# C Carnival Fun Fest

## U Dine an' Dance Out

## E Play Gala Midway

Vol V Issue 11  
July 17, 1970

The annual Carnival Fun Fest will be held on Wednesday July 29, Chuck Radtke, chairman, told the CUE this week.

The restful wooded area bordered by Kempster Hall, Nurses Annex and the Food Service building will almost magically be transformed into a gala concession-type Midway from 1:30 to 4:15 in the afternoon.

A number of exciting games will be available to you amid the gaily decorated Midway. You'll hear the familiar call of the "Barkers" - "Ladies and Gentlemen, step right up and take your chance!" You will find "The Dunking Tank" among the games scheduled. Here you can dunk a person of authority without fear of recrimination.

You are urged to come early in order to check in at the TICKET BOOTH where you will receive a packet of 18 FREE (Green) tickets. If you wish additional tickets during the afternoon you can purchase them at the Ticket Booth at 5¢ each and these will be white in color. These white tickets can be used for all the games, refreshments, balloons or at the Photo Booth.

Photos this year will cost one-quarter of a dollar, just 25¢ or five white tickets. You can purchase balloons for just a nickel or one white ticket. The green tickets you receive are only good for playing all the games. Staff members can also purchase tickets if they desire.

The Canteen will be open as usual from 9 A.M. to 8 P.M. and will have booths set-up serving cold drinks, ice

cream candy and other goodies to quench your thirst and hunger. The out-of-doors stands will be open from 1:00 to 4:15 P.M.

There will be prizes galore to meet the fancy and tastes of all ages. You are bound to win a prize. The booths will be staffed by Activity Therapy personnel as well as other familiar people.

The gala Fun Fest will be concluded with a bountiful picnic supper from 4:30 to 6:00 P.M. You can eat any time within this period. In case of inclement weather the Carnival will be held the following day, July 30.

Be sure you pick up your packet of free tickets at the Ticket Booth before you play one of the several game concessions on the Midway.

This is FUN DAY for everyone, so come and join the merrymakers. Dine play and dance to your heart's content.

### NOTICE

A proposal has been made to open the Canteen on Tuesday evenings. This plan would have the Canteen open from Tuesday through Saturday evenings at 9 A.M. to 8 P.M.

On Sunday the hours would be 11:30 A.M. to 4:15 P.M. Monday would remain unchanged - 9 A.M. to 4:15 P.M.

If you have any objection to this change of hours, write the CUE or call at the CUE'S office.

\* \* \* \* \*

Don't forget the date - July 29th for the colorful Carnival Fun Fest.

# The Sounding board --

## PUBLICITY

Frank Novotny and his 6-piece band have played together for a number of years, and Frank has been a musician for more years than he'd like to admit. He played at the Riverview and appeared on television. He has made records. In short, Frank has been around.

We can't help but think of the disappointment in his mind when he played for a "pavement dance" this past Tuesday evening. Only a few couples were on the blacktop at Kempster Hall. Later in the evening the sit-down audience numbered about 35.

We feel the lack of publicity was the answer to the small turnout. The CUE had no advance information that Frank Novotny would appear here. We understand a sign was placed in each unit regarding the dance, but apparently signs are not enough.

Dance bands of Frank Novotny's caliber should have an audience. WE hope that the booker will use the facilities of the CUE the next time a good band is brought to WSH. We owe it to all the patients who were not aware of the Tuesday night's dance.

IN THIS ISSUE - Issues & Answers on page 3. Golden Views on page 5. Top Ten on page 6. The Teen Tatler on page 8. Dick Hoeft's "In This Corner" on page 8. Weather Extremes Creates Problems on page 12.

inaccurately the statistics concerning whether Americans drink more today than they did during Prohibition. The do-gooders claim there is more drinking today because the "sport" is legalized. That when you legalize marijuana - more people would be hitting the pot.

There was MORE drinking per capita during the 14 years of Prohibition than there is today, according to U.S. Government statistics. Each year under the Volstead Law, 1.95 gallons of liquor was imbibed per capita, a quarter gallon more than today's figure and even higher than the pre-Prohibition peak of 1.84 gallons in 1917. During 1968, the nation consumed 342 million gallons of liquor (1.7 gallons per capita) and 3,442,511,746 gallons of beer (17.2 per capita). Beer drinking per capita rate for 1917 was 18.5 gallons a year.

## ARROGANCE

Has our arrogance overtaken our humility. The easy certainty that we are right too often deludes us into a smug and ugly self-righteousness.

Too many of us are ready to believe that those who preach doctrines to the left or right of our own are fools or knaves or both. We find ourselves as a people caught up in a paradox that would be comic were it not fraught with such potential for tragedy.

# Issues an' Answers

DO YOU READ THE DAILY  
AND WEEKLY NEWSPAPERS  
ON YOUR WARD?

Only when they are available. There are some evenings when they don't come or someone else has them.

Sherman

I don't believe I ever read a weekly paper here, but I do read the Daily Northwestern when it's passed to me.

Sherman

The only paper I read is the one I get from my home town.

Sherman

No. I don't know where the newspapers go, but I never see one.

Sherman

Sometimes I read the paper, but the aides usually have them.

Sherman

I read the Northwestern and the Paper from Oshkosh.

Sherman

I don't read the papers very often, but sometimes when I feel like it, I glance over one.

Sherman

I read all the newspapers that are passed on to me.

Sherman

I stay away from reading newspapers because there is too much bad news and it makes me unhappy.

Sherman

I read the Northwestern because it keeps me occupied and I don't think of myself so much.

Sherman

I don't read them every day because they're not on the ward every day.

Kempster

Two papers are delivered to the Ward; one to the patients and one for the aides. I think some patients take the paper to their rooms and then no one else has a chance to read it.

Kempster

I read a newspaper once in a while, but only to look at the Want Ad section.

Kempster

I enjoy reading a newspaper, but it is not on the ward. There are back issues, but who wants to read stale news.

Kempster

I looked for a newspaper several times on the ward, but I don't know who keeps them.

Kempster

There are old papers on the ward, but seldom do I see a newspaper on the day it is published.

Kempster

I read every paper that is put in our dayroom. We have both daily and weekly newspapers given us.

Gordon

The aides bring the Northwestern to us before supper and also The Paper in the morning. I read both of them.

Gordon

I subscribe to my Antigo newspaper, and I read the Daily Northwestern & the Paper on the ward.

Gordon

We get quite a few newspapers and I read most of them.

Hughes

I only read the sports section of the daily newspapers.

Hughes

(SURVEY MADE AT NORTH COTTAGE: Of the 24 patients at North Cottage, it was reported that 14 read the Daily Northwestern with special attention given the Want Ads; 1 seldom reads and 9 not at all. All 14 readers also peruse their home town papers weekly.)

## THE ISSUE

During the past two months, the CUE received complaints from 22 patients in two specific units and 4 from other units. In short, the complainants claimed that daily newspapers were not given them, although they knew the papers were delivered to the nurses' station.

We also received a complaint from a staff employee regarding the weekly newspapers passed out by Activity Therapy and the patient's Library. It appeared an aide on one ward commented on "handling trash."

(SEE: The Issue on page 4.)

STAFF
  
PORTRAIT

RAY VANDERGEETEN

Ray VanderGeeten, Structural Crafts Foreman of the Maintenance Department, was born October 19, 1920 in Crystal Falls, Michigan. At an early age his parents moved the family to Green Bay where he attended and graduated from Green Bay East High School. Further education was achieved at Green Bay Vocational School and Army Technical School. He was a flight engineer for the Airforce in World War II.

The VanderGeetens have a home in Neenah. They have two teen-age girls, both of whom do volunteer work at WSH.

Ray supervises a crew of thirteen, one is a patient, and is responsible for all carpentry, masonry, painting and glazing performed in all buildings. Periodic inspections are also made of all structures to forestall major repairs. Major projects he has directed have included the conversion of the four basement wings of Hughes Hall into a complete school unit and the remodeling of Kempster Admission and Sherman Admission.

When Ray came to WSH five years ago Sherman Hall was under construction. Shortly thereafter the old building was demolished and the new Administration Building and Chapel erected. Also, the Picnic Point area was developed, along with the lodge and bunk house. So he has witnessed and contributed to much progress in a short time.

Ray and his crew will shortly move into Sherman Hall where it is planned to build partitions in the current recreation room to accommodate the growing need for office space. Recreation facilities will be moved to the west basement wing. Fluorescent lights, accoustical ceiling and air-conditioning will be installed in the Library.

Ray was quoted as saying that two new buildings have been proposed -- an Elementary Building for small children and a Research and Education Building that will replace the Nurse's Annex. (The latter being a future project.) In his spare time Ray gets in as much fishing as he can, and for a number of years has enthusiastically hunted with bow and arrow. Good hunting, Ray!

\* \* \*

(THE ISSUE from page 3.)

Annual subscriptions to the Daily Northwestern and The Paper are made to provide patients an opportunity to keep up with the news.

Fifty weekly newspapers are distributed for all patients by the Activity Therapy department and the patients' Library.

In all cases, such newspapers were ordered for the patients.

\* \* \* \* \*

NEW FAMILY SPORT

A new family sport is sailing over the sand in a three-wheeled vehicle that is a first cousin to the familiar iceboat. The craft is steered by pedals that move the front wheel and by deft handling of the sail. With a good breeze, a sand-sailing vehicle can whip along at 50 miles an hour and more.

In southern California the sand sailors converge at El Mirage Dry Lake where the bed is now dry and hard as concrete. Elsewhere around the country, sand sailing is done on hard tidal flats and at old abandoned airfields.

\* \* \* \* \*

TIME FLYS

Enjoy the daylight while you can. The hours of daylight this month decreases from 16 hours, 30 minutes, to 15 hours, 42 minutes, at the end of July.

\* \* \* \* \*

SUNSETS

There are meteorologists, but who keeps a record of the fairer sunsets? While men are recording the direction of the wind, they neglect to record the beauty of the sunset or the rainbow.

\* \* \* \* \*

GESUNDHEIT!

Just think - in less than 30 days it'll be hay fever sneezin'.

\* \* \* \* \*

CONFUCIUS say: He who always looks at the bright side of things will soon get sore eyes.

# Golden Views

The folks have been getting outdoors nearly every day to enjoy the warm sunshine. Art Nitzke has been busier than ever watering the flowers around Gordon Hall. He is a familiar figure during the early evening hours carrying a water bucket. Art is a happy man when he's working. He shaves the patients who are unable to shave themselves and he makes countless errands for the Geriatric Unit. He has a warm greeting for everyone and we number him among our friends.

We were talking with John this past week and the subject came up concerning the boys who throw rocks at the squirrels. "They should be kind to the squirrels," he said, "because they don't harm anyone."

He related incidents when he would push the old mail-cart to the Winnebago Post Office. John always carried hickory nuts in his pockets to give to the squirrels. It wasn't long before the squirrels recognized the sound of the iron-wheeled cart and would come hopping and leaping to get their nuts. "They would climb up my arms," smiled John, "and sniff in the pockets where I kept the hickory nuts."

He said they became pets in time and he derived a great deal of satisfaction from feeding them. That is why he cannot understand why anyone would deliberately harm a squirrel. It is the same as any pet, he pointed out. "Would you kill a pet dog or cat for no reason," he said seriously. "A boy usually likes pets, and I just can't fathom the mind of a lad who throws rocks at squirrels."

John pointed out, too, that birds need water in the extremely hot weather we've been having. He said when he waters flowers near the Greenhouse, the birds will come for water and some park on his shoulders. He has a few bird baths and he wishes that there were more such baths on the grounds.

"If you treat birds or animals right," he said, "they will like you." We agreed with him, and thought that

his statement could also apply to relationships with people!

## THE CRASH

When greedy people want more than they need...When foolish people think they can get something for nothing... WHEN impulsive people buy now with the hope of paying later...When income and wealth are distributed UNFAIRLY and dangerously...When the rich regard themselves as an all-knowing elite... When the masses are not PAID ENOUGH money to consume all the goods they produce...When the economy is unsound...When the corporate structure is sick...When the banking system is weak...When foreign trade is out of balance...WHAT HAPPENS?

A crash! It happened on October 29 1929. It brought on bread lines and soup kitchens and shanty towns. By 1931, about 10 million Americans were unemployed.

It took a crippled man to teach a crippled nation. In his first inaugural address, President Franklin D. Roosevelt said, "This great nation will endure as it has endured, will revive and will prosper. So, first of all, let me assert my firm belief that the only thing we have to fear is fear itself."

He rallied the nation, asking Congress for various economy measures, then closed the banks and created the first of many agencies -- the Civilian Conservation Corps, which put thousands of young men to work clearing streams, building roads, and doing hundreds of other jobs to help stem unemployment.

\* \* \* \* \*

## BIRD OF PEACE

George Washington, commander-in-chief of our forces in the American Revolution, was at heart a man of peace. After the war he ordered a weather-vane for Mount Vernon: "I should like to have a bird...with an olive branch in its mouth. The bird need not be large (for I do not expect that it will traverse with the real shape of a bird, with spread wings.)"

\* \* \* \* \*

A romance that starts by a splashing waterfall sometimes ends over a leaky kitchen faucet.

To the CUE:

July 4, 1970 will go down in the record book as "no flag day" at WSH. The flag pole looked vacant as did the face of a woman staring at it. "Don't they fly the flag on the 4th?" she asked. I glanced over at the homes beyond the cottages. "I guess not," I answered.

Staff Employee

To the CUE:

The "spirit of '76" degenerated into the "cynical '70's" on July 4. The spirit of the day was completely ignored here. Although the flag is flown every day of the week, it turned up missing July 4-5. Shame!

V. P.

To the CUE:

I thoroughly enjoyed the true story of "Billy the Pro." It was extremely interesting. Thank you.

J. S.

To the CUE:

Regarding "For Young Women" July 3 issue, first paragraph: "We're going to bring in a blast of arctic air to cool things off a bit." You sure did! There was a 45-degree drop in temperature on July 4!

F. B.

To the CUE:

Did you ever wonder what the kids were throwing rocks at? They are trying to kill squirrels. I found a squirrel with a broken leg. I'm one of many here who don't like to see animals tortured.

Randy

To the CUE:

I liked "For Young Woman" in the July 3 issue. I also got a big laugh when I read "The Language Of Modern Psychiatry" in your reader's Rhymes columns.

B. H.

If it's NEWS - it'll be in the CUE!

Here's the current TOP 10 in the WOSH Fun One Plus 49 Survey:

1. Ball of Confusion- - -Temptations

(Answers to PUZZLE that appeared July 3.)

# THE TEEN TATLER

# IN THIS CORNER

by Dick

We took a trip around the world a few years ago and picked up a bit of wisdom.

In Denmark, the hotel bell captain told us "A new net will not catch an old bird." Think that over!

While in Portugal, a new-found pal advised us that "Experience is the fruit of the tree of errors." Dwell on that for a moment.

Our journey to Germany was most rewarding. A writer on a Berlin newspaper remarked "The eyes believe - themselves - the ears believe other people." Read that over five times!

We found out what a "fable" really was from a man we met in Arabia. He said, "A fable is a bridge which leads to truth." Remarkable, isn't it. It gets your mind thinking about many things.

In London, we received a new explanation on "Justice." A barrister said, "Justice is a certain rectitude of mind whereby a man does what he ought to do in the circumstances confronting him." That's really a gem!

You'll be interested in what a leading churchman says about the so-called youth revolution. He claims that it is a revolt "against every moral law - written and unwritten."

It is an "ideological war waged in the most covert, sophisticated and deceitful manner," says Archbishop Iakovos, head of the Greek Orthodox Church in the Americas.

This war on the home front "will prove to be much more catastrophic than the war of shame which is being waged in Vietman," he said.

He feels that the youth revolution is "the negation of self-respect and self-discipline, which they ridicule in the most sarcastic way," with the ultimate effect of destroying "the moral and intellectual integrity of youth." He also believes that youth is being persuaded to "treat love and respect toward family as unnatural and false."

Time waits for no man or thing -- it ticks away day-in and day-out. Do you serve time or do you let time serve you. There are so many things we want to do, but somewhere down the line we never get them done. Did you ever realize that a trip of a thousand miles begins with one step! Have you taken that first step to accomplish what you want to do? You are living this day - and once it's gone - you can never return to it. Make up your mind to start doing something today -- and get that job done before you begin on a new venture.

Did you ever think that someone was picking on you for no reason? We had one experience along that line when we were first admitted. The nurses and aides felt that we were fighting them, and we thought they were battling us. The final realization came one night that they were trying to help us. The doctors and staff are trained to help us in every way they can, and we appreciate that fact.

I am normal as I can be, there is nothing wrong with me.

The rest of the world is all wrong; I'll be back, it won't take long.

What is normal people say; It's the way you act every day.

It's the way you smile, the way you frown; don't ever let it get you down.

Be sure to smile every day; and you'll hear people say

He's normal as can be; try it and you will see.

Are you part of the world or do you live in a world of your own? When you live in your own world, the staff tries to find out what is wrong in your own world. Sometimes, this is a long process, but it can be shortened by co-operating with your doctor and the ward staff. After all, it is their decision as to when you'll be released from the hospital. Misery is when you make believe you're sick and stay home from work, then around noon, you remember it's Sunday!

# Beauty Corner

# From the Library

Have you been enjoying the summer weather down at the beach or under a shady tree?

We notice a few gals with a new tan. The sun's ultraviolet rays, which reach the earth in various lengths, are the cause of suntans. Short rays stimulate the blood vessels in the skin's surface layer, producing the redness and occasional swelling that characterize sunburn; greater lengths penetrate more deeply, causing lower layers to speed up production of melanin, the body's natural pigment, so that the surface layers darken. The result is that bronze color most people consider healthy.

But repeated suntans can sap the life out of the skin. It becomes old before its time, loses its resilience and elasticity. The fat underneath wastes away, the skin wrinkles and folds, becomes dry, blotchy and yellowish. A person of 45 who has been repeatedly exposed to the sun may have the weathered skin of a man of 60.

A century ago light-complexioned persons used to avoid the sun at all costs. This was partly a matter of caste, a heavily tanned face marking its owner as a laborer, and an untanned face, a gentleman. In more recent years the sun came to be recognized as a prime source of vitamin D which is beneficial to certain diseases, such as tuberculosis of the skin. A tan also came to mean that the wearer had the leisure to lie in the sun. Result: more status and more brown faces.

What should you do to ward off the dangerous effects of the sun? If you are taking medication you should not expose yourself to the sun for long periods without first checking the hazards with your doctor.

To minimize the effects of sunburn, most people know the rules about gradual exposure -- 15 minutes the first day, double that the second, and so on.

Exchew Obfuscation!

There's nothing like reading a good book to get your mind off yourself. It's one of the best ways to relax.

The patients' library has received several new books of interest to almost everyone. Why not stop down and borrow one next week.

"There's Yeast in the Middle East," by Wille Ethridge, is a humor-packed travel narrative that will make you laugh all the way through.

If you're interested in an analysis of the masterpieces of the past - from Aristophanes, Shakespeare and Moliere to Chekhov - read "Tragedy and Comedy" by Walter Kerr.

How can you hold off the tax-collector and learn all about the hazards of easy credit? You'll find out by reading "Financial Self-Defense" by John Springer. There is also hedges against inflation. Read it!

"What You Should Know About Libel & Slander" by Michael Mayer, relates famous and infamous cases of defamation. If you've been slandered, read what can be done about it.

Do you like to read a witty and informative book of the habits of man and his insect neighbors? Get down to the library on Monday morning and ask for "Life On A Little-known Planet" by Howard Evans.

"The Unhandy Man's Guide To Home Repairs" by Barbara and Richard O'Neil is a complete manual of home maintenance for both men and women. Learn how to repair things the easy way.

If you think we're living in an instant-crisis world, read "Times of Trial" by Allan Nevins, editor. Here are the greatest crises in the American past. Other new books include "Job Strategy" by Allan Rood. Learn how to prepare for a job. "The Jews - Their History, Culture and Religion"; "The Complete Book of Family Skiing" by George Sullivan. "Encyclopedia Of The Great Composers and Their Music" by Milton Cross and David Ewen, editors.

# non compos mentis

Dear Non:

Do you know what one can do for water on the brain?

Try a tap on the head.

Dear Compos:

What's wrong with people who have no sense of direction?

You must mean those who get lost going up on an escalator.

Dear Mentis:

I'm interested in knowing just what do you THINK about the medi-dress?

It's just a hem that will never attract a him.

Dear Non:

One of our cooks has a terrible sense of time. For instance, it takes him eight minutes to cook a three-minute egg.

Dear Compos:

My wife had a strict upbringing. Even now she refuses to go to a drive-in movie at night.

Dear Mentis:

The other day I got a letter from an old buddy of mine. He wanted to know what to buy his wife for their wedding anniversary. He had never been married that long before.

Dear Non:

Pollution is sure getting bad in Oshkosh. Yesterday, I saw a bird bath with a ring around it.

Dear Compos:

My wife has a summer version of that lyric: "Raindrops keep fallin' on my head." They're from an air conditioner.

Dear Mentis:

I wish they had never printed so much about air pollution. My wife

keeps our windows shut even when it's 97 in the shade.

Dear Non:

I know a lot of people who act funny -- only they're not acting.

Dear Compos:

George Washington, our first president, sure had problems. He couldn't blame his troubles on the previous administration.

Dear Mentis:

My wife thinks the answer to inflation is to spend my money before its value drops.

Dear Non:

I can't figure the teen-agers out. They hate people over 30, but adore people over 70.

Dear Compos:

There is something about small towns -- the hold-up guys pass 'em by.

Dear Mentis:

After viewing the gals during my first trip to the beach this summer, I've concluded that the designers for beachwear ran out of ideas. What do you think?

They ran out of material.

Dear Non:

Beware of young gals who call at your door -- wistful and winking -- and of 20 and four.

Dear Compos:

I hear there's one baseball club who plans a new Ladies' Day -- no man admitted without a woman.

Dear Mentis:

Anyone who thinks that there's fire where there's smoke -- never tried to cook on a camping trip.

A GRIN A DAY -- KEEPS A GROUCH AWAY!

# reader's RHYMES

## DARE WE

Those men who drove the Golden Spike  
 A hundred years ago  
 Did they dare to dream, and plan,  
 and pray

For all that was begun  
 With the final hammer thud?  
 Men who sweat and bled and died  
 To make this nation one  
 Do you think they could believe  
 How long, how far we've come?

But more I'm asking  
 Do we dare to dream  
 To fathom, to pray?  
 What happens when the rockets span  
 the known  
 And we can taste infinity?  
 Can rockets heal  
 Where railroads failed?

Dare men work, believe?  
 Dare we Pray that we will be one;  
 Made whole; at peace  
 With every man ---  
 No thought of skin, planet, or clime  
 But one with every brother  
 Beginning today!

-- Lee

## WHAT IS LIFE?

What is life all about?  
 We are trying to find out  
 Those who know say  
 It changes every day.

Life is what you make it  
 You can't just sit  
 Love is the Key to life  
 It helps you through strife.

Put love in your heart  
 Never let it depart  
 Then you will have eternal life  
 That will help you through strife.

-- Dick

## MAIDENHOOD

Standing with reluctant feet  
 Where the brook and river meet  
 Womanhood and childhood fleet!  
 -- Longfellow

The CUE is for YOU, tiger!

## A LIFE ON THE OCEAN WAVE

A life on the ocean wave  
 A home on the rolling deep  
 Where the scattered waters rave  
 And the winds their revels keep!

Like an eagle caged I pine  
 On this dull, unchanging shore  
 Oh, give me the flashing brine  
 The spray and the tempest's roar!  
 -- E.

## ABANDONED

Here I sit in the moonlight  
 Abandoned by women and men  
 Murmuring over and over  
 I'll never eat onions again!  
 -- Randy

## FLAW IN THE FLUE

A flea and a fly in a flue  
 Were imprisoned, so what could  
 they do?  
 Said the flea, "Let us fly,"  
 Said the fly, "Let us flee."  
 So they flew through a flaw in  
 the flue.

T. K.

## THE LADY FROM LYNN

There was a young lady from Lynn  
 Who was exceedingly thin  
 That one day in the shade  
 While sipping lemonade  
 She slipped through the straw and  
 fell in!

-- Wynn

## CHART ME DOC!

Medical reports and flowing steam  
 I wonder if it's all a dream  
 But if aides anger and start to yelp  
 Stop -- ask for help!  
 If they ask you questions why  
 Answer them, but don't lie  
 Shape up, then wave bye-bye!

-- Billy

What did CONFUCIUS say:

He who laughs last is the slowest!

# Weather Extremes Creates Problems

It was Charles D. Warner, not Mark Twain, who made the time-famous observation, "Everybody talks about the weather, but nobody does anything about it." Charley was a newspaperman on the Hartford Courant.

The sun searing heat wave that held Winnebagoland in its hot grip from June 28 through July 3, caused a raft of problems. There were power shortages caused by transformers breaking down under an air-conditioning overload. Meteorologists on TV explained the highs and lows and newspapers published crowded-beach-pix and temperature readings on the front page.

The perspiring public flocked to swimming pools and beaches to escape the broiling heat, while others depended upon sweating air-conditioners. The airport tower at Wittman Field, Oshkosh, broke down leaving the operators to work in near 95 degree temperatures.

It was hot! Make no mistake about it!

On July 1, the 97 degree temperature at the Buckstaff Observatory equaled the high of July 1, 1963. Nothing higher had been recorded in July since 1955, although it was 98 on June 19, 1953. On July 13, 1936, a high of 107 was recorded and on May 31 1934, the temperature climbed to 104 degrees, which all goes to prove that hot weather is no stranger to this area.

The record-breaking heat even had Oshkosh judges hot around the collar. One Circuit Court judge abandoned courtroom protocol by taking off his black judicial robe while a County Court judge didn't even bother to robe up. It was the latter who threatened last July to move proceedings to the air-conditioned Town House, but the judiciary committee came through with a cooler for the jury room. The courtrooms were unchanged. This July, the same judge granted several postponements, whenever possible, to September. He did sentence one youth to a

10-day term which was mandatory under the law. "This is a heck of a time to go to jail," he told the youth. "It's hot up there!"

It was so hot that three youths were caught trying to steal an air-conditioner from an Oshkosh office building.

Outside Wisconsin, hundreds of nude swimmers created huge traffic problems in Macon, Georgia. They were suffering from 100-degree heat. In West Virginia a nude woman was arrested at 7 a.m. on a street corner as she stood in the rain.

Here at WSH, a deluge of complaints flooded the CUE'S office. The only unit not complaining was Sherman Hall, which is air-conditioned. The Administration Building's air-conditioner was unable to function at such record-breaking high temperatures.

Kempster Hall had the biggest problem. The windows that open to a 6-inch slot offered little or no relief to the occupants. On ground floor center the air was stifling. Department offices, the dining room, the barbershop, and other rooms were sauna hotboxes. Everyone moved about like zombies. Brow wiping became commonplace. There just was no escaping the day by day discomfort.

Everyone talked about the broiling heat, but that was all you could do under the circumstances. WSH like courthouses and other public and private buildings need better ventilating and air-conditioning systems in order to cope with extreme hot spells.

What can be done to alleviate the problem at WSH? One employee suggested that dishrooms could be better ventilated by installing exhaust fans. Large floor fans should be placed in all dining rooms, with the exception of Sherman Hall. The barber shop at Kempster Hall could have a small window air-conditioner. The windows at Kempster could be adjusted so they

(Continued on next page)

would open wider. The nurses' stations at Gordon Hall would be better ventilated by providing additional floor fans.

It seems to us that the cost of additional fans would offset the ultimate damage that could occur to state-owned property. Excessive humidity can eventually lead to such problems as mildew, peeling paint and warping of floors, among other items. The health angle should also be considered when corrective procedures are instituted.

\* \* \* \* \*

FREAK WEATHER IN THE PAST

There will always be summers, although in 1816 a freak summer in New England brought 10 inches of snow on June 30. July and August were no better, with half an inch of ice spread over Vermont and New Hampshire. That year was entered into records as "the year in which there was no summer."

On July 6, 1928, the largest hailstone recorded fell at Potter, Nebraska. It weighed 1 and one-half pounds.

The highest recorded shade temperature was 130F at Death Valley, California on July 10, 1913.

The lowest recorded temperature in the United States was 69.7 below zero on January 20, 1954, at Rogers Park, Montana.

\* \* \* \* \*

DID YOU KNOW?

Just before the stock market crash in 1929, 60% of U.S. citizens had annual incomes of less than \$2000, which was estimated as the bare minimum to supply the "basic necessities of life."

The downward trend in stock prices which had prevailed for several weeks broke into outright panic. On October 29, over 16,000,000 shares were dumped for any price they could bring. A total of \$30,000,000,000 in paper value was lost in collapse of market and credit structure within 3 weeks.

\* \* \* \* \*

ENJOY YOURSELF

When we went to school, we didn't have sex education. All we had to look forward to was recess.

# CHAOS

In May of 1919 at Dusseldorf, Germany, the allied forces obtained a copy of some of the Communists Rules for revolution. Nearly 50 years later, the Reds are still following the rules. As you read, stop after each item and think about the present day situation - where we live - and all around the nation. We quote the Red Rules:

- A. Corrupt the young, get them interested in sex. Make them superficial; destroy their ruggedness.
- B. Get control of all means of publicity, thereby get people's minds off their government by focusing their attention on athletics, sexy books and plays and other trivialities.
- C. Divide the people into hostile groups by constantly harping on controversial matters of no importance.
- D. Destroy the people's faith in their natural leaders by holding them up to contempt and ridicule.
- E. Always preach true democracy, but seize power as fast and as ruthless as possible.
- F. By encouraging government extravagance, destroy its credit, produce fear of inflation with rising prices and general discontent.
- G. Promote unnecessary strikes in vital industries, encourage civil disorders and foster a lenient and soft attitude on the part of the government toward such disorders.
- H. By specious argument cause breakdown of the moral virtues, honesty sobriety, continence, faith in the pledged word.
- I. Cause the registration of all firearms on some pretext, with a view to confiscating them and leaving the population helpless.

How many of these rules are being carried out in this nation today? It's hard to see how any thinking person can truthfully say that the communists are not involved in the current chaos that is upsetting our country from border to border.

# Sportside

## LOCAL FANS SEE WHAT'S

### BREWING WITH THE BREWERS

Members representing the four Intramural softball teams and their coaches together with the CUE'S sports department were treated to a Major League baseball game on July 2 through the courtesy of the Activity Therapy department.

The thirty local fans were part of the 12,009 attending Milwaukee County Stadium for the Brewers-California Angels game.

The Angels exploded for five runs in the seventh inning to chase Gene Brabender (a big righthander from Black Earth, Wisconsin) and score a 10-7 victory over the Brewers.

Dave Bristol, Brewers manager, has a problem on his hands. Pitching continues to be uncertain and fielding has to be improved before the team begins to jell. Tommy Harper, third baseman, appears to be the top player for the Brewers. His leadoff home run had given Milwaukee a 1-0 lead in the first inning, but the Angels bounced back to take the lead with two runs in the second. Tommy hammered his second homer in the ninth with one on.

On the entertainment side, the 5th inning crew of sweepers drew a big hand when they made the infield sweep in 47 seconds, which was two under the record time of 45 seconds. They have since made it in 25 seconds plus.

The group also saw Clyde Wright of the Angels who pitched a no-hitter over the Oakland Athletics the following night.

The Brewers are about eight games behind their Seattle pace of last year when the Pilots held third place at a comparable period. In attendance, the Brewers rank 22nd. Only the White Sox and the Phils has drawn fewer fans. They should draw better in the second half of the season than they have up to now.

The bus stopped at a wayside retreat on the return trip where everyone enjoyed a picnic lunch. This was

a memorable experience for several patients who had attended a major-league baseball game for the first time. A special thank you goes to Chuck Lemieux who was instrumental in obtaining 30 tickets.

### THE GREEN BAY PACKERS

The Green Bay Packers will play four of their 14 regular season pro football games at Green Bay and three at Milwaukee and will play their last five games on the road in the fall, according to a schedule received by the CUE.

The Packers, who now belong to the National Football Conference, will play three games against American Football Conference foes. The inter-conference games will be against San Diego, Baltimore and Pittsburgh of the AFC.

The Packers also will play in two of the 13 Monday night games that will be nationally televised.

### PACKER REGULAR SEASON SCHEDULE

Sept. 20 - Detroit at Green Bay.  
 Sept. 27 - Atlanta at Green Bay.  
 Oct. 4 - Minnesota at Milwaukee.  
 Oct. 12 - San Diego at San Diego.  
 Oct. 18 - Los Angeles at Green Bay.  
 Oct. 25 - Philadelphia at Milwaukee.  
 Nov. 1 - San Francisco at San.Fran.  
 Nov. 9 - Baltimore at Milwaukee.  
 Nov. 15 - Chicago at Green Bay.  
 Nov. 22 - Minnesota at Minnesota.  
 Nov. 26 - Dallas at Dallas.  
 Dec. 6 - Pittsburgh at Pittsburgh.  
 Dec. 13 - Chicago at Chicago.  
 Dec. 20 - Detroit at Detroit.

The NFC and AFC divisional playoffs will be Dec. 26 and 27.

### SPORT SHOTS

Jim Magnuson is one of the new White Sox hurlers. The 23-year old Magnuson, a native of Marinette and a former pitcher at Oshkosh University, started the season with Mobile of the Southern League -- posting a 5-5 record, but compiled an excellent earned run average of 1.94.

# SPORTS

## DCN HAUKE & COMPANY

### MOW DOWN SHERMAN HALL

MAIN BALL PARK - Kempster Hall with Don having a 5x5 night including a home run, trounced Sherman Hall, 25-13, in the Intramural League Wednesday evening.

Kempster with an 8-0 lead in the second, piled up 3 runs in the 4th, 8 in the 4th and 6 in the final inning to tie Hughes Hall for first place in the Second Round.

Sherman came to life in the third stanza as tripled with sending him home with a single. reached second on an error, singled and drove in two runs on a single.

Dick, the CUE'S pressman, powered a 2-run homer in the 5th and Haskins rapped a 3-run homer in the 6th for the Shermanites.

For Kempster, Don, hurling a brilliant game contributed a 2-run homer in the 4th and a 2-run triple in the 6th to pile up the score. Tony again displayed defensive form at 1st base. He went 3x4 at the plate. The big bats of and were potent in scoring the 25 runs.

BATTERIES: Kempster - and Sherman - and

HR - ,

### HUGHES HALL CLIP

#### GORDON ATU, 23-22

KEMPSTER FIELD - The youngsters from Hughes Hall crashed through for two runs in the seventh inning and rode to tie Kempster for first place by clipping Gordon ATU, 23-22, Wednesday night.

Hughes after piling up a 16-1 lead

in two innings, trailed the ATU, 22-21 in the top of the seventh. Gordon ATU wiped out the 15-run tally by scoring 8 runs in the 4th and 6 in the fifth frame.

smashed two home runs for the double H'ers, while Gram collected two homers for ATU.

BATTERIES: Hughes - and ATU - , , and  
LEADING HITTERS: Hughes - , 4x5; Schilling, 4x4: , 3x5. ATU - Kinner, 4x5; Adams, 3x4; , 3x4. HR - , (2). (2). , and

### SECOND ROUND STANDINGS

	W	L
Hughes Hall	2	0
Kempster Hall	2	0
Sherman Hall	0	2
Gordon ATU	0	2

Gordon ATU lost to Kempster Hall by forfeit on July 8. While the players were not involved in misconduct, the failure to appear caused the forfeiture clause of softball rules to be applied.

### COMING GAMES

On July 22, Kempster meets Hughes at the Main Ball Park. Game time: 6:15 p.m. Sherman tangles with Gordon ATU at Kempster Field the same evening. Game time: 6:15 p.m.

On July 29, Kempster vs. Gordon ATU at the Main Ball Park. Hughes vs. Sherman at Kempster Field. Game time: 6:15 p.m. Get out and support your team!

### LOCAL 48ERS

Monday's game was rained out and will be rescheduled. On July 20, the 48ers meet Oshkosh Truck on the Northside diamond. Game time: 6:30 P.M. On July 27, the 48ers bump into the strong SNC team at the Southside diamond. Game time: 6:15 P.M.

### SWIMMING

Sue Abrahamson and Ken Isles have been handling Kempster Hall swimmers for one hour each week. It appears that some units are having a problem in securing life guards on the 4-1 ratio.

# 21 Rockets A Big Win

## HUGHES HALL BELTS SHERMAN

### IN SECOND ROUND OPENER

MAIN BALL PARK - Hughes Hall opened the second-round of the Intramural Softball League in a blaze of glory by belting Sherman Hall, 22-9, on July 8.

The Shermanites collected 7 runs in the first two innings, but Hughes came roaring back with 9 big ones in its half of the second and exploded for 5 more in the third and 7 in the fourth to put the game beyond reach.

Bob [unclear] cracked a two-run homer in the furious second and Ken [unclear] duplicated his teammate's feat in the fourth for the double H'ers.

The Sherman team were unable to recover from the second frame barrage and Kohnhorst, pitching a whale of a game, blanked the opponents in the third and fifth stanza and limited them to 2 runs in the fourth.

Outstanding for Hughes were the big bats of [unclear] and [unclear], and the fielding of Ron [unclear] Rick [unclear] with 3x3, and [unclear], [unclear], and [unclear], played well for Sherman.

Hughes Hall	195	7 x	22
Sherman Hall	340	2 0	9

BATTERIES: Hughes - [unclear] and [unclear]  
Sherman - [unclear] and [unclear].

LEADING HITTERS: Hughes - [unclear] i  
4x4; [unclear] t, 3x4; [unclear] z, 3x4;  
[unclear], 2x4; [unclear] 2, 2x4.  
[unclear], 3x3; [unclear] s, 2x4;  
2x2. HR - [unclear], [unclear]

### HOW TO HIT BETTER

Is your coach satisfied with your hitting performance. Are you content? If not, don't over-time yourself when you practice. Keep your eye on the ball at all times. Don't look around the field. If you're over-pressing -- cut down on your swing. Forget the long ball. And don't let anyone mess with you. You have to have confidence in yourself. So -- remember -- keep your eye on the ball!

OSHKOSH - The Local 48ers rocketed 20 runs on 21 hits to crush the Firefighters, 20-11, July 6, to remain in a three-way-tie for first place in the Industrial Slow Pitch League.

Norm Bauman and Al Pils1 led the 48ers with five-for-five nights. Al Pils1, blasted three homers, drove in seven runs and Bauman contributed two round-trippers. Chuck Lemieux kept the CUE'S facade intact by bashing a home run and Tom Matche also powered a homer for the 48ers.

It was such a sweet night!

Local 48ers	402	056	3	20	21	4
Firefighters	101	232	2	11	17	10

BATTERIES: Dave Daggett and Tom Mulvey.

LEADING HITTERS: Norm Bauman, 5x5; Al Pils1, 5x5; Bob Haebig, 3x4; Chuck Lemieux, 2x5; HR - Lemieux, Matche, Bauman, (2); Pils1, (3).

\* \* \* \* \*

### HOW IT BEGAN

"Texas Leaguer" became baseball parlance for a weak hit just over the heads of the infield but short of the outfield players. The term was first used to describe the short hits of Arthur Sunday, a player from the Texas League, who was able to maintain a batting record of .398 with the help of those "Texas Leaguers."

"Baltimore Chop" became baseball parlance for a batted ball which bounced so high in the infield that the hitter could reach 1st base before the ball could be fielded and thrown. Term originated with the Baltimore Orioles, who were adept at securing this tricky hit.

\* \* \* \* \*

### DID YOU KNOW

Cy Young won 511 games with Cleveland, St. Louis and Boston, to lead the "most games won" category. Charles Radbourne won 60 games in one season-- to top the "most games won in a season --and Carl Hubbell, N.Y. Giants, won 24 consecutive games to head that category.

If you're hooked on fishing but are looking for new methods that will add to your angling excitement, try bubble fishing. And, if you are an expert worm-dunker, chances are you already have all of the gear you'll need.

Bubble fishing is a technique that will allow you to use flies for trout and panfish, even if you do not possess a fly rod. The secret of casting a fly with a spinning or spin-casting rod is in using a bubble--which you may recognize as a bobber, or a float or a cork.

All the equipment needed for successful bubble fishing is a standard spinning or spin-casting rod, equipped with lightweight monofilament line, some kind of an artificial fly and a bubble. Within a couple of hours, you should be able to reach weedbeds, drop offs and rock outcroppings far offshore -- if you rig correctly.

Let's say that your bubble is a brightly colored plastic ball the kind available in most fishing-tackle stores. Tie this float on the end of your monofilament line. About three or four feet above the float, attach a dropline 30 inches long. Now, attach a fly to the end of the dropline.

This method of rigging is exactly opposite to fishing with a worm or other live bait, but there is a reason for this. When fishing with bait, the float is used to hold the bait a given distance below the water. But in bubble fishing the float is a casting device--the weight, really--that carries an artificial fly to the spot you want to fish. Once the cast is made, the fly floats on top of the water.

Casting a bubble and fly will be just a little different from casting either live bait and a sinker or a plug. Instead of a standard overhead cast, you may at first do better with a sidearm cast. The reason is that the float and fly will not weigh as much as live bait and a sinker or a standard spinning lure.

But there is a way to overcome this weight differential: Remember that so far we have been talking about a round

plastic float as the bubble. If you are really sold on bubble fishing, you will be able to make longer casts with a bubble specially designed for casting long distances. This type of float is usually made of clear plastic with a valve that allows you to fill the bubble partially with water. This kind of bubble is streamlined for easier casting. But, in the beginning stick with the plastic float you already own.

What kind of fly do you use? If you like to fish for trout, you may already be familiar with such standard dry flies as Royal Coachman, Black Gnat, or the Yellow May. These are excellent flies, but any kind of brightly colored fly will do for panfish such as bluegill, sunfish, rock bass and crappie.

More important than the type of fly is the accuracy and finesse of your delivery. You must learn to cast the bubble so the fly floats normally, looking to a fish like an insect that has fallen on the water. Panfish are more easily fooled than trout, which tend to be wary. Accuracy is important, for a cast is most effective if the fly lands near weeds or rocks or brush where fish often hide.

Dry flies are designed to float on top of the water. But bubble fishermen are not limited to dry flies. With a bubble you may also fish with nymphs streamer flies, wet flies -- all underwater lures -- or even small popping bugs that float on top of the water. Setting the hook with an artificial lure isn't quite the same as for bait. Fish think artificials are some kind of live bait. The moment they discover the fly is not really an insect, they spit it out. Only practice will prepare you for the exact time you must set a hook, but remember THAT most fish hold an artificial fly very briefly.

Where does bubble fishing lead to? Once you have mastered using a bubble to cast a fly, the next step may be learning how to tie your own flies. And anyone who ties his own flies very probably will want to test them on a fly rod. Good fishing!

# --- The Hotline ---

## THE INVISIBLE REPORTER

... IS EVERYWHERE!

Who is responsible for the large section of weeds east of the Main Ball Park and down to the barn? It's an unsightly scene in an otherwise attractive setting. There is every type of weed growing high and scattering its seeds hither and yon.

Who has the key for the restrooms adjacent to the Main Ball Park? The door hasn't been opened since the building was renovated. Softball fans have been running to the Canteen's wash rooms.

Who got taken over the coals for failing to clean the inside of the food carts? Wouldn't it be feasible to sterilize the carts...the same method used in steaming out garbage containers?

Why can't the thermostats be set at 60 instead of 65? A breeze can click on the heat and it takes several hours before the room or ward is normal again. Steam heat on top of unusual hot weather is unbearable.

Why can't mesh-bags be provided all units for the purpose of washing handkerchiefs and men's sox. We understand Sherman 3-4 uses these mesh-bags in order to eliminate the loss of these items. The items are washed in the mesh-bag and returned to the unit by the laundry.

\* \* \* \* \*

## ALTO SAX - CLARINET ARTIST

### WILL RETURN BY POPULAR DEMAND

Don who teamed up with Clarence as a duo during a recent Singalong will return by popular request, the CUE learned this week.

Schneider, who played in dance bands in the Madison area, is an accomplished musician on the alto sax and clarinet. In musician's parlance he is a slick stick man.

He is expected to team up with at the regular Singalong, Thursday July 23. Listen to the public address system for further details.

## DID YOU SAY SERVICE?

TIE 214 YEARS OF IT.

Out of curiosity recently, Mrs. Allen, Charge Aide, and Mrs. Ward practical nurse, at North Cottage, added up the years of service of each of the twelve aides and practical nurses assigned to the Cottage, and came up with a total of 214 years, for an average of 18 years per employee. Mrs. Ward headed the list for a record 32 years at WSH.

Can any other ward match this?

## JOHN LIKES 'EM

North cottagers held a marshmallow "toast" last Thursday evening, which quickly turned into a contest. John won hands down with a consumption of 25. Mrs. Phipps sponsored the outing.

## WELCOME TO W.S.H.

Three psychiatrist residents were added to the Staff of WSH for a one-year training program July 1.

They are Sheldon W. Kayute, M.D., who has been working at Resthaven Hospital, Elgin, Illinois; John L. Strefling, D.O., from the Dr. Norman M. Beatty Memorial Hospital, Westville Indiana, and Stephen B. Hull, M.D., who has been on the medical staff here and will now begin his residency in psychiatry. Before joining WSH, Dr. Hull was in general practice at Wau-pun.

The residents will serve on the various services within the hospital on a rotating basis during the year. They will be assigned special cases for study, and their didactic program will include seminars on psychiatry, psychology and neurology.

The program is administered by Dr. George Lysloff under the auspices of the Department of Psychiatry of the University of Wisconsin, Madison.

Dr. Lysloff and Dr. Darold Treffert are members of the University medical faculty in the Department of Psychiatry.

(More news on next page.)

THE PAPER FEATURES ARTICLEON GORDON'S ATU

A recent issue of THE PAPER, Oshkosh, carried a feature story on the ATU in Gordon Hall.

It was reported that the treatment program for alcoholics at WSH usually takes four to six weeks. The basic treatment program takes four weeks, with one week for discharge and referral.

In addition to physical care, the hospitalized alcoholics are required to attend a series of meetings with social workers, religious advisers and medical personnel. Group therapy sessions include films, tapes and lectures, as well as discussions.

The ATU staff currently is in the process of re-evaluating the treatment program, and is planning to introduce more group therapy sessions, as well as such new techniques as video tapes and psycho drama.

It was further reported that one of the social workers estimated that the rate of readmission in the 100-bed ATU was 40 to 60 per cent. The treatment unit works closely with the AA chapter in the patient's home town, and will provide the released patient with a sponsor with whom he can attend AA meetings.

WELCOME STUDENT NURSES

We wish to extend a welcome to the present class of practical nurses who started their training on July 13. Their cheery presence is much appreciated. The present class hails from Neenah -- the home of top-notch high school basketball teams.

EXPERTS NEEDEDFOR MENTAL CARE

A news source reported this week that there is a shortage of trained health experts for mental disease.

"There are vacancies for trained psychiatrists all over the country but we just can't fill them," said Dr. L. Douglas Lenkowski of Western Reserve University in Cleveland. "We must step up the capacity of the medical schools." "There are three areas of serious social need," said Dr. Alexander Simon, head of Langley Porter. The aged, mentally ill and alcoholism and drug abuse.

**INFORMATION**RECREATION

The recreation supervisors from the Activity Therapy department have charge of both indoor and outdoor recreation activities. You will be notified regarding special activities, such as bus trips and dancing.

CANTEEN

The Canteen is open at varying hours every day of the week, subject to change.

Monday & Tuesday: 9 A.M.--4:15 P.M.

Wednesday thru Friday: 9 A.M. to 8 P.M.

Saturday and Sunday: 11:30 A.M. to 8 P.M.

Daily newspapers are available from Monday thru Saturday. THE PAPER from Oshkosh contains local news.

Singalongs are held every Thursday evening at 7 o'clock with Clarence Weber at the organ. Special programs with visiting artists will be announced in advance.

A pay telephone is located in the Juke Box area.

Vending machines offer everything from hot foods to cigarettes. Help keep the Canteen clean by disposing paper cups, wrappers, etc., in the receptacles provided.

BUS SCHEDULE

Going NORTH from Oshkosh terminal:  
Appleton, Green Bay, Marinette:

9:45 a.m.

2:45 p.m.

6:00 p.m.

8:00 p.m.

Going SOUTH from Oshkosh terminal:  
Milwaukee, Fond Du Lac, Madison:

8:40 a.m.

1:55 p.m.

7:00 p.m.

LIBRARY HOURS: Daily from 9:30 to 11:45 a.m. and 1:00 to 4:00 p.m. with one exception -- on Thursday the library closes at 2:30 p.m. It is not open on weekends.

MONEY WITHDRAWAL: If you have money in the cashier's office, you can draw \$8.00 every week.
