in this library because access is given to the shelves.

During the last six months the catalogue has been accessible to readers and the librarian notes an increased and more intel-

---

*Arbor Day.*

---

ligent use of the library. Any collection of books without an adequate catalogue loses much of its potential value.

**ARBOR DAY.**

Arbor Day was first recognized by legal enactment in Wisconsin in 1889, but no measures were taken to secure its general observance by the schools until 1891. In that year this department first issued a circular urging upon teachers and school officers the observance of the day and giving materials to aid in making interesting and instructive programs. Governor Peck and other friends of education gave the movement an effective aid by the generous offer of \$1,000 as a fund to provide a prize for the school in each county which should, as a result of the Arbor Day interest, make the most comparative improvement in its school grounds. There was active competition for the prizes in fifty-eight counties and in many of them the results were a gratifying surprise to teachers and people. In that year too, and also in later years the state horticultural society used its influence and gave its help by issuing circulars and enlisting the aid of its auxiliary societies in exciting the popular sympathy and interest.

In 1892 and again in 1893 this department sent to each school in the state pamphlets giving full and explicit directions by able specialists upon the planting and care of trees and shrubs, upon the preparation and care of lawns and flower beds and upon the study of Wisconsin trees and birds and flowers. In 1893 teachers were requested to secure a special preliminary study of our common trees and to have a vote taken to decide which of them should be "the state tree of Wisconsin." This opportunity seemed to enlist the interest of nearly all the children and secured an unwonted study of the characteristics of common trees. Reports of the results of these votes were received from all the county superintendents except Burnett, Douglas, Green Lake, Manitowoc, Monroe, Rock 2nd and Waukesha and from nearly all the city superintendents.

---

*Arbor Day.*

---

These reports showed that 3,917 schools had cast 123,683 votes upon the question proposed, and that the maple had received 53,211, the oak 34,669, the pine 13,590, the elm 16,028, with the remainder scattering. No report of the number of trees planted was asked from the superintendents except in 1892, when the returns showed that 2,408 districts observed the day and planted 18,343 trees.

From all over the state has come hearty testimony respecting the enthusiasm easily awakened by Arbor Day, its refining influence, its stimulus to a loving study of nature and its effect in causing greater interest in forestry problems. It has incited neighborhoods to a new pride in enlarging and beautifying their schoolhouses and school grounds and has awakened an unwonted interest in horticulture in many communities.

Perhaps something of the spirit in which this holiday has been observed can best be shown by an extract from a circular sent by this department to every county superintendent and teacher in the state early in March, 1893.

"The world will soon be fresh and green, throbbing with many forms of re-kindling life. As nature dons her new dress and the fields and woods invite us into the open air, the children are stirred with the spirit of the season. Their curiosity is now easily aroused and should be excited rather than repressed. Draw them to a study of nature. When their interest is aroused you will often find them leading you into new fields. Do not be afraid to follow. This work does not find its fulfillment simply in the answering of questions. Its object is to awaken curiosity and lead to study. In the "Manual of the Elementary Course of Study" you will find many hints as to how you may conduct this study of nature. Many plans and methods will occur to you when you become interested. Only take pains to study the objects themselves, and be content to learn what these objects teach,—no less, no more,—and you will be surprised to find what a bright and interesting world you live in.

"This circular is intended to give you materials to use in stimulating this love of nature in the minds of the pupils. There are interesting selections that you may read to the younger

---

*Of Statistics.*

---

pupils or have them read. Others that they may commit to memory. There are charming extracts from the writings of the great prose writers and poets that should be read or learned by the older pupils, that the spirit of the writers may mould and refine their lives. There are hints as to the care of the school grounds and materials for Arbor Day exercises.

“Do not wait for Arbor Day to commence this work. Begin with the early spring to clear the school yard and to teach the children to read the book that is spread under the open sky. Arbor Day should not be a spasmodic attempt at tree planting. It should be the culmination of a growing interest in Nature, and the planting of the trees, if they are necessary, should be the crowning effort in making the school grounds neat, homelike and attractive.

“In this work of beautifying the school grounds, you must first get the children at work. Every child who helps becomes a warm friend of the movement. Through the children get the parents and school officers. First clear the grounds of all rubbish, get the wood neatly piled, the yard and roadside clean and neat, the stumps and stones removed, so that you can see what possibilities there are in the premises. Are there unsightly outbuildings? Can they be cleaned, repaired and hid from public view by evergreens? Is there a nice place for a flower bed? Is the roadside bare of trees? Is there an opportunity for a lawn or for shade trees outside of the regular playgrounds? Can you make the schoolroom itself more inviting by the expenditure of a little labor or money? As you study the possibilities, you will see new opportunities, and as your enthusiasm grows it will be contagious.

“In making arrangements for Arbor Day exercises, give place to as many of the children as possible. Give the smaller children very brief selections to learn, but give each one something. This will help draw the parents.

#### OF STATISTICS.

The census statistics show a steadily increasing growth of school population. The increase for the last three years has been 9,000, 18,000 and 27,000 respectively. The enrollment of those of school age has not increased in the same ratio; but the enrollment of those between 7 and 13 years

---

*Of Statistics.*

---

of age has approximated it. The enrollment of children under 4 years of age has for a term of years, fallen off. The number of teachers employed has shown but little variation, indicating a longer tenure of place. The increase in wages also shows a growing appreciation of the work and worth of teachers. The statistics relative to the enrollment, attendance and teaching force of private and parochial schools are of no absolute value and are worth very little for comparison, since all the same schools do not report in successive years, nor are the reports made with sufficient care. The officers called on for these facts can not get the items. But the indications are that there has been a large increase in the attendance upon the parochial schools during the last two years. In some instances it almost equals that in the public schools of the same place. Many of the Lutheran schools require their pupils to attend the public schools also, and many other schools encourage such attendance, thus causing a double enrollment. So far as the data show anything, they indicate that the number between 7 and 13, not in school, is small and decreasing. The falling off in enrollment has been mostly in the cities where the pressure of hard times is most felt. Country schools do not show the usual increase for the year but have not, as in the cities, actually fallen off.

The census returns show, apparently, 6.4 per cent. of those between 7 and 13 years of age as not attending school during the last year. This is really a small proportion when allowance is made for various disabilities. It must also be born in mind that these 6.4 per cent. may have been in attendance the year before, or may be next year. But the census does not show the whole case. It is obtained from statements made to district clerks by parents, from teachers' registers more often, and from voluntary reports of private schools. On the one hand, this leads to duplication, since many pupils are enrolled in two or more schools. On the other side, many pupils may attend only a private school, which does not report. No data are obtain-

---

*Of Statistics.*

---

able from reports as to the number or proportion of the children over 13 and under 20 who attend school. But our free high schools contain about 11,000 of them, the normal schools, academies and colleges with high schools not aided by the state, about as many more, leaving yet a large number not determinable in the common schools. The amount of continued non-attendance at school cannot be determined and expressed in figures till some way is devised to secure more full and accurate reports from the private schools or more exacting requirements are made of the school census taker. The fact is that very few children grow up to the age of 20 without gaining a rudimentary education in school. Private schools, by heartily aiding the school authorities, could do much to set the facts in their true light before the public.

The extreme limits of enumeration of the school population make Wisconsin appear at a disadvantage in any comparative statement of the efficiency of her system of public schools. The census includes all children between the ages of 4 and 20, while the statistics show that the period of greatest actual attendance is between 7 and 13. The number entering school under 6 years of age is comparatively small, while the average of the graduates of the high schools is not above 18. The majority of pupils in the common schools probably leave at the age of 14 or 15. All persons under 7 and over 15 not found in the common or high schools are very generally counted as illiterates. Our system thus seems inefficient as compared with those states in which the enumeration conforms more nearly to the period of attendance. If the census enumerated only persons between the ages of 6 and 18 inclusive it would probably be found that at least 90 per cent. are enrolled in the schools.

At the meeting of the Department of Superintendence in Philadelphia, February, 1891, I had occasion to comment upon this subject. In the summer following, I sent special blanks to all district clerks requesting the names of all persons resident

*Of Statistics.*

in the district 17, 18 and 19 years of age respectively, and their enrollment in the public schools. The following is a summary of the reports received, based on returns from 4,366 districts, not including cities under city superintendents.

AGE.	MALES.		FEMALES.		TOTALS.	
	No. of.	In School.	No. of.	In School.	No. of.	In School
17	7,677	3,476	6,563	2,578	14,207	6,054
18	7,080	2,290	5,557	1,422	12,637	3,722
19	6,155	1,366	4,598	813	10,753	2,179
Totals..	20,879	7,132	16,718	4,823	37,598	11,955

There were therefore 20,879 males and 16,718 females of the ages specified of whom 7,132 males and 4,823 females attended school and 25,622 did not attend. Since less than two-thirds of the districts in the state are included in the reports it is evident that 40,000 persons over the age of 16, and under 20 did not attend school during the year. In comparing statistics, these are recorded as not having been reached by the public schools. It is shown elsewhere that more than 93 per cent. of those between the ages of 7 and 13 were enrolled last year in the public schools. It seems an inevitable conclusion that few children resident during the school period pass the age of 20 without receiving some schooling.

The falling off in receipts for the year 1893-4 is wholly in local taxes, but the tax for teachers' wages has increased. This, taken in connection with the longer tenure of teachers, shows that the people begin to value good teachers as of first importance to the school. They apparently cut off many other expenses before reducing the teachers' wages. The school fund income must vary somewhat, because additions come to it from various sources, and because loans, fluctuating with the times, are made and paid without regard to the time of making up the statement of the annual income. The

---

*Of Statistics.*

---

income of the university and of the normal schools is subject to still greater fluctuations from the first cause, so that any comparison of year with year will be delusive.

There is notable improvement in the qualification of teachers. Naturally, the cities absorb most of the product of the normal schools. A few years ago, none of the normal graduates, and but few under-graduates could be found in the country schools. Now they constitute one-tenth of the country teaching force, while one twenty-fifth of the teachers in the counties hold state certificates of some kind. The number of certificates issued upon state examination is slowly increasing. Those holding certificates by examination under the state superintendent appear to be gaining in the number and character of the places held by them. When this system of certifying was inaugurated, these certificates were not looked upon as quite equivalent to normal or university diplomas. Time and experience show this system in a better light as an evidence of the strength, work and fitness of an applicant for a state certificate.

Free high school boards have become familiar with the legal qualifications required of teachers in those schools, and in consequence, special certificates have fallen from 26 to 11 within the last two years; but no figures can show the increase in ability and fitness, and consequent effectiveness of work, secured by the more careful selection required at the hands of the boards.

This is important as the free high schools are rapidly becoming a factor in the preparation of teachers. From institute reports it is shown that there were in attendance 1,396 who had attended colleges or normal schools, 3,337 who had attended high schools, but no school of higher grade; while there were but 1,629 who had attended common school only. Thus every increase in the strength and culture of the teaching force in the high schools, however small, is multiplied in the common schools.

---

*Common Schools.*

---

It must be observed that what is given as the average wages of teachers is not a true average, since the number of teachers in the several counties, cities or high schools is not a factor, except in each individual report; but the average is obtained by dividing the sum of the wages by the number of counties, etc., reporting. The average is only valuable relatively for comparison.

The statistics on district and town libraries are very imperfect, in fact worthless. Often no actual count of books is made; again the text-books are counted. Some town clerks return for the current year, some for the previous year, while many do not even know, at the time of making the report, whether the treasurer has reserved the library money. The figures for 1893-4, in the summary, are those gained by personal correspondence with the officers and are much nearer correct than the census return.

### COMMON SCHOOLS.

There is little chance of over-estimating the importance of the wayside schools as factors in our educational progress. It is true that the leaders of thought in every forward movement come in ever increasing numbers from the university, the colleges, the normal and high schools; but the advantages that these institutions offer are still beyond the reach of the great majority of our people. The destiny of states is in the keeping of that great body of people whose only intellectual quickening comes from the country schools. The stability of our own state rests on the morality, intelligence and contentment of that uncounted multitude who go into life with no other mental equipment than such as the wayside schools furnish. If these schools inculcate respect for law, deference for the organized institutions of society, the body of our people will be fortified against those appeals to prejudice and passion which are a constant menace to orderly government.

---

*Common Schools.*

---

But the duties imposed by citizenship become more difficult as civilization becomes more complex. To meet the responsibilities thus imposed men need an ever enlarging mental furniture. This growing intelligence must, in the main, be derived from reading, and so it is imperative that the schools teach boys and girls to read and to love reading. To teach the young to take thought quickly and easily from the printed page, and to beget a hunger for the world of pleasant and profitable knowledge embalmed in books is the best work done in schools. Pupils who go from school wanting this training and without this awakening are likely to remain illiterate. Knowledge of the simple computations necessary to the farmer and the wage earner may consist with the densest ignorance. They whose school life terminates while reading is still a laborious process, and the thought of the printed page is apprehended with difficulty are little likely to meet the growing demands of citizenship. It is manifest that this preparation can be imparted only by schools that share in the general progress. The university, the colleges, normal and high schools of the state recognize the changing conditions and year by year are adapting their curricula and methods to the new demands. While much remains to be done for and by all these agencies, there is no doubt that their efficiency is steadily increasing.

If the contention be correct, that the common school is the most important agency that the state has instituted for the equipment of its future citizens, it is pertinent to inquire how this agency is discharging its trust; whether its efficiency increases with the augmenting demands made upon it.

Much has been done during the incumbency of the present superintendent to aid, encourage and stimulate country teachers. Normal school pupils have found their way in increased numbers to the wayside schools. These carry with them better conceptions of the work of teaching, and awaken in their several neighborhoods a better appreciation of the worth of schools.

---

*Common Schools*

---

Summer schools and teachers' institutes have done much to stimulate the zeal and increase the power of teachers. Conventions of county superintendents have wrought good for the schools in unifying the work both of superintending and of supervising these schools. Superintendents themselves have become more active, intelligent and aggressive. And yet the average district school is not adequate to the demands of public needs, nor is it meeting the reasonable expectation of intelligent people. Indeed, those who have been long and intimately acquainted with the common schools of the state doubt whether they are doing better work now than they did twenty-five or thirty years ago. If the doubt be well founded it certainly furnishes cause for anxiety. It is trite to say that a chain is no stronger than its weakest link. It is worth while to reiterate that common schools are fundamental in our system. If these be inefficient the reliance of the state upon the intelligence of its citizens will be misplaced, and the power of other schools will be sapped. If any of the causes that prevent the progress of these schools are irremediable, it is doubly important that we know and apply the remedy to those that may be cured. The tendency of population, especially of the brighter and better educated part of it, toward business and social centers is constantly robbing the rural schools of the direction and support of those who best appreciate their worth. Increase in the number and efficiency of high schools attracts the brighter pupils from the country schools, thus depriving them of the power of begetting that mental hunger in which learning forever roots. But this tendency toward urban life is as wide as civilization and cannot be controlled by legislative enactment.

Reference has been made to the fact that the neighborhoods in which country schools are situated are but slightly affected by those movements of thought to which urban communities respond quickly. The reflux wave has spent much of its force before it reaches the remote settlements. But in my judgment the main causes that retard the progress and impair

---

*Common Schools.*

---

the usefulness of the common school inheres in our system. The management and support of these schools is imposed upon the inhabitants of districts whose geographical outlines have been determined by interests that are oblivious of public good. These districts are unnecessarily unequal in wealth and school population; many of them are so small and their resources so meager that to equip and maintain efficient schools would necessitate unreasonable taxation. The country schools are, in large measure, dependent upon the support and guidance of communities that have no adequate conception of the methods by which good schools are made. Petty jealousies and neighborhood dissensions are reflected in their management. Untoward influences that would be impotent in wider fields distract their councils and often destroy their usefulness. Families are retained in districts whose schoolhouses are inaccessible to their children, because the electors and officers are unable or unwilling to part with any source of revenue. Many schoolhouses are situated on byways, away from main thoroughfares of travel, and as the districts are too poor to provide for breaking roads or for transporting the pupils, these schools are depleted at a time when children are freest to attend.

In the organization of districts and in the conduct of district schools the interests of private and parochial schools are often regarded as paramount, and in any real or supposed conflict of interests it is the public school that suffers. It is no part of the purpose of this report to disparage parochial schools. Many of them have done, and are doing excellent work. In commercial centers where the increase of population constantly crowds public school facilities they seem to be indispensable. But the primal thought in the foundation and maintenance of these schools is to train for church membership, not for citizenship. In the settlement of those perplexing questions that cloud the future, the hope of the country must rest on that great body of people who have come up to citizenship through the training that the public schools alone give.

In my judgment, the substitution of the township for the district as the unit of the system would result in the increased efficiency of the common schools. I think it would obviate many of the difficulties that impair their usefulness; and would modify others. No human system of government is perfect, and no method in the administration of school affairs is exempt from the necessity of constant and intelligent care. The following are some of the advantages that it is thought will result from the adoption of the township system. It would greatly reduce the cost by reducing the number of district schools. There are few congressional townships that could not be furnished with abundant school facilities at six schoolhouses well located. Most of the districts were formed and their schoolhouses located as the exigencies of settlement seemed to require. The conditions that determined the outlines of these districts and the positions of their schoolhouses long since disappeared. These outlines are now more grotesque than are those of a political gerrymander. Local pride and neighborhood jealousies almost uniformly resist a rational readjustment of boundaries. Schoolhouse sites that are no longer central or convenient can be changed only by a struggle, and the result is generally determined by the number of votes that one or another faction can muster, seldom by the equities of the case. Now, it is submitted that a board of directors having a representative of every district in the town cannot be indifferent to local interests, while the larger school interests of the town will in the main dictate its policy. Such a board could not limit its vision or its activity to a single district but must be guided by the school interests of the town as a whole. It would readjust district boundaries so as to allow children to attend the most convenient schools. It would reduce cost in the town by suspending or suppressing those schools that are too small in school population to maintain interesting or efficient schools, and would provide for carrying the remaining children to convenient and accessible schoolhouses. How much this would save to the average town may

---

*Common Schools.*

---

be inferred when it is remembered that last year there were in the state 183 districts whose average attendance did not exceed 5, 858 in which it was not above 10, 2,418 in which it was not above 20. Schools with larger attendance would attract better teachers and boards would be able to continue them longer in place. Boards of directors would be less influenced by the nepotism that is so baneful in the districts. When taxation is made equal throughout the town, the smaller districts will demand equal consideration with the larger ones in the selection of teachers and in the equipment of the schoolhouses. Larger schools and longer terms will greatly facilitate the classification and gradation of pupils; will impart to the schools the zest that is born of numbers, to the pupils the ambitions that spring from rivalry, and will offer to teachers a field for and an incentive to their best work. It is reasonable to expect that the adoption of this system will result in giving to the state more competent school officers. Five men fit to guide school affairs may be found in each of a host of towns that cannot each furnish fifteen men. The change of which we are writing would equalize school advantages and burdens. Under our present system it is not uncommon for school district taxes to be from four to seven times greater in one district than they are in another district of the same town, while the newer portions of many towns are deprived of any school privileges. Finally, the adoption of the township system would offer the possibility of effective school supervision. Every year a multitude of young people find their way into the teacher's calling who have no practical knowledge of the teacher's work. These must learn to manage and instruct amid the perplexities of the schoolroom—learn their trade at the expense of their pupils. How much these young people might be aided and their schools improved by the advice and suggestions that a teacher of experience can give, only they who have charge of a system of schools may know. The county superintendent can, in general, visit a district but once. Often this visit is so near the

## Common Schools.

end of the term that his suggestions are worthless to the school, however valuable to the teacher. Many of these officers are invaluable as superintendents; as supervisors, their work is and must be nearly barren. A better system must be established if we are to secure harmony and efficiency in the common schools.

Below are given tables of statistics whose analysis sustains the argument presented in favor of the township system of school government. The table marked "A" shows the assessed valuation of districts in the same town for the counties given. Only a few counties were selected. These are fairly representative of the whole state. In the first column are given the districts whose assessed valuation does not exceed seven thousand dollars; in the second column those whose assessed valuation is more than seven and less than ten thousand dollars, etc. The totals show a great inequality in the property subject to taxation in the districts of the same town. The unequal burden of taxation for the support of schools of equal terms and like efficiency is self-evident.

The table marked "B" furnishes further evidence of the same defects in the district system. The districts given were selected at random. Several county superintendents stated that there were districts in their respective counties that furnished stronger examples. The significance of the figures is indicated at the head of each column. It should be noted that two districts are selected in each of the towns given. Their numbers appear in the first column. The table is designed to show the relative cost of maintaining public schools in neighboring districts. An examination of the table will show the relative opportunities as to length of term offered in each district. It will be seen that the cost per capita varies greatly, and that the same is true of the per cent. that expenditures bear to the assessed valuation.

The town of Windsor, Dane county, furnishes a good illustration. The cost per capita in district number 9 is \$15.75, in district number 4, \$4.29. The per cent. of expenditure on the valuation of the former is 34-100, while it is only 24-100 on the latter. The former district maintained school 140 days, and the latter, 160 days. A seven months' school in the former

## Common Schools.

necessitated a much greater tax on the property of the district than did an eight months' term in the latter.

The town of Farmington, La Crosse county, offers an illustration of the relative cost of maintaining terms of equal length. In district No. 1 the rate of taxation was 4.5 mills on the dollar, while in district No. 4, it was 31.2 mills, or nearly seven times as great.

TABLE B.

*Common Schools.*

---

The table marked "C" is complete for the entire state. Its purpose is to show the inequality as to enrollment and average attendance in schools under the district system. The first column shows the number of districts in the state whose total enrollment during the school year 1892-3 was not more than five; the second column shows the number whose enrollment was more than five and less than eleven, etc. The footings give the data for the whole state. The average attendance is indicated in the same manner. It will be seen that there were 183 districts whose average attendance last year was not more than five; 858 not above ten; 2,481 not exceeding twenty. In other words the average attendance in about three-fifths of the country districts does not exceed twenty. It is manifest that there can be little enthusiasm or interest where the number in the attendance is so small.

The change would be neither a novelty nor an experiment. In 1858 the Hon. Lyman C. Draper argued its desirability at length with great ability. In 1863 Supt. Pickard commended it heartily. In 1867, Supt. John G. McMynn logically and forcibly advocated it. Their successors in office have uniformly commended it. It has been tried and approved in Wisconsin, and has stood the test of experience in New England, Pennsylvania, Ohio, Indiana and other states. New Jersey has just adopted it. Michigan, Minnesota and others are moving to secure its early adoption. If the school men of the state believe what they have long conclusively argued, if they really desire what they have often asked for, if there is any desire for the establishment of the constitutional system of "district schools which shall be as nearly uniform as practicable," it is time for all to unite in the effort to secure the township unit of school government.

TABLE C.

COUNTIES.	WHOLE ENROLLMENT—1892-93.									AVERAGE ATTENDANCE—1892-93.									
	Number of districts having an attendance of not more than 5.	Between 5 and 11.	Between 10 and 21.	Between 20 and 31.	Between 30 and 41.	Between 40 and 51.	Between 50 and 61.	Between 60 and 71.	Between 70 and 101.	Over 100.	Not more than 5.	Between 5 and 11.	Between 10 and 21.	Between 20 and 31.	Between 30 and 41.	Between 40 and 51.	Between 50 and 76.	Between 75 and 101.	Over 100.

e—Supt.

---

*Common Schools.*

---

More than thirty years ago Supt. Newton Bateman of Illinois said in regard to the effect of the change:

“Not a common school in the state would be closed or interfered with, not a teacher discharged, not an existing contract annulled. The great educational work of the state would move right on as if nothing had happened; no visible sign would appear to show that an immense administrative reform had taken place, and a new and glorious era dawned upon our system of public instruction. The vast accumulations of school property would be preserved intact; but few schoolhouses would have to be moved, and none at all immediately, for, as a general rule, school sites and buildings that are in the right places now, would be equally so then. Thus, quietly, without shock or confusion, almost without public knowledge or notice, the system would lay down the heavy, galling harness of her ten-thousand-headed policy, and assume the light, elastic armor of a fresh, compact and simple, but far more expansive and powerful organization.”

### THE FREE HIGH SCHOOLS.

The free high school extends to the child of every citizen the possibility of higher education. Few are so poor that they cannot by labor and self denial complete its course of study. Having done this, the door to lucrative employment and a collegiate and professional course is open to them. The special reports from 119 high schools published in the last biennial report show that the children of farmers constitute by far the largest class of pupils in the high schools. The next largest class is formed by the children of unclassified day laborers. The fourth largest class are pupils supported by widowed mothers. More than one-half of all the parents or guardians who have children in the high schools pay no tax or are assessed at less than one thousand dollars. The claim that these schools are maintained by the many for the benefit of the few rich cannot be maintained.

These schools perform three important offices. They form

---

*Free High Schools.*

---

the connecting link between the common schools and higher institutions of learning; they are the local academies in which many persons are given their only opportunity for higher learning; and they are the chief instrumentalities for the better training of teachers for the common schools. The following quotation from the report of the Committee of Ten indicates the consistency and harmony of these functions:

"Ninety-eight teachers, intimately concerned either with the actual work of American secondary schools, or with the results of that work as they appear in students who come to college, unanin ously declare that every subject which is taught at all in a secondary school should be taught in the same way and to the same extent to every pupil so long as he pursues it, no matter what the probable destination of the pupil may be, or at what point his education is to cease."

There are some tendencies, however, to be guarded against. In some communities there is a desire to make them commercial colleges, manual training schools, or otherwise to warp them from their legitimate sphere. Too often this effort comes from the desire of the principal to "popularize" his school. It has sometimes been necessary to notify the authorities that the state has made no appropriation of public money for such purposes. A more common evil is the attempt of inexperienced teachers to expand the courses of study and to ride their hobbies. They seem to forget that the state does not purpose to support two hundred little colleges or universities. It is for this reason that it has required the state superintendent to prepare courses of study for them and made his approval a prerequisite to the apportionment of money. In the effort to hold them to their proper work the department receives strong moral support from the university's control of the accredited schools. It will not retain on this list schools which are not able to do fairly well the work of the recommended courses and it disapproves attempts greatly in excess of these requirements. As it would appear discreditable to the management of a school to allow it to be degraded from the list after having once obtained recognition, the authorities

---

*Free High Schools.*

---

have great respect for the recommendations of the university. Authority granted in 1891 to withhold the appropriation of money from any district for failure to comply with the laws adds weight to the recommendations of the state superintendent. I have in a few instances notified the authorities of my purpose to withhold aid, but compliance with the requirements followed so promptly that only one school has been excluded.

The growing demand for specially trained assistants in the various departments of the high schools is full of promise. The number of university and normal school graduates is now so large that there is no excuse for employing teachers not properly qualified. Not every graduate who desires to do so can teach school, yet a judicious principal or superintendent can soon make a reasonably satisfactory teacher out of an inexperienced but well-trained and ambitious person.

The present condition of these schools and the efforts of the department in their behalf are well outlined in the following report of the inspector, Mr. C. H. Sylvester:

During the last year and a half the inspector has visited at least once every Free High School in the state. Many have been seen twice and in some cases three or four visits have been made. At the beginning of the time mentioned, there were 184 schools. One has been dropped from the list and six have been added so that the number now receiving state aid is 189. These schools are so numerous and are so situated that the school year is not long enough to enable one person to make the entire circuit if more than a perfunctory call is attempted. In the year and a half the Inspector travelled upwards of 35,000 miles a large part of which distance was covered in the night often by team in order to leave the days free for visiting and to be in the office at Madison at least one day in the week. The duties are arduous in the extreme and so extensive and varied that one can never be satisfied with what is accomplished.

An effort has always been made to see the school in session,

---

*Free High Schools.*

---

to visit classes, to inspect carefully the schoolhouse, the out-buildings, the library and appliances and to confer with principal and assistants on the scope and character of their teaching, but the necessary limitations of time have often prevented the complete realization of this scheme. Moreover, whenever possible, the Inspector has called upon one or more members of the board and in conversation reported upon the condition of things as found. Ordinarily the reception given the officer has been very cordial and the ready response of the board to suggestions leads to the belief that the visit to the board and the conference with them is of great mutual benefit to the school and the department.

A series of conferences eleven in number was arranged for high school teachers. Here the Inspector, usually accompanied by one or more teachers from the normal school or the University, met the principals and assistants from neighboring schools; and, in an informal way, discussed methods of instruction and management. Two of the meetings, the one at Milwaukee and the one at Green Bay, were held at the time of the local Teachers' Association and were attended by, from sixty to eighty teachers. The meetings were divided into several sections, each in the hands of a competent leader and the discussions were confined to special branches previously announced. On the whole the conferences were successful and did much to encourage a professional spirit, extend acquaintance and introduce rational methods. Experience advises their continuance.

From the office an extensive correspondence has been carried on with teachers and boards in answer to questions asked and embodying suggestions growing out of the visits of the Inspector.

The qualifications of all teachers have been scrutinized with care and now it is safe to say that no one is known to be teaching in a high school who does not possess proper legal qualifications. In examining into the papers of the five hundred

---

*Free High Schools.*

---

teachers needed to fill the places offered by the high schools some distrust was at first met and occasionally complaints of harsh treatment have been heard. These, however, have been rarer since the laws came to be better understood and teachers generally believe that only firm and fair demands have been made upon them. Some boards are still careless about entering into contracts with unqualified teachers, forgetting that the laws place the responsibilities largely upon them.

Circular letters have been issued on many topics. Notably has a special effort been made to correct the hideous abuses allowed in connection with the outbuildings and in a few instances state aid has been withheld until proper and decent privies were provided. It is now proposed to enforce a general rule in this direction.

So much difference was thought to exist in the requirements for admission to the different schools that toward the end of the year easy sets of examination questions were sent to principals asking for them; and the reports received from those by whom the questions were tried led irresistibly to the conclusion that these differences are much greater than was thought and that some effort should be made to equalize the standards. No effort was made to compel promotions on the basis of the questions sent nor does it seem that such a course would ever be desirable. Yet the reports on file are interesting and valuable.

The greatest work of the period was the completion and publication of the Manual for High Schools. For several years this work had been in contemplation and much material had been collected. The pamphlet after quoting and discussing the laws under which the high schools are organized recommends courses of study and then at length presents methods of instruction in the several studies of the different courses. The book met with a very gratifying reception, and the evidences of its influence are already seen in the more progressive schools. The demand for it has been so great that the edition is exhausted and a second must be prepared at once.

---

*Free High Schools.*

---

In general, it is safe to say that in no class of schools in which the state takes an interest has so much of real progress been shown in the last few years as in the Free High Schools. The high school idea has grown, the attendance is constantly and steadily increasing everywhere and there is in most localities an evident anxiety on the part of the board and the teachers to do whatever is for the improvement of the schools in the way of equipment and character. This is not saying that there are not weak schools, that there are not some few schools permitted to languish and held in little respect by the citizens of the locality. Such disregard for their own interests is rarely shown by the people of any community and in most of these a better spirit is growing.

Many schools are housed in new and commodious buildings in which are all the modern conveniences in the way of heating, ventilation and sanitation. Each year sees a considerable increase in this list. Usually the older buildings are comfortable and well lighted, but often insufficiently ventilated. Less interest has been displayed in the condition and care of the out-buildings; but, where there is a self-respecting principal, he secures cleanliness and is enabled to prevent defacements.

Though there is certainly a steady growth yet too many schools are found with libraries too small and with little practical apparatus. Such neglected schools are not always in the smaller villages. Some of the city schools have little to boast and much to deplore. Occasionally is found a school with a large library that is perfectly useless for students, having been selected not wisely but too well by some authority on standard literature. In no small number of schools libraries are growing and apparatus is accumulating by the enthusiastic efforts of teacher and pupils. One is often compelled to notice how little is impossible to a determined man or woman and how little comes to the inert. They always serve who stand and wait!

Among the teachers is much enthusiasm and great earnestness. They are ready to seize anything that will

---

*Free High Schools.*

---

help them and usually have the skill to adapt what they hear. The enforcement of the laws relating to certificates has resulted in bringing into the schools a large number of trained teachers that otherwise might have been thrown into the background by less competent people who were ready to experiment on the pupils at a less expense to the district. While all are not trained specialists and faulty methods are too prevalent yet where the spirit is so excellent the results cannot be wholly bad. Better methods are coming and Boards are learning to appreciate good work and to retain the teachers who can do that work.

Overburdened and unbalanced courses of study have stood much in the way of progress and many schools are still attempting more than they can possibly accomplish well. Rearranging a course of study seems to be the inevitable disease that attacks young principals. Older and more successful men rarely attack that problem the first year they are in any school. What is wrong should be remedied but an acquaintance with local conditions sometimes removes objections that seemed very glaring when the course was first considered. The recently arranged courses of study which are recommended by the state superintendent are being quite generally adopted where changes need to be made and where adopted are giving satisfaction. Formed as they were by consultation of the best teachers in the state from University to High School there is little reason for the inexperienced man to think that he can improve upon them. Too frequent changes are destructive to school interests and it rarely fails that some one or more pupils are not seriously injured by the transition from the one to the other.

Before anything like a well organized system of schools can be maintained there must be a more uniform standard of admission. A classification of the schools upon a proper basis would assist much in clearing up difficulties. This classification need not be rigid, irksome nor very close. It has been necessary already to separate the schools into two groups as their course

---

*Normal Schools.*

---

of study is of three or four years. A standard of admission has been fixed but it will be impossible for all of the three year schools to reach it. All of the four year schools should reach it without difficulty and some of the three year schools will accomplish it. The state superintendent will be compelled to cut off several of the three year schools or recognize two classes with different requirements. It does not seem right that the struggling and deserving schools should be deprived of the aid which it was manifestly the design of the state to furnish them. In many of the four year schools but one course is carried while others have three or more. So on the strength of courses of study alone four distinct groups of schools appear; and it is manifest injustice to compel the same things from them all. But consideration must, of course, be given to equipment, and here appears the first complication in any scheme of classification. As before indicated, many of the small schools are well equipped with books, charts and apparatus; while there are large schools lamentably deficient in all these respects. Yet the obstacles to a just and efficient classification are not insuperable and the matter ought to receive early attention.

### NORMAL SCHOOLS.

The normal schools have been liberally patronized and have lost nothing in efficiency. Their condition may be learned from a careful reading of the appended reports of the boards of visitors. So carefully have their merits and possible defects been considered by men of great attainment and wide experience that further expression of opinion may seem superfluous, yet some phases of the work justify comment. The size of the biennial report is limited by law; hence the necessity of selecting from the reports of each year or of printing them entire for one year.

The Committee of Ten, headed by Commissioner Harris and Presidents Elliot and Angell; say:

---

*Normal Schools.*

---

“In regard to preparing young men and women for the business of teaching, the country has a right to expect more than it has yet obtained from the colleges and normal schools. The common expectation of attainments for pupils of the normal schools has been altogether too low the country over. The normal schools, as a class, themselves need better apparatus, libraries, programmes and teachers.”

They seem to me to be open to criticism on the ground that they have been unwilling to define their sphere and occupy it. Within the territory occupied by the normal schools are more than 400 graded schools, 175 high schools and several academies and yet they say it is impossible to get students suitably prepared to meet their moderate requirements for admission. A large proportion of their instruction is clearly that of the common and high schools, and yet they attempt the curriculum of considerable colleges. Their attendance is large but the number of graduate pupils is small. The performance does not equal the promise. The maturity of their students and the intensity of their efforts justify expectation of better scholarship. Divided attention dissipates acquirement. The student usually undertakes to pursue not less than four academic branches. In addition he must have music, drawing, gymnastics, practice teaching, observations and discussions and rhetorical. Such a multitude of heterogeneous subjects preclude that prolonged attention necessary to accurate and permanent impressions. There is also a fatal lack of continuity in the prosecution of studies. To illustrate, algebra is taught as “elementary” and “advanced” algebra. The former means the completion of equations of the first degree in an elementary text-book and the subject is distributed by ten-week periods through the two years of the elementary course. The latter contemplates the completion of this same elementary text-book to proportion or series, and is likewise distributed through the advanced course. Their practice may be, perhaps often is, better than their programme, but a pupil who is obliged to teach before graduating often has his alge-

---

*Normal Schools.*

---

bra or geometry distributed over six or eight years. Many other studies are thus illogically divided. I see no reason why the work should not be more nearly continuous nor why many of the elementary branches should not be completed in the elementary course. The normal schools do not equal the old-time academies in their power to impart a love for learning and an appreciation of its worth. A diminution of the agony and effort elicited by the so-called professional studies and better academic instruction would furnish teachers better trained professionally. The quality of the instruction to which the pupils are subjected is a more potent factor in their professional training than their random observations, loose discussions and factitious practice.

Pupils who have had no experience in teaching have little to which they can relate the great mass of professional instruction given. In the Oswego normal school the opportunity for real teaching is afforded by adopting one of the ward schools as its school of practice. A portion of the city containing 500 school children is consigned to the school, which becomes responsible for the progress of the pupils parallel with the other city schools, observing the same course of study under the supervision of the city superintendent. There is no serious obstacle to the adoption of a similar plan in some of our schools. Under such an arrangement, or after independent teaching by the pupils, careful professional study and training would find its appropriate place.

The failure of the board of regents to locate two new normal schools, build and equip suitable buildings and set the schools in operation may be taken as conclusive evidence of the impossibility of securing action contrary to the interests of the local regents. The whole argument in favor of the legislation of 1893 was based upon the educational needs of the northern half of the state. At the request of the board I explained to the joint committees of the legislature that north of a line drawn across the state through Hudson and Green Bay lay somewhat more than one-half of the state's area; that in this

---

*Normal Schools.*

---

territory there were few graded schools and less than thirty high schools, while south of that line were the great majority of graded and high schools, several academies and denominational colleges, the state university and five normal schools. The representatives of that part of the state urged the justice of their claim not only on the ground of their lack of educational facilities but because the funds which support normal schools come from the sale of swamp lands which lie principally in their midst.

In the face of these arguments and claims the board has located the sixth normal school south of that line and appropriated to the schools in the southern part of the state all the revenues granted by the legislature for the maintenance of normal schools. Notwithstanding the gift by the legislature in 1891 of \$20,000 from the general fund and \$44,000 from the direct war tax-refund to the old schools, certain interested local regents would not permit the bill providing for the new schools to pass unless a part of the meager appropriation should be given to them. Independently of the act of 1893 the board has received from extraordinary sources more than \$140,000. With this grant it has had \$160,000 which it has spent upon the old schools. It is true that the old buildings were greatly in need of repairs, but it is not so evident that four of them needed to be greatly enlarged. This can be proved only by showing that the duplication of the work of the common and high schools must be maintained. Had the normal schools earnestly sought to free themselves from the burden of work which might better be done elsewhere, the apparent need of enlargement might have disappeared. The normal schools of Minnesota have abolished their preparatory departments and according to their own testimony have gained by it. Such departments are not found necessary in Illinois, Indiana and Massachusetts. Whatever preparatory instruction may be required by exceptional circumstances should be given by advanced students as a part of their practice teaching.

---

*Normal Schools.*

---

My acquaintance with the operation of the board convinces me that the desire for large appropriations to the various schools has more to do with the maintenance of preparatory departments than any educational need of the several localities. It is proper to inquire whether it is not a misappropriation of public money to expend the funds of the board upon work for which the state has made other provision.

Permission was given in chapter 185, laws of 1893, to use \$20,000 of the appropriation for the repair of the old buildings, not for the enlargement of one of them. When the claim was made in the board that the money might lawfully be used for the enlargement of one of them I addressed a letter to each member of every committee of the legislature that considered the bill requesting their opinion of this interpretation of the law. The judgment of these members, more than twenty in number, was unanimously against it. Its use for the extension of the building at Oshkosh was therefore a misappropriation of public money.

The function of the board is chiefly to administer the business affairs of the schools. The presidents always attend the regular meetings of the board and participate in its deliberations. They have no vote but their judgment in regard to the administration of the schools usually prevails. Thus the places which have the schools are practically doubly represented. In the management of our penal, reformatory and charitable institutions it is not thought necessary to have local regents, yet they are business enterprises of greater magnitude than the normal schools. The board employs a secretary at a salary of \$1,800 and expenses, and requires his time in its service. There is no good reason why he should not attend to local affairs which the president and the janitor are not competent to undertake. As a matter of fact the local regents are rarely factors in local school administration.

The presidents generally do the business, often making the reports of the several regents to the board. The only indispen-

---

*Normal Schools.*

---

sable function of the local regent is that of getting appropriations for his town. The system of normal schools will not be administered in the interest of the state as a whole, until the law is so amended as to prohibit the appointment of regents from the places where the schools are located. There are local regents of honor and integrity, but they have not enabled the board to keep faith with the legislature and the people.

## REPORTS OF BOARDS OF VISITORS.

## OSHKOSH NORMAL SCHOOL, 1892-93.

To the HON. O. E. WELLS,

State Superintendent of Public Instruction, Madison, Wis.

The board of visitors to the state normal school at Oshkosh inspected the school severally during the winter, and again together May 17-19. We find a strong school, well organized, and pervaded with an admirable spirit. The instruction in the several class rooms impressed us as intelligently directed to definite results, and generally characterized by breadth and a good comprehension of its relations to the preparation of teachers. The school, we believe, well deserves the confidence and favor bestowed upon it by the people of the state, and we desire the criticisms and suggestions which follow to be interpreted in accordance with this statement.

## THE PREPARATORY DEPARTMENT.

We call attention to the following facts relating to the preparatory department:

At the time of our visit in December there were enrolled in this department 119 pupils, of whom Winnebago and Fond du Lac counties each furnished 27, or nearly half the entire enrollment. To these add the following: Washington 10, Outagamie 8, Ozaukee, Manitowoc and Waupaca each 6, and we have 90 out of the 119. Thus the essentially local character of the department is abundantly evident. Whatever influence it has is for practical purposes confined to the area indicated. That within this area there are now abundant facilities for good elementary instruction appears evident from the fact that in Winnebago county there are now four free high schools, in Fond du Lac five, in Washington two, and in Outagamie four. It is noteworthy, further, that a considerable number of these pupils enroll from towns in which there is a free high school. Thus, there are 13 from Oshkosh, 4 from Fond du Lac, 4 from Hortonville, 3 from Peshtigo, 2 from Neenah, 2 from Neillsville, and so on; in all 45 from towns having a free high school. The preparatory department was necessary when good elementary instruction could not readily be obtained in the public schools at or near the homes of the pupils, but we believe that this necessity has now passed away, and that the continued maintenance of it operates to the disadvantage of the local schools. The pupils in this department are for the most part of school age. Thirty three record themselves as sixteen years of age or under, while only thirty four are nineteen and over.

The influence of the normal school for the improvement of the instruction in the local schools would, we believe, be considerably increased by the abolition of the preparatory department. At present candidates who fail in the entrance examinations cover the fact by entering the preparatory department, and thus the salutary effect of the examinations upon the schools from which they come is lost.

That the preparatory department pays for itself does not seem to us an important consideration. If it is necessary for the normal school, and

---

*Reports of Boards of Visitors.*

---

also beneficial in its influence upon the schools of the state, it should be maintained even at considerable expense; but if these conditions do not prevail the spirit and aims of the institution require its discontinuance. That it serves as a means of correcting partial defects of preparation is true, but does not seem to us important. All institutions dependent upon others for preparatory work have this difficulty to contend with, and the best ways of meeting it have been pretty clearly developed by experience. It is deserving of serious consideration whether the time has not come for the normal schools to exercise selection among the material offered them. It may have been wise in the past for these institutions to take all who offered and try to make teachers of them; but the time will come, if it has not come already, when it will be part of their function to select the best, as well as to train those whom they have selected.

We urge, then, the following reasons for the discontinuance of this department:

- (1) It is no longer necessary to form a connecting link between the normal and the public schools.
- (2) It is largely a local school, and therefore foreign to the purposes of the institution.
- (3) Its continuance is undesirable for the public schools, because (a) it draws away pupils which should be found in them, and (b) prevents the direct application to their work of the standard of the normal examinations, by admitting those who fail to pass the tests.
- (4) It tends to obscure the duty of the normal schools to select as well as to train candidates for teaching.
- (5) It is injurious to the normal school, because (a) it is foreign to its general purpose, (b) it serves to obscure from the public its high standards, and (c) sends into the field those who are considered normal teachers although they have not been able to pass the tests for admission.

#### RELATION TO THE RURAL SCHOOLS.

Closely related to the question of the preparatory department is that of the relation of the normal school to the rural schools of the state. It has been repeatedly urged that the preparatory department and the first year of the normal course serve a useful purpose in preparing teachers for these schools, and the evidence seems conclusive that many pupils from these classes actually teach in the schools. But from the point of view of a professional institution this incidental preparation can hardly be regarded as satisfactory. There is no special adaptation to the schools, no study of their conditions and necessities, not even a well balanced course of study complete in itself, but only a fragment of a possible larger course. Now it seems to us that if the normal schools are to help the rural schools directly they should address themselves seriously to the work. It is at least possible to devise a course of instruction for rural teachers, and the large patronage accorded to county summer schools appears to indicate a demand for such instruction. In view of the brief period of service and low wages of rural teachers such a course would have to be short, not longer than one year. We are of the opinion that one effect of creating such a course would be a more complete adjustment of our professional schools to the present condition of education in the state. As bearing upon this we call attention to the character of the first year work in the present normal course. It is almost entirely repetition. All candidates for admission are subjected to a rigid examination in the third grade branches, and if they pass are required to spend a year in the study of these branches. We cannot escape the conviction that for those who contemplate more advanced work it would be more profitable to go at once to the studies of the second year, which afford the stimulus of new branches and are equally valuable for the formation of correct habits. After the tonic and broadening effect

*Oshkosh Normal School.*

of such studies has been secured the candidates for teaching can return to third grade branches as professional work, and accomplish higher results with them in much less time. Thus the suggestion which seems to us deserving of serious consideration is: Cannot the present work of the first year be so modified as to make of it a course for rural teachers, and the normal course proper be made to begin with the present second year studies? Such an arrangement would result in a differentiation of aim among the students, a closer adjustment to the field, and an elevation of the standard of normal school studies. The course proposed should be independent of the other, and lead to no certification.

## THE ELEMENTARY COURSE.

The question of adjustment leads further to consideration of the present elementary course of two years. We are at a loss to find satisfactory reasons for its continuance. If it is suggested that this aims at the preparation of rural teachers, the answer is that it has completely failed of the result from lack of adaptation to the conditions. If we try to justify it as a preparation for elementary teachers in graded schools, we are checked by the difficulty of maintaining that two additional years can fit for high school service. This seems rather to be adjusted to the requirements for a limited state certificate, itself a temporary expedient, and therefore foreign to the aims of a professional school. It has these mischievous results:

(1) It tends to prevent many from completing the full course by giving an official approval to leaving at this stage. Thus many never set their aim beyond it, and of those who do and leave at this stage a number fail to return.

(2) It confuses the public, who fail to distinguish between a certificate and a diploma, and this confusion furthers the disintegrating effect in the school.

(3) It affects unfavorably the development of the course of study, a striking instance of which is seen in the long continued practice of deferring the commencement of Latin until the Junior year, although this rendered the course in that branch pitifully lame.

Other like effects still survive. We cannot see that any serious inconvenience would result from the abolition of the certificate and the consequent unification of the course of study.

(Signed)

J. W. STEARNS.  
I. N. STEWART.  
H. B. HUBBELL.

## OSHKOSH NORMAL SCHOOL — 1893-94.

MADISON, Wis., July 7, 1894.

HON. O. E. WELLS, State Superintendent—

Sir:—The committee appointed to visit the normal school at Oshkosh beg leave to submit the following report:

The members of the committee visited the school at various times during the year. The chairman was able to make only two visits, but the other members of the committee each made three. The last visit was made by all the members at the same time when this report was discussed.

We find it unnecessary either to commend or criticise the management of the school. The board of normal regents is not ignorant of the energy and efficiency with which the school has been conducted for many years.

f—Supt.

*Reports of Boards of Visitors.*

They know that the discipline is good, that the teaching is vigorous, and that the temper both of teachers and students is excellent. No suggestions are needed from us on these topics.

In the matters of the details of teaching, it is the office of the president of the school to make suggestions, and we deem it wholly unnecessary to take any part of this function.

Our report therefore deals with a few topics which we consider of general importance.

## BUILDING.

The building is not in an uncomfortable and crowded condition, partly owing to the construction of the addition. The various deficiencies noted in class and laboratory rooms and in ventilation will not be reported on, as the transitional state of affairs forbade a thorough examination or criticism.

## APPARATUS.

While the school has a fair supply of apparatus, many deficiencies are still to be supplied.

In geography the appliances for teaching are far behind the requirements of the subject. No large, standard work on geography is in the library. There is no good supply of maps for physical geography. There are no models, and the single relief map has a vertical scale so exaggerated as to be worse than useless. A large supply of maps, models and relief maps, with books for collateral reading is greatly needed in this department.

In physics the laboratory method of work is being followed with good success. More apparatus is, however, needed and more time for study. The committee find very prevalent the feeling that a small supply of apparatus is sufficient for an elementary course especially if a comparatively short one. The notion is also sometimes expressed that the school should reproduce the conditions of poverty which the student is likely to find in the school which he may teach. While we do not suppose that either of these ideas are found in the board of regents, we feel it worth while to emphasize the exact contrary of these errors. Expensive pieces of apparatus are not greatly needed in an elementary course. But a large, abundant, supply of the simpler pieces is absolutely necessary. It is the design of the course to supply the student with the elementary ideas of the subject by means of the laboratory method. If this aim is to be reached in any full measure a much larger supply of apparatus must be at hand than is now in possession of the school. It must also be kept in mind that an equipment for a laboratory course is very different from that needed for experimental lectures and is much larger and more expensive.

Elementary students, too, need the best and most carefully constructed apparatus, though not by any means the most complex. This is needed if such students are to gain exact and clear ideas in the short time at their disposal. Advanced students can allow for instrumental imperfection in a way that elementary students can not do.

In biology more microscopes are needed. The outfit of dissecting microscopes is good and the students are using them to advantage in their botany. But more compound microscopes are needed and the student should be trained to work with them, not merely to look through them.

In all the science studies the aim of the normal school should be to show how well and efficiently apparatus can be used to disclose elementary ideas. It is not its function to teach students to make bricks without straw, still less to call on its own teachers to perform that somewhat unpleasant task. The equipment at Oshkosh is not to be condemned. The board has made

---

*Oshkosh Normal School.*

---

large appropriations for its enlargement. Knowing this disposition of the board we take especial pleasure in urging that the school still needs more and much more before it has reached the standard of efficiency which a normal school should have.

## LIBRARY.

The committee is glad to commend the library work done in the school. Yet they desire to draw attention to the fact that it is at present rather literary than professional. It aims to introduce the student to the use of books for himself rather than to show him how to use books for the benefit of his school. The imperative need for the first work is fully felt and nothing should be said to disparage it. But, in the judgment of the committee, another course should be added on the management of the school library. There should be a model library such as is found in district schools and one of high school grade. The students should be made familiar with these books and with the manner of using them for the best advantage of the schools. All students should be required to take this course, and especial attention should be given to those who expect to work in country schools. The state department of education should aid this work by lectures and in other ways. All county superintendents agree that there is a deplorable amount of ignorance on the part of teachers as to the best ways of utilizing the district library. Through this ignorance the benefits of the state library law are often lost in great part. Here is a direction in which the normal school can do much service to the state.

## THE PREPARATORY DEPARTMENT.

The question of the abolition of the preparatory department was carefully discussed and was found a somewhat perplexing question. A not inconsiderable number of teachers from the adjacent counties attend the normal for one or two terms and get much benefit from even such brief attendance. They would hardly be able to do this were it not for the preparatory department. This is certainly an argument in favor of the department. On the other hand it is conceded by all that there are great evils in maintaining work of so low a grade in one of our higher institutions of learning. The real value of the preparatory department seems to be incidental — as aiding teachers from country schools who are unprepared for the normal proper. Such aid, it seems to your committee, would be more efficiently rendered by a professional course of not more than one year, adapted to the academic qualifications of the teachers of our district schools. It would then be possible to require attendance on such a course as a qualification for teaching in such schools.

It seems also possible that such teachers could be aided by summer work in the normal schools. The needs of high school teachers for summer aid in their teaching are fairly met by the summer school established by the state in connection with the university. But there is a large field which is left entirely to the private summer school, and which the private school must from the nature of the case, meet very inadequately. There is for instance, the greatest need for adequate instruction in modern methods of teaching geography, and in nature study as adapted to the public school. If the normal schools do not meet this need it will not be satisfied.

These recommendations point in the direction of making the normal course a more purely professional one. It seems to the committee that the entire course could be wisely made more professional. The graduate of the full course at the normal school is entitled to teach any public school in the state. Yet he is still unprepared to teach our high schools in more

*Reports of Boards of Visitors.*

than one important subject. The Latin course in the high school extends through four years while that of the normal is one half as long. It is obvious that a person who has studied Latin only two years is not qualified to teach it. Something of this same sort must be said in regard to science. The science courses are so short that the student is unable to master the scientific method, although he may be prepared to recite the facts of the text book. These text books are in most cases the same as are used in the high schools. It does not need proof that the teacher should have a much wider knowledge of the subject than is given by the book which he is to teach. Otherwise his knowledge is apt to be partial and one sided.

If the normal schools could rely more on high schools and graded schools for the academic preparation of their students and give them a professional training for teaching according to the grade of academic advancement reached by each student, they would do a great service to the state—a greater one, in our opinion, than they now do in attempting to combine academic teaching, of high school and lower grade, with professional training.

Respectfully submitted.

E. A. BIRGE,  
R. A. MOORE,  
H. A. SIMONDS,

*Committee.*

MILWAUKEE NORMAL SCHOOL — 1892-93.

WHITEWATER, Wis., July 5, 1893.

HON. O. E. WELLS, State Superintendent —

Sir:— Your committee appointed to visit the Milwaukee Normal School during the year 1892-93, respectfully report that the different members of the committee visited the school at various times during the year as convenience permitted, and met in June for purposes of comparison and consultation.

They were highly gratified to find the school in a flourishing condition, the enrollment showing a marked increase over any previous year's attendance. This is taken as evidence that the school is with a greater degree of success adapting its work to the needs of teachers and bringing its work to their notice. Your committee find also in the general bearing and behavior of the students, both in the class room and during intermissions, sufficient evidence that the pupils enjoy their work and the quite complete freedom from constraint. It would not be strange if in some of the younger or newer pupils of the school this freedom and spontaneity should result in levity; but the success of the method of discipline must be judged from the character and behavior of those who have been longest subjected to it, not from classes of beginners. Surely a normal school is the last place in which we should look for a system of petty restraints, or minute regulations of personal conduct. Those who are to give laws to others must learn to control their own behavior so as to avoid reasonable censure.

\* \* \* \* \*

The effort made in the study of English literature to secure the actual reading and study of standard works, instead of reading about them, seems to your committee worthy of hearty commendation. Enough of the history of literature is necessary to trace its development fairly, and to place in proper setting the principal productions of English genius; but this is properly second to an acquaintance with an appreciation of litera-

---

*Milwaukee Normal School.*

---

ture itself. In this field the Milwaukee normal is specially favored, being able to supplement its own resources with those of the Milwaukee Public Library, freely offered by its managers. From this cooperation great good may result. It is the frequent testimony of those who interest themselves in the extension of library privileges, and in encouraging more general reading in schools, that teachers themselves are not sufficiently aroused or informed. If the students of this school can go out with a knowledge of books and how to use them, and enthusiasm enough to overcome popular inertia and prejudice, their influence will be welcomed by all educators and felt wherever they may go.

Considerable attention was given to the practice work in the model department. Here there is much to commend. The students gave evidence of zeal in the work, and seemed bent on actually teaching the children, not simply trying to carry out a set of detailed instructions. There was often, not always, a vigor of movement, alertness in questioning, successful direction of the work of the class, and ignoring of visitors, quite creditable to the pupil teachers. If in some cases there was lack of sequence, or failure to show distinct purpose in the work, it will not surprise an experienced teacher, nor show such practice to be unprofitable.

The conditions seem quite favorable in this school for a fair test of the value of the practice department. The value of example, the permanent benefit of being associated with capable, enthusiastic teachers cannot be over-estimated; but until law schools abandon moot courts, and medical students learn by observing dissections only, while making none themselves, it will seem rational for young teachers to learn by actual experiment as well as by imitation.

Two quite distinct purposes of such work may here be attained with apparent ease. In the model school the division of the classes into small groups will give the student a chance to study pedagogy as a science. The number of pupils is not so large as to confuse or worry the teacher, and he may thus learn *how* to teach, that is to "cause the child to know." The theory of teaching, or distinctively professional work based on psychology may here be explained, tested, verified; the conditions of mental growth studied, and suitable methods adopted or adapted. In the public school branch of the practice department the student may next try teaching large classes under conditions such as usually prevail in common schools. Here new problems of management and discipline demand attention. To set the student to studying the subject of pedagogy in the presence of fifty children is absurd enough; yet there is some foundation for the complaint that the abnormal conditions surrounding normal practice teaching make failure in a normal graduate's first school a somewhat common experience.

It would seem that a partial remedy for this state of things may be found in extending as far as practicable the limits of practice teaching and "substituting," in connection with the city public schools. The science of teaching will then be studied with small groups; the art of teaching large classes in accordance with established theories, will be acquired by actual experience in the school room. The oversight of the director is gradually lessened, while opportunity for frequent consultation with a sympathetic experienced critic is not wanting.

If this practice work in a public school should be so continued as to cause for a time complete cessation of the student's ordinary class room work, possibly the gain would be more than enough to balance the loss; such a course would at least help to make very clear the difference between a normal school and a young ladies' seminary.

Your committee look upon the establishment of the kindergarten course as a step in the right direction, that is to say, it looks towards a suitable differentiation of the work of the school to suit its several classes of patrons. Its location at Milwaukee imposes upon the school a duty in the way of

---

*Reports of Boards of Visitors.*

---

suitable training for the large number of grade teachers constantly demanded by a growing city. But a high class normal school must do much more than this. It should provide for the broader culture and professional equipment of the principal and superintendent. He must have wider if not deeper knowledge of subjects to be taught, must know more of school law and relations between parent and school, must know more of school supervision, of grading and systems of schools, more of the general philosophy of education.

His practice work may well be put on a higher plane, perhaps in the academic work of the normal grades, equivalent to the high school work he expects to do. Such work may be provided for as post graduate work to be recognized by a special certificate, or done in the regular course, suitable provision being made for a system of equivalents. It ought not to need argument to maintain that either in the organization or administration of a normal school, there should be sufficient flexibility to furnish opportunity for intending teachers of any grade to get help along the lines where they most need it. Your committee heartily approve of the steps already taken toward meeting this demand by increasing the number of courses offered. Whether there should be a corresponding difference in the diplomas offered is another and less important question.

\* \* \* \* \*

Respectfully submitted,  
 T. B. PRAY,  
 C. E. PATZER,  
 MARY D. BRADFORD.

---

 MILWAUKEE NORMAL SCHOOL—1893-94.

To the HON. O. E. WELLS,

State Superintendent of Public Instruction:

The undersigned committee appointed by you to visit the state normal school at Milwaukee and to report to you its condition respectfully present this their report:

Each member of the committee visited the school at least twice, and one of them three times. This school is distinctive in having neither a preparatory department nor an elementary course, a rank to which it is to be hoped all the other normal schools of the state will attain in due time.

As regards the general administration of the school, its appearance and condition, the committee have only words of commendation. The general air and spirit of alertness, of promptness and vigor, of earnestness and business dispatch that characterize the bearing and work of both pupils and teachers are worthy of high praise. The whole teaching force of the school seems alive with the spirit of the modern methods of instruction and the excellent executive ability of the president is worthy of special remark. The work of all the teachers is so generally good that it is somewhat difficult to discriminate but there are several features that strike the committee as particularly admirable and worthy of special mention; as, for instance, the work in the department of history, civics and geography, the work in the department of mathematics and Latin, and that in literature.

The practical work in the natural and physical sciences and the laboratory methods deserve high praise. Another commendable feature of the school is the pupils have the privilege of doing a part of their practical teaching in the public schools of the city, thus getting their practice experience under normal conditions.

*Platteville Normal School.*

## SUGGESTIONS AND CRITICISMS.

It is the opinion of your committee that more should be made of drawing as an aid in teaching in all our schools. To this end the pupils in our normal schools should be thoroughly trained in the principles and practice of drawing, and especially to illustrate their teaching by rapid blackboard sketching. This suggestion applies to the Milwaukee normal school.

In one class in reading there was perhaps too much attention paid to form; not enough to the thought. Still, in two or three short visits to a school one might mistake as to the general scope of the instruction.

In another case the committee is under the impression that there was too much reciting done by the teacher. Earnest, enthusiastic teachers, full of the subject taught, sometimes fall into this error.

We would suggest that some instruction and practice in word analysis be added to the work in English.

While the committee think it eminently proper that the board of regents should examine the classes in the normal schools to test the scope and quality of the instruction, we would respectfully suggest that the faculties of the respective schools are the best judges of their pupils' fitness to be graduated.

## NEEDS OF THE SCHOOL.

In the first place the building is inadequate to the accommodation of rapidly increasing numbers.

The ventilation of the building is most deplorable; if the truth must be told it is a disgrace to the civilized state. By measurement of the flues, one of the committee found the amount of air taken into the rooms insufficient for a fourth part of the occupants.

The teaching force is not large enough and the teachers are overworked.

The appliances and apparatus for illustrative teaching are entirely incommensurate with the demands of modern ideas and methods and the needs of the school.

The best of these things are not good enough for teaching the youth of America and for the training of the teachers of these youth.

In conclusion we wish to say that the normal school of Milwaukee is, even with its limitations, an institution of which the people of Wisconsin should be proud, an institution that deserves their support.

Respectfully,

ALBERT HARDY,  
M. S. FRAWLEY,

Wisconsin, June 28, 1894.

## PLATTEVILLE NORMAL SCHOOL—1892-93.

HON. O. E. WELLS, State Superintendent:

Dear Sir:—The committee appointed by you for visiting the normal school at Platteville respectfully make the following report:

The institution at Platteville presents much the same features as last year. The now completed enlargement of the schoolhouse furnishes facilities for the freer distribution of the school into the various departments of instruction, a commodious and cheerful assembly room and more opportunity to work in the physical sciences. It is much to be regretted that improvements in the housing of the pupils have not included any proper care

*Reports of Boards of Visitors.*

of their health in solving the problem of ventilation, in either the older portion of the house or the new. This seems unaccountable, considering that, besides the importance of such provision to the good of the whole school and as an object-lesson to those who are to be the teachers of the state and to other citizens, the problem, as related to this building, presents no insuperable obstacle. The committee can hardly deem their duty properly discharged without very earnestly repeating the suggestion of last year, that early measures be taken to supply what is needed for full ventilation in this present case, and that no contract for a school building or local superintendence of such contract, be allowed to pass without abundant provision for the furnishing of just as good air as the winnowing winds can elaborate for the making of the best blood to feed the brain and heart of the precious sons and daughters who are the joy and hope of our Wisconsin.

\* \* \* \* \*

In the direction of suggestions made last year and now worthy of being more emphasized because of the enlarged house, your committee find that the school is inadequately equipped, both as regards apparatus and books. The new chemical laboratory is fairly furnished with bottles and reagents, but there is an almost total lack of apparatus for demonstration. The condition of the department of physics is worse. There is a small quantity of apparatus for demonstration and lecture purposes, but there is nothing with which students can work, nor is there provided any place for a physical laboratory. It is not too much to say that it is impossible to give an adequate idea of elementary physics with the means at the command of the teacher. The condition of the department of geography is still worse. A few maps have been bought during the past year; but there are no atlases or wall maps for use in physical geography. Indeed, no one could infer from an inspection of the school that there exists such a subject as physical geography. There are no books for collateral reading in geography except a very few, mostly popular and antiquated. The school has one microscope, which is in fair condition. There are, however, no dissecting microscopes for use in botany, and consequently no proper instruction can be given in that important subject. In all these departments, with the exception of chemistry, the equipment of the school would not be creditable if found in one of your smaller high schools.

Your committee must report that no instruction in physical science of high school or even grammar grade can be given at Platteville without large additions to equipment in all departments. If the school is to graduate teachers capable of teaching physical science, even in the smaller high schools of the state, the equipment must be completely renewed with the exception noted before. A sufficient number of teachers must be employed who are accustomed to laboratory methods; they must be provided with rooms and apparatus, and sufficient time must be given in the curriculum for their giving instruction. The library must have large appropriations for the purchase of books for collateral reading. These things are needed, not to secure an advance in the grade of the school, but to enable it to do the work which it is trying to do in a fairly efficient manner. The present condition of the school is discreditable to the state.

The same habit of earnestness in work, on the part of the teachers and pupils, was found to pervade the school this year as was matter of last year's mention. Whatever is the cause to which this prime feature of the institution must be attributed—and no doubt the honor of it may justly be divided between the earlier traditions in which the school at Platteville is planted, and the rare genuineness of the present administration—there is so little exaggeration of the rigmarole of the mechanics of methods as to leave great freedom in the personal working between mind and mind

---

*Platteville Normal School.*

---

and character and character, in teacher and pupil. It is to be hoped that this and other normal schools, the earlier superintendence of which, in illustrious hands, has been so large minded, will still be spared the visitation of any such straight-laced and hard visaged domination as not to permit the elaboration, in those who are to be teachers, of men and women who, swearing by no master in methods and spirit of work, save in such as, under the guidance indeed of maturer persons, are wrought in them, after all, vitally by free energies of their own minds while confronted by the spirit of all truth. It is no new doctrine that teachers are not made in machines, or like anthracite coal, under pressure of mountains. The making of them must be in freedom and self respect. They are children of the truth.

While the institution at Platteville is characterized by marked earnestness of purpose in some of the departments, your committee continue to discover failure to carry the pupil along with careful movement through a continuous development of the subject he has been set to master. Classes are left in arrearages, each day not having been made ready for by the thorough mastery of the work of the day before. In two or three rooms, rudiments and fundamental principles are not gotten and kept well by heart, and so advance ceases to be conquest. From whatever cause arising, this is not good teaching, and should not be allowed. Unless promptly corrected it would seem necessary that the classes in question be placed in other hands.

A difficulty has been thoroughly suggested to your committee by their observation of the school at Platteville, which must in the nature of the case, be incident to all our normal schools as at present ordered, in the lack of an adequate definition of the exact work the normal school is set to do. For a school like the one at Platteville to be set to the work of preparing teachers for all grades of the schools of the commonwealth, is to have assigned to it a work which, so widely put, it is utterly incapable of doing properly. Nothing short of the most thorough and complete collegiate education—we might almost say, university education—can be a due preparation of teachers suitable for the high school. Anything less than this, as a rule, must inevitably depreciate the quality of education. It is no doubt true that a good training in the normal school is better than a poor training in the college, and that character from the normal school is better as qualification for teaching, than characterlessness from the college; but neither poor training nor characterlessness should be allowed in the places of instruction in any of our schools, and the high schools should not be subjected to the slightest suggestion of occupancy by any teachers but those of the highest character and the strongest and richest training. It seems to your committee, as already in a previous report suggested, that in some way this should be positively recognized both in the fundamental basis, and in the administration of our normal schools as a settled limitation to their function, and that the courses and method of instruction in them should be shaped with a view to preparing teachers specifically for grades of instruction short of the highest. Training in relation to studies of the primary and grammar school, and in such elements of high studies as will be preparatory to the high school, seems to be the special office of the normal school, as differentiated from the office of the university or college, which is in one of its functions, the highest and most consummate, and really, for the higher grades of instruction, the indispensable normal school. It will be fatal to the best civic education if the university and college is ever substituted or depreciated as the laboratory of teachers in our public schools. As it is at present, the normal school is aspiring to do the work which is out of its power and would better be left to the college, while the normal school might, if doing its own appropriate work, in supplying the common school with teachers, be far more and even supremely useful, and thus the existence of the normal schools would be, if possible more than

*Reports of Boards of Visitors.*

now, abundantly justified. The function of the normal school hardly seems yet to have had sufficient attention and the organizing of the school system of the state needs to be at this point more thoroughly wrought out.

With sincere esteem,

Yours,

J. J. BLAISDELL,  
E. A. BIRGE,  
MRS. L. R. GOTT.

June 30, 1893.

PLATTEVILLE NORMAL SCHOOL—1893-94.

HON. O. E. WELLS, State Superintendent:

The committee appointed by you to inspect the Platteville normal school most respectfully submits the following report for the year ending August 31, 1894:

The condition of the grounds and building indicates that all matters pertaining to health, cleanliness, and general neatness receive due attention. Although the building has recently received a large addition your committee was impressed with the fact that the accommodations are not now all that could be wished. While the new assembly room is well lighted, fairly well ventilated, well proportioned, and conveniently arranged, it is already taxed to its utmost to accommodate the students in attendance.

\* \* \* \* \*

Furthermore, it is considered no small part of the teacher's duty to guard the health of the pupils by an intelligent adjustment of all means at command for the purpose of heating, lighting, and ventilating the school-room. It would seem quite important that normal instruction along these lines be supplemented by object lessons with modern and model appliances. It seems desirable also that normal graduates carry from their schools high standards in these lines and thus be able to lead public opinion in districts where they teach to such an understanding of the value of proper light, uniform temperature, and pure air in the school room that the patrons will be satisfied with no appliances for furnishing these which are below the best.

\* \* \* \* \*

The order and discipline of the school were uniformly good and were seemingly maintained without special effort on the part of those in authority. Self respect, self-control, and a respectful bearing toward each other and the instructors, characterized the students of the school.

The work in physical culture is worthy of mention. The new gymnasium with the equipment affords an excellent opportunity for developing and maintaining a high degree of physical vigor among teachers and students. All the methods and exercises seem to be wisely adapted to the needs of the students. The heartiness and evident pleasure with which all—primary child and senior, young women as well as young men—enter into the vigorous exercises and drills, afford positive justification for all expenditures in this line. The good sense exercised by the young women in throwing aside that self-consciousness and false modesty which often make the best results in this line of development impossible is worthy of high commendation.

Drawing is now recognized as an important branch in the public schools on account of both its practical utility and its educational value. It

*Platteville Normal School.*

would seem very essential that all who intend to teach should receive a clear and comprehensive understanding of this line of work. Ability to sketch rapidly is of great advantage to the teacher in way of explanation and illustration. In arithmetic, geography, language, and in all the natural sciences it has become an indispensable aid. As an element in education drawing has even a greater value. Properly taught it develops a keenness of perception, a delicacy of taste, and a love for the true and beautiful in nature and in art. With satisfaction we note that the value of drawing to the student preparing to teach is recognized, and that intelligent and effective instruction is given in this line.

We believe that music has a beneficent influence upon children of all ages and should be taught in all schools, not as a recreation only, but regularly and systematically as other branches are taught. It should be taught not only for its own value, but for the sake of the schools themselves, and for the intellectual, moral and physical improvement of every pupil in the schools. In all schools outside the larger cities the work must be done by the regular teachers. In view of these facts we consider it very essential that every normal school should give thorough and systematic instruction in this branch, and that a fair theoretical knowledge at least of music be made one of the conditions of graduation. The uniformly good singing in the normal department, the proficiency with which the pupils in the model departments sing by note, and the excellent spirit which attended the music work in every department, lead us to believe that the work in music is well done.

\* \* \* \* \*

Your committee found it difficult to form a definite opinion of the instruction in Latin. The work in the advanced classes seemed to indicate a lack of thoroughness in the elements of the language. While it would be unjust to hold a teacher responsible for the work of a predecessor, it is manifestly the duty of a teacher in taking up the work of another to strengthen the weak points, instead of floundering on through new work. On the other hand, the pupils of the first year class had attained an accuracy of pronunciation, a mastery of inflections, and a knowledge of the simple principles of syntax that were quite remarkable. A noticeable feature of the instruction was the reading aloud by the teacher of the lesson assigned for the following day thus calling attention to each word, its pronunciation, root meaning, inflection, syntax and position in the sentence. The results attained seem very satisfactory; but it would be impossible to form a positive judgment on the value of the method until the power of the pupils has been tested in more advanced work.

The recitations in English literature were models in many respects. The quiet dignity of the teacher, the freedom and earnestness with which the students entered into the discussions, the independence of thought on the part of the students, and the close observance of approved class methods, were points worthy of high commendation. \* \* \* \* \* In the mind of the chairman of the committee it seemed just possible that the teacher in literature failed in a degree on the positive side of instruction; failed in positive expression of opinion and in directing discussions finally to wise and definite conclusions.

In the department of history and civics the instruction was marked by intelligent interest accurate scholarship, and honest effort. The outlines of work and tables of reference represented patient research and thought. We noticed, however, a constant temptation on the part of the instructor to do much that should have been done by the class. This was due in no sense to a desire on the part of the instructor to exhibit his own knowledge, but to his anxiety to have his pupils get a clear understanding of the subject in hand. It must be remembered that the principal end in the study of what is usually called the humanities is mental training-power

---

*Reports of Boards of Visitors.*

---

to investigate, to weigh evidence, to form intelligent opinions, to express thought — and that this end can be attained only through the self activity of the pupils themselves. It is what pupils do for themselves, not what the teacher does for them, that affords mental training. It would not greatly surprise your committee if the results of the work in these lines should prove quite disappointing to pupils and teacher alike, when the class appears before the examiners.

Concerning the department of physical science it will suffice to say that inasmuch as instruction in elementary science is demanded in almost every school in the state, and inasmuch as the value of the results in this branch is almost wholly dependent on the spirit and methods of instruction, it seems deplorable that this department of a normal school in this intelligent commonwealth should be so lacking in the proper equipment and so out of harmony with the spirit and methods of modern instruction.

\* \* \* \* \*

The instruction in theory and art of teaching was characterized by a spirit of quiet earnestness and mutual helpfulness. We feel that the practice work of the student teachers, under the watchful eye of the supervisor who carefully notices every detail of the exercise and offers wise criticism, should be attended with valuable results. We fear, however, that much of the work will go for naught unless the instruction in the other departments exemplifies right methods. Under the influence of bad teaching the students become saturated with wrong methods, and when they go to their own work they will teach as they have been taught, not as they have been told how to teach. We believe, therefore, that the most urgent need of the normal school is teachers eminent in scholarship; teachers whose instruction will also supplement the strictly professional work by exemplifying thoroughly rational methods.

- \* \* \* \* \*

In this connection your committee would suggest that the model schools as now organized do not furnish the most favorable opportunity for practice work. With children selected from the mass by the tuition requirement and carefully graded into small divisions, these well organized schools do not offer the same problems met with the average school. It would seem to your committee possible to make some arrangement with the local school boards in the cities where the normal schools are located, by which certain departments of the public schools might be used for practice and observation work. In this way the student teachers would get some valuable experience in a real school, gain insight into the details of management, and receive a more comprehensive knowledge of the organization of schools as they now exist.

On account of the high esteem in which the president is held by each member of the committee we hesitate to offer any criticism on the general management of the school. If any criticism were offered it would be that possibly the administration lacked a little on the side of positiveness. This is due to no lack of strength on the part of the president, but to his kindly sympathetic nature and his personal loyalty to co-workers. We do not believe in destroying in any degree the individuality of the subordinate teacher, but we do feel that a president or supervising officer must lay out the policy of his school along broad lines, and must insist upon having the work in all departments done in accordance with the fundamental principles of pedagogy. We feel sure that a closer attention to details of the work would make impossible the glaring violations of some of the common maxims for class management which were frequently noticed in some of the departments.

It might also be mentioned that it struck your committee quite forcibly that it would be advisable to organize all the work of the school more closely into distinct departments, with an instructor at the head of each

*River Falls Normal School.*

who should be held in a measure responsible for its management. This would insure more wisely directed effort, greater continuity of work, and results more nearly commensurate with the energy expended.

Respectfully submitted,

R. B. DUDGEON,  
A. J. VOLLAND,  
D. D. MAYNE,

*Committee.*

July, 1894.

## RIVER FALLS NORMAL SCHOOL—1892-93.

WEST SUPERIOR, WIS., July 1, 1893.

HON. O. E. WELLS, Superintendent of Public Instruction, Madison, Wis.:

Dear Sir:— I hereby transmit the following report of our visits to the Normal School at River Falls.

The time spent by the committee at the school was such as to enable us to give, to the best of our ability, a just estimate of the work done therein and its present condition.

We note first the satisfactory moral tone of the school as exhibited in the harmonious action of faculty, the unvarying courtesy of the students of all departments, and the absence of sham and pretence.

The work done in the model department is excellent. The teachers are worthy models for pupil teachers to follow. The children in the model department are well taught. This speaks well for the professional department of the school. The children are bright, responsive, and self-reliant—qualities which result only from right methods of instruction. The student teachers are subjected to wise and thorough criticism by the Supervisor of Practice. The very severity of this criticism may, although it should not, result in an indifference on the part of graduates to the milder suggestions of some superintendents.

\* \* \* \* \*

The teaching of the Normal department was earnest, straightforward and thorough. In professional tone it was not up to that of the model department. The questioning was often faulty, the positions of students were contrary to the admonitions of the teacher of physical culture, and in some rooms the teacher talked too much for the good of the pupils. Being convinced that the students are trained *professionally* by the teachers of *any* branch the committee urges the importance of a high standard of teaching throughout. Why would it not be well for the members of the faculty of the so-called professional department, together with the teachers of drawing, voice and physical culture, frequently to visit the recitations in the normal department to see that this institution does not waste at one point what it receives at another?

While the student body is, on the whole, creditable the fact remains that young people are admitted with very scant knowledge and faulty habits of thought. Two remedies are possible for this; first, to raise the standard for admission to the preparatory department; second, to extend the time of the preparatory course. The practical side of the question to the school is not the theoretical ability of the adjacent schools to furnish proper material for the normal department but the actual condition of the candidates for entrance.

From statistics on this point furnished by the president, from observation of the student body, and a limited knowledge of adjacent schools, the committee do not feel justified in recommending either the abolishing

---

*Reports of Boards of Visitors.*

---

of the preparatory department, or a radical increase in requirements for admission to it. We would urge, however, that somewhere in the course there be given a more thorough knowledge of the subjects a graduate is expected to teach.

This leads to a brief discussion of the course of study. We believe too much is attempted. The student has too many subjects at one time, and must drop these subjects before they are mastered. It is true that many of the topics do not take time for preparation, but they take time for drill, as in physical culture. By breaking up the year into four short terms the pupil is kept in a continuous state of jumping from one thing to another. The best academies of the east offer a four years' course. The teachers of the River Falls Normal School are required to give grammar-school, academic and professional training all in four years. The beginning of so many subjects results in the mastery of none. The proverbial saying that all beginnings are difficult is only partially true. The discipline derived from a subject increases in geometric ratio toward its complete mastery.

One of the committee writes in this connection as follows: "The power to furnish a more perfect knowledge by the Normal School and to correct faulty methods of thought is hindered by the limited time assigned to the various subjects studied, made necessary by the multiplicity of subjects to which it is deemed proper to demand the attention of students; this at the expense of a substitution of a very imperfect smattering of many subjects they will never be required to teach, for such a knowledge of those they will teach as will make their teaching both profitable and pleasant for their pupils."

The school is not properly equipped with apparatus or conveniences with which to teach the sciences. It is not necessary to say that textbook work is not the best work for this department.

\* \* \* \* \*

The committee cannot see the wisdom of making the first two years of the English course lead to graduation. The doing of this must interfere with the proper sequence and continuity of studies in the four years' course.

It is doubtful whether, on the whole, a two years' course does not do more harm than good. Calling a person a graduate does not necessarily fit her to teach. Perhaps a simple statement of one, two or three years' attendance, also specifying the branches pursued, would be less likely to injure the longer course.

Learning that President Emery severs his connection with the school at the end of the present year, we cannot close this report without expressing our high appreciation of his character and of his services to the state. His honesty and directness of purpose were apparent throughout the school. His manly life cannot fail to be an inspiration to those over whom he has been placed.

A. W. RANKIN,  
A. F. NORTH,  
H. A. SIMONDS.

*River Falls Normal School.*

## RIVER FALLS NORMAL SCHOOL—1893-94.

OSHKOSH, WIS., July 3, 1894.

HON. O. E. WELLS, State Superintendent of Wisconsin:

My Dear Sir: The committee appointed by you to visit the River Falls Normal school submit the following report:

During the month of December, 1893, members of the committee made separate visits, and in May, 1894, spent part of a week examining the school.

So far as the general surroundings of the school are concerned, there is little need of suggestion. The school campus is naturally beautiful and well adapted for recreation. The sanitary conditions appear to be generally good. The building is neatly kept and the recitation rooms seem to be very well adapted to the work. \* \* \* Agreeably to your instructions, we report to you under the following heads:

## I. The Abolition of the Preparatory Department.

The committee feel that their limited experience in the matter impels them to speak with hesitation on the subject, but so far as we are able to judge, it would be best for the normal schools if some definite time were set when the preparatory department should cease. It is sometimes said that the abolition of the preparatory department will have an influence to divert students from the normal schools; but we believe rather that when the normal courses become in fact normal courses a larger number of scholarly young men and women will be attracted to them.

The present department has been brought into existence by the low condition of common school education in the state. We have reason to believe that the common and high schools are now better able to prepare students for a bona fide entrance to the normal schools, and that if due and timely notice be given of intended changes, there would be almost instant adjustment to the better order of things. We recommend that high school principals and county superintendents be urged to send to the normal schools only such as are prepared, and that the rudimentary training which has heretofore been given in the preparatory department be turned over to common and high schools, where it properly belongs.

We further recommend that the entrance examinations to the normal schools be of the rank of second grade certificates, except in the theory and art of teaching, and that persons holding second grade certificates be admitted without examination.

## II. Limiting the Validity of Elementary Certificates.

We do not believe that the time has come for abolishing the elementary course, or of materially changing the privileges that follow its completion. Some of the most successful teachers in the state have taken only this course, and to restrict the normal certificate to graduates who have finished the four years' courses would be unwise at the present time.

The committee is well aware that the limited scholarship of many holding the certificate tends to lower the standard of normal instruction in the opinion of many people. Such a condition of affairs is, however, inevitable, and we earnestly suggest that a remedy be attempted in the increased efficiency of normal instruction during the two years of the elementary course.

It would seem that a student who entered the school with power to obtain a second grade certificate could be so trained in two years that there should be no doubt of his ability to understand and to teach the common school branches.

We believe that improvement in normal school instruction is not to be obtained in abolishing or adding courses or subjects only, but in a higher standard of teaching under essentially the present conditions.

---

*Reports of Boards of Visitors.*

---

### III. Vigor and Wisdom of Administration:

Though the impaired health of President Hull has doubtless rendered it impossible for him to carry out many of his plans, we believe that the co-operation and assistance of teachers has made his administration wise and just.

### IV. Capacity and Efficiency of the Teaching Force:

\* \* \* Good work was observed at different times in all classes, and if the committee were to single out the weaknesses most noticeable, they would be the tendency on the part of teachers to do the work of the class, and a disposition to "develop" and "relate" ideas when pupils seemed to lack the academic knowledge necessary for such development and relation. The committee is further of the opinion that to introduce professional topics into the midst of poorly digested academic knowledge is to change virile and inspirational class work to a desultory exercise in which the pupil misses both the scholarship and clear educational doctrine.

G. Stanley Hall well says, "Only after a whole department of thought is well mastered can anything worth while be said of its logic or psychology. To mix real teaching of a subject with its method for beginners, is bad for knowledge and worse for pedagogy."

The fragmentary and hesitating answers noticeable in some recitations were largely due to the absence of study of regularly assigned tasks in which the student gains daily strength by daily mastery, and while the pleasure to the teacher may be great in "leading the pupil to see," often *ab ignorantia*, yet we believe the process is deadening to originality in thought or progress in sound scholarship.

We believe that if the relative time in some classes taken by teacher and pupil were exactly changed, a large improvement would be noticed in the independence of the pupils' work. While your committee point out certain weaknesses, we are fully sensible of the excellent work being done, and of the ideal plans of the various teachers to make their work of the highest order of efficiency, and we have confidence that progress is and will be made toward those ideals.

Respectfully,

W. C. HEWITT,  
O. GAFFRON,  
G. G. WILLIAMS,

---

## WHITEWATER NORMAL SCHOOL—1892-93.

HON. O. E. WELLS, State Superintendent:

The committee, appointed by you to visit the Whitewater normal school of this state, beg leave to respectfully report as follows:

One of your committee made two visits to the school, spending more than a week, which was devoted to direct study of the work and aims of the school. Another member also made two visits, covering a period of four days, spent in like manner, while the chairman, owing to press of private business, was able to make but one visit of one day's time. After a careful comparison of views and deliberate consideration, your committee are of the opinion: that the Wisconsin normal schools should take a long, strong step forward. This has become a firm conviction with many of their best friends. While the high schools have rapidly multiplied and have increased in efficiency, while the university has broadened its lines of work, abolished its preparatory department, raised its standard

---

*Whitewater Normal School.*

---

of admission, some of the normal schools plod along at much the same gait that they struck twenty years ago.

Your committee are also convinced that the preparatory department is a hindrance to the normal and a hurt to the neighboring high schools, that the standard of admission is unnecessarily low, that the elementary certification in many instances works harm, that the course of study needs to be broadened and strengthened.

## THE PREPARATORY DEPARTMENT.

The Whitewater catalogue recently issued shows the local character of this school. Of 296 in the normal department, 102, or more than one-third, come from Walworth county. Almost another third come from three adjoining counties. About one-fourth of those in the preparatory department register from Walworth, while most of the rest come from towns having good high schools or from the vicinity of such towns.

In a recent year, of 268 in the Platteville normal, 215 came from the county of Grant. The River Falls catalogue for last year shows that more than two-fifths of the total number in the normal department register from River Falls and that one half of those in the preparatory come from the same place.

When the registry proves that the students of these schools come from sections so thickly dotted with high schools the claim that a preparatory department is a necessity seems to be without foundation. When in one school more than one half of those pursuing the work in the first two years of the course register from the city in which the school is located, it is small wonder that the local high school has to struggle for an existence. Justice to the high schools as well as to the normals themselves, demands the abolition of the preparatory department.

## THE ELEMENTARY COURSE.

Many of those who receive an elementary certificate pose in their communities as graduates from a normal. Their lack of broad preparation throws reproach upon the school from which they come, whenever the public confuses the work of the two courses.

The practical working of this elementary course has always proved a detriment in developing the full course of study. It breaks the continuity of work and prevents the proper arrangement of studies.

The granting of this certificate often sends its receiver out to teach when he would better pursue his work farther. The abolition of these certificates would prove no detriment to the school, and would stimulate more to complete the full course.

## RAISING STANDARD OF ADMISSION AND BROADENING THE COURSE.

A set of questions procured from each school shows that some of the normals give much more difficult tests to applicants for admission than are given in others. Do not the improved facilities for proper preparation warrant the normals in raising the requirements for admission? Has not the time arrived for the normal schools to select from the applicants only those whose stock of knowledge and power to think fit them for vigorous work? The lack of proper preparation is quite noticeable in many classes.

No doubt many normal graduates who came unprepared to enter properly, even the preparatory, are now men and women of whom their respective schools are justly proud, but such material would find a way to the normal even were the requirements for admission much more severe than they now are. To quote an excellent authority, "The more potent the virility

---

*Reports of Boards of Visitors.*

---

in a youth the surer will he be to gravitate to large opportunities in men and measure."—(President Albee.) Would not more rigorous requirements bring a stronger class to these examinations? Would not raising the standard of admission afford the needed opportunity to broaden and strengthen the course of study?

To devote from ten to twenty weeks to such branches as botany, physics, physiology, chemistry, general history gives too small a smattering to enable one to teach them with marked success. The amount of work now done in Latin and German is far too small to fit one for teaching these languages in our high schools. It is not necessary that a student's time and energy should be dissipated by requiring of him some acquaintance with every branch of study; but it is of prime importance that he should gain breadth and strength in the branches commonly regarded as essentials. Is not the time fully ripe for an advance in the work required for entrance and in the work attempted in the course? Cannot the normals most effectively help up the lower schools by moving up themselves?

\* \* \* \* \*

Reviews of common school branches should be taken up with the idea of *showing how they should be taught in the school room. Too little attention is given to this phase of it.*

Classes given practice-teachers are not large enough. Teaching five pupils in a side room does not begin to fulfill the conditions met with in after life. Then there is such a thing as too much supervision. This does not make self-reliant teachers. There is too much interference, too, on the part of model teachers. Especially noticeable in music. Orders given by a student teacher were immediately countermanded or altered by model-teacher. Pupil's attention distracted and made nervous in consequence.

The faculty of a normal school should be composed of model teachers in their respective branches. Physiology is too important a branch to be left to a teacher "young and inexperienced"—as designated by the school president.

Not enough attention is given to the subject of children's reading. Sets of the leading juvenile works—at least those named in the "Township Library Catalogue"—should be found in each normal school, and *the students should be made familiar with their contents, and the many advantages to be derived from their use.* Ignorance on the part of teachers is the great hindrance in the promotion of the recent state law which may place in each school a small but carefully selected library of juvenile literature.

With as extensive a curriculum as a normal school has, too much attention cannot be paid, by each teacher, to the demands made by all concerning outside or home study. When a professor requires an hour's study, he does not often realize that three or four other members of the faculty are requiring an equal amount, the result being overworked pupils, and lack of proper recreation and rest.

*Whitewater Normal School.*

---

## WHITEWATER NORMAL SCHOOL—1893-94.

HON. O. E. WELLS, State Superintendent.

Madison, Wisconsin.

Sir:—Your committee for visiting the Whitewater normal school respectfully submits the following report:

The school was visited by the second member twice during the year and by the chairman once. We were very much impressed by the beautiful appearance of the campus, by the well-kept lawn and the numerous groups of native and foreign trees. These things cannot fail to have an elevating influence upon the pupils and to promote in them an interest in the study of natural objects. Upon entering the building, however, we were much disappointed at the very inadequate equipment for purposes of instruction in natural science. The importance of this department in normal instruction gives it high claims to attention, and we earnestly recommend that provision shall be made for well lighted and well ventilated laboratories for chemistry, physics and biology, each laboratory to be well furnished with apparatus for individual and class instruction. Experience in Milwaukee has shown that an expenditure of from \$5,000 to \$6,000 is necessary to provide the three laboratories with furniture and apparatus. When it is remembered that there are about four hundred thousand children in the public schools of the state of Wisconsin the importance of giving thorough training to the normal students becomes evident. It is only fair to add that the school seems to be doing all that can be expected of it with its present appliances.

We believe that there should be a much more generous supply of reading matter in all the departments, not only for the use of the students in the normal school proper but for those in the preparatory course and in the model school. In our judgment it would be sound policy to buy ten or twelve copies of each of the less expensive books. We recommend not only didactic works but books of various classes and kinds, selected with the idea of inspiring and developing a taste for reading and of forming that best of all habits—the habit of reading good books.

With the information in our possession we cannot speak with confidence with regard to the abandonment of the preparatory department. On the one hand it may be that this department receives and fits a considerable number of young people who, from the nature of their home surroundings, would not get into the high schools, and certainly would not go there for a branch or two in which they might be found deficient upon making application for admission to the normal school. On the other hand last year's experience in the Milwaukee normal school, which has no preparatory department, was that a slightly larger proportion of its attendants came from outside the city than came from the Milwaukee high schools. The question is a very complex one and we recommend that a special committee be appointed to make a careful investigation of the whole subject.

With regard to the elementary course we recommend that it be continued for the present. The educational conditions throughout the state are such that the people are unwilling to pay for more than very meager attainments on the part of teachers, as may be seen from the fact that, outside the large cities, women in the schools are paid, on the average, only about \$30 a month. The elementary course furnishes a class of teachers to meet the requirements of a market which demands persons of moderate skill who can afford to teach for low wages in country schools and in grades below the high school. Moreover, many young people complete the elementary course who would not attend two years if it were abolished. It may be a disadvantage in that it probably satisfies some who

---

*Reports of Boards of Visitors.*

---

would otherwise attend four years, but on the other hand it affords a goal which when reached finds the student with a strong desire to go farther and in that way may lead him to finish the full course.

The discipline of the school impressed us as admirable. It goes neither to the extreme of a cast iron ritualism where worship of form becomes a folly, and students are governed by forces outside of themselves, nor to that other extreme of laxity sufficient to retard the workings of the school. The student, to a large degree, is thrown upon his own honor and receives through the confidence placed in him a most wholesome and valuable training in one of the essentials of a good teacher — the power to govern himself. That there are not more young men and women in the vicinity ready to avail themselves of the excellent training to be secured in the school is a matter of surprise. The causes for the light attendance must be looked for outside the school. If a liberal and vigorous policy on the part of the president, sound instruction, imparted in a spirit of kindness and helpfulness by the members of the faculty and a delightful place of residence are incentives toward attendance at a normal school the White-water school should be filled to its utmost capacity.

(Signed) GEO. W. PECKHAM,  
W. J. BRIER.

*The University.*

---

## THE UNIVERSITY.

---

On pages 8 and 10 I have noted some evidences of the progress made by the university since my official connection with it. It is an institution of which the state is justly proud. In beauty and healthfulness of location it is unsurpassed in the land. No other institution in the state can offer advantages at all comparable to those that the state here furnishes. Its departments are in the main ably manned. Its various departments are generally well housed, and its buildings of recent construction are architecturally effective and admirable in arrangement and equipment.

While most of the older buildings may satisfy present demands, the library building is entirely inadequate in size and ill-suited in arrangement to the purpose for which it is used. The school is by no means destitute of library facilities. It has a well selected and growing collection of books. But the collection is in no respect commensurate with the wants of the university. It is, perhaps, inevitable in the growth of an institution covering so wide and so varied fields of activity that some departments should outstrip others. But the university library is so meager, and the rooms in which it is stored are so cramped and uncomfortable that it contrasts unpleasantly with the noble equipment for the teaching of physical science and the superlative appliances for physical culture. It is well that the authorities take heed to the growing demands of material science and to the newly awakened interest in physical training. But the university has other functions equally important and equally sacred. After all has been said, it is in great collections of books, storehouses of thought, mines of mental and moral wealth, and the use made of them that the power of an

---

*The University.*

---

institution of learning is lasting and benign. The report of the board of visitors, printed on pages 101—4 suggests a method of increasing the library facilities of the university. The consummation of the scheme would vastly augment its literary resources, but the need of large accessions to the university library along lines that the state historical library does not cover would still remain. The vast collection of the historical society is invaluable, and its destruction would bring irreparable loss to the state. That it should be rendered as secure as possible from casualties and so placed and arranged as to yield its best results in quickening and broadening the intellectual life of students is a matter of transcendent importance. But it remains that the university needs a library of its own, adapted to its own wants, and managed by its own officers.

Schools are founded and maintained to foster intellectual life. Books are the garnered intellectual life of the centuries. It is perilous to neglect the collecting and housing of an adequate university library. Whether it be placed in a building devoted to its exclusive use, or gathered with the larger collection of the state historical society, its surroundings should be as convenient and attractive as are the agencies that aim to widely divergent paths.

It is no part of the purpose of this report to question the wisdom displayed by the state in the establishment of any of its educational institutions. The agencies that qualify men to bring to their several occupations and callings the power of sober and accurate thought can never be too efficient, and there is little danger that they will become too numerous. The function of government that imposes on the state the duty of giving to its citizens their professional or technical training has never been clearly stated. Indeed, the line that separates public function from private duty is evidently growing obscure. The motives that impel the state to teach the farmer rather than the shoemaker or the carpenter his trade are certainly far to seek.

---

*The University.*

---

The duty of the state to train its boys and girls for intelligent citizenship rests on unassailable grounds. When it goes beyond this and assumes to teach them professions and handicrafts it seems to be entering upon a policy whose sequence is the absorption of individual rights and responsibilities. But toward this kind of socialism the pendulum of opinion seems to be swinging. They who believe that a sturdier manhood comes from self-reliance and self-direction must wait for the reflux wave. It is not easy to over-estimate the importance of our farming interests, and any agency that tends to impart to those who are engaged in this pursuit that quickness of apprehension and alertness of thought that characterize those engaged in commercial and manufacturing enterprises is to be welcomed. But agriculture is not a science. It has no body of established doctrines that may be formulated and taught as law, or as medicine is taught. Mathematics, science, history, language, literature and allied topics are the same for the farmer's boy as for others. Neither for him nor for others is there a short cut, or a royal road to learning. The power of clear and consecutive thinking is the result of severe and protracted mental training. Farmers need it as much as men in other non-professional pursuits. Agricultural colleges can offer no superior facilities for the acquisition of mental power. In so far as these schools resort to the same methods that literary colleges adopt to train men and women it is simply a multiplication of agencies to secure the same results.

The instructional force in our own agricultural college involves an annual outlay of nearly twenty thousand dollars, and it has graduated nine students in ten years. The last catalogue showed an attendance of two, one of whom graduated in June. It seems absurd to call such a faculty with so many students a "college". An attendance at the Dairy School of boys from the farm, for twelve weeks in the winter, gives them scant title to enrollment as university students and affords little occupation to the professors. The value of this instruction to the

---

*The University.*

---

dairy interests of the state is not underestimated, but the cost of maintenance of the college seems disproportionate to the benefits conferred upon those who seek its aid. There has seemed to me to be a serious lack of adjustment to the needs of students that the college has not attracted more to itself. The duplication of the work of the high schools and colleges in the independent agricultural schools of other states indicates that there is no body of organized knowledge to be imparted. The chemistry and botany of the farm are but applications of the general principles of these subjects which must first be mastered. The university proper affords the best facilities for this purpose. The student then needs little assistance in making the application. The school, therefore, seems embarrassed by lack of knowledge upon which to base an extended course of study. It is not clear that these schools have yet justified their existence.

#### THE BOARD OF REGENTS.

It is a generally recognized principle in civilized countries that public revenues should not be expended without audit. The management of the University of Wisconsin affords a notable exception to the rule.

In the biennial report of two years ago I indicated the dangerous methods of conducting the business of the board. I stated that the business was practically done by the executive committee and that its accounts were not audited by the finance committee. As this report attracted no public attention and the business methods of the board have not improved, I deem it my duty to explain its transactions in detail with specific illustrations.

The executive committee consists of Regents Stevens and Chynoweth of Madison, John Johnston of Milwaukee, and President Adams. Regent Johnston seldom attends the meetings

---

*Board of Regents.*

---

of the committee. President Adams is sometimes necessarily absent. It thus frequently happens that the local regents, Stevens and Chynoweth, are the only members present. As two is not a majority of four they do not form a proper quorum for the transaction of business. They nevertheless assume all the functions of the full committee.

It is possible that they would explain their action on the ground that the president of the university is not a regent in the sense that the others are and so not necessary to a quorum. He is by law *ex officio* a member of the board and of all its standing committees, but without a vote except in case of a tie. The record for December 4, 1893, and January 2, 1894, would seem to indicate that interpretation, there being but one local regent and the president in attendance an adjournment was taken for want of a quorum. On September 10, 1894, there was a special meeting of the executive committee at which only Regent Stevens and President Adams were present. They approved two requisitions, one for \$130 and the other for a sum not given, appointed an instructor of gymnastics in Ladies' Hall at a salary of \$800, an instructor in practical pharmacy at a salary of \$1,000 and a librarian of the law school, his compensation for a year's work to be the tuition for the two years' course in law. It thus appears that he has been recognized as a full member of the committee for business purposes, as the legislature doubtless intended him to be. There can therefore be no question as to what should constitute a quorum.

Turning to the record for illustration, I find, November 7, 1893, "Present Regents Stevens and Chynoweth." After the transaction of important business the record is: "The following bills were presented, audited, approved, and ordered paid," the list includes vouchers from No. 174 to No. 261, amounting to \$29,501.06.

April 2, 1894; "Meeting Executive Committee. Present Regents Stevens and Chynoweth. The following bills were presented, audited, approved and ordered paid." Vouchers num-

---

*The University.*

---

bering 779 to 949, amounting to \$54,216.77, about two-thirds of which was for salaries. The following requisitions were presented and approved, Nos. 62-70 amounting to \$965.29.

"3 P. M., September 4th, 1894. Adjourned meeting of executive committee. Present Regents Stevens and Chynoweth." Bills were "presented, audited, approved, and ordered paid" amounting to more than \$32,000. Requisitions were also approved amounting to nearly \$4,000. September 6th, the same regents were present at a special meeting of the executive committee. The following resolution was adopted: Resolved, that the bid of T. C. McCarthy of \$2,494 for setting Boilers . . . . . be accepted. The secretary to prepare contract with approval of Regent Chynoweth, "No bond to be required."

"Madison, Wis., Sept. 5, 1892.

Meeting of Executive Committee. Chairman Stevens present, Regent Chynoweth being confined to his house by illness, he passed upon the matters there and at this office A. M. 6th inst. The following requisitions were presented, audited, approved and ordered paid"—three, represented by their numbers, the amounts not given.

"The following bills were presented, audited, approved and ordered paid"—Vouchers 1069 to 1119, amounting to \$22,067.35,

"Madison, Wis., May 7, 1894.

Regular meeting executive committee.

No quorum. Secretary directed to issue warrants for payroll; (action ratified later).

Adjourned to 10th inst."

The minutes of the adjourned meeting, May 10th, show no ratification of the foregoing proceedings, nor do I find any subsequent ratification. It is immaterial, however, the parties having obtained their money in due form there would be no remedy.

Illustrations might be multiplied but it is impossible to exhibit by citation the volume of business transacted and the expense incurred. Enough has been given to show the grave pos-

---

*Board of Regents.*

---

sibilities of their methods. More dangerous still will their proceedings appear when it is known that the accounts are never afterwards audited.

Regent Johnston, for three or more years chairman of the finance committee, has never called a meeting for the examination of accounts. The first year he employed an accountant to review the year's business and submitted his report, a peculiarly left-handed one, with certain recommendations, as the report of the committee, the other members signing it just before its presentation. Since that time there has been no scrutiny of accounts.

Typewritten copies of the proceedings of the board and of some of its committees have for the past year been sent to the members, but this does not seem to operate as a check upon abuses. There is little information in the items, "services," "mdse.," "expenses," "supplies," upon which to base an objection. I have heard certain acts of the executive committee privately denounced, but I have never known a member to make objection when the perfunctory ceremony of approval was being observed by the board.

No one is at liberty to infer an intimation of personal wrongdoing. I mean to say only that this is not a safe way of conducting public business. Four hundred seventy thousand dollars was last year transferred on the books of the state treasurer to the credit of the board. How much they anticipated the revenues of the present year I am unable to say, but I do not doubt that their actual expenditures exceeded \$500,000. I submit that financial operations of such magnitude and public interest ought not to be so loosely conducted.

The executive committee controls the expenditure of all moneys. The board is divided into committees corresponding in a general way with the departments of the university. Each one has a nominal control or at least oversight of the work of its department, but it directs the expenditure of no part of the funds annually appropriated to it. To illustrate, I am chairman of the committee on library and text-books. The board

---

*The University.*

---

last year appropriated \$6,600 to the library. To this account were charged the salaries of two cataloguers, with necessary supplies for them, the periodical list amounting to eight or nine hundred dollars, leaving no large balance for additions to the library. A requisition for a large number of books approved by the president of the university and myself early in the year was arbitrarily laid aside by the executive committee and the books were not received until the end of the year. About \$1,200 of the library appropriation, made by the board, was also withheld by the executive committee and applied to other purposes.

In view of the library's straightened circumstances it seemed unjust to rob its meager appropriation for the benefit of the gymnasium. The library committee has not only no power to expend its appropriation, but it has no assurance that any considerable part of it will be expended by the executive committee upon its recommendation.

The same arbitrary control of appropriations and expenditures is exercised in regard to the recommendations of other committees. The executive committee is therefore practically more powerful than the board, its authority is frequently exercised absolutely by two members, and its work is not liable to subsequent review.

#### SOME UNLAWFUL ACTS OF THE BOARD.

Attention should be called to some dangerous usurpations of the board. The following note, with accompanying explanation and security, is worthy of consideration:

*“University of Wisconsin,*

*\$10,000.*

*Madison, July 18, 1889.*

*Two (2) years after date for value received, “the Regents of the University of Wisconsin” promise to pay Frederick W. Crosby, or order, at the Merchants’ National Bank, in the City of Chicago, Illinois, Ten Thousand Dollars, with interest at the rate of six (6) per cent. per annum, payable semi-annually at said Bank.*

---

*Board of Regents.*

---

The consideration for this indebtedness is the purchase price of lots number five (5), six (6), and twenty (20), of block number six (6), of the city of Madison, according to the recorded plat of said city; said lot number five (5), having been purchased from Eugene O. Kney, and said lots number six (6) and twenty (20) from William F. Vilas; and the entire purchase price for the payment thereof, amounting to ten thousand dollars, has been furnished and advanced by said Frederick W. Crosby, to the said Board of Regents: Said land forming a part of the University Campus and necessary for university purposes.

The Board of Regents further agree, that the said Frederick W. Crosby or his assigns, may be subrogated to all the rights of said land which said vendors might have had, and enjoyed, as vendors, if the said purchase price had not been paid to them: and that said indebtedness shall stand as a charge, and an equitable lien on said land, until fully paid with interest; and that said land shall be, and constitute a security for the payment of said indebtedness in full.

This indebtedness is incurred, in pursuance of a resolution of the said Board of Regents, duly passed at its regular annual meeting, June 18th, 1889, by which the officers of said Board were fully authorized to transact said business.

In witness whereof, the President, and the Executive Committee, and the Secretary of said Board of Regents have hereunto set their hands, and the Secretary has affixed the corporate seal, as authorized at said meeting.

The Regents of the University of Wisconsin

(Seal)

by

GEO. H. PAUL, President.

GEO. RAYMER,

L. S. HANKS,

J. B. THAYER,

Executive Committee.

E. F. RILEY,

Secretary of the Board of Regents.

---

*The University.*

---

If the board has authority to incur indebtedness to the extent of \$10,000, it has equal authority to borrow a hundred thousand or a million dollars. The legislature has thus lost all control over its finances. The board does not need to apply to it for appropriations. It has simply to give its note for the amount needed and impose a permanent debt upon the state. Section 4549, R. S., forbids under heavy penalties incurring such indebtedness.

This note is still outstanding. Ten thousand dollars of the Jackson bequest has been sunk in it and the rate of interest reduced to five per cent., payable semi-annually, as before. It is now in the possession of the board and the interest is paid out of its general fund to the beneficiary named in the bequest. In the records this use of the money is called an "investment." It is an investment in the same sense that the certificates of indebtedness are. The money is spent and the note is an evidence of the debt. If the money is ever replaced it must first be raised by taxation. If it is not restored the semi-annual interest charge must be met by taxation. This is not the usual conception of an income from an investment.

When the purchase of the Crosby note was first broached in the board it was said that the board had in its possession a part of the Jackson Bequest which might be invested in the note. I asked what was meant by the statement that this money was in its possession. The reply was that it was on deposit in the bank to the credit of the board. I answered that it ought not to be, that the state treasurer was the legal custodian of the funds of the board and that any money not in his possession was unlawfully detained. I stated further that under the constitution the secretary of state, treasurer and attorney general were the commissioners whose duty it was to invest all university funds. A fruitless discussion of the legal points thus raised ended in a reference to the law committee with instructions to report. If it ever reported it was without my knowledge. At a subsequent meeting a special com-

---

*Board of Regents.*

---

mitte consisting of Regents Chynoweth, Stevens and Seaman was appointed to inquire into the feasibility of using the Jackson Bequest to pay the Crosby note. It reported that the bequest was made to the board of regents to be by it invested and that it had concluded that this use of the money would be lawful, and recommended the purchase of the note and its transfer to the state treasurer to be held by him "as an investment under and by virtue of the terms of the said will until such time as your Honorable body can make arrangements for the same out of the funds belonging to the university." Misled temporarily by the adroit use of the term investment I voted with the rest of the members for the adoption of the report, forgetting for the time that the regents are forbidden to incur indebtedness and that a trustee should not borrow his trust.

Seven thousand dollars more of the Jackson bequest was turned into the general fund, and spent under the following resolutions, the former adopted by the board January 4, 1893, and the latter by the executive committee November 6, 1893.

"Resolved:—That \$5,000.00 of the Jackson Bequest be received by this Board and temporarily placed in the general fund of the University and used for such purposes as shall be designated by the Board, pending an investment thereof, and that 5 per cent. per annum payable semi-annually on June 1st and Dec. 1st, be paid to J. H. Carpenter as interest on the same while so used, the said Carpenter consenting to the terms of this resolution.

It is further Resolved, That the Executive Committee be and the same are hereby authorized to sign a receipt for said \$5,000."

"Resolved:—That \$2,000 of the Jackson Bequest be received by the Board and temporarily placed in the General Fund of the University and used for such purposes as shall be designated by the Board pending an investment thereof, and that 5 per cent. per annum, payable semi-annually on June 1st and Dec. 1st, be paid to J. H. Carpenter as interest on the same while

---

*The University.*

---

so used; the said Carpenter consenting to the terms of this resolution, and

Resolved:—That the Executive Committee be and the same are hereby authorized to sign a receipt for said \$2,000.”

The remaining three thousand dollars is on deposit in the bank and drawing interest at three per cent. Thus, by a generous bequest to the university, the state has been burdened with a debt of \$17,000 of indefinite duration. Had we enough citizens alike generous to the university it would be possible, under similar management, to bankrupt the state.

Since I became a member of the board its membership has, with two exceptions, entirely changed. My experience with the old board corresponds roughly with my first term in office, and with the new board to the second term. I have gone far enough back into the earlier records and conversed sufficiently with the members of former days to be assured that one board differs in character and methods but little if at all from another. I am convinced that there is no board of regents and that there never will be until the composition of the so-called board is radically changed. The local members with the president of the university are the board. They control the choice of its officers and dictate the composition of its committees. The president is by law a member of all standing committees and one or both of the others are members of the important ones. The other members are busy men in haste to dispatch business and get away. They come, sign reports prepared or inspired locally, cast complimentary votes for each other's reports, consign them to the executive committee for execution, adopt the recommendations of the president and depart. Practically they are only ciphers which add value to the significant figures, the local regents.

It is no disparagement of the local regents to say that for them a disinterested judgment is difficult, an impartial one impossible. They are swayed by a thousand subtle influences; drawn by social, fraternal and business ties; pestered by countless selfish interests.

*Finances.*

Two serious mistakes have been made in the composition of the board; one is the addition of the president, the other the selection of two members for the state at large. Both are in the interest of local supremacy. The latter makes it possible for Madison always to have two regents. The former makes the president of the university the autocrat of the board. He presents his recommendations backed by all his powers of argument and persuasion and then himself offers resolutions previously written and moves their adoption. Not to approve his measures would be construed as a want of confidence which would soon compel his resignation. His vote can have no effect except to save a measure otherwise lost. In the full board he has now to secure the support of seven members. The defeat of measures which will not under his advocacy secure this would scarcely work lasting injury to the university.

The statute organizing the board should be so amended as to prohibit the appointment of a member from Madison, withdraw the ex-officio membership of the president of the university and withhold appointments for the state at large. Until this is done the university will continue to be a state institution for purposes of taxation, but Madison's university for purposes of expenditure.

## UNIVERSITY FINANCES.

The cost of the administration of the university may be stated approximately as follows:

President, salary .....	\$7,000
Residence, personal service, contingent fund.....	1,600
Vice President .....	3,000
Dean of College of Letters, Science and Arts.....	3,500
Dean of College of Law .....	3,500
Director of School of Economics .....	3,500
Dean of College of Agriculture.....	3,500
Residence perquisites .....	500
Registrar .....	1,400
	<hr/>
	\$27,500
Deduct salaries of Deans as Professors .....	12,500
	<hr/>
	\$15,000

*The University.*

The diligent cultivation of the notion that the university needs a financier at its head and not an instructor has not been done in the interest of its intellectual quickening. One readily recalls the instruction of President Woolsey in international law and of Presidents Porter and McCosh in intellectual science. President Angell is now lecturer at Ann Arbor on international law and on the history of treaties. President Schurman of Cornell is professor of mental and moral philosophy. President Patton of Princeton is professor of biblical instruction and also of ethics. The tremendous power of President Bascom with the students was due to intellectual contact with them in the class room and upon the rostrum.

The following table shows the amounts annually appropriated by the board for salaries, and the number of students registered in the regular courses of the College of Letters, the College of Engineering, the College of Agriculture, the College of Law and the School of Pharmacy.

Year.	Amount Appropriated.	Number Registered.
1885-86.....	\$53,950 00	416
1886-7.....	68,500 00	502
1887-8.....	86,960 00	608
1888-9.....	94 786 00	672
1889-90.....	91,382 32	747
1890-1.....	123,876 66	823
1891-2.....	135,336 66	885
1892-3.....	137,063 95	1,035
1893-4.....	155,222 86	1,026
1894-5.....	166,806 66	1,196

---

*Finances.*

---

Fellows, resident graduates, students in absentia, students in the short agricultural course and students in the dairy course are not included. The amount paid for fellowships, and special lecturers which is a part of the total cost of the instructional force, is also omitted.

The statistics for 1892-3, 1893-4 represent the amounts actually spent for the collegiate years. The others are the sums appropriated at the beginning of the year, and are less than the amounts actually expended. It will be seen that the salaries have been increased \$75,000 in the last four years. The statistics of attendance for the current year are compiled from the directory published in October, and will doubtless be somewhat increased by subsequent enrollment.

On page 6 of this report is given a statement of university finances for the biennial period, furnished by the secretary of the board. The report of the president of the board will doubtless contain similar tables. The first item under disbursements is "For salaries \$95,263.95 and \$107,086.60" for the year ending Sept. 1893 and 1894. The amount actually spent for salaries of the instructional force alone for the respective years was \$137,063.95 and \$155,222.86. Here is a deliberate concealment in a single item of about \$90,000 for the two years. The balance may be found on the page but it would probably baffle a majority of the board to find it.

The apportionment of salaries to the various "colleges" for the current year is given as a key to help unlock the mysteries in the above statement.

College of Letters, Science and Art.....	\$103,966 66
College of Law .....	9,100 00
College of Mechanics and Engineering .....	22,100 00
College of Pharmacy .....	4,540 00
*College of Agriculture and Experiment Station ...	19,900 00
Superintendent of Farmers' Institutes .....	2,000 00
Washburn Observatory .....	5,200 00

\*At the meeting of the Executive Committee December 3d, the salaries of instructors in the Agricultural College were increased \$1,100.

---

*The University.*

---

Below is given an outline of the sources of income to the university and the general purposes to which it has been appropriated.

## BUDGET.

October 1, 1894, to September 30th, 1895.

*Estimate of Income.*

University Fund Income.....	\$15,700 00
Agricultural College Fund Income.....	17,200 00
One-eighth of a mill tax.....	75,000 00
Supplementary Morrill grant.....	21,000 00
State appropriation for agricultural institutes.....	12,000 00
State appropriation for Washburn Observatory.....	3,000 00
State appropriation of one per cent. railroad tax.....	10,000 00
Appropriation by Hatch Bill to Experiment Station.....	15,000 00
One-tenth mill tax for new buildings, etc.....	60,000 00
Students' fees, college letters and science.....	21,000 00
College of Law fees.....	10,500 00
Farm sales.....	10,000 00
Time service.....	700 00
Material sold, work done, rents, etc.....	525 00
Agricultural Institute Bulletin.....	750 00
State appropriation for 1893.....	40,000 00
Treasury suits.....	52,000 00

---

Total.....	\$364,375 00
------------	--------------

## Appropriated to:

1. College of Letters and Science.....	\$159,421 30	
2. College of Agriculture.....	63,549 99	
3. College of Engineering.....	24,133 33	
4. Washburn Observatory.....	6,200 00	
5. College of Law.....	10,500 00	
6. School of Pharmacy.....	7,500 00	
7. Building fund.....	60,000 00	
8. From Treasury suits (part).....	30,070 33	\$364,375 00

It would seem that item 8 should read "balance" as it is intended for an expenditure and is included above as income.

---

*The Library.*

---

## LIBRARY AND LIBRARY HALL.

Report of sub-committee of the Board of Visitors on Library, Library Hall, and the relations of the State Historical Library to the University.

The rapidly growing library of the university is occupying quarters already far too small for its proper administration, and it is plain to be seen that with the accessions of another year or two, the officers in charge will find it impracticable even to display the books. It is impossible for the university to attain its highest measure of usefulness in the educational system of the state without a suitable library, housed in an adequate building, and conveniently situated for the use of the faculty and students. Carlyle has said, "The true university of our day is a collection of books," and to the truth of this dictum everyone familiar with the conduct of any modern institution of advanced learning will eagerly testify. That the university of Wisconsin has already achieved much success is largely attributable, we feel convinced, to the presence in Madison of the deservedly famous library of the State Historical Society of Wisconsin, now numbering some 170,000 volumes. This library, whose growth has more than kept pace with the growth of the university, has always been open, free, and under most liberal rules to both students and professors; indeed, the last Annual Report of the society shows that upon an average, somewhat over ninety per cent. of the users of the society library each year are university people.

An inspection of the library of the society in the state capitol, and an examination of its recent annual reports, convince the committee that it, too, is as claimed by its officers, sadly in need of enlarged quarters. It has not actual space for the accessions of over four or five years more at the utmost, and is already much too cramped for the proper accommodation of its daily crowd of readers—one hundred persons, and over, often being almost literally packed in its reading rooms and alcoves. It appears that the rooms in the capitol occupied by the society

---

*The University.*

---

are greatly needed by the state government, for legislative and administrative purposes. Again, grave doubts are entertained by architectural experts as to the structural safeness of that wing of the capitol under the enormous and rapidly increasing weight of the library. The society also strongly urges, and we think with propriety, that there is grave danger from fire, in the present quarters, and that it is bad business policy, any farther than need be, to subject this enormous collection—having an undoubted market value of nearly if not quite a million dollars, but in reality priceless—to the many hazards which now surround it.

The State Historical Society, by statute, holds all of its property in sacred trust for the state. It is the incorporated trustee of the state and in no sense a private institution; its collections are the priceless possessions of the whole people. It is conceded that it is the duty of the commonwealth properly to house these collections. Bills having this object in view have been before the legislature, during the past three sessions, and appear to be growing in favor—questions of financial expediency alone being urged against them.

Thus both the society and university libraries are in imperative need of new buildings. Both are the property of the state, and it is eminently proper that the state should meet their needs. Ninety per cent. of the users of the society library are connected with the state university; it is, and always has been, while a distinct institution, an important factor in the growth of the university, and in the advertisements of the latter the free use of the library has ever been urged as one of the chief attractions to intending students. But while the State Historical Library will always be largely used by university students, particularly by graduate students, and others engaged in advanced work, not strictly scientific, it is true that this literary storehouse is used by less than one-third of the entire body of students. It is a mile away from the campus, and the two-thirds lack either time or inclination to travel this mile. It is

---

*The Library.*

---

the experience of all colleges that the greater part of the library reading done by students is done in those occasional hours and half hours between classes and lectures, which now are often wasted by the students of the university because the principal library is too far removed from them.

The proposed placing of the university and the society library under one roof is, it appears to us, the only advisable solution of the problem. The society library should go where it would meet the convenience of ninety per cent. of its readers—a percentage that would be largely increased, by the way, were its library more convenient to the university, for the number of its university readers would at once be trebled. It is not likely that the state will ever consent to purchase a suitable site down town, at a cost of upwards of \$50,000; while by an arrangement entered into a year and a half ago, between the regents and the society, six lots are offered free, upon the lower campus. A union of the two libraries under one roof—with, however, distinct ownership as at present—would be an eminently desirable arrangement for all concerned.

(a) First, there is the greatest good to the greatest number.

(b) Were the libraries in immediate proximity, with one common reading room, duplication of books would be avoided. At present, in the effort of each to keep up a general reference library, an expensive duplication is constantly going on; thus is the money of the state frittered away to keep up two collections that are designed for practically the same constituency.

(c) The Wisconsin Academy of Sciences, Arts and Letters, at present inadequately housed in the capitol, has voted to remove its excellent but now almost inaccessible library—a strong and rapidly growing collection of scientific periodicals and transactions—to the joint building if the latter is erected. Were all three reference libraries under the same roof, so that investigators could easily pass from one to the other, each could be built up on its own special lines—to the academy could be left the collection of scientific periodicals and transactions, a work

---

*The University.*

---

for which it is at present well equipped; the university could use its purchasing fund in the fields of literature and general science, while the historical library could devote itself exclusively to the department of history, in which it has already made its reputation. Near by, in the law school building, is the new school of economics, history and social science, with its own special library which in time might profitably be moved to the new building. With all these special libraries, each intelligently and separately administered within one building, the combination would without doubt be the grandest collection of reference books west of the Alleghany mountains, reflecting credit upon all the institutions, and upon none more than upon the Historical Society itself under whose expert general directorship they no doubt all would be placed.

(d) The Historical Museum and Portrait Gallery is an important adjunct to the State Historical Library. The 50,000 or more persons who now annually visit the former, in the capitol, would find, upon reaching the proposed new site, that they were in immediate reach of the finely equipped geological and natural history museums in science hall, the university buildings themselves, and the experimental farm—in fact, nearly every point of interest under state support, being in a convenient group.

(e) The relatively small number of users of the state historical society library, outside of university circles, could easily be accommodated upon the excellent electric-car line, by which the lower campus is reached from the capitol in an average of four minutes.

*Summer Schools.*

## SUMMER SCHOOL.

Hon. O. E. Wells, State Superintendent.

Sir:—I give herewith the report of the Wisconsin Summer School for the years 1893 and 1894.

In 1893 no session of the school was held, as the Regents believed that the presence of the World's Fair so near Madison would prevent an attendance sufficient to warrant holding the session.

This interruption of the School, although necessary, caused the attendance in 1894 to be somewhat smaller than in 1892. There were registered 151 students, of whom one withdrew on account of illness immediately after entering. Of the 150 remaining 11 were from other states than Wisconsin.

The teachers and their departments were as follows:

- JOHN W. STEARNS, LL.D., Professor of Philosophy and Pedagogy, University of Wisconsin, President of School—Psychology and Pedagogy.
- CHARLES R. BARNES, PH.D., Professor of Botany, University of Wisconsin—Botany.
- EDWARD A. BIRGE, PH.D., Professor of Zoology, University of Wisconsin—Physiology and Zoology.
- W. W. DANIELLS, M.S., Professor of Chemistry, University of Wisconsin—Chemistry.
- EDWARD E. HALE, JR., PH.D., Professor of English Literature, State University of Iowa—English Literature.
- WILLIAM S. MILLER, M.D., Instructor in Vertebrate Anatomy, University of Wisconsin—Histology, and Assistant in Biology.
- W. H. ROSENSTENGEL, A.M., Professor of German Language and Literature, University of Wisconsin—German.
- WILLIAM A. SCOTT, PH.D., Associate Professor of Political Economy, University of Wisconsin—Political Economy.
- CHARLES S. SLICHTER, M.S., Professor of Applied Mathematics, University of Wisconsin—Mathematics.
- BENJAMIN F. SNOW, PH.D., Professor of Physics, University of Wisconsin—Physics.
- HIRAM A. SOBER, A.B., Instructor in Latin, University of Wisconsin—Latin.
- FREDERICK J. TURNER, PH.D., Professor of American History, University of Wisconsin—History.
- A. T. LINCOLN, Assistant in Chemistry.
- L. W. AUSTIN, PH.D., Assistant in Physics.

---

*Summer School.*

---

There were given 31 courses of study in the different departments. The attendance was largest in mathematics. That of other departments naturally varied with the number of courses offered and the number of teachers to which the subject appealed; but all courses offered were well supported by the students.

Two important changes were made in the program for the present year:

1. The languages, Latin and German, were added to the courses of study as was also political economy. The program now covers all the leading subjects taught in our high schools except physical geography. For that science we were not fortunate enough to secure a teacher.

2. Several courses of University Extension lectures were given: In aesthetics by Prof. Stearns; in economics by Prof. Scott; in history by Prof. Turner, and in bacteriology by Prof. Birge. These courses were open to all students, were given at such hours as not to conflict with other recitations and were well attended.

The income of the School was as follows:

Balance from 1892.....	\$440 94
State appropriation .....	1,000 00
Students' fees .....	1,548 00

The income from fees was largely increased by adding \$5 to each fee, making a charge of \$10 to residents of the state and \$15 to non-residents. There were 139 residents, 10 non-residents, and one person, who entered the School in the last week and paid a reduced fee.

The expenditures were as follows:

Printing, postage and advertising .....	\$90 12
Laboratory supplies and similar expenses .....	38 60
Salaries of teachers .....	2,134 41
Fees returned on account of leaving school.....	10 00
Total.....	<u>\$2,273 13</u>
Balance to 1895.....	\$715 81

---

*Schools for Deaf Mutes.*

---

The School may be developed next year in various directions: 1. The department of geography ought to be filled and the subject vigorously presented to the teachers. 2. A course in geology would probably be attended by several students, although not by a large number. During the past year there was a private class of about 8 students preparing for the teachers' examination. It is perhaps doubtful whether the use made of geology in the schools of the state warrants its introduction, unless as subsidiary to geography. 3. The teaching of English in the high schools is now under consideration and criticism. Perhaps the School might be able to aid in developing the teaching of this subject. 4. The question should be considered, whether the School can aid the teachers of the common schools, especially in the direction of nature study.

The amount of money at the command of the School will not permit movement in all of these directions—and others could easily be specified—but some enlargement can be made. Three new subjects were added in '94, one or perhaps two can be added in '95.

Respectfully submitted,  
E. A. BIRGE,  
Secretary.

#### SCHOOLS FOR DEAF MUTES.

The legislature of 1885 authorized the state superintendent, by and with the consent of the board of control, to grant permission to cities and incorporated villages to establish schools for the instruction of deaf mutes, whenever application for such permission was made to him by the proper officers. The same act provided for the payment out of the state treasury to the cities and villages maintaining such schools one hundred dollars for each pupil that had been instructed for a period of nine months during the year preceding the payment, and a propor-

---

*Schools for the Deaf.*

---

tionate sum for a shorter term. The legislature of 1893 increased the amount to be thus paid to one hundred and twenty-five dollars. This legislation evidently leaves something to the discretion of the superintendent concerning the need and advisability of establishing these schools in the several communities asking for them; but he has never hesitated to grant the permission sought whenever the application has received the approval of the board of supervision. Still it has been intimated that the present incumbent has shown less enthusiasm in the maintenance and multiplication of these schools than was thought desirable by communities having or seeking them. The suggestion may be well founded. But it should be remembered that in all propositions looking to the local expenditure of public money the lines that separate private interests from public good are easily obliterated. That to secure the expenditure of state money in one's own neighborhood is thought so laudable that the necessity of returning a corresponding benefit to the state is often little heeded.

Long ago the state made provision for the care and culture of this class of its unfortunate children in an institution whose purpose was and is, while giving them the requisite mental training, to surround them with elevating and refining influences. The reports of its chosen guardians that come up to the state department, year after year, testify to its fidelity in the fulfillment of its mission. So far as I know its conduct and management under the supervision of its present superintendent, have never been tainted by corruption or impurity. The influences that make for good, for the upbuilding of noble character, predominate and they are continuous during nine months of the year.

Every teacher knows how quickly the impressions of the schoolroom may be dissipated by the street. It is notorious that a very large number of deaf mutes are unfortunate in their home surroundings and in their inherited tendencies as well as in physical mal-formation. To transplant such children and

---

*Dictionaries.*

---

for several years to a well managed home whose influences tend steadily toward elevation of character is the best boon that the state can give. Such a home has more power to train for good citizenship, and for good manhood and good womanhood than the day schools have, whose pupils are under the influence of the school but six hours of five days in a week, and are impressed by the life of the street and of wretched homes during the remaining time. Some of them have good homes and their parents object to the separation involved in sending them to the state school, but the home ties are severed when they send their talking children to the college or the university.

The state makes no such provision for the education of its blind children in the communities where they live. It gathers them into an institution that is better supplied with the appliances for effective work than the state could afford to furnish to each of a multitude of schools scattered throughout its borders. It is difficult to see why the argument for the maintenance of local schools for deaf mutes is not equally applicable to the provision which the state has made for the blind, or may make for the feeble minded. The building up of these local schools tends to weaken and finally to destroy institutions that the state has reared at great cost, and with infinite care.

I know nothing in the character or conduct of these institutions to indicate that considerations of public good require the state to change its methods in the treatment of its unfortunate children. I have not sought to evade the law or to retard its execution, but I doubt the wisdom of the scheme.

---

**WEBSTER'S INTERNATIONAL DICTIONARY.**

During the biennial period ending September 30, 1894, five hundred fifty-two copies of Webster's International Dictionaries were purchased and furnished free to schools, as provided for by section 509, R. S. By authority of this section four hundred

*Codes and Fees.*

eighty copies were sold to districts. The certified applications of school officers for these dictionaries are on file in this office. In accordance with an established custom one hundred fifty-eight copies were sold to members of the legislature and to employes of the state. The table below gives the number of dictionaries disposed of for each quarter of the biennial period.

### SALE OF SCHOOL CODES.

During the last two years, school codes were sold to individuals, not school officers, at twenty-five cents a copy. The amount received from this source is \$43.79, which has been turned into the state treasury, and receipts for the same are on file in this office.

### SALE OF COPIES OF RECORDS.

Under section 166, R. S., copies of records were sold to individuals and the proceeds amounting to \$259.21 have been turned into the state treasury and a receipt taken for it. These records included lists of district clerks, town clerks, etc.

*School Funds.*

The following table shows the amount of the permanent school funds, their increase during the last two years and the income derived from them. Fifty thousand dollars is appropriated annually under section 491, a, b, R. S., for the support of free high schools. Detailed statements of the finances of the normal schools are given on page 5 and of the university on pages 6 and 97—100. They also receive special appropriation from the legislature.

The amount of the common-school fund .....	\$3,430,472 98
The amount of the university fund. ....	230,445 65
The amount of the agricultural college fund.....	302,339 79
The amount of the normal-school fund.....	<u>1,835,999 26</u>
The amount of common-school fund available for investment.....	\$1,751,784 59
The amount represented by certificates of indebtedness* .....	1,563,700 00
The amount of the university fund available for investment.....	108,632 65
The amount of the university fund represented by certificates of indebtedness .....	111,000 00
The amount of the normal-school fund available for investment.....	1,310,101 76
The amount of the normal-school fund represented by certificates of indebtedness.....	<u>515,700 60</u>
The amount of increase of the common-school fund, for the biennial period ending September 30, 1894. ....	\$80,159 35
The amount of increase of the college fund, for the biennial period ending September 30, 1894 .....	121 3
The amount of increase of the university fund, for the biennial period ending September 30, 1894 .....	454 56
The amount of increase of the normal-school fund, for the biennial period ending September 30, 1894.....	<u>49,736 34</u>
The amount of income from the investments of the common-school funds, for the biennial period ending June 30, 1894. ....	\$173,832 77
Amount received from the interest on certificates of indebtedness for the same period .....	218,918 00
Amount received from the one-mill state tax.....	1,308,000 00
Amount received from deposits of fund with state banks.....	12,238 07
Total income for common schools.....	<u>\$1,712,988 84</u>

\* Certificates of indebtedness are the written evidence of the state debt to the several school funds. They bear interest at the rate of seven per cent., which is raised by annual tax levy upon the property of the state.

*Reports of County Superintendents.*

---

## REPORTS OF COUNTY SUPERINTENDENTS.

NOTE.—However desirable it might have been, it was found impossible to print these reports entire. Space required that they should be cut down, even though much of the matter thus eliminated was worthy of presentation.

## BARRON COUNTY.

## TO THE STATE SUPERINTENDENT:

The public sentiment in this county is growing more and more favorable toward schools and teachers. More intelligent interest has been shown by both parents and teachers during this year than ever before. Five new schoolhouses have been built, and they are all good comfortable buildings. There are only about half a dozen districts that need new schoolhouses, and some of these will be built next year. About 25 per cent. of our schools still have the old seats and desks but they are rapidly being replaced by patent seats. Strenuous efforts have been made to introduce the manual into every school. These efforts have partly been successful, and many of our boards have adopted it, while all our enterprising teachers are using it. I have based my theory and art examinations on it, and in this way have induced its study. A class of thirty finished the common school course and received their diplomas in June. Next year there will be about double that number. The manual has had a good influence on our county pupils as well as teachers, and this influence is growing stronger.

Arbor Day has also done its good work in our county. Seventy-five or more of our schools observed it in a practical way; and last spring the improvement on the grounds, fences, and even the interior of the school buildings, was marked. The observance of that day has more than repaid us.

Our four high schools graduated a class of fourteen this year; ten from the four year courses, and four from the three year courses.

In regard to the township library law, my report is not encouraging. Those towns that withheld money last year, have purchased suitable books. Before this, so many unsuitable books were purchased, that little or no benefit was derived from them, and those towns, realizing this, refused to withhold the money again. Where the books are suitable, the people of the districts as well as the pupils, express themselves as pleased with the libraries, and wish them enlarged. Were that word "may" changed to "must" in the library law, I believe it would be of more service; for you can not convince town treasurers that it does mean this. I am anxious to make the township libraries more of a success in this county. I have endeavored to secure the co-operation of the teachers in this work, for I believe when the demand for these libraries becomes

---

*Reports of County Superintendents.*

---

greater on the part of the pupils, they will be more widely established; and if the pupils are to read, the teachers must lead them in this.

The character of our instruction is improving, though by no means what it should be. We have never had so many able men and women among our corps of teachers as we have today.

Sincerely,

DORA M. RISER.

---

## BAYFIELD COUNTY.

### TO THE STATE SUPERINTENDENT:

We have in this county five towns which are divided into nineteen school districts, containing twenty-five schoolhouses and employing forty-six teachers. There are eighteen schools of one department, three of two departments, and four of more than two. During the year four new buildings have been erected, one in the town of Washburn, being a brown-stone structure valued at fifty thousand dollars. Nearly all school and out-houses are in excellent condition, and every district has a good supply of apparatus.

Almost one-half of our teachers last year held something better than third grade certificates, either state, first or second grade. A few limited certificates were issued to teachers of small schools eight to twelve miles from any town, in such places as offer but little opportunity (except walking) to attend teachers' institutes and associations.

Owing to the change of teachers and the uncertain period of residence of parents in the rural and lumbering districts, less progress can be made in conforming to the course of study for common schools than is desired. Good work has, however, been done in some districts. The spring of 1892 witnessed the graduation of two pupils; in 1893 we had three, and out of seventeen applicants last spring, eleven were successful, four different schools being represented. Public exercises were held at each place, as the conditions here make union exercises impossible, most of the citizens attending and manifesting a deep interest. Having an objective point in view has kept several pupils in school longer than they would otherwise have been, and has encouraged a few to enter high schools.

Three out of the five towns have the township libraries and two of these have faithfully carried out the plan of re-distribution. One town which is all in one district has an excellent district library; the other, consisting of two districts, has a good town library which is well used by one school.

A county teachers' association was organized December 2, 1893. The pupils of our high schools and a few citizens in addition to teachers, are members of the association, and furnish part of the programs by presenting papers and assisting in the discussions. The association has proved another means of bringing school work before the public, and the interest which has been manifested is hopeful. The discouraging feature is the fact that our schools are scattered over a large territory, so that it is impossible for a majority of the teachers in the backwoods, those who need the most help and encouragement, to attend the meetings. The annual institute, however, finds nearly all in attendance, so that a limited acquaintance is kept up between the teachers of the county.

MARY A. NELSON,  
*County Superintendent.*

Washburn, Aug. 20, 1894.

---

*Reports of County Superintendents.*

---

## BUFFALO COUNTY.

## TO THE STATE SUPERINTENDENT:

While there is a manifest tendency to maintain school for a longer period during the year, the arrangement of the school terms, is, in a number of districts, decidedly impractical.

To reduce the winter term to three or four months, in order to maintain a fall and spring term, seems poor policy. Strong and progressive schools are scarcely ever found where such an arrangement prevails. The reason for this is obvious.

Being deprived of the opportunity of attending during the summer and fall, boys and girls of fourteen years of age and over, seem unwilling to avail themselves of the few months in winter only. In my opinion, this arrangement tends to eliminate from our country schools, a class of pupils to whom attendance at school would be most profitable, and without whom, the work necessarily remains inferior in grade.

The schoolhouses in this county are fairly comfortable, and as a rule, well furnished. Nor is there a lack of the necessary apparatus. Out-houses are generally provided. Some of them, however, afford a sorry contrast with the rather inviting appearance of the schoolhouse and site. The want of urinals in the boys' apartments, as well as lack of supervision, are the main causes for the indecent condition of many of our outhouses. I have frequently called the attention of teachers and school boards to the necessity of making more suitable provisions and as a result am able to report, at least, some improvement in the matter.

According to the town clerks' reports, 46 schools are organized under the "course of study," which is an increase of two, over the number reported last year. Thirty-three pupils, belonging to seventeen different schools, were granted common school diplomas at the close of the winter term. Printed questions together with instructions for conducting the examination were sent in sealed envelopes to those who reported candidates for examination. The plan of holding these examinations in the school where pupils attend — conducted by the teacher occasionally assisted by members of the board — doubtless has some advantages. Beyond creating a local interest, however, the plan does not seem to commend itself. This is due to the fact that some teachers utterly fail to interpret the purpose of these examinations. Actuated by a desire to please their pupils and patrons, and not uninfluenced by desire to make a good showing, the examination falls short of what it purports to be. In all probability, the best plan is, to hold examinations at some point in each town, by the superintendent in person, or by some one appointed by him for the purpose.

Eleven of the seventeen towns of this county, have purchased books under the town library law. The total number of volumes now on hand, is 1,316, being an increase of 214 over the number reported last year.

As a rule teachers make good use of the books, many of them being unwilling to limit their work, especially in reading, to the narrow confines of the every day text-book. I met teachers, who in preference to getting along without library books, procured a number themselves and placed them at the disposal of their pupils.

Local teachers' meetings were held at two points in the county during the past winter. A two days' county meeting was held at Mountain City in February. Although teachers' meetings, institutes, and summer schools are helpful agencies and exert some influence upon the character of the instruction in our district schools, yet I fail to note any rapid progress along that line. The difficulty arises from the fact that under

---

*Reports of County Superintendents.*

---

present conditions, too many young and inexperienced teachers are given employment in our public schools. In my opinion teachers would readily respond to the demand for better work, if district boards would appreciate it in a practical manner. But so long as capable workers are continually supplanted by the weak and inexperienced, a change for the better can hardly be expected.

GEORGE SCHMIDT,  
*Superintendent.*

---

 DOOR COUNTY.

TO THE STATE SUPERINTENDENT:

Sir—The following is what I should be pleased to have you accept as my special report from Door county:

In this county, with the exception of the ever present and very numerous "kicker," public sentiment runs high in favor of long terms, liberal appropriations, good salaries to good teachers, regular attendance of pupils, and prompt attention to the duties of the school by both teachers and pupils. There are many who know of the institute, the teachers' meeting, and the summer school; and inquire, "was our teacher there?" There are many who ask not where can we get a cheap teacher, but who will give us a good school. Teachers holding second and first grade certificates are in demand, that is, those who are active in teachers' meetings.

The condition of schoolhouses has, for the last few years, received much attention; and we now have but few "ought-to-be-condemned" schoolhouses left and in use. The matter of proper ventilation and proper heating is beginning to receive some attention.

On the condition of outhouses, I can not boast. In some localities it seems that special effort is made to keep those necessaries in as filthy a condition as possible, while in other localities they are kept in fair order. I have expended much energy in trying to remedy this matter but without much success. Sometimes when things became unbearable, the school board was instructed to tear away the old buildings and put new ones in their places; but as the new buildings would not keep themselves clean, they, too, were soon in a filthy condition. Finally I noticed that one of our teachers was of a very orderly disposition. I noticed, that, whenever I took a book from his shelves and left it upon the desk, he immediately picked it up, and put it in its place upon the shelf. The floor was always swept, and every thing was kept in its proper order and place. I mentioned the condition of the outhouses to him, and he had already noticed them, but had made no especial effort for the better, but without my suggesting it, promised that I would find things in better condition when I came again, and improvements were made at once. The board was not notified, but the work was done by the pupils. Seeing how much might be accomplished in this direction, Mr. Russell last winter, in another school, took another step in advance. After seeing to it that the buildings were in as good condition as they could very well be placed (they were poor, old, and built of rough lumber), he put a broom in each, and told the pupils that they would be expected to keep the buildings in order, and report to him any thing disorderly or uncleanly, asked for volunteers to help him carry out his plan and, of course, the whole school volunteered. Next a roll of toilet paper was placed in each; and the pupils were told that what was furnished for

---

*Reports of County Superintendents.*

---

their use was to be used, but not wasted. He did not tell them that public buildings should not be mutilated, because punishment would follow; but the schoolhouse and outbuilding were theirs, and they ought to take pride in keeping them in the very best condition. I visited the buildings twice during the year, and both times I found them clean and nicely trimmed with cedar boughs, and according to the report of the teacher, the children were not wasteful. It may be said that these results might be reached in certain districts but not in all. Mr. Russell accomplished all he undertook in three different schools, and with very different children.

I believe in this as in all other reforms in our schools, reform must go from superintendent to teacher and from teacher to the community.

The order of the State Superintendent to free high schools, that if those places were not placed in good condition their share of state help would be withheld, can do but little good unless there is a desire on the part of teacher and pupil to *keep* them in order.

All our schools are working under the graded course. Teachers are instructed in the use of the Manual and they make very good use of it. The Manual, one or two good educational journals, White's Pedagogy, and Swett's Methods are found on nearly every teacher's desk. Much good has been accomplished in our teachers' meetings. These are in every sense teachers' meetings, the meeting is theirs and not the superintendent's. The teachers are expected to carry out a regular program and to make the meeting helpful to one another. The superintendent shows his interest in the work by being present and helping in whatever way he can.

The town district libraries are well patronized in those districts where the teacher takes the proper interest in reading. In most of the schools the pupils do much reading; in some, however, the books are so many useless things. But each year adds to the list of reading schools.

When every teacher makes a demand for a good library, I have no doubt but it will be supplied. Our teachers are rapidly reaching that point, and the library will soon be looked upon as a necessity and will be found in every schoolroom.

Respectfully submitted,  
 W. L. DAMKOEHLER,  
 County Superintendent of Schools.

---

 DOUGLAS COUNTY.

HON. O. E. WELLS,

*Dear Sir:*—The year ending June 30th, 1894, witnessed a steady growth and general improvement in the schools of this county. The schoolhouses afford ample accommodations for the children who attend them. All are furnished with patent seats and most of them have been built with reference to good sanitary conditions and the convenience of the public. Each school has a set of wall maps, a reading chart, globe and free text-books. All but two schools have been provided with slate-stone blackboards, and about one-half have physiological charts.

Twenty-six schools were maintained, an increase of five over the previous year.

Thirty-six certificates were granted, seven of which were of the second and twenty-nine of the third grade. No limited certificates were issued.

All of the schools are organized under the Course of Study. Three

---

*Reports of County Superintendents.*

---

pupils — the first in the county — completed the course and received the common school diploma last June.

The schools of this county — with the exception of one town — are organized under the township system. As it works here, this is vastly preferable to the independent district system. Schools are maintained at less expense, are in every way more nearly uniform throughout a town, and the superintendent — working through a smaller number of school boards — can do much more efficient work. Another advantage that results from this system is the greater length of time that teachers remain in the same place. Teachers are hired for the school year and frequently stay two or three years in the same school.

All of the towns in the county have taken advantage of the library law and in every town there is the beginning of a school library. The results have been very gratifying. Everywhere the books have been eagerly read both by parents and children. The books have been selected from the lists furnished by the department and prove to have been wisely recommended.

Though no aid was received from the state, a very profitable two days' institute was held in February that was attended by all but two of the teachers in the county.

Very respectfully,

G. G. WILLIAMS.

---

### FOND DU LAC COUNTY.

There is a healthy educational sentiment in this county at present, and interest in public education is steadily increasing. If there is any one thing that has created an impetus and desire for higher educational attainments, it is the subject of graduation from the common schools. During the present term, the number of graduates in 1893, was 45; and for the present year 153; making a total of 197 for the term.

The length of terms varies with the sentiment of the patrons. While our villages and the more prominent rural communities maintain from eight to ten months of school, other communities are content with six months, or rather fix it at the legal limit. In rural districts, the larger boys and girls only attend during the mid winter term.

Appropriations differ very widely. A few districts never raise a dollar by direct taxation; still the funds on hand are large on account of the enormous school population. On the other hand, some districts are always in debt, and never try to have money enough on hand to pay their debts promptly.

The improvement in the general condition of school buildings has been marked during the past two years. The village of Rosendale has just finished a \$5,500 building; and with the opening of the school year they expect to have their school placed upon the free high school list, making the sixth in the county. Brandon contemplates the erection of a new school building to be finished in 1896, at a cost of \$11,000; while Campbellsport has just appropriated \$4,000 for a new graded school building.

The introduction of the course of study has done much to unify the work of the school room. Nearly all of our teachers are familiar with the manual, and grade their schools upon that basis. The growing sentiment among our teachers and patrons, in favor of the graded system of school work, is largely due to the continued and untiring efforts of some of my predecessors, our institute conductors, and our leading educators.

---

*Reports of County Superintendents.*

---

The teachers' meetings have been revived during the present term and teachers are beginning to realize the benefits obtained. The whole number held in this county since January, 1893, is seventeen, and all but one were conducted under my supervision. Our leading educators and teachers have co-operated with me in making these gatherings a success. Several of our leading educators from Milwaukee and Oshkosh have been selected at various times to contribute to our program, and our teachers have usually contributed toward paying the expenses of these gentlemen. The normal extension work was taken up by a goodly number of our teachers last year, and it is encouraging to note that many of these are now contemplating taking a course of instruction at our normal schools.

The Wisconsin Reading Circle work has been taken up in this county and I am pleased to note that nearly one-half of our teachers have vigorously pursued the course outlined and all are loud in their praise of the benefits received from a systematic course of reading.

In addition to the foregoing, we have also organized a Teachers' Summer Normal School. The branches taught are all those required for county certificates. The attendance has been remarkable, and the results are plainly shown by the desire on the part of the teachers to hold a higher grade of certificate.

## TOWNSHIP LIBRARIES.

The township library is the only topic in which, I regret to say, our growth has been slow. In January, 1893, only three of the twenty-one towns of this county had libraries. At present there are six towns which have made the venture; but it has only been accomplished by untiring exertions to work up a better public sentiment for a higher grade of literature. From my observation in the schoolroom, I have found that the pupils who have access to the libraries are more intelligent readers, and that these towns also furnish a larger quota of common school graduates.

Respectfully,

W. H. FERBER,  
*Superintendent.*

---

GRANT COUNTY.

HON. O. E. WELLS, STATE SUPERINTENDENT.

*Dear Sir:* Under cover of another date I send you my annual report. You will observe a slight increase in the number of children of school age. This is an encouraging feature as year by year these reports have recorded a falling off. Many districts have taken steps toward adopting text-books, and especial attention has been given to this subject at my office. Considerable work has been done by the teachers in grading their schools according to the Manual and more would be done were it not for the continual change of teachers, and the lack of a suitable school register. I have tried to secure the use of Harvey's Register, but as any register is allowed, the cheapest is often bought, and but little is recorded except the names and ages of the students, and record of attendance. The records of district clerks are often carelessly kept, and when new clerks are elected their reports are necessarily incomplete. From this fact we rarely get correct reports on certain topics, such as schools graded according to the course of study, districts that

---

*Reports of County Superintendents.*

---

have adopted a set of text-books, volumes in library, and many other items which would give the clerk trouble to get. There are in the county more than three hundred and fifty qualified teachers while only two hundred and eighty are needed to fill all positions in the public schools. The standard of of qualification is as high as it can consistently be held. The cause of the large amount of teachers in the county lies in the fact that there are twelve high schools and a normal school in this county and each is furnishing teachers in its graduates and undergraduates.

The result is much competition, low wages. District officers are inclined to hire the cheaper and less competent teachers. Nearly all the country schoolhouses lack ventilating arrangements, having been built without reference to light, pure air, or heating conveniences, but for mere seating capacity. Houses now building are better in this respect, both in architecture and conveniences.

I have but little encouragement in the matter of the town library. But two towns in the county withheld public money for that purpose. So long as the town treasurers regard the law as optional, no matter what the needs existing, but little change will be made. Jamestown has for town clerk a *teacher*, one who knows the needs of the schools, and knows how to do his part of the work, consequently, Jamestown withholds money each year and applies it to the proper purpose. I have during the past year hired a clerk to do much of my office work and have spent more time in holding teachers' meetings and in visiting schools. I have thus come in contact with patrons and teachers and can readily see the results in greater interest and increased efficiency in school work. I note that especially in the graded schools there is an increased tendency to permanency in the teacher's position, but in the country districts but little change. Some improvement is seen in grading the country school and I regard this to the insistent use of the Manual as a basis for work. I am especially pleased to receive supplies of the revised edition, and wish to increase the demand for it and its use in the public schools.

CHAS. H. NYE,  
*Superintendent of Schools.*

---

## GREEN COUNTY.

### TO THE STATE SUPERINTENDENT:

The necessity of a good common school education is generally acknowledged. Statistics show, however, that there are several hundred children in the county, between the ages of 7 and 13, who have not attended school twelve weeks or more during the year. Statistics, in this particular, are singularly unreliable, but it is fair to assume that there are in the neighborhood of one hundred children between these ages who have not been enrolled.

The grading of our country schools according to the course of study has resulted in more systematic and effective instruction. All teachers now take the manual as a guide in organizing and conducting their schools. The fact that 75 pupils from 36 different schools have graduated during the past year speaks well for the common schools of Green county.

During the past year eight sectional teachers' meetings, besides the two meetings of the county association have been held. I have also held a series of nine meetings with school officers for the discussion of the text-book question, the teacher's tenure of office, the township library law, and other matters pertaining to the application of the school law and the offi-

---

*Reports of County Superintendents.*

---

cial management of our schools. These meetings were held with some gratifying results, though the attendance at some places was very small.

The township library law experiences considerable opposition in this county, principally due to mistakes made in the selection of books and the management of these libraries in townships which gave this law an early trial.

Written work in our country schools has been made more effective by requiring the preservation and submission to my inspection of all such work not purely mechanical. Uniform paper is furnished for this purpose from my office.

An educational department has been added to our county fair.

JOHN ZIMMERMAN,  
*Superintendent of Schools.*

---

## IRON COUNTY.

TO THE STATE SUPERINTENDENT—

*Dear Sir:*—In answer to your request for a special report I forward the following brief account of my supervision of the schools of Iron county:

Only a comparatively small portion of the county being populated, the schools, of which there are twelve, are close together, thus making supervision easy and simplifying the conditions for teachers' meetings.

Iron county contains one free high school, with a corps of seven teachers. The whole number of teachers engaged is twenty-three, all of the schools with the exception of the Hurley High being district schools. A new school district has been recently organized at Mercer, in the town of Vaughn, where a schoolhouse is in course of construction.

During the last year an organization known as the Iron County Teachers' Association was organized, the first of the kind in this county. Most of the teachers were active members. They were organized into three divisions which held separate meetings at convenient points every two weeks. The three divisions met every six weeks in Hurley at "union" meetings. Leading educational topics were discussed, methods, school management, and the various studies of the different grades were the absorbing topics, which created a surprising amount of enthusiasm among the teachers. The association received much encouragement from school boards and patrons.

Township libraries are established in all the towns this year for the first time, the treasurers having agreed to withhold the money for that purpose, and though the amount this year is necessarily small, each town will have sufficient to form a nucleus which will in the course of a few years grow into substantial libraries.

Arbor day was observed in many of the schools by appropriate exercises. I sent an outline program to each teacher of exercises, etc., which were modified by the teachers to suit existing needs. We took occasion to have repairs made, grounds cleaned, fences built and apparatus supplied.

Of the three towns in the county, two are organized under the township system, and a movement is now on foot to reorganize the remaining town of Vaughn under the same system.

For a while the school clerks manifested a tendency to hire young and inexperienced teachers at a smaller salary than had been paid to more experienced teachers. This course was not justified by the re-

---

*Reports of County Superintendents.*

---

sults, consequently this tendency is rapidly diminishing. Young teachers, provided they are qualified by education and fitness for the work, have accomplished quite as good work as their older sisters in the profession. They exhibited more real enthusiasm, which if sometimes misdirected at least did the school no harm and the teacher a great deal of good.

KATHLEEN M. NICHOLSON,  
County Superintendent.

---

 KEWAUNEE COUNTY.

HON. O. E. WELLS,

*Dear sir:*—I beg leave to report the following:

The past year has been a year of great development and advancement and although many of our schools do not come up to the required standard, the rapid strides onward and upward have been everywhere noticeable.

Every school in the county is now organized and run in accordance with the graded course of study and there is no longer any doubt as to the advisability of pushing this work vigorously along the line of the manual in a systematic manner so as to stimulate the pupil on through the successive grades to graduating with honor at completion.

Graded course examinations were held in different parts of the county for those who had completed the course of study. Great interest and enthusiasm were aroused at those examinations; nearly one hundred applicants presented themselves for the whole or part of the examination of which 32 passed successfully and received diplomas.

During the past three years this work has been pursued arduously and we now have a nice library connected with every school in the county composed of works selected and classified so as to meet the wants of the different grades of the common schools. The reading matter of these books is pure, of a lofty sentiment and thoroughly educational in character, and each and every library throughout the county contains a storehouse of knowledge to meet the wants of pupils of all ages and different stages of advancement. In three years, 2,785 volumes have been put in the township libraries at a cost of \$1,633.77 and during the past year the books were drawn 18,764 times by the pupils and read at home besides the innumerable times they were used in school as reference and otherwise.

Arbor Day was observed almost unanimously throughout the county and the teachers and pupils are deserving of great credit for making it a general success. A literary program was carried out in each school appropriate for the occasion. Four hundred sixty-one trees were planted, rubbish was removed, fences were fixed up, flower beds made and in several districts fruit trees were set out.

This work is important and can not receive too much encouragement for it teaches the pupils a lesson in horticulture and cleanliness that will never be forgotten and in the near future the school ground will be the most attractive spot in the district, if those improvements continue, and a place where the pupils will be eager to resort to.

Yours respectfully,  
R. A. MOORE,  
Superintendent of Schools.

---

*Reports of County Superintendents.*

---

## LA FAYETTE COUNTY.

## TO THE STATE SUPERINTENDENT:

The distribution of classification records begun by my predecessor was completed. By means of these the teachers were enabled to more easily classify their schools according to the Course of Study and successive teachers can easily continue work where left off. From duplicate reports sent to me each time I am enabled to keep familiar with work being done and advise concerning same whenever a personal visit is impossible. I may say all our Common Schools are graded.

During the past two years seven new schoolhouses have been erected and additional departments have been erected in three of our graded schools. In the construction of the new schoolhouses, arrangements have been made for better ventilation and for the general health and comfort of occupants. Ventilation in the ordinary school-house is poorly arranged for and is one source of disorder in some schools.

Arbor Day has caused a more general interest in making school property neat and attractive. Grounds have been fenced, trees planted and pride has been aroused to a considerable degree.

In 1893 there was a delinquency of 10 per cent. of number of children between 7 and 13 who attended school 12 weeks or more. In 1894 reports show the per cent. to be reduced to less than seven — an encouraging decrease. In 1893 I reported 7,007 children of school age in county, it being a continuation of decrease shown during a term of years. This year there are 7,185 between 4 and 20 years, a reversal of conditions heretofore existing.

No other department of the work has been given more attention than the library law. It was my pleasure to report to the County Board that fourteen of the eighteen towns reserved the fund last year. This year another town has been secured, leaving only three towns to adopt the system. I am authoritatively informed that more towns reserved the fund in 1893 in this county than in any other in the state. I find success depends much upon vigilance of officers interested, and while in some towns the observance of a fixed custom in others it depends upon the present interest of treasurer and clerk in resisting an ever present and active influence.

Last winter three local institutes were held at each of seven centers. A manual was issued to teachers particularly specifying and outlining subjects to be treated, and program to be followed. These meetings being held at convenient places enabled all teachers to attend without much inconvenience.

The institutes are productive of much good. On the Friday evenings previous to the meeting, a Normal school extension lecture was delivered by one of the faculty of Platteville State Normal School. This seems to be a new departure of the work of this school, and the effect is now being felt by a healthier interest along the various lines of our work.

The lectures were attended by school officers, teachers and patrons of schools reaching those for whom they were intended. From the fact that our schools cannot be any better than the people want them shows the necessity for raising, if possible, the ideal of perfection.

The cost of these lectures (traveling and local expenses) was defrayed by local institutes in some cases and in others by collections at lectures. The former plan was more satisfactory.

Teachers' wages in this county are on the increase. The average wages paid male teachers is \$15 77, to females, \$25 36. The fault of low wages paid for the teachers does not rest entirely with school boards, as some applicants for positions underbid each other in their contention for place.

*Reports of County Superintendents.*

All co-operation has been given me in my work by all concerned, and while school officers may not often visit the school over which they exercise supervision, they are very appreciative of attention given same by superintendent.

J. H. NATTRASS.

## ONEIDA COUNTY.

## TO THE STATE SUPERINTENDENT:

The schools of Oneida county number twenty six, with twenty-seven teachers, and are distributed as follows: Seventeen in the city of Rhinelander, seven in lumbering towns on the railroads and two country schools. The schools of Rhinelander are under the county superintendent.

In regard to these city schools, it is the aim of the board of education to make them first-class in every respect; liberal appropriations have been made and handsome buildings erected to meet the wants of a rapidly growing city,—the schools the past eight years have increased from one teacher with twenty-five pupils to eighteen teachers with eight hundred pupils. There is a library of about five hundred volumes.

The other schools of Oneida county are organized under the township system. Here one is enabled to see the good and the bad effects of the system as worked in sparsely settled communities. In the town of Hazelhurst the board of school directors desire to place a school wherever needed and furnish it with everything needful to maintain a good school during nine months of the year. In the town of Woodboro it is almost impossible to establish a new school. There are now two where there should be four. Outside the village of Woodboro there is a log schoolhouse furnished with board seats, no blackboard, as primitive a building as could be found forty years ago, and that too, built by private subscription because the school board refused to furnish anything but a teacher for six months; this in a town with an assessed valuation of two hundred and fifty thousand dollars, maintaining only one school organized under the township system with free text books. The trouble here is that until last year the town consisted of one district, there was one man on the board, then he appointed a secretary and they organized a new sub district, but the original sub district with a majority of the board had complete control of the school organization. The school law should be amended to require at least three sub districts.

The wages paid are \$40 per month and the length of term eight or nine months. The schools are not graded but during the past year the teachers have been trying to follow the Manual and grade their schools, but a constant change of pupils due to the floating population found in our lumbering towns, makes the grading very difficult. Most of the teachers are young and inexperienced.

It has been impossible to arrange teachers' meetings which the teachers outside of the city can attend because they would have to travel long distances by rail and half a dozen teachers could not get together at any point in the county without consuming three or four days in the trip. An institute of one week conducted by Pres. Pray was held at the beginning of the school year which all of the teachers in the county were required to attend. The institute was interesting and successful and its influence extended into the work of the schools throughout the year.

*Reports of County Superintendents.*

One town has established a township library. I have not urged it as I would, if I had not wished to first get the schools, most of which are recently organized, furnished with necessary supplies; but in my annual report to the school boards in June, I urged the establishment of libraries and hope to see some action taken this year.

It is intended to require a moderate standard of qualification in scholarship of teachers for the wages are good. In conclusion, I would say that the schools and the conditions are improving and on the whole the outlook is encouraging for good schools in the county.

MRS. MARY HOWE SHELTON,  
*Superintendent.*

Dated, Rhinelander, Wis., August 6th, 1894.

## OZAUKEE COUNTY.

## TO THE STATE SUPERINTENDENT:

During the past year forty-five male and thirty-two female teachers were employed. All schools retained their teachers for the whole school year, with the exception of a single district in which a male teacher was employed for the winter term, and a female taught the spring term. As a class our teachers are progressive and eager to do good work. More than two-thirds of them were members of the Wisconsin Teachers' Reading Circle during the past year, profiting by the lessons learned from *Swett's Methods* and *The Schoolmaster in Literature*. This year a still larger number have joined the Circle. All testify that it pays them to read books pertaining to their profession. During the year four general and a number of local teachers' meetings were held, all largely attended. Much interest and efficiency was added to the general meetings by the presence of some prominent educators from neighboring counties, who took part in the program.

Forty-two pupils from seventeen different schools completed the course of study last year and were awarded diplomas, while this year there were forty-one graduates from eighteen different schools. Graduating exercises were held in the majority of the schools that had graduates. Besides serving to interest patrons in school affairs, these exercises have proved to be a most powerful incentive for pupils to strive for graduation.

An educational exhibit of the schools of this county was held at the last county fair at Cedarburg. Many hundred entries were made, consisting of outline maps, letters, drawings, specimens of penmanship, copy books, botanical specimens, bookkeeping sets, primary busy work, etc. Patrons as well as teachers were thus enabled to inspect school work of an excellent character. All this has been a stimulus to better school work. Cash prizes amounting to \$142 were awarded, the judges being County Superintendents Wahle, Keeley, and Strassburger and Prof. Mapel. Twenty-one pupils took part in the declamatory and sixty-one in the spelling contests, representing every town in the county. This year the prizes for the educational exhibit will be books instead of cash.

Although our teachers are earnest advocates of the township library system, only three towns have ever withheld money for this purpose, and more earnest work needs be done along this line. It is hoped that the day is not far distant when each district will have a suitable library.

---

*Reports of County Superintendents.*

---

Arbor Day was generally observed and more trees were planted than ever before. At the Holy Cross school more than two hundred trees were planted. A number of "memorial" trees were planted in memory of such men as Washington, Columbus, Longfellow, State Supt. O. E. Wells, Hon. J. Sterling Morton, originator of the Arbor Day and others. The last named gentleman, Mr. Morton, kindly sent his cabinet picture, together with a copy of "Ode for Arbor Day," by S. F. Smith, for each school and department in the county. The venerable Rev. S. F. Smith, author of "America," sent an autograph copy of this interesting new song. All this helped to arouse a wonderful interest in Arbor Day. The parochial schools vied with the public schools in celebrating the day. Each teacher received a copy of "Arbor Day Leaves" containing suitable programs, and an Arbor Day circular was sent to each teacher as well as to each district clerk.

Memorial day was fittingly observed by the schools in session. The W. S. Hancock Post, G. A. R., furnished each school with a program of appropriate exercises, together with a circular calling attention to the importance of teaching patriotism in the schools.

This year Washington's birthday was celebrated in a patriotic manner, each teacher being furnished with a printed program of exercises. Each school and each department of the graded schools received a life-size crayon lithograph of Washington, so that now each school in Ozaukee county is adorned with the picture of the man who was "first in peace, first in war, and first in the hearts of his countrymen."

H. F. FEHLANDT,  
*Superintendent.*

## RICHLAND COUNTY.]

### TO THE STATE SUPERINTENDENT:

*Sir.*—The regular examination for graduation from the upper form in the country schools was given in February, 1893. Seventy-three pupils passed the examination and received the diploma. A number of such pupils, however, held the diploma from the examination of 1892.

A great many districts have not yet adopted a list of text-books and in many of those districts where such a list has been adopted the law has not been fully enforced, and as a consequence a great variety of text-books is to be found in almost every district. In my letters to district boards I have urged upon them the necessity of living close to the law in this matter.

The question of a good schoolhouse does not need to be urged in a very great many districts in our county, but another question, one of a great deal of importance, does need agitating; that is a question of decent and comfortable outhouses. Comparatively little attention is paid to this matter. Teachers are hired to teach and are expected to teach our children to be modest, manly and womanly, and to give children instruction in such rules and laws as will tend to keep them in good health, and yet by reason of the faulty construction or long-standing of many outhouses these very laws are controverted by the surroundings on the school grounds.

If school boards would visit their schools oftener than they do I am of the opinion that many of the things that now are seemingly neglected

---

*Reports of County Superintendents.*

---

would receive attention. By visiting the schools the teacher will be more encouraged and interested through the interest made manifest.

And now I come to the question of township libraries. A great deal of opposition is offered to these in some towns, and the reason for the opposition is hard to find. At one time there might justly have been an objection to them considering that the books offered were beyond the ordinary school pupil to comprehend. But now since that objection has been removed by the selection of a list of books that are clearly comprehensible by all or nearly all of the pupils, it seems to me that that opposition ought to be quite materially lessened. In some towns I have taken the pains to look up the cause of the failure to maintain these libraries, and I am convinced that the most strenuous opposition comes from the wealthier class of people who have no children to send to school. They feel that the tax is too heavy to bear. Let us see how much it would be in Richland county. Six thousand seven hundred and ninety children at 10 cents each would amount to \$679 a year to be expended in books. The amount of money held in the district treasuries from year to year if placed on interest at 6 per cent. would more than overbalance the sum asked to be withheld for school libraries. In some towns of course the interest would be a little less than the amount required, but only in very few.

But it is not alone from a money point of view that we should look at this question. The books for these libraries are selected with the greatest care. Most of them treat upon the leading branches taught in our schools. Some are general reference books and some are books of choice selections. So you can see, gentlemen, children are surrounded by the best of book influences, and as a consequence are very apt to become readers of good books. School work will be more interesting by reason of books of reference that tend to make the study of any branch mean more than can possibly be given through a text-book itself. Day after day children read the same thing over and over. They become tired of the work. You thought it monotonous when you were in school, they think so now. So why not give them this needed variety?

Previous to "Arbor Day," April 28, 1893, there was mailed to every district in the county the circular prepared by the state superintendent and also a letter of instructions from the county superintendent. Reports were received from seventy-two schools showing that Arbor Day had been observed. In some of the districts an immense amount of work was accomplished. The school yards show it. Children were taught to care for their school grounds and to keep them in better shape. Of the 1,700 or more votes cast for a state tree by Richland county children, over 1,000 were for hard maple. I firmly believe that Arbor Day is a fixture with the children of our county.

Compulsory education is a question in my mind that requires a great deal of study. Shall we force the children to go to school or shall we leave it to the good sense of the American people to work out the answer to this question?

Force, I believe, is not just what is needed. "Better to lead than to drive." First exhaust all honest endeavors before resorting to force. The children are not always to blame for being out of school. In many cases the parents alone are responsible. They should be made to feel the effects.

Very truly yours,

J. M. FEREBEE.

## SHAWANO COUNTY.

## TO THE STATE SUPERINTENDENT:

The last school census returned eight thousand four hundred and twenty-six (8,426) pupils of school age.

There are ninety-seven schools, requiring one hundred and nine teachers when all are in session.

Teachers are required to follow the Manual so far as circumstances permit. As a rule, there is no trouble in securing compliance with the request.

To enforce this requirement, reports in duplicate, showing the following items, are demanded at the close of each term:

1. Standing of each pupil in each branch studied during the term.
2. Pupils of each class and work done during the term.
3. Program used during the term.
4. Explanations and suggestions by the outgoing teacher.

One of these reports is left with the clerk for the succeeding teacher, and the other is forwarded to the county superintendent and put on file in his office for reference.

This plan has been in operation over two years, and works to the satisfaction of all concerned.

Through its aid, each teacher has the exact information needed at the beginning of a new term, and the work is resumed on a reliable basis without worry to the teacher or loss to pupils.

In general, districts have very good schoolhouses. The few old-time log structures that remain will soon be replaced by modern buildings. At Tigerton, a four-room brick schoolhouse, warmed by steam, has been erected the past year. An eight-room building has been decided on for Wittenberg, and will be erected at once. There is a strong sentiment in these places for the establishment of a free high school in connection with the graded schools already organized. At Birnamwood, a vote favorable to the establishment of a free high school was taken at the annual meeting.

The plan of supplying each school with lists of test questions, for graduation from the common school course, has been continued with satisfactory results. Although the percentage of graduates is small, the effect upon the schools at large has been very satisfactory. It is one of the principal factors in bringing the schools into conformity with the course laid down in the Manual.

The township library interest seems to be gaining in favor. Six towns report money withheld for the purchase of books. This is a larger number than has heretofore reported favorably. I think the judicious selection of books has had much to do with the change of sentiment.

The necessity for doing some professional reading has been emphasized, and as a result, a larger number has enrolled in the Reading Circle than during previous years.

A summer school, the first held in Shawano county, was organized by Supt. Roberts during the month of July. The school was well attended, there being an enrollment of fifty-seven. Supt. Roberts and Prof. M. P. Cady, of Birnamwood were instructors.

The school was immediately followed by a very successful institute conducted by W. C. Hewitt, assisted by W. J. Pollock. Considering the fact that a portion of Shawano county has been but recently settled, together with the diversity as to nationality, the schools undoubtedly compare favorably with those of other counties of the state.

Respectfully submitted,

L. D. ROBERTS,

*County Superintendent of Schools.*

## WINNEBAGO COUNTY.

## TO THE STATE SUPERINTENDENT:

There is shown an increasing desire to improve the condition of our schools. This is manifest in seeking the services of teachers of better scholarship and greater experience; also in making more liberal provision for school supplies. Many districts have during the past year purchased outline maps, charts, etc., for the use of their schools.

## SCHOOLHOUSES AND outhouses.

The schoolhouses, with the exception of four or five buildings, are in a good condition. During my term as superintendent I have made special effort to have the condition of the outhouses bettered, and I am pleased to state that much good has been accomplished in this direction. Some of the school boards, at times, were rather slow in acting upon my suggestions, regarding the deplorable condition of the outhouses and in several instances I enforced the very limited executive rights of a superintendent with good results. I would respectfully suggest a change in the law as to the amount of money which a superintendent may compel a school board to expend for repairs, etc., making it seventy-five or one hundred dollars instead of twenty-five, which it is now. It seems to me there is little or no danger of a superintendent's abusing his power by compelling a school board to make unnecessary expenditures; on the other hand, there are many times when he could exercise this right to the great advantage, of patrons pupils and teachers.

I would also suggest a change in the law regulating the age of applicants for certificates. I find it a very difficult matter to say to a would be teacher or school board that my only objection is age, many districts being anxious to employ such teachers on account of the wages. It is true some have performed good work, and yet others of equal ability fail for various reasons, the principal of which are, first, a lack of judgment to meet emergencies that are so liable to arise in the schoolroom; second, a lack of self reliance; and last but not least, the school boards and patrons themselves who urged the school upon them, have no confidence in the judgment and ability of the teacher to control unmanageable pupils, and as often condemn the action of the teacher as that of the offender. The schools of this county are all quite well graded; quite a number are graded strictly in accordance with the Manual; the remainder follow the suggestions and requirements of the Manual so far as it is practicable.

O. E. PEDERSON,  
*Co. Superintendent.*

SIXTH BIENNIAL REPORT  
OF THE  
RAILROAD COMMISSIONER.

---

STATE OF WISCONSIN,  
*Office of Railroad Commissioner,*  
MADISON, WIS., December 6, 1894.

HON. GEORGE W. PECK,  
*Governor of Wisconsin:*

The Railroad Commissioner, as required by law, herewith submits his report for the years ending June 30, 1893, and June 30, 1894, the same being the Sixth Biennial Report of the Railroad Commissioner.

The report is largely tabulated from returns made by the railway companies of the state to the railroad commissioner, and while not *complete* is in convenient form for reference. In a former report I called attention to chapter 526, laws 1889, of Wisconsin, which provides that reports shall be published at a cost not exceeding *twenty-five cents* per copy. This sum is insufficient and I would again respectfully suggest action by the next legislature which will enable the railroad commissioner to publish a *complete* report.

MILEAGE.

On the 30th of June, 1892, the railroad mileage of Wisconsin was 5,785.07 miles. On June 30th, 1894, the mileage reported

---

*General Report.*

---

was 6,003.68 miles, being an increase of 218.61 miles. New roads report as follows:

Drummond & Southwestern .....	9.25 miles.
Duluth & Winnipeg .....	1.02 miles.
Lake Superior Terminal & Transfer R'y Co .....	15.20 miles.
Minnesota & Wisconsin .....	26.00 miles.
Rice Lake, Dallas & Menomonie .....	7.52 miles.
Superior Belt Line & Terminal R'y Co .....	11.09 miles.
Ahnapee & Western .....	34.00 miles.
Winona Bridge R'y Co .....	.54 miles.

---

104.62 miles.

Increased mileage reported:

Duluth, South Shore & Atlantic .....	41.23 miles.
Milwaukee & Northern .....	11.90 miles.
Milwaukee, Lake Shore & Western .....	21.16 miles.
Re-surveys, branches, spurs, etc .....	39.70 miles.

---

Total increase .....

---

218.61 miles.

#### CONSOLIDATION AND CHANGES.

On June 26, 1893, the Chicago, Milwaukee & St. Paul Railway company acquired by purchase and deed the Milwaukee & Northern railroad, which is now the Lake Superior division of that road.

On August 19, 1893, the Chicago & Northwestern Railway company acquired by purchase all the property and franchises of the Milwaukee, Lake Shore & Western Railway company, which is now known as the Ashland division of that road.

The Wisconsin Central lines were operated under lease by the Northern Pacific Railroad company from April 1, 1890, until August 15, 1893. From that date until midnight of September 26, 1893, the Wisconsin Central lines were in the hands of Messrs. Oakes, Payne and Rouse, receivers of the Northern Pacific Railroad company. On September 27, 1893, Messrs. H. F. Whitcomb and Howard Morris were appointed receivers

---

*General Report.*

---

of the Wisconsin Central railroad and Wisconsin Central company and are still operating these lines.

The Minnesota & Wisconsin Railroad company, twenty-six (26) miles of road between Emerald, St. Croix county, and Spring Valley, Pierce county, was placed in the hands of D. B. Dewey, receiver, on December 11, 1893.

The Kickapoo Valley & Northern Railway company, extending from Wauzeka to Soldiers Grove, Crawford county, thirty-four (34) miles, passed into the hands of E. A. Wadhams, receiver, on March 3, 1894, making a total mileage of 826.67 miles, with a capital stock and funded debt of about \$65,000,000.00, in the hands of receivers.

## STOCK AND DEBT.

On June 30, 1894, the capital stock and funded debt (interstate roads proportional upon mileage basis) in Wisconsin was:

Capital stock.....	\$112,393,960 99
Funded debt.....	160,388,101 16
Unfunded debt.....	6,320,074 70
Total debt.....	\$279,102,136 85
Less cash and available cash assets.....	4,694,631 34
	<u>\$274,407,505 51</u>
Capital stock per mile.....	\$19,069 52
Bonded debt.....	27,212 66
Total of stock and debt per mile.....	<u>\$46,282 18</u>

## DIVIDENDS.

On common stock.....	\$1,383,079 41
On preferred stock.....	1,307,955 14
	<u>\$2,691,034 58</u>

## COST OF ROAD AND EQUIPMENT.

Cost on June 30, 1894.....	\$239,113,311 55
Cost per mile.....	40,320 27

---

*General Report.*

---

## EARNINGS.

Passenger earnings.....	\$8,707,275 70
Freight earnings.....	19,246,083 02
Miscellaneous earnings.....	365,185 36
Total gross earnings.....	<u>\$28,318,544 08</u>

## EXPENSES.

For maintenance of ways and structures.....	\$4,093,304 97
For maintenance of equipment.....	2,390,527 55
For conducting transportation.....	9,944,853 53
For general expenses.....	1,856,781 44
	<u>\$18,285,467 49</u>
Percentage of expense to earnings.....	.64.571
Net income.....	\$10,033,076 51

## LICENSE FEE OR TAX.

A table showing amount of earnings and license received from the railway companies of the state for the past five years, is herewith appended:

1890 Earnings....	\$26,451,564 81	License received....	\$1,008,559 04
1891 Earnings....	28,040,298 77	License received....	1,140,046 64
1892 Earnings....	31,732,050 62	License received....	1,220,674 88
1893 Earnings....	33,263,551 38	License received....	1,373,950 47
1894 Earnings....	28,318,544 08	License received....	1,295,999 13

The 1894 license is equivalent to a tax of \$216.00 per mile of road within Wisconsin.

The amount of license received from the Pullman and Wagner Sleeping Car companies for the five years last past (being *four per cent.* of the earnings of such cars within Wisconsin) is as follows:

## FROM SLEEPING CAR COMPANIES.

1890.....	\$1,365 67
1891.....	894 32
1892.....	1,214 96
1893.....	1,193 04
1894.....	1,223 39

---

*General Report.*

---

For the information of the interested, I give herewith extracts from the laws governing taxation or the license fee of railroads and sleeping car companies within Wisconsin:

## TAXATION OF RAILROAD COMPANIES.

SECTION 1211. Every railroad company, and every person operating a railroad in this state, except railroads operated by horse-power, shall, on or before the tenth day of February in each year, make and return to the state treasurer, in such form and upon such blanks as shall be furnished by him, a true statement of the gross earnings of their respective roads for the preceding calendar year, of the number of miles of road operated by each such company or person, and the gross earnings per mile per annum during such year, which statement shall be verified by the oath of the secretary and treasurer of such companies, or of the person so operating such railroad.

9 Wis., 431; 11 Wis., 35; 15 Wis., 554; 16 Wis., 1.

SECTION 1212. Each such railroad company and each person so operating any railroad shall, on returning such statement, apply for a license to operate the railroad mentioned in such statement, and shall pay the license fee therefor provided in the next section; and thereupon shall receive from the state treasurer a license to operate such railroad for the calendar year commencing on the first day of January preceding, and terminating on the next succeeding thirty-first day of December, unless sooner revoked.

SECTION 1213. The annual license fees for the operation of such railroads shall be as follows:

1. Four per centum of the gross earnings of all railroads, except those operated on pile and pontoon, or pontoon bridges, whose gross earnings equal or exceed three thousand dollars per mile per annum of operated railroad.

2. Five dollars per mile of operated railroad of all railroads whose gross earnings exceed one thousand five hundred dollars per mile per annum, and are less than three thousand dollars per mile per annum of operated road, and in addition two per centum of their gross earnings in excess of fifteen hundred dollars per mile per annum.

3. Five dollars per mile of operated road by all companies whose gross earnings are less than fifteen hundred dollars per mile per annum.

4. Two per centum of the gross earnings of all railroads which are

---

*General Report.*

---

operated upon pile or pontoon, or pontoon bridges, which gross earnings shall be returned as to such parts thereof as are within the state.

One-half of such license fee shall be paid at the time the license so issued, and one-half on or before the tenth day of August in each year.

FORFEITURE FOR NEGLECT TO OBTAIN LICENSE AND PAY FEE.

SECTION 1214. If any such railroad company, or person operating any such railroad in this state, shall neglect to obtain such license, or pay the license fee therefor, or any part thereof, as hereinbefore provided, such company or person shall absolutely forfeit to the state the sum of ten thousand dollars, to be recovered in an action brought in the name of the state; and such neglect shall also be a cause of forfeiture of all the rights, privileges and franchises, whether granted by special charter or obtained under general laws by or under which any such railroad is operated. And the attorney-general, upon such neglect, shall collect by action the pecuniary forfeiture herein imposed, and also proceed to have forfeiture of such rights, privileges and franchises duly declared. Any such company or person, at any time before the final judgment of forfeiture of such rights, privileges and franchises is rendered, may be permitted to make the return and pay the license fee herein provided for, upon special application to the court in which the action to declare such forfeiture is pending, upon such terms as the court shall direct.

SECTION 1795. The railroad commissioner shall, on or before the tenth day of February in each year, ascertain and return to the state treasurer the following:

1. The actual cost of each railroad in the state up to and including the thirty-first day of the next preceding December; and if such railroads shall be partly in and partly out of this state, then the actual cost of so much thereof as is in this state.
2. The total gross receipts resulting from the operation of every such railroad during the next preceding year, ending on the thirty-first day of December, or of that part of the same which is in this state.
3. The total net earnings resulting from the operation of any such railroad during the next preceding year, ending on the thirty-first day of December, or of that part of the same which is in this state.
4. The total interest bearing indebtedness of the corporation owning or operating such railroad, and the amount of interest paid by such corporation during the next preceding year, ending on the thirty-first day of December; and if any part of such indebtedness has been in-

---

*General Report.*

---

curred in consequence of the construction, maintenance, repair, renewal or operation of any part of such railroad which is not in this state, or for equipment of such part, such railroad commissioner shall ascertain and determine, in such manner as he shall think just and equitable, how much of its indebtedness is justly chargeable to that part of said railroad that is in this state, and how much interest shall have been paid by such corporation, during such year ending on the thirty-first day of the next preceding December, on that part of such indebtedness which is justly chargeable to that part of said railroad that is in this state. The president or managing officer of every railroad corporation, and every other person operating any railroad in this state, shall annually, in the month of January, make such reports and returns to such commissioner, verified by the oath of such officer or person, as shall afford the information aforesaid, and as he shall require, and at other times prescribed by him, such other reports and returns, verified as aforesaid, concerning such railroads, their business affairs and management, as he shall require; and for such purpose he may prescribe blank forms, which shall be provided by the secretary of state. Every railroad corporation, company or person operating a railroad, who shall fail to make any such report within the time prescribed therefor, shall forfeit one hundred dollars for each and every day the same shall be delayed.

## TAXATION OF SLEEPING CAR COMPANIES.

SECTION 1222 b. (Ch. 353, laws 1883.) No owners, whether corporate or otherwise, of palace cars, drawing room cars or sleeping cars, except railway companies operating railways within this state, shall have a right to use or charge or collect fare or compensation for the use of any such car within this state until such owner shall have procured from the state treasurer a license to use such cars within this state as hereinafter provided.

2. Every such owner of the cars mentioned in section 1, except railway companies as aforesaid, shall, on or before the tenth day of February in each year, make and return to the railroad commissioner a true statement of the gross earnings made by the use of such cars, between points within the state of Wisconsin, during the preceding calendar year; which statement shall be verified by such owner or by some officer or agent having official knowledge of the facts.

3. Every such owner shall on returning the statement provided for by section 2, of this act, apply to the state treasurer for a license to use the said cars upon the railroads operated in this state, and to charge and collect fares or compensation for the use thereof, and shall pay to

---

*General Report.*

---

the state treasurer for such license, the fee provided in the next section, and upon such payment the state treasurer shall issue to such owner a license to use such cars, and charge fare or compensation for such uses as aforesaid.

4. (As amended by ch. 415, laws 1885.) The annual license fee to be paid by such owner, as aforesaid, shall be four (4) per centum of the earnings reported, as required by section 2, hereof; the amount of such license fee to be computed by the railroad commissioner, and by him certified to the state treasurer.

5. The report required by section 2, hereof, shall be in such form and shall embrace such details as shall be prescribed by the railroad commissioner.

6. The said license fee shall be paid one-half at the time such license is applied for, and one-half on or before the tenth day of August, in each year; and if any such owner shall neglect or refuse to make any report required by this act, and to pay for such license, then such owner shall, so long as such neglect or refusal shall continue, have no right to use said cars as aforesaid, in this state, and charge and collect fare or compensation for such use, and any such use by any such owner, in violation of the provisions of this act, may be restrained by injunction at the suit of the attorney-general, in any court of competent jurisdiction.

## ACCIDENTS.

For year ending June 30, 1893, the following is a summary of accidents reported. A detailed statement will be found in its proper place upon the pages of this report:

<i>Accidents.</i>	<i>Killed.</i>	<i>Injured.</i>
Passengers.....	9	30
Employees.....	71	368
Trespassers.....	97	40
Not trespassing.....	10	25
Total.....	189	463
	===	===

For year ending June 30, 1894:

<i>Accidents.</i>	<i>Killed.</i>	<i>Injured.</i>
Passengers.....	4	28
Employees.....	38	177
Trespassers.....	60	55
Not trespassing.....	14	21
Total.....	116	281
	===	===

---

*General Report.*

---

A newspaper writer has stated that an attempt is to be made by certain railways to secure from congress the repeal of the so-called "car coupler law," which became effective March 2, 1893. This measure was designed to mitigate the wanton and wholesale sacrifice of the lives of employees on the iron roads of the country. It requires that by July, 1898, all freight trains shall be equipped with automatic couplers and train brakes, and all locomotives with wheel brakes. They are not likely to succeed, because it is a fact well recognized that 50 per cent. of the deaths and 70 per cent. of the non-fatal hurts suffered by railway employees are due to the lack of automatic train brakes and automatic couplers. What an enormous number of avoidable casualties is thus represented may be judged when it is stated that every year on the railroads of the United States 25,000 workers engaged in the business of transportation are killed and 25,000 are injured. In a recent year more railway employees were killed in this country than *three times* the number of Union men slain at the battles of Lookout Mountain, Missionary Ridge and Orchard Knob combined. The number injured was greater than the wounded and missing at Shiloh, Antietam, and first and second Bull Run combined. The facts of the case are rendered impressive when it is said that more faithful workers on the railways of the United States went down in sudden death during 1892 than the entire number of Union men who died in the battle of the Wilderness, and nearly as many as perished at Spottsylvania. In the bloody Crimean war the British lost 21,000 in killed and wounded — not as many as are slain, maimed and mangled among the railroad men of this country in a single year. At the battle of Sedan, which sealed the fate of the second empire, the loss on both sides in killed and wounded was a trifle more than the killed and wounded among our train men last year. At Gravelotte, where the loss was heaviest in the Franco-Prussian war, the Germans lost 20,577 men. Wellington won Waterloo and Meade Gettysburg with a loss of

---

*General Report.*

---

23,185 and 23,003, respectively, and the total loss on both sides at Shiloh in the two days' murderous fight did not reach 24,000.

The railways, in trying to mitigate this condition of affairs, adopted so many different types of couplers that the number of casualties was actually increased thereby. When the various roads used fifty or more distinct devices for this purpose, the workmen were pretty sure to be killed or injured in a short period. The average life of a switchman in a freight yard is now reckoned at seven years. Under the "car coupler law" the cars on most railways are being equipped with a uniform type of coupler which, while not perfect, is approved by railway men. By July, 1898, all freight trains must be thus equipped, as well as with automatic train brakes and driving wheel brakes for the locomotives. Practically all passenger trains are already provided with these appliances.

#### COMPLAINTS.

During the past two years few complaints have been made to this department. None of them have been in regard to discriminations or extortions. Farm crossings, water-ways along the right of way, stock killed and injured, are the most numerous subjects of complaint. All the complaints have received the immediate consideration of this department and of the railroad companies, and in all instances have been amicably adjusted without the interference of the law department of the state.

Four years' experience demonstrates that the railroad commissioner, as an arbitrator, is the most satisfactory way of adjustment of most of the complaints coming to this office.

#### INSPECTION OF ROADS AND THEIR CONDITION.

Notwithstanding the reduction of expenses in all departments of the railway service, the fact has evidently been recognized by the railway managers that the physical condition of the

---

*General Report.*

---

roads must be kept to the standard to enable trains to make the rapid time required by the traveling public. The great through routes between Chicago and the northwest make as fast time, with passengers and freight, as is made upon other great thoroughfares. The Green Bay, Winona & St. Paul Railway company have greatly improved their roadway and rolling stock and are becoming competitors for through traffic.

**PAYMENT OF LICENSE FEE OR TAX.**

Sections 1211 and 1212, chapter 87, laws of Wisconsin, provides that each railroad company operating a road within the state shall, on or before the tenth day of February, in each year, make and return to the state treasurer a true statement of the gross earnings of their respective roads for the preceding calendar year, etc., etc., and that each of such railroad companies, and each person so operating any railroad, shall, on returning such statement, apply for a license to operate the railroad mentioned in such statement, etc., etc.

The *fiscal* year of nearly all the railroads in the state ends on June 30, and I would again suggest an amendment to the present law that license or tax be hereafter payable in September and March of each year, instead of February and August.

**CONCLUSION.**

As on a former occasion, I desire to acknowledge my appreciation of the promptness of the auditors of the different railway companies, and to the officers of the roads, for immediate attention to all complaints and to the courtesy extended by them to this department.

If my successor shall keep within the same lines that has marked the course of this commission for years, his administration of the affairs of the office will be beneficial, not only to the public and patrons of the railroads, but to the railroads themselves.

Respectfully submitted,

THOMAS THOMPSON,

*Railroad Commissioner.*

## AT LUMBERMEN'S LLOYDS.

In accordance with the requirements of chapter 230, laws of 1893, the following notice has been filed in this department:

Eau Claire, Wis., Oct. 19, 1893.

W. M. Root, *Insurance Commissioner,*

Madison, Wis.:

DEAR SIR: In accordance with a law passed at the last session of the legislature, entitled "A bill authorizing persons and corporations engaged in manufacturing to indemnify each other for losses by fire to their manufacturing plants, and the products thereof, on the "Lloyds principle," we have organized an association called "At Lumbermen's Lloyd," with its principle office in the city of Eau Claire, and have appointed James A. Smith agent or attorney for us, and we desire to file his appointment with you as provided in the said statute.

Yours very truly,

J. T. BARBER, TREAS.,

At Lumbermen's Lloyd. 3

## BIENNIAL REPORT OF THE BOARD OF REGENTS.

---

To His Excellency,

GEORGE W. PECK, *Governor.*

SIR: At the time of our last biennial report, President Adams had just assumed the duties of President of the University. The accompanying report from him fully and clearly shows the progress of the University; the work it has done, and is now doing; also its needs for the future.

The reports of the Treasurer and Secretary, herewith presented, contain full and complete statements of receipts and disbursements for the biennial term ending September 30th, 1894.

During the past two years the College of Law building, the Armory and Horticultural buildings have been completed, and are now occupied. The additions to the Machine Shops are practically completed, and the machinery being placed in position for use. Very large improvements have been made in the general heating plant for the University buildings, which is now nearly completed, and is being used for heating a large portion of the buildings of the University.

The increase in attendance at the University still continues in all departments. The cordial and friendly feeling existing between students, and Faculty is worthy of note. The very best of understanding has prevailed between President, Professors and students.

Very respectfully,

W. P. BARTLETT,

*President of the Board of Regents.*

---

*Report of Treasurer.*

---

## TREASURER'S REPORT.

---

Honorable WM. P. BARTLETT,  
*President of the Board of Regents.*

SIR: I submit my report as treasurer of the Board of Regents of University of Wisconsin, for the fiscal years ending September 30, 1893 and 1894.

1893.

		1,740 53

## LAW BUILDING.

University pay-roll mechanics.....	\$128 85	
D. L. Plumer, expenses.....	114 45	
John W. Bashford, expenses.....	9 15	

*Expenditures in Detail, 1893.*

LAW BUILDING—Continued.		
Arthur Bate, superintendent		\$980 00
John Erwood, services as expert		306 55
D. R. Butler, raising chimney		404 10
King & Walker Co., boiler contract		3,997 00
E. F. Riley, services		275 00
Democrat Printing Co., printing		3 75
Brittingham & Hixon, lumber		36 00
John H. Starck, carpenter work		3 32
Duerr & Rohn, vault doors		155 00
Johnson Electric Service Co., heat regulation third story		165 00
Wisconsin Fire Place Co., mantels		325 00
Ansonia Electric Co., motor		325 00
Western Electric Co., wiring etc		408 08
Phillip Gross, hardware		680 93
L. H. Prentice Co., steam heating contract		6,486 00
Chas. S. Frost, architect		750 00
T. C. McCarthy, on contract		36,041 75
T. C. McCarthy, tunnel		3,250 00
Secretary Board of Regents, bills paid		9 81
		\$54,854 64
ARMORY BUILDING.		
University pay-roll, filling and grading		\$530 88
Orlando E. Clark, expenses		10 35
Wm. H. Seaman, expenses		10 00
Wm. Owens, plumbing		10 57
Fredrickson & Sons, lumber		19 21
Conklin & Sons, tiling and cement		275 00
N. Quinn, dirt		1 00
Democrat Printing Co., advertising		5 95
Times Printing Co., advertising		14 40
Brittingham & Hixon, lumber		2 88
Purdy & Henderson, testing iron		125 00
Secretary Board of Regents, services		100 00
Arthur Bate, superintendent		520 00
Conover & Porter, architects		734 33
T. C. McCarthy, on contract		35,874 50
		\$8,234 07
EXPERIMENT STATION.		
W. A. Henry, dean, salary		\$3,500 00
S. M. Babcock, professor, salary		2,500 00
F. H. King, professor, salary		2,200 00
E. S. Goff, professor, salary		2,200 00
John A. Craig, professor, salary		1,500 00
F. W. Woll, professor, salary		1,400 00
John W. Decker, instructor, salary		600 00
C. A. Woodford, vet. lecturer, salary		225 00
H. J. Noyes, dairy instructor, salary		300 00
D. Simmons, dairy instructor, salary		100 00
U. S. Baer, dairy instructor, salary		100 00
E. S. Brubaker, dairy instructor, salary		100 00
F. Carpenter, dairy instructor, salary		100 00
E. W. Curtis, dairy instructor, salary		100 00
A. Schoenman, dairy instructor, salary		100 00
De Wit Goodrich, dairy instructor, salary		75 00
Farm pay-roll, chemists, employes and laborers		7,233 28
University pay-roll, mechanics and shop work		239 81
Mrs. Meyer, washing		7 50
Chas. Carman, shoeing		9 90
P. J. DePold, blacksmith work		91 18
Stephenson & Studemann, tin work		412 04
Angell & Hastreiter, directory		3 00
Standard Poland China Record Association, books		14 00
Ramsay, Lerdall & Guldemann, hardware		57 41
Wm. Owens, plumbing		82 81
John D. Hayes, shoeing		34 00
Fredrickson & Sons, lumber		572 40
Madison City Gas Light & Coke Co., gas		159 81
Madison Harness Co., mdse		20 00
S. L. Sheldon Co., machinery		1,013 31

## SALARIES—COLLEGE LETTERS AND SCIENCE AND LAW.

C. K. Adams, Adams, president, salary with expenses as agreed upon	\$7,000 00
J. B. Parkinson, vice-president, salary	3,000 00
E. A. Birge, dean, salary	3,500 00
Richard T. Ely, director, salary	3,500 00
C. R. Barnes, professor, salary	2,500 00
W. W. Daniells, professor, salary	2,500 00
D. B. Frankenburger, professor, salary	2,500 00
J. C. Freeman, professor, salary	2,500 00
C. H. Haskins, professor, salary	2,500 00
Alex. Kerr, professor, salary	2,500 00
W. H. Rosenstengel, professor, salary	2,500 00
J. W. Stearns, professor, salary	2,500 00
F. J. Turner, professor, salary	2,500 00
C. R. Van Hise, professor, salary	2,200 00
F. A. Parker, professor, salary	2,200 00
Jos. Jastrow, professor, salary	2,200 00
W. A. Scott, professor, salary	2,200 00
C. A. Van Velzer, professor, salary	2,200 00
Benj. W. Snow, professor, salary	2,000 00
Geo. L. Hendrickson, professor, salary	2,000 00
F. L. Van Cleef, professor, salary	2,000 00
W. H. Williams, professor, salary	1,800 00
C. S. Schlichter, professor, salary	1,800 00
J. E. Olson, professor, salary	1,668 64
Edw. T. Owen, professor, $\frac{2}{3}$ salary	1,500 00
H. W. Hillyer, professor, salary	1,500 00
W. H. Hobbs, professor, salary	1,500 00
Almah J. Frisby, precepreess, salary	1,500 00
F. J. Hubbard, professor, salary	1,500 00
A. A. Knowlton, professor, salary	1,400 00
Walter M. Smith, librarian, salary	1,400 00
Victor Coffin, professor, salary	1,400 00
F. H. Wilkens, professor, salary	1,400 00
W. S. Miller, professor, salary	1,200 00
E. B. Skinner, professor, salary	1,200 00
E. B. Van Vleck, professor, salary	1,200 00
L. Kahlenberg, instructor, salary	1,000 00
J. F. A. Pyre, instructor, salary	1,000 00
W. F. Giese, instructor, salary	1,000 00
W. S. Marshall, instructor, salary	1,000 00
L. W. Austin, instructor, salary	1,000 00
Susan A. Sterling, instructor, salary	1,000 00
W. G. Sued, instructor, salary	1,000 00
Harriet T. Remington, instructor, salary	1,000 00
G. W. Saunderson, instructor, salary	1,121 25
H. A. Sober, instructor, salary	1,000 00
F. C. Sharp, instructor, salary	1,000 00
W. B. Cairns, instructor, salary	1,000 00
Lucy M. Gay, instructor, salary	1,000 00
Clara E. S. Ballard, instructor, salary	800 00
W. H. Dudley, assistant librarian, salary	800 00
Duncan Anderson, instructor, salary	500 00
Katherine Allen, instruction	400 00
Jessie Gritflh, instruction	400 00
C. M. Hubbard, instruction	400 00
O. G. Libby, instruction	400 00
J. L. Mead, instruction	400 00
Harry Kuhn, instruction	400 00
H. F. Stecker, instruction	400 00
H. H. Swain, instruction	400 00
J. E. Davies, $\frac{1}{2}$ salary	1,250 00
E. E. Bryant, dean (law), salary	3,500 00
I. C. Sloan, law lectures	1,152 00
Burr W. Jones, law lectures	864 00

*Secretary.*

*President's Report.*

REPORT OF THE PRESIDENT OF THE UNIVERSITY

HONORABLE WILLIAM P. BARTLETT,

*President of the Board of Regents of the University of Wisconsin.*

SIR: In accordance with your request, I have the honor to submit herewith a report of the condition and progress of the University for the biennial term extending from 1892 to 1894.

The growth of the University will be most clearly indicated by the presentation of statistical tables showing the number of students as compared with those of preceding years.

1. NUMERICAL GROWTH OF THE UNIVERSITY.

The total attendance at the university in 1885-86, was .....	443
In 1886-87.....	539
In 1887-88.....	637
In 1888-89.....	722
In 1889-90.....	790
In 1890-91.....	966
In 1891-92.....	1,092
In 1892-93.....	1,287
In 1893-94.....	*1,279

The attendance at the summer school (not included in the above), was in 1887, 45; in 1888, 55; in 1889, 104; in 1890, 132; in 1891, 145; in 1892, 190; (in 1893 no session of the school was held), and in 1894, 153.

2. GROWTH BY COLLEGES.

The growth of the colleges and schools of the university is shown by the following table, which includes special and graduate students and fellows, distributed in their proper colleges and schools:

	87-88.	88-89.	89-90.	90-91.	91-92.	92-93.	93-94.
College of Letters and Science.....	386	419	498	558	599	572	511
College of Mechanics and Engineering.....	75	89	111	137	152	179	206
College of Agriculture.....	25	46	32	97	152	175	173
College of Law.....	113	119	112	118	126	166	169
School of Pharmacy.....	38	49	35	56	63	65	42
School of Economics, Political Science, and History.....						139	190
Less twice enumerated.....						9	8
Totals.....	637	722	790	966	1,092	1,237	*1,279

\* The catalogue of 1893-4 was issued during the winter term and does not, therefore, include the students entering in the spring term. The numbers here given are from the printed record taken from the catalogue. Sixteen students were admitted in the spring term, making the total for the year 1,295.

*University of Wisconsin.*

## 3. GROWTH BY COURSES.

The growth by courses has been as follows:

COURSES.	88-89.	89-90.	90-91.	91-92.	92-93.	93-94.
Ancient classical .....	56	54	45	49	48	43
Modern classical .....	73	74	77	97	101	99
General science .....	71	68	64	77	100	92
English .....	104	126	144	137	87	75
Civic historical .....					86	123
Civil engineering .....	29	27	38	41	45	39
Mechanical engineering .....	31	43	47	42	43	42
Electrical engineering .....		9	15	32	56	72
Metallurgical and mining engineering .....	3	3	1			
Special students .....	132	192	213	218	246	229
Law .....	119	112	118	126	166	169
Pharmacy .....	49	35	56	63	64	41
Agricultural short course .....	41	27	17	45	68	66
Dairy course .....			72	100	101	103
Agricultural long course .....	3	5	5	3	3	2
Fellows and resident graduates .....	9	15	24	22	57	53
Candidates for second degrees .....			30	40	35	39
Less twice enumerated .....					9	8
<b>Totals .....</b>	<b>722</b>	<b>790</b>	<b>866</b>	<b>1,092</b>	<b>1,287</b>	<b>1,279</b>

## COLLEGIATE DEPARTMENTS, COMPARED WITH PROFESSIONAL DEPARTMENTS.

By combining all students pursuing strictly undergraduate work in one group and those pursuing professional studies in another group and comparing them we find their ratio from year to year and their relative growth to be indicated in the following table. In this table those in the engineering courses, in law, in pharmacy and in the long course in agriculture are ranked as professional students. All others, excepting short course students in agriculture and dairying, fellows, and resident graduates, are included as members of collegiate departments.

	88-89.	89-90.	90-91.	91-92.	92-93.	93-94.
Collegiate departments .....	410	483	558	599	631	624
Professional departments .....	262	265	316	344	404	402

Disregarding the professional element and grouping together the attendance upon those courses in which the human element predominates, and, on the other hand, the attendance upon the courses in which the physical element predominates, we find the comparison to be as follows:

	88-89.	89-90.	90-91.	91-92.	92-93.	93-94.
The Humanities .....	352	366	385	409	488	519
The Physical .....	188	190	226	258	291	327
The latter including short Agricultural courses .....	(229)	(217)	(315)	(403)	(450)	(496)

*University of Wisconsin.*

DISTRIBUTION OF SUBORDINATE COURSES.

The University nomenclature is somewhat confusing owing to the fact that no word has been adopted that will enable a reader unfamiliar with college terms to discriminate between a general subject and the subordinate parts of that subject. For example, it is not uncommon to speak of the Ancient Classical "Course," or the Civic Historical "Course," and at the same time of the "Course" in Demosthenes, or the "Course" in Mediaeval History, each of the latter constituting only a portion of one of the former. This explanation may be necessary to a complete understanding of the fact that the University offered in 1893-94 360 courses. An inspection of the following table, showing the number of (subordinate) courses during the past four years, will indicate very clearly the development of the university in the scope and extent of the instruction offered.

DEPARTMENTS OF INSTRUCTION.	91-92.	92-93.	93-94.	94-95.
Philosophy.....	14	12	14	18
Pedagogy.....	6	6	5	8
Economics.....		9	10	21
Political Science.....	13	10	7	8
History.....	11	10	11	15
Greek.....	9	10	10	12
Latin.....	10	10	9	12
Hebrew and Hellenistic Greek.....	4	3	3	7
Scandinavian languages.....	4	4	5	5
German.....	12	14	13	23
French.....	5	5	6	9
Spanish and Italian.....	2	2	2	3
English language and literature.....	11	6	17	22
Rhetoric and oratory.....	7	11	6	16
Mathematics.....	19	20	22	30
Astronomy.....	3	5	7	7
Physics.....	5	11	10	15
Chemistry.....	8	9	13	10

## ACCREDITED SCHOOLS.

The policy of the University toward the high schools of the state has been that of liberality in admitting them to its list of accredited schools. This action, followed as it has been by a constant pressure for better work on the part of the schools, has doubtless been of service in raising the standard of teaching in the high schools. Through this policy, however, the number of accredited schools has become so great that it seems necessary to make a more complete organization of the work of inspection and some special provision for visiting the schools. When the number was small and the schools were those of the larger towns and cities constant inspection was not needed; but when schools are accredited in large numbers a thorough system of visiting is requisite if the efficiency of preparation is to be maintained. Schools accredited for several courses should be visited not only on a change of the principal, but when a change is made in the teaching of any important branch, as Latin, German, or science. Schools are accredited whose excellence depends rather on the teacher present at the time of inspection than on the demands of the community. Such schools, and many of those in the smaller towns, need an annual inspection if their efficiency is to be maintained.

The University has received much assistance in the way of inspecting the schools from the State Department of Public Instruction, but the nature of the work of the State Inspector of High Schools is such that he can give but little special attention to the college preparatory studies. It would greatly aid the work of the University Committee on Accredited Schools if provision should be made by which the railroad fare of the inspector could be paid by the University. This would allow inspectors to be sent out on the order of the committee instead of waiting for an invitation from the school. It would also be possible under such an arrangement to inspect departments of a school in cases where such inspection would be advantageous but where the University hesitates to require from the school the expense of a visitor. Annual inspection and visiting by more than one professor would also be possible in the numerous cases where such action would be to the advantage of the school and indirectly to the advantage of the University in strengthening the work of the schools from which its students come.

## REQUIREMENTS FOR ADMISSION.

The high school courses officially recommended by the State Superintendent are uniformly adopted as standards and types of the preparatory work required, but a certain latitude is given for the offering of alternative studies, so that the high schools can the better adapt their courses to

---

*President's Report.*

---

the wants of their constituents and yet meet the requirements of the University. The specific nature of the requirements may be found by consulting the recent catalogues. It is gratifying to be able to state that these requirements have been met most generously by the schools, and that, so far as we can judge, with the exception of the School of Pharmacy, no considerable diminution in the number of students entering the University has resulted from an elevation of the standards of admission.

#### THE GROUP SYSTEM.

For the purpose of encouraging greater concentration, continuity and thoroughness in the later years of the course, and at the same time in order to afford a wider familiarity with the broader field of knowledge, a system designated the group system was adopted to go into effect at the beginning of the academic year 1892-3. Under this system the studies of a four years' course are divided into two parts: First, those consisting of a group of basal studies, intended to furnish a solid foundation for the second part; and secondly, a group of more specific studies running through two years and constituting the major part of the student's work. These leading studies designed to furnish more thorough information on the topics under consideration, are accompanied with a series of assigned supplementary studies together with a series of elective studies sufficient to make up the requirements of a full course. The basal studies occupy the first two years of the course, while the more specific studies, which constitute the essential characteristics of the group, occupy the last two years. These courses are supplemented by synoptical lectures on the chief studies not otherwise taken in order that the student at graduation may possess some knowledge of their salient features. The general purpose of this system is to introduce methods strictly characteristic of university life in the modern sense of the term, and to extend these methods into the undergraduate collegiate courses, thus preparing the way for the better development of graduate work. It is gratifying to state that the experience of the past two years has appeared to demonstrate the wisdom of this arrangement. It is evident that even undergraduate students may, when working under this system, achieve results which are ordinarily reserved for students taking graduate instruction. It is too soon to predict with confidence that no corresponding disadvantages are likely to appear.

#### GRADUATE WORK.

In the last report of my predecessor attention was called to the great desirability of increasing facilities for successful graduate work. With this expression I heartily concur, for, although we must not lose sight of the constant requirements of the great mass of students who cannot pur-

---

*University of Wisconsin.*

---

sue graduate studies, it is also necessary to make provision for those studies that are necessary for the most complete preparation for professional work. As time advances, increasing emphasis must be given to instruction of this advanced grade. It is gratifying to record that during the past two years the number of graduate students has been increased and the facilities for giving advanced instruction in the laboratories and libraries as well as in the class rooms, have been multiplied and extended. This I believe has been done without encroaching in any way upon the increasing efficiency of undergraduate work.

#### THE SCHOOL OF ECONOMICS, POLITICAL SCIENCE, AND HISTORY.

The establishment of this School two years ago was a notable feature in the recent life of the University. The organization of the School, it is to be assumed, was left somewhat indefinite in order that it might receive any advantage that would accrue from the first years of its experience. The School has not had an independent organization. While logically it would seem that all students in the Civic Historical Course should be enrolled as a part of the School of Economics, Political Science, and History, they have, up to the present time, been enrolled as a part of the College of Letters and Science. This is the reason why it has been very difficult to answer the question as to how many students the new School contained. There has never been any separate enrollment of members within the School, but the classes in economics, history, and political science during the year 1893-94 numbered in the aggregate nine hundred and eighty-four. In no department of the University have the classes been so crowded. It is worthy of note also that an unusually large number of students in this School have carried their studies beyond graduation, and as graduate students have done work very creditable to their instructors and to the University. It is a noteworthy fact that there is such a demand for the graduate students of this school that a very considerable number have been led to accept tempting offers before completing their graduate studies.

#### PUBLICATIONS.

The state law (Chapter 174, General Laws of 1889) authorizes the publication by the state of the results of "important investigations conducted by the direction of Washburn Observatory and by other investigators connected with the University" Any papers presented for publication must have the approval first of an editorial committee; secondly, by the Board of Regents, and thirdly, of the State Commissioners of Printing. Under the authority of this law during the last year the initiatory steps were taken for the publication of four series of "University Bulletins"; one

---

*President's Report.*

---

lating to studies in science, one relating to studies in engineering, one relating to studies in philology and literature, and one relating to studies in economics, political science, and history. These bulletins will be published at irregular intervals as proper material may be furnished, and will be distributed, under the law of the state, in such a way as best to serve the cause of Letters and Science and to secure exchanges from other institutions. As yet, only six numbers have been published, but these have been received with great favor by technical and literary journals. The publication of this series of bulletins is creditable alike to the liberality of the State and the scholarship of the University.

## THE ANCIENT CLASSICAL COURSE.

During the past two years one of the most notable changes in the teaching force of the University has taken place, in the department of Greek. The Board of Visitors has repeatedly called attention to the fact that the literary side of the University needed such strengthening as would be afforded by placing the department of ancient languages on a broader and firmer foundation. The expression of a desire by the senior professor of Greek to be relieved of a part of his work, and the resignation of the junior professor, afforded an opportunity for a complete reorganization of the department. Great care was exercised in the selection of two new professors, one of whom, Professor Charles Foster Smith, Ph.D., is placed at the head of the department, and another, Professor Arthur G. Laird, Ph.D., received an appointment with the grade of Assistant Professor. Professor Smith, after receiving an exceptionally thorough training in the best schools of this country and in Europe, has had twelve years of most successful experience under conditions not unlike those surrounding classical instruction in our own University. Professor Smith and Assistant Professor Laird entered upon their work at the beginning of this year with every promise of most eminent success.

## COLLEGE OF MECHANICS AND ENGINEERING.

The engineering courses, recast and greatly improved three years ago by being more thoroughly specialized in the different lines of engineering, have shown a marked degree of prosperity. The courses in Mechanical Engineering, Electrical Engineering, Railroad Engineering, Hydraulic Engineering, and Structural Engineering, have grown so rapidly as to require large additional equipment, as well as several additions to the instructional force. From the nature of the work, the material equipment of this college must always make large demands upon the treasury of the University.

---

*University of Wisconsin.*

---

## THE COLLEGE OF AGRICULTURE.

The work of this branch of the University during the past year has been successfully carried on along the lines previously established. The number of students in the Long Course in Agriculture has been small, but in the Short Course and the Dairy Course as many have sought the advantages of the University as could be accommodated.

By the provision of the legislature two years ago, one-sixth part of the \$40,000 per year, appropriated for two years, was to be devoted to the strengthening of the College of Agriculture. Dr. H. L. Russell was appointed Assistant Professor of Bacteriology, and Mr. E. H. Farrington as Associate Professor of Dairy Husbandry. Dr. Russell, an alumnus of this University, had fitted himself for work of this kind by long continued study in the best laboratories of this country and in Europe; and Professor Farrington, after having had successful experience in the Connecticut Agricultural Experiment Station, in the University of Illinois, and at the Columbian Exposition, came here with excellent qualifications for the position. The work of the Dairy School during the past two years has received the heartiest commendation from good judges in all parts of the country; and more students have applied for instruction than could be accommodated in the Dairy building. It is gratifying to state that the success of the students who have completed the course has been exceedingly creditable to the institution. At the World's Columbian Exposition more than one-half of the cheeses exhibited from the State of Wisconsin were sent by former students of our Dairy School; and these cheeses won a larger percentage of premiums than did those sent by other exhibitors. The first premium for dairy butter from the State of Michigan, and the second prize from Minnesota was won by a former dairy student of this University. Our dairy students are scattered all over the country: One is making butter on the William K. Vanderbilt farm, Long Island, while five are operating factories in California. Teachers from our Dairy School have gone to the dairy schools of the departments of dairying in the Agricultural Colleges of Maine, Canada, Vermont, Cornell University, Pennsylvania, Ohio, Indiana, Illinois, and Minnesota.

Besides our regular Dairy School instruction, Farm Dairying is taught to students taking the Short Course in Agriculture. Last fall the first prize for dairy butter at our State Fair was won by a Short Course student, who had never made butter until studying in the University last winter. Last fall a Short Course student won the first prize for dairy butter at the Walworth County Fair against thirty

---

*President's Report.*

---

competitors. Nine former Short Course students acted as judges of live stock at thirteen county fairs in this state last fall.

The appropriation by the legislature of \$14,200 two years ago for a Horticultural building proved, when the plans were made, inadequate for the construction of such a building as the department needed; and the Regents, after due consideration, supplemented the appropriation so as to expend for the building about \$22,000. It was thought wise to plan the structure in such a way that it could be enlarged for the accommodation of the department of Agricultural Physics. This branch of agricultural work, under the wise and efficient direction of Professor F. H. King, has assumed such importance and scope as to call for new and enlarged quarters of its own. It is estimated that the necessary addition to the Horticultural building can be made for about \$20,000.

It is also the earnest desire of the Dean of the College that the group of agricultural buildings shall be warmed from a central heating plant. The presence of the engine and the necessary supply of soft coal for fuel in the Dairy building is injurious to the processes and products of dairy husbandry; and the removal, especially of the coal dust from the building, would be an unquestionable advantage.

The Dean is also of the opinion that a new Dairy barn, with well and windmill, should be constructed at the earliest convenience of the legislature and the Board of Regents.

He desires also that the attention of the legislature should be called to the fact that a herd of dairy cows would be of great advantage to the College. His estimate is that the requisite boiler house would cost about \$10,000; a new barn, with the necessary equipment, about \$5,000; and that \$2,000 should be expended for a herd of dairy cows. It is probable that the central heating plant would result in a saving of fuel and a diminution from the risk of loss from fire.

I submit these recommendations to favorable consideration.

#### FARMERS' INSTITUTES.

In December, 1893, the University suffered a great loss in the lamented death of W. H. Morrison, for many years Superintendent of Farmers' Institutes. At the time of his death the plan of Institute work for the winter had been so nearly completed that the Dean of the College was willing to superintend the work of the Institutes for the winter. It was not until the following summer that a successor to Mr. Morrison was appointed. The position to be filled was one of such importance as to justify the most careful and thorough inquiries as to the fitness of the

---

*University of Wisconsin.*

---

different candidates for the position. After due consideration the Board appointed, on the earnest recommendation of the President and the Dean, Mr. George McKerrow, who entered upon his work at the beginning of the present collegiate year. Mr. McKerrow has had large and successful experience in the work of conducting Farmers' Institutes, and it is gratifying to say that under his guidance this very important part of University work bids fair to be carried on with undiminished energy and success.

## DAIRY HUSBANDRY.

During the past two years the Dairy School has been further developed along the lines on which it was established four years ago. The course has been more thoroughly systematized and arranged with special reference to the highest practical outcome. The dairy building, combining facilities for factory work on a commercial scale, with laboratory and lecture courses, has contributed very largely to the success of this department, and has fully justified the hopes of those who were instrumental in establishing it. During the past year it was found that the cost of supplies in the course of the winter term was so great that the Committee of the Board of Regents on Agriculture was led to consider very carefully whether it would not be wiser to establish such connections with the farmers in the vicinity as to furnish the Dairy School with milk during the entire year. As the result of this consideration on the part of the Dean of the College of Agriculture and the Agricultural Committee, the experiment was entered upon of continuing the process of manufacture during the entire year; and up to the present time the experiment gives promise of favorable results. It is hoped that the new arrangement, while, on the one hand, enabling the University more nearly to reimburse itself by the sale of products, will, on the other, afford the means for practical instruction throughout the year.

## SUMMER SCHOOL.

During the summer of 1893, the Summer School was omitted on account of the attractions at the Columbian Exposition; but during the summer of 1894 the School was attended by one hundred and fifty-three students. The recommendation of my predecessor that the School be made still more definitely and formally a branch of the University, has my approval. As soon as practicable the summer term should, in my opinion, be extended to six weeks, and its work should be recognized as that of a regular half term in the University; and its necessities should be provided for as a regularly established and organic part of the institution. The School is already attended

---

*President's Report.*

---

by a very considerable number of the teachers of Wisconsin; and it would doubtless be attended by a still larger number if its courses should be somewhat more thoroughly adapted to the needs of teachers, and the facilities offered should be made more widely known.

## UNIVERSITY EXTENSION.

When the University Extension movement was inaugurated in Wisconsin three years ago, it was anticipated that there would be a considerable falling off of interest after the first one or two years. While the number applying for courses of lectures has slightly diminished, it is gratifying to state that, notwithstanding the stringency of the times, during the past year the number of courses given has been scarcely less than the number given in any preceding year; and the results attained are believed to have been even more beneficial. The future of this branch of our instructions however, cannot be contemplated without some solicitude. It is obvious that the work cannot be extended beyond its present limits (even if it can be maintained) without weakening the amount and quality of the instruction at the University itself. It is a noteworthy fact that the committees calling for University Extension courses are not willing to leave the choice of lecturers to the University authorities, but are importunate in their demands that lecturers of well known experience and ability shall be provided. It would probably be quite easy for the University to keep its best men in the University Extension field throughout the most of the year, and it makes a large draft upon the judgment and discretion of the officers of the University to determine how far such requests shall be complied with. Another feature of the situation should not pass unnoticed. No provision has been made for a permanent secretaryship of the University Extension movement. If provision could be made for a suitable officer to visit all parts of the state and meet those interested in University Extension lectures, provision could often be made for courses by officers of the University who are not unwilling to give such courses, but whose attainments and abilities as yet are not very generally known. If the matter of University Extension could be superintended and worked up with some such thoroughness as that which is shown in the superintendence of the Farmers' Institutes, I have no doubt the people of the state would receive a very large compensation for the trifling additional expense. The need of such a secretary, if the Extension movement is to be kept up, is of vital importance. During the past year, forty-one courses of lectures have been given in thirty-two towns and cities.

---

*University of Wisconsin.*

---

## SCHOOL OF PHARMACY.

About three years ago the Board of Regents, on the recommendation of the professors interested in the School of Pharmacy, increased the requirements for admission to the School as well as the requirements for graduation. This change was evidently made in the belief that there was no reason for a school of pharmacy in a state university which should limit itself to the grade of instruction ordinarily given in what may be called the commercial schools. In point of requirements for admission and graduation the policy was adopted of putting the school on a par with those in the other state universities. The result, as was anticipated, was to diminish the number of students in attendance. It is now possible for a student with simply a grammar school education to go to almost any one of our large cities and obtain a degree in pharmacy after an attendance of eight or nine months in a single year. It is not strange that these schools are largely attended, and that they keep the grade of instruction in pharmacy on a very low level. One of the best, probably the very best of the schools of this kind, in Chicago, last year had an attendance of 462 students. The School of Pharmacy in the University of Michigan, now nearly forty years old, organized on the plan of requiring at least a considerable part of a high school education for admission, and a two years' course in the University before graduation, had, last year eighty-two students. The School of Pharmacy in the University of Minnesota, according to the last catalogue, had an attendance of twenty-five. In our own school the attendance was forty-two. This year the attendance is substantially the same. Perhaps the number should not be regarded as unsatisfactory. I believe that the course of instruction is well planned, and the quality of instruction is thorough. During the last year a considerable number of those who were admitted to the School fell out from an inability to pass the requisite examinations in the general work of the first year, but these failures occurred chiefly in the departments of chemistry and physics, where the instruction is given with that offered to other students of the University. In many quarters it seems to be a prevailing notion that the most elementary education is enough to satisfy the requirements in pharmacy; but a moment's reflection is enough to convince one that nothing short of a somewhat thorough knowledge of the principles of chemistry can satisfy the requirements of a properly equipped pharmacist. I believe that the policy of the University should be, gradually, to raise the requirements for admission even above what they now are, in order that the school may attract to itself, not indeed those persons who are simply desirous of acquiring the requisite

---

*President's Report.*

---

knowledge to enable them to keep a drug store, but that which is necessary to make them thoroughly educated pharmacists.

Acting upon this general policy, the Committee of the Board of Regents on the School of Pharmacy, about a year ago, recommended that the material equipment of the School be very considerably increased. The proportion of the difference between the one-tenth and one-eighth of a mill tax afforded to the School of Pharmacy was increased; and during the past year provision has been made for extending the equipment and strengthening the instructional force. A laboratory of practical pharmacy has been put into operation, and it is believed that in point of equipment and instructional force the School is now believed to be not inferior to any other in the Northwest.

## COLLEGE OF LAW

On the completion of the new Law Building more than one year ago, the College of Law was removed from its old quarters in the State Capitol to the new and commodious rooms furnished on the University grounds. The advantages of this change of location at once became apparent. The College, for the first time in its history, seemed to be fully incorporated as an integral part of the University. The building, although none too large even for the present accommodations of the College, is in most respects admirably adapted to the purpose for which it was designed. In the course of the last year the Committee on the College of Law, after a very careful consideration of its necessities, reported in favor of a somewhat radical change in its organization. It was the opinion of the Committee that less dependence should be placed upon professors actively engaged in the practice of law, and more upon professors who could give their entire time to the work of the School. Acting upon this recommendation of the Committee, the Board of Regents at their meeting in June last, appointed Charles Noble Gregory, Esq., to the position of Professor of Law and Associate Dean. Professor Gregory entered upon his work with great zeal at the beginning of the present collegiate year, and the earnestness and efficiency with which his work has been done thus far gives great promise of additional efficiency for the School. Provision was also made by the Board for extending the course of instruction to three years and for increasing the fees of students. These new requirements will go into effect at the beginning of next year.

## UNIVERSITY BUILDINGS.

In the course of the past two years the Law Building, the Horticultural Building, and the Armory and Gymnasium have been completed.

---

*University of Wisconsin.*

---

All these structures are creditable to the University and the State. As the appropriation of two years ago by the legislature for the enlargement of the Chemical Laboratory and the Machine Shops was considerably smaller than that which was asked for by the Regents, after a careful estimate of the necessities of those departments, it was not found practicable to enlarge the Chemical Laboratory. The request of the Regents two years ago was for fifty-eight thousand dollars. Forty-five thousand dollars only were appropriated, and the Regents were obliged to decide as to how they were to apply the money provided. It was thought best to supply a fan for the purpose of improving the ventilation in the Chemical Laboratory, and to expend the remainder of the sum appropriated in the enlargement of the shops connected with the College of Mechanics and Engineering. This work has been done, and the result promises to give entire satisfaction; though at an early day an enlargement of the Chemical Laboratory will probably be necessary. For the fan in the Chemical Laboratory and the enlargement and equipment of the shops, the entire sum appropriated by the legislature for that purpose has been expended.

#### THE NEW HEATING PLANT.

The authorities of the University were, a year ago, confronted with the necessity of very much enlarging its steam plant. This necessity arose partly from the fact that the heating apparatus in University Hall was burned out so as to make a new method of warming the building absolutely necessary, and partly from the fact that provision must be made for warming the Amory and Gymnasium. After very careful investigation, the Board decided upon the policy of enlarging the Boiler House in order to increase the capacity of the boilers for heating purposes. It was thought best to construct them in such a way as to secure the utmost economy in the consumption of fuel and at the same time serve the purposes of practical instruction to students of steam engineering. The design of the plant was intrusted to the Professor of Steam Engineering, and the result promises to be highly satisfactory. The expense incurred has been one which the treasury of the University could ill afford to bear, but under all circumstances it seemed a necessity that could not be avoided.

#### THE NEED OF A NEW LIBRARY BUILDING.

The University is in most urgent need of additional library accommodations. During many years past students pursuing special investigations have been obliged to rely very largely upon the State Historical

---

*President's Report.*

---

Library at the State Capitol. The distance of this library from the University, and the limited accommodations afforded at the rooms set apart for it in the Capitol building, makes such consultation inconvenient and sometimes impossible. Notwithstanding these inconveniences, however, the State Historical Library has been very largely used by professors and students connected with the University. In view of the needs of the University and of the Historical Society, two years ago the trustees of that society voted with practical unanimity to unite with the University in asking the legislature for a new and fireproof building suitable to accommodate both the General Library of the University and the State Historical Library under one roof. It was agreed at that time by the Regents of the University that a part of the so-called lower campus should be given as a site for such a building. The union of these two great interests has attracted the attention of the Board of Visitors for 1892-3 and for 1893-4. They have expressed their opinions with special urgency on this subject in their reports to the Regents. The University from its own point of view cannot be indifferent to the preservation from fire of the invaluable collections of the State Historical Society, which are recognized in all parts of the country as quite the foremost historical library west of the Alleghanies, and one of the most valuable of the kind in the United States. By placing this collection in a suitably constructed and strictly fireproof building upon the University grounds it will be made more accessible and useful, not only to the members of the Historical Society, but also to the sons and daughters of Wisconsin who study at the University, as well as to such historical writers as may be attracted to the library for the purpose of scholarly research. I cannot urge upon the Board too strongly the necessity of action looking toward the consummation in the nearest possible future of the plans adopted two years ago.

## LADIES' HALL.

Two years ago the Regents called the attention of the members of the Legislature to the condition of Ladies' Hall. While it was generally agreed that the building in its present condition is not what it should be, it was not thought wise to make at that time an appropriation for its improvement. The desirability of some modifications of the building is even more apparent now than it was at that time. A large increase in the number of young women in the University, especially of those seeking accommodations in Ladies' Hall, gives new emphasis to the necessity of the proposed addition. The University has been obliged to choose between abandoning instruction in music and en-

---

*University of Wisconsin.*

---

croaching upon quarters which were by the Legislature sacredly set apart for the purposes of the young women. The erection of the Armory and Gymnasium, affording, as it does, ample accommodations for the young men, has led the Faculty to make systematic provision for the physical training of all under-graduate students during the first and second years. In view of the fact that the physical training of young women is quite as necessary as that of young men, the Faculty did not deem it wise to make any exception because of the meagerness of the quarters provided for young women. For social reasons, it is not deemed advisable to admit young women for the purposes of physical exercise to the Armory and Gymnasium; but it is the opinion of the authorities of the University generally that much enlarged facilities for such training should be provided in connection with Ladies' Hall. It is earnestly hoped that in the near future the means may be obtained for making the necessary enlargements of the accommodations here indicated.

## UNIVERSITY HALL.

No one can visit University Hall without being impressed with the necessity of very considerable renovation and enlargement. The old floors of broad strips of pine have in many places been worn through; the plastering in many of the rooms and corridors is broken and patched; the windows are so worn as to admit the winds from every quarter, and the rooms are ill furnished and dismal in general appearance. It is questionable whether any city or village in Wisconsin would tolerate for a single year a school building in the condition that is now presented by University Hall. The accommodations afforded by the building, moreover, were provided when the University had not more than a fifth part of the number of students that are now in constant attendance. Nor has the erection of subsequent buildings much relieved the pressure. In this building are the rooms for all the instruction in Greek, Latin, French, English Literature, Rhetoric, the Mathematics, History, Political Science, and Philosophy. The classes of no less than thirty-one professors and instructors meet here daily throughout the University year. At the end of every hour between eight and one o'clock from six to eight hundred students are poured out into the narrow corridors of University Hall. An inspection of the building by the proper committee will, I think, reveal the changes that are so eminently desirable.

---

*President's Report.*

---

## A NEW BUILDING FOR MECHANICS AND ENGINEERING.

The figures previously given in this report show that the growth of the School of Mechanics and Engineering has been such as to make it obvious that in the near future a separate building should be provided for its accommodation. All the space of Science Hall could, even at the present moment, be used with great advantage by the various departments of the natural sciences and physics. But for the other more immediate necessities of the University, I should urge the Regents to ask the Legislature at the coming session to make provision for an Engineering Building. Though such provision may not be practicable at the present time, I cannot think it out of place to keep the real needs of the University constantly before the people of the State. Not to speak of absolute relative advancement, it is not too much to say that if the University is to maintain its present relative position among other State institutions of the country, its various necessities must be carefully and thoughtfully considered and met.

## GENERAL EXPENSES.

The tables given above show that there has been a gratifying growth of the University in all directions. This growth, however, has been a source of constant embarrassment to the finances of the institution. The policy adopted by this University, in common with all the other State Universities of the Northwest, of giving education without tuition fees to students from the State, imposes a constantly increasing obligation to provide additional means corresponding with the ever-increasing numbers of students coming to the University. A comparison of the increase in the number of students with the increase of the pecuniary valuation of the state will show that the number of students has advanced very much more rapidly than the valuation of the property. The eighth of a mill tax was provided when there were only 388 students in the University, and during the present year the number will not fall short of 1,500. Thus it appears that the number of students since that tax has been provided for has been increased by more than 400 per cent; while the income from the eighth of a mill tax during the same period has increased from \$57,244.52 to \$81,750.00, or only about 70 per cent.

Another source of serious embarrassment is the ever-increasing expense incurred by the care of new buildings. Some years ago a distinguished President of an Eastern University reported that it cost the

---

*University of Wisconsin.*

---

University with which he was connected several thousand dollars a year to accept of the gift of a large building. The same might be said in regard to all new buildings provided for by the Legislature. The care of the Dairy and Horticultural buildings are charged to the Agricultural College funds, but the expense of warming, lighting and administering the Law Building and the Armory is necessarily a charge upon the general fund, for which no special provision whatever has been made.

In view of these and similar facts, two years ago the Legislature gave to the University forty thousand dollars a year for two years for the necessary increase of its teaching force, and for the increasing necessities for fuel, light, laboratory supplies, and all those details of administration which necessarily multiply as the University increases in magnitude and efficiency. The Executive Committee which has so much to do with the expenses of departments, even with the help of the appropriation of 1893, has been constantly embarrassed by calls which seem amply justified by the nature of the requirements, but which cannot be met by the University treasury. It must never be forgotten that modern methods of education call for large opportunities for investigation in various branches, and that such methods require abundant supplies in the laboratories, seminaries, and museums. Since the Legislature met two years ago the attendance at the University has increased by some 20 per cent, while the state apportionment has been so reduced that the income of the University from its fractional mill tax and from its 1 per cent of the railroad license fees has been diminished by about \$24,000. It is hoped that some provision will be made for meeting the consequent deficiency in order that the University may be able to maintain its present standing, and provide for that growth which, judging from the past, is certain to continue.

## THE LAW OF 1891.

The Legislative provision of 1891 for a tax of one-tenth of a mill for six years specified that the income derived from the tax should be "used by the Board of Regents of the University for the construction, "equipment and maintenance of an armory and drill room for the military department of the University, a building for the College of Law, "a building for practical instruction in dairying, and such modifications "or extensions of existing buildings as the growth of the University "may require. The residue which shall remain from the income hereby "provided for shall be used to meet the permanent necessities arising "from the growth of the University, and may be applied in the same "manner as other University incomes."

The Dairy Building, Law Building, Armory, and Heating Plant, besides other repairs regarded as absolutely necessary, have cost about

---

*President's Report.*

---

\$325,596, or within about \$52,000 of what is estimated to be the entire avails of the law of 1891. It is evident that from the funds available from that law only a very small amount can be used for the purposes of the buildings and repairs which I have above pointed out as eminently desirable. In my opinion, the Regents should consider with great care the whole question of the future financial needs of the University.

Respectfully submitted,

C. K. ADAMS,  
*President.*

---

*University of Wisconsin.*

---

## REPORT OF THE BOARD OF VISITORS FOR 1893.

*To the Board of Regents of the University of Wisconsin:*

GENTLEMEN:—The Board of Visitors for the year ending June, 1893, respectfully submit their report:

Nearly all members of the Board were present at each session, and at convenient times members have also individually inspected the work of the University. All departments have been visited, and we think the Board has become as familiar with the workings of the institution as was possible in the stated time.

We highly commend the general administration of the University by the Board of Regents and President Adams. With resources at their disposal we do not see how greater progress could have been made during the past year. We are justly proud of the rank of our University, and feel sure that it will become, at an early date, one of the great Universities of the country.

We rejoice in the appropriations of last winter for extension and enlargement of Machine Shop; for the construction of adequate draughting and dynamo rooms; for extension of Chemical Laboratory, all to be fully equipped; for a Horticultural Building; for experimental work; for increase of appropriations for Agricultural and other work, and especially for the purchase of "Camp Randall."

These were crying needs and called for immediate attention.

We find the Faculty, as a whole, doing excellent work. We note with satisfaction that able instructors in all lines are being secured, and would emphasize the recommendations of previous Boards that such instructors be retained at whatever cost. The standing of any University corresponds, in a general way, to the standing of the Faculty.

We view with satisfaction the large and increasing number of students. Rooms for classes must soon be enlarged, and instructional force increased, to meet the demand.

The new school of Economics, Political Science and History already ranks high. We think this practical department should be emphasized and encouraged. Approving thereof, we submit to you, in this connec-

---

*Board of Visitors' Report, 1893.*

---

tion, the report of R. M. Bashford, chairman of the committee having this department in charge.

The University Extension Lectures have now continued long enough for the observation of their general effects.

No one can deny that they are proving an important factor in popularizing higher education. The fear has been expressed that too much of the time of instructors would be taken from the University work, but this difficulty may be obviated by the employment of a corps of special Lecturers.

REPORT OF COMMITTEE ON THE SCHOOL OF ECONOMICS, CIVICS, PHILOSOPHY  
AND UNIVERSITY EXTENSION.

*To the Board of Visitors:*

The first year's work in this department has been successful in every way; the attendance of students has been large and the instructional force able, zealous and proficient in the special fields of study and investigation. Prof. Simon M. Patton, of the Wharton School of Finance, who gave a course of lectures before the School on "Economic Theory," said that in our first year we had placed ourselves on a level with any School of Economics and History in the United States. Such an opinion from such a source may safely be adopted by your Board of Visitors. The special lectures which were delivered before the School by Prof. Patton, Dr. Amos G. Warner and Dr. Frederick H. Wines were paid for by private contribution and added greatly to the interest and usefulness of this department.

We note as results of the year's work on the part of the corps of instruction, a publication issued by Dr. R. T. Ely, on "Outlines of Economics;" by Prof. W. A. Scott, on "Repudiation of State Debts," and by Dr. David Kinley, on "Independent Treasury System of the United States." These several publications display great research and ability on the part of the authors, in the opinion of scholars who have examined them and who are best able to judge of their merits.

The instruction given in the school, so far as we have been able to observe, is broad and liberal in its character and entirely free from any local, partisan, or class bias or prejudice, in respect to the different subjects brought forward for consideration. We heartily commend the work, and bespeak for this School such material assistance and encouragement as the Board of Regents may consistently give.

(Signed) R. M. BASHFORD,  
Chairman.

We find the Agricultural Department in a flourishing condition. The work is not only abreast of the times, but also thorough and well sustained. We commend its management.

The Dairy School at Experimental Station has already gained a national reputation, and with sufficient funds at its disposal cannot fail to reach the highest standard of excellence.

The Farmers' Institutes, under the present efficient management, are training a generation of practical scientific farmers. The future success of this line of work seems assured.

---

*University of Wisconsin.*

---

The College of Law is in excellent condition. Students are increasing rapidly and the instructional force is able and zealous. The new building, now almost completed, is a model of its kind, but we think, in the near future, will fail to furnish accommodations to all who will come. We herewith submit the report of the Committee:

REPORT OF COMMITTEE ON LAW.

*To the Board of Visitors:*

We, the committee of the Board of Visitors having under consideration the Department of Law of the State University, respectfully submit the following report:

The committee are very much gratified at the progress made by the students of the Law Department during the past year, and commend most heartily the zeal, energy and ability with which the Dean and the other members of the Law Faculty have conducted the work. The Law College is constantly increasing in importance and usefulness. The large number graduating from the Law Department yearly, attests the interest felt in this department. It is found that a correct and profound knowledge of the Law is much more rapidly acquired in the Law College than in the office of an ordinary practicing lawyer. Hence the Law College is a necessity.

The Regents, in the erection of the beautiful new building on the campus, have supplied a long-felt need of the Law College. The committee is of the opinion that the time will soon come when every part of the building will be needed for the uses of the Law College.

The pressing need of the Law College at the present time is a Law Library. A good library is indispensable to a good lawyer. No law student can successfully prosecute the study of law without the aid of a large, well selected library. The library should be within easy reach of the student, and should be located in the building where its studies are pursued.

In looking over the catalogues of the law colleges of other states, it will be noticed that special reference is made to the law library of the college. Where the college has a large law library it is held out as a special inducement for the attendance of students. The law library is now very meagre and not at all commensurate with the needs of the law college.

Your committee were much pleased and gratified by the intelligence and manliness exhibited by the graduating class of 1893 in the Law Department. The alumni of the Law College have become one of the main supports of the University. Their influence is largely felt throughout the land, and the call for assistance from their Alma Mater has never been made to them in vain.

The State University could not better maintain and increase its grand reputation for usefulness than by promoting and fostering the interests of the Law College, and providing liberally for its needs.

Respectfully submitted,

(Signed) E. O. HAND,  
Chairman of Committee.

The Scientific Department of the University is well to the front, but we find that it is not sufficiently well equipped with apparatus.

We cannot fail to observe that the Classical Department is falling behind. Approving thereof, we submit on this point the report of G. M.

---

*Board of Visitors' Report, 1893.*

---

Woodward, chairman of the committee. In this connection also we submit the report of Geo. D. Cline, chairman of committee on "Relations of Accredited High Schools to the University."

*To the Board of Visitors:*

Your committee appointed to examine the courses of study pursued in University Hall and North Hall—Language, Literature, History, Mathematics, Philosophy, Pharmacy, etc.—have not been able as a body to take action with reference to each of the subjects named. This report, therefore, is necessarily made from detailed observations of different members taken at different times.

The recitations which we have attended in these departments presented no features calling for particular criticism. The instructors seemed to be conscientious and diligent and learned in the branch taught. The answers of the students to questions put indicated faithful study, at least of the lesson in hand. More that this would not be apparent to the casual visitor, unfamiliar with the best, or even the ordinary, methods of instruction in universities, and but little acquainted with either professors or students.

The organization of these departments seems to be complete, and we have no doubt that the methods in use are of the best which have been devised for the purpose.

We might stop here with this brief statement of the general results of our observations; but there remains a more important matter to which we may properly direct attention if we can contribute nothing to the solution of the difficulty which it suggests.

The members of this committee, as members of other sub-committees, have participated in the examination of other departments of the University. It has been impossible for them to do this without receiving impressions in regard to the relative importance of the different departments and the interest taken in them by students and the public.

It seems to us that the plane of linguistic and literary studies in the University is not equal in power and influence to that of science. We heartily concur in the general desire that scientific, and all so-called practical studies, be prosecuted with enthusiasm and success; but we do not believe that this should be done at the expense of the departments of language and literature. A real university must be one which affords ample opportunities for advanced work in every direction. Those whose tastes and aptitudes incline them to linguistic studies should have every inspiration and encouragement to pursue their work to the highest proficiency. For some reason, which we cannot define, the atmosphere of the University does not seem to offer such inspiration and encouragement. In the modern languages the instruction is apparently thorough, and the classes show a fair degree of interest in their work.

The attendance upon the classes is also evidence that their studies are sufficiently attractive of themselves, or presented in a form to give them position commensurate with their value and importance. But the general recognized basis of linguistic work of an advanced character is, and in the opinion of many of the best educators necessarily must be, in the study of the ancient languages. Without presuming to judge of the accuracy of the work done in the classes in the ancient languages, we could not escape the impression that the students' work in Greek and Latin was wanting in the vigor and enthusiasm required to make those studies strong and influential. This was partly true in Latin, but it was especially true in Greek. We find, from examination of the report of the Board of Visitors of 1891, that the same defects were then ob-

---

*University of Wisconsin.*

---

served, and we are compelled to believe that the interests of the University require a change of some kind in this department; whatever that change may be—and we must leave to others more competent to suggest its form—without it we can see no reason to expect that what may be called the literary side of the University will be able to hold its own against the deserved popularity of the scientific and practical studies.

Dated Madison, June 20, 1893.

(Signed)

G. M. WOODWARD,  
Chairman.

*To the Board of Visitors:*

Your committee appointed to examine into the "Relation of the University to the Accredited Schools" respectfully report as follows:

We have consulted the professors under whom students first enter the University, and have also procured the comparative average standing of all students for the first term after entering, which is as follows:

Average standing from accredited schools, . . . . .	.87
Average standing from other than accredited schools, . . . . .	.83
Average standing from all schools, . . . . .	.85

The standing is therefore in favor of accredited schools, and any suspicion that the system tends to lower the standing of the University is not warranted by facts.

There is, however, a feature connected with the system as it now exists, which, we believe, works to the detriment of our College of Letters, and we recommend that some measures be taken to meet it.

Out of ninety-two accredited schools listed in the catalogue, only eleven prepare students for the ancient classical course. These schools have become the principal feeders of the University, and yet eighty-one, or eighty-eight per cent., practically discriminate against one of the most important courses of study. No amount of ability or energy on behalf of the professors of Latin and Greek can compete with the other courses of study with this disadvantage to contend with.

A great university must keep pace with its sister institutions in all departments of study. We have at Chicago a formidable rival whose president is a specialist in the ancient classics, and our nearer neighbors do not seem to be letting this department fall behind. With able professors in the ancient classics, our institution is prepared to instruct large classes. Why let an evil strike at the very root of the department?

We therefore recommend that some method be devised to better encourage preparation for the ancient classical course, instead of leaving it to an unequal contest in accredited schools.

(Signed)

GEO. D. CILNE,  
Chairman.

On Grounds and Buildings we submit the report of T. M. Blackstock, chairman of committee thereon, approving thereof.

The rooms for the use of the various literary and debating societies are inadequate. Larger and more convenient quarters are much needed.

There can be no controversy in regard to the importance of this branch of work. We venture to suggest that as soon resources will permit, better quarters be provided.

Your attention has often been called to the status of the University Library. Doubtless this will receive your early consideration.

---

*Board of Visitors' Report, 1893.*

---

We are aware that all these suggestions call for the expenditure of large funds, but when the University ceases to need funds it will cease to grow and begin to decline. We believe the state of Wisconsin will not fail the University.

*To the Board of Visitors for the Year Ending June 30, 1893:*

The undersigned members of the sub-committee on Buildings, Grounds and Military Department, after having gone carefully over the entire grounds and made a thorough examination of all the buildings, beg leave to submit the following report:

#### 1ST. GROUNDS.

The grounds, including Dairy farm, are clean in perfect order and excellent condition in every respect, excepting Camp Randall, which we hope the Board of Regents will soon be able to have fixed up, and put in proper shape and condition for a first-class Athletic Field, so that the same can be used by the young women as well as the young men who may be students at the University.

#### 2D. BUILDINGS.

The dome and portico of the building known as University Hall is in bad shape, and ought to be repaired at once.

There is great need in same building for more recitation rooms, and although some changes might, and probably must, be made to answer for a short time, we are of the opinion that within the next two years it will be necessary to add a wing to each end of the building as recommended by President Adams in his report to the Board of Regents in January last.

The building known as Ladies' Hall ought to be changed over, enlarged, and a good elevator put in it, just as soon as it can be done.

This building in its present shape and condition is really unfit for the use to which it is put, and we hope the Board of Regents may soon be able to make the necessary changes and additions.

In regard to the building for the College of Mechanics and Engineering, and also the Chemical Laboratory, we need only say that we are pleased to know that they are to be enlarged, properly equipped and thoroughly ventilated.

The Law School Building is nearly finished, and will soon be ready for occupancy. It is commodious, well arranged and is unquestionably one of the best and most complete buildings of the kind in the United States.

The same may be said of the new Armory and Gymnasium, which is fairly under way, and will we hope be completed about the first of January next.

Your committee earnestly request the Board of Regents to pursue the same wise and liberal course in the erection of the New Horticultural Hall, for which we understand they are now getting plans.

The New Dairy Building, or "Hiram Smith Hall," as it is called, is, we believe, the best, most complete and perfect building of its kind in the world, but is now found, even at the end of the first year after its completion, to be entirely too small, and ought to be enlarged in some way and as soon as possible.

Building known as Library Hall is no longer fit for that purpose, but might, we think, be changed over, fitted up, and used for teaching music and kindred branches of study that are now being taught in some of the other buildings.

*University of Wisconsin.*

The library itself is entirely too small for the needs and requirements of the faculty and students, and ought to be enlarged.

In the opinion of your committee no university is complete or properly equipped without a good, large, first-class library, to which the faculty and all the students of every department can have free and easy access at all times.

It makes no difference how fine the grounds may be, how large, commodious and conveniently arranged the buildings are, nor how learned and able the president and professors may all be, it does not alter the fact that, without a good library, you cannot possibly have a first-class university.

The question then is, how can the University get such a library within a reasonable time, located in the right place and properly housed?

Your committee have given this matter special attention and careful study, and respectfully submit the following as being, in their opinion, the wisest and best thing to do:

Set apart the piece of ground known as the lower campus, upon which to erect the new library building, and into said building, when completed, move the valuable State Historical Library and the collection of books known as the University Library.

If this is done, and we hope it may be in the next four years, or sooner if possible, the University would have one of the largest, most complete, and valuable libraries connected with or belonging to any university in the United States, instead of the very small and poorly arranged one it now has.

In addition to the pressing need for a larger and better library for the University, there is still another reason why the plan we suggest should be adopted and carried out as soon as practicable, namely—

Because the State Historical Library, which, in many respects, is one of the best and most valuable in this country, is in an unsafe place, and if burned or destroyed in any way, it would be an irreparable loss, because it could not be replaced.

In conclusion, we wish to repeat in substance, and emphasize strongly, what we have said in a former part of this report, namely—

That the Board of Regents ought, in our opinion, to employ a first-class expert landscape engineer to lay out Camp Randall, in order that it may be made the finest and best athletic field belonging to any university in the United States; and that the grounds be laid out, arranged and fitted up with special reference to the needs and requirements of the female students, who really require the outdoor exercise as much and even more than the young men.

We have only words of praise for the Military Department. It is in excellent condition, we think, but we confidently expect even better results after the new armory and drill-room is completed and occupied.

(Signed)

THOS. M. BLACKSTOCK,

Chairman.

July 1, 1893.

In conclusion we would call attention to the fact that the University is growing with the rapidity of which every citizen of the state should be and is proud. But, as the institution receives very little income in the way of fees from students, it is dependent for adequate support upon leg-

---

*Board of Visitors' Report, 1893.*

---

islative appropriations. It is obvious that these appropriations must be increasingly liberal if its growth is to be maintained and continued.

All of which is respectfully submitted.

*University of Wisconsin.*

## REPORT OF BOARD OF VISITORS, FOR 1894.

*To the Board of Regents of the University of Wisconsin:*

GENTLEMEN:—The Board of Visitors for the year ending June, 1894, respectfully submit their report, as follows:

The Board met and organized February the 14th, at which time the following committees were appointed:

1st. COLLEGE OF LETTERS AND SCIENCE.—G. M. Woodward, J. H. Pratt, Mrs. Clara B. Flett, Mrs. Clara W. Everett, L. Fairchild.

2d. COLLEGE OF MECHANICS AND ENGINEERING.—D. J. Whittemore. E. C. Wiswall, W. H. Upham.

3d. COLLEGE OF AGRICULTURE, INCLUDING FARMERS' INSTITUTES.—T. M. Blackstock, J. R. Mathews, Rush Winslow.

4th. COLLEGE OF LAW.—G. M. Woodward, C. E. Dyer, J. R. Mathews,

5th. SCHOOL OF PHARMACY.—Rush Winslow, B. B. Northrup, W. H. Upham.

6th. SCHOOL OF POLITICAL SCIENCE AND HISTORY, INCLUDING UNIVERSITY EXTENSION.—J. H. Pratt, Mrs. Clara B. Flett, E. C. Wiswall.

7th. LIBRARY. LIBRARY HALL, AND THE RELATIONS OF THE STATE HISTORICAL LIBRARY TO THE UNIVERSITY.—C. E. Dyer, L. Fairchild, T. M. Blackstock.

8th. LADIES' HALL.—Mrs. Clara B. Flett, Mrs. Clara W. Everett, L. Fairchild.

9th. MILITARY DEPARTMENT AND PHYSICAL CULTURE.—W. H. Upham, Rush Winslow, D. J. Wittemore.

10th. RELATIONS OF ACCREDITED HIGH SCHOOLS TO THE UNIVERSITY.—B. B. Northrup, Mrs. Clara W. Everett, E. C. Wiswall.

11th. BUILDINGS AND GROUNDS.—J. R. Mathews, T. M. Blackstock, L. Fairchild.

At a meeting held June 6th, most of the Committees made reports which were discussed by the Board.

The reports of the Committees are herewith submitted.

Most of the members of the Board have visited the University several times during the year. All departments have been inspected, and it is

*Board of Visitors' Report, 1894.*

believed that the Board have gained as much information in regard to the condition and needs of the institution as could reasonably be expected.

We are impressed with the many unmistakable evidences of growth and prosperity apparent on every hand, and we heartily endorse the strong commendation of the University by the President and Board of Regents made by the last Board of Visitors.

*To the Board of Visitors:*

Your committee appointed to examine the College of Letters and Science have not been able to give equal attention to all of the numerous departments embraced under that head, and must of necessity confine their report to observations of a general character.

It has seemed to us, and we take pleasure in giving our impression, that there has been a general advance in the standards and improvement in methods. The number of students has increased in a satisfactory measure.

In the report of last year it was noted that linguistic and literary studies were not equal in power and influence to those studies classed as practical and scientific. We think that there has been decided improvement in this respect during the past year, sufficient at least to justify the belief that with suitable equipment and the presentation of equal opportunities the purely literary side of University education will prove as attractive to the youth of our state as to those of the older and wealthier states of the East. The improvement noted has not been attended by any decline of interest in practical and scientific studies.

All the literary departments of the College, we think, are fully supplied with competent instructors and equipment suitable for present needs.

In the department of ancient languages there is still something to be desired in the matter of attendance. The remedy for this, we think, must be sought, and, we doubt not, will in due time be found, in some readjustment of relations between the University and the high school system of the state.

As already suggested the interest in practical and scientific studies for which the University has long maintained a high position, has not declined. The attendance is maintained, and results apparent upon such examination as we have been able to give, indicate that the equipment is satisfactory and sufficient for all existing requirements.

We desire to say that the recently established Civic Historic course has proved to be very attractive to students during the past year. It has fully justified its establishment. We regard it as a very valuable addition to the curriculum of the University.

We do not feel called upon to make any particular or general recommendations. We learn with pleasure that during the past year the Board of Regents have promptly met all reasonable demands, and have no doubt that all other demands as they arise will be dealt with in the same liberal spirit.

Madison, June 19, 1894.

For the committee,  
(Signed) G. M. WOODWARD,  
Chairman.

*To the Board of Visitors, University of Wisconsin:*

Your sub-committee having under consideration the College of Mechanics and Engineering, submit the following report:

Evidence is had that an engineering building for class rooms,

*University of Wisconsin.*

draughting-rooms and laboratories is greatly needed; that a mechanician's services are required for the making and maintenance of apparatus; and it is further suggested that the establishment of a Department of Architecture be favorably considered; all of which would involve an increase of the annual funds of the Engineering Department of the college, and for the suggested Department of Architecture.

While we realize the financial condition of the University, and the necessary and paramount demands of its other departments render the construction of the suggested building at present impossible, yet in view of the continued rapid growth of the college, it is extremely important for the good standing of the university that the construction of an adequate building be commenced at the earliest practicable moment.

Respectfully submitted,

(Signed)

D. J. WHITEMORE.

#### SUB-COMMITTEE'S REPORT ON STATUS OF THE COLLEGE OF AGRICULTURE.

*Attendance.*—During the past year 173 students have been in attendance, two of them college graduates. There is every indication of a good class next year, 13 already having registered in the Dairy Course. About 350 students have now received dairy instruction with us in the past five years; one-half this number at least are at work in factories in this state.

*Faculty.*—Dr. H. L. Russell has been added to the faculty in the last year, his department being bacteriology. His work will be largely given to milk investigations.

*A Dairy Professor needed.*—At the time the Dairy School was urged by Hiram Smith there was nothing of the kind in America. Professor Henry and Dr. Babcock planned the present dairy building and the course of instruction, having nothing whatever in America to go by, nor was there anything like it in the old world. For five years past they have given this course of instruction one-half of all their available time. In that time Dr. Babcock has done very little chemical work. It is not fair to either of them to keep them longer tied to this one line so closely as they must be. The Board should employ a Professor of Dairy Husbandry. If the Board cannot get a man already prepared then they should pick out a bright, well educated young man and train him to the place. There are 2,500 creameries and cheese factories in the state. The letters of inquiry alone from these factories and students run from one to ten a day. These factories should be visited, the dairy interests should be better organized; the University should have a man who watches these and the school. Dr. Babcock could then go back to his dairy chemical investigations, and Prof. Henry as place as head of the school. To burden them longer with this double work is injustice to them and to the great dairy interests of the school and the state.

*The Horticultural Building.*—The College of Agriculture now occupies three buildings. The legislature appropriated \$14,200 cutting down the Board of Regents' request about one third. Horticultural building cost about \$23,000, everything coming within the original contract bid, and is large enough to accommodate that department for years to come. This work is appreciated more than most would suppose. A number of young men attended last winter for the especial purpose of preparing themselves for gardening. The small fruit interests in Wisconsin are not yet appreciated by our people. The shipping of fruits to the country northwest of us offers great possibilities. There are greater opportunities for money mak-

*Board of Visitors' Report, 1894.*

ing in small fruits in north central Wisconsin than there is in the south for early fruits.

*A Dairy Herd needed.*—The College of Agriculture now has but two dairy cows. A herd is needed for instruction and investigation. First, a new barn is needed and then a dairy herd. This herd might well be made up for the most part of good high grade animals just such as the practical dairy farmer should have. Then there could be pure bred specimens, one or two of each of the leading breeds for class instruction. Such a herd as this might be far better than to keep a pure bred herd of one breed only, or to try to carry herds of several breeds, an impossibility on a small farm.

*Marsh Lands.*—The University now owns about 25 acres of marsh. This is representative of thousands of acres in the county and tens of thousands in older agricultural portions of the state. It seems possible that these marsh tracts can be artificially drained and maintained as dry land at an expense warranted by our present agricultural conditions. If possible the Experiment Station should undertake investigations in this line. If these should have proved successful the marsh lands just beyond would become very valuable.

(Signed)

THOS. M. BLACKSTOCK.  
J. R. MATHEUS.  
RUSH WINSLOW.

*To the Board of Visitors:*

Your committee appointed to examine the College of Law would report, that they have found the College in a flourishing condition, showing a steady increase in the number in attendance. We think there has been improvement in the course of instruction, in its thoroughness and practical character. We have therefore no suggestions to make in regard to any change in the methods now in use.

The increase in attendance referred to, in view of the high reputation which the college has already obtained will no doubt continue in a steady ratio so long as the provision for instruction keep pace with the increasing requirements. The new law building is admirably adapted and appointed for all the purposes for which it was designed, and will probably be sufficient without addition or enlargement for some time to come.

But in the opinion of your committee, the College now needs, as a result of the increased attendance, present and prospective, an addition to the instructional force. The present corps of instructors do their work faithfully and well, as far as the time at their disposal will permit. But we think the Dean of the College is compelled to devote too much time to class work and to give instruction in too many topics, often spending three to three and a half hours per day in continuously hearing classes. With the present attendance, this leaves, in our opinion, something yet to be desired in order to promote efficiency and regularity in the course of instruction. We do not feel competent to formulate any specific recommendation to supply this deficiency. But we are informed that in other Colleges of Law in which the attendance is as large as it is here, it is customary to employ an assistant for the Dean, who gives his whole time to the work of instruction and assistance in the details of administration. We are satisfied that the appointment of an assistant dean, or the employment of an additional lecturer, to be chosen from the active members of the bar, is a reasonable re-

---

*University of Wisconsin.*

---

quirement of the College in its present condition, and we respectfully recommend that one or the other of these courses be adopted at once.  
 Madison, June 19, 1894.

For the Committee,  
 (Signed) G. M. WOODWARD,  
 Chairman.

No formal report was made by the committee on School of Pharmacy. The following letter from Dr. Winslow expresses the sentiment in a general way, of the Board.

APPLETON, WIS., June 18, 1894.

MR. E. C. WISWALL,  
*Secretary Board of Visitors.*

DEAR SIR:—I find at the last moment that I cannot be present at the meeting of the Board.

I am very much disappointed at not being able to go.

In regard to the report from the committee on Pharmacy, I hardly think a special report will be necessary as from the examination I made in two visits to the department, I found nothing to criticise, and no special improvements to suggest. I think with the improvements contemplated, and being carried out, that the School of Pharmacy, which is now doing good work, will do still better under the present conditions and management.

I have collected no data for a special report, but intended to have a conference with the professor and teachers of the department while in Madison during this meeting.

Yours respectfully,  
 (Signed) R. WINSLOW,  
 Chairman Committee on Pharmacy.

---

REPORT OF SUB-COMMITTEE ON DEPARTMENT OF POLITICAL  
 SCIENCE AND HISTORY, AND UNI-  
 VERSITY EXTENSION.

The committee on the Department of Political Science and History, and University Extension, is gratified to find a large and increasing number of students pursuing these courses. The total number of individuals in the various classes is 798. Six professors and associate professors and three fellows give class instruction to these students, and five specialists are engaged to deliver lectures before them. The lecturers can scarcely be counted among those who superintend the class instruction, so that the number of instructors for these 800 students must be regarded as nine, of which number three, who are fellows, give only a portion of their time to instruction. It would seem that the teaching force is scarcely adequate to do satisfactory work, especially in view of the probable increase in students next year. Your committee would suggest the advisability of providing additional instructors for this department, either, as has been already done, by

*Board of Visitors' Report, 1894.*

granting fellowships in the graduate department, or by securing additional professors, or both.

The work of University Extension has shown remarkable vitality in this year of financial depression. There has been about the same number of courses as last year. The classes are numerous and well attended, and the interest greater than before. Economics, English Literature, History and Bacteriology, have proved the most popular courses. If, however, the work is to be of permanent value, it is desirable that the way be in a measure prepared for the lecturers. It is believed that the adoption of the following plan would go far towards making the work of University Extension of enduring value to the people of the state:

1. There should be a secretary who would give his whole time to organizing the work, at least during the late summer and fall months. He should go from place to place, organizing extension circles and instructing them in methods of study; should see that they are provided with reading matter on the subject which they have selected, and to do other similar work preparatory to the visit of the lecturer. At present there is very little reading done preliminary to the course, and hence, people are not prepared to take full advantage of the opportunities offered by the lectures.
2. This secretary should be paid by the University, and his services should be free, except, perhaps, payment of local expenses by the communities visited.
3. Especial attention should be directed to developing an interest in subjects rather than in lecturers. At present, the chief anxiety of the circles is to secure certain men rather than certain topics. University Extension will not be on a firm basis until this feeling is reversed. The most effective way of securing this change is through a secretary.
4. The written and examination work needs to be developed. The permanent gains of University extension come largely through the development of thought and ideas by study and writing on a topic. It is almost impossible for the lecturer to do a great deal in this line unless he finds the class already prepared for him.

Respectfully submitted,

COMMITTEE.

### REPORT ON LIBRARY, LIBRARY HALL, AND THE RELATIONS OF THE STATE HISTORICAL LIBRARY TO THE UNIVERSITY.

April, 1894.

The rapidly growing library of the University is occupying quarters already far too small for its proper administration, and it is plain to be seen that with the accessions of another year or two, the officers in charge will find it impracticable even to display the books. It is impossible for the University to attain its highest measure of usefulness in the educational system of the state without a suitable library, housed in an adequate building, and conveniently situated for the use of faculty and students. Carlyle has said, "The true university of our days is a collection of books," and to the truth of this dictum everyone familiar with the conduct of any modern institution of advanced learning will eagerly testify. That the University of Wisconsin has already achieved much success is largely attributable, we feel convinced, to the presence in Madison of the deservedly famous library of the State Historical Society of Wisconsin, now numbering some 170,000 volumes. This library, whose growth has

*University of Wisconsin.*

more than kept pace with the growth of the University, has always been open, free, and under most liberal rules to both students and professors; indeed, the last Annual Report of the Society shows that upon an average somewhat over ninety per cent. of the users of the Society library each year are University people.

An inspection of the library of the Society in the state capitol, and an examination of its recent annual reports, convince the committee that it too is, as claimed by its officers, sadly in need of enlarged quarters. It has not actual space for the accessions of over four or five years more at the utmost, and is already much too cramped for the proper accommodation of its daily crowd of readers—one hundred persons and over often being almost literally packed in its reading rooms and alcoves. It appears that the rooms in the capitol occupied by the Society are greatly needed by the state government for legislative and administrative purposes. Again, grave doubts are entertained by architectural experts as to the structural safeness of that wing of the capitol, under the enormous and rapidly increasing weight of the library. The Society also strongly urges, and we think with propriety, that there is grave danger from fire in the present quarters, and that it is bad business policy, any farther than need be, to subject this enormous collection—having an undoubted market value of nearly if not quite a million dollars, but in reality priceless—to the many hazards which now surround it.

The State Historical Society, by statute, holds all of its property in sacred trust to the state. It is the incorporated trustee of the state and in no sense a private institution; its collections are the priceless possessions of the whole people. It is conceded that it is the duty of the commonwealth properly to house these collections. Bills having this object in view have been before the legislature during the past three sessions, and appear to be growing in favor—questions of financial expediency alone being urged against them.

Thus both the Society and University libraries are in imperative need of new buildings. Both are the property of the state, and it is eminently proper that the state should meet their needs. Ninety per cent. of the users of the Society library are connected with the State University; it is, and always has been, while a distinct institution, an important factor in the growth of the University, and in the advertisements of the latter the free use of the library has ever been urged as one of the chief attractions to intending students. But while the State Historical Library will always be largely used by University students, particularly by graduate students, and others engaged in advanced work, not strictly scientific, it is true that this literary storehouse is used by less than one-third of the entire body of students. It is a mile away from the campus, and the two-thirds lack either time or inclination to travel this mile. It is the experience of all colleges that the greater part of the library reading done by students is done in those occasional hours and half hours between classes and lectures, which now are often wasted by the students of our University because the principal library is too far removed from them.

The proposed placing of the University and the Society libraries under one roof is, it appears to us, the only advisable solution of the problem. The Society library should go where it would meet the convenience of ninety per cent. of its readers, a percentage that would be largely increased, by the way, were its library more convenient to the university, for the number of its University readers would at once easily be trebled. It is not likely that the state will ever consent to purchase a suitable site down town, at a cost of upwards of \$50,000; while by an arrangement entered into a year and a half ago, between the Regents and the Society, six lots are offered free, upon the lower campus. A union of the

*Board of Visitors' Report, 1894.*

two libraries under one roof—with, however, distinct ownership as at present—would be an eminently desirable arrangement for all concerned.

(a) First, there is the greatest good to the greatest number.

(b) Were the libraries in immediate proximity, with one common reading room, duplication of books would be avoided. At present in the effort of each to keep up a general reference library, an expensive duplication is constantly going on; thus is the money of the state frittered away to keep up two collections that are designed for practically the same constituency.

(3) The Wisconsin Academy of Sciences, Arts and Letters, at present inadequately housed in the capitol, has voted to remove its excellent but now almost inaccessible library—a strong and rapidly growing collection of scientific periodicals and transactions—to the joint building, if the latter is erected. Were all three reference libraries under the same roof, so that investigators could easily pass from one to the other, each could be built upon its own special lines—to the Academy could be left the collection of scientific periodicals and transactions, a work for which it is at present well equipped; the University could use its purchasing fund in the fields of literature and general science, while the Historical Library could devote itself exclusively to the department of history, in which it has already made its reputation. Near by, in the Law School building, is the new School of Economics, History and Social Science, with its own special library, which in time might profitably be moved to the new building. With all these special libraries, each intelligently and separately administered within one building, the combination would without doubt be the grandest collection of reference books west of the Alleghany mountains, reflecting credit upon all the institutions, and upon none more than upon the Historical Society itself, under whose expert general directorship they no doubt all would be placed.

(d) The Historical Museum and Portrait Gallery is an important adjunct of the State Historical Library. The 50,000 or more persons who now annually visit the former in the capitol, would find, upon reaching the proposed new site, that they were in immediate reach of the finely equipped geological and natural history museums in Science Hall, the University buildings themselves, and the Experimental Farm—in fact, nearly every point of interest under state support being in a convenient group.

(e) The relatively small number of users of the State Historical Society Library outside of University circles could easily be accommodated upon the excellent electric car line, by which the lower campus is reached from the capitol in an average of four minutes.

Approved,

LUCIUS FAIRCHILD,  
T. M. BLACKSTOCK.

MADISON, June 18, 1894.

The committee to inspect Ladies' Hall beg leave to submit the following report:

In our judgment, Ladies' Hall is not a suitable house for the young women of the University.

The rooms are too small for the number of occupants. The whole building is badly ventilated. The drainage is imperfect. The bathrooms need complete renovation. Halls are dark and floors badly worn.

*University of Wisconsin.*

Some of the rooms never receive any sunlight. Dining-room, kitchen and servants' quarters are entirely inadequate. One of the most pressing needs is an elevator.

In view of the fact that the young men have been provided with so commodious and elegant a gymnasium, we bespeak for the young women similar advantages.

We believe that physical education should receive attention, commensurate with its importance.

The building might, perhaps, be enlarged and remodeled to suit present needs.

In computing expenses of fuel and light for Ladies' Hall, it must not be forgotten that the entire Musical Department of the University has its quarters in the building. Here also the young women have all their gymnasium practice and rooms for literary societies.

(Signed) MRS. CLARA B. FLETT, Chairman,  
C. W. EVERETT.

To the Board of Visitors.

#### REPORT OF COMMITTEE UPON "THE RELATION OF ACCREDITED HIGH SCHOOLS TO THE STATE UNIVERSITY."

*To the Board of Visitors, University of Wisconsin:*

GENTLEMEN—Your Committee, to whom was assigned the subject of "The Relation of the Accredited High Schools of the State to the State University," would respectfully report:

1. An Accredited High School is one that has, through one of its officers, applied to the President of the University for examination, and has been examined by a representative of the Faculty and recommended by him, and has been placed upon the Accredited list by action of the Faculty upon the recommendation.

2. There are now upon the Accredited list of High Schools 93, of which 8 fit students for all the University courses; 20 for all the courses except the Ancient Classical; 15 for all courses except the Ancient Classical and English; 21 for all courses except the Ancient and Modern Classical; 3 for all courses except the Ancient and Modern Classical and English, and 26 for all courses except the Ancient and Modern Classical, General Science and Engineering.

3. The High Schools that fit students for all of the courses of the University are located at Beloit, Fond du Lac, La Crosse, Madison, Marinette, Milwaukee, Monroe and Oshkosh.

4. There are 21 schools that fit students for the Modern Classical and the other courses by substituting German for Greek in the Ancient Classical.

5. There are 18 schools not accredited for the English Course. The branches required for this course—in addition to those required for all courses—are: Ancient History, English History, English Literature, Physics, Physiology, Botany and adaptive work amounting to one daily recitation for two years.

Your Committee are surprised to find that such High Schools as those at Appleton, Beaver Dam, Delavan, Fort Atkinson, Racine, Sparta and Stevens Point are not accredited for the English Course, while those at Baraboo, Burlington, Darlington, Elkhorn, Lake Geneva and Waupaca fit students for all the courses except the Ancient Classical. It may be that those schools fully equipped to prepare students for the Classical

---

*Board of Visitors' Report, 1894.*

---

and Scientific courses took it for granted that preparation for these courses included or necessitated preparation for the English Course, and therefore did not apply specifically to be accredited for the English Course. The Committee are informed that the University credits no school for any course for which they do not ask to be accredited. Therefore, the relation of some of the High Schools to the University, as shown by the catalogue, and which surprises the Committee, may result from an omission or misunderstanding and not be an indication of a neglect of the fundamentals of instruction.

6. There are 50 of the Accredited High Schools that do not fit students for the Modern Classical Course. Preparation for this course requires, besides what is required of all candidates, Latin, English History, Ancient History and German. More than 50 per cent. of the Accredited High Schools do not embrace this moderate curriculum.

7. Twenty-six of the accredited schools do not fit students for the General Science and Engineering courses. Preparation for these courses requires—in addition to the general requirements for all courses—Physics, Botany, Physiology, German and adaptive work amounting to one daily recitation for two years. It thus appears that 27 per cent. of the Accredited High Schools do not fit young men to enter the College of Mechanics and Engineering.

8. In addition to the Accredited High Schools of Wisconsin there are 20 other accredited institutions, making the whole number of accredited schools 113. On the University register for 1893-4, 76 of these schools are represented by 223 students. As these students generally enter upon the four-year courses, this number, when compared to the number in the freshman classes, will indicate the extent to which the University depends upon accredited schools. In the freshman classes of the College of Letters and Science, and the College of Mechanics and Engineering, there are registered for 1893-4, 199 regular students, or 21 less than the number who have entered from 76 Accredited High Schools. Attached to the freshman classes are 97 special students. It is probably safe to say that 76 per cent. of the students now in the four-year courses came from the accredited schools.

9. There are 181 free high schools in our State. It thus appears that there are 88 not accredited. The explanation of this is found in the fact that 66 high schools have only a three year's course, while the University accepts no school with less than a four-year course. Some of these unaccredited schools rank high. Of the 93 Accredited High Schools about 40 are in charge of men who hold diplomas from Colleges of good standing. The other schools are in charge of graduates of Normal Schools or men who hold certificates of high grade.

Your Committee are unable to state how many principals of high schools are graduates from classical courses.

10. There are 60 schools accredited for the Ancient and Modern Classical courses, and there have been registered during the current year in these courses 142 regular students and 54 specials, making a total of 196.

There are 53 schools accredited for the English, the Civic-Historical and the General Science courses. In these during the current year there have been registered 290 regular students and 107 specials, making a total of 397.

The registration, in courses not classical, is twice as great as in the classical courses. The causes for this great disparity are various. There is a prevalent sentiment among the people that linguistic and literary attainments are less useful than scientific acquisitions. Then again there are comparatively few instructors that can fit students to enter a classical course, as many of those who hold teacher's certificates have studied neither Ancient nor Modern Classics. That students drift

*University of Wisconsin.*

into courses other than the classical because they find less to oppose their entrance can hardly be correct, since all courses require a four-year course for preparation. It is doubtless occasioned by a wrong estimate of the value of classical study.

11. The numbers who have graduated in the courses of the College of Letters and Science may, to some extent, indicate the relation of the Accredited High Schools to the University.

During the ten years from 1885 to 1894, both inclusive, counting the present senior classes as graduates, the number graduating from the College of Letters and Science were:

Ancient Classical	100
Modern Classical	193
General Science	154
English (last eight years)	183
Civic Historical (last two years)	41

There have graduated in the Ancient Classical Course during the last five years 10 more than during the preceding five years, showing an average annual gain of 2 graduates.

In the Modern Classical Course the gain for the last five years over the preceding five has been 16, an average annual gain of 3.1.

In the General Science Course the annual gain for the last five years over the preceding five has been 8 students.

The English Course has graduated students for the last eight years. During the last four years there have been 49 graduates more than during the preceding four years, showing an average annual gain of 12.25.

The Civic Historical Course has been organized only two years and is, therefore, omitted.

The gain annually of the Ancient and Modern Classical during the last five years has been 5.1 graduates. The gain of the General Science and English Courses shows an average annual gain of 20.25, or more than four times the annual gain of the classical courses.

There has been no considerable increase in the number of graduates from the Engineering School during the past five years. In Civil Engineering there has been an average annual gain of 3.2.

In Mechanical Engineering the number of graduates during the past ten years has been 47. Of these 21 students graduated during the first five years of the ten, leaving 26 for the last five, showing an average annual gain of one graduate.

In Metallurgical Engineering there have been 6 graduates during the past ten years, and during the same period there have been 9 graduates from the College of Agriculture.

In this connection we would append the following table:

*Graduates from 1885 to 1894, both inclusive.*

Year.	Anc. Clas.	Mod. Clas.	Civ. Hist.	Eng. lish.	Gen. Sci.	Civ. Eng.	Mec. Eng.	Met. Eng.	Rr. Eng.	Elec. Eng.	Agri.	Phar.	Law.
1885	8	16			13	6	5	2			1	8	19
1886	10	16			13	2	4			2	20	10	38
1887	9	22		7	10	2	4	4				14	41
1888	6	16		18	11	3	5					9	56
1889	12	18		24	10	4	3	1				20	74
1890	12	20		30	22	5	3				1	8	59
1891	11	22		30	13	8	7					16	62
1892	8	12		27	14	5	6				2	14	53
1893	12	22	15	36	19	8	7	1			1	14	79
1894	12	28	20	23	29	9	3			7	2	15	82
Totals	100	192	41	185	154	52	47	6		7	9	128	563
An av.	10	19.2	4.1	18.5	15.4	5.2	4.7	.6		.7	.9	12.8	56.3

*Board of Visitors' Report, 1894.*

The annual average for the past ten years has been:

College of Letters and Science .....	67.2
College of Mechanics and Engineering .....	11.2
College of Agriculture .....	.9
College of Pharmacy .....	12.8
College of Law .....	56.3
Average number of graduates annually .....	118.4

The foregoing relates to the four-year courses.

The School of Pharmacy admits students who present certificates of attendance for one year at "some standard high school or its equivalent from a similar educational institution."

The College of Law admits students upon an examination as to their ability to read and write correctly the English language; in American and General History; in the Constitution of the United States and the general features of the constitutions of the States, and in English Literature.

The ordinary courses in pharmacy and law extend through two years, but a four year's course is offered in pharmacy and a three year's course in law.

12. Your Committee are of the opinion, based upon the foregoing facts, that the accredited schools are better equipped for leading students to the threshold of the General Science and Engineering courses than to enter the Classical courses. While they do not underestimate the importance of the Scientific and Industrial courses, they regret that our secondary schools do not meet the reasonable demands of the University as regards English, Greek, Latin, German and French. They are of the opinion that the study of Greek and Latin under judicious and qualified instructors cultivates the memory, educates the reason, develops the judgment, exercises the taste and imagination, and gives precision in the use of language to a greater degree, in less time, than like results can be obtained by the study of any other branches of human knowledge.

They agree with the late President Porter, of Yale University: "If a youth is to be a ship carpenter, an optician, a practical engineer, or to pass his days in the details of some mechanical employment," in such cases a classical education may fairly be regarded as misplaced. But if the object of culture is to give a man the use of his faculties in their most serviceable state, to render him an intelligent and influential member of the community, then there is "in the dispassionate judgment of philosophy" no other method of training the mind better than that which takes classical instruction for the ground work. It is true the Greek and Latin are called the dead languages, but, as Hobbes expresses it, "they have put off flesh and blood only to put on immortality." Nor do your Committee undervalue the importance and utility of German, French and Anglo-Saxon.

They recognize the fact that a man needs some knowledge of these as well as of the Greek and Latin to enable him to use an English dictionary.

The fact has already been mentioned that 18 of the 93 accredited high schools are not accredited for preparation in English. It seems doubtful whether these schools accredited for the Modern Classical, the General Science and the Engineering courses, but not for the English Course, are doing work creditable to their management or profitable to their patrons. The conference on the study of English by ten distinguished professors and teachers, in their report to the committee on secondary school students, of which Dr. Eliot, President of Harvard, was chairman, say: "The conference is of opinion that the study of

---

*University of Wisconsin.*

---

English should be pursued in high schools for five hours a week during the entire course of four years. This would make the total amount of available time not far from 800 hours (or periods).

"The conference therefore recommends the assignment of three hours a week for four years (or 480 hours in the total) to the study of literature, and the assignment of two hours a week for the first two years and one hour a week for the last two years (or 240 hours in the total) to training in composition. By the study of literature the conference means the study of the works of good authors, not the study of a manual of literary history."

In conclusion your Committee would suggest to the Board of Visitors the following:

First: That they recommend to the Board of Regents the propriety of taking the steps necessary to have made a new list of accredited schools.

Second: That, in view of the fact that so little Greek is now taught in these, they endeavor to have more attention given to this language.

Third: That, considering the fact that the committee of ten, to which reference has already been made, give Latin a prominent place in the programmes prepared and recommended by them, in the English and Scientific courses as well as in the Classical courses, the Regents can safely follow the programmes endorsed by Dr. Eliot, Commissioner Harris, President Angell, and others eminent in educational work.

Fourth: That no school be placed upon the Accredited List in the programme in which English is not taught at least four hours a week during the four years' course, and that energetic and, if necessary, drastic means be adopted to secure at least respectable attainments in spelling, composition and legible writing before admitting a student to any College of the University.

It will be seen from the facts herein stated that the relation of the high schools of the State to the State University is one of paramount importance.

Our school system is designed to be an unit. From the University to the smallest primary school in a sparsely settled district there should be sympathy, harmony and unity of purpose. The power and influence of the University will thus permeate all the educational forces of the state and stimulate every school, and it may be also, every child in the state to higher endeavors and better work.

All of which is respectfully submitted,

(Signed)

BYRON B. NORTHROP, Chairman,  
C. W. EVERETT.

---

*To the Board of Visitors:*

The undersigned, your sub-committee on Buildings and Grounds, after a personal inspection of the same, would respectfully submit the following report:—

We find the grounds in very good condition, neat, clean, and well cared for, we find nothing on or about them to criticise and they reflect great credit upon those who have had charge of them for the past year. The foregoing also applies to the Dairy Farm which is a model of its kind.

During the present year the Board of Regents have appropriated about three hundred dollars for the improvement of Camp Randall as an athletic field; we commend the object for which the appropriation was made and hope that the Board may in the future, be able to complete the improvemnt of this entire piece of ground. This done, we be-

*Board of Visitors' Report, 1894.*

lieve the grounds to be, not only ample in extent, for all the needs of the University, but taken as a whole their convenience and attractiveness are cause for congratulation.

There is pressing need of some changes in University Hall, the building is entirely too small to accommodate the present large number of students and they, as well as the Professors, are laboring under great disadvantages for want of more room there. The interior arrangement of the building is bad, but as the construction is such that this cannot be overcome so as to afford more room without large expense we would recommend that the building be enlarged by erecting a wing on each side of it and these wings should be of such size and interior arrangement as to anticipate the needs of the University for some time to come.

The furnaces used for heating purposes in this building are worn out and almost worthless, they must be replaced by new ones or some other means of heating it be provided during the present summer. We would recommend that it be connected with the Central Heating Plant, and that the necessary heat for the building be furnished from that source. The building should also be provided with storm-windows before another winter, we believe that it would be a matter of economy to do this.

*North Hall.*—The interior of this building should be thoroughly overhauled and repaired before the commencement of the fall term. Heating it by the use of stoves should have been discontinued some time ago. We earnestly recommend that some improved method of heating, as well as thorough system of ventilation, be provided for this building during the coming summer, it should also be provided with storm-windows.

Science Hall and the Law School buildings are a credit to the State, and the friends of the University may well feel proud of them. They are new, in perfect condition and are well adapted to the purposes for which they were intended and for which they are being used, but we find that instead of anticipating the future, as had been supposed, by providing sufficient room in them for a long time in the future, they are already over crowded.

The new armory and gymnasium is about completed, and will be in a short time turned over to the Board of Regents; this is certainly a fine building, commodious, well arranged, complete in every detail, erected at a cost of about one hundred and twenty-five thousand dollars, it is one of the finest buildings of its kind in the United States.

The Horticultural building has been completed since making the last annual report. It is a fine building, costing about twenty-three thousand dollars; it is large enough apparently to meet the wants of the department for a long time in the future.

The only criticism of the new Dairy building, its condition and management, is that it is much too small, and should be enlarged as soon as funds can be provided for that purpose. The herd of cows on the dairy farm were lately found to be infected with tuberculosis, and twenty-eight out of the thirty in the herd killed. Twenty-six of these were found diseased. The herd have been kept in the basement of the dairy farm barn, and this basement is now, in all probability, thoroughly infected with a malignant form of tubercular consumption. Provision should be made at once for a new barn in which to keep the herd.

Library Hall is wholly unfit for the purpose for which it is now used. Not one good word can be said of it as a present home for the University Library. We deem it absolutely essential that a new Library building be erected at the earliest possible date, and we believe that the new building should not only be large enough to meet the

*University of Wisconsin.*

present necessities of the University, but to anticipate its demands for space in the future; also, it should be such in structure and appearance as to be a desirable and an inviting home for the State Historical Library. If the University could have such a building, we feel confident that in the near future it would be in possession of one of the largest as well as one of the most valuable libraries in this country. The benefits that the University would derive from the possession and easy access to such a library can scarcely be estimated.

The present Library Hall could be fixed up at a comparatively small expense, and used to relieve the over-crowded condition of some of the other buildings.

We are pleased to see that the addition to the College of Mechanics and Engineering is in process of construction; it is expected that it will be completed about the first of next October. This is a much needed and desirable improvement, and is being done in a very substantial manner, at a cost of about twenty-seven thousand dollars.

(Signed)

J. R. MATHEWS, Chairman.  
T. M. BLACKSTOCK.

The committee on Military Department and Physical Culture failed to make a report, much to the regret of the board. We endorse, however, the very favorable report on this department, made by the Hon. Thos. M. Blackstock one year ago.

All of which is respectfully submitted.

OF THE

**STATE SUPERVISOR**

OF

**INSPECTORS OF ILLUMINATING OILS**

OF THE

**STATE OF WISCONSIN,**

**For the Period Extending From Oct. 1, 1892, to Sept.  
30, 1894.**

**MADISON, WISCONSIN:  
DEMOCRAT PRINTING COMPANY, STATE PRINTER.  
1894.**

## LETTER OF TRANSMITTAL.

---

Office of the State Supervisor of  
Inspectors of Illuminating Oils,  
De Pere, Wis., Oct. 30, 1894.

Hon. George W. Peck, Governor.

Your Excellency:—I have the honor to transmit herewith my report as State Supervisor of Inspectors of Illuminating Oils for the biennial period ending September 30, 1894.

Very Respectfully,

A. M. KERSTEN,  
Supervisor.

## REPORT.

---

Hon. George W. Peck, Governor of Wisconsin.

Sir:—In accordance with the provisions of chapter 269 of the laws of 1880, I have the honor to submit the following, my second report as State Supervisor of Inspectors of Illuminating Oils, covering a period of two years ending September 30, 1894.

The list of inspectors has during the past two years been again increased. It comprises at present fifty well qualified and faithful officers, all of them thoroughly instructed in the duties of their office and always ready to answer calls for inspection at a moment's notice. They are—as will be seen from table No. 1, containing their names and post office addresses—stationed in such a way that every part of the state can be speedily reached by one or the other of them. In appointing these inspectors due consideration was given to fitness, place of residence, railroad connections and vicinity to the great tank oil stations now so generally erected in all parts of the state by the several refiners doing business within its borders.

In a few instances changes have been made in the boundary lines of inspection districts where the convenience of dealers or the efficiency of the service seemed to demand them. The county of Crawford has been detached from the Richland Center district and now forms with parts of Grant and Iowa counties the new district of Prairie Du Chien. Competent inspectors at this city and at Benton in the southwestern part of La Fayette county now look after the oil which comes in small lots into the state from Dubuque over the Ch., B. & N. Ry. and from Galena over the Ch. & N. W. Ry. and which formerly

---

*General Report.*

---

only too frequently escaped inspection by reason of the difficulty with which these parts were reached by the remote inspectors.

The oil tank system, which had begun to revolutionize the manner of distributing kerosene oil at the time of my last report has been still further extended. One or more large containers have been erected at convenient distances all over the more densely populated parts of the state and the quick distribution of illuminating oil is thereby greatly facilitated.

The Standard Oil Company and other refiners still continue to establish tank stations where the necessity for them arises and the system of distributing oil in tank wagons and in barrels from these bulk stations is fast nearing perfection.

Intentional violation of the oil laws has not been brought to my notice during the past two years. Dealers in general seem to fully comprehend the necessity and wisdom of those laws for the protection of life and property, and the majority of them evince laudable haste in complying with their letter and spirit.

Below is a list, giving the names of all the inspectors now in the service with their post office addresses in alphabetic order and the territory assigned to their jurisdiction.

*Inspectors and Inspection Districts.*

TABLE NO. 1.

*Giving names of inspectors, their post-office addresses alphabetically arranged, and defining the territory comprising their respective districts, as in force October 1st, 1894.*

Post-office Address.	Inspector.	Territory Forming the District.
Antigo.....	Edward Goebel.....	Langlade county and towns of Aniwa, Birnamwood and Eland Jc. in Shawano county.
Appleton.....	J. H. Kamps.....	Outagamie county, except the city of Kaukauna; the cities of Neenah and Menasha, and that part of New London lying in Waupaca county.
Ashland.....	Thomas Martin.....	Ashland and Bayfield counties.
Beaver Dam.....	Peter Beule.....	Beaver Dam and towns on the Ch., M. & St. P. Ry. from Minnesota Jc. to and including Fox Lake and Randolph.
Beloit.....	John J. Riordan.....	The southern tier of townships in Rock county and towns of Darien, Delavan Geneva, Linn and Bloomfield in Walworth county.
Benton.....	W. H. Nehls.....	The towns of Leadmine, Etna, New Diggings, Hazel Green, Cuba City, Jenkinsville, Strawbridge, Buncombe, Elmo, St. Rose and Benton in Grant and Lafayette counties.
Black River Falls.....	R. D. Squires.....	Jackson county and northern tier of townships in Monroe county.
Burlington.....	F. Reuschlein.....	Towns of East Troy, Spring Prairie and Lyon in Walworth county; towns of Waterford, Rochester and Burlington in Racine county, and the towns of Wheatland, Randall and Salem in Kenosha county.
Cameron.....	O. S. Hurlburt.....	Barron, Washburn and Sawyer counties.
Chilton.....	Henry Zech, Jr.....	Calumet county.
Chippewa Falls.....	Patrick Tierney.....	Chippewa county and towns of Thorpe, Lombard, Withee and Curtiss in Clark county.
Dé Pere.....	R. Weyenberg.....	City of De Pere and towns on the Ch., M. & St. Paul Ry. south to Askeaton.
Durand.....	J. J. Auer.....	That part of Pepin county lying east of the Chippewa river.
Eau Claire.....	Conrad Feige.....	Eau Claire county and towns on S. Ste. M. & S. W. Ry. from Fairchild to and including Mondovi.
Fond du Lac.....	John J. Ratz.....	Fond du Lac county except the town of Ripon; Green Lake county except towns on Ch. & N. W. Ry. and the city of Berlin; with the towns of Lomira, Leroy, Chester, Burnett, Williamstown, Theresa, Hubbard, Herman and Rubicon in Dodge county.

*Inspectors and Inspection Districts.*

TABLE NO. 1 — Continued.

Post-office Address.	Inspector.	Territory Forming the District.
Green Bay . . . . .	D. M. Hagerty . . . . .	Brown county except city of De Pere and towns on the Ch., M. & St. Paul Ry. south of De Pere; also Door county.
Hudson . . . . .	F. V. Eggloff . . . . .	Polk, St. Croix and Pierce counties, and that part of Pepin county lying west of the Chippewa river.
Hurley . . . . .	James Nicholson . . . . .	Iron county.
Janesville . . . . .	M. J. Dougherty . . . . .	Green county; Rock county except southern tier of townships; the south half of Jefferson county, and the towns of Whitewater, La Grange, Troy, Lafayette, Sugar Creek and Richmond in Walworth county.
Kaukauna . . . . .	P. Van den Boom . . . . .	City of Kaukauna in Outagamie county.
Kenosha . . . . .	M. J. Brady . . . . .	Kenosha county, except towns of Wheatland, Randall and Salem.
La Crosse . . . . .	W. S. Hanscom . . . . .	La Crosse, Buffalo and Trempealeau counties, except towns on S. Ste. M. & S. W. Ry.; Vernon county and towns on Ch. & N. W. Ry. in Monroe county, from Viroqua Jc. to the Vernon county line.
Madison . . . . .	Herman Gaertner . . . . .	Dane county; the towns on the C. & N. W. Ry. in Columbia and Sauk counties from Madison to and including Devil's Lake; the towns on the Ch., M. & St. P. Ry. in Iowa and Sauk counties to and including Prairie du Sac and Spring Green.
Manitowoc . . . . .	J. L. Edwards . . . . .	Manitowoc and Kewaunee counties.
Marinette . . . . .	J. A. Sommerville . . . . .	Marinette and Florence counties.
Marshfield . . . . .	Wm. Hirth . . . . .	Wood county and towns on Wis. C. Ry. from Marshfield to and including Medford, and to and including Greenwood in Clark county.
Menomonie . . . . .	Theo. Hoagland . . . . .	Dunn County.
Merrill . . . . .	Wm. Conners . . . . .	Lincoln county.
Milwaukee . . . . .	John McCoy . . . . .	Milwaukee and Washington counties.
Mineral Point . . . . .	John W. Horn . . . . .	Grant, Iowa and La Fayette counties.
Necedah . . . . .	G. N. Huckins . . . . .	Necedah township in Juneau county.
Neillsville . . . . .	F. A. Lee . . . . .	Clark county except towns on Wis. C. Ry.
New Lisbon . . . . .	Chas. A. Leicht . . . . .	Juneau county except towns on Ch. and N. W. Ry. and Necedah township with the towns on the Ch., M. & St. Paul Ry. in Monroe county from Oakdale to and including Sparta.
Oconto . . . . .	Daniel O'Keef . . . . .	Oconto and Shawano counties and towns of Clintonville, Buckbee and Marion in Waupaca county.
Oshkosh . . . . .	Henry Eckstein . . . . .	Winnebago county except cities of Neenah and Menasha, the towns on Wis. C. Ry. in Waupaca county, the town of Ripon in Fond du Lac county the city of Berlin and the towns on Ch. & N. W. Ry. in Green Lake county.

*Inspectors and Inspection Districts.*

TABLE NO. 1 — Continued.

Post-office Address.	Inspector.	Territory Forming the District.
Phillips.....	Geo. E. Sackett .....	Price county and towns of Westboro, Whiteseley and Chelsea in Taylor county.
Portage.....	F. W. Schulze .....	Columbia county except the towns of Lodi and Westpoint and the city of Columbus; also Marquette county.
Prairie du Chien.....	Emil Steiger.. .....	Crawford county; the towns on Prairie du Chien division of the Ch., M. & St. Paul Ry. from Prairie du Chien to and including Avoca; the towns on the Ch. & N. W. Ry. from Woodman to and including Fenimore and the towns on the Ch., B. & N. Ry. in Grant county.
Racine.....	Michael Colbert.....	Racine county except the towns of Waterford, Rochester and Burlington.
Rhineland.....	E. C. Sturdevant.....	Oneida, Vilas and Forest counties.
Richland Center.....	E. H. Parfrey.....	Richland county.
Sharon.....	J. B. Stupfell.....	Town of Sharon in Walworth county.
Sheboygan.....	Paul J. Pantzer.....	Sheboygan and Ozaukee counties.
Stevens Point.....	Frank Abb.....	Portage and Waushara counties and Wau-paca county except the towns on the Wis. C. Ry. and the towns on M., L. Sh. & W. Ry.
Walworth.....	O. P. Clarke* .....	Town of Walworth in Walworth county.
Watertown.....	August Tanck .....	North half of Jefferson county and towns on Ch. & N. W. Ry. to and including Juneau and towns on Ch., M. & St. Paul Ry. to and including Columbus in Columbia county.
Waukesha.....	J. J. Hughes.....	Waukesha county.
Wausau.....	Louis Hellraeth.....	Marathon county.
West Superior.....	M. C. French.....	Douglas county.
Wonewoc.....	H. F. Colburn.....	Towns on Ch. & N. W. Ry from Summit to and including Baraboo.

\*NOTE.—Since October 1st, 1894, inspector Henry Zoch, Jr., at Chilton, has resigned, and was replaced by G. N. Kersten; also, inspector O. P. Clarke, at Watworth, resigned, and H. K. Adams was appointed to fill the vacancy.

*Oil Inspected, 1893.*

The following two tables show the amount of oil inspected in each inspection district during each of the two years covered by this report:

## ACCIDENTS FROM THE USE OF KEROSENE OIL.

The law requires that inspectors furnish the state supervisor accurate data of all the accidents or explosions coming to their knowledge from the use of illuminating oils.

Inspectors are held to send in a report of an accident as soon as it has occurred, together with a sample of the oil which is supposed to have caused the accident, if such sample can be obtained, and the name of the dealer of whom said oil was bought.

At the close of the year they furnish the supervisor with their last monthly report a resume of all the accidents that have occurred in their respective districts during the fiscal year.

These inspectors' reports are before me and my free quotations from them given below will convince the sceptic that none of those accidents is directly attributable to the quality of the oil used, but that most of them could have been avoided with ordinary care and a little presence of mind.

In by far the most important because most densely populated and wealthiest district, the Milwaukee district, occurred 41 so called explosions and other kerosene accidents in the year 1892-93, and twelve during the year 1893-94. Some of these vulgo lamp explosions caused small blazes, none of them loss of life or great destruction of property. The burning of the Union Oil House and several other extensive fires that have visited the city of Milwaukee during the past two years have by some newspapers been reported as caused by lamp explosions, but without foundation.

This statement is taken from the records of the Milwaukee Fire Department, whose chief, Foley, investigated these cases as did also Oil Inspector McCoy, and both these gentlemen

---

*Accidents.*

---

agree that none of them was the fault of an inferior quality of oil, but that 75 per cent. of them were due to gross carelessness, such as unclean or poorly constructed old fashioned burners, overflow of oil stoves, using oil for kindling purposes, etc.

A very sad accident, connected with the loss of a young life, occurred in the family of Mr. Vandusen of Madison in July, 1893. The facts as brought out by a jury trial are about as follows: The victim, a young girl, seems to have poured oil from a partly filled two and one half gallon can into the fire of a kitchen stove. The immense flame originating appears to have set fire to her garments; and the heat exploded the can, igniting some wood piled up around the stove, which in turn set the kitchen on fire. When this was extinguished, the girl was found terribly burned and dead. The oil used in this case—a sample of which was also tested by Prof. Daniels of the State University—was found to be of 130 degrees fire test, and the jury holding the inquest, exonerated oil inspector and dealer.

Another fire in the Madison district, reported by the newspapers as the result of a lamp explosion, occurred in October of the same year, destroying the house of a Mr. A. Aris at Lodi. The owner on leaving his house in the evening to attend a social gathering, left a lamp with little oil in it, burning on a table. During his absence, his residence was consumed by fire, and nobody knows how the same originated.

A kerosene accident with fatal outcome, happened in Racine on August 14th, 1893. Inspector Michael Colbert gives the following history of the same: On the above named day at about 10:30, A. M., Mrs. William Nevins, residing at 910 Villa Street, lighted a small single burner kerosene oil stove, and neglected to fasten the lid on the reservoir. She placed a tin basin filled with water over the flame. Just as she turned from the stove, the basin which had not been properly bal-

---

*Accidents.*

---

anced, tipped over and in so doing, upset the stove, spilling part of the oil, which at the same time caught fire, over the floor. She immediately picked up the stove and threw it out of doors. In so doing, her garments caught fire. The lady then tried to wrap herself up in blankets to smother the flames. Her screams attracted some neighbors to her assistance, and the fire was extinguished. Her clothes were torn and cut from her body and medical aid was at once summoned. She was found to be burned from head to foot and after ten hours of intense suffering she expired. The oil stove did not explode and remained partly filled. Oil taken from it proved to be S. O. C's Diamond White, with a flashing point of 126 and a burning point of 150 degrees.

The only accident which was reported from the Marinette district is similar to the Van Dusen case in Madison, only still more serious, inasmuch as two mothers of families lost their lives thereby. Inspector J. A. Sommerville relates the sad details as follows: "On Thursday morning, April 20th, 1894, Wm. Doyle who with his brother-in-law, Mr. Cleary, occupied the dwelling on the N. W. corner of 4th Street and Terrace Ave., arose early to start the fire in the cook stove, and then left the kitchen. During his absence Mrs. Doyle arose and finding the fire unsatisfactory, poured from a can kerosene on the fuel and then placed the can on the hearth. The heat generated gas which ignited, exploding the oil can and scattering the burning oil all over the room, enveloping Mrs. Doyle in flames. She rushed frantically into the room in which her sister-in-law, Mrs. Cleary, was sleeping, imploring her assistance. In the efforts which followed, both women were burned to such an extent that death resulted in a few hours." The oil used in this case was in all probability, as near as could be ascertained, from a tank containing S. O. C's W. W. Wis. of a test of 128 degrees.

---

*Accidents.*

---

On the 18th day of January, 1893, fire consumed the Riverside House, a large three-story frame hotel at Chippewa Falls. The fire originated in the third story of the hostelry, from the upsetting of a just-filled kerosene lamp in the hallway. The contents of the lamp were spilled over the floor, and caught fire which ignited the woodwork, but several boarders succeeded—as they believed—in putting the fire out. When the department arrived all was quiet again and the firemen returned. Ten minutes later, fire was detected between the partitions, evidently from burning oil which had flowed under the base board; and before the fire department could reach the scene a second time, the whole attic was in a blaze. It soon became evident that the structure was doomed. No life was lost and most of the furniture was saved, the building itself being a total loss. The oil used in the lamp causing the accident was Eocene, one of the better grades of oil.

Inspector Henry Eckstein of Oshkosh reports two kerosene accidents for the biennial period 1892-94. On February 8th, 1893, fire caused by the falling of a lamp from a shelf destroyed the clothing store of Messrs. Ulrich and Knoblauch. The oil burned in this lamp was Wisconsin Water White of 130 degrees. Another smaller blaze occurred at the residence of Mr. H. Derricks, 175 Ofter Street, on March 10, 1894. In this case, a lamp containing Eocene oil of 150 degrees fire test, was upset on a stove, and the oil, spilling, caught fire from the stove.

---

I have in the above endeavored to give a fair selection from the list of accidents reported to me by the oil inspectors for the period from October 1st, 1892 to September 30th, 1894. I have narrated all the kerosene accidents connected with loss of life. I believe that impartial observers will agree with me,

---

*Accidents.*

---

that all the cases adduced were either accidental, pure and simple, or due to utter neglect of the most ordinary precaution. None of these accidents were brought about by the use of an inferior grade of oil, but about as many of them happened with 150 degree oil as with oil 130 degrees. I am indeed getting daily more and more convinced of the fact that any oil from which the lighter hydrocarbons are removed and which is of sufficient density,—in other words, oil which does not yield inflammable vapors causing it to flash below 110 degrees F. or to burn below 120 degrees F., may be considered reasonably safe for illuminating purposes. In order to prove that most of the oil used in our state at the present time is even far above the legal standard of 120 degrees F. fire test, I give here with the official figures of all the inspections made in the months of October, 1892, and October, 1893, respectively, as taken from the monthly reports of the inspectors.

I select the month of October because it is the month in which the winter supplies of oil are principally laid in, the inspections during this month generally far exceeding those of any other month in the year.

During October, 1893, 27,417 barrels of oil were inspected throughout the state. Of this number, 9,244 1-2 barrels, or more than 1-3 were 150 degree oil or better (175 degree head light). 1,462 barrels were only slightly above legal test, i. e., 120 degrees, while the remaining 16,710 1-2 barrels received the brand 130 degrees F. For October, 1893, the showing was still a great deal better. Of 32,016 1-2 barrels inspected during the month, 18,465 barrels, or nearly 60 per cent. were 150 degrees fire test; and, of the remaining 12,551 1-2 barrels, only 659 barrels had to be branded 120 degrees or legal test, all the rest standing a fire test of 130 degrees.

From several of the larger districts as Sheboygan, Appleton and Hudson and from a number of smaller ones no kerosene

*Conclusion.*

---

accidents have been brought to my knowledge, and this is quite gratifying.

In conclusion I wish to thank the Oil Inspectors for the faithful performance of their duties. It gives me pleasure to testify that the services rendered by them almost without exception, have been prompt and efficient, quite satisfactory, not only to me, but also to refiners and dealers in all parts of the state, who have repeatedly expressed themselves to me, that although the inspectors have acted without fear or favor, they have never neglected proper courtesy and politeness.

The codification of the oil inspection laws, which has been a feature of the last two biennial reports and which has proved a matter of convenience for handy reference, is again appended to this report.

Very Respectfully,

A. M. KERSTEN, M. D.,

Supervisor.

De Pere, Wis., October 15th, 1894.

## THE OIL INSPECTION LAW.

The several acts relating to the inspection, sale, and use of illuminating oils in the state of Wisconsin, are contained in Chapter 269, of the Laws of 1880, Chapter 288, of the Laws of 1881, Chapter 158, of the Laws of 1883, and Chapter 440, of the Laws of 1889.

For the convenience of those having occasion to refer to these laws, the following codification of the same is presented:

Section 1. The governor of this state shall, by and with the advice and consent of the senate, appoint a suitable person, who shall be a resident of this state and not pecuniarily interested, either directly or indirectly, in the manufacture, refining, sale or vending of illuminating oils from petroleum or other sources or material, who shall perform the duties of state supervisor of inspectors of illuminating oils as hereinafter provided. The state supervisor so appointed shall hold his office for a term of two years, from the first day of April in the year of his appointment and until his successor shall have been duly appointed and qualified, unless sooner removed from office by the Governor; and in case of vacancy in this office from any cause, the Governor shall fill the vacancy for the balance of the term.

Section 2. It shall be the duty of the said supervisor faithfully to supervise all inspectors of illuminating oils in this state, instruct them in performing the duties of their office, keep a record of the local inspectors' reports to him. He shall prepare, or cause to be prepared, suitable and uniform designs for brands or stencil plates, to be used under the provisions of this act, and he may furnish such brands or stencil plates to all inspectors of oils at their proper cost and expense. Every inspector of illuminating oils appointed as hereinafter provided, shall, on the first day of each month report to the state supervisor of inspectors a full statement of the number of barrels of oil inspected, the result of such inspection, and an account of the actual receipts of his office, and he shall at the same time remit the sum of two cents for each barrel of oil he has tested during the preceding month, which payment

---

*The Oil Inspection Law.*

---

shall be the salary of the supervisor of inspectors of illuminating oils, and no other allowance shall be made for the expense of his office. Every inspector shall faithfully comply with all instructions issued by the supervisor of inspectors of illuminating oils, and shall furnish to him full information regarding any accident or explosion that may come to his knowledge from the use of illuminating oils, and the said supervisor shall report to the governor annually, in October of each year, and two thousand copies of the same shall be printed by the state printer for the use of the legislature.

Section 3. The state supervisor of inspectors of illuminating oils shall appoint, in accordance with the provisions of this act, inspectors of illuminating oils, who shall examine and test all illuminating oils offered for sale or for use in this state by any person whatsoever, and shall demand and receive all fees in payment for such examining and testing, and who shall be liable to all the penalties hereinafter provided for any neglect, or for any wilful misconduct or malfeasance in the discharge of the duties aforesaid; and the said state supervisor shall have power at any time to remove any inspector so appointed upon reasonable notice for reasonable cause. And the said supervisor and all inspectors appointed under the provisions of this act shall, before entering upon the duties of their respective offices, take an oath or affirmation faithfully to discharge the duties of the same as prescribed by the constitution and laws of this state, and the said supervisor shall execute a bond to the people of the state in the sum of two thousand dollars (\$2,000), conditioned for the faithful performance of all the duties imposed by this act, said bond to be filed in the office of secretary of state; and every inspector appointed under this act shall execute a bond to the people of this state in such sum not exceeding two thousand dollars (\$2,000), as may be fixed in each case by the state supervisor, conditioned as aforesaid, such bond to be filed in the office of the clerk of the county wherein the inspector executing the same shall reside, and the duplicate copy thereof duly certified by the county clerk shall be filed in the office of the state supervisor; and all bonds executed under the provisions of this act shall be for the use of all persons aggrieved by the acts or neglect of the state supervisor, or of the inspectors respectively executing the same. The sureties on the bond of the

---

*The Oil Inspection Law.*

---

state supervisor shall be approved by the secretary of state, and the sureties on the bonds of the inspectors shall be approved by the judge of probate in the counties in which the inspectors executing the same shall respectively reside; it shall be the duty of every inspector appointed under the provisions of this act to provide at his own cost and expense all the necessary instruments and apparatus for examining, testing and branding illuminating oils under the provisions of this act, and promptly to examine or test, when called upon for that purpose, any oils offered for sale, or for use for illuminating purposes; and if upon such examination or test, such oils shall be found to meet the requirements of this act, he shall affix to the package, cask or barrel containing the same, a brand or device containing the word "approved," with the date of testing over his official signature upon the package, cask or barrel containing the same, and it shall be lawful for any person to sell the same as an illuminating oil within this state, but if the oil so tested shall not meet the aforesaid requirements, he shall brand in plain letters on the package, cask or barrel containing the same over his official signature, the words, "rejected for illuminating purposes in the state of Wisconsin," with the date of testing thereof, and it shall be unlawful for the owner thereof to sell such oil for illuminating purposes; and said brand for the approval of oils shall further contain such device indicating the test of such oils as the state supervisor may direct. The term cask, barrel, package or sample of oil as used in this act, shall be held and taken to mean a quantity not exceeding that contained in an ordinary commercial barrel, estimated as capable of containing about fifty gallons.

Section 4. And to more effectually carry out the provisions of this act, it shall be lawful for any inspector to enter into or upon the premises of any manufacturer, refiner, or vender of such illuminating oils, and if he shall find or discover, upon said premises, any oil which shall not have been examined or tested and properly marked or branded under the provisions of this act to examine or test, and thereafter properly to mark the same as herein provided.

Section 5. Any illuminating oil which on the application of a well lighted taper or similar flame, will take fire and burn at a temperature below that of one hundred and twenty

---

*The Oil Inspection Law.*

---

degrees above the zero point of Fahrenheit's thermometer (120 degrees Fahr.) shall be deemed unfit for illuminating purposes, and the cask, barrel, or other package containing the same, shall be marked "rejected," as hereinbefore provided.

Section 6. In all tests of illuminating oils made under this act, the tester heretofore in use in this state may continue to be used, but the cover of the same shall be removed and the oil cup shall be filled to within one fourth of an inch of the top thereof, or as nearly full as it is practicable to fill it without causing the oil to overflow in making the test, provided that the tester known as the Tagliabue open cup or commercial tester, may be substituted in the lieu thereof; and in using the tester, the oil shall not be heated after it has attained the temperature of one hundred degrees Fahrenheit, faster than at the rate of three degrees per minute, and the flame of the lamp shall be so adjusted as that the rise in temperature shall be as near to two degrees per minute as is practicable, and the taper used in making the test shall be such as shall give a clear flame, as nearly uniform in size as is practicable, and the state supervisor shall give such instructions as in his judgment shall be necessary to secure uniformity in the methods of making the test.

Section 7. Every person appointed as an inspector under the provisions of this act, shall be entitled to demand and receive from the owner or other person for whom, or at whose request, he shall examine or test any oil or sample thereof, the sum of ten cents for every single cask, barrel, package or sample of oil he shall test, and the said fees for examining or testing shall constitute a lien on the oil so inspected; provided, that if the total amount of fees received by all inspectors in every county, in any one year, dating from the day upon which this act shall take effect and be in force, shall after the payment of the supervisor's fees, exceed the sum of two thousand dollars, all sums in excess thereof shall be paid into the hands of the state supervisor of inspectors, and the state supervisor shall disburse the same as follows: First. He shall pay to each inspector appointed under the provisions of this act, a sum sufficient to increase his compensation to the sum of twenty-five cents upon each package, cask or barrel inspected by him in lots of less than ten barrels tested at one time, during said yearly term, provided that if there be

---

*The Oil Inspection Law.*

---

insufficient funds to pay such increase in full, then the same shall be paid pro rata, as herein provided, in proportion to the number of barrels inspected. Second. Any sum remaining in the hands of the supervisor, shall be paid pro rata to all inspectors appointed under the provisions of this act, in proportion to the number of barrels by each inspected during said yearly term; provided, that neither the supervisor of inspectors, nor any inspector, shall receive more than three thousand dollars; and the disbursements required in this section shall be made as soon as practicable after the close of each yearly term; any sum then remaining shall be paid into the state treasury for the benefit of the general fund.

Section 8. It shall be the duty of every inspector appointed under the provisions of this act to keep a true and accurate record of all casks, barrels or other packages of oil, examined or tested by him, which record shall state the time and place of inspection, the number of casks, barrels or other packages of oil then and there examined or tested, the name of the person for whom or at whose request such examination or test was made, the mark or brand affixed to the casks, barrels or other packages, together with any further facts that may seem to him worthy of record, such account to be open to examination by any person who may so desire, and all illuminating oils manufactured or refined in this state shall be inspected, examined and tested, as herein provided, before being removed from the premises of the manufacturer or refiner.

Section 9. No inspector appointed under the provisions of this act shall, during his term of office, traffic, either directly or indirectly in any oil used for illuminating purposes, or be interested in any manner whatever, in the manufacture, refining or sale of such oil, and any inspector violating the provisions of this section shall be removed from office immediately upon proof of such violation, and be liable to a penalty of not less than five hundred dollars; provided, the provisions of this section shall not apply to inspectors whose inspections during the term of one year shall not exceed two hundred and fifty barrels.

Section 10. Any person who shall, either personally or by any clerk or agent, sell or offer for sale, or for use, or who shall in any manner dispose of or attempt to dispose of any oil for illuminating purposes, which shall not have been exam-

---

*The Oil Inspection Law.*

---

ined or tested under the provisions of this act, or which, having so been examined or tested, shall have been marked as rejected; or who shall knowingly use or furnish for use for illuminating purposes any oil which shall not have been properly examined or tested as herein provided, shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be liable to a penalty of not less than five dollars nor more than five hundred dollars, and any person so offending against the provisions of this act shall be responsible in damages to the party injured, in the event of injury arising or growing out of the use of any oil so offered or provided for sale or for use, and any person who shall falsely brand or mark any cask, barrel or other package of oil, or who shall change or alter in any way or manner any brand or mark or device affixed to any cask, barrel or other package of oil by any inspector duly appointed under the provisions of this act, or who shall re-fill and use any cask, barrel or other package having an inspector's mark or brand thereon, without obliterating the inspector's brand, and having the oil in such cask, barrel or other package properly examined or tested, under the provisions of this act, shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be liable to a penalty of not less than five dollars nor more than five hundred dollars, or to imprisonment in the county jail for a period of not more than six months, or to both such fine and imprisonment, in the discretion of the court. And any person who shall sell or in any way dispose of any empty cask, barrel or other package bearing an inspector's brand, without first thoroughly cancelling, effacing or removing such brand, shall be deemed guilty of a misdemeanor, and upon conviction thereof, shall be liable to a penalty of not less than five dollars nor more than five hundred dollars, or to imprisonment in the county jail for a term not exceeding six months, or to both such fine and imprisonment in the discretion of the court. And any person who shall willfully adulterate any illuminating oil by adding thereto benzine, naphtha, paraffine oil or any substance or thing whatever, shall be guilty of a misdemeanor, and upon conviction thereof shall be punished by fine or by imprisonment, or by both fine and imprisonment as hereinbefore provided.

Section 11. It shall be the duty of all inspectors appointed under the provisions of this act who shall know of any viola-

---

*The Oil Inspection Law.*

---

tions of any part thereof, to notify the district attorney of the same, who shall make complaint before any court of competent jurisdiction, and it shall be the duty of all prosecuting attorneys to represent and prosecute on behalf of the people within their respective counties all cases of offense arising under the provisions of this act, or of any section thereof; and any inspector who shall have knowledge of any violation of this act or of any section thereof, and who shall fail to enter complaint against the person or persons so offending shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be liable to a penalty not exceeding fifty dollars, and shall be removed from office; and in case the death of any person or persons shall result from the explosion of a lamp or other vessel containing oil sold or used or furnished for use in violation of the provisions of this act, or of any section thereof, the person selling or furnishing said oil for use shall be deemed guilty of manslaughter in the third degree, and upon conviction thereof, shall suffer the penalty in that case made and provided by the revised statutes of this state. Nothing contained in the provisions of this act shall be so construed as to prevent merchants in this state from keeping in their warehouses for trans-shipment to other states, or from trans-shipment to other states and territories illuminating oils of a grade below the standard test prescribed in this act.

Section 12. It is hereby declared to be the true intent and meaning of this act, that the terms oils, illuminating oils, oils used for illuminating purposes, and all similar words, terms and expressions used herein shall be held to mean any mineral or petroleum oil or any fluid, or substance which is the product of such oil, or of petroleum, or in which such oil, or fluid or substance so obtained shall be a constituent part, by whatsoever name or title such oil, fluid or other substance may be known or called.

Section 13. All acts or parts of acts, inconsistent with or contravening any of the provisions of this act are hereby repealed.
