**emotional
equilibrium
for the geriatric patient**

Thousands of doctors know that **BENZEBAR*** allays the mental depression, apprehension and nervousness so frequently found in the elderly patient.

'Benzebar' is S.K.F.'s logical combination of **Benzedrine*** Sulfate and phenobarbital. It provides the unique improvement of mood of 'Benzedrine' Sulfate and the calming, soothing influence of phenobarbital. These two established agents work together to restore the elderly person's zest for life and living, to quiet his nervousness and, at the same time, to keep him from overdoing.

Each 'Benzebar' tablet contains: 'Benzedrine' Sulfate, N.N.R. (racemic amphetamine sulfate, S.K.F.), 5 mg.; phenobarbital, $\frac{1}{4}$ gr.
