The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

THE BEST OF BOTH WORLDS

The old world traditions of skilled medical practice...The new world techniques and technologies that enhance surgeons' skills and patients' lives...

These worlds come together at the Advanced Laparoscopy Training Center (ALTC) near Atlanta. State-of-the-art laparoscopic techniques are taught by leading surgeons in a practical approach.

Founded by laparoscopic pioneers, Drs. Eddie Joe Reddick and William Bryant Saye, ALTC provides a pragmatic learning environment.

The success of ALTC is based on a combination of classroom instruction employing the latest audio-visual teaching techniques with inanimate and animate laboratory practice, employing the Reddick-Saye method of laparoscopic surgery.

Accredited course work and laboratory instruction can be tailored to meet the needs of surgeons requiring advanced or specialized training. To meet the growing demand for training in this advanced technology, our expanded curriculum offering now includes:

Cholecystectomy
Advanced Suturing Techniques
Vagotomy
Thoracoscopy
Herniorrhaphy

Hysterectomy
Pediatric Laparoscopy
Colon and Rectal Surgery
Pelvic Lymphadenectomy

ALTC is the leading training center in laparoscopic surgery. Nearly four thousand surgeons have participated in workshops at ALTC. The standard has been set in facilities, staff, instruction and technique. The goal is developing safe laparoscopic surgical techniques for your surgical practice.

Yesterday, today and tomorrow...

At ALTC, the finest traditions of medicine are joined with the latest advances in technology to serve surgeons and their patients.
