COURSES IN HUMANITIES

The Faculty of the College of Letters and Science recommends the adoption of the following revised requirements for the Courses in Humanities:

PURPOSE AND PLAN. The aim of the courses in Humanities is to give students a well-rounded liberal education, with greater emphasis on the integration of their course of study than the ordinary B.A. Course affords, and closer relations from the beginning between students and their teachers. Integration is secured by means of the study of a great regional culture, classical or European, in its various interrelated aspects: language, literature, geography, history, social institutions, art, and philosophy, on the theory that such study is effective preparation for living in contemporary society. Each student is assigned an adviser, who helps him plan his course and directs his tutorial work; and frequent conferences of students in small groups with their advisers establish a community of intellectual interest. At the end of the junior year the student, may, if he wishes, specialize in a given period. A final comprehensive examination at the end of the senior year is planned to insure integration of the course of study.

The degree given is Bachelor of Arts (Humanities). Majors and minors may be chosen and teachers' certificates secured in the subjects included in the course of study, as in the regular B.A. and teachers' B.S. courses. Students in the Courses in Humanities may become candidates for the teachers' certificate without entering the School of Education, by registering in both the School of Education and the College of Letters and Science during the junior and senior years, and fulfilling the special requirements (See School of Education).

The course in Modern Humanities is especially designed for prospective teachers of modern languages and for students who anticipate careers involving foreign countries. The course in Classical Humanities is especially designed for prospective teachers of Latin, but it is also taken by students planning for careers in other professions and public service.

I. MODERN HUMANITIES

REQUIREMENTS. For admission, four years of one foreign language, or, less desirably, two years each of two foreign languages. For graduation, 120 academic credits and an equal number of grade-points, including the following:

a. Tutorial papers (6 cr.). Students read books and write papers dealing with various aspects of modern culture which are not covered in their regular courses.

(Over)

b. A sophomore course in American or English literature (6 cr.). Students are expected to pass the test exempting them from English 1.

c. Three of the following: (1) Latin 21 (6 cr.); (2) Greek 1 and 10 (14 cr.); (3) a reading knowledge of French; (4) a reading knowledge of German; (5) a reading knowledge of Spanish; (6) a reading knowledge of Italian. Another foreign language may be substituted for one of these languages with the approval of the Humanities Committee.

d. 10 credits in social studies (not including those taken to satisfy "f" below), of which at least 6 will be in history.

e. 10 credits in natural science and 3 credits in the history of modern science.

f. 9 credits in philosophy or mathematics.

g. 3 credits in art history or music.

h. A final comprehensive examination in the field of major concentration.

## II. CLASSICAL HUMANITIES

REQUIREMENTS. For admission, three or four years of high school Latin. For graduation, 120 credits and grade-points, including the following:

a. Tutorial papers during the first two years (12 cr.). They deal with Greek and Roman history, literature and art.

b. 22 credits in Latin beyond Latin 11, 18 credits in Greek beyond Greek 10.

c. 10 credits in natural science.

d. 6 credits in history, preferably History 10.

e. 6 credits in philosophy.

f. A final comprehensive examination.
