The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

Long before there was the university, or the state called "Wisconsin," there was The Forest.
Silver-bound with water courses, studded with torquoise lakes, she stretched her emerald body along the pathway of the sun and brooded in dusky silence on The Mysteries. Here lived and loved, roaming the purple shadows and carving the torquoise lakes with paddle blades, a people.
Noble were they, high of courage and quick of understanding. And we, an alien race, usurping their power and their place, pause in our hunt for knowledge along their misted trails to meditate
!

For here, along the reaches of Mendota, there goes glimmering in the twilight the flash of moccasin soles. And is there, against the sky, a granite dome? Are there bricks and tile along the beaches?
Foolish one! The Thunder Bird has caught you napping and given you a dream! See, naught but the bark wickiup among the branches. And those beads of light far-flung as of a strange city? Ah, Dreamer
The paddle-blade of your lover blinking in the moon!

The Deer has picked his fleet foot from the uplands, and has flown to the North.
The Wolf does not course the rabbit over the brushy hutis, to drop his hollow wail from Eagle Point.
But go to the sanded glades, and you will see the symbols still printed for our reading by that most indomitable Brother

the Published by by fthe University of Wisconsin

## FO R WORD

And who knows with what thoughts the shy maiden of the woods braided her crow-black hair against the silver mirror of a pool, one black braid between her dusky shoulders, and fastened it in an envelope of color? Surely the tasseled streamers blowing at her back were not meant to let her pass unnoticed on the trail! Think of yourself!

RADITIONS-Wisconsin is rich in these. And most valued of all is the lore of the ancient Indian who once camped on the shores where now rise the halls and towers of our university. With an Indian theme or background against which are depicted the new traditionsthe Red Wagon-Homecoming-Prom-Serenades-Activities-we present to you the 1928 Badger.

## DEDICATION

There is rythm in the swishing of war-clubs! There is music in the hurtling of many spears!
There is a lyric in each arrow sped from the shivering string!
But ah! what grace, what beauty, what fathomless poetry in that spiral of blue smoke from the pipe of peace and happiness!

## ore

And, just as surely, the young man in his wickiup, fastening an arm band on his pad-dle-arm, did not do so to disguise himself into seeming a $\log$, a bush, or a twisted tree, when he swaggered down the village.
Think of yourself!

She of the HILL and of the water-ways, she who has learnt so much of wonderment, so much of Youth, from all the folk who spent part of the Springtime of their early days here, where Youth's spirit everlasting stays.

Times when one studied, times when well content without its books, Youth wondered what life meant what lay beyond the HILL and water-ways.-
Legend and laughter, days that long have beenand all the pulsing present that is ours, spirit of woodland, spirit of the town, idleness and the long laborious hours, a heritage so vast yet all our own, the HILL-side holds the secret that has been.

River ever flowing by the stalwart trees,
whither art thou going, broken by the breeze?
-How can we be knowing what the Indian sees?

Youth flung the flame into the sun and made it shine-
and all the songs the birds can sing are yours and mine,
yet:-in the gloaming, all the shadows there are like to Youth with its unanswered prayer questing,-and finding nothing, like the trees that stir soft boughs to listless melodies seeking the sunshine, that they cannot seize

Id Youth set the Springtime adancing on woodland and plainor was it the Springtime eternal returning again? Did Youth fling the warmth of the Summer to lighten the skies or was it the Summer reflected that glowed in young eyes?

Shall I sing you a song of the blue blue lakes, and the long long shadows that each tree makes when the laughter-loving Spring awakes? when the heart beats high and the eyes burn bright, and all life seems like an April night:for the years that come and the years that pass hold nothing more fragrant than wet green grass.

Where the sun-touched path goes winding, where the little shadows fall
have you ever thought of finding
the still secret of it all:-
how the blue of lake and Heaven
to the Summer day was given.

Chiaro-scuro, shadows linger
like the trace of spirit finger,
like a tale of life and laughter
and the little shadows after.

Ways that are old and worn by feet of Indian men, ways that are new, for other folk, young folk must come again
even as the leaves on boughs above will blossom forth in Spring,
even as the bird retains its song, so Youth must sing,dreaming awhile, before it must awake,
-even as the moonlight sleeps upon the waters of the lake.

And his last word was law!
Was it war, he lead and braved, with war club only, the blows of other brave men!
Was it peace, he picked the ground for hunting, and taught the young men how to use The Forest into giving up her mysteries.

## The President

IAM DELIGHTED to see this issue of The Badger undertake to capture and to celebrate something of the historic spirit and significance of the University of Wisconsin.
As the responsible head of a new administration of the University of Wisconsin, it has been a great relief not to have to look around for a new set of ideals. Out of her historic past Wisconsin brings five dominant ideals that remain sound standards for the guidance of her future. As I have stated them before, so I state them again as the ideals of sound scholarship and inspired teaching, of productive research and practical service, of the freedom to investigate and the encourage to follow the facts wherever they lead.

The future of the University of Wisconsin will depend upon the dignity and loyalty with which these ideals are served.

TO ONE WHO HAS been long at the University, it is a pleasurable experience to thumb reminiscently the leaves of an old Badger of the years of his first residence here. How many half forgotten names and faces it brings to mind; how it recalls the thrills of student days, how oddly the derby hats, the standing collars, the long skirts and the Psyche knots, which were the height of fashion then, appear in contrast with the collegiate styles of today. And no less striking is the change in the make-up of the book itself in comparison with the much more elaborate and much more dignified product of the present time.

Two decades hence, the present Badger may suffer by similar comparison, but to one who is now a student it will be a priceless possession. It will be to him the treasure trove of fondest recollections, a souvenir of the golden days of youth. May all the memories be happy ones, unmarred by thoughts of experiences that seared and left scars. May the recollections be welcome because of fidelity to friends whose love had earned it, of satisfaction over duty well done, or worthy ideals realized by steadfastness of purpose, and of truimphs won by good sportsmanship and hard playing of the game. For the work and play of the day is not solely an end in itself; it is the foundation upon which the joy or the sorrow of the future must rest.

MY CONGRATULATIONS to the class of 1927 and my godspeed to them as they leave the campus for the work-a-day world, are summed up in a phrase which I owe to a college girl. She was representing her college at a convention. In a speech said: "When I started away to this meeting, the girls who came to see me off didn't give me a corsage bouquet. They gave me a package of seed and said, Grow your own.

The injunction seems a proper parting benediction for college to bestow on outgoing seniors. It contradicts the languid pessimism of those who murmur soulfully that college days are better than any days that lie beyond graduation. It affirms the commonsense and cheerful belief that those later years will prove to be soil on which will grow all the things which made the college years delightful. It upholds the bracing doctrine that life is shaped from within by the individual rather than from without by circumstances.
A student who has been reasonably successful at college has a package of good seed. He goes out equipped with some power to work and some pleasure in working; a judicious amount of self-confidence; a friendly attitude toward people; and some quietly and ardently cherished articles of faith, by which he expresses his hope for the world and his duty toward it.

May each senior of 1927 find himself possessed of this package of seeds for happy living, and may his planting thrive!

Charles A. Smith
Registrar

James D. Phillips
Business Manager

## The Administrators

PRESENTING three rarely seen but invaluable members of the faculty-Charles A. Smith, registrar; James D. Phillips, business manager; and Glenn L. Gilbert, bursar.
As registrar, Mr. Smith stands at the outer gate of the University, considers applications for admission, and ushers the fortunate thousands into this paradise of learning. He keeps records of the progress of each throughout attendance and finally bows them out into the cruel world at commencement. Mr. Smith has ever been thoughtful, patient, and sympathetic in the performance of his duties.
J. D. Phillips is the man who utilizes the money received from state and bursar in purchasing the physical needs and necessities of the University. His judicious manipulation of the purse strings furnishes the material means by which we may attain the fullest mental growth and makes possible this student community.

To collect thousands of dollars in fees from graduates and undergraduates is the task assigned G. L. Gilbert, a familiar name in student check books. A more pleasant side of his job from our point of view is the loan funds, scholarships, and laboratory remittances with which we are occasionally surprised.

These three men, ever in the background of student life, are the ones who make the wheels go round and whose work is vitally necessary to keep our home of learning in order and to make it financially successful.

Glenn L. Gilbert
Bursar

Agricultural Hall from Henry Quadrangle

H. L. Russell

Dean

## College of Agriculture

WISCONSIN has been primarily an agricultural state. It was learned early that no system of mere cropping our soils would succeed and so a diversified agriculture grounded on dairying was developed. For over a decade we have led in dairying and because we have built steadily upon sound principles our system of farming often has been looked upon as a model by less fortunate states, in recent years.
As the relationships of this industry which is of such vital importance to our commonwealth, become more complex, trained leaders in this field are more and more needed. To combine efficient production and proper distribution with a socially richer rural life is our prime objective and Wisconsin men have done yoemen service in attaining this ideal. For over forty years this institution has been sending forth men and women imbued with the Spirit of Wisconsin, and we are now better fitted than ever to help those who are training for rural service.

## Course in Commerce

THE PRESENT academic year will bring to a close an epoch in the history of the Course in Commerce. From its beginning in 1900, it has been a four year course in which freshmen, sophomores, juniors, and seniors have been enrolled. Beginning with 1927-28, it will be a three year course. No one will be admitted who has not completed the freshman and sophomore years in this or some other college or university of high rank, and a year of graduate work will be provided for those who wish to continue their studies in business fields after graduation. Those who successfully complete this year of graduate work will receive the degree of M.A. in Commerce. After this year also this phase of the activities of the University will be called the School of Commerce instead of the Course in Commerce.

It is believed that this change in the organization and curriculum of the course will enable us better to meet the needs of all who wish to study business subjects whether they be undergraduates or graduates. Before the end of the present year a bulletin will be published in which details of the new program and all other necessary informa-

W. A. Scoutt tion will be supplied.

The Engineering Building

F. E. Turneaure

Dean

## Engineering School

THE WORK of the Engineering College is two-fold: teaching and investigation. Necessarily the greater part of its time and energy is devoted to the training of young men for the various branches of the engineering profession.-civil, mechanical, electrical, chemical, and mining and metallurgy. Research activities are, however, becoming increasingly important. The research work of the college has necessarily increased during recent years, and has come to be an important part of its activities. Results are published in special bulletins and in papers to various engineering societies. Five research fellowships are being supported by various industrial organizations of the state, four of them by public utilities, and one by a Milwaukee manufacturing concern. A considerable contribution is being received from the Engineering Foundation of New York City, an organization established by the four national engineering societies. Two fellowships have been established by these contributions, and three research fellowships are being paid from the University funds. The research and graduate work of the college is considerably restricted in some departments by lack of space, and it is hoped that this will be remedied in the near future by the construction of one or more buildings on the Camp Randall site, selected for the future development of the College.

## Graduate School

IN THE GRADUATE SCHOOL special emphasis is laid on bringing the student in contact with the research problems in his field of study. It is not only its mission to produce teachers and investigators, but to give that further training that is rapidly becoming so essential to those who enter into modern business and industrial life. We are fast becoming a society of experts, but this much abused word does not imply that the graduate student is to be called to a pedantic and uninteresting life. It simply means that a student can no longer acquire from an undergraduate course the professional and technical training the world expects. That very spirit of investigation which is the motive of the Graduate School is now almost universally recognized as essential to success in business, as well as in the professions.

The Home Economics Building

Abby L. Marlatt
Dean

## Home Economics School

TEACHING in the general subject of home economics was established in the College of Letters and Science in 1904 , through the efforts of the club women of the State, who secured a special appropriation from the Legislature to develop courses that would be "available as part of the general education of all the young women in the College of Letters and Science." In 1908 the Regents of the University transferred all of the courses and equipment to the College of Agriculture. During 1908-9 no work was offered.

In 1909, the reorganized work, under a new staff, was offered as a new major in the College of Agriculture with freedom of election by Letters and Science students in their junior and senior year. From this beginning with one full professor, one instructor and one half time instructor, with one senior graduating and fifty-two students enrolled, the Department has grown steadily, moving from the basement of Agricultural Hall to the top floor of Lathrop Hall and then through the efforts of the club women of the State, into its present building which is in part occupied by the University Extension Division.

In 1926-27, the work of the Department includes three general lines: resident teaching, extension and research. The faculty has increased from two and a half to twenty-seven in all lines of work. The enrollment has increased over six hundred per cent. The number of graduates is seven hundred and fifty-five. In place of one department there are three with graduate work and research publications to their record that rank us high among the home economics divisions in the country.
Abby L.Marlall

Henry Quadrangle-Looking from Agricultural Hall

South Hall-The Home of the Journalism School

## Journalism School

WHEN IN THE FALL of 1905, a course in news writing was offered as a part of the instruction in English composition, the University of Wisconsin became a pioneer in a humble way, in what has since proved to be the most important movement for the advancement of the profession of journalism. At that time neither academic authorities nor practical newspaper men looked with favor on specialized training in college as desirable preparation for journalism. Gradually, however, as students who had taken courses in journalism in college demonstrated their worth in newspaper offices, sentiment changed. Today with some 225 colleges and universities offering courses in journalism, and with journalism graduates well established in the offices of newspapers, magazines, and advertising agencies all over the country, few question the possibility or the desirability of specialized academic preparation for the profession. Last fall, 338 students enrolled in the fouryear Course in Journalism, the largest number in any school, course, or department of journalism in the country. These results have been accomplished at the University with a minimum of cost to the state for laboratory equipment. Wisconsin's Course in Journalism has had only four rooms in South Hall, one of the oldest buildings on the campus. Some day, let us hope, the University will have a School of Journalism, with a building of its own fully equipped to provide adequately for the steadily increasing number of students who desire to secure the best possible preparation for the profession of journalism.

Willard G. Bleyer

Historic North Hall

The Law School

Harry S. Richards Dean

## Law School

THE LAW SCHOOL was the third of the present divisions of the University to be established. In 1868, a one-year course was organized. In 1881, the course was extended to two years; and in 1894, to three years. In 1905, the present prelegal requirement of two years of college work for candidates for degrees was adopted. By a recent action of the Regents, three years of prelegal college work will be required for all candidates for the degree of Bachelor of Laws. This summary serves to show the rapid development in educational opportunity in this state, and the steady policy of the university to advance the standards of the Law School as rapidly as educational conditions permit. In this respect its practice has been in advance of that of most states, particularly in the requirement of two years of college training before beginning the study of law. Wisconsin was the first state university, and the first school, but one west of the Alleghanies to take such action. It was not until 1925, that the Association of American Law Schools made such a requirement a basis for admission to membership.

Pioneering in advance standards, for a time curtailed the attendance, but since 1915, the school has grown steadily, and since 1924, the attendance has been the largest in the school's history. Of the sixty-four university schools in the Association of American Law Schools, this school ranks twelfth in point of attendance.

Looking Down the Hill from the Law School

Bascom Hall at the Summit of the Hill

## Letters and Science

WE CALL our College of Liberal Arts the College of Letters and Science. The two names are precisely the same. Students of medieval history will tell you that the liberal arts were composed of three literary subjects and four scientific subjects, and that they were called liberal because they were regarded as peculiarly useful in educating a freeman. It was the Romans, a very practical people, who governed the civilized world for centuries, that worked out the idea and passed it on to the Middle Ages and to us. The idea that the liberal arts are basic for the education of freeman. There is not a subject in the Roman list that is practical in our sense of the word.

It seems, therefore, that there is good hard-headed backing for the belief that some of the most useful subjects are not practical, that is, gainful. Is it not so? One can not or would not, in many cases, sell for money his appreciation of a great poem or speech, or work of art, or the thrill of great scenery, or the joy of music, or the sympathy with fellow men which grows with the reading of history, or the wonder of nature heightened by science, or of human nature, disclosed by philosophy, or of goodness found in the New Testaments.

The liberal arts you studied in your College days-I speak to you old grads of the future, even though you are in your senior year when these words are written,-whether you took a special quasiprofessional "course" or not, were meant to help you discover the

George C. Sellery Dean greatest goods a freeman may possess. How has it worked out?

Looking Across Lincoln Terrace

A Class at the Madison Free Library

Mary Emogene Hazeltine Dean

## Library School

ONE OF THE MOST inspiring developments in America has been the growth of free libraries and the increasing use made of them. In the comparatively brief period since the founding of the American Library Association, in 1876, American public libraries have increased from 2,000 to 18,000 today. In Wisconsin alone there are 218 public libraries, with $1,750,000$ volumes, showing a home circulation of $7,500,000$ a year.

The Library School, founded in 1906, attains its majority this year. A school offering an intensive professional course, covering a single year, with a new class of specially qualified students every year, must necessarily have a unique history. Its annual registration is not large, since only one class is in residence in any year, but over a series of years both numbers and influence assert themselves, for the product of such a school is 100 per cent.

The School summarizes its progress for two decades in terms of students as follows: 645 have graduated and entered the field of library service.
In terms of influence, the four hundred and more graduates in active service are filling administrative positions of great responsibility as librarians of public, college, school, and county libraries. In the last decade, library work itself has entered many new fields, and in all of them the graduates of this school have done pioneer work, carrying forward the ideal of the School-to be found in the vanguard of all library effort.

The Gym from the Library
Page 44

The Wisconsin General Hospital

## Medical School

ATHOUGH the original charter of the University provided for a medical school and a medical faculty was appointed in 1855, over half a century passed before instruction was offered in the first half of the medical course, in 1907, and over three quarters of a century passed before a complete medical course was offered and plans were provided for a building especially designed for instruction and research in the medical sciences. The first class to be graduated in medicine at Wisconsin will be presented with degrees as doctors of medicine at Commencement next June. It is hoped that work on the Service Memorial Institutes which are to provide special facilities for teaching, research, and state service in the medical sciences will then be well under way. The time is most opportune. The importance of scientific knowledge on which to base measures to promote health and control disease is to-day appreciated as never before.

Charles R. Bardeen Dean

Science Hall

Music Hall

Charles H. Mills
Dean

## School of Music

IN KEEPING with the spirit of the 1928 Badger, A Retrospect of Wisconsin, it is a pleasure to look back over the arduous path traveled by the pioneers in this work at Wisconsin and to gather courage and hope for still better things through the history of their early struggles.

It is a far cry from the humble beginning in 1895, when a few students who were interested in music were housed in "Ladies Hall,"now known by the name of Chadbourne,-where, with inadequate equipment and few instructors, they inaugurated the School of Music for the University of Wisconsin.

Our historical notes tell us that in 1900, "Library Hall" was given over for the use of music students, though it was not until 1910 that its name was changed to Music Hall. We also fell heir to the "Chapel" which has been remodeled in the year just past into an attractive auditorium.

Since 1914 , our School has grown from 65 regular students to 137 , with special students increasing from 19 to something over 150. The course has been improved until now the regular four-year course in the School of Music, leading to the degree of Bachelor of Music, is recognized throughout the country.

Chadbourne Hall, the First Home of the Music School

The Nurses Dormitory

## Nurses School

THE COURSE in nursing was organized and accepted its first students in the fall of nineteen twenty-four. It graduates its first class of fifteen students at the June commencement, nineteen hundred and twenty-seven. The addition of the course in nursing to the curriculum of the University has met with great popularity among the student body as evidenced by over a three hundred percent increase in the enrollment this year as compared with the enrollment of two years ago.

The Course in Nursing offers to the young women graduating from high school the opportunity to receive, through the University, an education which fits them for the greatest of the humanitarian services.

There are two courses offered. A three year course leading to a certificate of graduate nurse and a combined five year academic and nursing course leading to a B.S. degree and a certificate of graduate nurse.

Helen I. Dense
Dean

Along the Walk Back of Lathrop

The Boathouse on the Shores of Mendota

George Little Director of Men's Athletics

## Men's Physical Education

REALIZING fully that college athletics and physical education should be conducted on the basis of participation fcr all, we sincerely hope to interest and provide for as many young men and women of Wisconsin in sport during the year 1927-28 as possible. We appreciate that we have a distinct obligation to the entire student body of the University in several respects. It is our duty to provide sufficient facilities to sponsor a broader program that will enable all to realize the full advantages of our natural environment here, permitting them to indulge in some form of outdoor sport in the fall, winter and spring.

Secondly, we desire to secure sufficient indoor facilities conductive to an extensive indoor program during the winter period. Our staff of men who coach the inter-collegiate teams, with the cooperation of the students, will make every effort to place the University of Wisconsin in a substantial position in Big Ten competition. We want our teams to be characterized as full of fight, sportsmanlike and well-drilled in the technique of their respective games, and above all, representing our great University always in a manner that will make us proud to know them as the "Battling Badgers."

The Gymnasium

Lathrop Hall

## Women's Physical Education

P
HYSICAL EDUCATION for women at Wisconsin started in 1878 with some volunteer classes in gymnastics, held in Ladies Hall, now Chadbourne, under the direction of an untrained, but enthusiastic, freshman. In 1889 Regent recognition was given and a small room used jointly with the Music Department became the first gymnasium. However, the work was not financed by the state, a small fee being paid by each student. The following year it was made a requirement. Since then the growth has been rapid and constant.

1910 was a significant date, for it was in that year that Lathrop Hall was opened. In 1911 the professional course for the training of teachers were established. Since then the Field House has come and the W.A.A. cottage on Lake Mendota where one may find a camp fire and rest after a long hike. Despite all this we have expanded so rapidly and Wisconsin girls have become so interested in athletics that we have outgrown our quarters and are looking forward to a time, not far distant, we hope, when Lathrop may be taken over as a Women's Union and when a new and adequate gymnasium will be built adjacent to enlarged and permanent fields.

Blanche M. Trilling Director of Women's Physical Education

Barnard Hall

The Cool Waters of Mendota-An Inviting Escape from the Summer's Heat

Scott H. Goodnight Director of Summer Session

## Summer Session

IT IS ONLY a few years ago that the Badger omitted all mention of the Summer Session. Then a versatile editor bethought himself of it. It has had its regular place since that time, and now one hardly understands how such a characteristic part of our academic life could ever have been omitted.

Requests are continually coming to make the Summer Session longer. Particularly graduate students and teachers who want an opportunity to make more rapid progress toward the coveted higher degree, are urging this request. The first answer will be given in the summer of 1927, when a staff of eighteen selected professors will remain in residence and conduct graduate courses for nine weeks, from June 27 to August 26.
The six-week session will be conducted as usual, running parallel with the first six weeks of the special graduate courses, and quite independently of them. The innovation is frankly an experiment, to learn whether there is a real demand for a longer session during the summer. Should there prove to be one, it is quite possible that the next step may be to lengthen the entire session to nine weeks, or even ten. While there are real objections to the plan, it will nevertheless be carried out, if experience shows that there is a demand for it. The sole function of the Summer Session is to serve, and it will guide its course exclusively by the demand for its educational service.

Wisconsin Summer School for Working Girls

The Home of the Extension Division

## Extension Division

SINCE I am comparatively a newcomer in the University of Wisconsin family, I cannot, with some of the other deans, carry Badger readers back to the days when the "faculty" of University Extension consisted of Professor Lighty, and its "equipment" included a battered kitchen table, a chair, and a couple of letter files in an obscure corner of Bascom Hall

Nor to the opening chapter of its second important department about which Frank Avery Hutchins writes: "In the fall of 1908 there were record slips on a spindle for ten or twelve loans
which have now grown into the package library service which has brought information and enlightenment to hundreds of thousands of Wisconsin people.

But my regret at not participating in the achievements of yesterday is not unmixed with elation at the opportunity to participate in the achievements of today and tomorrow. For University Extension is away on a great race toward the new goal it has taken as its own-"The whole University functioning in the life of the state."

The high task of the new University Extension is to wipe out every line which divides the student off the campus from the student on the campus. Its chief problem will be to surmount every obstacle which prevents the man or woman in the most remote corner of the state from profiting as much as the student at Madison from "all the knowledge and all the insight of the University." Its success, I think, will come not by multiplying the activities of a greater University Extension Division, but by more perfectly transmitting to the people a greater University of Wisconsin.

CLASSES

## The Class of 1927

With the circulation of this Badger of the Class of 1928, the Class of 1927 has practically closed its active record as an undergraduate body. But little remains, at this time, except the ceremonies of Commencement. Then with a four-year course run, with an enviable name to leave behind, the class will join that great body of alumni which does not let Commencement mean an end of service to Wisconsin, but takes it as an opportunity to do even greater work for the University as part of that large body of active graduates.

If one word could be used to summarize the history of the Class of 1927, that word most certainly would be SERVICE. It has not been its lot to institute or invent. Coming to the University when its tenor was disturbed by influences both internal and external, we have experienced the birth of the New Era, which is now well established, and we leave the Unisity in a healthy, happy situation. Nineteen hundred and twentyseven has had an active part in the re-adjustment.

Other classes have been greater progenitors: 1927 has perpetuated and expanded on their endeavors. Mothers' Day, Father's Day, the All-University Religious Convocation, Gridiron Banquet, the Memorial Union, have all been started during our career by other classes. The duty and privilege of firmly establishing these institutions as part of Wisconsin has been the outstanding contribution of 1927.

On the eve of our departure from undergraduate life at Wisconsin we see the Memorial Union building taking definite shape -a work in which the Senior Class took an active part. Returning in 1932, for our five year reunion, we most probably will see a Wisconsin stronger and more active than the one which we are now leaving. Then we can better tell just what part our work took in making it so.-Vernon G. Carrier, President of the Senior Class.

[^2]

## The Class of 1928

The Class of 1928 enters upon its last year at the University of Wisconsin with the sincere self-assurance that it has partaken of its share in the activities and life of the school and has profited to the extent that it has served.

Its members with their widely diversified personalities and opinions have contributed to the advancement of ideas. Their loyal co-operation and united effort have been rewarded by the achievement of success in the numerous activities they have undertaken. Co-operation among the individual members and between the class, the other classes, and the University has resulted in mutual accomplishments that have been of great benefit in the moulding of character. The members have organized to the end of establishing strong and concerted friendships.

The class of 1928 rejoices in its privilege of seeing realized that splendid monument to the loyalty of the members of the University of Wisconsin and its alumni-The Memorial Union.-William E. Clark, President of the Junior Class.

Treasurer

Helen Keeler Secretary

John Doyle Sergeant-at-arms

## The Class of 1929

At the mid-point of its career the Class of 1929 pauses to consider the already written past and the future that is before it. Not quite two years ago this class unhesitatingly assumed the responsibility of carrying on the aspirations and ideals of the true Wisconsin spirit. The faith placed in this organization was not unfounded for as it gradually assumes each duty and problem, " 29 " proves itself capable of making an unsurpassable record.

In work and in play the class is achieving success. Realizing the part that the Memorial Union is to play in the future Wisconsin, the Class continues to give the utmost assistance in its projects. Individual members are stepping into the ranks of the leaders on the athletic field, stage, editorial desk, governing boards and every extra-curricular activity, yet they do not forget that their own interests are to be subordinated to those of the University and their Class. Loyal co-operation is the predominating factor in every task performed.

The Class of 1929 is able to turn with this same unity to events of more recreative nature and realize all expectations in that field. It was due to this ability that the "Soph Shuffle" was made a social occasion surpassed by but one.

A unified body, this class is confident that it will be able to fulfill all its ambitions for the future. As it has already worked to bring glory to its Alma Mater, so it will increase its efforts to make this ideal University an actuality rather than a dream.-Edward P. Cole, President of the Sophomore Class.

## The Class of 1930

The class of 1930 has effectively executed its initial projects in the various campus activities by the united support which it has given the committee chairman. Many members of our class have shown so much ability that we believe our future service for Wisconsin will give us even more cause for pride than has the start we have made. As an indication of this ability, there is the annual Freshman Frolic, which this year was highly successful and profitable, and which left in our treasury a considerable surplus to be donated to the Memorial Union fund. There is every reason to believe that the class of 1930 can furnish its share of true Wisconsin leaders, and can perform its share of constructive service.-JEROME Sperling, President of the Freshman Class.

The night blanketed with spray of stars.
The council fire striving for the heavens, making another Sun.

Who knows what men say who have been through The Mysteries together and who meet about a Fire!
Think of Yourself!

ALUMN I

Charles L. Byron
President of the General Alumni Association

As students in the University, the thought soon seeps into our consciousness that certain instructors stimulate and inspire mental curiosity along sympathetic lines of research; that some studies lend practical facts whose application brings improved efficiency on the farm or in industry, and that an accurate knowledge of social and economic facts aids in the progress of our day.

In other words, as thinking students we begin to realize that the University of Wisconsin incorporates the ideals as expressed by President Glenn Frank-
"the ideals of sound scholarship, of productive research and practical service, of freedom to investigate and courage to follow the truth wherever it may lead.

In the classroom and other phases of college life, wherever the seeds of these ideals find a fertile field, there will be a budding in student life and a blossoming in alumni life which will enliven a desire to help the University to maintain its ideals.

It is important that the student cultivate an enriched subsoil that the growing or giving powers may develop naturally during alumni life. If the field is barren in the student, college spirit is apt to be wanting in that fellow as an alumnus.

During the last several years, the senior classes, as a unit, have joined the Alumni Association, thereby showing their interest and good-will in starting an Alumni life of helpfulness to the University.
As I view it, the responsibility of maintaining these ideals should be shared in no small measure by the Alumni. United we can use our strength to the ultimate benefit of our University.

The 1926 Reunion

## The General Alumni Association

The General Alumni Association is a voluntary, co-operative enterprise, animated by a desire to serve the University, graduates, former students, active and prospective students. It is an organized, informed, interested, active force for the purpose of correlating the activities of the alumni with students and the faculty-a force that may come to the defense of the University in time of need, and that may support it at all times; it is a medium through which graduates and former students may render effective assistance to the University, thus enabling the University to render greater service to the state and nation, to exert a broader influence for good, and to improve upon the high standards and great accomplishments of the past.

The program of the General Alumni Association proposes to keep alumni informed of the progress and policies of the University through the publication of a magazine, which shall carry to individuals information of the accomplishments of the University; through personal contact, and through correspondence with individuals, groups of individuals, and local clubs by the secretary and the staff of the General Alumni office; and through the maintenance of a calendar of travels of faculty members and prominent alumni so that local clubs may be informed of their visits and call club meetings for the purpose of securing first-hand information from them. The program of the General Alumni Association includes "the organization of Wisconsin Clubs whose duty and responsibility it shall be to represent the interests of the University in the community in which it exists; to protect her name, and to make contacts with local organizations that the service the University is rendering may become known to the community; to crystalize alumni opinion, to keep alive alumni loyalty, to be able to function in an effective way on short notice, and to bring alumni into personal contact with one another as a source of congenial companionship and a means of developing greater loyalty for the University."

John Bergstresser

John Bergstresser - The A'umni Recorder

Ex-President Birge once said: "The former students and graduates of the University have a most important part in its work. They have shared the life of the University, they know what that life means for themselves and for others - most of all they know what it means for the state. Our former students and graduates must be centers of University life, still vitally connected with the University.

They must be not merely individual centers of influence but they must strengthen themselves and their fellows by uniting so that their influence may be multiplied by union and made permanent by organization."

There are more than sixty thousand graduates and former students. As individuals they may constitute a tremendous force for a greater and better Wisconsin, but as an organized group, that force may be multiplied many times.

In a message to alumni last fall, President Glenn Frank said: "As the year opens, there is a challenging air of expectation about the University. Granted genuine team work on the part of the administration, faculty, students, alumni, and state, I think we shall at least begin the writing of a new chapter in Wisconsin history this year."

President Frank's challenge has met with a hearty response. From Maine to California, from Canada to the Gulf, and in foreign countries, alumni congregated during the year to dine, dance, review the history, and discuss the achievements, the policies, and the progress of their Alma Mater. In some instances interest is bringing the clubs together weekly, and in many places informal meetings of groups of alumni proved so interesting that they have become permanent organizations.

Through the General Association, alumni are "multiplying their influence for a bigger and better Wisconsin" and taking a part in the "writing of a new chapter in Wisconsin history."

Bart McCormick
Alumni Association Sccretary

## Wisconsin's Roll of

## Distinguished Alumni

EVERY YEAR new achievements are accomplished by Wisconsin graduates and every year Wisconsin's roll of distinguished alumni accordingly must be enlarged.

That the alumni roll may include all those worthy of the honor, the idea of a progressive alumni section was inaugurated by the 1927 Badger and has been continued as the "Who's Who" section of the 1928 Badger.

Selection of alumni appearing in this year's alumni section has been based on the recognition candidates have achieved with consideration to their respective ages and sex, and the service they have rendered to the community and to the University during the immediately preceding year.

The committee has strived to cover a broad field of diversified activities and to discover new talent. By so doing, they believe that the group presented in this 1928 Badger is truly representative of Wisconsin alumni.

Herbert E. Bolton, B.L., '95 Was knighted in 1926 by the King of Spain in recognition of his work in Spanish American History. He also published this year a four volume English ediwhich is regarded by scholars which is regarded by scholars as one oftributions ever made to Pacific Coast histofy. made to

Frederick H. Clausen Has been president of the Memorial Union Executive commorial Union Executive comyears ago. He is at present personally directing the campersonaly for funds. Harold Cornelius Bradley Graduate Student, 09-10 Has just been appointed research consultant in the U. S. army chemical warfare service. He has been chairman for the past year of the Committee on chairman for Wisconsin's Fathchairman for Wisconsin's Fathchairman of a new Madison Memorial Union Committee

Arthur H. Curtis, B.S., ` 02 Has recently been appointed head of the Department of head of the Department of ern University Medical School. ern University Medical School. American Gynecological Society for 1927 and Chairman of Section on Gynecology and Abdominal Surgery, American Medical Association for 1927.

Frederick R. Hamilton Ph.B., '06; Ph.M., 17 Was inaugurated president of Bradley Polytechnic Institute, Peoria, Ill., last March. He has done extensive work in studying problems of college administration, in recognition of which he received the degree of Doctor of Philosophy from Columbia University in 1924.

Asa G. Briggs
ASA G., BRIGGS ${ }^{\prime}$ LL. B., 87 St. Paul attorney, has been reelected president of the St. Paul Association of Public and Business Aflairs, made up of 4,000 of the leading business and proTessional men in St. Palu. Throughout his life in st. Paul nected with the important civic and public matters.

John Adrian Dollard B. A., 22

Became assistant to President Max Mason, University of Chicago, in November, 1926. He was former secretary and campaign manager of the Wisconsin Memorial Union Building Committee In the capacity of secretary of the Faculty Committee on Men's Dormitories, he made the original dormitory survey.

Margaret HDDubler B.A., '10; M.A., 24 Established this year the first dance major course in America She has created a new school of dancing which has had an important influence in America. Her dominating idea is to bring out any talent her pupils have thereby helping them by art to appreciate life.

Ralph. Dorn Hetzel
A.B. 06; LL.B. 08 Was elected president of the Pennsylvania state college in 1926, coming to that institution after nine years as president of the University of New Hampshire. During his administration at New Hampshire, he raised the standing of the institution from a state college to that of a University.

Burr W. Jones
B.A. 70 ; LL.B., 71 ; M.A., 74 After five years of service as justice on the supreme court of Wisconsin, has voluntarily retired and is now associated with law firm in Madison. During his term on the Supreme bench he wrote a treatise on "The Law of Evidence in the Ninties" Previously, Mr. Jones was professor for thirty years in the Law School.

Henry A. Huber, LLB., '96 Was relected Lieutenant Govetnor of Wisconsin in 1926, to Erom a second two year term. the people of Dane county in the Senate. To help spread education and to lend assistance to educational institutions has ever been his aim and ambition.

Louise P. Kellog B.L., '97; Ph.D., 01; L.D., 27 Has just completed a book, "The French Regime in Wis-: consin and the North West." She is the first woman of this University to be granted the honorary degree, Doctor of Letters, which she was given last June, upon the occasion of the twenty-fifth anniversary of the earning of the degree of Ph.D.

C. A. Johnson, B. M. E., 91 President of the Gisholt Machine company and former president of the Wisconsin Manufacturers' Association, has been instrumental in bringing about a tie-up between the industry and the University. He is a member of the Memorial Union Executive committee and a committee to study the methods of securing a new field house.

## Kemper K. Knapp <br> B.S., ${ }^{79}$; LL.B., ${ }^{82}$

A prominent Chicago lawyer, has been one of the largest contributors to the University loan and scholarship funds. He also is a director of numerous insticutions, among which are the Gary State Bank, Universal Portland Cement Co., the North Western Casualty and Surety Company and the South Chicago Savings bank

Stanley, R. Latshaw, '06
Was elected prisident of the Butterick Pattern Company, New York publishers. He is a director representing the magazines in this country and Canada on the Audit Bureau of Circulations, and on the governing board of Nation's Business.

Bart E. McCormick
Was recently elected Secretary of the General Alumni Association, terminating a sixteen year period of service as high school principal and city superintendent of schools of La Crosse Wisconsin. He is well known as an efficient organizer.

Paul Odin Nyhus B.S.A., 26

Was just appointed U. S. Commissioner of Agriculture to China. The purpose of his post is to investigate agricultural conditions in China and to build up trade relations between that country and the United States. He was formerly statistician for the Un!ted States department of Agriculture

## Walter A. Rogers

A.B.C.E., '88; C.E., '97 President of the Bates and Rogers construction company which has built many large constructions throughout this coun try and Canada. Among the the structures completed by this company are the govern ment dams on the Ohio River, many railroads, the reclamaand the eighteen span viaduct and the eighteen

Mrs. C. J. Otjen, B.A., 14 Was elected president of the Wisconsin state league of Women Voters at the convention of the League in Milwaukee in November. Mrs. Otjen has always taken a great interest in public affairs and has held numerous positions

Max Charles Otto B.A., '06; Ph.D., 11 Professor of Philosophy at the University of Wisconsin, has recently finished a book entitled, Natural Laws and Human Hopes," in which he continues the discussion of the relation of science and higher life which he began in his earlier book, "Things and Ideals.

John W. Reynolds, LL.B., ' 02 Was elected attorney general of the state of Wisconsin in 1926 Previous to his election, he practiced law at Green Bay for nineteen years. He also served as district attorney of Brown county for four years, and has been actively interested in politics during his entire life.

Calvin Swenker, B.A., '11
Was appointed state commissioner of banking in February. Previous to this position, he was cashier of the First Na tional Bank of Chippewa Falls four years and an examiner on the State banking department or ten years. He is also a diChippewa Falls. Chippewa Falls.

Otis Wiese, B.A., 26 Who has been out of school only one year, is now associate editor of McCall s Magazine, a fiction 2500.000 with a circulation of , 500,000 readers. While in he university, Wiese was one ates.

Israel Shrimpsky, ex 88 Conceived the idea for the Men's Dormitories which were completed this last year and is therefore personally responsible for these additions to the University buildings. He has always been very active on University boards. Mr. Shrimpski is a prominent lawyer in Chicago

Daniel Steele, A.B., ‘18 Was recently appointed Sales and Advertising manager of Wilson Brothers company, one of the largest men's clothing wholesalers. Formerly, he was advertising manager and manager of one of the merchandising departments. Mr. Steele sug gested the merchandising ideas that have been adopted by the clothing and furnishing in-
dustry this year.

Maysie Stone, B.A., 23
Won two art prizes last year at the Pennsylvania Academy of Fine Arts, thereby establishing a new record in that 125 yearold school where students are glad to win one prize in a year. Miss Stone has recently.. had a sculpture called Toil accepted for the annual exhibit
of the Academy. of the Academy.

## Do you remember?

The deep woods swathed in shadows, the Wickiup of the Tribe, a spot of light in the Sun.
Voices
Laughter
The smell of willow smoke.
The young men, the young women, ablaze as the hills in Autumn
The flashing of red blankets.
The subtle softness of doeskin on young bodies

Where were the thoughts?
Was the laughter because the forest lay in shadow?
Because there was a swallow darting over the lake?
Where is your memory? Think of yourself!

"Varsity"

## Wisconsin Traditions

In July, 1848, the Legislature of the State of Wisconsin granted a charter for a State University to be established at Madison. In the fall of that year the first Board of Regents met and the Universitatis Wisconsinensis became a reality. Our University has always stood out among the educational institutions of the country as one which has ever fostered the spirit of truth and as one which has ever sponsored investigation and the search for that truth.

It is inevitable that a university which has so rich and noble a background should be the home of many traditions, both in and apart from the curriculum. The student body has not been insensible to the beauty and value of these traditions which have come down to it from out of the past, and today one finds at Wisconsin a wealth of custom and usage that has few equals in the country.

Some of these traditions, like the green cap for freshmen, take quite tangible forms and continue year after year. Others have come to be connected with certain special days each year, and it is with these latter that this Special Occasions section is concerned.

The Assemblage

Prexy-Past and Present

Marching up the Hill

Prof. Julius Olson

## Varsity Welcome

The first official welcome that a freshman receives when he enters the University is one of the most impressive of ceremonies that takes place at Wisconsin during the entire year. Sophcmores, Juniors, and Seniors gather in a body and march down the Hill to greet the newcomers at the foot and then escort them to the Exedra on Lincoln Terrace where the University faculty, the student body, and the State have their spokesmen welcome the Freshman Class.

A more fitting ceremeny than this to introduce the new students to the faculty and the other classes could not well be devised. To see the classes all marching up the hill in a body is significant of the comradeship and the school spirit of Wisconsin. That the new class should be received by the student body is highly proper and is expressive of the real interest that is displayed in each year's Freshman Class.

## Father's Day

Father's Day has become one of the finest Wisconsin traditions. It's the day when the student body and the faculty play host to the fathers of Wisconsin men and women. It's the day when "Dad" comes to Madison to see what the University really does look like and to see what it really does to educate the younger generation. It's that day of days when home ties, severed in the fall before the opening of college, are first renewed, bringing attendant joy.

This year Father's Day was distinguished by the defeat that Wisconsin suffered at the hands of Minnescta. However, the day was wonderful, and the game exciting; so the defeat did not rancour. An entire section of the stadium was devoted to the visiting fathers and their sons and daughters, and it is a well known fact that that section did more and better cheering than any other that afternoon. "Dad" became a true Wisconsinite and almost outdid his son or daughter in singing the praises of our "Alma Mater."
After the game President and Mrs. Frank held open house for father, son, and daughter on behalf of the University and the faculty. The Third Annual Father's Day banquet at the Men's gymnasium in the evening was a very successful affair where the faculty and the fathers became acquainted and discussed the University, and, perhaps the ycunger generation.

## Homecoming 1926

No tradition of college days is more cherished by the Wisconsin Alumni than Homecoming. Homecoming-what visions that conjures up of crisp, brisk days, a seething mob cheering in the Stadium, the eleven men in Cardinal, the stirring strains of On Wisconsin, the Band in Cardinal capes, and, best of all, the renewing of college friendships and the reunion of true friends. On the surface, it is a time when blitheness and jolly good fellowship seem to hold sway, but deep in the hearts of Wisconsin men and women, Homecoming is a period of re-consecration to the ideals for which Wisconsin has always stood.

## The 1928 Prom

The State Capitol was transformed into a Spring Garden, 1200 couples danced to the scintillating rhythm of a marvelous orchestra; laughter and gaiety were everywhere, and the 1928 Prom became part of Wisconsin's history. Wisconsin being at her best that night, cast off her cares, and danced in a new day. That night of February 5, when President Frank and Governor Zimmerman, both symbols of a New Wisconsin, bade the University make merry, was a fitting climax for a brilliant social season at Wisconsin, a night when romance filled the air, and youth and beauty reigned supreme.

The 1927 Military Ball

R. White
G. O. Stephens

N . Thaver

## Military Ball

This year's Military Ball was, in all probability, the last University function that will ever be held in the State Capitol. With the completion of the Union early next fall, both Prom and the Military Ball will be held there and the Capitol will be used for legislative purposes only. With this distinction and beautiful decorations the Ball this year was a distinct success, and the martial aspect of the affair lent to it a particularly pleasing atmosphere. The affair, organized and managed as it was in true military manner, with chairmen all wearing truly military titles, was a representative Wiscon$\sin$ social event.

Mother's Day at the A. T. O. House

## Mother's Day

The mothers of Wisconsin men and women come to Madison in the Spring to see the Campus in all its glory, to see Wisconsin at her best. From far and near came mothers to know more intimately the interests and pursuits of their sons and daughters, and Wisconsin has kept this day apart for the purpose of expressing her devotion to Mother. This Spring Mother's Weekend was distinguished by the most wonderful weather of the season and Wisconsin did her utmost to make Mother's stay at the University one which would linger long in the memory of those who came.

Margaret H. Birk Chairman

The Maypole Dance on the Upper Campus

When we consecrate our Dead

## Memorial Day

Once again Wisconsin has paid tribute to her glorious dead. The R. O. T. C. and the University Bands lent a martial aspect to the exercises which were held from Lincoln Terrace. The wreath-bearing ceremony, when wreathes are laid at the feet of the Great Emancipator by women of the University in honor of those who have laid down their lives for their country, is a fitting expression of the regard and honor in which Wisconsin holds her heroes.

Lest we forget

After the Float Parade

## Venetian Night

In general, Spring at Wisconsin is a very beautiful season, but once in a while that beauty is marred by storm and rain, and just such a storm raged on the day that had been set aside for the State Track Meet. That evening, however, the weather cleared up and Venetian Night was held according to schedule. Unfortunately the rain had done its damage and the pier decorations and the floating pageant suffered therefrom. Though the weather was not propitious, the spirit of the night remained unmarred and thousands of Wisconsin men and women gathered on the shores of Lake Mendota to see the brilliant and beautiful exhibition of fireworks.

The Water Carnival

The Junior's Farewell to the Seniors

## Senior Swing-Out

There comes a time in the course of a woman's college career when she has become a Senior and is about to leave the place that has been her home for four happy years and those who have been her college companions. Wisconsin has a beautiful traditional ceremony which symbolizes the farewell of the Senior women to the Juniors. The daisy chain precedes the march of the classes and the torch is passed from Senior to Junior on Lincoln Terrace at the head of the Upper Campus. The Concert Band, the dew on the greensward, the mellow glow of a Spring evening, all unite to give the Senior Swingout an atmosphere which is not easily forgotten.

The Second Outdoor Commencement

## Commencement

Just an hour before sunset when the Western sky was all ablaze, for the second time in Wisconsin history the Stadium at Camp Randall witnessed the passing of another Senior Class. The beauty of the day and the tranquility of the scene will always linger in the memories of those who bade farewell to Wisconsin at that time.

## Keystone Council

Keystone is a governing council of W. S. G. A., composed of the presidents of all the Women's Campus Organizations. The organization sponsors Varsity Welcome, considers the advisability of any new organizations on the campus, submits nominations for W. S. G. A., and acts as an advisory board in general. Keystone is constantly looking forward, and the prestige it enjoys is the result of long service to Wisconsin.

## Women's Self Government Association

Governing Board of the Women's Self Government Association. Members are elected in 110 of the largest Women's Houses.

A Badger of several years ago records the origin of W. S. G. A. in 1898. The emphasis placed upon government in its present title suggests the initial purpose of the organization, and also indicates one of its primary functions today. The letters W. S. G. A. hardly suggest the variety and color of its interests. W. S. G. A. does not govern to make rules, rather it promotes and advises scholarship, friendship, and worthy charities.

The Junior Advisory Committee promotes friendship with new students and does it during the early days that the Freshman Women are at the University.

The Scholarship Banquet aims to encourage sincere scholarship to which one girl from each organized house is invited. At this banquet freshmen women are told about the Scholarship Cup which W. S. G. A. awards at Swingout to the freshmen woman having the highest scholastic average.

Over two hundred women co-operate in administering the government which is self imposed. W. S. G. A. Board, Council, and the District Chairman are the means by which the government is successfully run.

The organization is eager and willing to co-operate in and foster undertakings of the student body. This loyalty and willingness to serve has been demonstrated this year by the participation of the women in Varsity Welcome, Homecoming, Mother's Day, All-University Religious Services, Memorial Union, Memorial Day, Father's Day, and in Athletic Tournaments.

The Friday Cozies were managed by a social committee, and acted as a medium to get acquainted. The Christmas party was an event that many looked forward to, and three hundred enjoyed it immensely. The Fall Tea for freshmen, the Junior Advisory Teas, at Miss Davis apartment, the Valentine Tea, and St. Patrick's Party were also special events fostered by W. S. G. A.

## Women's Class Organization

Women's Class Organizations have ever played a large part in unifying the women of the University. In order to make this unification more compact, the offices of Vice-President, Secretary, and Treasurer have been eliminated; so that only the President, with the help of a selected committee, is the one that guides the destinies of her class. The class presidents are now members of W. S. G. A. council, and can therefore work more directly with her class to the betterment of its interests. These officers strive for friendship and cooperation in their respective classes and also between classes, so that understanding becomes more complete.
Officers of the classes are appointed to serve on social committees of W. S. G. A. Blue Dragon handled the sale and distributed senior women's rings as in former years. Red Gauntlet and Green Button officers have also been on social committees, while the president of Green Button, with her contact with freshmen women, can show W. S. G. A. what they need and bring about the necessary results.
Yellow Tassel prepares senior swingout, and Blue Dragon helps with the commencement plans of the senior class.

The Spring Banquets are the scene of the nominations of the presidents of the various classes. At these banquets the necessary unification is brought about.

## Young Women's Christian Association

The Y. W. C. A. is an organization for all women interested in working and discussing together in Christian fellowship, that they may thus develop their spiritual lives. It is the purpose of the association to so develop Christian fellowship among its members through active service and friendship that the life of the college community as a whole may be made better.

The association is built around a cabinet which in turn is supported by various commissions, clubs, sub-cabinets, and committees. The cabinet is the official council and includes all the officers and heads of departments.

Sophomore Commission is a grcup of thirty girls elected from the freshman department in the spring of their first year, on the basis of interest and leadership capacities which they have shown in their freshman Discussion Groups.

Their primary interest is that of organizing and directing a dozen freshman groups which convene weekly thrcughout the year for the purpose of informal discussion of questions pertinent to Wisconsin women. These discussionals have a threefold purpose: that of stimulating thought and talk along various lines; that of acquainting new women in the University with one another, and with the organization of Y. W. as a whole.

Sophomore Commission also has the work of compiling and selling the official Y. W. C. A. calendar in the fall of each year.

## Sophomore Y. W. C. A. Clubs

The Sophomore Clubs are an outgrowth of the Freshman Discussion Groups, and as yet are in the experimental stage, this being the second year of their functioning. They are formed with an idea to bring sophomore women together, to enjoy new friendships and new ideas, and to create a medium through which sophomore transfers from other institutions can make friends and be drawn into Y. W. C. A. activities.

This year they have made a study of comparative religions in an effort to better understand the contributions of the Christian religion.

The three clubs this year were headed by Catherine Howard, Marian Walker, and Helene Boyer. An important achievement of the clubs was the Association Paper, "Y's Drop O' Ink," the editors being: Margaret Alsop, editor-in-chief; Judith Ninman, managing editor; and Edna Trumbull, Dorothy Davis, Catherine Howard, Marian Walker, Jane Fizette, and Charlotte Sattler, editors of features, social activities, exchanges, copy reading, humor, and art, respectively. Elma Morrisey was business manager, and Jeanette Piltz the advertising manager.

The years' activities were officially opened on November 4 with a banquet, of which Dorothy Davis was general chairman. The advisors of the clubs constituting the executive committee are Edith Hope Smith, Margaret Sniffen, Elise Roberts, Josephine Lucas, Ruth Sylvester, Kathryn Lain, and Dorothy Bucklin.

The Fortune Teller Wigwam

## Freshman Commission

Freshman Commission of Y. W. C. A. is a group of twenty girls, chosen in March from the weekly discussion groups sponsored by the association. This year the number on commission was reduced from thirty to twenty, while the number of freshmen groups to be organized next fall was increased from ten to twenty. This change will make each commission girl a group leader and it is believed that better cooperation will result from this equal division of the work. Care was taken that each girl chosen should have high scholarship, leadership ability, and an attractive personality. These qualities are essential for the leader to have in order to stimulate her discussion group and thereby develop the new girl's' interest in campus and current problems, enlarge their acquaintances and friendships, and initiate them into the larger sphere of work carried on in Y. W. C. A. The purpose of the Commission is to organize and lead freshmen discussion groups, put out the Y. W. C. A. calendars, and discuss problems of current topic and ways of helping the freshmen to get the most out of University life in the most worth while way.

The Fireplace in the W. A. A. Cottage

## W. A. A.

Intramural athletics among the organized houses on the campus, class teams in the various sports, week-ends in the attractive new cottage on Lake Mendota are fostered by the W. A. A. to interest the University women in athletics.

The governing board, consisting of five officers and a representative in charge of each sport, contracts all business and organizes the work of the association.

| Final Emblem Wearers |  |  |  |

The final emblem wearers receive the highest possible honor from the Physical Education Department. Only Senior "W" Wearers are eligible for the award which is made each June. The essential criterion is athletic ability, but spirit, service, and scholarship also enter into consideration.

The largest number ever chosen was in 1925, when five girls were selected.

B. Thompson S. Lenzer J. Meyer B. Briggs

## Dolphin Club

Dolphin Club, organized in 1920, is an honorary organization, created to further interest in swimming. Its work for each year culminates in a swimming exhibition given by the members. Major and minor emblems are awarded for proficiency in speed, form, diving, distance swimming, and stunts.

The Physical Education Club

## Physical Education Club

Students of the Physical Education department organized the Physical Education Club to promote an interest in their profession and to

Josephine Winter provide a means of contact among themselves. In furtherance of these ideals a scholarship loan fund, open to any member of the department, was established this year.

## Basketball

The major interest in winter sports centers in the basketball games. Strong competition for the title was promised as the teams were so nearly equal in strength.

## Hockey

Wisconsin was fortunate in having for hockey work this fall an English girl who had played on teams in an English college and who had much to offer in the way of Englishtechnique. The full schedule of games was not completed because of the early snow. From the games played the championship was conceded to the class of 1928.

## Bowling

At the end of the winter season the tournaments of winter sports are played off. Bowling, among these, came too late to publish the results of the games. The teams as chosen are listed below.

An intercollegiate telegraphic meet was held with Illinois Wesleyan on March 23, in which Wisconsin took second place. The Varsity team consisted of:
Veryl Schuldt ..... 1927
Mildred Feile ..... 1928
Camilla Ruskauff ..... 1929
Gladys Sieverkropp ..... 1930

## Rifle Team

The rifle squad, coached by Captain Hull of the University Military Department, competed in several meets during the early spring. The most important of these was the Big Ten meet, organized by Northwestern University. Wisconsin organized another meet among the smaller colleges. Those competing were: Jane Carling, Jean Drop-

Elizabeth Milne pers, Josephine Kleinhaus, Lena Marty, Eleanore McEvilly, Marie Zierer.

## Riding

Riding, for the first time, this year has been recognized as a team sport. The class championship, won by 1930, was decided in a meet held among the class teams, and comprised such events as the Egg and Spoon Race, Saddling Race, Tug of War, and Three Gaited riding. The Varsity team was chosen on the rider's ability to walk, trot, and canter in good form.

## Tennis

The class of 1928, represented by Helen Hardenburgh, won the singles championship in the tennis tournament. The doubles championship went to the class of 1927, through the efforts of Martha Arnold and Mae Weller. Interclass competition was particularly keen because each class possessed an outstanding player. Tennis honors were

Marguerite Schwarz awarded to Helen Hardenburgh, Mary Patterson, Marion Goodkind, and Eleanor Steele.

## New Records

## Why Dance?

We dance to bring us sweet release
From cares of day, and troubles ease So that we come at last to peace
We dance.

For moulding characters of worth
We dance.
To realize our aims on earth We dance.

To thrust conventions that confine Our spirits in too straight laced line To bring much nearer the divine We dance.

A cloud of dust!
Sweating bodies glistening in the sun!
See, the man in the crimson loin-cloth!
Have these lakes ever heard such a roar of applause?
Old stuff!

## The Varsity Cheerleaders

These six men, under the direction of varsity cheerleader "Blinks" Muller, 27, formed the Wisconsin cheering team which was on hand for every sport occasion in which Wisconsin teams participated. Through Muller's work a well-organized and carefully co-ordinated cheering squad was assembled which was able to direct the cheers of the Badger supporters.

## "Steve" Polaski

## Conference Medal Winner

Steven Harris Polaski, '26, of Nashotah, Wisconsin, captain of the 1925 second place football eleven, was winner of the 1926 conference medal by virtue of maintaining an average of 83.65 for his four-year ccurse in the College of Engineering.
"Steve" distinguished himself as being a fine end and a wonderful leader. Returning to school in 1924, after having dropped from the university during the year of 1923 , Polaski filled an end position on the eleven and was honored with the captaincy for the following season.

As leader of the football team he guided them to a second place in the Big Ten conference, the highest rating a Wisconsin football team has held since 1921 when they also finished second.

Polaski was a member of Iron Cross, the senior men's honorary society, of White Spades, the junior men's honorary organization, and of Pi Tau Sigma, honorary mechanical engineering fraternity. He is a member of Kappa Sigma Fraternity.
"Steve" Polaski was a true Wisconsin man-an athlete and a scholar.

## The Coaches

Coming to Madison in the spring of 1925 , when the University was in its most chaotic athletic condition, George E. Little has lifted it out of the lethargic state to the prominent place that Wisconsin has formerly held.

Assuming the role of football coach, after the team of 1924 had failed to win a conference game, he brought the Badgers through to a conference second place with but the loss of a single game. Last season, handicapped by the lack of stars, Coach Little developed a team which finished fifth in the title race, and which lost but two games. With the idea of "athletics for all," George Little resigned his football coaching job to devote all his time to his athletic directorship.

To fill the shoes of Coach Little, Glenn Thistlethwaite, coach of football at Northwestern University, has been selected. Like Little, Thistlethwaite has taken a school where the football situation was bewildering and brought the school to the front. His Northwestern teams have finished second in 1925 and first in 1926, in the Big Ten. Wisconsin has profound hopes in Little's choice of a football coach, and hopes are high for the first conference gridiron title since 1912.

## "Rollie" Barnum

Rolland Barnum, '27, of Evansville, Wis., has earned a niche in the hall of Wisconsin immortals by the winning of nine major letters during his college career.
Coming to Wisconsin as a freshman, Barnum played with the yearling football, basketball, and baseball teams, and in 1924, his sophomore year, graduated to the varsity squads, winning letters in the same three sports. Such, also, has been his record for 1925 and 1926.

With "Rollie" Williams, '23, Barnum may be classed as Wisconsin's greatest athlete. A fine running halfback, who could kick and pass; a basketball guard who as a senior has been considered with the best of the Big Ten, and a creditable baseball catcher who combined physique with brains, "Rollie" has accomplished the almost impossible.

Included in this stellar record is the captaincy of the 1926-27 basketball team which finished in fourth place in the conference standings, and which was rated as the strongest defensive team in the league, largely through Barnum's guarding efforts.

Barnum is a member of Iron Cross, the senior men's honorary society, and of White Spades, junior men's honorary society. His fraternity is Beta Theta Pi.

## The Publicity Department

During the past year the Athletic department has aimed to develop an efficient publicity bureau to form the proper contact between Wisconsin athletic activities and the press of the state and the country at large. This plan of Director George E. Little was in keeping with the general movement in the universities and colleges of developing more efficient sports news bureaus.
The newspapers and magazines have been so in accord with this movement that their demand for all types of service have made the position of Athletic publicity director one of considerable importance. Our publicity department at Wisconsin operates in a small way on the same basis as the larger sport news syndicates. It supplies the editors with a mail service of timely athletic news, supplemented from time to time with art layouts, action photos and matts. The articles circulated by the Wisconsin bureau are received by 450 editors on the desks of all state daily newspapers, the larger Wisconsin weeklies, syndicate sport departments, athletic magazines, the majority of the dailies in neighboring states, and the most important papers of large circulation throughout the country.
The publicity department is held generally responsible for the attitude of the press locally and abroad, and therefore must create a cordial feeling to prevent unfavorable criticism. The local and the student athletic publications must be censored and all newspapers treated fairly on the matter of releases when important stories break.
One of the main activities of the present type of publicity office is the conducting of the press box. This problem is most difficult during the football

"Les" Gage<br>Publicity Director season when the press clamors for seating accommodations at the home games. It is a difficult matter to adjust the seating plan of the box to accommodate eighteen or twenty direct wire connections for the important contests and provisions must always be made for visiting representatives of the larger radio broadcasting stations. So many little accommodations have been given the press at games that the publicity director may go as far as he likes in developing his press box. Several of the modern football plants have an enclosed structure for the scribes, heated and equipped for complete comfort. Announcers inform the writers of all details of play and in some cases the men are even served refreshments between periods.

The publicity men in most cases supervise all advertising compaigns involving the printing and circulating of posters, stickers, and all types of pamphlet advertising. They edit and write a portion of all athletic programs, magazines and bulletins published by the department. They are the reception committee for all visiting newspaper men and play Santa Claus to every scribe in the matter of tickets for all types of sporting events.

## Varsity Football

From material of only a mediocre sort, but with veteran qualities, George Little developed a Wisconsin football eleven for the 1926 season which, though it finished fifth in the conference race, showed great power and flashes at times.

Lead by Doyle Harmon, the team went through the season with fair success, winning three conference games from Indiana, Iowa, and Chicago, tieing one with Purdue, and losing to Minnesota and Michigan. In addition, the Badgers won two non-conference games, one from Cornell College, of Mount Vernon, Iowa, and one from the University of Kansas.
Eleven men are lost by graduation for the 1927 eleven which has games scheduled with Cornell College, Kansas, Grinnell, Chicago, Minnesota, Iowa, Michigan, and Purdue. They are Captain Doyle Harmon, Rolland Barnum, Jefferson Burrus, Jr., Robert Kasiska, Robert Kreuz, Lloyd Larson, Lester Leitl, Stanley McGiveran, Al Muegge, Austin Straubel and Earl Wilke.

## The Coaching Staff

The Varsity Squad

## The Squad

Prospects for a strong eleven are bright, and with a new coach, Glenn Thistlethwaite, former coach of Northwestern, and a full supply of veterans and capable freshmen coming back, Wisconsin should finish well up in the 1927 conference race.

Edwin Crofoot was selected as captain of the 1927 eleven, and with the graduation of Ben Friedman, of Michigan, should be a leading quarterback in the Big Ten. Besides, Gene Rose, who developed into the leading Badger backfield threat will be back. Kresky is another letter backfield man who will return, while Shaw and Mansfield are "aWa" wearers who should see service in the fall.

A veteran line is expected with Wilson at center, Von Bremer and Wagner as guards, Schuette, at one tackle, Parks, captain of the frosh team at the other tackle, and Welch and Cameron at the ends.

## Wisconsin 38, Cornell 0

Flashing a brilliant offensive, the Wisconsin eleven opened its 1926 Western Conference title quest with a decisive 38 to 0 victory over the Cornell college team on Saturday, October 2.

Early in the first quarter of the game, after employing a series of line bucks which placed the ball past mid-field, a long forward pass put the sphere on the Cornell two-yard line where Crofoot smashed over for the first counter. Cornell made one threat during that period, but the Badger line held for four downs on its own three-yard line.

In the second quarter, after Kasiska had picked up a Cornell fumble, the Badgers opened with a powerful offensive, and Crofoot made a second touchdown on a pass over the goal from Barnum, the score was 13 to 0 and 12 more points were added by touchdowns by Shaw, one of which was a 35 yard run. The half ended Wisconsin 25 Cornell 0.

Two more touchdowns were added in each of the last quarters, both by Crofoot. Coach Little used practically every man on the squad in the game, and it proved to be a valuable practice tilt for the Littlemen.

## Wisconsin 13, Kansas 0

The Jayhawkers of the University of Kansas proved a harder nut to crack than did Cornell the week before, but the Cardinal wave of Wisconsin bore down with force and won a well-earned 13 to 0 victory.
The victory came in the form of a touchdown by "Toad" Crofoot, who raced 80 yards for a touchdown from the first scrimmage of the game, a point after touchdown by Leitl, and two place-kicks from the 25 and 23-yard lines also by Leitl.
For the most part the game was a punting duel between "Rollie" Barnum, of Wisconsin, and Captain Zuber, of the visitors. The Kansas captain showed remarkably fine form, one of his kicks sailing more than 70 yards.
The Badgers were a vastly improved aggregation over the team which downed Cornell the week before. The offensive continued in good form, while the defense had vastly improved.
After the Kansas game, the Badgers faced a conference card of six games in as many weeks with Michigan, Minnesota, and Purdue appearing especially powerful.

## Wisconsin 0, Purdue 0

Outplaying Purdue in every department of football, the Wisconsin eleven in its opening conference game, October 16, at LaFayette, Ind., was forced to a scoreless tie.

Statistics point to a clear Wisconsin victory, but for some reason the Badgers seemed to lack the necessary punch to win. Wisconsin gained 209 yards from scrimmage to a 89 yard total for the Boilermakers. Six completed Cardinal passes gained 67 yards, while three Purdue tosses added 28 yards for the home eleven.

Numerous thrusts were made at the Purdue goal, but each time the Badgers were forced back. Only once did the Boilermakers really threaten, that being in the final quarter, when the ball was carried to the 8 -yard line, and could be pushed no further. Here "Cotton" Wilcox, the Purdue star, attempted a drop kick which was short, and the game had neither advanced nor deterred either team in the conference championship race.

## Wisconsin 27, Indiana 2

For the first time during the season the Wisconsin eleven was scored on when in the final moments of the game Indiana made a safety. The score was 27 to 2 , a well-rounded Wisconsin victory.
"Red" Kreuz was the hero of the game, and the driving fullback showed his plunging ability by making the final Badger touchdown of the game after a pass had placed the ball on the Indiana 26-yard line. The red-head smashed through on four successive plays to a touchdown.

The first touchdown came when early in the game an Indiana fumble was converted into a touchdown by Doyle Harmon, who on a pretty play sidestepped and swished 17 yards for the initial counter. Kresky made the second counter after Barnum had intercepted a Hoosier pass. The other Badger score was one by Welch who was playing his first conference game at end. He received a long pass and scored.

It was the first Wisconsin home conference game and was played before a crowd of only 13,000 , many being kept away by threatening weather.

Wagner

Schuette

Shaw

## Wisconsin 10, Minnesota 16

To have not made a single first down, yet to have come within just a few minutes of beating a team which was declared to be the strongest in the country, the Wisconsin team fell before the giant Minnesota team before 43,000 spectators, the largest crowd which ever jammed Randall stadium, October 30.

The Father's day crowd which had come to see a great contest were completely satisfied from the bone-crushing smashing of the great Herbert Joesting of Minnesota to the wonderful 82 -yard run of Jeff Burrus, the Wisconsin end.

After Minnesota had driven to the 18-yard line of the Badgers, Burrus picked up a fumble and like a frightened hare, raced for the first touchdown. Leitl added the point. Then the great Gopher backs and the fast charging northern line heaved and pitched, and the score stood 7 to 6 .

Peplaw booted a dropkick over during the second quarter, and the half ended 9 to 7 in the Gopher's favor. However, the Badgers proved they were the greatest ball-hawks in the country, and by following the pigskin, took advantage of another Minnesota fumble and Leitl made a place kick for a Wisconsin advantage of 10 to 9 .

Thus it looked like a Badger victory without a first down until near the very end of the game when Nydahl ran a punt back 55 yards for a Minnesota touchdown, giving them a victory of 16 to 10 , breaking a three year tie.

## Wisconsin 0, Michigan 37

Smarting under a 10 to 0 defeat handed it the week before by the Navy, and playing the last game ever on historic Ferry field, the great Michigan football eleven continued as the Badger jinx and on November 6 won 37 to 0 at Ann Arbor.

After having been classed as the strongest team in the country, the Wolverines had fallen before the Navy the week before through over-confidence, and they were primed to destroy the fondest Badger hopes. This was accomplished with ceremony.

After a slow start the great maize and blue steam-roller, which it certainly was, began to function on all eleven cylinders and snowed the Badgers under a passing and running attack which dazzled the Cardinal beyond all hope.

However, the Badgers were great in defeat, and though it was a bitter sight, appearances were partly neutralized when the eleven continued to fight even when the game was beyond hope.

## Wisconsin 20, Iowa 10

For the first time since 1921, Homecoming football games materialized into happy Badger victories when the Cardinals, showing a great reversal in form from the Michigan game of the preceding week, won a 20 to 10 victory from Iowa.

The game was an offensive battle with the Badgers having the edge on the Hawkeyes. After the highly touted Nicholas A. Kutsch of Iowa had given his team a 3 to 0 lead, in the first quarter, Crofoot scored on a pass by Gene Rose to give his team a 6 to 3 lead at half time.

It was Rose who turned out to be the Badger star. His passing was superb and he also showed well in carrying the ball. Then in the third quarter, Kutsch playing as he was expected to, put his team in the lead with a touchdown and an additional point. However, the Cardinals were not to be denied, for Rose shot a beautiful 25 -yard pass to Cameron who stepped over the goalline for a Wisconsin touchdown. Doyle Harmon added a point, and the Wisconsin eleven was out ahead 13 to 10, never to be headed. A touchdown made in the same manner as the previous one gave the Cardinals a 20 to 10 victory -a happy thought and a pleasing finish to Homecoming.

Parks

Muegge

## Wisconsin 14, Chicago 7

In just 12 minutes of play, the first of the game, the Wisconsin eleven ticked off 14 points and clinched victory from Chicago in the final game of the year which was played before 48,000 spectators at Stagg Field, Chicago, November 20.
After Rose and Crofoot had risen to heights of glory, the Maroons, who had been threatening to snap out of their lethargic state all season, came to life and in the remaining three-quarters of the game sneaked over a touchdown, but it was one too few for the score ended 14 to 7 .
Rose scored the first Badger touchdown on a run after a pass from him to Crofoot had placed the ball next door to the Chicago goal. Then after some more passing, the second Wisconsin score came on a pass from Rose to Crofoot. Leitl kicked both goals. The Chicago score came in the third period on a trick pass play.
Playing in the game for the last time for Wisconsin were Captain Harmon, Barnum, Burrus, Wilke, Straubel, Leitl, Kreuz, and Kasiska.

## CROSS COUNTRY

Tom Jones
Coach

## Cross Country

For the third time in as many years, the Wisconsin cross country team finished the season undefeated and as champions of the Western Conference.

Coach T. E. Jones, who took the coaching task left open by Mead Burke, the coach of the champions the two years before, assembled a team which was the strongest that has ever appeared in the Western Conference, and was perhaps the best balanced cross country team in intercollegiate circles.

Three meets were held before the conference at Minneapolis, November 21, 1926, and in these three meets only two men finished before the whole Wisconsin five-man team.

Starting the year with five major letter men and an aWa man, Coach Jones rounded out a team of seven men, one nearly as good as another.

1st Row: T. E. Jones, Coach, Neill, Capt. Schutt, Chapman, McKee, Petaja, Butts, Gumbreck, Zola, Walter, Egger, Kalish. Back Row: Hand, Fronck, Bokhout, Camp, Wetzel, Moe, Millar, Stewart, Sajima, Behnke, Egger, Hewitt, Lachapelle, Bevins, Williams, Henkle, Vaughn, S. Zola, Hickish.

The first test of the year came at Chicago, October 23, 1926, when a quadrangular meet with Chicago, Northwestern, and Indiana was held over the Maroon two and a half mile course. in Washington Park, Chicago. The power of the Badgers was made apparent when the first eight men to finish were Wisconsin runners, an American record in an intercollegiate quadrangular cross country meet. The Wisconsin score was the lowest possible, a total of 15, Indiana was second, scoring 57 points, Northwestern was third with 67 points, and Chicago fourth with 71 points. The order of finish was:

Chapman (W), Petaja (W), J. Zola (W), Gumbreck (W), tie for first; Captain Schutt (W), fifth; Payne (W), sixth; S. Zola (W), seventh; Bullamore (W), eighth; Fields (I), ninth; Alexander (I), eleventh; Schwenger (W), twelfth; Butz (W), thirteenth.

Start of the Conference Run at Minneapolts

Petaja

Chapman

The next week-end, Saturday, October 30, the day of the Minnesota game and Father's Day, the harriers again demonstrated their great power before a home crowd, and took the first five places in the annual dual meet with Minnesota. Just as the week before, four men, this time Captain Schutt, Chapman, J. Zola and Petaja, tied for first and Gumbreck finished fifth. The first Minnesota man in was Wexman, who took sixth place. The score of the meet was 15 to 40 and the order of the first ten men was:

Chapman (W), Capt. Schutt (W), J. Zola (W), Petaja (W), tie for first; Gumbreck (W), fifth; Wexman (M), sixth; Binger (M), seventh; Payne (W), eighth; Bullamore (W), ninth; S. Zola (W), tenth.

Then with a two-week rest, the Badgers engaged in their hardest dual meet of the year, one with the University of Iowa harriers, in Madison, Saturday morning, November 13, Homecoming Day.

The Conferencc Run

The Wisconsin-Iowa Start

Again the Cardinal flashed to the front, and after Hunn and Speers, the two great Hawkeye runners came first, and second, five Wisconsin men trailed across the line for another victory, and the third year of no defeats.

The final score was 25 to 38 , and the finish order was:
Hunn (I), first; Speers (I), second; J. Zola (W), third; Gumbreck (W), fourth; Chapman (W), fifth; Schutt, Payne, Petaja, and Bullamore (W), tie for sixth.

The next Saturday, November 20, the annual conference meet was held at Minneapolis, and Wisconsin won its third title in three years with a total of 34 points, the low mark for winning the conference championship. The places won by the Badgers were fourth, fifth, sixth, eighth, and eleventh. Chapman, who had won the

Iowa warms up

Gumbreck

Petaja near the Finish

Bullamore

Payne
individual honors the year before, was sent to Minneapolis early in order to rest for the meet as he was ill, but the illness weakened him, and fourth place was his best effort. Gumbreck finished fifth, Payne, sixth, Captain Schutt, eighth, and J. Zola, eleventh. Petaja, the sixth Badger in the run, finished seventeenth.

Other scoring in the meet was Ohio State 63, Iowa, 65, Illinois 94, Michigan 128, Minnesota 138, Chicago 173, Indiana 191. Purdue and Northwestern did not enter teams in the classics.

Victor Chapman was selected to lead the 1927 team at the annual election. Captain George Schutt, Captain-elect Victor Chapman, Lawrence Gumbreck, John Zola, John Petaja, and John Payne were awarded major letters. Stanley Zola and Charles Bullamore were given aWa awards, and Stanley Kalish was awarded the manager's letter.

## The Frosh Squad

The first victory of the year came when the cagers took Marquette into camp at Milwaukee on December 22. The final count was 29 to 26 . The Badgers played a defensive game equal to the best of Tebell and Williams, the immortal Badger guards, and they deserved to win. Merkle led the work, showing a fine brand of defensive playing and scoring eight points.
December 30 the Wisconsin five hung up another victory downing De Pauw college 24 to 20. The Badgers jumped into the lead almost immediately after the toss-up and never relinquished it, though the Greencastle, Ind., team did attempt a rally in the closing minutes.
A notable victory was turned in by the team when on, January 3 at Cleveland, the Cardinals turned back the Syracuse University basketball team, champions of the East, in an easy 31 to 24 victory. The easterners had lost but three games in two years and had visions of upsetting the Meanwell coached team. "Hank" Kowalczyk, the giant sophomore, and Andrews, the pint-sized forward, were the contributing cogs, gathering 16 of the Cardinal points.
With a favorable pre-conference record, the Cardinals opened a conference year which was primarily successful, and when the season closed were the strongest defensive team in the league.

Ralph Merkel Co-Caprain

Charles Andrews

"Lou" Behr Captain-Elect

It was a bad start, for the Badgers fell before the fullstrength Indiana five in the opening game at Madison by a 28 to 23 score. Wisconsin took an early lead of 8 to 1 , but Coach Dean of the Hoosiers got his team functioning smoothly and the Hoosiers won easily.

The first conference victory of the year was recorded when Wisconsin dealt the Ohio State five a 25 to 16 drubbing in the Armory on January 9. The game was a rough affair, 20 fouls being called on the two teams, but an air-tight defense, coupled with a powerful offensive, marked the tilt as a Wisconsin victory. Charles Andrews, scoring 10 points, was the high man.

The first road trip was a complete success when victories over Northwestern and Chicago were registered by the Badgers. Northwestern was snowed under 28 to 18 in a game in which Kowalczyk lead the attack with 12 points. The Badgers took an early lead and were never behind.

To defeat Chicago on January 18 was a man-sized job, and only last minute tosses by Behr and Andrews clinched the victory, 33 to 30 . The Maroons were ahead by three points when the Badger forwards accomplished the vital shots for Wisconsin. Behr played a fine game and made

George Нotchkiss

Northwestern fell the week after in Madison by a 25 to 24 score. Not until the final minute of the game did the Badgers achieve their fourth straight conference victory. The Purple lead all the way. "Louie" Behr was the hero of the fray with a last minute bat-in of a missed foul. Captain Merkle, playing his last game before graduation, contributed a fine defensive exhibition.

This closed the first semester for the basketeers, and with the graduation of Merkle, Barnum assumed the captaincy. Kowalczyk was moved from center to guard except for the tip-off, while Tenhopen and Miller were used in the center positions.

The opening game of the second semester was a 19 to 14 defeat handed the Cardinal by the strong Notre Dame five. The exhibition was purely a defensive contest, and was close fought until the end. The half-time score was 10 to 10 . The game was played at the armory February 8 and was the first test of the team with Merkle gone.

Chicago was not the threat inMadison that they were on their home floor and the Badger short-passed their way to their fifth conference victory by a 31 to 20 score February 12. Chicago tallied but a lone point in the first 14 minutes of the game, while the Cardinals counted 14. The half ended 17 to 9 . Near the game's end Coach Meanwell inserted his reserves, and it was here that Chicago made its strongest showing.

Lycan Miller

"Hank" Kowalczyk

Then came the disastrous road trip which knocked the Badgers off the top of the conference heap with five victories in six games. First, Ohio State who had been a pawn in the Cardinal hand a month before, turned back the Badger five 20 to 16 at Columbus, February 19. The Badgers seemed to be in a state of coma, and played their poorest game. The lighting system of the Ohio gymnasium also bothered the Madison five in their shooting.

In between this road ride came a home game with Iowa which was won 24 to 21 at Madison, February 22. The battle was hard-fought, the lead weaving back and forth between the two teams.

The journey which did the worst was one in which Indiana and Illinois both registered victories. At Bloomington, February 26, a fast attack by the Hoosiers shattered a hope for a Wisconsin title to a 31 to 23 tune. The game was a fast one, and the Cardinals made a determined threat being on the short end of a 15 to 13 halftime score. Tenhopen, who played a fine game, against Chicago, was ill and could not make the trip, and this materially weakened the Badgers.

## Track

Proving to be the darkhorse of the 1927 indoor conference track, the Wisconsin cinder men won their first title in the indoor classic since 1916, at Evanston on March 12.

The Badgers accumulated 28 points, while Ohio State, their closest competitors, were garnering 18 . The other teams finished, Iowa $141 / 2$, Michigan 12, Illinois 11, Chicago $91 / 2$, Northwestern 9, Minnesota 6, Purdue 1, and Indiana 0.

The most noteworthy feat of the evening was the performance of Captain Charles E. McGinnis, who took three first places for his team, and got 15 of his team's points. McGinnis broke the conference record in the high jump clearing six feet five inches, and won the pole vault with a vault of 12 feet, 10 inches, and the high hurdles.

Chamberlain Grupp Lalor Kanalz Wagner Ahrbecker Schrofer Moe Murphy Momsen Eisele Hansen Pinegar

The summary of the meet:
One mile run won by Kennedy (O.); Rue (III.), second; Petaja (Wis.) third; Little (P.), fourth. Time - 4:30.2.

50-yard dash won by Kriss (O.) ; Hester (Mich.), second; Hermansen (N.W.), third; Cuhel (Ia.), fourth. Time-:05.5

Pole vault won by McGinnis (Wis.) ; Boyles (Ia.), White (Ill.), and Northrup (Mich.), tie for second. Height- 12 feet 10 inches.

Mile relay won by Iowa; Ohio State, second; Wisconsin, third; Minnesota fourth. Time-3:29.5.

440 -yard dash won by Dougan (Wis.) ; Catlin (Minn.), second; Kriss (O.), third; Oltheiser (Mich.), fourth. Time-:52.2.

High hurdles won by McGinnis (Wis.) ; Cooper (Mich.) second; Otterness (Minn.), third; (other disqualified for knocking over three hurdles). Time-:07.6.

Two mile run won by Hunn (Ia.) ; Hornberger (Mich.), second; J. Zola (Wis.), third; Cougan (C.), fourth. Time-9:44.2.

Half mile run won by Williams (C.); Bevan (O.), second; Erickson (Wis.), third; Sittig (Ill.), fourth. Time-1:59.5.

High jump won by McGinnis (Wis.) ; Burg (C.), second; Rettig (N.W.), third; Thomas (Ia.), and Bennett (C.), tie for fourth. Height-6 feet 5 inches (New conference record).

1926 Captain

Kennedy in 440

Shot put won by Lyon (III.); Lewis (N.W.), second; Karsten (N.W.), third; Fornwald (Ia.), fourth. Distance- 47 feet 3 inches.

In the opening meet of the indoor season Wisconsin fell before the strong lowa team in an indoor meet at the new Iowa Field House, at Iowa City, February 12, by a score of 55 to 33 . McGinnis was the high point man, getting 13 points for his team by virtue of victories in the pole vault and high jump, and a second in the high hurdles.
A second place in the annual quadrargular meet at the Patten gymnasium, at Northwestern, on February 19, was the best Wisconsin effort. Ohio State won the meet with 57 points, Wisconsin scored 45 points, Northwestern was third with 31 points, and Chicago finished fourth, scoring 21 points. McGinnis was again the high man of the meet with 16 points gathered through firsts in the high and low hurdle races and second in the pole vault and high jump.

C. E. McGinnis

Kennedv

V. Chapman

Kennedy at Finish of 220 Yard Dash

Charles E. McGinnis, on February 26, carved a niche for himself in the hall of track immortals when he won the Illinois Relays all-around championship, scoring 5,463 points, the second highest total ever scored. Doherty, of Detroit City college finished second, nearly 30 points behind the Badger captain. McGinnis gave a startling performance, being the smallest man entered. He performed especially fine in the pole vault, the high jump, and the high hurdles. He did well in the dash, and even scored in the half mile run and the shot put.

Two Wisconsin relay teams earned fourth places in events. The four-mile team placed behind a record-breaking event, while the mile relay quartet tied for fourth with Minnesota.

Closing the dual meet year with Notre Dame, in an impressive 61 to 25 victory over the Irish, the Badger cinder men showed their best form of the entire year. The meet was run in the annex on March 5, and the home team took six firsts in nine events, slamming the two-mile and half mile runs. Notre Dame later won the Central Intercollegiate track championship, showing the power of Wisconsin, and the place they deserved in winning the Western Conference title.

Erickson

McGinnis in the Northwestern Meet

After a third place in the indoor conference track meet the Wisconsin cinder team had to content itself with a fifth place in the outdoor conference meet held at Iowa City, 1 May 29, 1926.
Michigan took the meet in fine style, but Wisconsin individual performers were especially effective. It was the lack of men being able to pick up seconds, thirds, fourths, and fifths that spelled defeat for the Cardinal.
Captain Kennedy became outdoor champion in the 440 -yard dash by stepping the distance in :49.1. In the mile relay, in which Michigan nosed out the Badgers by four inches, Kennedy, running as anchor man on the Badger team, cut down $a_{\mathrm{a}}$ lead of seven yards, and was unofficially clocked at :48.4 for the distance.

Dougan

J. Zola

The 1927 Freshman Squad

Victor Chapman won the two-mile event in a great sprint which nipped Rose, of Indiana, who had made a determined effort to overhaul the flying Badger. McGinnis tied for second in both the high jump and the pole vault, while Kreuz got a second in the Javelin throw, with a toss of 193.4 feet.
In the opening of the outdoor meets, Wisconsin, on April 17, went to the Ohio Relays at Columbus. There the team hung up a national record of 4:26.2 in the one mile team race. Those running on the record breaking quartet were Chapman, Zola, Reeves, and Schwenger.

Three second places at the Penn Relays in Philadelphia, were in store for Wisconsin the next week. Victor Chapman, star two-miler, lost the first race of his collegiate career coming in behind Loucks, of Syracuse. The Wisconsin runner was suffering from a cold. Kreuz took second in the javelin throw with a toss of 191 feet $97 / 8$ inches. McGinnis, the third Badger in the event, tied for second place with Anson, of Ohio State, with a leap of 6 feet $2 \frac{1}{8}$ inches. The same day the mile relay team was forced to a third place at the Drake Relays, held at Des Moines, Iowa.

The 1927 Outdoor Squad

In the first outdoor dual meet of the year, Wisconsin easily downed Minnesota, at Minneapolis, by a score of $841 / 2$ to $501 / 2$, on Saturday, May 8 . The Badgers accumulated 12 first places in 15 events, while McGinnis was the high point man of the day with 14 points to his credit.

For the first time since the inauguration of the quadrangular track meet with Ohio State, Northwestern, and Chicago, Wisconsin failed to win the event. Coach Jones team was forced to a second place, being beaten by Ohio State, $645 / 6$ to $535 / 6$, at Columbus, on May 15. Northwestern finished third with $441 / 3$ points, and Chicago fourth with $132 / 3$ points.
Winning $892 / 3$ to $531 / 3$ over Northwestern, Wisconsin closed its dual meet season with a flash at Camp Randall, on May 22. Captain Kenneth Kennedy and Charles McGinnis were the stars of the day, each garnering 15 points by virtue of three first places. Kennedy won the 100 -yard dash, the 220 -yard dash, and the 440 -yard dash; while McGinnis took first places in the 120 -yard high hurdles, the pole vault, and the high jump. The team annexed 10 first places in the meet.
Wisconsin track fans will have the treat of seeing the 1927 outdoor conference track meet staged at Wisconsin in May, this year. The Badgers, the indoor champions, should make a determined bid for the title with such stars as Captain McGinnis, Zola, Gumbreck, Petaja, Dougan, Stowe, Erickson and Kreuz.

Captain

CREW

Teckmever, Kingsbury, Burrus, Basset, Bibby, Zendtner, Kiewig, Orth
Coulter, Captain

Although humbled in the annual Intercollegiate Rowing Association regatta at Poughkeepsie, June 28, 1926, the Wisconsin crew won a firm place in the hearts of all its supporters with its tremendous attempt despite its lack of power.

Previous to the four-mile race, newspaper men impressed the country with the potentialities of the Cardinal eight, but Coach "Dad" Vail, the grand old man of crewdom, held steadfast to his assertion that the Badgers lacked the power to carry them through to a victory or a high place.

"Dad" Vail Coach

Coulter 1926 Captain

A Trial Spin

His assertion was borne out when the Cardinal flagged a seventh place in the race, the lowest ranking the crew has ever obtained in its eighteen appearances in the historic regatta. The whole Wisconsin record since 1898, when the boatsmen from Mendota went to Saratoga, where the race was held originally, has been five second places, three third places, three fourth places, three fifth places, three sixth places, and the 1926 seventh place.

With sunset the race began and under stroke Teckmeyer, to whom "Dad" gave the glowing tribute that if he had seven more like him

Burrus

Teckmeyer

he would have the greatest crew ever, the Wisconsin eight went at a 31 -stroke to the minute pace, and at the half mile mark were in fourth place. Then as the great Washington and Navy crews, two of the finest to ever appear on the historic Hudson, surged ahead, the Badgers slipped into sixth place, which position they held until the finish when the eight from the University of California nosed them out by less than a half length.

So again, the lack of competition and the handicap of lack of practice on open water told on the Wisconsin eight. The Cardinal

Kingsbury

[^4]

The Varsity
blades are still the marvel of Poughkeepsie, for when a crew with but a quarter of the amount of practice all other competitors get can finish high, their work is truly marvelous. To all this is linked the name of Coach Harry Vail, the grand old man of crewdom.

The 1926 Poughkeepsie race was one of what developed to be two sections-the Washington-Navy race, and the other six fighting for third. Coach "Rusty" Callow, whose Seattle eight won a notable victory, brought a crew which averaged 6 feet 3 and a half inches in

[^5]

Kiewig

Getting ready for an early Spring row
height and was described as being perhaps the finest to appear. "Bob" Butler, scarce three years out of Washington, coached the Midshipmen, who finished a scant second behind the Washington eight. He had another crew of supermen. The 1926 regatta was indeed a fight between two of the finest.

Then, in the second section, crews of power, but not equal to the great Washington and Navy eights, fought for a place, and the time shows that they were close:

BASEBALL

The 1926 Squad

Guy Lowman Coxch

A second place in the Western Conference for the 1926 season, the highest place for several years, was the record of the Wisconsin nine.

Building a team around several veterans and a group of talented sophomores, Coach Guy S. Lowman developed a strong team. Lloyd Larson, a junior, and an outfielder was the captain. George Stoll was the leading Big Ten pitcher, and he captains the 1927 nine.
Prospects for a rank as high as last season, and perhaps a title, are favorable with the season ahead. Tangen, third baseman, was the only severe loss, as Wieland, a short stop who graduated, will have his place filled by John Decker, who played regularly last year until mid-season when he was injured.
One of the most successful southern spring training trips put the Baders in a fine fettle for the coming conference year. The trip in the South which took the Wisconsin team down to New Orleans for a game with Tulane University, found the Badgers on the long end of 2 of 6 gamesa gocd record considering that the team had not got out of doors prior to leaving.
The first game was with Union College at Jackson, Tenn., and the southern collegians came out with a 9 to 2 victory. Next Wisconsin fell before the University of Mississippi, at Oxford, in a walkaway for the home team, 10 to 3. From there on the Badgers started to get their legs and the rest of the trip loomed powerfully. Mississippi college eked out a 5 to 2 victory, but the Wisconsin team played a strong fielding game.

Lloyd Larson 1926 Captain

Galle Grambs, Mgr. Kohl Kelly Janson Mansfield Rose Turton Beebe Stoll Cameron Lowman, Coach Gottstein Christianson Thelander Pahl Jacobs Brility Hussa Jacobson Stupecky Wonagan Wold Burbridge Decker Jassey Knechtges

The 1927 Squad
The pitchers had not yet found their control, but a second game resulted in a 4 to 3 victory for the Badgers.

George Stoll, pitching in fine style, turned back the Tulane nine 2 to 0 in a beautiful hurling exhibition in which he presented the New Orleans nine with but one hit. A second game with Tulane was postponed due to rain.

On the way north the Badgers engaged in a single game, that with St . Louis University, at St. Louis, and the Missouri collegians won 8 to 5.

Before a crowd of nearly 4,000 , Wisconsin opened its conference season April 17, when George Stoll won his own baseball game, driving in two of the three Badger runs for a 3 to 2 victory over Northwestern.

In another practice game Wisconsin took the Madison Blues, the local professional team, into camp with an easy 9 to 1 victory at Randall field.

The second Big Ten tilt for the Badgers was postponed on April 24 at Randall field due to rain. The Illinois baseball nine were the scheduled opponents. April 27 found the Badgers again in good form when they played a tilt with the Kennedy Dairy team, a local semi-pro outfit, and Wisconsin won 2 to 0 .

By defeating Chicago 8 to 5 at the Maroon's field on May 1, Wiscon$\sin$ kept its conference slate clean. Stoll won his second conference victory.

On Monday, May 4, however, Purdue took the Wisconsin team into camp by pounding out a 6 to 1 victory on the Lafayette University's diamond. Jacobsen was on the mound for Wisconsin, but his best efforts could not fool the Boilermaker sluggers.

George Stoll 1927 Captain

[^6]

The 1926 Freshman Squad

"Rollie" Barnum

A slightly built lad by the name of Walters, who was a relief hurler on the Michigan baseball nine, spelled bad luck for Wisconsin, and the Badgers lost their second conference game of the year on May 7 by a 6 to 4 score. After taking a safe lead by pounding Jablonowski, ace of the Wolverine staff, Walters tamed the Wisconsin team, while Wisconsin errors coupled with Stoll's failing in the pinches, allowed the Wolves to win.

A seventh inning rally which netted three runs gave Wisconsin a well-earned victory over Notre Dame by a score of 5 to 3. The game was played on Randall diamond, May 8, before a record crowd.

By slugging the ball at the critical times Wisconsin won a Big Ten victory over the Minnesota baseball nine, by a 9 to 5 score at Minneapolis on May 11. George Stoll, who was on the mound for Wisconsin, let the Gophers down with seven hits, and won this third conference victory in four starts.

Rallys were becoming the Badger forte, for another one, this time in the eighth inning, turned an inevitable defeat into a victory of 4 to 3 over Minnesota at Camp Randall on May 15. Stoll was again the victorious pitcher, and allowed the Gophers seven hits.

Journeying down to Illinois, Wisconsin with Jacobsen turning in a most appropriate pitching game, turned back the Suckers 5 to 2. Jacobsen held the Illini to four scattered hits, while his

A Hit!
mates were hammering the ball for 12 safe bingles.

Because Christman, Northwestern third baseman, neglected to touch first base after he had hit a home run in the Wisconsin-Northwestern game at Evanston May 22, Wisconsin did not have to go to extra innings to defeat Northwestern 7 to 6. Stoll pitched a good game and ran up his string of victories.

Purdue proved for the second time during the year to be too much for the Wisconsin team, and hopes for a tie for the title were sent glimmering. The Boilermakers turned back the Badgers 6 to 1 in a game at Madison, May 24. Six errors were registered against Wisconsin, which was the main reason for the defeat.

A second place in the Big Ten conference was grabbed off by the Wisconsin nine when behind a great bit of pitching by George Stoll, the Cardinals took the Michigan champions into camp by 6 to 4 in a game at Ann Arbor, May 29. In was another rally that won for Wisconsin-this time in the third inning.

Rallying in the ninth inning, Wisconsin won its second victory of the season from the Madison Blues. This victory was 10 to 9 , and Coach Guy S. Lowman gave all his hurlers a chance to work. Wisconsin played a good fielding game, making but a single error.

The season closed with a victory over Chicago in a game played at Madison. The final count was 8 to 2 .

## Swimming

Winning four out of five dual meets over conference teams and taking a fourth place in the Conference Meet at Illinois, Coach Joe Steinauer and his Cardinal suited swimmers made a record this season which, although not perfect, is one of which they may well be proud. Losing only to Michigan and Northwestern, the Badger team finished, as always, well up in the conference and was feared and respected by every other team.

Steinauer Coach

Ratcliff
Captain

Simpkins Windsey Ross Bailey Lange Mesberg Vleet Nickel Von Maltitz Lonejoy Burns Foseid, trainer Olson Kaiser Davis Ruez Popkin Dinnerman Florez $\quad$ De Bever Von Vor Linden Gernen Crow Crowley
yard breast stroke and Ratcliff decisively winning the fancy dives. Michigans' strength in the dashes was the deciding factor of the meet.

Two weeks later when Steinauer's paddlers met Illinois at Champaign, they speedily avenged their defeat at the hands of Michigan by almost reversing the score. The Cardinal wearers emerged on the long end of a 42 to 27 result. The meet was closely contested and Wisconsin was hard pushed all the way. Several Illinois tank records were broken and the Wisconsin medley relay team came within three tenths of a second of tying the conference record.

The next night the Badgers returned to Madison and gained their second victory in two days by overwhelming Purdue 53 to 16. The times of the meet were exceptionally slow, all men turning in much poorer results than at any previous attempts. An example of fine sportsmanship was displayed here when both Kratz and Ratcliff allowed their teammates to forge ahead of them and thus earn their W's for the season. Wisconsin took a first and second in every event except the 440 .

The Badgers again chalked up a victory on March 11, when they defeated Iowa at Madison by a score of 38 to 31. A close battle was fought between Pattie of Iowa and Captain Ratcliff of Wisconsin in the 150 -yard backstroke. The judges had a

Kratz

hard time deciding which of the two had touched first, but finally gave the decision to Pattie. Carter of Iowa, last years' conference champion in the 200 yard breast stroke, again won this event here. Kratz, Wisconsin's ace, did not compete against him, being saved for the clash to come at the conference meet where last year he was just outtouched.

Completely outclassed in nearly every event, Wisconsin lost the last dual meet of the season to Northwestern the following night at Evanston. The Purple swimmers romped away with the meet, emerging on the top of a 42 to 27 score. Wisconsin only took

Post
Captain Water Polo

Clark two firsts, one in the 300 -yard Medley Relay and the other in the 200 -yard breast stroke. The absence of Herschberger in the dashes here also proved a serious handi-cap-one, in fact, which the Badgers could not overcome. Without him competing, Manowitz of Northwestern had little trouble in winning the dashes.

## Conference at Illinois

On March 25 and 26, Wisconsin officially closed the season by placing fourth in the Conference Meet, held this year at Illinois, Michigan took first, amassing a total of 49 points, Minnesota second with 27 points, and Northwestern third with 14. Wisconsin garnered 9 to take fourth place. Winston Kratz was the only Wisconsin man to take a first place when he won the 200 -yard breast stroke. His time was $2: 43$ 3/5, coming within $4 / 5$ of a second of the national record.

At the close of the season five major and six minor W's and one sWt were awarded to the swimmers. Clark, Herschberger, Kratz, and Pederson won major W's and Ratcliff was awarded a major with Captain's star. Baille, Bardeen Hatelberg, Holmes, Kinkaed, and Vinson were given minor awards. Tanaka won the sWt and Hotton the manager's W. Captain Ratcliff was high point man for the season.

In her second season of competition in water polo, which last year was substituted for water basektball in the Big Ten, Wisconsin bettered her previous average by 50 per cent. Winning half of its games in contrast to last season's record of no victories at all, Captain Post's team finished in fourth place in the Conference.

With the return of Post, Stewart, and Woodsome from last year's team, the season began auspiciously and hopes were high for a championship team. With the first game of the season, however, these hopes were blighted, for Chicago, with last year's team practically intact and playing in its own tank, defeated the Badgers 9 to 4 .

Not disheartened by this defeat, however, Wisconsin came back in her next home game and in a closely fought battle defeated Michigan 5 to 4.

The next game was with Illinois at Champaign and was ancther setback for Wisconsin, for the Suckers garnered 8 points to the Badger's 3. Again handicapped by a strange pool and one much larger than they were accustcmed to, Wisconsin was completely bewildered by the fast swirming, open type of play used by Illinois.

Once again in their own pool, Wisconsin's poloists once more evened the score by taking Purdue into camp to the tune of 5 to 2.

The Cardinal clad team triumphed again two weeks later when they completely swamped Iowa at Madison. Iowa was lost from the first and the game ended with the score 9 to 2 against them.

In the final game of the season, Northwestern, which tied with Chicago for the championship, received a real scare when they barely beat Wisconsin in the Evanston pool. With Wisconsin leading until the last two minutes, Northwestern managed to slip over two goals and eke out a 7 to 6 victory.

St e w a rt, Post, Woodsome, Lang, Hodges, Esser, Ludwigsen, and Scott received minor W's, Raggatz the manager's W, and Proctor and Stevenson sWt's.

"Rube" Brandow Coach

William Lidicker Captain

## Hockey

When W. R. Brandow abandoned his career as a professional hockey player last January and came to Wisconsin as the new hockey coach he found a most difficult task before him.

In December, when the hockey squad first assembled, Tom Lieb was designated as the acting hockey coach to take the place left vacant by Ivy Iverson, the former coach, until a regular coach could be procured. George Little, director of athletics, and William Z. Lidicker, captain of the team, made futile efforts to sign a coach before Christmas.

Meanwhile Lieb had taken active charge of the puck chasers in the absence of a coach. When Christmas vacation came the squad was still lacking a mentor, and consequently were not given a training trip as was the custom. W. R. Brandow, a well known hockey player in professional and amateur circles, arrived after the vactaion, and Lieb took up his duties as a track coach.

In short, the new coach had but two weeks to get his sextet into condition for the series of games with Minnesota on January 14 and 15 in Madison. A hasty survey of his candidates revealed a lack of eligible players. Brandow lost little time and started at once to organize his team from the eligible material. The first game of the season was played in Madison with the Janesville sextet on January 7. In this game James W. Drummond, Cleveland, was started in the center position. As he was ineligible for varsity play he was not used in conference games. The game was won by Wisconsin 4-1.

When the conference games finally were played with Minnesota, the Badger sextet found itself sadly lacking in substitutes. Karl G. Jansky, Madison, and William Z. Lidicker, two veteran offensive players, were the stars of these games. John J. Silverthorne, Riverside, Illinois, and William Rahr, Manitowoc, were both utilized as centers in these games. Minnesota won both games -the first $1-0$, and the second 3-1.

The Frosh Squad

When the Badger sextet met the University of Manitoba team January 21 in Madison, the first international collegiate hockey game ever played by Wisconsin was witnessed by a capacity crowd. The Manitoba team was hailed as the foremost amateur sextet in college circles. They had little difficulty in downing the Wiscon$\sin$ team 7-0. In the first few minutes of play they scored five times. But it gave the Wisconsin team a good lesson in hockey, and the players profited by it.

Throughout all the past games Lidicker and Jansky were playing brilliantly. But it was James M. Mason, a tall youth from Winnipeg, playing right defense, who thrilled spectators with his furious spurts down the rink with the puck. His defensive playing was likewise effective.
Guarding the goal was Don Mitchell, who succeeded very ably in arresting the progress of the elusive puck. It was Mitchell who prevented the defeats from being far more one sided. His accuracy and alertness was unequaled by any goalie in the Big Ten. In the Manitoba game he was painfully injured about the head, but remained at his post to stop a total of 43 shots.

Ineligibility and weather proved big handicaps to the hockey team. No sooner did the second semester come than word was received that Mason, Drummond, Silverthorn, and Moorhead were ineligible for further varsity play.

Brandow now found his squad without a capable center. In Mason he had lost his best defense man. Alfred J. Moorhead, another of the ineligibles, was likewise a necessary defensive player. The original squad of 14 men was now depleted to nine players.

With the few men he had remaining, Brandow formed a team of ability. But the outdoor rink was suffering from the sun and warm winds, and the squad was forced to idly wait for suitable ice.

In the series of return games with Minnesota at Minneapolis the Gopher squad subdued the Wisconsin sextet by tiring out the few players that Brandow could use. Emil Iverson,

"Bill" Rahr

Karl Jansky

Don Mitchell

Dyrell Cahoon

"AL" Moorehead

Jacob Moelk
the crafty Gopher coach, substituted his players often and by this means fatigued the Badger group.

When Michigan came to Madison February 18 to play a series of two games with Wisconsin, the outlook was brighter. William Rahr after showing great improvement was started as the regular center. Michael Murphy, Manitowoc, was playing left defense. Jacob W. Moelk, Janesville, was teaming with Murphy at right defense. After outplaying the Michigan team throughout the game, Wisconsin finally lost $1-0$ by a freak score made in the second period.

Warm weather interfered and the second game of the local series with Michigan was postponed. Between this time and March, the Wisconsin hockey squad had practically no practice on the ice. They took to basketball as a means of retaining condition.

On March 3, the Badger team left Madison for Windsor, Ontario, to play the first American intercollegiate hockey games ever played outside of the United States. On March 4, the local sextet lost to Michigan 2-1, before 5,000 spectators. Another defeat was suffered on March 5 by a score of 1-0. In the third game the Badger team lost by a single tally made after 30 minutes of overtime play.

At Windsor the squad was feted at a banquet given by Wiscon$\sin$ graduates. At this banquet Don Mitchell, of Duluth, the star Badger goal tender, was elected captain of the 1927-28 hockey team.

The Carnival

## Ice Carnival

Favored with ideal weather conditions on February 19, Wisconsin's second annual winter sports carnival was held on Lake Mendota under the supervision of Directors Brandow and Berg, and from the point of view of attendance and number of participants actually entered, it was undoubtedly the most successful ever sponsored by the university.

Practically all the honors in the men's skating events went to the four teammates of the Milwaukee International Harvester club. Florence Koepsel, Elfreida Kaster, and Camela Gabel offered close competition in most of the women's events, and the majority of points awarded women participants were divided among them.

Fancy skating and relay races affored more beauty and thrills to the onlookers. Farm House succeeded in winning the interfraternity relay for the second consecutive year. The ice boat race
 run over a five mile course had a record entry list of 15 boats. The Yellow Streak, piloted by Fosseid, won the race handily.

On account of the unsafe condition of the slide, the ski jumping event was not contested.

By winning this meet the Madison team permanently won possession of the huge skating trophy that was to be awarded to the team that won it twice.

The Start

## Wrestling

The wrestling team experienced one of the worst seasons that the Cardinal matmen have had in many years during the 1926-27 season. Throughout the year it seemed as though old man jinx was taking his yearly exercise on the grappling team, for he seldom let up with his wrecking tactics, especially before a meet.

At the conference gathering March 11 and 12 at Chicago, the Badgers walked off with one championship and two third places. Midget Smitz, upset the dope and took one of the seven titles back home with him. The other two awards were given to A. Smith and D. Holt, 135 and 125 pounders respectively, after several preliminary matches in which these green men showed that they must be considered before any more conference titles are given out next year.

Besides this whirlwind finish, the Badgers did not do much damage to their opponents in dual meets during the entire year, because they were handicapped by the loss of two of their best men at the beginning of the year. Captain "Bill" Splees, a middleweight was the first casualty. He injured his arm a week before the lowa meet and was lost to the team for the rest of the year. The men went to lowa City on January 15, however, and gave the Hawkeyes a hard struggle, losing 17.5 to 7.5 .

In this meet coach Hitchcock suffered another setback when Wally Cole, runner-up in the conference, in the 175 pound class, injured his elbow.

These losses, however, did not take away any of the fight that the Badgers had, and they tore into illinois on junuary 22.

Although his team did not fare well this year, Coach Hitchcock is looking forward to a better season next year, as he will have all the men back from this year's squad. Barring accidents, the following varsity men will be back to fight for their respective positions on the team: Smitz, Stetson, Cohn, Holt, Bridgman, Smith, Gasche, Meyer, Becker, Schuck, De Brackett, and Fortney. Besides these men, there are some freshmen who will be eligible for varsity competition next year.

## Gym

The Gymnastic team, under the tutelage of Coach Masley and the leadership of Captain Neller, concluded a successful season when they placed second in Conference ranking. Neller succeeded in scoring points in every meet of the season, and Hinderliter was a close second in the scoring column. Felton developed into a clever gymnast and was one of the three Wisconsin men to score in the Conferencee meet.

Schwoerke, Brill, Kuhe, Bartelt, Vornholt, and Snavely were squad members all of whom were factors in enabling the team to win three of the five Conference meets in which it engaged.

## Fencing

Captain Freytag, Waters, Asplund, Rabbe, Hollister, and Clarkson constituted the 1927 Varsity Fencing team which engaged in three dual meets in addition to participating in the Conference meet at Chicago on March 12.

In the dual meets it met some of the strongest conference teams, and this stiff opposition resulted in victory over Purdue and defeat at the hands of Chicago and Iowa. The team's real strength was displayed at the Conference meet, however, where it took second place. Freytag and Waters won second places in the dueling swords and foils respectively, and Asplund took fourth in the sabers.

## Boxing

Approximately 115 men were enrolled in regular boxing classes for physical education credit during the two semesters of the past year. The classes met regularly in the tower room of the university gymnasium and were under the supervision of Coach Storch.

Two competitive meets were held in March. An interclass tourney involving elimination bouts was held from March 14-20, and an all-university tournament whose entrants consisted of those men who had been successful in the interclass bouts was staged as the last event of the season on March 26.

The participants were divided in 8 weight groups, from featherweight through to heavyweight, and in addition to being crowned university champions in their respective weights, the winners in the final tournament were awarded numeral sweaters and gold medals.

During the course of the season many good boxers were developed, and the hope held by the instructional staff for the future is that the sport may involve intercollegiate competition.

## Golf

With the rapid rise of golf as one of America's foremost sports in the past decade, it is altogether natural that golf at Wisconsin should assume its place as an intercollegiate sport,

Joe Steinauer was official coach of the varsity squad last spring, while Adolph Bock who was the ace and captain of the team in 1925, consented to manage the affairs of the team. The team this year was composed of Captain Andrew Leith, Hunter Sheldon, Roscoe Grimm, Irving Clendennen, Ben Anderson and Bush Solbraa, substitutes

The first opponent of the year was Iowa at Madison, on May 6. The Hawkeyes were turned back under the Nassau system of scoring, 15 to 8. On May 8 Marquette played at Madison, where the Badgers were victorious, 20 to 3. At Northwestern on May 13, the Badgers had their first taste of defeat. The match was played during a downpour of rain at the North shore Country Club in Wilmette, III. The following week at Madison found every member of the team at the top of his game; the Badger quartet took the Notre Dame team into camp, 15 to 18. Michigan was next, and gave the varsity its second defeat at Maple Bluff. The return game was played with Marquette at the Blue Mound Country Club, Wauwatosa, Wis. The Badgers won easily; both Grimm and Sheldon broke 80. Out of the total of six dual meets the record shows that only two were lost.

The team placed fifth in the conference championship held at the Kno!lwood Country Club, Lake Bluff, Illinois. In the individual medal play, Sheldon placed tenth and Grimm placed thirteenth.

Anderson Grimm Clendennon Leith Sheldon Solbra Bock, Coach

## Tennis

The Badger tennis team of last year has set a record that will be hard to equal throughout the coming seasons. The only defeat that was scored against the strong defenders of Wisconsin's title was dropped to Michigan in a 4-3 battle. This was one of the most spectacular and closely contested meets ever recorded in the intercollegiate conference. Cold weather and wet courts helped in the defeat of the racquetters by slowing down their driving game. Last year's team consisted of Leo Boldenweck, Sam Durand, Captain, Bill Giessel, Frank Foster, Oscar Kaner, and Bob McMillan. Boldenweck, Durand and Foster were the reliable point getters in a hotly contested match. Captain Durand is the son of one of the greatest tennis players that Wisconsin has ever had, and it is greatly due to him that Wisconsin had such a successful season.

Too much cannot be said for Bill Winterble, local business man and sport enthusiast, who has been coaching Wisconsin tennis teams for the past two years. Bill is a former Tri-State champion and instructs gratis in order to retain his amateur standing. It is largely due to him that Wisconsin is again producing teams that bring fear to her opponents. His engaging personality has made for him staunch friends all over the state.

The team this year, under the leadership of Captain Leo Boldenweck, again bids fair to uphold the honor of Wisconsin among the Big Ten schools. The fall tryout, although rather short, disclosed some great prospects for the coming year, and Wisconsin again has the chance of producing a championship team.

The lack of adequate facilities and inclement weather has retarded the teams of former years from beginning their spring practice before April first. This of course, gives an unfair advantage to a team that has had the chance to practice and develop their strength. With the backing of Grorge Little, Director of Athletics, at the university, and Coach Winterble, the team is to have some indoor courts that will enable it to practice the year round. Great thanks is also due to some of the people around Madison who have willingly lent their concrete courts for early season practice.

Phi Delta Phi Baseball Champions

## 1926-1927

Under the guidance of George Berg and his capable staff of assistants, the Intramural department has had its most successful year since its introduction into the program of athletics at Wisconsin. Too much credit cannot be given these men for the manner in which they are conducting their department, which is gaining in popularity with the student body every year.

During the year 1926-27 approximately 1,500 men students took part in the sport program offered by the Intramural department. The competition among the participants was the keenest type in all of the athletic events offered. Besides the interfraternity teams there were also those representing the independent and dormitory groups which participated in their respective leagues.

The program of the department is divided into divisions, the sports being given ratings of major, intermediate, and minor. Points for the Badger Bowl being awarded according to the rating of the event.

## Basketball

Basketball created the most interest among the fraternities and the resulting race saw the keenest competition among the Greek basketeers. Practically every fraternity on the campus had a team entered in the hopes of coming out on top. After the preliminary and semi-final games had been played, the Alpha Chi Rho's, Beta Theta Pi’s, Chi Psi's and Sigma Pi's were left to fight for the championship. The championship game was played between the Beta's and the Alpha Chi Rho's. It was a nip and tuck affair throughout, featured by close guarding on the part of both teams. The Alpha Chi Rho's, due to superior passing and basket shooting came out on the long end of a 11-8 count, thus winning the championship with Shaw, Black, Semnier, Andersen, and Bodden in their lineup.

Sigma Chi Football Champions

Alpha Chi Rho Championship Basketball Team

## Baseball

Baseball proved to be the big drawing card in the spring and resulted in a race featured by upsets. In the finals the Phi Delta Phi's, with a well balanced team won the championship.

## Bowling

Bowling claimed a large list of entries and was very popular during the early winter months. During the first semester the teams battled for the leadership of the divisions. The second semester saw the winners enter the finals. The Phi Delta Phi's, by winning 13 games and only losing 5 were the champions. Sigma Phi Epsilon was second and Theta Delta Chi, third.

## Football, etc.

The football race came to an end in a tie between the Sigma Chi's and Farmhouse. The game was played on a muddy field and was a hard fought battle throughout.

The Beta's showed the way to the other Greek athletes in the indoor track meet and ran off with first place. Touch football was won by Alpha Chi Sigma. The cross country championship went to Farmhouse, who also came out on top of the heap in wrestling. The Sigma Chi's won first place in free throwing.

## The Supremacy Trophy

Last year the Intramural department started a new innovation when they offered a large trophy known as the Badger Bowl to the fraternity getting the largest number of points in interfraternity competition. This trophy, is to be held by the fraternity that is supreme in interfraternity athletics for one year, and passes on to the winner each fall. Beta Theta Pi was the winner of the Badger Bowl the first year it was offered. It is very remarkable to note that although the Betas did not win first place in any of the sports they entered, they amassed a sum total of points large enough to place the coveted Badger Bowl in their mantel for one year. On this years' program there are still many events to be run off this spring and all of the fraternities are still hopeful of making enough points to win the Badger Bowl.

Phi Delta Phi Bowling Champions

## Work, and the joy of it!

Bear-Claw always was a hunter, and you ought to see him down a goose in full flight. A whirr of wings, a glint of hurtling flint, and food falling into the lake from the sky!
But whatever Bear-Claw, Wolf, and that veteran artisan, Stone-Knife can turn a tree's wrapper into the finest craft afloat.
Balance, poise, and speed!
(Yet, have you ever watched the young thing, Waving Fern, as she prepares the softest deer skins for a robe?)

WISCONSIN LIFE

BEFORE there was any University of Wisconsin, there was a Winnebago village on the lake shore, where Adams and Tripp Halls now stand. Very long ago, they say, two devoted Indian lovers lived there. The name of the maiden was Wissep-hu which means Silver Maple, and the young brave was called Ho-po-ko-e-kau, meaning Glory of the Morning.

While Ho-po-ko-e-kau was on a hunting expedition, Wissep-hu fell ill of a fever, and when he returned they told him she was dead. In his agony of grief and loneliness, he climbed up the hill behind the village, where the Indians had built mounds in the shapes of animals. As he stood looking out over the wide lake and the wooded shores, he stretched out his arms and cried, "Oh, Wissep-hu, tell me how I may find my way to you in the Happy Hunting Grounds!'

He flung himself down on the effigy of a bird, and buried his face in the long sweet grass. And then he felt the earth beneath him quiver, and a stir of air about him. He was borne up into the air on the back of a mighty bird, and carried away beyond the clouds to the Happy Hunting Grounds.

*     *         * 

Silver Maple and Glory of the Morning, as they walked in the meadows of paradise, remembered the lakes and hills of the land where they had been so happy.
"Let us go back for a while, Wissep-hu," said Glory of the Morning, "and see how it looks now. They say that wonderful changes have taken place, and I would like to see them.

So they mounted on the back of the great bird, and it flew with them past the Milky Way, and among the spinning planets, till at last it sank into its effigy again.

For a moment the two Indians sat breathless with the thrill of their journey. Then they thanked the bird for its kindness, got up, and looked about them.

 the eggs fly at the bag rush.

 any Winnebago war-whoops he had ever heard.

After cheering the team at the send-offs, our hero and heroine were loval Wisconsinites. Glory of the Morning sped on spirit feet beside the champion runners in the cross-country races, but Silver Maple was the only one to see him cross the line with the winners.

He quite enjoyed learning to fox-trot, but he threatened not to take Wissep-hu to any more plays if she bobbed her hair, and she did love to see the plays!

The greatest winter thrill of all was ice-boating. But what was all this talk about kings and queens? -on iceboats, too! The sky lent its stars to the great white palace, and inside they are holding a great pow-wow. Two Indian wraiths had more fun at Prom than anyone else.

Here is a strange and solemn procession. Has a great chief died? Wissep-hu was much amused to find that this gloomy spectacle had something to do with a great, mysterious feast. After that they had another pow-wow in the great white palace, led by another king and queen.
They are building another palace on the shore of the lake. "I thought it must take a hundred years to finish such a building,' said Ho-po-ko-e-kau, astounded at the swiftness with which the red girders swung into place.

He had to admit that he could not outdo Chuck when it came to running and jumping, though he had once surpassed all his Indian comrades. Wissep-hu was quite embarrassed when she arrived at the Rocketeers Prom minus a red ribbon. She had forgotten she was only a ghost.

Ho-po-ko-e-kau declared that no self-respecting Indian brave would ever dress and act like a girl, but after he saw Haresfoot he began to think he had missed some good fun.

During Mothers' Weekend, the Indians felt a little lonesome. They wished they had someone to show over the campus. The ceremony of Senior Swingout, when the women to graduate, donned caps and gowns, impressed them mightily, but still they felt downcast.

Wissep-hu was almost frightened back to the Happy Hunting Grounds when she heard the Memorial Day salutes. Both she and Ho-po-ko-e-kau were glad to see the emancipation of the Frosh as they threw their caps into the fire.
"They don't act as if they were very old, do they?: asked Ho-po-ko-e-kau as they watched the pajama parade.

## W. S. G. A. Council

The Women's Self-Government Association is an organization of all undergraduate women who are enrolled in the University. It is governed by an executive council composed of the elected officers, major chairmen, and class representatives and a legislative Board of representatives from each house in which live three or more girls. Its purpose is to maintain a high standard of social life on the campus, not only through rules made and enforced by the university women themselves, but by providing the finest social opportunities; to foster and direct worthy activities; to give voice to the public opinion of University women, and to represent them in any project undertaken by undergraduates on the campus.

## The 1928 Badger

## May this Badger mean to you-Wisconsin!

In their growth in size from the paper covered booklets of earlier years and in their consistent improvement since that time, The Badgers have reflected in a striking way the growth and development of our University. If the 1928 Badger adequately represents the Wisconsin of today both in spirit and in fact, and if in addition it is able by its attempts rather than by its successes to serve as some inspiration to the succeeding staffs it will have fulfilled its purpose.

If the efforts we have put forth, if the dreams we have dreamed, if the spirit we have tried to instill in this book reaches you, and in the years to come clears away the mists of time and carries you back to Wisconsin-her glories, her traditions-then success is ours.

May this Badger mean to you-Wisconsin!
The Editor.

## Acknowledgments

The success of a year book is dependent upon the support and cooperation extended in its production. This year's staff while one of the smallest in the history of the Badger has been more loyal than the imagination of those in charge had dared to expect. This spirit of mutual endeavor and cooperation has extended beyond the realms of the staff into the outside world. Those particularly worthy of acknowledgment are:
"Herb" Brockhausen, of the Brock Engraving Company, whose counsel, enthusiasm and creative genius has made possible the 1928 Badger.
Fred Schmelzkopf, Superintendent of The Cantwell Printing Company, whose unselfish devotion to the book has made possible many technical and typographical improvements.
Miss Taylor of the Photoart House who has been especially helpful in the selection of scenic and feature pictures.
Miss Seiffert of the De Longe Studio who has contributed much of her time and energy to the improvement of the Studio pictures.
Miss G. Martin, for very kind consideration in distribution of Senior Summary cards.
John Bergstresser, Alumni Recorder, and the committee which was of such valuable assistance in the selection of the alumni representatives.
Miss Juliana Cotton whose inspiring poetic theme added much to the scenic section.
The Badger and Carl Thomas Studios for the Studio photography.
The Wooley Studio for the pictures of Dr. Bradley and Carl Johnson and those of the women's dancing groups.
The David Molloy Company for their careful attention and helpful suggestions in the designing of the cover.

## The Daily Cardinal

And speaking of history, did you know that the Daily Cardinal is celebrating its thirty-fifth birthday this year? It was on a clear April morning 'way back in the year 1892 that the "deet" made its modest bow to a campus which was calling for an organ of news and student expression.
From that year to this the Daily Cardinal has continued to serve the student body in a similar manner. Today the student publication has come to mean something more than a mere newspaper, something more than a mere chronological account of the year's events. In this great community of ours the Daily Cardinal has come to be a powerful force which daily acquaints the students of the fact that they are members of a body politic, a community of which they are integral members.

More than that. The Daily Cardinal in the past hear has become an organ for the expression of student opinion through which many ills have been discussed pro and con and by means of which the students have come to take an even greater interest in the life of state and nation.

The Board of Control

From the tempestuous days in the early fall when President Frank decreed that the Daily Cardinal had the right to express the truth as it was evident to the editors, there has been a definite attempt throughout the whole year to adopt the slogan "We owe but one loyalty and that to the truth."

Several innovations have been made during the past year including the birth of a Weekly Cardinal for mothers, fathers and alumni which, for financial reasons, had a short life but which is being sustained by means of the Sunday edition. Innovations have been made in the business side of the Daily Cardinal which will assure of a better advertising system, better circulation, and better means of collection which will pave the way for the next logical step in the development of the paper-a publication plant.

And this step will undoubtedly be taken before the opening of the first semester next fall. Plans are now under way for the erection of a press, linotype machines and other necessities of a printing plant to be owned and operated by the Daily Cardinal corporation of which every student is a member. When that dream is realized and the new offices in the Memorial Union building are occupied, the Daily Cardinal will be able to take its proper place among the leading undergraduate publications of the country.

The Summer Session edition of the Daily Cardinal is vastly different from that of the regular session. Coming as it does, during a period in which there are many strangers on the campus, it has as its first object the education of those who have but recently registered to the fact that they are University of Wisconsin students; that they have duties as well as rights; and that they form a ccmpact community.
Althcugh the Summer Session edition is published but three days a week, the staff of seven (in contrast with 150 daily workers throughout the regular session) are kept busy frcm morning to night writing editorials, scraping up news,
covering lectures and keeping track of the goings and comings of students. If a college publication may ever be compared to a small-town paper it is during the summer session. But say! it's fun.

Part of the major work of the Daily Cardinal during the summer is the sponsoring of a water carnival which culminates the sccial and athletic activity of the session.
To Dean Gocdnight is due much praise for his excellent advice and as sistance in conducting the Summer Session edition. As director of the summer session he was of invaluable aid to the editor in his attempt to answer the needs of the new students.

## The Alumni Magazine

Bart E. McCormick, General Secretary and Editor Etta Radke, Assistant

The General Alumni Association is a voluntary, cooperative enterprise, animated by a desire to serve the University, the alumni, former students, active students and prospective students.

The General Alumni Association is a medium through which alumni (and this includes former students) may render effective assistance to the University, thus enabling the University to constantly render greater service to the state and nation, to exert a broader influence for good, and to improve upon the high standards and great accomplishments of the past.

The General Alumni Association is an organized, informed, interested, active force for the purpose of correlating the activities of the alumni with students and faculty, a force that may come to the defense of the University in time of need and that may support it at all times.

There are more than sixty thousand living alumni and former students of the University. If they were all members of a great army of boosters, if they were welded into one great force in support of the University, nothing could impede the progress of our Alma Mater.

## WISCONSIN UNION

Lowell Frautschi

The Wisconsin Union has the lofty aim of giving material expression to the idealism of Wisconsin men.

This year its chief contribution to university life has been cultural. Good music, good dancing, good discussion, have under its sponsorship, enriched the recreational life of students and their friends.

For years the Wisconsin Union has played gcd-father to the Memorial Union project, which in ancther twelve months will finally provide it with that home which the university community has so long needed. Then the cultural and social contribution of the Wisconsin Unicn will begin to match the needs of Wisconsin men and women.

The machinery of the Unicn is ready at all times to foster undertakings which will benefit its members, the men students of the university.

Lowell Frautschi, President.

## The Union Board

## Wisconsin Union Concert Series

During the past winter this series included six concerts, giving Madison and the university the greatest musical season of their history. The Ukrainian National Chorus, Mario Chamlee, Harold Bauer and Pablo Casals, Sergie Rachmaninoff, Fritz Kreisler, and Sigrid Onegin were the artists, and Clyde Kluckhohn, with John Fairbank assisting, were the concert managers for Union Board

## Union Board Dances at Lathrop Ha!!

Every Friday and Saturday evening on which parties were sanctioned this year, students enjoyed these dances at Lathrop Hall. For several years they have retained their popularity as the best student dances, and as soon as possible will be transferred to the beautiful ballroom in the Memorial Union building. Gordon Dawson was in charge this year.

## The Dennishawn Dancers

As an experiment in bringing stage productions to Madison, Union Board presented the Dennishawn Dancers at the Garrick Theatre on February 9. So successful was the experiment, under the direction of Harold Konnak, that similar productions will probably be secured next season.

## The Assisting Staff

Although the executive body of the Wisconsin Union is the Union Board, yet many of its enterprises are carried out by the Assisting Staff. The Staff is elected from a field of candidates on the basis of performance.

## Headquarters for Student Activities

The Union Building, formerly President Birge's residence, is a temporary home for student offices, pending the completion of the Memorial Union. Union Board, represented this year by Ewart Merica, is custodian, and has met the need for increased space by securing jurisdiction of Langdon Hall from the Board of Regents.

## The Union Arrives

This is the year the Union building took form in steel and stone, and these are the men who made it possible.
Seven years of hard work by this alumni Executive Committee plus the giving of 17,000 students, alumni, and friends culminated last fall in letting a $\$ 773,000$ contract for the first two units of the building, unequipped.
The courage and the patience of the committee, many times tried, was tested to the utmost when it was announced in October that the lowest contractor's bid was $\$ 115,000$ more than the cash on hand. The committee and its army of faithful student and alumni subscribers, rather than cut the quality of the building, faced the issue and in an emergency three weeks campaign raised $\$ 25,000$ in cash and $\$ 90,000$ on a note.
The contract was let November 4 and actual construction, the dream of two college generations, has been continuous and rapid ever since.
The central clubhouse unit and the commons unit will be done, but unfurnished, by 1928. The Executive Committee and everybody interested in having the Union are now working intensively for the $\$ 400,000$ that will pay off the $\$ 90,000$ note and buy furniture and equipment.
If the building can be furnished, it will open early in 1928.

John Dollard, '22, who as secretary has steered the Union project since 1922, raising pledges from $\$ 803,000$ to $\$ 1,120,000$ and cash from $\$ 221,000$ to $\$ 774,000$ besides playing an influential part in the undergraduate life of the University, left Wisconsin November 15 to become assistant to Pres. Max Mason of the University of Chicago, a Wisconsin alumnus and teacher, and member of the Union Executive Committee.

Dollard was succeeded by Porter Butts, '24, former alumni recorder and one time editor of the Daily Cardinal and president of the Haresfoot Club. He has the three-fold duty of directing the collection of outstanding pledges, of helping secure new funds for furniture and the third unit, and of planning with the University Committee the scheme for the furnishing and operation of the building.

John Dollard
Porter Butts

Designed in the architectural style of the Northern Italian Renaissance, the Union is in harmony with the general university building scheme and a proper companion for the beautiful Historical Library. It is the first step in the comprehensive development of the lower campus which is projected. The Union is built of buff Madison stone, trimmed with gray Bedford stone. A low roof of green tile, projecting pylons, a great curving bay, and the broken outlines of its three units make the building ideally suited for its site among the elm trees of the bending lakeshore
The flagstone terrace stretching to the miniature lake harbor will be one of the beauty spots of the campus. The building, entirely completed, will cost $\$ 1,500,000$ and will be the finest and most useful structure the university possesses.

## What a Union Is For

"Nothing that the professor or laboratory can do for the student can take the place of daily close companionship with hundreds of his fellows."

President Van Hise, Inaugural Address, 1904.

## The Union Will Exist to Make Wisconsin a More Human Place

A community building like the Union is the result of a desire that is reaching universal proportionsa desire to enrich the barren hours outside the classroom, to bring human relations in education into their proper place of importance and usefulness, to restore personality to the university.

Every university which has experienced the pains of size realizes the need for the restoration of education to its former personal basis, for the elementary physical facilities where the contagion and compulsion of a common purpose may be felt-to the profit of the intellectual and spiritual life of the University.

The need is being answered with Unions, commons and dormitories.

## The Union is the Recognition of the Importance of the Leisure Hour

It is a place to meet, to eat, to talk, to work, and to play-under friendly conditions.
It provides the facilities for creative work not afforded by the ordinary college plant: student activity rooms, the theater, sketch rooms, debate halls.

It provides facilities for productive play: good books to read, good music to hear, good pictures to see, good games to play.

It provides a natural and informal meeting place for faculty and students, where they do not have to talk shop, where the student may be initiated into the fine art of consequential and inconsequential conversation, where the appetite for the independent search of knowledge may be stimulated, and where the teacher may learn what a student really thinks about.
"The Memorial Union building will give us a 'living room' that will convert the University from a 'house' of learning into a home' of learning."

## President Frank

President Frank
Dr. H. C. Bradley

## The University Committee on the Union

That the Union may make its most valuable contribution to the social and intellectual life of the University, the president has appointed an all-university committee on the Union, representing students, faculty, alumni, and regents, which is to plan for the functioning of the building. The members of the committee are:

## The Union Grows

On November 10-a hole. And then overnight the mushroom grew. Work shanties went up. Fifty men appeared, with hammers and shovels, mortar and sand. The hole was quickly filled.

On February 23 the first stone was laid. Porter Butts, Lowell Frautschi, and Dr. Harold Bradley celebrated informally.

From Science Hall this was the view on March 15-the steel frame done, the stone up to the second floor. By Christmas, 1927, the shell of the building will be complete. The job then will be to furnish it.

DRAMATICS

We're off to Europe

John Mackin as Kathie

## "Meet the Prince!"

Sailing through seas of romance, laden with the wit and laughter of modern collegiates, and dancing with the spontaneity and joy of life, the good ship Nauseana brought "Meet the Prince!" twenty-ninth annual production and original musical comedy of the Haresfoot club to over 30,000 theater-goers in thirteen middle western cities.

With the background of a student tour to Europe, in which everyone travels third class, the officers of the ship are students who are totally innocent of the science of navigation, and enticing beautiful girls distract wavering attention, the search for the long lost Prince of Heidlberg occupies the foreground.

Gus, the collegiate baggage smasher, is bamboozled by the crooked envoys of Heidlberg into impersonating the long lost Prince, thereby letting himself in for a great deal of complicated situations. Greta, the vampish princess travelling incognito straightens out the tangle. Wilfred Roberts, 28 , took the part of Gus, while Kerbert Earle, '28, who was Paula in "Mary Ann," impersonated Greta.

Russell Winnie, '27, president of the club for 1927, played Bill, while other men in the show were James Nelson, ${ }^{27}$, as Gerry; Bryant Gale, ${ }^{2} 29$, as Bob; Francis O'Connor, ${ }^{\prime} 29$, as Charlie Batz; Nathan Hindin, '28, as Louie; Kenneth Webster, 28, as Herr Soot, the Prime Minister; John Mackin, '27, as Kathie; John Moran, '27, as Beulah Batz; Paul Faust, '27, as Al, and Harold Himes, 27, as Joe.

"Kerb" Earle

Heidelberg

## "The Play's the Thing"

Haresfoot started out on its itinerary March 31, giving its first performance in Rockford, April 1, and including Chicago, Indianapolis, St. Louis, Peoria, Kenosha, Racine, Milwaukee, Sheboygan, Oshkosh, Appleton, and Janesville on the road tour. Besides this, six shows were given in Madison, on two week-ends.
Over seventy-five students made the long itinerary with the club. The show consisted of a twenty-eight-man chorus, twelve-man cast, eighteen-piece orchestra under the direction of Herbert Allen, 28, and the production staff.
William Schroeder, ${ }^{28}$, was named business manager, Frank Worthington, '27, publicity director, John Leigh,
28, program editor, and Ralph Scheutz, stage manager.
With an unusual plot which contained much room for action, "Meet the Prince!" was especially fit for a musical comedy in which male university students played the "girl' parts, as well as other parts in the cast, chorus, and production. Dancing was emphasized, while stage technique, gorgeousness of settings, the romantic and picturesque castle of Heidlberg providing a shadowy background. In fact everything that goes to make up a musical comedy, especially one of the youth and movement of "Meet the Prince!" was well done, equalling highest expectations and the publicity.

With twenty-nine years of record making history behind it, the Haresfoot club can well beam with pride on its laurels, and polish ever brighter their motto:

Kerbert Earle as Greta

"Bill" Ogilvie, "Kerb" Earle, "Red" Mackin The Threz Girl Friends

Frunch Club Play

"The Hottentot"

Under the direction of William Troutman, associate professor of speech, the Wisconsin University players presented "The Goose Hangs High," the first of a series of five or six major plays, on Friday, October 9, 1926, in the Madison high school auditorium. How father was helped out of his difficulties by his family formed the main plot of the play. Mary Bishop, '27, and D. E. Linderstrom, '26, carried the major roles of Eunice Ingals and Bernard Ingals respectively.

The second of the series "The First Year," a comic-tragedy, was presented in Central high school on December 4. The main roles were filled by Helen Ann Hughes, 28, Ted Ludden, grad, and Louis Gross, '29. As the title indicates the plot centered about trials and tribulations of a young married couple encounter in their first year of wedded life.

A fitting introduction to the 1928 prom was given in the presentation of "Captain Applejack" in the Garrick theatre on Feb. 3. All the adventure, bravado, and colorful costuming of the true pirate play was displayed in this tale of the metamorphosis of a spoiled young New Englander. Helen Ann Hughes, '28, prom queen, Mildred Engler, and Arthur Adams carried the title roles.

In addition to these major roles Wisconsin players, in order to make the legitimate drama more available on the campus, also present from time to time one-act plays with no admission price.

"The Goose Hangs High"

RELIGIOUS

Association Hall
The dormitory is the home of 125 stu dents, and the public rooms and recreation facilities are for student use.

## The Y. M. C. A.

Every student needs to get wisdom as well as knowledge. It is easier for the University to give knowledge and to measure a student's progress in getting it. To know how to live is more important than to know how to make a living. The Y.M.C.A. in the University of Wisconsin exists to help students to find this right way of living. It does not claim any monopoly, nor does it hold to any preconceived dogmatism as to what is the right way. The Y. M. C. A. gives practical aid to students scholastically and in their extracurricular activities it furnishes social and physical benefits through the use of its build-

The Fireplace
The large parlors and homelike atmosphere at the $Y$ are a club for hundreds of men students. ing which is for the use of all men students, and it affords spiritual direction through its secretary and its undergraduate officers.

The Y. M. C. A. works with and assists all other student enterprises in which students try their moral fibre and exercise leadership among their fellows. Cooperation in the building of manhood for the best interests of Wisconsin rather than sole appropriation of the field is the aim of the Association.

Through the dormitory, the employment bureau and loan funds, the infirmary service, the Frosh Y, the sophomore commission, the junior council, discussion groups, social committee, and other features, the association puts into practice its ideals of character building through constructive activity.

Standing in the lobby of the University Y. M. C. A. is the Kenneth Sterling Day Memorial, donated in 1923, by Mr. and Mrs. S. P. Day, of Cleveland, Ohio, in memory of their son. It bears the name of the senior man who is chosen each year as the best specimen of manhood in the University. The five bases of membership are: Christian character, religious participation, student activities, scholastic attainments and physical development. The names already engraved upon the Memorial are Gamber Tegtmeyer, 1924; John Bergstresser, 1925 ; George D. Hanna, 1926.

The Memorial consists of a figure of a young man holding the globe upon which is this inscription: "So long as earth shall bear such names as these, so long shall hope remain."

Lowell Frautschi of the class of 1927 was chosen by the faculty committee of award for the honor this spring.

Employment Service
The employment secretary, Jack Bruce, secured over 200 permanent and 1200 odd jobs for students this year.

Apache Dance
One of the series of successful parties this year in the new party room in the basement of the $Y$.

C. V. Hibbard, ' 00 General Secretary

## High Spots in the Y's Program

With Henry Sloan Coffin as the main speaker, the allUniversity religious week-end under the chairmanship of James Nelson, '27, and Eulalie Beffel, '27, was acclaimed unusually successful this year. The purpose of the affair is to bring all students together in an all-religious series of services and to devote the thought of the campus for one weekend to religion.

The freshman convocations, under the direction of the Y.M.C.A., in cooperation with the class of 1930 were an entirely new innovation. The purpose of the convocations is to help the freshmen to find

John P. Gillin, ${ }^{2} 7$
President themselves. President Frank spoke on "If I were a Freshman," and Prof. Meiklejohn's subject was "The Religion of a Reasonable Student." These affairs promise to become a Wisconsin tradition.

The Y dormitory was the first modern dormitory for men at the University, and for twenty years has provided a home for about 125 men each semester. The dormitory idea has gained ground with the result that despite the erection of the new University dormitories, the Y has more applications than ever.

The National Student Conference at Milwaukee was attended by 55 Wisconsin delegates, the largest delegation at this national meeting of over 3,000 students.

A study of the effects of undergraduate activities on character, carried on by the Junior Council this year, promise to yield real scientific results of value to educators and students. The survey is being made of prominent alumni with a study of their undergraduate careers in an attempt to show what elements of college life most promote success.

With the close of school this spring the university religious convocations will have completed a two years' record of interdenominational cooperation on the campus. Attempting to combine dignity of service with non-sectarianism, these meetings have brought before the student body the most outstanding men of religion which were available to speak to student audiences. This year the speakers have been Rt. Rev. Ingram, Bishop of London, President Frank, Rabbi Samuel Goldenson of Pittsburg, Dean Shailer Mathews of the University of Chicago, and Winfred Ernest Garrison, Associate Editor of the Christian Century. The March meeting was omitted on account of the all-university religious week-end. Edward A. Steiner of Grinnell spoke April 17.

## The Combined Bands

## Season 1926-27

The combined band of the university, composed of the concert band and the regimental band, plays on special occasions when a large band is needed. Its activities range from furnishing music for the various student activities to giving high grade concerts in the cause of good music. It is an essential feature of the military exercises, convocations, and all other events of all-university importance. Picked men from the band played at the football games at Ann Arbor and Chicago. It affords an unparalleled opportunity for a liberal education in band music and organization. During the past year the band has recorded "On Wisconsin," "Varsity Toast," and "Badger Ballad" for the Victor Talking Machine Company.

## University Orchestra

The University Orchestra is composed of sixty-four players comprising the advanced string players of the School of Music and a selected group from the Concert Band. As a concert organization rendering the symphonic works of the greatest composers, the orchestra has at many public appearances won the applause of musical critics and the appreciation of large audiences. The purpose of the orchestra is solely educational. The players are given every opportunity to familiarize themselves with the best orchestral literature.

## Phi Mu Alpha Sinfonia

Phi Mu Alpha, Sinfonia, is Wisconsin's outstanding music fraternity. Election to this organization is based on good scholarship and achievement in musical activities sponsored by the University School of Music. Its object is the promotion of the best in music, particularly music written by American composers. In the spring of 1923 it inaugurated the annual Inter-fraternity song contest. Each year a traveling cup is awarded to the winning fraternity.

## Clef Club

Clef Club is an organization for university women who are not in the music school. Membership is gained by tryout in voice or with any musical instrument.

Its purpose is to promote an interest in music and to broaden the musical knowledge of its members.

Meetings are held every two weeks when programs of unusual and varied interest are given. Several open programs are held during the year, and a formal concert is given each Spring.

Purpose: Its purpose is to promote an interest in music and to broaden the musical knowledge of its members.

## Instructional Staff

There is a very general misconception of the aims and purposes of the R. O. T. C. in our Colleges and Universities, and to this lack of understanding, may be largely ascribed the failure on the part of the incoming Wisconsin Freshman to avail himself of the opportunities offered him by the Federal Government and his university through the maintenance of these units at this University.

In times of national emergency any army raised to meet such serious danger would be in proportionate strength of five-sixths civilians and one-sixth professional soldiers, the National Guard furnishing two-sixths and the Organized Reserves three-sixths of all components. By enrolling in the R. O. T. C. unit, you members of the Basic Course have taken the first step toward preparing yourselves for a commission in these organized reserves. Congress has authorized the establishment and support of the senior R. O. T. C. units at certain universities and colleges in order to provide the necessary officers for the organized reserve component from the graduates of these advanced courses. At present the War Department has on its rolls over ninety thousand officers commissioned in the Officers' Reserve Corps. Over $90 \%$ of these officers hold their commissions by virtue of their participation in the World War. Time, illness, press of business, and other causes rapidly deplete this personnel. The War Department looks for replacements for such casualties to the product of the R. O. T. C. units throughout the country. The estimated needs of such replacements can be given in round numbers as ten thousand per year.

To the comment that military training has no place in our colleges and universities, the War Department in conformity with the provisions of the National Defense Act, as enacted by Congress, holds that our university and college men presumably possess those qualities considered necessary in an officer of the United States forces, and, therefore, it is manifestly fitting and proper that, if so desired, they may avail themselves of federal aided opportunities to secure the basic military training against any future emergencies.

In this very democratic nation of ours, and in the absence of universal service in this country, our need of reserve officers can be supplied only through our educational system. As our civil activities look to these educational institutions for their future leaders, so also must the defense of the country look to the colleges and universities for material as the natural source of military leadership. The same qualities that have made the college graduate an outstanding factor in the civil life of the country are required for the successful command of troops. In fact, there is no other agency capable of supplying this trained military personnel. Therefore, our patriotic citizenship should regard the R. O. T. C. as the most important civilian component of the Army of the United States and take especial interest in its welfare and efficiency.

Lt. Col. J. F. Barnes

F. C. Durham
I. C. Stowers
L. E. Benedict

## Cadet Regimental Staff

Selected from the seniors of the advanced courses in R. O. T. C. instruction, the Regimental Cadet Staff comprises the best military talent in the university. With their activities and ranking of the first three years in the corps the entire basis for their selection, they form a staff competent to determine the policies of the student drill units.

Responsibility for the showing made by the Corps in the special parade occasions participated in by the department, as the Memorial Day Parade, rests almost entirely upon the members of this staff. In addition to taking active part in the demonstrations, they form a committee that plans the activities in which the Cadet Corps will appear.

With their graduation they receive Reserve Commissions as second lieutenants in the United States army.

## Senior Artillery

Organized for the purpose of supporting the movements and maneuvers of the infantry with a protecting fire, the importance of the field artillery cannot be over-emphasized in the national scheme of defense.

Recognizing this important function, the University and the United States goverment have cooperated to build up and establish one of the finest collegiate R. O. T. C. field artillery units in the entire nation' at Wisconsin.

This year twenty-nine men are enrolled in the class of senior infantry. This number even exceeds that of the men choosing infantry and ably demonstrates the popularity of this branch of R. O. T. C. service.

Instruction in this division of the Military department is concerned chiefly with firing problems, gun drill, and transportation on a practical side, while liberal work is done in Military law and history, on a theoretical side.

Commissions in the army reserve corps are, upon the recommendation of Colonel Barnes and the President of the university given the men completing the course.

## Senior Infantry

Ability to stand before an untrained group of men and give intelligible commands with a reasonable expectation of having them obeyed is one of the most important qualities encouraged in the members of the senior infantry division of the R. O. T. C.

To attain this end instructors in the military department have given over a major share of their class time to problems of leadership. Each member of the unit is given an opportunity to conduct and control the movements of the freshmen and sophomores in the infantry course on the drill floor.

In addition to the work in leadership, members of the senior infantry are given practical and theoretical instruction in the handling of infantry weapons, as the machine gun and three inch mortar. Duties of officers in the tactical employment of the squad, section, platoon, and company are also taken up in detail.

Following the completion of their work as senior infantrymen and the enrollment in at least one summer training camp, the men, with the recommendation of Colonel Barnes and the President of the University, will receive commissions as second lieutenants in the reserve army.

Twenty-one men graduate from the course for senior infantrymen this year.

## Senior Signal Corps

Comparatively a small group in relation to the infantry and artillery, the Senior Signal Corps, nevertheless, has an integral part to perform in the organization of the army with its highly specialized service.

Limited to students taking electrical engineering, the course has become highly technical. The duties of the division in the army consist chiefly in establishing, maintaining, and operating all means of communication between estranged units.

Students enrolled in the course are given practical work in radio theory, code practice, and telegraph and telephone service. At the time of their graduation they have become capable and experienced operators in all wire means of communication.

The War department has supplied the University with forty thousand dollars worth of communication equipment and Wisconsin has become one of the most efficient and complete college units for this type of service in the country.

During the year inspection trips for the course members are conducted through the Burgess Battery Company, the Wisconsin Telephone Company and the Madison Radio Station, WHA.

At the end of the four-year course the men are graduated as experienced operators and eligible for reserve commiss ions in the United States Army. Nineteen men graduate from the course this year.

The Guard

## President's Guard

Composed entirely of students in the Military department and drilled by student officers, the President's Guard since its formation in 1920 has come to represent the best soldierly talent of the University. Strictly an honorary drill organization, membership is only attained after competitive trials among the members of the freshmen and sophomore drill classes. In all military observances in which the University participates, the Guard plays a prominent part.

## Varsity Rifle Team

The 1925-1926 season was successfully completed by the Varsity Rifle Team in winning the Sixth Corps Area championship, and in placing third in the National William Randolph Hearst match. The team won five of the last six matches of the year.

Among the excellent marksmen on the 1926-27 team are: Fred E. King, who held the University championship in 1925; Frank C. Durham, holder of the 1926 State Prone championship; Gilbert Rapraeger, winner of the R. O. T. C. gold medal for 1926, and Dennett Barrett and William Kutzke, who have done some fine shooting in the past season.

Although as yet there are no scores available for the 1927 season, as it has just begun, with a number of new men on this year's squad and under the excellent tutelage of Coach Carothers, the prospects are very good for another winning team.

## The Officers

The Winners

## Horse Show

In the two years that the University of Wisconsin Horse Show has held membership in the Association of American Horse Shows, it has become one of the premier collegiate exhibitions of horsemanship. No other show of its kind in the country has been given the distinction of membership in this American association and Wisconsin is the only university in the country to rate it.

Six years ago a University horse show was but a fondling in the hopes of a small group of Wisconsin army officers who saw great possibilities in a university exposition of horsemanship. Today in the sixth year of its existence, it has become the leading show of its kind and attracts entries from both within and without the state at large, as well as from the university and Madison.

This year marked the greatest horse show of all times for the University, both in the point of numbers of people attending and number of entries attracted. Three shows were given this year on May 6 and 7. Evening exhibitions were given on Friday and Saturday nights and a special matinee performance was given on Saturday afternoon.

Trophies and ribbons given as awards this year were more numerous and attractive than ever before and the show has been so expanded as to embrace all nature events that would invite real demonstrations of equestrian ability.

A major share of the credit for the show may be given to the efforts of Capt. Learnard, who served as faculty advisor of the show. Committees working with him who were responsible for the successful carrying of the show follow:

Passing in Review

## Spring Review

More than 700 men enrolled in the student R. O. T. C. courses turned out for the annual inspection of the Corps on May 19 and 20, 1926, on the lower campus parade grounds. The entire university unit consisting of the infantry, field artillery and signal corps went on parade before a War department inspecting board, composed of Major C. A. Stockton, of the U. S. coast artillery and Major T. J. Johnson, of the field artillery and Wisconsin army officers. While the university did not succeed in getting a distinguished college rating for 1926, it was only due to the smallness of the corps and the optional military training rule for Wisconsin students.

Preliminary to the War department inspection the University units were inspected by Major General William S. Graves, on May 15. General Graves was at that time the sixth corps area commander under which the Wisconsin branch of the R. O. T. C. is grouped. Preceding as it did the regular inspection, it proved a good test for the cadets.

During the week preceding the actual inspection the infantry unit was given a combat problem that took between 300 and 400 men on an offensive quest to Eagle Heights, where an imaginary enemy was successfully routed. The firing of a great deal of blank ammunition lent fire action to the occasion and enough noise was made for a regular siege. The maneuver combined the the oretical work of the classroom with the more practical eleent of the field and was conducted by the cadet officers in true milit ary fshiona.

In the final two days of the regular inspection each branch of the service represented at the University put on practical demonstrations of their duties that were witnessed by a large crowd assembled around the lower campus. The inspection culminated the year's military training for the cadets.

Eyes Right!

FORENSICS

## Forensic Board

## Officers

Walter Wilke<br>Harriet Morgan<br>Esther Johnson<br>Robert Murphy

President<br>Recording Secretary<br>Corresponding Secretary<br>Treasurer

The Forensic Board was one of the five administrative bcdies created by the charter of 1916, which granted student self-government. Of its nine members, five are chosen by the literary societies, one member being allotted each organization, and four are elected from the student body at large in the annual elections.

Chief of the varied activities in which the board engages is the fostering and general supervision of intra-mural forensic events. It also works in conjunction with the university speech department in such annual affairs as intercollegiate debates, the N. O. L. contest, and the state high school debating and declamatory tournament. Each year, the board endeavors to bring to the university men prominent in varicus fields who are of interest to the students and the public.

At the present time the board is engaged in working out plans, by which forensics will be more widely encouraged in state high schools, and to this end is sending university teams to different localities which request them, furnishing judges for local contests, and in other ways is endeavoring to promote its expanded program.

## Vilas Medal Winners

Vilas medals are awarded by the members of the speech department to students who excell in the intercollegiate debating and oratory. The Vilas medal is regarded as the forensic " $W$ " and may be conferred upon seven forensic men and women each year. The medals are made possible through the courtesy of Mrs. W. F. Vilas, wife of Senator William Freeman Vilas, who in 1910 established a fund for the purpose of enccuraging and promoting forensics at the University.

## Hesperia Literary Society

Motto: "Magna Parens Virum"

The Hesperia Literary Society was founded in 1854, and is thus almost as old as the University itself. During its seventy-three years of unbroken activity it has had a distinguished history and has built up a rich campus tradition. Its roll contains the names of more than sixteen hundred men, many of whom have since risen to positions of prominence in public life and world affairs. Thus ripe in years and experience, Hesperia looks forward to a continued period of service to its members and to the institution of which it is almost an integral part.

## Castalia Literary Society

Founded in 1854
Castalia Literary Society has, during its sixty-two years of organization, offered an active center for women who are interested in literature, writing, dramatics, painting, music, and forensics. Programs by the members are presented each week. An annual debate is held with Pythia Literary Society, and debates are held during the year within the society. Membership is open, upon try-out before the society, to all upper class women in the University and to second semester freshmen.

Pythia Literary Society
Since the founding of the Wisconsin Pythia Literary Society in 1902, membership for women has been based on personal ability in such arts as music, literature, classical dancing, dramatics, and forensics. Because forensics is the most stressed of all the arts, often the weekly programs consist of debates on important issues of the day, and the annual Pythia-Castalia debate is a much anticipated occasion. However, the other arts are likewise represented in the programs of the society.

## N. O. L.

The Northern Oratorical League, composed of six mid-western universities, was guest of the University of Wisconsin for its annual contest held in Music Hall, May 7, 1926. It was doubly significant and interesting that President Glenn Frank, who, as a representative of Northwestern University, won the contest in 1912, not only acted as chairman for the evening, but also had the pleasure of seeing his Alma Mater Victorious. E. Weight Bakke, of Northwestern, received first place with his oration: "Creative Citizenship;' J. Russell Lane, of the University of Illinois, second with an oration: "What Price Speed;" and Earl L. Morse, of the University of Wisconsin, third with an oration entitled "Tolerance and Progress." Iowa, Michigan, and Minnesota were the other institutions represented in the contest.

Earl L. Morse

## Freshman Declamatory Contest

The Forensic Board endeavored this year to arouse and stimulate the interest of the freshman class in debating and speaking. As a means to this end, it revived the Freshman Declamatory Contest and awarded a silver loving cup to the winner. The event was held in Bascom Hall, on November 30, 1926. Louis I. Boorda was awarded first place. His declamation was the "Toussaint Overature" of Wendall Phillips. Lawrence F. Gichner received second place, and Maurice B. Pasch, third.

The Sacred Medicine Bundle, made from the skin of the sacred Otter!

He alone knows the Powers in the stones, feathers and the barks of trees who wanders the Woods and seeks Her Mysteries!

Mu Phi Epsilon is the only national honorary musical fraternity for women. The purpose of the organization is to create and spread the appreciation of really good music, to give opportunities for expression to American students of talent, and to foster harmony in relation to all phases of life. By offering scholarships, conducting composition contests, and by furnishing support to all worth-while things in the realm of music the fraternity carries out its object.

Mu Lambda, the local chapter, founded in 1922, follows the plan of the national organization begun in 1903. Among the musical appearances made by the chapter during the year were: the reception and recital given for the faculty, public recitals given by the group and by individual members, and the regular monthly programs given for members and friends.

## Adams and Tripp Halls

The eyes of every university in the middle west were centered on Wisconsin last September when she opened to five hundred freshmen men Adams and Tripp Halls, beautiful dormitories which were erected on'the shores of Lake Mendota at a cost of well over a million dollars.

The buildings themselves are unusual in themselves and have brought forth favorable criticism from representatives of many other universities who have visited them. The two buildings, each accommodating 250 men, have been laid out in quadrangles, each quadrangle being further divided into eight "houses."

The houses provide quarters for from 24 to 36 men. An older student, known as a "fellow," acts as an advisor to the group. Each house has a "living room," for which the residents of the houses themselves provided with pianos, victrolas, magazines and newspapers. Living in "houses," the groups quickly became intimately acquainted, avoiding the "institutionalism" which might develop were the 250 living together. The houses, too, have given rise to rivalry in athletics, scholarship and in every other phase of student life, all working together to mold a spirit in keeping with the "New Wisconsin."

Complete self-government, suggested by the university authorities themselves, was adopted by residents of the dormitories early in the school year, and has been a distinct success. Each house has been organized, with the chairmen of each of these groups forming an executive body or senate. The senate, by the authority of a constitution adopted by the men, has had full control of discipline and student life in the two buildings.

From the men themselves a president is selected twice each year to act as the executive for the entire organization and to preside over the meetings of the senate. Each hall, too, has its president, who is directly responsible for the enforcement of senate rulings in his quadrangle.

The year has been replete with success, and a well-rounded program of student activity has been presented. An "open-house" was sponsored early in the fall.

A "Faculty-Student" mixer was another event sponsored by the men. Social activity, too, received its share of attention, with a number of dances held in the dining hall or refectory building.

Athletics thrived, with every natural resource at the door of dormitory residents. Swimming in the fall and in the spring attracted many, ice-skating, ice-boating, tobogganing, skiiing and hockey coming in for their share of attention in the winter months. Touch-football, basketball and baseball were other sports in which the organized groups competed with great interest.

This comprehensive program of physical, mental and social activity was sponsored by the students themselves, but no account of the first year of the dormitories would be complete without a word or two about the "fellows." These faculty members and older students, one in each house, acted as friends and "big brothers" to the residents of their respective sections. It was upon their shoulders that the responsibility for acquainting the many new men with the glorious traditions that are Wisconsin fell, and the manner in which they succeeded in their task is best reflected by the spirit the "dorm men" showed on every occasion.

Especially grateful were the men for the work of George A. Chandler, chairman of the fellows in the dormitory. It was largely through his efforts that self-government was placed upon a successful basis, and he himself served as its executive head during the first semester of the school year.

## The Winter Short Course in Agriculture

The winter Short Course in Agriculture was established in 1885 and since that time has been an important factor in the agricultural development of the state. Among its graduates are many of Wiscon$\sin$ 's most successful farmers. The men who have been graduated are realizing today the value of a course giving technical knowledge, a broadened vision of agriculture, and an inspiration for the future.

The course aims to keep so close to farm and rural community life that it can furnish real guidance in meeting farm problems. The large number of farmers in Wisconsin and other states who are finding life more abundant as a result of their attendance on this course attest the wisdom of those who founded it and of those who are now instrumental in its continuance.

To secure a wider vision of the importance of agriculture, to learn the fundamental scientific facts underlying farm practices, to study the problems involved in successful farm management, to find greater interests in rural life, to bring together young men in pursuit of agricultural knowledge, to secure training in special agricultural fields, to obtain this information at the season when work on the farm is the least pressing, and to aid in securing desirable positions-all these purposes combine to give the young man interested in agriculture the supreme opportunity of his life

## University De Molay Club

Date of Organization 1924
Purpose: To further the general welfare and serve the best interests of the Order of De Molay, and to promote social, athletic, and fraternal activities among De Molays at Wisconsin.

And now the dream is over . . . Or has it just begun?
The wickiups are fading beneath the Spirit
Sun:
The laughter and the voices
The call of loon and snipe
And He-Who-Laughs, Bi-a-pid
Sits smiling at his pipe!

$\qquad$

## Foreword and Dedication

It is to the traditions of Wisconsin that we dedicate these pages. To the dear and logical traditions, that make incoming neophytes wear peculiar green caps as a mark of their intellectual thirst, and cause freshmen and sophomores to indulge in indiscriminant clothes-tearing to prove their mental prowess; to the time-honored canons that enable one always to attend dry as dust lectures and keep locked up source material that promises to be interesting; to the aged rule that all texts shall be written by professors and altered once a year; to the infinite wisdom that gives beginning language students instructors who have imperfect knowledge of English; to the glorious force of intellect and democracy that ostracizes the Phibete and deitizes the football star and judges the true worth of a man by the shape of a pin worn on his vest; to these and to others, skaal and good speed! And if anything within these pages seems to be at variance with these fine old habits, remember that it is probably just a delusion of the writer, brought on perhaps by the age of his dinner egg, or a sudden remark of his roommate!

He is struck by some of the beauties of the Badger Campus

And in the spring he drives his costly motor

In winter he spends time at the sport of ice-skating

And of the Latin Quarter

Lack of space prevents continuance of this bully story

[^18]
## Faculty

"Glenny," as his students affectionately call him, is a flower, so to speak, that dropped off the century plant into Wisconsin life. He now heads the department of oratory in the university and has become noted for his fine speeches almost from Sun Prairie to Middleton. He is a car salesman in his spare time and can often be seen driving on the left side toward Bascom Hall in one of his products.

Fatima Louise Nardin is forever working for the interests of Wisconsin Women, seeing that they are tucked securely in bed at ten-thirty and keeping their systems from being contaminated with tobacco smoke. "Women should be trained to express themselves," she states, "hence they would become known as femails and go about giving locomotives, but the Delta Zeta mansion is too close to the Theta Chi house," a statement with which the Chis seem duty bound to agree.
G. C. Sellery is the humorist of the campus, having won the Red Derby at a Gridiron Banquet. We really know very little about him, except that he is not head of the satire section. The G and C stand for Generous and Cheerful.

Joe Steinauer has distinguished himself in many ways about Wisconsin. As trainer of the football team, radio broadcaster and keeper of the Fish Pond, he has become endeared to many Wisconsin students, but the reason that he stands out so prominently in the university at the present time is that he is the only member of the faculty ever to have become Prom Chairman and president of the WSGA in the same year.

This is a history instructor. Nobody heard of him until this year when he blossomed out with all the accoutrements of a young instructor, including brief case and partiality for giving Ds. We would give his name, but it is so well known as to be unworthy of print. Just go up and ask him, if you don't know it now. He will probably tell you his life story. "You can fire his history department," he smiles, "I'm here."
"The Little Doctor" is what everyone calls him. He is the head of the medic department at Wisconsin. Always kindly, courteous, unbiased, unprejudiced, always a gentleman, he makes a friend of all who work under him. "I came to Madison," he says, "only because it sounded so much like Medicine."

'Ye Olde Coffee Shoppe," fashionable tea room just opened by Myrna McMac '10, on Park Avenue, New York City. "Atmosphere is everything," said Miss McMac when interviewed

H. Schaffner Marx, '02, and Otto Roquefort, '07, both alleged to have just completed an alleged ten year contract at Waupun, Wis. "just out on a lark," Mr. Marx is alleged to have said.

Picture of Prom just after someone in the East Wing had dropped a bottle

## Junior Promenade

Helen Hughes
Jack Wilson
Scotty Goodnight
"Wisconsin's Prom; Wisconsin's Pride" became a mecca for the University when 1500 buggies were parked around the capitol, while within the edifice, 1473 happy couples and 7 men who had taken Alpha Chi Omegas, swayed to the strains of the augmented orchestra, which this year contained a jew's harp in addition to the usual accordion and violin.

The attendance at the prom was the more remarkable because nothing had been said about in the Cardinal. The name of the prom queen had been kept a secret, but it was finally discovered that she was an actress and not a telephone operator.

The addition of the jew's harp aroused some opposition on the part of those who wished to keep the promenade as unostentatious as possible, and it is proposed to have the next one informal and to hold it either in a deserted barn or the Gamma Phi Beta Dormitories.

W. A. A. Model Cottage

## Women's Athletic Association

The Women's Athletic Association was founded in 1913 with the idea of instilling a more womanly womanliness in the women of Wisconsin. The general idea appears to be that if a woman runs three miles, hikes five, swims ten, and tennises fifteen in an afternoon she is a womanly woman, which is nothing if not an interesting theory.

The latest project of the WAA is the model cottage, so called because it has accommodations for only thirty-six, a model of which is shown above. In it will be everything that will delight a womanly woman's heart, including dumbbells, indian clubs, trapeze, boxing gloves, parallel bars, and an indoor track. It is certain that a more womanly womanliness will pervade those Wisconsin women that are womanly women as a result of this womanly woman's venture.

We have never taken a WAA out to dine. Somehow we never want to.

## W. A. A. Song

(Tune: School Days)
School days, school days, dear Wisconsin U days,
Tennis and hockey and basketball, skating in winter and hikes in fall
We make the most of every day,
We know both how to work and play
And we'll teach you all to live this way
If you will join W. A. A.

Womanly Woman being Womanly

Scoreboard during an interesting moment in the Indiana Game

## Football

"A darned nice bunch of boys" is the reputation the fighting Badgers acquired by their heroic playing last year. "They are," said sports writers all over the country, "a dandy group of fellows." Or consider the words of one of their opponents in a recent encounter. "I would rather," he said, and his eyes shone as he said it, "have the footprints of the Wisconsin team on my face than those of a team of pedigreed horses."

Or, perhaps better, in the words of Coach Little. "They were a fine team," said the coach. "They had guts. That's why we need a new field house. The medics have accommodations for only onethird of their seniors, but we need a new field house. The football team is the living example of this. They were a great team. They had guts. They were he-men."

Close-up of a long Michigan forward pass

Results of some of the practice games were as follows:

Wisconsin 8; All-Americans 0
Wisconsin 20; Freshmen 3
Wisconsin 16; Second Team 0
Wisconsin 12; Blacks 2
Wisconsin 14; All-Americans 6

One of the gridiron heroes

Wrestling Mat on a Windy Day

## Crew

Crew is a process of sitting on a sliding board in the gym during the winter and sitting on a sliding board in a boat during the spring, which is an improvement, however slight. After six month's of careful seasoning eight of these intellectuals are given the privilege of sitting on a sliding board near a city with an unpronounceable name. The purpose of this is to show off the wares of Wisconsin and to raise the prestige of the Badger diploma throughout the East. The humorous part is that it does.

Track just after finish of 440 run

## Track

Track, unlike crew, is a process of chasing oneself around a large cinderpath or throwing oneself over a number of obstacles, or throwing a large object, either flat or round, as far as possible. Inasmuch as the runners never run to anyplace, and the people who throw objects have to pick them up and throw them again, the whole affair seems rather silly, but the track men appear to like it.

## Minor Sports

The Alpha Sigs.

## Wrestling

Wrestling, unlike track, crew, horse-back riding, or the Fordney-Macomber Tariff Bill, is a process of twisting a representative of the specie homo sapiens into a model for pretzels. This invigorating mentalcalesthenics takes place under the tutelage of the amiable Hitchcock, who confesses that "when he was in the navy, he was the championship." How can work under such a man be less than a joy?

Varsity crew out for a little scull practice

Possible View of Interior of Future Union Building (But not Probable)

## Memorial Union

Union Committee

The Memorial Union is one of Wisconsin's highest ideals, has been since 1492, and probably will be for some time. The projected Memorial Union is to be an immense affair, even larger than the Delta Gamma house and is to have real stone pillars, thereby eclipsing all efforts of Phi Sigma Kappa and Theta Delta Chi. The Union, when completed, will have copious rooms and will help university spirit, revive the old Wisconsin prestige, serve as an ideal and a mark for all incoming freshmen, aid the Lit circulation, help goitre, rheumatism, pains in the neck, and serve as an astringent, lubricant, and stimulant. It may also give the Delts another place to hang out, as the University Pharm appears crowded, although this is perhaps too startling a project for even Jack Bergstresser. It will be equipped modernly, the only feature missing being a straight-jacket and electrocution room for "big men around the campus.'

It is another of these big, silent affairs, no press stories about it ever appearing in the student sheet.

Have you paid your pledge? To be frank, neither have we.

Editor-in-Chief, Editor-in-Chief Editor-in-Chief
Editor-in-Chief Editor-in-Chief, Editor-in-Chief Editor-in-Chief, Editor-in-Chief, Editor-in-Chief
Oh, Yes! The man strangling his wife is the editor-in-chief. And I believe the one on the starboard of the cranberry handle is the editor-in-Chief.

Frank's restaurant
Insufficient to mention
Allan Polacheck (Ha! Ha! you see Polacheck is the business manager which is an improvement however slight)

The Badg. is delighted to give you standing room in the best publication on the campus. Octopus was originated sometime before the present school year. It furnishes the rotten jokes and cigarette advertisements for our greensward. Invariably Octy comes out on Wednesday with its usual high standard of art. Somewhere along the ridiculous line Octopus conceived an editorial policy by which editors break down nervously, graduate, leave town for liquor cures, go into the faculty or take up Pellmanism. Now this broad policy gives all the opportunity of editing this mag within the limits of one small school year. Darn white of Octy. What could our most active frat clubs do for activities were it not for Octy?
Wisconsin Octopus, you have learned the lesson of service. Wisconsin Octopus, may your stuff incrase! Congratulations !!!

Ah! we all win. 'Tis the editor-in-Chief.

Sorry that only a small part of Badger staff could be present for this shot, the rest of them are out studying Indian Lore.

Left to Right: Louis L. Grambs, Isabelle B. Bunker, Harry C. Thoma.

## Badger

Ed. note: Harry is the first Badg. ed. to ever make a true statement for the press and ycu can bet we were right there to get it.

## WISCONSIN BADGER. PIONEER INDIANS. THINK OF MYSELF (anything will do)

"Readers of the Badger and listeners in who do not have an indispensable memory, when I was a Frosh with red hair, I got hotboxed into a big red brick fraternity house. Therefore, I have never felt a special mission in life. Honest, I never was spiritually inspired to be a Badger editor. I wasn't born in a log cabin in Rensselaer, Indiana. I am sorry as you folks are about it. As a kid in Milwaukee (the secret is out) I played with blocks and sailed boats in the bathtub, but I don't know anything about pyramids and uncharted seas. I have nothing to say about a new Wisconsin spirit; and if I did, I couldn't get anyone to write it for me. I would lots rather have been Prom chairman or fourth vice president of the Lit board. Remember that I don't think that this is the best Badg. ever published, and when you take it off the shelf in future years, I expect it only to disgust you. This is a awful way to talk but it is the truth. I'm a failure. I couldn't get the picture in this Badg. that shows me handing Prexy the first copy. Maybe I'd done better if my wife had only understood me."

## A Delt Tragedy

(Note: This play, which is evidently only the portion of a longer farce, was found written in indelible pencil on a paving brick in an ancient Chaldean city and probably has nothing to do with the Wisconsin chapter of Delta Tau Delta. Out of deference to an aged Chaldean custom, no cast of characters will appear.)
(Enter Choros dressed as elephants, Pi Phis, Clown Cigarettes, etc.)

Choros: The aging year draws loved to its close;
Its work near done, it goes to seek
The rest from whence it came; the longer days
Are o'er, full short the course of Phoebus runs
Over high heavens. The old year dies, but, dying,
Lives, and ends its life in holidays.
(Exit choros in general direction of Dad Morgan's.)
(Enter four Delts bearing before them plaster of paris bust of Glenn Frank.)
First Delt: The dreary days are here, is gone the carnival
Of Christmas, with its ties and shoes and shirts, Gifts given, that one's constrained to wear.
Not yet come is New Year's, when, shouting
With gay abandonatourgames of hop-scotch, tag,
Or blind-man's-bluff, we welcome to our breasts
Our infant prince, the newborn year.
Other Delts; Rah, rah rah!
Rah, rah, rah!
Rah, rah, rah!
Only our bust is plastered!
(Editor's note: This appears to be a religious ceremony done in honor of Ra , an ancient Egyptian god.)

First Delt: The old year dies, but, dying, wraps
Round its pale wraith the happy garb of pleasant holidays.
Other Delts: Yeo!
First Delt: Let us then, be on our way,
And with a party light and gay
Revel in lonely holiday!
(Editor's note: Personally, we don't think that the above poetry is so hot, but it is in the original manuscript, and what is the translator to do? Fix it up yourself if you don't like it. Also, if you don't understand by this time that it is Christmas, and that the Delts are hanging over-note the snappy use of "lonely holiday" - and that they are going to toss a party, you might as well quit now, if you haven't already, for the manuscript gets more abstruse as it goes on.)
(Continued on page 576 )

## Act Two

(Continued from page 574)
(Enter an Alpha Phi. There are hisses on the part of the more discriminating of the audience. She leaves and her place is taken by the Choros. They look pale and sooty; they have been helping the Alpha Xi Deltas fix their boiler.)

Choros: Hark, what footsteps wend their way
To this high home of Deltdom, this stoned shack
Wherein enthroned stand the secrets
And shrines of the caste of Delt?
Hath Birnam wood to Dunsinane approached On friendly visit, like a Theta at the Kappa house?
Or hath Santa Claus, wearied of the sport
Of fooling little children, shaved
From his rockbound chain the hairs of age,
And donned the pantaloons of collitch men
To frolic with his favorite Delts?
(Choros dashes offstage and into Kappa Delta house. In a few minutes splashes are heard. The choros is jumping into Lake Mendota.)
(Enter First Delt bearing not one, not two, not three, but eighteen fir Christmas trees.)

First Delt: Lonely looked these monarchs of the woods
Before the portal of the merchant prince
From whence I copped them. Happy now are they
To adorn our feast and bless our holiday!
(Enter Phidelt.)
Phidelt: Rahrahrah, rahrahrah, rahrahrah, rahrahrah!
(He is helped offstage by two more-sober companions.)
First Delt: Oh happy trees from cooled woods
Where dryads play, and falls the snow
Hard as Home Ec pancakes . . . Lucky trees,
Beautiful, more beautiful than shinoceri,
Or Sigma Kaps, or Cheney, Lon.
(Enter Merchant Prince.)
M. Prince: Aha, my trees

First Delt: Thou liest, knave,
Thou liest and thou know it.
M. Prince: My trees I say. Secure they were

As Phisig mortgage or Delt Gams
In their own front parlor until you,
Base knave, did come along and under-
Handedly lift them.
(Continwed on page 581)

Star-Points of a Fine French Fryer

#### Abstract

The Uses-French fried potatoes, meat croquettes, fish balls, fritters, doughnuts, and many other foods are more crisp, delicate, and wholesome when fried in deep fat in this Mirro French fryer. Booklet with fryer gives directions and recipes.

## \%

The Design-A deep level-bottomed pan, twin-lipped for right or left pouring. A correctly shaped basket, with rim rests on both sides for utmost security.

## $\dot{z}$

The Construction-The pan is made of extra thick, hard aluminum, for long wear and resistance to denting and scratching. Handsome octagon handle, insulated, is locked to prevent turning. Heavily tinned basket. chantseverywherefor $\$ 1.95$ a little more in the far west.

So many delicious things can be cooked in deep fat. And it is so easy - if you are equipped to do it-if you own this capital French fryer which Mirro has made for you. . . . Mirro makes all sorts of useful utensils for the complete outfitting of the up-to-date kitchen-and makes them so exceilently that ownership of "The Finest Aluminum" is a long-lasting satisfaction. An economy, too-Mirro's cost by the year is lower than common wares can show.

## The Event as it Happened

The Alpha Xi Delts, busy with their indoor sport of fixing the Alpha Xi boiler, discovered one evening, that a man was lurking about the house. Forming the correct assumption that any man who would lurk around the Alpha Xi Delta house must be a moron, the girls telephoned the Madison police department and the Theta Delt house, working on the theory that any selfrespecting moron would feel ashamed to be seen in their company and would move elsewhere. Both police and Thetadelts appeared in droves and Don Barr, who for some reason believed it was a baseball game, starred in the noise-making. Nothing much happened and after a while everybody went home or to bed or someplace. A fine time was had by all.

## First Delt: I swear

(Enter national secretary of Delta Tau Delta.)
Nat. Secy: Swear not. What means
Outside the house of Delt this most
Unseemly tumult?
First Delt:
(It is unfortunate that the portion of the play discovered ends at this particular point, the climax, as it were, of the act. But, of course, it has nothing at all to do with the Wisconsin chapter of Delta Tau Delta. The Wisconsin Delts, we feel sure, do not hang over Christmas vacation, nor toss parties, nor would they think of kidnapping eighteen Christmas trees. Nonono. The manuscript was found, as we have stated before, carved on a mosquito-bitten rock on the banks of the Ganges. The Wisconsin Delts would not think of such conduct. May Allah, Continental Congress and Glenny Frank bear witness that we cast no insinuations nor aspersions. Nonono)

## Concerning Coeds

Spare no expense with them; offer to buy them anything, for if they want a pretty thing it is entirely up to you to purchase it. Telephone them often - no matter if the line is continually busytell them how you miss them, tell them how much you like their clothes, tell them enough to get yourself into a breach of promise case. They love it.

Send them flowers on the slightest provocation; follow this up with candy. Do not use rented Fords, but secure real automobiles. Continually ask them for dates even though you be rebuffed time after time; co-eds like patient men. Let them break your dates, and take it with a smile, for you should be happy to know that they even remember your name.

Cultivate a smooth flowing line of talk and strain the parental pocketbook with the best of clothes. Always remember that clothes make a man great before the eyes of women, and that flattery to their ears is as water to a fish. Make all engagements at least three weeks in advance, for you must give them to believe that you consider them overwhelmingly popular.

Then get yourself hitched to a cart, wiggle your ears, and say "Hee-Haw!"

Place: A Cored's Room.
Time: After the Dance.
First Cored: Well, Betty came out with a new dress again tonight, as usual. Smartest thing you ever saw; I wonder where she gets them.
Second Cored: I'm sure I don't know, but I'm certainly going to find out right away.

Third Cored: Ask me girls, I know. She gets them all at Manchester's and they are quite inexpensive, too; that's ${ }_{s}$ why she can have so many.

## The Giraffe Shuffle

The epitome of feminine beauty pictured a bove has just come down from the hill and is trav eling toward home and "True Confessions." She r epresents one of the highest of Wisconsin types. Two books are entirely too much for her tender constitution and won't some big strong man please carry them for her? Her head thrust for ward something like a well-mannered cobra's, her camel hump, her books clasped inanely across the thing into which she pours lettuce salads and lemon ices, she minces forward at the rate of five or six inches a stride to a box of caramels in the second dresser drawer. It is too bad that lisping has gone out of fashion; she would use it. But still, she can make eyes at a professor afte r class, she can giggle appreciatively at ma sculine balderdash, she can cry so prettily after she breaks a date with you. The dear sweet thing! Why doesn't some strong brawny man come along? Why doesn't some he-hero take her books and throw them at her?

## Little Lessons for Lester

One of the things you must remember, Lester, is that the university is run for and by and because of the big men around the campus. You can always tell a big man around the campus, Lester, because he says "Hi!" to every fourth person who passes and will run half way up the hill in order to have a few seconds more to loaf around the Lincoln statue. He is worried all the time. He must get up early in the morning and study, for he has to be eligible, and then his day is one mad rush from class to committee, and from committee to board of directors and back to committee again, leaving him little time to sleep and date, both of which he must do; for a big man who does not date, Lester, feels that he is not fulfilling his career nor making it as rounded as it should be, and the thought cuts him to the quick. It is a hard life, being a big man.

Why do they work so hard? Why, Lester, the reason that they work so hard is so they can get even bigger jobs and have to work even harder and become more and more worried. It may sound queer, Lester, but it is true. Come along, Lester, one of the creatures is starting toward us. He may want to talk politics.

Be one of the girls! Come one!

Come all! Openings for only a few NICE GIRLS Exclusive! Exquisite!

GAMMA PHI BETA
wants only 33 more pledges
Hurry! Rush!
Be one of the girls!
New house now going up!

There is nothing like a brave bold engineer! For days they publish their defiance of lawyers, koppers, the state militia, and the four elements, and then, the day of their parade, they bravely march four blocks out of their course to bravely defy any eggs that the lawyers might decide to throw at them. There is nothing like the engineering school for pure, unadulterated heroism.

## Campus Idiocies

## The Cracker-box Wisecrackers

One thing about college, and especially about fraternity life, is that it teaches a man to become a gentleman. It certainly does this to at. Nobody who is not a gentleman could think of the inexpressibly wise and witty things that the lads who speckle boarding club porches and lawns can crack at the girls who are passing by. Sometimes they know the girls, sometimes they don't. It makes no difference. The village Chesterfields can say "Ah there!" or "there she goes!" just as cleverly and easily to a perfect stranger as they can to the blind date they got a year ago come Michelmas. All hail to the deans of intellect, the paragons of virtue, the fraternity crackerbox wisecrackers!

## Foundations of Success

Success that lasts-and grows-can be built only upon the foundations of Quality and Value.

Day after day, year after year, Nash cars continue to command ever-greater respect, ever-increasing enthusiasm from the people of this country.

The remarkable success of The Nash Motors Company-a career of achievement that has held the automotive world spellbound in amazement-is attributable simply to the fact that it has consistently offered a higher degree of quality and a fuller measure of value. These are the foundations of continued success.

## THE NASH MOTORS COMPANY Kenosha, Wisconsin

# When the Engineering Graduate Goes Out to Look for a Job 

. . . he finds that he needs industrial experience in addition to education. This industrial experience may be haphazard and of little value or it may be organized and effective. Organized and effective industrial experience means apprenticeship. We were one ofthe first in the state to establish apprentice courses for college graduates.

## Apology

We apologize. Heartfeltedly, if there be such a word, we apologize. Throughout the entire domain entrusted to our care, the Theta Chi boarding club has been mentioned but once. But there is a reason for this, a real reason. It is not that we are a member; it is not that we know nothing dirty about them, far from it; it is not that if we mention them, half the readers would accuse us of poor taste in riding our own outfit and the other half would accuse us of throwing them publicity; it is none of these things. Rather it is that we are living in the house this semester and there have been dire threats whispered in dark corners, and the Chi Psi clothesline has disappeared from its wonted posts. That is the reason, and it is a real one. But still, we apologize.

## Sign Over the Union Building Candy Store

## TO ALL CONSUMERS

LET IT BE KNOWN
That the storekeeper pays cash for his stock.
That he expects his customers to do likewise.
That this is not a dispensary for any of several philanthropic organizations of the community.

That four (4) pennies do not make a nickel nor four (4) nickles two bits.

That the laws of the commonwealth do not recognize car checks, life savers, towel checks, or milk bottle caps as legal tender.

That credit will be extended only on presentation of references from Joe Gish, Louie Schmalz, the Board of Regents and any four of the Twelve Apostles.

That any further discrepancies between the flux and influx will cause the immediate discontinuance of the store.

All of which seems to prove either that some of the campus pillars have slippery memories or that the Phigams make a habit of hanging around the Union Building.

## On Alumni Reunions

Alumni reunions are an odd game where all the contestants meet together and see which can make the biggest ass out of himself. The reunion occurs after final examinations are over and collitch has settled down for the space between exams and commencement. Then the old grads come into town by the front door, shouting as they come. They put on some sort of clothing that puts to shame even the movie version of what the welldressed college man is wearing and go forth to meet others in other brands of wearing material. Whenever two of the same class meet, they sit down together and discuss, first, A's children; second, A's wife; third, B's children; fourth, B's wife; fifth, what has happened to the people they used to be acquainted with in college (neither knows much about this) ; and sixthly, how the university has deteriorated since they left it. They may be right, but one of the dangers of graduation is that then you will be an alum and may be tempted back to one of the class reunions.

# NINETEEN TWENTY EIGHT <br> B A D <br>  

UNIVERSITY OF WISCONSIN 752 LANGDON STREET - MADISON

Mr. H. H. Brockhausen
President, Brock Engraving Co. City.

Dear Brock:
It's through-almost-this year of work and worry and fun. The last engraving has been delivered, the presses are rolling, and now that we catch our breath after the last hectic weeks, Harry and I want you to know how we appreciate what you have meant to the 1928 Badger.

It's not the mechanical work of engraveing alone which we appreciate. To be sure your organization functioned with splendid efficiency, but the big reason we are happy that we chose you for the Badger engraver is the personal intersest you took in the book.

Vision, imagination, artistry-you gave
us all of these. And then combined with them practical common sense and what seemed to us an endless knowledge of mechanical possibilities and limitations. You checked a hundred minor details which would be missed by any on who hadn't been through the mill of annual production. You took such an interest in the book, were so insistent that cuts, art and cover were just right, that we want you to share whatever commondation the 1928 Badger may win, both here on the campus and from critics in the annual field.

Editor-in-Chief

## The Activities Stride

Active and virile, the pillar of the university is rushing from someplace to someplace. Look at the stride, manly vigor expressed, and he pushes and jostles his way forward among the press, pausing only to nod or say "hi!" to every casual acquaintance or person he thinks he knows. You would think that he was hiking toward a meeting with the president of the United States Steel Corporation concerning a position after graduation, or at least to a conference with Glenny Frank about the future of the university. But no, he is only ambling home to a cigarette and hand of bridge with Bud and the boys, but he knows that his business-like air will attract attention, and the knowledge is as balm to his anguished soul, for he is a big man on the campus and must support his position.

## Stanislaus Wheatley (1907)

This promising young knit-wit is taken by many to be ruch younger than the above date would indicate. He doesn't even act his age, nineteen. For scme reason or other, Stan (as he is affectionately called by the few who speak to him) was born in Wannetka, Illinois, just south of the railroad tracks. Stan's early life was spent mainly in three places, out of school, in the village stone quarry and around the village millinery shop. The fact that he didn't go to elementary school is not so important because there are surely other attendant circumstances to one's being so dumb. At the village stone quarry our lad learned to swim and dive. It is told of Stanislaus that his passion for diving originated after the village spender had lost a two bit piece in the quarry and offered five cents to the finder. After hunting for two years, Stan began to amuse himself by going into the water in novel attitudes, and hence his tact for diving. He and his gang used to hang around the millinery shop to cast flirting eyes at the ankles of its patronizers. It was here that

Stan acquired the habit that he cannot conquer, try as Jo Steinauer will, the habit of wimmem.

Stan came to college; to our college, and became a slimy Sigma Nu . It is told that the aforementioned village spender was a Sigma Nu from Yardmore College, Belcher, Idaho, and pledged Stan as soon as his diving ability became apparent. The important and most distressing thing concerning Stan's college life was that he learned to dance. Yes he learned to take a girl by the waist and twirl and twirl around the floor, twirl and twirl right into other couples and go on twirling and twirling without ever a word of apology. This last regretful characteristic of Stan must be an outgrowth of his small town training. He's doing nicely now. Has almost twenty credits in three years. With one caution we end this, Stan. Don't hog the dance floor in your senior year or there will be a Vigilance Committee on hand to rid our happy community of squirts who like to show off.

## Electric Magic in Your Kitchen

#### Abstract

To Cook Electrically generally suggests an Expensive Luxury. There is no question that an Electric Range in your kitchen is a luxury but not necessarily an expensive one. With a reasonable electric fuel rate now available in many communities, and a most recent model MONARCH Electric, it is possible to cook electrically and also economically.

A MONARCH Electric is a dual-use range-it will cook for you while you serve or serve you while you cook. With its many efficient features and automatic equipment, it should become the same as a servant in your kitchen, always ready to perform its duties dependably and without watching.

## MONARCH Electrics are made by the makers of the famous

Home Cooking Devices

"A RANGE FOR EVERY HOME"
MALLEABLE IRON RANGE COMPANY

## The Candid Cardinal

Gather ye: congregate you: come one: come both of you.
Following are some excerpts from THE CANDID CARDINAL. Of course, you never heard of it before, but for once the low down, the way low down, on the campus Deet and its contributors. Things are printed in the Candid Cardinal as they are. Nothing is altered. We regret that the entire Candid Cardinal cannot be presented herewith; 'twould be too lengthy. The committee of sixty-seven for Jeff Burrus publicity is too efficient. Well, well Wallace, pass the excerpts.

## Numba One

The order by no means indicates their merit.
(You folks have probably heard that seven thousand students here are on a committee called the Memorial union comm. It is their duty to collect small sums at various times, sums ranging from 90 to 390 thousands of dollars from the remaining one thousand students. In order to help these seven thousand tired committee workers, P. Butts writes pep letters for the front
page of the Cardinal: It seems that the odds are against the one thousand, but Butts helps in the coercion both of the said thousand and of Cardinal readers by these letters. Here goes the letter from the Candid Cardinal. Some of it is had to be translated from the Hebrew, so don't trust our accuracy more than ninety thousand dollars.)
"Good morning folks, how's your pep this morning? Mine's allgone. I was at the office from two to three yesterday. The 36 holes of golf didn't make any difference. It's this Memorial Union building that is getting me down. Now you've heard that the union is in debt something over 1000 dollars. Well now do you want the building to go WITHOUT knives and forks, and the drive executives to go unsalaried or are you going to pay off that 300,000 . It's up to you. I've quit worrying. I've found an unsuspecting bank that will give the Union a note for my next salary. A crisis has been reached. Whether this is the 85 th or 86th crisis in the history of this drive, don't ask. Our backs are against the wall. Send that check in to-day. There 11 be an army of workers there to grab it. It's up to YOUSE GUYS. Are you going to have my salary borrowed or paid in cash? Wisconsin men, I ask you."

## The Choice of Wisconsin Students!

## The "Branch" Bank

FOR the !past school year, the Branch Bank has been the financial home of $95 \%$ of the University folk. The convenient location of the Branch has made this Bank their favorite. Because we have been so closely related to students and their financial affairs, we are more able to serve them. Madison merchants gladly accept Branch Bank checks. It is a safe and better way to handle your finances while in the University.

## BURGESS Qhats in a Name?

## That depends on what is back of it

The name Burgess has a real background.
 The Burgess Battery Company has come to be one of the outstanding figures in the dry battery field. Burgess Batteries for years have been recognized as a standard of quality. They have been selected for use on expeditions to all corners of the globe where dependability was an absolute necessity. They have back of them years of scientific research and a record of satisfactory service.

The C. F. Burgess Laboratories, Inc., is universally recognized as an unusual organization. Its experts are constantly called on to solve difficult technical problems. Its contributions to the industrial and commercial field have not been few or unimportant.

We are proud of what the name BURGESS stands for-and just a little jealous of its reputation.

## Excerpts from Badger of the Past

Ye editor-in-chief thinks (honest!):

1. That a certain girl from a certain place has the sweetest disposition of any girl at Wisconsin. (She gave me a second date. That proves it.)
2. That Pitman B. Potter (we wish we knew his second name, wouldn't be surprised if it was Billingsomnia) is correct in his choice of something or other. (We never missed a guess yet and we insure this one. Small Skyrocket for me, please.)
3. That the SAE'S are the best dancers, the best sports, the best drinkers, the best all-around good fellows you can find on the campus. (We are a Sig Alph and we know.)
4. We sincerely wish to take this occasion to dedicate this section (of Satire, Slush, and Skirosis) to those dumb socks who think they know more about anything than we do.
5. Strange, isn't it, how some people will insist upon believing that their opinion is far better than any other person's!
6. That all women look the same at a distance, but look entirely dissimilar when you see them closer and THAT ANY MAN WHO DENIES THESE FACTS IS NOT WORTHY OF THE NAME OF BADGER!
7. That the Horseshow was the best Wisconsin ever had, and more than that, the best in the West. (The horses looked far more intelligent than any we have ever seen.)
8. That the Haresfoot show was the best Wisconsin ever had and more than that, the best in the West.
9. That the 1927 Badger was the best Wiscon$\sin$ ever had, and more than that, the best in the West.
10. That Er. Meiklejchn is a sincere friend of all men in the University. Ycu miss a third of your education if you miss contact with him. (I am one of his best friends.)

PS. These are thoughts written after sixty hours withcut sleep and after remaining in one chair for ten hours without getting up. It was damned white of us to go to all this bother just so you could read the Badger. Think what you wculd have missed if we hadn't.

Now that the 1927 Badger is an assured success (another skyrccket for me, please)-adieu Wisconsin, wculd that the less talented mortals could love you as have we.

## BUY EVERYTHING POSSIBLE ON YOUR CO-OP NUMBER

## For Every University Need, the Wisconsin Student Buys at the Co-op

There is no store in the heart of the student quarters and so near to the campus whose stock is as complete as the University Co-op. Every textbook, all the needed materials and supplies are to be found within our doors. Our men's department carries a large and complete stock of smart college apparel . . . the same holds true for the Co-ed corner. Dainty gifts will be found in the Gift Shop. The Co-op is surely the store for college folk.

## Purchasers Share in the Profits

Every student is privileged to join the Co-op. It means a great saving. At the end of the year rebates are divided among the members. For the past number of years, the rebates have amounted to $15 \%$, and this means a huge saving on your educational expenses. It pays to join the Co-op.

## The Slicker Artists

Tatooing is not done in polite society, but the slicker artist fills the gap by judiciously spilling quarts of india ink onhis oilskin. The result is a hetergeneous mixture of names, caricatures and clever cracks, such as "Kiss me kid" or things equally sidesplitting. The effect is startling even when one is used to it, and it is the cause of much headscratching and many editorials on "What is the younger generation coming to and why isn't it ashamed of itself?" on the part of those who view it for the first time. It is only fair to say that this practice is dying out somewhat, but not nearly fast enough. A small bounty on each oilskin brought in, the bounty to be doubled if the slicker is riddled with bullets and bedoused with blood, might help.

## Gordon Dawson

Milwaukee was the scene of Dawson's birth. He just grew up because there was no other direction to grow in. A little knowledge along the way didn't serve sufficiently to make him a college politician. True, he did squeeze into Union board but as a prom chairman he made a good committee man for Horse Show. It's a strange fact that the frat club of Beta Theta Pi take it upon themselves to run a prom every other year, and G. Dawson bearsout the not unknown fact that they can't do it. Dawson may again feed girls on Sunday nights at Lawrences but with Sigma Kappas and the Drive he is thru. If a half baked demagogue shines around a few hours late for an engagement or wears spurrs to infantry drill that one is our Dawson. And he ain't a bad egg either.

## James Nelson

Little Jimmy Nelson is a product of Oak Park, Illinois, and is another example of the necessity of more control over interstate commerce. He distinguished himself in Oak Park by his ability to kick other persons in the shins during the course of soccer games and also on account of his good work as assistant leader in the Wolf patrol of Scout troop 17. Coming to Wisconsin, he went ATO, which is sufficient proof of his state of sanity. Despairing of ever making a gentleman out of himself, he early tried to become a lady, and eventually starred in Haresfoot shows by virtue of writing the reviews and knocking the other actors. He is also a member of Phi Kappa Phi, which organization he likes very much, to judge from an editorial he wrote about it just after his election had been announced. All in all he is a very good boy, quiet and modest, without a committee of sixty-seven for publicity - he really doesn't need it, you see. It is also rumored that he is somehow connected with Cardinal, but numerous investigators who have made numerous trips to that office have always found him busy on some committee that prints its heads in big black letters.

## Vern Carrier

Hail to the red hair, hail to the freckles, hail to the prime handshaker and senior president; his name is Vern Carrier. There are numerous stories about this boob's red hair. It is found in an old Sioux legend that Carrier fell out of a high chair when a babe into an open fireplace and lied there until weeks later when he was discovered by bloodhounds. The poor kid never was right after that. Upon bumming his way out west on a cattle train he met up with another tramp, in Toledo, Ohio. That tramp turned out to be the Traveling Secretary for the fraternity of Sigma Phi. This last named thought that Vern, regardless of his hellish hair, had possibilities of being a fraternity man so he gave him directions to Madison with a note to the men of the club here. Our Carrier took the next freighter for the four lakes city. By sundry underhanded methods, this gentleman secured notable positions on the campus. He got a shirt tail job on the Cardinal, got to make wind for a storm scene in Union Vod. But the climax came when he after a supposedly campaignless election came out as senior president.

## Unsung Heros of the Year

The people who hold the dogs during ROTC reviews.

The frosh who wear their green caps.
The roommate who trundles off to bed after propping up against the dresser a note that reads, "Dear Jack: I forgot to wind the clock."
The man who reads all the Cardinal editorials.
The non-union laborers at the Union Building.
The Theta Delts who yelled "Quiet Hours" on Langdon at three in the morning.

The two Gamma Phi pledges who made their grades.

You just can't keep these sorority women down. Two years ago they had a fire contest, and this year it is a fight to see which can have the most social privileges taken away.

It is exceedingly unfortunate that our artist is a Tridelt. There are so many things we could say abcut them, their baseball games, their St. Pat's party. Our artist wculd probably sink a drawing pen through our editorial epiglottas. It is exceedingly unfortunate that our artist is a Tridelt.

## Jefferson Stoughton Kentucky Burrus.

Well this is an interesting case. If anyone thinks that this is a publicity stunt sponsored by Jeff's publicity committee of sixty-seven, they are wrong. This section accepts no bribes. In a hovel in Stoughton, Kentucky, our Jeff was born some time ago. No one had been able to understand how he could acquire a southern accent from living in Stoughton, but the fact remains. After a furious youth of jail-breaking, incendiarism and plain orneriness, he went to college and had all the human taken out of him by the much talked of fraternity of Sigma Chi. Jeff was a winner from the start here. He served as second assistant chairman of the ways and means committee for the Freshman cap night. In his sophomore year he startled the university by making the crew, but it is rumored that Dad Vail owed him money at the time. By the time he became a junior he had met a bim from China and wanted to do her honor so he lent out a lot of money on hardly no security at all and was elected Prom chairman like a damn. A passion with Jeff is publicity.

"We Specialize in College Knit Athletic Wear"

## O’Shea Knitting Mills

Chicago, Ill.

It was a great school year. A man chased a Phi OPi and a burglar entered the Phi Gam house. Both were ultimately acquitted on the grounds of insanity.

There are several prizes we should like to dish out about the campus:

First, to Jack Wilson a prize for being the most dangercus dancer on the campus. Prize, a straight jacket and a picture of all those he has maimed or injured by flying feet or elbows.

Second, a prize to Gamma Phi Beta for pledging activities. Prize, an entire floor of the Union Building for use as a study hall.

Thirdly, to Arthur Adams a token for bravery. It seems that one night after a Theta formal he delayed his departure some minutes for the purpose of osculating the entire Theta chapter. Prize, a pair of glasses.

Fourthly, to Delta Gamma a prize for relieving the stone-cutter's famine. Prize, one picture Waupun Prison.

Fifthly, a token to Alpha Gamma Delta for the most easily satisfied pride on the campus. It seems that they are intensely proud of being Alpha Gamma Deltas. Prize, three lemon seeds.

For Moie Ttan
Thirty Years!

Dear, consistent, traditional old Wisconsin! It passes a ruling forbidding coeds to ride out of town on dates and then lets its own special pet, the Union Board, give dances at Bernard's Park, bringing the number of dances in the city down to a snappy zero.
As a little problem in etiquette, what is a young man to do when he comes to the foot of the stairs to shout for the date of his choice and discovers at the top of the steps four females, wearing amongst them, one-half (the top one) of a pair of pajamas, one chemise, and one whatchacallit? Something should be said to relieve the situation; but what? You figure it out, we can't.

And what if the nineteenth kitten on the left hand side did think that the satire section was rotten. It was undoubtedly supported by the Satire editor, his assistants, the Badger editor, and both people who subscribed to the Lit. Think of yourself!
As a matter of information, Miss Ruth Kellogg is the artist who drew the excellent picture for Campus Idiocies. Out of regard for Ruth, however, it might be well to say that she had nothing to do with the prose inscribed beneath them.

## The Campus Rabbits

Jack and Angus are careful lads! Shall a wind that is only sixty-five degrees warm and completely unsterilized catch them off their guard? No indeed, not them, they have their fur coats. Vanish all chances of pneumonia, typhoid, or seven-year itch (there is little anyway, as the temperature is above seventy and the sun is shining) . . . they have their fur coats. Somehow they have forgotten to protect their head from the elements. But they needn't bother. The head is the part of their body about which they should show the least concern.

## Robert Morse

Robert Morse is a product of Chicago, where they have the biggest stockyards in the world. The story was started that he was the cause of the great panic of 1907 , but this cannot be substantiated. He worked for forty-five years as a pretzel bender in a famous Chicago pawnshop before coming to Wisconsin. Here he has distinguished himself in comparatively few ways, as he is a Phikap, which is entirely too much of a handicap for anyone to overcome. Probably his only prominent activity is Tau Delta. He is now busy earning dimes by holding canines during reviews of the famous Reserved Officers Training Corps (which corps is by the way, our idea of a real practical joke on the university) and taking roll in somebody's lecture. As soon as he collects enough money he will buy a haircut,

One of the Wisconsin traditions that this one indispensablememory did not dwell upon at great length is the Drive. We cannot fathom the reason for this omission, but we apologize for it.
While on the subject of traditions, here is a quotation from Reynolds, Indian Life and Customs: "The Indians were an indescribably dirty people, and their villages were sunk in the utmost depth of filth. Their favorite dish was a young puppy, nicely stewed." And here is one from the 1928 Badger Foreword, " . . . and so we clothe this Badger in one of the state's most cherished traditions, the Indian." Think of yourself!

## The Candid Cardinal Excerpt Numba Something

(The Cardinal runs another department which does nothing but unload trash onto the readers. Readers Say So col. is terrible, but since it's there the Candid Cardinal must produce.)

Dear Editor:
I am far ahead of my time. I have the foresight and philosophy to see and live in a world to come. I knows the ups and downs of child bearing, smoking and manly dress. In fact, I am very smart on the subjects of women and very anxious to explode my mouth about them. I like to get into this column and show that there are a few women left in the university who are still tough and two-fisted. I stand for tennis and hockey and basketball and all to publicity that can possibly accrue to one who writes foolishly enough to this column.

I am
ANTIONETTE.

## Dear Editor:

We are a group of lads out at the dorms who after six months of bull sessions have started a club to which only atheists can belong. Isn't it interesting? We thought so. WE tried to read a little Philosophy and the Bible, but we could not understand either of them. Don't you think we are justified in becoming atheists? One of the boys read about them in an almanac, so we thought we would like to go in for it. We are only Frosh, but my how smart. We have had English la and Chemistry la so we can judge knowledge pretty critically. Declaring oneself an atheist is loads easier than the quadratic equation so we thought it would be both facile and intellectual to adopt Atheism. No, we aren't telling our mothers about it. But we are leaders in thought of the university. Just think, we are atheists! And to think that we are only Freshmen. Why should this man Meiklejohn believe in God? He ought to hear us argue it down.
We are prime asses,

## Little Lessons for Lester

No，no，no，Lester，those men who are passing are not waiters，nor even morticians．They are college men out for an evening of hilarious enjoy－ ment．They wear the funny collars and black clothes because it is a formal party to which they are going．A formal party，Lester，is one in which the man must do three things．He must buy flowers，he must invest in a taxi，and he must tell the girl she looks pretty．Usually the last is the hardest of the three．

Why do they have formal parties？They have them，Lester，because the women folk enjoy them． They appear in dresses that are comfortable and very little else and they have the chance to look at the men in their monkey suits and say，＂Oh， how funny you look．＂Then they giggle．Besides， they get the flowers and the taxi，and they are told that they look pretty．Women will do almost anything for those three．

Of course formal parties are enjoyable，Lester． You can tell that the men are going to enjoy themselves because they look so bored．That is their way of expressing their enthusiasm．What！

## Delta Gamma

Well it's about time we were throwing a dance. Do you expect to live on your reputation all year? The elephants never forget; we ve heard, and be cagy with Sig Phi elephants. This dance will be thrown in the New Delta Gamma barn on Langdon and Carroll Sts. Plaster, nails, wooden horses and shavings will facilitate the dancing. If you get roped into this party, try not to get lost in the labyrinth. Some say that the barn was built this way in order to keep any man that they could get into the house, and others say that the architect went crazy. The dance will not start till ten o'clock because the music has to work at the Majestic till nine thirty. It will be a big affair if all the blind dates show up. They never have before, but maybe they will this time.

Tumas Initiation, or Provirg that Some Men make the Most of their Opportunities at Wisconsin
(Satire continued on page 650)

As we write this the sound of a piano comes across the lawn from the Tridelt house; the first blush of spring transforms the view from the study room window into a thing of life and promise; we cannot see the lake, but we know somehow that the canoeing is fine and that many boats dot the waters of placid Mendota, bearing cargoes of happy humans, out for an afternoon of pleasure.

Four years we have stayed at Wisconsin; we have seen class rushes, and football games, and, upon a time, we heard the closing hymn of a fraternity initiation re-echoed across University Bay. Four years we have stayed at Wisconsin and seen men come and go, succeed and fail, graduate or leave for home on the "sore-eye special," but in every case we have noted, for it was a thing so obivous that one could not help but note, the moulding influence of the university.

Wisconsin, we have thrown many stones at you in the course of completing our section, thrown them gladly, with Puckish delight, in response to the call of duty. You are a giant, Wisconsin, one that can defy or laugh at the tiny darts that happen to be cast at you, and you know, that deep in our hearts you are our love and that we are, and always shall be, pleased and proud to forever own ourselves as Badgers, alma mater, and that until the end of time we shall thrill at that splendid name, Wisconsin.

THE SATIRE EDITOR AND HIS HENCHMEN.

## When in the Dark Look

or

Why Was the Alpha Delt Boathouse

Editor's foreword. This is a play, and all of the writing is what the people said. We can't find out who wrote it. You can guess if you want, but we tried that too. This is a college play. The setting is by the student senate and the art work on the bicusped by Irv Tressler.

## Act the First

## Scene the First

(how'd you guess?)
(Locations: the first scene occurs down in a big building on the square. The building is the telephone exchange of Madison, which is the city where the college is located which we spoke of before and are speaking of now. In this telephone building are rows upon rows, three in all, of big boxes with rubber hoses stuck in them. Before these boxes sit girls who place the hoses here and there according to the numbers you don't ask for.)

## Scene the Second

(Now get this straight. this is a telephone office where work telephone girls. The first scene of this play is in the telephone office. Its darn serious I tell yuh.)

Rachel: Number please!
Voice on Phone: Lincoln 1613
Rachel: Pardon me.
V. O. P.: I know he's dead

Rachel: I'm trying to complete your call.

## Scene the Third

(Now scene two was just to give you the idea of a telephone office. Here goes the play. In the middle of one of these rows of boxes sit two young girls Flo and Zoe, American girls. One is dressed in red and the other in red, the one next to them is in dutch, she has her gum in her hair. No, Warren Walsh is not hiding behind this row of boxes to keep from the photographers; in fact, he's not behind any row of boxes, who asked that any way.)
Flo: Well, Zoe, what's on to-night?
Zoe: Well, Flo, not knowing I can't say? (Clock strikes thirteen till seven.)
Flo: We're off at seven to-night and I craves excitement, baby.
Zce: So do I, let's think.
(A.t this point both of the girls sit and think. The Y. M. C. A. calls the fire department but doesn't get them. The French house, despite numerous Quiest-ce vous voulezs and Sapristis fail to complete a call. See the girls are thinking. Its darn serious. All right now go on with the play.)
Flo: I have it!

## End of scene three and start of scene four

(Apparently Flo's having it had something to do with the acts, we couldn't figger it out.) Zoe: What?
(The girls engage in whispers during which whispers the Y. M. C. A. burns down on account of the phone service.)

Zoe: That's ducky!
(See she picked that up on the corner of Carroll and Langdon. No allusion to a sorority house, of course.)

The grandfather's clock yawns seven exactly and the girls take off their ear phones and say in unison "Selah Brechects." I don't know why; we couldn't figger it out.

## Scene Five

(girls have repaired to the cloak room.)
Flo: You call; I'll look up the number.
Zoe: All right baby. These boys are cute.
(A giraffe appears eating a straw hat but the girls pay no attention; he belongs to the manager's little boy, the boy's name is Clearence, but who cares? We couldn't figger it out.)

Flo: Badger 186!
(Now the girl is trying to get Badger 186 on the phone, see? We couldn't figger out whose number that was. It ain't the infirmary, nor the $\mathrm{A} . \mathrm{O} . \mathrm{Pi}$ house, not the general hospital. Well the girls can't get connected until a quarter till eight and so the play goes on.)

Voice on Wire: Hello (funny thing for him to say.)

Flo: Is this Elmer?
V. O. W.: Probably. Elmer who?

Flo: Elmer Frytuck, or if he ain't there call Nelson or Clark.
V. O. W.: I'll call for them.
(finis of scene six)

## Beginning of scene seven

(Ncw gentile readers, if you can't understand that the girl is calling somebody on the phone, you had better start over again and read the red type more carefully. The phone the girl is using is a black one, strange to say and the girl is speaking English. On with the presentation, Emery.)

Lapse of short time while V. O. W. shouts for Frytuck, Nelson and Clark.
V. O. W.: No they ain't in. They are down at the Orph.

Flo: Well, this is Flo speaking. I'll meet you and anybody else you can sober up at the T. A. D. P. B. H. at 8 thirty. O. K. ?
V. O. W.: Well (stuttering) yes (hesitantly) at (haltingly) OK.
(Now V. O. W. can't figger out anything but he answers phones (the secret is out, he's a Frosh) at B. 186 so he is in for anything. Flo hangs up, because she is thru. The date is made (maybe that's telling you too much), and Flo and Zoe leave for T. A. D. P. B. H. The V. O. W. staggers out of the phone booth and falls over a prostrate fraternity brother (another secret is out) and himself lies on the floor swooming.)

## Act two

Things are going lovely now. We had the V. O. W. in a swoom, or why not be real candid and say we had the Alpha Tau Omega in a swoom which is what happens, well the A. T. O. (contraction for Alpha Tau Omega) was swoomed by us because we didn't know what else to do with him while the girls are going to T. A. D. P. B. H. Any way he can't take the name of the Press house in vain while in such an inebriated state. Now meanwhile, the girls are on their way. But low, they stop at Shorty's Dugcut for a couple of Ccws and Horses Gone Wrong Avec, which according to Burt's Shorty Dugout-English dictionary means two hamburgers with. The goils eat and to go Langdon street where they throw rocks at the Theta Delt house. At Henry street they render a few psalms for a yet warm cadaver lieing in the guttra. He was traveling secretary for the Travelers Protective Association and went insane looking for a knob to fit Kane, Pennsylvania. Well now you should have had time to test the legitimacy of this playlet by determining from the phone book whether Badger 186 fits the A. T. O. house or is merely fictuous. So the play will go on, dammitts-darn serious.)

## Scene one

(We lost the manuscript, yes when the office boy canoe tipped over. The girl was saved.)

## Scene two

(Same as scene one, but we found it again under the Pi K A pier sealed in a wheat shock. So here goes on with the presentation. Florence. See Florence has replaced Emery as our amenuensis.)

Flo: Do you think he will have blue eyes?
Zoe: Did he talk like it?
(The girls are excited.)
Flo: Turning down Henry street toward the lake.) He must be a Frosh. He didn't seem to know my voice.

Zoe: Turning down Henry street toward the lake. See they are going to gether) and where? to T. A. D. P. B. H.)

Flo: Shhhhhhhh!
Zoe: Do you know where Lake Erie is?
Floe: Shhhhhhhh!
Zoe: But I kept my handscleansince childhood.
Flo: SHHHHHHHH
(Flo gets mad. Zoe is off her nut. They get to the end of Henry street. Flo gets madder and Zoe goes farther off her nut. Things are lovely by now. The V. O. W. has gone to the trysting place, The Alpha Delta Phi Boat House, to wait. Ahh the secret is really out. The girls don't go into the boat house but stand on the outside and make a noise like a wampy-oolah, but sweeter. The Frosh hears and answers in the same code. He must be a second semester Frosh.)

Frosh, which was formerly the V. O. W.: My name's Smith.
(Now if you can figger out who the real Frosh is from that hint you've got us because we couldn't find out his real name in the first place.)

Floe: I'm Floe and she's Zoe (poetry). Now don't think we are too forward but you must understand that we know quite a few of you brothers and since they are not home you will do.
(Now is Daddy Foster was in hip boots lecturing about this play, no he wouldn't have to be in hip boots, he would probably say that the climax had been reached. Something has got to happen if the play is to go on and be a success, and undoubtedly the play will be a success so something will probably happen. But don't get anxious and the master mind will clear everything up just as he did after the Phi Mu stayed out all night. The Alpha Delt boat house is like the house it goes with, about to fall to pieces. The Madison, the town the college is in, building commish has condemned it as being unsafe and the Loyal League for Protection of telephone girls ought to do the same thing. The lake is near by and the sky directly above. Chris Zillman is back on Henry street throwing his hat in a ring. Now this seems unnecessary but I want you to get the feeling and setting so you will understand what comes next. Don't forget that the climax is now attained and something has got to happen. Well it begins to snow and then it quits. In the distance cries of "pajama parade" are heard but it appears in the morning papers the parade could be seen only thru a window in Grady's. It quits snowing. Oh you say it quit before, well we'll change it, It starts snowing. Get ready, folks here goes.)

Flow: Yes we are acquainted with some of the boys and I know they would sanction anything that we do. Now Mr. Smith the facts are these:

You live in a nice red brick house which leaks only on one side. You have a chair, bed all the comforts in the world. When you get to be an upperclassman you will have the privilege of using the back steps during parties. Others are not so fortunate. Down at the telephone office we have a lounging room and that room is the only joy.

## Zoe: Pleasure Floe.

Floe: It our only something or other, Mr. Smith. (Aside to Zoe) Quick wake Mr. Smith up. Well in this lounging room there is hardly anything; so a few of us girls got together after lunch and thought it would be a bully idea if one of your frat bros. could be the first contributor to our newly created fund to buy gold fish and new arches for our lounge room. Mr. Smith will you come thru? Think of yourself.

Frosh: NO!

## End of act two

## Act three immediately follows

(You see just as we told yuh. Something happened. Well after such a disappointment, the girls leave the Frosh in T. A. D. P. B. H., oh that's right we told you what those letters meant, well the Frosh is left in the Alpha Delt boat house then the girls go back to town. On their way they
take it again seriously to throw rocks at the T. Delt house which doesn't make any difference to you or to us and shouldn't to the T. Delts in view of the evidence that others have tried to bomb it.)

Zoe: The cheap skate!!!
Flo: The A. T. O.

## Scene two

Frosh: I'll be darned.
(This shows you how mad he was. He walks up thru the snow, we haven't forgotten that the snow is snowing to the house and goes in. Strange thing. He undresses and hops into his night shirt and pants. He goes to bathroom and chases the ducks out of the wash bowl. He washes his face, for no reason other than that he is in the bathroom. He sneezes and contemplates.)

Frosh: You know Elmer (Elmer has come home from the Orph. I've lost all my power over wimmem.

## Act four

Frosh goes to bed.

> Act five

Frosh goes to sleep.

## Finis.

If you've liked our play tell us; if not tell the A. T. O.'s, it's their fault.

## Campus Idiocies

## The Student Cars

Student cars are a cross between an automobile and a junk heap, and are often, strange as it may seem, seen about college towns. The reason that they are called student cars is because the term "student" is loosely applied this year and does not necessarily mean "one who studies." Astudent car can hold seventeen ordinary people, and, as a matter of fact, usually does. One of the strange idiocyncrasies of student cars is that they suffer from engine and carburetor trouble. This happens in lonely spots, and the theory has been formed hat the engine craves company and just pinest away and dies when it reaches anything that seems like solitude. An inevitable rule about student cars is that everyone must pile in the front seat. Four or five people will be cramped in the narrow confines of the front of a seven-passenger, while the rear is entirely denuded of even one ordinary person. Not even Scotty Goodnight has ever been seen riding in the back seat of a student car. You give the answer, we can't figger it out.

## Rushing

(As the man who wrote the French comp books would do it.)

1. Do you like the meals they serve in our fraternity?
2. I like the soup, the salad, and the coffee which they serve here, but the chicken and the artichokes I do not like.
3. Observe, if you please, the water tumblers out of which you are drinking; they were presented to our little club by a prosperous alumnus who is now in charge of fraternity accounts here.
4. I admire the glasses and also the silverware.
5. Wóuld you care to smoke (FUMIR) a cigarette?
6. No, thank you, but I will smoke (Fumir) a cigar if you have one.
7. Let us enter the living room where many of my friends are already seated about the fireplace.
8. I shall be very glad to enter the living room with you.

## Little Lessons for Lester

No, Lester, that is not a Polar bear coming down the street ; it is a fraternity man in his very own raccoonskin. A fraternity man, Lester, is a very interesting object. He is a person who must wear exactly what everybody else does, and in exactly the same way that everybody else wears it. If ties are going to be striped, he will wear striped ties; and if brown suits are not to be worn, he will never be seen wearing one. What would happen to the fraternity man if everyone decided not to wear pantaloons? Oh, Lester, don't be silly. Still, the experiment would be an interesting one.

No, Lester, that is not a hunk of coal the fraternity man has stuck in his mouth. That is his pipe. Every fraternity man must have a pipe, Lester, they are wearing them this season. It gives them an appearance of nonchalance which hides the fear that they are constantly entertaining. The fear they are constantly entertaining, Lester, is that they do not look exactly like everybody else.

What do the fraternity men talk about? What the fraternity men talk about, Lester, is mainly the other fraternity men, although they sometimes branch off into talks on sorority girls, necking, and liquor. Some day, Lester, a fraternity man will make a remark not on those three subjects. Then the sky will come down and play marbles with the Kappachapter. And that, you will admit, would be a very silly thing for the sky to do.

Why are you taking off your garters Lester? You want to be a fraternity man? Oh, Lester, don't take them off right here in public! Stop, Lester, STOP.
9. The cups which are now upon the mantlepiece (FUMIR) were won by members of our fraternity in athletic competitions of many sorts.
10. How many they are and how pretty is each one!
11. How enjoyable it must be to belong to a fraternity such as is this one.
12. Yes indeed, we have much fun (FUMIR).
13. We eat and sleep together and at times we become drunken and go to the restaurant of Mr. Lawrence for the purpose of making much noise.
14. Would you care to take a button?
15. No, thank you, I will not take a button.
16. I shall go to other fraternity houses where a so they will feed me and tell me nice things $a^{1}$ bout myself.
17. Goodbye, I am very pleased to have had the opportunity of meeting you.
18. Goodbye also and I sincerely hope that I shall soon see (FUMiR) you again.

## Little Lessons for Lester

No, Lester, that is not a riot. If the people were dressed in robes and carrying spears, it would be Grecian tragedy and be art, and if they were dressed in little of anything and were carrying swaggersticks it would be a musical comedy and be vulgar, but as they are just dressed in the extraordinary things that college people usually wear, it is a Lathrop dance and strictly proper, as it is always chaperoned.

Of course there are a good many couples on the floor, Lester; it is a thing to be expected. It is one of these restricted dances, restricted to the people who will buy tickets. Yes, yes, people actually pay to get in and dance on two square feet of floor between a pillar and a Union Board member who got in on a pass.

You can tell that they are college people because they never clap between dances and never apologize when they bump into anyone. A college man, Lester, will apologize on sight, he will apologize when he opens a door for you, or when you take his best girl out for a walk, or when you touch him for two bucks, but when he gets on the dance floor he becomes of his life a thing apart and not all the king's horses, or F. Louise, or Glenny Frank could wring a "Pardon me" out of him. And as for clapping between dances, it just isn't done, no college man would think of it.

Lester, what are you saying? You heard a co-ed say it? Shame, Lester, shame. Come home, we will wash out your mouth with soap and water.
