The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

Spinal Support for Disc Extrusion

Child's Spinal Support

Dorso-Lumbar Support

Compare Spencer with any other support for effectiveness, comfort, economy

For Effectiveness—Each Spencer Support is individually designed, cut and made—based on body descriptions, measurements and the medical requirements of each patient. In terms of individual needs, only a *designed-to-order* support can provide maximum therapeutic effectiveness.

For Comfort—Spencers are not adjusted to “fit,” the “fit” of a Spencer is designed into the sections of the support itself! Heights, lengths, all details are determined by the needs of the individual wearer. Thus, Spencer provides *lasting* comfort. Such comfort is not possible in a support that is adjusted to fit a body for which it was not designed.

For Economy—To be truly economical, a support must provide the *correction* required by the medical condition and must hold its shape in order to *maintain* that correction. Because each Spencer is individually designed it does not lose its shape. A support that loses its shape loses its effectiveness.

We invite you to compare the difference! You will find Spencer demonstrably superior for men, women and children. Prescribe Spencer for all conditions of abdomen, back and breasts where support is indicated.
