REPORT OF MONEYS RECEIVED AND EXPENDED
AND WORK DONE BY THE

MADISON PARK AND PLEASURE DRIVE
ASSOCIATION

FOR THE YEAR ENDING APRIL 15, 1901.

A resolution was passed at the annual meeting of the Madison Park and Pleasure Drive Association, held April 15, 1901, that the reports of the president and treasurer should be printed in pamphlet form and a copy sent to each contributor. The name of any one who has contributed for the work the present season, but did not contribute for the work last year, will not appear in this report, but will appear in the report of next year. This pamphlet, however, is sent to all persons who subscribed either for 1900 or 1901.

BY-LAWS ON MEMBERSHIP.

Article 1.

Section 1. Any person who shall agree to contribute to the purposes of the Association a sum not less than \$25 per annum shall become a member thereof, but shall lose his right to vote if he shall fail, on notice from the secretary, to renew his subscription on or before the second Tuesday of April, next succeeding the calendar year for which his subscription is made. Said subscription shall be paid one-half on or before April 15th, and the other one-half on or before August 1st of the year in which the same is made.

Section 2. Any person who shall agree to contribute to the purposes of the Association the sum of \$5 or over, but less than \$25 per annum, shall become an associate member of the Association with all the rights and privileges of a full member, except the right to vote on the question of amending or changing the articles of incorporation or by-laws of the Association, but shall lose his membership if he shall fail, on notice from the secretary, to renew his subscription on or before the second Tuesday of April next succeeding the calendar year for which the subscription is made.

Section 3. Any person who shall have contributed in the aggregate in money to the purposes of the Association the sum of \$500 shall become a life member.

Section 4. Any person may become an honorary member of such Association on election thereto by a two-thirds vote of all the members of the Association present at any regular or special meeting of said Association, but such honorary member shall not be entitled to any vote.

Section 5. Each member of the Association, other than an associate or honorary member, shall be entitled to one vote.

PRESIDENT'S REPORT.

MADE ON BEHALF OF THE BOARD OF DIRECTORS OF THE
MADISON PARK AND PLEASURE DRIVE ASSOCIATION.

*To the Members of the Madison Park and Pleasure Drive
Association:*

This Association today closes the second year of its work, it having been organized April 10, 1899, and being the successor to an association by the same name, organized July 10, 1894. But the work which this association and its predecessor were organized to do, commenced in the spring of 1892, so that today marks the end of the ninth, and the beginning of the tenth, year of our work.

TOTAL AMOUNT CONTRIBUTED TO DATE.

As is well known, the work which this Association is organized to do is sustained wholly by voluntary contributions. The following is a summary of the amount contributed up to date:

For the years 1892 and 1893.....	\$6,888 86
For the year 1894.....	655 00
For the year 1895.....	995 00
For the year 1896.....	1,580 00
For the year 1897.....	10,160 23
For the year 1898.....	2,171 32
For the year 1899, excluding gifts for Tenney Park.....	3,231 50
Gifts for Tenney Park in 1899, exclusive of the \$1,500 appro- priated by the city.....	5,778 00
	\$9,009 50
For the year 1900.....	\$5,313 20
For the year 1901, the amount subscribed to date	4,025 00
Amount contributed by Prof. Owen in 1892, in addition to the above.....	3,000 00
	Total.....
	\$43,798 11

INCLUDES INDIVIDUAL CONTRIBUTIONS OF MONEY ONLY.

The above does not include the \$1,500 appropriated by the city for the improvement of Tenney Park in 1899, nor the \$1,200 expended by the city in filling streets adjoining Tenney Park in 1900, nor the \$150 contributed by the city in 1900 toward constructing the pumping station in Tenney Park, nor any money paid to the Association by the town of Madison at different times for improvements made upon the Westport road. The statement includes only what may be strictly called voluntary contributions.

Nor does this statement include any of the lands donated for driveways and parks. The lands donated for Tenney Park are worth on a conservative estimate \$7,000, and the other lands donated for driveways and parks adjoining the same have been stated to me by a leading business man of our city to be worth at least \$40,000.

INTEREST VERY GENERAL.

Nothing shows more plainly the general interest in the work of the Association than the increased amount subscribed and the larger number who contribute from year to year.

AMOUNT CONTRIBUTED FOR 1901.

67 subscriptions of \$25.00 each.....	\$1,675
8 subscriptions of \$15.00 each.....	120
90 subscriptions of \$10.00 each.....	900
247 subscriptions of \$5.00 each.....	1,235
30 subscriptions of \$3.00 each.....	90
4 subscriptions under \$3.00 each.....	5
<hr/>	<hr/>
446	\$4,025

By reason of absence from the city, or other cause, quite a number of persons have not yet been seen who will contribute to the work of the Association. Their contributions will give us a fund for the present year's work of from \$4,000 to \$4,500.

CONDITION OF MEMBERSHIP.

At the annual meeting one year ago, section 2, of article 1, of the by-laws, was amended so as to read as follows:

Section 2. Any person who shall agree to contribute to the purposes of the Association the sum of \$5 or over, but less than \$25 per annum, shall become an associate member of the Association, with all the rights and privileges of a full member, except the right to vote on the question of amending or changing the articles of incorporation or by-laws of the Association, but shall lose his membership if he shall fail, on notice from the secretary, to renew his subscription on or before the second Tuesday of April, next succeeding the calendar year for which the subscription is made.

Hence, as the by-laws now stand, every person who contributes as much as \$5 per year, has all the rights of full membership, except on the one question of voting to amend or change the articles of incorporation or by-laws of the association. We believe this change was a wise one. It has made our work more democratic without lessening the amount of our subscriptions. But we need each year to keep up the number of the \$25 subscriptions. It is hoped that within a few years we shall have at least one hundred of such subscribers.

SUBSCRIPTIONS PRACTICALLY ALL PAID.

Of the total amount of \$43,798.11, subscribed as stated above, all has been paid (not including subscriptions for 1901 of course) except \$179.00. Of this sum \$11 belongs to the subscriptions of 1897; \$40 to those of 1898; \$68 to those of 1899, and \$61 to those of 1900. That is, out of a subscription of \$5,313.20 made for our work last year, all has been paid except \$61, and we expect that at least one-half of this sum will yet be paid. The Association has never instituted a suit to enforce collection. The directors would not hesitate to do this in a proper case, for a subscription to our work is just as binding as any other form of contract, and it has

always been the policy of the Association to collect every subscription made. No other policy would be just to the subscribers who pay according to their agreement.

When one remembers the large number of individual subscriptions made each year, the number of years covered by this work, and the total amount subscribed, the above showing is somewhat remarkable. This result has not been reached without careful, painstaking work on the part of some one. We all know who that person is. He is not a member of the board of directors, but few, if any, of the board, do more than he for the Association. His work would be much lightened and made much pleasanter, if each subscriber would pay promptly on receipt of notice, when there is no particular reason for not doing so.

TREASURER'S REPORT AUDITED.

The treasurer's report, which has been laid before you, contains an itemized statement of all receipts and disbursements during the past year. At the request of the board of directors, it has been examined by Mr. Julius G. Zehnter, and the results of his examination have been stated to this meeting. It is suggested that this report, with the statement of the examination made, be printed in full, and a copy sent to each subscriber. This plan has been pursued the past three years, and has, we feel, greatly strengthened the work of the Association. This is all the more necessary, since it is the only effective method of letting those who contribute know just how their money has been expended. All of these expenses were authorized and the accounts audited and allowed by the board of directors.

TENNEY PARK.

The Association has, during the past year, spent a portion of its funds upon Tenney Park. In justice to the members, and for the information of the public generally, we feel that a statement should be made at

this time of what the park has cost thus far, and how this cost has been met.

On page 11 of the last annual report there is found an itemized statement of the amount expended on account of Tenney Park prior to that time.

It was.....	\$5,591 01
Since that date there has been expended....	7,464 15
	<hr/>
Total cost.....	\$13,055 16

This sum has been paid as follows:

By Mr. Tenney, not including the \$500 to be paid the present season.....	\$5,125 00
The city appropriated in 1899.....	1,500 00
The city expended in filling streets adjoining the park, in 1900.....	1,200 00
Special fund subscribed in 1899.....	1,778 00
City appropriated in 1900 toward constructing a pumping station	150 00
Special fund subscribed for pumping station	582 00
Special fund subscribed for constructing foot bridge.....	324 50
Amount expended by the Association out of its general funds.....	2,395 66
	<hr/>
Total.....	\$13,055 16

It is seen from the above that the Association has expended out of its general funds, since the work was commenced on Tenney Park \$2,395.66. But as an offset to this it should in justice be said, that a large number of persons who are more especially interested in this park, made larger contributions to our work this last year than was their fair share, because it was understood that the Association was to expend, during the year, not less than a certain amount upon the park. Just how much our funds were, in this way, increased, it may not be easy to estimate; perhaps \$1,000. If so, the Association has expended about \$1,400 more than it has received from those especially interested in the park. We believe the investment has been a good one in many ways. It has secured for the city what will

soon become one of the most unique and beautiful small parks, and that too, in a portion of the city where it was much needed, and has interested in the work of this Association a large number of people who will continue to contribute toward its support.

The total amount contributed by the city for this park up to date is \$2,850. Of this sum, \$1,500 was paid to our Association in 1899, but the larger share of this was expended in filling and grading the public streets. Of the remainder, \$1,200 was expended last year by the city in filling West Johnson street and a portion of Water street adjoining the park. This work all had to be done sometime by the city. The remaining \$150 was contributed by the city toward the construction of the pumping station. About one-half in area of the land comprising Tenney Park was donated. For the remainder of the land, the Association paid Mrs. Thornton and daughter \$1,250, and to J. A. Steinle \$375, making in all \$1,625.

D. K. TENNEY'S ADDITIONAL \$1,000 GIFT.

At our annual meeting one year ago, Hon. D. K. Tenney very generously proposed to give \$1,000 in addition to the \$4,000 which he had already contributed toward Tenney Park, on condition, however, that \$500 should be paid on the completion of the filling and planting of that portion of the park east of Sherman avenue, and \$500 on completion of that portion west of the avenue, according to plans already prepared by O. C. Simonds, landscape gardener. The Association found it necessary, in order to complete the filling of the eastern portion of the park, as it should be done, to anticipate the whole of Mr. Tenney's additional gift. This was done by borrowing \$500 on a note of the directors. This note will be met, except as to interest, by the \$500 yet to be paid by Mr. Tenney. Hence, while the Association is in debt \$500, it has this subscription with which to meet the debt, but will be compelled the

present season, in order to secure the \$500 from Mr. Tenney, to complete that portion of the park which lies between the avenue and lake Mendota. This improvement is estimated to cost from \$800 to \$1,000. It will be by far the finest and most valuable portion of the park, furnishing, as it does, an outlet directly to the lake some 460 feet in length.

FOOT BRIDGE FOR TENNEY PARK.

It was necessary to construct a bridge from the main portion of the park to the island. This could only be done economically while the water was out of the lagoons. But the directors felt there were not sufficient funds on hand to meet this extra expense. Hence, a special and additional fund was raised for this purpose. The cost of the bridge was as follows:

Two cords split boulders for abutments.....	\$12 00
Carpenter work.....	100 00
Mason work.....	109 20
Iron work.....	88 30
Architect services.....	15 00
	<hr/>
Total.....	\$324 50

The painting of the bridge has not yet been completed. This will be done soon.

PUMPING STATION.

When the water is high in the Yahara river, it will not, at times, flow from the lagoons until their banks are nearly full. This made it necessary to provide some means of controlling the water at certain periods. After careful investigation, the directors decided that electric power would be the most serviceable. Here, again, the directors were met with the difficulty of not having funds sufficient to meet the cost of such improvement. Hence, another special fund was raised of \$582, and the city appropriated an additional \$150, making \$732. The total cost of the improvement was \$801.61. Hence, there was paid from the general fund, on ac-

count of this plant, only \$69.61. It is so constructed as to pump water either from the lagoons or from the marsh to the south, as may be desired. The city met the expense of connecting the pumping station with the marsh to the south. It is believed that this improvement will enable the city, with slight expense, to keep the whole of the marsh south of Tenney Park perfectly dry, and in this way will add much to the value of this property, thereby enabling the city to much more than reimburse itself through the receipt of increased taxes.

PLANTING OF TREES AND SHRUBS IN TENNEY PARK.

It is the purpose to plant from 5,000 to 6,000 trees and shrubs in Tenney Park this spring. This will be done according to the plans furnished by Mr. Simonds. The planting will consist largely of native shrubs and trees. These were gathered last fall under the supervision of Prof. L. S. Cheney, and are now ready for use.

CITY AID.

To properly care for this park and cultivate the things planted, will require the services of one man during the summer months. He can also act as a policeman in protecting the park. We expect that the city will meet this expense. There is no reason why it should not do so. This park belongs to the city as much as do its school grounds and school buildings. This Association is merely a trustee for the people of the city in all that it owns or does.

LAST SEASON'S PLANTING OF TREES AND SHRUBS.

The Association spent last year, for trees and shrubs, including the expense of planting, \$463.24. The total number of trees and shrubs of all kinds planted was 1,123. Of this number, 660 deciduous trees were planted on Farwell drive, and 428 deciduous trees and 206 shrubs on Lake Mendota drive.

REPAIRING FARWELL DRIVE.

Last spring Farwell drive was repaired through its whole length, at a cost, for material and labor, of \$503.35.

GRADING LAKE MENDOTA DRIVE.

That portion of Lake Mendota drive, commencing at a point opposite the Alfred Merrill farm house and extending to the bridge west of Prof. Parkinson's cottage, was graded last year, preparatory to stoning the same the present season. This work cost \$209. It has greatly improved this portion of the drive. It is the policy now to expend whatever money is reasonably necessary to properly grade the road bed before macadamizing the same. A proper grade is the foundation work for any good road or drive.

THE ISOM SAND HILL ROAD.

We are all familiar with the road that branches off from the Middleton road, just west of Mr. Tenney's place, and passes north over the sand hill to the corner of Mr. Raymer and Mr. Stephen's lands, and also know that usually this has been anything but a pleasant road to drive over. It is, however, naturally a beautiful road, and connects directly with the Lake Mendota drive system. Last fall the south 2,200 feet of this road was graded and macadamized at a cost of a little over \$650. The town board of Madison appropriated \$100 toward this improvement, \$80.00 of which was the road tax on this road district, which the adjoining land owners paid in money, and also paid the additional sum of \$550, either in labor or cash. As large a sum, if not larger, will be expended the present season in extending this improvement north so as to connect directly with the Lake Mendota drive proper. Of course, none of the funds of this Association were used and none will be used in this improvement, but when completed it will be a very desirable addition to our drive system.

THE WESTPORT ROAD.

It may be well in this connection to refer to that portion of the Westport road which extends from the end of the present macadam road to the railway tracks. It has been in horrible condition this winter and spring. Teams have mired there with no load other than an empty wagon. Much of this piece of road extends across low, marshy ground. It can only be made good by putting in a telford bottom with crushed stone on top. Such a road, 10 feet in width, with a good dirt road on either side, would be sufficient. As I remember, the distance is a little over 2,000 feet. It is, I think, just a mile from the Yahara river to the railway tracks, and, as I remember, the present macadam extends just 3,000 feet, 16 feet in width, and cost, including the grading of the further hill, a little less than \$5,000. On the same basis, it would cost a little over \$2,000 to construct a 10 foot macadam to the tracks. If built as well as the present macadam, it would last, with ordinary care, for at least a generation. The town of Madison would help some. This association might assist to a limited extent, but the greater portion of the amount needed would have to be contributed by those more immediately interested. We understand there is a plan already formed for securing this improvement the present season, and we hope it may succeed.

STEAM ROLLER.

Thus far we have labored at considerable disadvantage in constructing permanent roads, not having any suitable roller for such purpose. The roller owned by the Association is a light horse roller, well adapted to making and repairing dirt roads, but of no value in constructing or repairing macadam roads. On such work we have used largely the horse roller owned by the town of Madison. This, however, is poorly adapted to our work. Though not a heavy roller, it is too heavy for horses, especially on the grades, and is unsuitable

in other respects. We have needed for some years a steam roller, but have not had the funds with which to purchase it, and it has been the policy of this Association not to run in debt. However, after carefully considering the situation, the directors purchased the past winter from the Kelley Manufacturing Co. of Springfield, Ohio, a steam roller, which weighs unweighted 6 tons and may, with safety, be weighted to 8 tons, for \$1800. Four hundred and fifty dollars are to be paid when the roller has been delivered and accepted, after satisfactory tests made, and the balance of the purchase is to be paid in three equal annual payments. It was thought that these terms as to payment would not unduly tax the funds of the Association for any one year. The contract calls for the delivery of the roller on May 1st next. Our present superintendent is fully competent to run such a roller.

PROPOSED PARK IN SIXTH WARD.

The president's report of last year contains the following:

“Another matter that was brought before the meeting one year ago, was the desirability of securing for the purposes of a park that portion of the lake shore adjoining Spaight street, in sixth ward, about which there has been some litigation. It seems to the directors that this object should be accomplished the present season. It is questionable whether private persons have any legal claim to this land. Whatever claims there are, could likely be compromised at a small sum. Some time since, the directors appointed a committee of three, William R. Bagley, Henry Fauerbach and Harry L. Butler, to ascertain for what sum of money all alleged private rights or claims could be secured, on condition that later the land should be properly filled for a park. The importance of this strip of land to the city cannot be well over estimated. It is the only spot now left on Lake Monona that affords to the people an unobstructed view of the lake. Moreover, the view is a most charming one. The city cannot make a better investment than to secure this land, and unless

made soon the opportunity will be gone forever. The securing of this land for a park will also add very much to the work of this Association. It will make the people of that part of the city feel that we take as much interest in its beauty and welfare, as in any other portion of the city, and I trust every contributor will use his influence to secure this land for a park the present season, so that at our next annual meeting we can report this as an accomplished fact."

I regret to say that we are not able today to report this "as an accomplished fact." But the feeling of the directors of this Association,—and I am sure we voice the sentiments of every member of the Association,—as to the importance to the city of securing this strip of land for a park has not changed. Thus far the difficulty has been to secure a reasonable compromise with some of the men who claim to have some legal right to this land. Certainly, in its present condition, the land is of no value to those who claim to have an interest in it. They have nothing of any value, nothing that will bring anything in the market. Would it not be better, both for them and for the city, to endeavor to come together on some reasonable basis, so that this opening upon the lake can be secured for all time for the benefit of all the people of the city?

THIRD LAKE BOAT AND BATH HOUSE.

There should be constructed at the foot of South Hancock street, or in that vicinity, a city boat and bath house combined. The disgraceful shanties that now skirt the shores of Monona should be removed, but their owners should be furnished with some appropriate place for their boats at a moderate cost per year. The need of a public bathing house is recognized by all. The two wants could be met in the same building. The building should be an artistic one, for it would occupy a very conspicuous and central place. Such a building, exclusive of the foundation, would cost about \$4,500. The foundation, if properly constructed, would cost about \$2,000. This latter expense, we have reason

to believe, would be met by the Chicago & Northwestern Railway Company, provided the numerous shanties that now disfigure the shore were removed as soon as such a building was completed. The income from such a building, so located, would at least be sufficient to sustain it. We believe that no investment would bring better returns to the city. Much of this shore is now, and has been for some fifteen or twenty years, a disgrace to the city. It is seen by all who pass through our city by rail, and many see but little else of the town. I wish some energetic citizen who has the interest of the city at heart would decide to take this matter up and push it to a successful termination the present season. A recent decision of the supreme court can be called into service, if necessary, in case of any of the owners of these unsightly boat-houses are disposed to be unreasonable. But if approached in the right way, we believe there will be no difficulty, since a much better place would be furnished for their boats and at less expense.

DRIVE AROUND LAKE MONONA.

The right of way for a drive around Lake Monona has not yet been secured. This must be done the present season, or we must know that it cannot be done. The money can be raised to construct the drive. The whole difficulty is in securing the right of way. A number of obstacles have recently been removed and by a united effort, it is hoped that those remaining will be solved the present season. But we need the help of every member of this Association, and especially of those having interests on this lake. The securing of this drive would complete, in an appropriate way, our drive system, and would distribute our efforts so that all parts of the city would feel that they had been justly treated in this work.

WINGRA PARK IMPROVEMENT.

A special fund is being raised this spring by the residents of Wingra Park and Oakland Heights for the improvement of Washington Park and the streets connected with the same that were turned over to this Association about a year ago. Subscriptions to this fund are not included in the foregoing statement of subscriptions for the work of this year. They will be paid, however, to the treasurer of the Association, as other subscriptions, but will be disbursed for this special improvement. It is expected that from \$300 to \$500 will, in this way, be added to the receipts of the Association for this work.

PUBLIC SENTIMENT.

Sentiment in favor of protecting that which is thrown open to the use and enjoyment of the public, is a plant of slow growth. Its growth in connection with this Association has been as steady and rapid, perhaps, as could have been expected. When we compare the present feeling with that of nine years ago, the change for the better is very marked. The large number who now contribute to the work is the best protection. Each member becomes in a sense a self-appointed policeman for the protection of the trees, shrubs and vines which, native or cultivated, grow along the drives and in the woods through which they pass. We hope each one who pays money for the support of this work will feel that he is authorized to prevent injury being done by any lawless or thoughtless act.

TRANSFER OF TITLE TO THE ASSOCIATION.

Considerable damage has been done the past winter and spring to Farwell Drive. The gates put across the drive to protect it have been repeatedly broken down. Some of those to whom keys were given, have abused the privilege by loaning the keys to others who have used the drive at improper times. The only protection is to have the title to the three rod strip through which

the driveway passes transferred to this Association. Under the law, its officers and agents are given ample police powers to thoroughly protect its property. An effort will be made the present season to secure such transfer of all lands now under its control or management. It is true that the cultivation of a proper public sentiment is the greatest safeguard. But when some farmer from the town of Westport, or some citizen of Madison, drives a lumber wagon heavily loaded over these roads in soft weather, in the face of numerous signs prohibiting such acts, such person needs to be made an example of.

CLEANING UP AND BEAUTIFYING OUR STREETS.

Attention was called in the last annual report to the necessity of organized effort to secure a cleaner and more beautiful city. It was there stated: "This city, as to the strip of ground 66 feet in width set apart for street purposes, is, taken as a whole, neither a clean nor a beautiful city." Though this statement is substantially true to-day, a good start, in the right direction, has been made during the past year by the public spirited women of the city. They have circulated an agreement, which has been very generally signed, to the following effect:

"We, the undersigned, owners of property abutting on, or residents along (any) street, do, for the purpose of improving and beautifying and keeping in a neat and inviting condition the city in which we live, and especially (our) street, hereby mutually agree, that we will, to the extent of our ability, do, or refrain from doing, the following things:

"First. We will, wherever necessary, properly grade the strip of ground between the sidewalk and curb or gutter, and seed or sod the same, and endeavor, throughout the season when grass grows, to keep the same green and properly cut, and free from noxious weeds.

"Second. We will, at the earliest practical date, secure, wherever necessary, the planting of avenue or shade trees opposite our respective properties, so that

the street throughout its entire length shall be properly provided with a row of shade trees on each side thereof.

"Third. We will, so far as possible, keep all parts of our respective premises, that are visible from the sidewalk or street, or to the public, free from litter or rubbish of every kind, and do what we can to make the same attractive and inviting at all times.

"Fourth. We will each, to the best of our ability, endeavor to keep the sidewalk, street, and grounds over which we have any control, free from pieces of waste paper, fruit rinds, and the like.

"Fifth. We will, to the best of our ability, do, or refrain from doing, whatever other things may be necessary to make and keep the street on which we live an ideal residence street."

If the above agreement could be faithfully and intelligently carried out for a few years, the appearance of this city would be revolutionized. Each member of this Association is in hearty sympathy with this work which the women have undertaken, and will aid, I am sure, by sympathy and otherwise, in every possible way to secure the desired results.

SECURING SUBSCRIPTIONS.

Each subscription to the work of this Association must be renewed each year, if the subscriber is to continue a member, and the Association is to receive his aid. This necessitates a good deal of labor on the part of a few. So far, no device has been discovered that will do away with this personal work. The postal card system has helped some. But not to exceed three-eighths of our funds are secured by this method. It helps to start the lists each year and makes the subsequent personal work some easier. The refusal to continue one subscription can hardly be said to be followed by any penalty. It is true the membership ceases, but our drives and parks are open, as well to the non-subscriber, as to the subscriber. It is unlike, for example, a membership in the golf club. There failure to keep up the annual dues not only ends the membership, but the right to use or enjoy the grounds. Nor is there

any way in our work of distributing the burden of maintaining it equally. We seek to do this as much as possible through the different lists ranging in amount from \$25 down to \$3. But some men are on the \$5 or \$10 list who should be on the \$25 list. There is no remedy for this except as the work appeals to each man's sense of duty or fairness. Each one must be left to contribute such sum as he chooses, and no one should give either less or more than he ought because of the gift or refusal to give of his neighbor. The subscription list is each year published and mailed to all subscribers. Hence, comparisons are easily and very naturally made. The man who has subscribed \$25 and keeps no team, and uses the drives but little, sees that his neighbor across the way who is much more able to give, and who owns fine horses and carriages, and whose family uses the drives almost daily, has contributed but \$10, and he naturally feels that there is no justice in this. And this is so. But there is another side to the question. If he will examine every name on the different lists, he will find those who have contributed more liberally than he as well as those who have contributed less. I speak of this because those who do the unpleasant work of circulating the subscription lists are frequently met with the above objection. But it is the same objection that can be made to all kinds of work sustained by voluntary contributions, including even that of the church. In all such cases the relevant questions are these: Should the work for which the contribution is asked be sustained? On the basis that \$5,000 is to be raised, and knowing what I do of the disposition of certain men to enjoy the fruits of the labor of others, without contributing anything thereto, although abundantly able to do so, how much should I contribute toward the \$5,000? On no other basis can work resting on voluntary contributions be sustained. One thing is certain, and that is that no other work in this city is

so generally contributed towards as the work of this Association, and as a rule,—there are certain exceptions of course,—those on the \$5 list are, according to their means, the most liberal contributors.

It is encouraging that each year the number of subscribers increases, it being larger today than ever before, notwithstanding there has been organized the past year several associations, among them the Forty Thousand Club and the Golf Club. These clubs, especially the latter, are somewhat expensive. I wish all of them the best of success. But I feel that their members, especially those of the Golf Club, should stand by the work of this Association. It is the work of this Association that has, in a large measure, made possible the enjoyment of the Golf Club grounds. We are glad to record that but few of our members have withdrawn their subscriptions the present season on account of the expense incident to membership in these other associations, and we trust that another year will find such persons with us again, for their work and our work is in no way antagonistic.

In conclusion it may be said, as a source of encouragement, that the work of this Association is attracting considerable attention throughout the state. Many inquiries during the past year have been made concerning the work, and copies of our reports called for.

Respectfully submitted,

JOHN M. OLIN,
President.

April 15, 1901.

TREASURER'S REPORT EXAMINED.

Prior to the annual meeting, Mr. Julius G. Zehnter was requested, on behalf of the board of directors of the Association, to examine the treasurer's report and vouchers and make a statement to the annual meeting of the results of such examination. In pursuance of such request, Mr. Zehnter made such examination and reported to the annual meeting as follows:

"I certify that I have examined the report of Frank W. Hoyt, treasurer of Madison Park and Pleasure Drive Association, herewith returned, together with the vouchers accompanying the same. I find that the account corresponds with the vouchers and that the footings, both of receipts and disbursements, are correct, and that the amount received, including the balance from last year is \$7,688.83, and that the total amount paid out is \$7,601.02, and that the balance on hand is \$87.81.

All of which is respectfully submitted.

JULIUS GEO. ZEHNTER."

TREASURER'S REPORT.

To the members of the Madison Park and Pleasure Drive Association:

Gentlemen: The financial transactions of the Association for the past year have been as follows:

RECEIPTS.
