President C. A. Dykstra
The University of Wisconsin

Dear President Dykstra:

Permit me to submit herewith, for
transmittal to the Regents of the University,
a report upon the Summer Session of 1937.

Very respectfully,

S. N. Goodright
Dean of the Summer Session

October 15, 1937

The Report

Nota Bene:

This report, with the accompanying itemization of expenditures, is intended to give a complete picture of the use made of the budget which was granted for the Summer Session of 1937. It will not tally with the annual report of the Business Manager for the reason that the latter covers a fiscal year only, whereas the expenditures of a summer session budget cover parts of two fiscal years. However, all expenditures here noted have been carefully checked with the records of the business office and of the accountant, the table of receipts has been supplied by the cashier, and there is in reality no discrepancy between this report and the university accounts.

Accompanying the report and supplementary to it is an Itemized Statement of Expenditures, showing complete details of the salary budget and the distribution of other expenses. The report contained in the following pages carries chiefly summaries and totals.

Statistical tables are appended to this report covering:

- I. Summary of Total Expenditures of the Summer Session for the past four years.
- II. Summary of Total Receipts of the Summer Session for the current year.
- III. Comparison of Cash Receipts with Cash Expenditures and Average Net Cost per Student Enrolled.
- IV. Analysis of Attendance.
 - a. By Colleges for the past four sessions.
 - b. By Colleges and Sex, for the current session only.
 - c. By Graduate and Undergraduate Registration; showing also attendance of long session students as compared with that of students enrolled for the summer session only.
 - d. Enrollment of Teachers, classified as to degree held and type of position.
 - e. Summary by Colleges, Classes and Sex; showing also attendance of long session students as compared with that of students enrolled for the summer session only.
 - f. By States and Foreign Countries.
 - g. Students Taking Teacher Training Courses or Education Courses.
- V. Estimated Cost per Credit of Instruction only, by departments and colleges.

Financial Aspects

Total receipts: \$145,285. Total expenditures: \$138,133.
Balance: \$7,152. (See statistical tables I and II below.)

The above statement excludes:

1. Infirmary receipts, paid by the students as part of their fees: \$8,862.
2. Union receipts, ditto: \$6,414.
3. Expenditures for and receipts from the Courses for Workers in Industry--see the separate statement appended to this report.

For the past four years, the Summer Session has shown a substantial profit each year, \$10,000 in 1934, \$13,000 in 1935, \$12,000 in 1936, and \$7,000 this year. This has been due largely to two factors: First, salaries for teaching (15 percent of the annual salary) have been low because of the heavy waivers in the higher brackets, and, second, because our income from fees has not been lowered. There has been a considerable increase in enrollment each year until this summer, and the staff, calculated each time on the basis of the preceding registration, has not been proportionately increased when the heavier enrollments came, but has carried on with the aid of a few readers and assistants at the points of overloading. It has been a situation that was gratifying financially, in times of heavy strain on the University budget, but it has not been sound educationally. It is the writer's belief that higher education in a state university should not be required to be self supporting. In no other teaching division of the University is it the case. Least of all should such a requirement be made regarding graduate teaching, and the enrollment in the Graduate School is 50 percent larger in summer than during the semesters.

These observations are not by way of complaint because we have shown a profit in recent years. On the contrary, every one connected with the session is pleased that it has been able to demonstrate its worth in time of stress and has aided the University cause. The point which should now be emphasized is that, in all probability, the restoration of annual salaries to higher levels throughout the University this year will preclude the possibility of continuing to show a profit. A deficit, the size of which it is difficult to estimate, but which should never be large, will presumably be incurred each year hereafter, if we offer adequate, high-grade instruction. This is as it was in more normal times, before the depression. Every care will be taken to forestall a deficit for the coming year and to try to break even. After that, it is our hope that the Regents will lift the requirement of self support and that the Summer Session will be

restored to its former place in the biennial legislative requests.

Attendance

The consistent increases in attendance, 500 each year in 1934, 1935 and 1936, were rudely halted this summer when we registered a loss of seven. There was a total enrollment (minus withdrawals) of 4559 last summer, and of 4552 this summer. These figures show bona fide summer session registrations only. If we were to include several hundred high-school musicians registered in the three-week music clinic and the pupils in the six-week laboratory school, our total would be well over 5,000.

Last year, there were registered 2,387 persons holding a degree, bachelor's or higher; this year, the number was 2,344. Last year, 1,770 of these graduates were registered in the Graduate School; this year, the number decreased to 1,707.

The reason for this loss in graduate registration--it had jumped nearly 300, or 20 percent, the year before--is, in the belief of the writer, to be found in the type of competition offered by two neighboring institutions, Michigan and Northwestern.

For many years, the standard requirement for the M. A. degree in this country has been one full academic year (at least thirty-six weeks) of satisfactory graduate work. With this standard there was virtually universal compliance, until Teachers College of Columbia University began some years ago to offer a "cheap" M. A. degree, obtainable in four six-week summer sessions. The arrangement has been roundly criticized in educational circles, and nowhere more rigorously than among the deans and directors of summer sessions; but Columbia, the Colossus of summer sessions, enrolling from 12,000 to 15,000 each summer, has been impervious to criticism and has continued the practice.

Last year, to the amazement of most educators, Northwestern and Michigan came out with a plan that is even more attractive bait to a teacher looking for an "easy" M. A. degree. They both have summer sessions of eight weeks each, and they now offer an M. A. that is obtainable in three summers of eight weeks each. Michigan's registration has jumped by 1,000 in the past two summers, and she claims a graduate registration of 2,765 for 1937. Northwestern's registration figure has climbed by more than 1,300 in the two years, and she claims 2,346 graduates enrolled last summer. To make the situation even more disadvantageous for us, Northwestern has been carrying on a vigorous recruiting campaign in southeastern Wisconsin, particularly in Milwaukee, Racine and Kenosha. This campaign is conducted by their extension men among the teachers of those cities. The total number of our registrants who classified themselves as teachers was 2,630 in 1936 and 2,598 in 1937.

Undoubtedly, we are losing graduate and teacher patronage to both these competitors. It is, of course, quite impossible to forecast with any high degree of probability the immediate or the long-run effect of this unfair competition. Wisconsin will not, it is safe to assume, lower her standards and cheapen her degree to compete on an equal basis. The problem of predicting our future attendance and of judging the size of the staff to be retained is, therefore, considerably complicated. And this factor of cut-throat competition renders still more improbable our chances of being able to remain on a self-supporting basis.

Publications Fee

For a number of years, the Summer Cardinal has been published twice per week during the session as an independent publication, to which students were asked to subscribe, and we published a directory of summer session students which was placed on sale to students. The Cardinal subscription list was small and the directory was issued so late in the session that its usefulness was much impaired. Further, our daily program of public lectures worked a positive hardship on the Cardinal if we published the program separately and distributed it gratis, and the program was quite ineffective when published in the Cardinal, because of its limited circulation. And, finally, the student editors of the Cardinal couldn't, apparently, grasp the idea that the summer clientele is an older group with interests that differ widely from those of the undergraduates of the winter terms, to whose tastes the Cardinal tries to cater.

As a solution for all these difficulties, we adopted, with Regent approval, a plan this year of collecting with the other fees a publications fee of fifty cents from each registrant. With the money thus obtained, the Summer Session leased the Cardinal, employed Mr. Robert Foss of our press bureau to edit it, placed 5000 copies of each issue on free distribution about the campus, secured thus wide circulation for our public lecture programs, and also distributed the directory free of charge. Also, the directory was run serially in the Cardinal and published later in book form, so that the material was available to students at an earlier time.

The most essential advantage, however, was the change in the character of the Cardinal. It really catered to the educational interests of the large groups of graduate students and teachers, and was a decided improvement over the papers of former years. The entire arrangement seems to have met with approval on all sides, and its continuance is hereby recommended.

Student Health

Our department of medical care and supervision of the health of students renders admirable service in the Summer Session. There were no student deaths during the summer, but more than 3,000 visits were made by students to infirmary physicians, and there was a total of 662 days of hospitalization recorded. The following statistics are supplied by Dr. L. K. Cole, head of our student health service:

The Division of Social Education

Under the competent leadership of Director Porter Butts, Assistant Director Willard Blaesser, and Mrs. Watrous, the hostess, the Division of Social Education and the Union made a real and highly appreciated contribution to the work of the Summer Session. They cooperated early in the issuance of a most attractive booklet, "A Northern Summer," which was distributed by mail to prospective patrons and which undoubtedly had a very favorable effect upon our registration. They organized and carried out a fine program of Saturday excursions to various beauty spots and places of historical interest in southern Wisconsin, and the splendid facilities of the Union for cultural and recreational life were made abundantly available to our summer patrons. Beach supervisors maintained order and promoted outdoor games on the terrace. The food service was of the usual high character. Concerts, musicales, art exhibits, movies, discussions, fora with prominent speakers on both sides of controversial issues--all these and other provisions placed an interesting and stimulating program of extra-curricular affairs within reach of a student body which made abundant use of it. Our ably conducted Union and the Division of Social Education are providing an enrichment of opportunity that is highly appreciated by our summer clientele.

Special Institutes

Several of our projects which are sponsored by the Summer Session are assuming large size and real importance. Of these, the institute for administrators of schools, and the laboratory school, both sponsored by the School of Education, and the Music Clinic, sponsored by the School of Music, are, perhaps, the most significant.

The Laboratory School

The Laboratory School, now in its third year, continues to grow both in scope of program and in the number of pupils enrolled and teacher-observers attending its classes. This year, space and staff limitations made it possible to accept only half of the pupils who applied for admission. This large number of applications made possible a selection of pupils of varied types, ages and capacities, which is highly desirable in an experimental school of this type. In order that teachers of special work--art, music, dramatics, physical education--might also profit by observing a model school in action, special classes in these fields were conducted at regular hours each day.

A more systematic system of scheduling and recording observers has made the school more attractive to teachers enrolled in the Summer Session; an average of 130 observers attended the various classes each day during the session.

In presenting his annual report, the director of the school reminds us that two major handicaps to the complete development of the school remain: The lack of a building on the campus expressly adapted for use as an elementary school; and the lack of a permanent "child study center" which would make possible the assembling of a permanent year-round staff, familiar with the problems and aims of the school.

The Institute for Administrators

The Institute for School Administrators is carried on by Professor John Guy Fowlkes and other members of the School of Education, in addition to their regular work and at no expense to the University. It brings high-school superintendents, principals and supervisors in considerable numbers to our campus who are not enrolled in the session, but who have guest privileges for the week. They are thus enabled to see our work and facilities at first hand, as well as to profit by the deliberations of the institute at no cost except their personal expenses and, as a result, they are much more inclined to recommend their teachers and students to Wisconsin.

The Music Clinic

The Music Clinic under the auspices of our School of Music brings over 500 high-school musicians, and many band masters, orchestra leaders, chorus directors and piano teachers to the campus for a three-week period of training and study. It provides exceptionally good musical entertainment for the summer session in general, and undoubtedly interests many high-school representatives in regular attendance at the University.

Degrees Conferred

At the close of the session of 1937, the Regents, upon the recommendation of the various faculties, conferred 115 bachelor and first degrees, 165 master's degrees, and 29 Ph. D. degrees, a total of 309. This was a decrease of 5 over last year. 9 certificates of law were issued. A tabulation follows:
