## FOREWORD

REALIZING THE ABSOLUTE NECESSITY for a quick and ready reference, THE PITTSBURGH TYPE FOUNDERS COMPANY, the largest independent type manufacturing concern in the country, takes pleasure in placing this catalogue before the trade.

BY DOING SO, we believe we can assist you in the selection of TYPE, SPACES, QUADS, BORDER, RULES, LEADS, SLUGS and other printing necessities, and in this way, help you to maintain your high standard of efficiency or to increase the same.

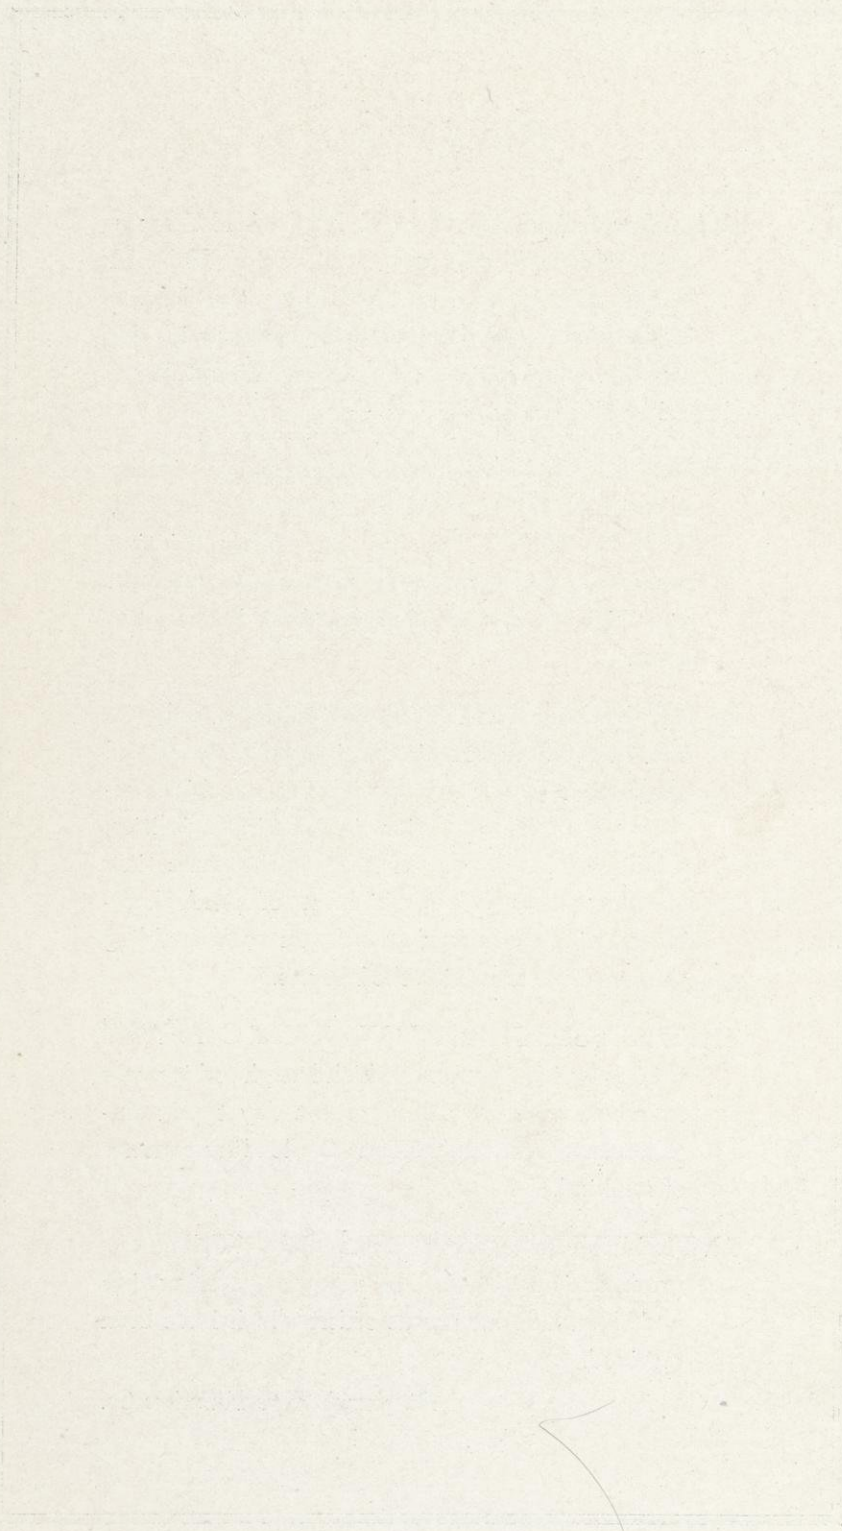

IN THE MANUFACTURE of our products, only the best raw material obtainable is used. It is alloyed and treated by our own special process, which produces a metal superior in wearing qualities, solidity and sharpness of face, at the same time allowing it to be cast at a high rate of speed, thereby reducing the cost of manufacture and enabling the consumer to receive the benefits.

THE PITTSBURGH TYPE FOUNDERS COMPANY is in possession of patents which has placed it years in advance of the other present day type manufacturers and stamps it as the leading concern of its kind.

AMPLE EVIDENCE OF THE QUALITY of our products is shown by the voluntary testimonials and the numerous repeat orders which have been received.

No Sort order is filled for less than 25 cents, Class One and 60 cents for Class One Special. If the minimum quantity of more than one character is ordered, of same body, face and line, the weight of such Sorts will be charged at Second Class prices for that body, providing the total is as stated above or more; otherwise, the minimum charge prevails.

### MINIMUM SORT RULES

- Two months from date of invoice are allowed to purchasers of Body weight fonts, 300 pounds and larger, for sorting up, providing that no sort order (or order for parts of fonts or complete fonts) shall weigh less than 5 pounds, subject to Sort Rule No. 7; and such sorts will be charged at the same rate per pound as the original font. This does not apply to Quads or Italic.
- The minimum sort charge for one body, face and line *a* is 25 cents Class One and 60 cents for Class One Special, net, subject to 2 per cent cash discount.
- For a sort order which includes Spaces or Quads of the same body as the letter the charge will be for the weight ordered, at the proportionate pound prices (figured from the proper Letter and Space list, also Quad list), but in no case will the minimum charge be less than 60 cents.
- Hair Spaces.—Spaces of bodies 18 Point and smaller, 5-em and thinner, when not a part of a regular font, will be charged at Third Class prices. Minimum charge, 25 cents. All sorts less than three point set will be charged at third class prices.
- No sort order will be filled for a less amount per character (or set of Spaces or Quads) than—
  - 4 ounces of each character on bodies 6 Point to 18 Point, inclusive.
  - 6 ounces of each character on bodies 20 Point to 48 Point, inclusive.
  - 8 ounces of each character on bodies 54 Point and larger.
- Sorts of Body or Job faces (of one body, face and line) ordered at one time, in quantities of ½ pound and over per character will be charged at First Class and First Class Special prices. Sorts in quantities of less than ½ pound of a character will be charged at Second Class prices.
- Extra sorts of the same body, face and line, ordered with weight fonts of Body or Job type, will be charged at the same price per pound as the weight font.
- (This does not include Scripts, Music, Armenian, Greek and Rabbinic, which are charged at Third Class prices.)
- Regular small Accent fonts, Border and Ornament fonts, Initial fonts, Small Cap fonts, or regular parts of Body or Job type fonts (including Auxiliaries, Figures, Fractions, etc.), where the list price per font is 60 cents or less, are not considered as sorts, and, therefore, are not subject to these Minimum Sort Rules, but are subject to the No Discount Rule governing bills of less than \$1.00.

*a.* "One body, face and line" includes any character in a font of Lower Case, Caps, Small Caps, Points, Figures, References, Braces, Dashes, Leaders, Fractions, Commercial Marks or Spaces and Quads.

## Prices of Spaces and Quads

In Body Type fonts weighing 25 pounds and over not less than 90 per cent of the weight shall be Letter and Spaces and not more than 10 per cent shall be 1, 2 and 3 em Quads. The 10 per cent of Quads sell at quad rates; the 90 per cent of Letter and Spaces at First Class rates. Quads contained in 25-pound Body fonts go in at less-than-5-pound Quad rates.

The standard height of our Spaces and Quads is 8/10 of an inch. Will be cast to shoulder height of type spaces, for electrotyping purposes, upon special order only.

**ALLOWANCE FOR OLD TYPE AND OTHER METALS**

Old type (clean and unmixed with other metals), electrotypes, leads and brass, delivered at foundry free, will be taken at current prices in exchange for new type or printing material.

Old metal should be securely boxed and plainly directed, with also the shipper's name placed on the lower left-hand corner of the box. We should be promptly notified of shipment, together with the net weight of the metal sent.

**SPECIAL NOTICE**—Zinc plates, metal containing zinc, or type and other plates mixed with zinc plates, will not be received at any price. Type, electrotype plates, leads and brass must be packed separately, as the value of each differs. Plate matter and plate bases furnished printers by Newspaper Unions will not be accepted at any price, as they are the property of the concerns producing and loaning them. We will not accept type metal melted and run together.

**TO FACILITATE THE FILLING OF ORDERS**

This book should not be cut or mutilated in any way. It is only necessary to give the size, name (if any), and number of the Type, Border, Rule, Press, Machine, Tool or other article desired, to insure the accurate filling of the order. When writing an order devote a separate line or paragraph to each item or article. Write on one side of sheet only, and if sending a letter at the same time as order write the letter on a separate sheet. Read your order carefully before mailing. The omission of a name or number of size always means delay and annoyance.

If you have any preference in the shipping of your order, please state by what route—whether by boat, freight, express or mail. If no instructions are given we will ship according to our best judgment.

We are not responsible for goods after they leave our establishment.

Mail parcels are limited to 4 pounds in weight. Type weighing over 4 pounds can be divided, if so desired, and sent by mail. Experience has shown, however, that it is much safer and generally cheaper to send more than 2 pounds by express.

When items are desired sent by mail, enough extra cash should be remitted for postage.

Purchases should be opened, examined and checked with bill immediately after receiving, so that prompt notice of any error or omission may be given.

No claims for shortage will be allowed on any font unless a proof of such font before being untied or laid accompanies such claim. We are always glad to correct any mistakes made in putting up or sending out goods. Any claims of this nature should be made without delay.

State particularly what styles of Fractions you want to work with your Roman fonts. We do not wish to select for you. Remember, we do not furnish Dashes and Braces, References, Fractions, Commercial Marks and Leaders unless definitely ordered.

Faces cast on other than their own body will be furnished on special order.

Sorts are cast to order and are not returnable if filled according to order. Therefore, read your sort order over very carefully before sending it in.

When desiring an estimate on a type order or a printing outfit of any size the best and quickest way is to send us a complete list of the items wanted. We can then immediately affix our lowest prices and return it to you with full particulars.

Should you order Rule to be mitered to any size, give either the inside or the outside measurement, and if it is to be cut from Double Rule state whether you wish the heavy line inside or outside.

In ordering Chases the best plan is to send a diagram along with the order, giving both the inside and outside measurements. Chases are not kept in stock, but are made to order, and are not returnable.

All accounts must be settled monthly, unless otherwise specially arranged at the time of purchase. Overdue accounts are subject to sight draft. Parties having no established credit or arrangement with us will please send references with order.

Out-of-town customers will please remit by post office or express money orders, or draft on Pittsburgh, Chicago, St. Louis or New York banks. On personal checks our banks make a charge for collection, which will be deducted from your remittance. Small amounts may be sent in postage stamps.

Body Type is put up in fonts of 25, 50 and 100 pounds, or some multiple of these weights, and is fonted as indicated by following table:

FONT	CAPS	SMALL CAPS	POINTS	FIGURES	LOWER CASE	SPACES	QUADS
25 lbs.	2 lbs. 8 oz.	12 oz.	1 lb. 1 oz.	1 lb.	14 lbs. 11 oz.	2 lbs. 8 oz.	2 lbs. 8 oz.
50 lbs.	5 lbs.	1 lb. 8 oz.	2 lbs. 2 oz.	2 lbs.	29 lbs. 6 oz.	5 lbs.	5 lbs.
100 lbs.	10 lbs.	3 lbs.	4 lbs. 4 oz.	4 lbs.	58 lbs. 12 oz.	10 lbs.	10 lbs.

When purchasing Roman fonts weighing 25 pounds and over, figure not less than 90 per cent of the weight as letter and spaces, and not more than 10 per cent as 1, 2 and 3 em quads. The 10 per cent of quads will be at quad rates; the 90 per cent of letter and spaces at Roman rates. Quads contained in 25-pound Roman fonts go in at the less-than-5-pound quad rate.

Figures or Leaders, 100 pounds and over, of one face, body and line, at 1000-pound rate.

*Pittsburgh Type Founders Company, Inc., Pittsburgh, Pennsylvania.*

**Body Type Sorts and Additions at the Font Price**

Auxiliaries are not supplied with regular body letter fonts, but if wanted must be specially ordered in the following quantities or multiples thereof:

References..... ½ pound      Braces and Dashes..... 1 pound      Fractions..... 1 pound  
 Commercial Marks..... 1 pound      Leaders... 3 and 5 pound fonts

Accents for Body Type, when furnished with regular weight fonts, will be sold at same price per pound as the font. Ordered separately, they will be treated as sorts.

Customers are allowed two months from date of invoice in which to sort up Body Type weight fonts of 300 pounds or larger at the price per pound charged for the font, provided such sort orders call for 5 pounds or more. If less than 5 pounds, they will be charged at the minimum sort order rates.

**How to Estimate Weight of Body Type**

To ascertain the quantity of plain type required for a newspaper or magazine, or any other work, find the number of square inches and divide the same by four. The quotient will be the approximate weight of the matter; but as it is impossible to set the cases entirely clear, it is necessary to add 25 per cent to large fonts and 33 per cent to small fonts, to allow for dead letter. The average weight of 12 inches of solid matter set 13 ems pica measure is 6¾ pounds; if leaded it will weigh about 5¼ pounds. A single column of six column folio, solid, will weigh about 10½ pounds, requiring about 13 pounds of type, while the same length column leaded with 2 point leads will contain but 7¾ pounds solid matter, requiring about 10 pounds to set the same.

PRINTING-TYPES are made from an alloy of melted lead, tin, antimony, and sometimes copper and other metals. This alloy fills the mold exactly, and shrinks but little in cooling. Every type-founder has his own formula, which he keeps secret. The utility of typography depends upon the accuracy of each type, and the consequent squareness of a thousand or a hundred thousand types in any combination. This accuracy is most certainly secured by founding each type singly in a mold. *Experiments in cutting or swagging them from cold metal have hitherto been unsuccessful. PRINTING-TYPES are made from an alloy of melted lead, tin, antimony, and sometimes copper and other metals. This alloy fills the mold exactly, and shrinks but little in cooling. Every type-founder has his own formula, which he keeps secret. The utility of typography depends upon the accuracy of each type, and the consequent squareness of a thousand or a hundred thousand types in any combination. This accuracy is most certainly secured by founding each type singly in a mold.
