The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

# Practical Nursing Texts

## 1. PERSONAL AND VOCATIONAL RELATIONSHIPS IN PRACTICAL NURSING

**New (3rd) Edition!**

*By Carmen F. Ross, R.N., M.A.*

Extensively reorganized, expanded, and with a new format, this text is ideal for either the basic course in relationships, or programs where the subject is integrated into the curriculum. Increased flexibility is accomplished with a new table of chapter-by-chapter references to major textbooks in the field. New or expanded material is included on reading assignments and the PQRS method of study; the present decade in nursing; modifications in nursing organizations; and such current socio-cultural problems as the

unmarried mother, the battered child, drug abuse, alcohol consumption and cigarette smoking. Increased emphasis is placed on nursing team roles, geriatrics and the impact of Medicare, and legal responsibilities. A new feature of this edition is an Instructor's Guide that includes answers to all questions in the text. Numerous suggestions are offered for course enrichment, including audiovisual media, field trips, guest speakers and supplemental references.

266 Pages

Illustrated

3rd Edition, 1969

Paperbound, \$3.25

## 2. TEXTBOOK OF BASIC NURSING

*By Ella M. Thompson, R.N., B.S., and Constance Murphy, R.N., B.S.*

For clarity and comprehensive coverage this basic text has no peer. Presenting practical nursing procedures in a broad-spectrum approach that incorporates recent developments, it includes the life sciences, pharmacology and drug administration, conditions of illness, maternity-child nursing and the family. Woven into the essentials of

patient care are the all-important considerations of interpersonal relationships, psychosocial considerations and rehabilitation with greater emphasis on "restorative nursing." All suggestions for nursing care are supported by scientific principles and guidelines.

752 Pages

1966

\$7.50

## 3. INTRODUCTORY MATERNITY NURSING

*By Doris C. Bethea, R.N., B.S., M.S.*

Based on the most modern concepts of maternity nursing, this text supplies all information required by the practical nurse for optimum care of mothers and infants. Emphasis is equally divided between excellence in physical care and psychological considerations. Fundamental principles and

procedures are clearly explained for both normal and abnormal situations. Fully aware of the growing responsibilities of the practical nurse on the maternal health team, the author provides the material upon which clinical competence and job fulfillment depend.

223 Pages

83 Illustrations

1968

Paperbound, \$3.75

## 4. THE HUMAN BODY IN HEALTH AND DISEASE

*By Ruth Lundeen Memmler, M.D.*

A readable and concise text that introduces the student to body structure and function. The body is contrasted under normal and abnormal conditions to help students understand the total structure, and each new term is carefully

defined. The interrelationships of anatomy, physiology, pathology, and elements of microbiology are graphically presented. Logical correlation of the basic sciences equips the student for her entry into clinical areas of study.

372 Pages

2nd Edition, 1962

Paperbound, \$3.20

## 5. PRACTICAL NURSING WORKBOOK—New!

By Claire P. Hoffman, R.N., M.A., and Gladys B. Lipkin, R.N., B.S.

An entirely new workbook that covers concepts and procedures basic to all patient care. Chapter-by-chapter page references to five major practical nursing texts permit extreme latitude in the use of literature. Content includes questions related to: body structure and function; fundamentals of nursing; conditions of illness; maternal and child care; care of the geriatric patient; nutritional requirements; personal and vocational relationships; family living;

the hospital and community health team. For advanced students, provision is made for practice in charting. Perforated pages permit flexibility of use in the classroom, laboratory, or for outside assignment. The appendix includes information on medications, temperature conversions and commonly-required tests. A separate booklet, available to instructors, supplies the answers to every question in the book.

310 Pages      48 Illustrations      1969      Perforated and Drilled      Paperbound, \$3.75

## 6. PRACTICAL NURSING STUDY GUIDE AND REVIEW

By Zella von Gremp, M.A., R.N., and Lucile Broadwell, R.N., M.S.

This combination review-workbook has been substantially broadened to include a review of general nursing content; personal and vocational relationships; administration of

medications; principles and concepts of rehabilitation. Patient-centered material is supplemented by over 1000 questions. Perforated answer sheets are bound in.

333 Pages      66 Illustrations      2nd Edition, 1965      Paperbound, \$4.60

## 7. PRACTICAL NUTRITION

By Alice B. Peyton, M.S.

Planned and developed with the need of the practical nursing student in mind, this text covers normal nutrition, diet therapy, and food economics. The author clearly defines normal nutrition and discusses its effective application in promoting and safeguarding health. Student interest is heightened through use of many learning aids.

434 Pages      Illustrated  
2nd Edition, 1962      Paperbound, \$3.75

## LIPPINCOTT'S VISUAL TEACHING AIDS

FILM LOOPS, for group or self-instruction, demonstrate basic nursing skills.

MULTICOLOR TRANSPARENCIES, for classroom instruction, illustrate nursing subjects via overhead projector.

Please write for description brochures.

## 8. SIMPLIFIED NURSING

By Claire P. Hoffman, R.N., M.S.,  
Gladys B. Lipkin, R.N., B.S.,  
and Ella M. Thompson, R.N., B.S.

This revised version of a favorite text offers full coverage of pertinent material from anatomy and physiology through specific nursing measures in the major clinical areas. Ideal for use in intensive courses for nursing assistants, home health aides, psychiatric technicians, and many areas of inservice education, this book is also a suitable "shorter" text for practical nursing. The authors not only explain *how* to give nursing care, but also the reasons behind each step.

600 Pages      112 Illustrations,
