WISCONSIN ALUMNI MAGAZINE.

VOL. IV. OCTOBER, 1902. No. 1.

OPENING OF THE UNIVERSITY.

The directory of students at the university, which will make its appearance at the end of this week, will show a gratifying increase in attendance. In every department save the law school is the number considerably augmented, this department suffering somewhat from the improvement of law courses in the neighboring state of Illinois, whence Wisconsin was wont to receive a generous quota of young men. In the college of engineering in particular the enrollment is much larger than before. It is estimated that there will be fully one hundred more students in the college this year than last. The enrollment will undoubtedly reach six hundred. The increase is in the civil and electrical courses. In all the scientific departments the same good report is made. The dairy and short course agricultural students will tax the capacity of their schools and with their arrival shortly are expected to bring the total attendance near the 3,000 mark. Improvement and expansion in the courses is keeping pace with the attendance and facilities for study and research are made better and more complete.

Among the comparatively new features in the college of engineering is the introduction of a five-year course. This course is designed to give the student all the technical knowledge and general engineering training that he would receive in a four year curriculum, but at the same time it will give the technical man a general culture and an insight into the humanities that he does not get in the shorter course. The imposing new agricultural hall now in process of completion is a fine addition to the buildings and will give the much needed room and equipment that this growing department requires. The strengthening of the pre-medical course by the construction of a special laboratory is also a distinct gain to the advantages offered by the institution. Altogether a prosperous year seems before the university.

THE SUMMER SESSION OF 1902.

We need not go back very far to reach the time when it was quite generally thought that no one but teachers in service should engage in mental labor during the hot months, and even they should not take the matter very seriously. The important summer schools of a couple of decades ago, with few exceptions, encamped at some summering place, such as Chautauqua, or Martha's Vineyard, or Bay View, or Glen Falls, and teachers in large numbers congregated at these points for a few weeks of rest and "inspiration," and a little light study of methods. At Chautauqua there was some serious work attempted, at least in certain departments, and undergraduates in eastern universities used to spend six weeks of a summer there, applying themselves diligently to Latin or German or

mathematics or some other subject in the effort to gain a little time in college, which was not infrequently accomplished. Chautauqua as I knew it a decade ago (I do not know how it is today) was a sort of mecca for many university students who objected to loafing during the whole summer, and who could not afford to go to Europe. If my memory serves me correctly there was at that time no university summer session, in the east at any rate, where a student could spend a few weeks in profitable study.

But during the past decade there has been going on something like a revolution in public thought regarding summer study. So far as I can learn all but one of the great universities now offer opportunities for genuine work of high grade during the summer months. The University of Chicago seems to have inaugurated the movement. President Harper had been president of Chatauqua and was a believer in the plan of summer work, and he incorporated the idea in the organization of his university. I can remember how when the scheme was announced college people in the east scoffed at the notion of a university holding a session in hot weather. All kinds of reasons were advanced for not doing so—teachers had enough to do already, students ought not to study all the year, professors needed a vacation, the brain would not work effectively when the thermometer was soaring up toward the hundred mark, and so on. People are always adept in finding arguments to support themselves in their traditional modes of action, or in the things they want to do; and even yet one can hear those who take no part in summer work rehearsing the old objections.

But one should have no fear in saying that the summer session has come to stay, not only in the universities and colleges but also in the technical and normal schools; and the idea seems to be working down into the secondary and elementary schools. I think we are coming to realize that a good many

people, students and teachers, might better be at work a part of the summer than to lie utterly idle. Every one must know that it does not conduce to health and efficiency in the mental life to strain one's self for nine months, and then knock off suddenly for three months. Any organ of the human body that has been kept in vigorous action for a long period gets adapted to functioning in that way and it works havoc with it to cease activity all at once; organs accustomed to generous exertion cannot readjust themselves readily to a life of inaction, that is to say. Of course, if people could travel or occupy their minds in some interesting way other than in application to books, it would doubtless be of advantage to have a period of release from their regular duties; but as matters stand, three-fourths of students and teachers will remain idle most of the long vacation if they abandon their customary labors altogether, and in so doing they are more likely to be losers than to be gainers. It may be remarked in this connection that our common lengthy interim had its origin in the need of students in earlier times to leave the school and labor with their hands during the season when crops required attention. And while this period of vacation has been shortened somewhat as conditions have changed, still the spell of the past is over us yet, and we go on perpetuating a practice which on the whole has ceased to be of much if any benefit, and in a large percentage of cases is decidedly disadvantageous.

Perhaps these preliminary remarks will indicate the purpose of our summer session, which the editor of the ALUMNI MAGAZINE, in asking for this sketch, requested me to state at the outset. The purpose of the summer session seems to me to be not essentially different from that of the regular sessions; it is maintained to give those who want to study in any earnest way an opportunity to do so. It is not intended to minister to the needs of teachers particularly, though a large proportion

of our students come directly from active work in the schools. But in the last session out of 339 students in the college of letters and science, according to the report of Director Birge from which these statistics are gained, there were 129 undergraduates who were employing their summer months to make up deficiencies or to ease up the requirements ahead. There were fifty normal school graduates who were working for a degree, although most of these were teachers in service. One hundred and seventy-five of those who registered (about one-half of the total number enrolled) were teachers either in the college, the normal school, the high school, the elementary school, or were superintendents of schools. It is interesting to note that the number of teachers in the four summer sessions 172. It should be added that many of these teachers were really pursuing graduate studies for a higher degree, and so has been very constant—in 1899, 171; in 1900, 174; in 1901, were not limiting themselves to work that might be immediately practiced in their schoolrooms. In the past summer session there were 106 graduate students, a gain of 5 over any previous year.

In the summer session for apprentices and artisans, conducted by the college of engineering and begun in 1901, nearly one-half of the students in attendance were devoting themselves to regular university work. There was an enrollment this year of 61, and of this number 27 were either regular students in the college of engineering who were making up shop work or other studies, or they were high school pupils who were about to enter the college of engineering and who were making a beginning in their shop work in advance. The remaining students, that is 34, were perfecting themselves in the immediately practical work for which the summer session was primarily established.

The enrollment in the college of letters and science in the four summer sessions was as follows: in 1899, 326; in 1900,

321; in 1901, 322; in 1902, 339, making a gain last summer of 17 over any previous year. This increase is really more significant than it appears to be at first sight, for the reason that the National Educational association, which met at Minneapolis in July, drew 1,500 members from our special field. Of course, these comprised the most active and progressive teachers of the state, and it is highly probable that if they had not spent their time and money in going to Minneapolis a considerable number of them would have come to Madison. The association convened during the second week of our school, so that teachers who went there would not feel that they could gain much by coming to us afterward.

But the gain in the last session was not so important in numbers as in the quality of those in attendance. Many of the members of the faculty observed that the students in their classes last summer were more mature and had better training than in any previous season. It is not too much to say that the summer session is coming to appeal more and more strongly to the most capable among teachers and students. The old idea of summer study as being suitable for elementary teachers alone is passing, and it has already passed in some places, where they are doing their best work in the summer. We had with us last summer three prominent principals of normal schools and training schools, three normal school teachers, 14 college teachers, and a much larger number (I cannot give the exact figures) of superintendents of schools.

In the last session of the college of letters and science courses were offered by 29 professors and 18 instructors and assistants. In the session for apprentices and artisans there were 12 professors and instructors. It has been the practice to have a number of distinguished lecturers from abroad in the college of letters and science, and last summer the lectures were devoted mainly to pedagogy. President G. Stanley Hall of Clark Univer-

sity delivered eighteen lectures. His course was largely attended and seemed to be generally enjoyed. President Hall has a wide reputation as a leader in education, and his presence with us doubtless attracted some strong students who otherwise would have gone to Chicago, or Cornell, or Harvard. Several of these men said to me personally that they were so much pleased with Madison and with the university that they would continue their graduate work here and take a higher degree. Chancellor E. Benjamin Andrews of the University of Nebraska, delivered two lectures; Superintendent Thomas M. Balliet, of Springfield, Massachusetts, four; Inspector James L. Hughes of Toronto, Canada, three; Professor Edward R. Shaw, of the University of the City of New York, four; Editor Albert E. Winship of the *Journal of Education*, Boston, two; and Professor Colin A. Scott of Chicago, one. These men are interested in different phases of education, and they approached the discussion of educational problems from different standpoints, so that there was much variety in the work, which the students apparently appreciated. The lecturers were all eager to give of whatever they possessed to those who appeared interested, and they freely answered questions that were asked them. President Hall held several conferences after his lectures, and expressed himself practically upon all sorts of educational questions which he had treated theoretically in his discourses.

Our students came from all sections of the country and a few came from foreign lands; but of course, the majority came from our own state. Two hundred and seventy-five were from Wisconsin; 41 from Illinois; 32 from Iowa; 15 from Indiana; 10 from Michigan; 7 from Minnesota; 7 from Ohio; 5 from Missouri; 4 from Kansas; 4 from Texas; 3 from Nebraska; and New York, South Dakota, Maryland, California, Arkansas, Georgia, Pennsylvania, New Jersey, Florida, Argentine Republic, and Japan sent from one to two each. It may be of interest to

note the registrations in the different departments, showing the sort of work that summer students engage in most generally. In history there were 170 registrations, in English 115, in philosophy and pedagogy 111, in German 105, in physical culture 98, in mathematics 97, in physics 72, in Latin 62, in elocution and oratory 52, and in other subjects there were from 5 to 50 registrations.

The advantage of the summer session to students can not well be overestimated, it seems to me. No matter from what section of the country they come they seem to be delighted with their stay here. They say that they are not only improving their minds, but they are gaining recreation in a much better way than if they had lain idle at home either in the city or in some small town. I have known several teachers who have been here for the past three years consecutively, and they tell me that they begin their work in September refreshed and vigorous, and they are in a much better condition to help their pupils than if they had loafed at home. They have come in contact with new life, and have gained some inspiration; and when they go back they attack their work in a new spirit, and this is the fundamental requisite for continuous enthusiasm and efficiency in school work.

Then the gain to the university is of as great consequence as it is to students. A university that does not grow either in numbers or in quality of its students is doomed. It is a familiar saying that no living thing can remain stationary; if it does not go up it will go down; it must either develop or degenerate. And in our day when space has been practically annihilated, great universities appeal to the whole country for their clientele, and the university that is not active in strengthening its work and letting what it is doing be known to the world cannot survive in the struggle for existence. There is a very real struggle going on in the collegiate world as there is

everywhere else, and students of social phenomena know that this is essential for the evolution of institutions. But the point is that any particular institution if it would hold its place must be active in interesting student bodies, and the summer session is one of the best means of enlisting the sympathy of those who determine most largely where the best students will go for their training. Some of our sister universities show by their practice that they are aware of the fact that if they can make it attractive and profitable for high school teachers, principals, and superintendents of schools to spend the summer with them that they will later get the bright scholars whom they teach. In this way the student body of the university will be continually improved in numbers and in quality. These sister universities very legitimately seek to interest the teachers in our own state. In a certain sense we are in jeopardy in our own field, and this means that we must offer advantages here which will impress teachers favorably and ally them with us in sympathy and action. If our summer session should be given up, or if the character of its work should be weakened; if it should be reduced to the quondam summer school, for instance, it seems certain that the university as a whole would sooner or later be vitally affected. The best students in our own field would be drafted off to the institutions with whom we are in a sort of friendly way rivals. We would not, if we could, get rid of this competition, for it is a stimulus to continual improvement, but its existence makes it necessary for the university to do all in its power to continue to make its summer session as strong and inviting as possible.

M. V. O'SHEA.

DEATH OF PRESIDENT ADAMS.

The opening of the university finds that institution still without a successor to the lamented President Adams, whose death at Redlands, Cal., July 26 last aroused a sense of personal loss in the hearts of the faculty, the returning student body and all who came within the circle of this eminent scholar and educator. To this sense of loss is added that of deep gratitude and strengthened appreciation in the generous provisions of Dr. Adams' will by which his entire estate is left to the university with far-reaching provisions of the most noble philanthropy. This will was executed at Redlands, March 22, 1902, and provides that after certain bequests to relatives the bulk of his estate is to go to his executors and trustees in trust for his wife during her natural life. To Mrs. Adams is given the books and manuscripts belonging to Dr. Adams. On the death of his widow the entire estate goes to the University of Wisconsin to be maintained as a separate fund to be known as the President Adams fellowship fund. The will provides a method for the investment by the University of Wisconsin of the entire estate and the creation out of the income and accumulation thereof of fifteen fellowships of the sum of \$10,000 each consisting of five fellowships in English language and literature, five in Greek language and literature, and five in modern history. As Dr. Adams' estate is estimated at only about \$30,000 the final fellowship provided for must by the slow process of increment naturally wait until the middle of the present century at least.

Provision is made in the will for the fellowships to be continually maintained intact. The five fellowships in English language and literature are to be known as the Mary M. Adams fellowships, the others as the President Adams fellowships. The regents of the university are given the power, in their discretion,

to combine for any one year the income of two funds of the same class in case of exceptional brilliancy or merit on the part of a candidate. It can bestow the same on a single appointee, and authorize him to prosecute his studies in any foreign land, and in such case the same is to be known as the President Adams traveling fellowship.

This will contains a provision that in case the devise to the University of Wisconsin for any reason be invalid, or cannot be executed substantially as that will indicates the entire estate shall go to the University of Wisconsin absolutely and without condition, but in making such a gift, the hope is expressed that it will be administered and applied as nearly as the law will permit in accordance with the wishes expressed in the will. Lucien S. Hanks and Burr W. Jones of Madison, Wis., and John P. Fisk of Redlands, Cal., are named as the executors and trustees under the will, and Messrs. Hanks and Jones went to California last summer to qualify as such.

Dr. Adams' remains were laid to rest in the cemetery at Redlands, in which city Mrs. Adams will continue to make her home. On his resignation as president, Dr. and Mrs. Adams went to Redlands last December and decided to spend their remaining days there. A beautiful and sightly home was built, but Dr. Adams lived but a fortnight after moving into it. He had been ailing for several years. While president of the university he was granted leave of absence, going to Europe, where he seemed to recuperate. Shortly after returning to his work a year ago, his ailment soon told upon his system and at the end of a few months he resigned and went to California. The end came painlessly and was the result of a lapse similar to many which had occurred. For the greater part of several days before his death Dr. Adams was in a semi-conscious condition.

The passing of President Adams called forth expressions of regret throughout the entire land and high tributes of respect.

The faculty of the University of Wisconsin two days after his death appointed a special committee to draw up resolutions of regret and esteem. The committee consisted of Prof. Charles Forster Smith, Vice President J. B. Parkinson, Dean E. E. Bryant, Prof. F. J. Turner, Dr. J. F. A. Pyre, Dr. J. G. D. Mack and Prof. H. L. Russell. The report follows:

“President Charles Kendall Adams came in 1892 to the University of Wisconsin, at the age of 57, with a distinguished reputation acquired as professor of history in the University of Michigan and in the presidency of Cornell university.

“A state university was the best field for his work, since he had the profoundest belief in that education by the state which he had himself enjoyed from a district school in Iowa to the University of Michigan. He believed also that the university education was not meant not merely for the select few, but for large numbers of young men and women; yet with these beliefs there mingled no trace of that lack of faith in the state and in students which finds expression in lowered educational standards. Enthusiastically confident of the great future of the University of Wisconsin, to which he was passionately loyal, and having broad and far-reaching plans for its advancement, he had the great happiness to see the state and the scholarly world accept his large view of its mission for higher education. In his presidency the university spirit, already awakened, took full possession of the institution, and in his own last will and testament he gave the strongest encouragement to the most advanced type of instruction by the bequest of his whole fortune to the university as a fellowship fund in the graduate department.

“President Adams’ personal qualities fitted him for his position. In feature and distinguished bearing he looked the gentleman as well as the scholar, worthy to be president. He had worked his way through college, and his example was of incal-

culable value as an incentive to that large class of American youth who have little to help them rise in the world save energy and character. Buoyant and even youthful in spirit, he was deeply interested in the sports as well as the studies of young people; his zeal for athletics coming mainly from the conviction that a maximum of clear and sane thinking, as well as the most moral living, is to be expected from men in good health.

“He was a sincere christian and deeply sympathetic with all that makes for real religion in the university. His intellectual sympathies were broad, and unity of purpose and harmony of action characterized all departments of the university during his administration. He had remarkable capacity to choose and to use men, and administered the university as a democratic institution, in which he recognized the wisdom and the work of the faculty as the important factors. But while always ready to give the warmest encouragement to the spirit of research among the instructors, he reminded them that ‘the university is for the students,’ and that instruction should not be sacrificed to investigation.

“Therefore, while we mourn his loss as a personal bereavement, and while we place on our records this testimonial of our appreciation of his worth and of our sorrow for his death, we find comfort in the assurance that his memory will abide in the annals of the higher education.

“*Be it resolved*, that this expression of our estimate of his worth and his services, of our love and admiration, be spread upon the minutes of the faculty and that it be fittingly communicated to his devoted wife and given to the press.”

Memorial services were held for Dr. Adams at the Congregational church in Madison. There was a large attendance of university and townspeople. Ex-Senator W. F. Vilas presided and paid a brief tribute to the memory of the departed scholar. Dr. E. G. Urdike spoke briefly upon the relations of Dr. Adams

to the church and Prof. F. J. Turner spoke on the relation of Dr. Adams to historical education, while President Birge spoke along the same lines. Prof. F. A. Parker had charge of the music. The speakers all placed the highest estimates upon the life and work of the dead.

TRIBUTES.

Dr. E. A. Birge—In this magazine for last November I contributed to Prof. Smith's article on President Adams a brief estimate of the service which the president had rendered to the university. I will, therefore, devote the few lines assigned to me this month to writing rather of his personal relations in the management of university affairs.

In President Adams' last letter to me, written just after commencement, he expressed his opinion that much of the success of his administration was due to "keeping the team together." I think that the phrase well expresses the temper of his administration. President Adams had a strong personality and positive opinions. He readily conceived and proposed plans for the advancement of the institution; yet he did not attempt to impose his personality on those with whom he was associated, nor to force his plans upon the judgment of the faculty. His administration was, therefore, marked by firmness and yet maintained sympathetic relations with the faculty. He never interfered with the details of departmental matters, looking for results rather than methods. He was keenly alive to the fact that men of intellectual power have their own methods of thought and work and that the best success is attained where these are allowed all possible freedom. His plans for the advancement of the university were habitually committed to the faculty for consideration and modification, and this practice contributed greatly

to the continuance of the exceptionally close harmony which has always characterized that body. For where so strong a personality as that of President Adams was ready to defer to the general judgment, it was hardly possible for another to assert itself unduly. This policy of full individual freedom and responsibility, with the cultivation of a common interest and a common action, united during his administration all of the internal forces of the university for its advancement. To his administration, thus characterized by firmness and freedom, is due much of the inner development of the university during the last decade.

By Prof. Charles Forster Smith—I first met President Adams in March, 1894, when he came to Nashville to offer me a professorship. He soon made me feel "at home" with him. "Going-a-wooing" was his term for seeking a new professor. He was a good wooer, and I was really won long before I said "yes." I was much impressed then with his confidence in the great future of the University of Wisconsin and with his passionate loyalty to it; his high regard for and pride in his faculty; his readiness to offer the largest facilities for developing a department and for building up a scholarly reputation; his candor in stating the weak as well as the strong points of the university; the enthusiasm with which he spoke of the teacher's opportunity to influence his pupils.

As time passed, I came to appreciate more and more the catholicity of spirit which enabled him to sympathize with the enthusiasms of so many men in such varied lines of work and his consequent success in uniting and harmonizing all their effort for the common interest of the university. Who of us can forget his plea to the faculty "to publish more, and to formulate this somewhere, so that the world might know what we were doing?" But along with that came the admonition, "Remember that the

university is for the student!" Meaning that instruction should not be sacrificed to investigation. But, as I have said before, "his pre-eminence was in planning and accomplishing large things." He had wonderful success in winning men over to his large views. Individuals and newspapers sometimes opposed him bitterly, but in the end the legislature and the people came over to his ideas and his ideals, and every conflict left him stronger. A beautiful trait of his was that he seemed incapable of harboring a grudge for honest opposition. He was doubtless the greatest president Wisconsin has yet had. "It was given him," said President Wheeler the other day at Berkeley, "to lead two institutions, Cornell and Wisconsin, out from the condition of commonplace local colleges into the rank of the ten leading national universities."

But he was a man, too, whom one could love. He used to say "A university presidency is a lonely place." And yet at Cornell and Wisconsin he had drawn men to himself in as ardent attachment as that of Andrew D. White and Moses Coit Tyler which dated from the early Michigan days. I mourn in his loss a president in whom I had the profoundest belief and confidence and a friend whom I loved in all sincerity and loyalty.

Regent W. F. Vilas—The death of Dr. Adams comes as a great shock to Madison, even though it is not entirely unexpected. The University of Wisconsin owes him a great deal. He came here at a time when the institution was ripe for a great purpose and he was the man fitted to lift it up into a high place and secure for it and the state wide renown. He will be long remembered here as one of the great benefactors of the university and his memory will be cherished, I am sure, by all lovers of the institution and the state. He was a great man.

Regent B. J. Stevens—Dr. Adams dead! This news is sad indeed. He was a man of great usefulness to the university,

but we mourn him most because in his death we lose a great scholar and a man of singular wisdom. He came here at the right time to make his qualities count most for the growth of the university. The institution can hardly prosper again in ten years' time as it did during the decade Dr. Adams was here. It is impossible to adequately designate his usefulness. He was a man of much cultivation and large judgment. His loss will be greatly felt here where he left so many friends.

Dr. Benjamin Ide Wheeler (on opening of University of California)—On the 26th of July passed to his rest from within the shelter of this state, one of the most devoted friends of education this country has ever known, Charles Kendall Adams, successively professor at the University of California, president of Cornell university, and president of the University of Wisconsin. He had established the home of his declining years at Redlands in this state, and had become a Californian; he had with great delight accepted a proposal to deliver before this university, in the coming autumn, a course of historical lectures, and had already in his strong heart's interest enrolled himself as one of our academic household. Therefore, I speak of him here, and, because he was to me a fatherly friend, and to many another like me, I must speak of him. He merits for one thing above all others our respect. He labored for the institution and the cause he represented, not for himself.

He had no private ambition to rise in rivalry with the interests of his university. He was ready to be forgotten, or to sit down under reproach, if only the great cause throve. It was given him to lead two institutions, Cornell and Wisconsin, out from the condition of commonplace, local colleges, into the ranks of the ten leading national universities. Each of these under his administration acquired significant library buildings which rank among the three best university libraries in the country.

For each he assembled a teaching force of first-rate quality. He never considered so base a fear as that his faculty might contain men stronger than himself. He did not excel in personal attractiveness, and was not called magnetic. He bore no marks of brilliant genius. He was a plain American, reared on a Vermont farm, and the strong lines of his rugged face told of struggle, and somewhat of suffering, for once and again in his life the knife of detraction and bitterness had cut his heart's center, but wise and well-poised he carried no bitterness in his soul.

He suffered in silence, and out of his suffering rose, glorified in sterling manhood like gold tried in the fire. Now he goes down to his grave covered with honor, blessed in the memory of a generation of students, and two great American universities rise to be his unperishing monuments. Farewell! Faithful man, great heart, wise friend of education, farewell!

OBITUARY.

HENRY J. TAYLOR.

Henry J. Taylor, '78, one of the most eminent lawyers in the state of Iowa, died July 21 last in Auckland, New Zealand, where he had gone for his health.

Mr. Taylor was taken ill March 1, and was given treatment for typhoid fever. It is supposed his illness was the result of an attack of grippe or a radical condition of the system. The physician advised an ocean voyage and Mr. and Mrs. Taylor left Sioux City early in May bound for Australia, where relatives of Mr. Taylor live. They sailed for Australia May 10 and left the ship at Honolulu. The trip to the Hawaiian islands was most satisfactory and it was planned to remain in Honolulu

HENRY J. TAYLOR.

ten days. The third day after their arrival there, Mr. Taylor suffered a relapse, going back to his former critical stage. Physicians urged taking again to sea and the trip toward Australia was resumed.

The enfeebled man could not recover his strength in that tropical clime and the ship's physician advised disembarking at Auckland. This was done June 10. For a time he seemed to rally but on July 14 a change occurred and it was at The Manse in Mt. Eden, that he died July 21. He was conscious to the last moment. Here Mrs. Taylor waited 19 days for a steamer. It was 40 days after Mr. Taylor passed away before she reached home with the body. At the funeral in Sioux City, held Sept. 1, many high tributes were paid Mr. Taylor by his associates at the bar, but none more beautiful than the following contained in a private letter from his widow:

"Many beautiful tributes have been paid to Mr. Taylor's beautiful, sweet, stainless life. They were tributes from overflowing hearts. But, after all, none but the wife knew the full sweetness and abundant love of that rare soul. Our home was filled with love and sweetness and naught else entered there. It is well that our children cannot fully realize their loss or it would sadden their lives for all time."

Henry J. Taylor was born at Blue Mounds, Wis., April 8, 1855. He received his common school education at Black Earth, Wis., where he lived the ordinary life of the farmer's boy. At the age of 17 he entered the University of Wisconsin. While at college he was a member and at one time president of the Athenaeum society. He represented this society in public debates, and in the 1878 joint debate with the Hesperian society. He also represented his university in the intercollegiate oratorical contest in 1878. While in the university he was the roommate and chum of C. E. Buell, now assistant attorney-general of Wisconsin, and the two had planned to practice law together. Mr.

Taylor was also a close friend of Governor La Follette and one of his earliest supporters. In June, 1878, he was graduated with first honors from the ancient classical course. In 1878-9 he was an instructor in his alma mater, being first chosen as an instructor in oratory, and later, from choice, became an instructor in Latin and Greek, during which time he also studied law. In 1879 he entered the law department from which in 1880 he was again graduated with the degree of LL. B. From 1882 to 1885 he was county superintendent of schools of the western district of Dane county, Wisconsin. In 1884 he completed a special course of study in Greek, for which he received from his alma mater the degree of A. M.

In 1885 he located at Sioux City, Ia., as an attorney at law. Mr. Taylor had an active, large and lucrative practice in both the state and federal courts, including the supreme court of the United States. Recently his practice in the United States courts had involved some of the most important litigation arising in the state of Iowa. He was one of the counsel for the state in the memorable cases against the parties charged with the assassination of Rev. George C. Haddock. He was a regular attendant of the Congregational church. Of late he was attorney for the Credits Commutation company, a gigantic concern, and it was estimated received fees of \$12,000 a year.

In 1887 he was married to Miss Rose E. Schuster of Middleton, Wis., who was graduated with honors in 1885 from the University of Wisconsin, and who is now a member and secretary of the board of trustees of the Sioux City public library. They have four children: Ethel Rose, born August 8, 1888; Henry Sterling, born July 21, 1890; Paul Schuster, born June 9, 1895, and Arthur Chandler, born August 31, 1899. Mrs. Taylor is a sister of Prof. Otto J. Schuster, '86, principal of the Neenah high school.

THE SCHOOL OF PHARMACY.

About a year ago, Dr. R. H. True, who for several years was professor of pharmacognosy at the university, accepted a position with the U. S. department of agriculture. That he did not lose his interest in pharmacognosy has become apparent from his appointment as physiologist in charge of the new work taken up by the department on drugs and medicinal plants. The cultivation of some of the more important medicinal plants was tried last summer in several states, also different methods of curing the drugs. With the increase of knowledge of therapeutically important constituents of drugs, these are being judged less than formerly by their appearance and more by the amount of active constituents they contain. In order to test the methods of cultivation and curing an assay of the finished product must be resorted to. For the purpose of assaying the drugs already obtained and for future chemical work, the department has more recently engaged the services of W. O. Richtmann, U. W. '97, who has been instructor in pharmacognosy at the university for the last two years.

R. H. Denniston, U. W., '00, who for several years has been an assistant in pharmacognosy and curator of the drug cabinet, has been advanced and now has charge of the lectures as well as of the botanical laboratory instruction. The chemical work in pharmacognosy will hereafter be given in connection with pharmaceutical chemistry, A. E. Kundert, Ph. G. '01, having been appointed assistant to Professor Kremers for this purpose.

Professor L. S. Cheney, who has been connected with the school since its reorganization in 1892, has been given a leave of absence until the Christmas recess on account of ill health. His pharmaceutical work is being looked after temporarily by Mr. Denniston, who, as a result, is very much burdened with instruc-

tional work. Prof. Cheney's courses on trees, etc., also the course in Vegetable Materials of Commerce, which he was expected to give this year to commerce students, had to be dropped since there is no one available who can give these courses.

Dr. O. Schriener, like Mr. Richtmann of the class of '97, who has been instructor in pharmaceutical technique for several years past, has also accepted a position as chemist in the U. S. department of agriculture at Washington. His work there will lie in the field of soil analysis with special reference to the improvement of present methods. He is expected to remain in Madison until Nov. 1, or possibly longer. As yet no provision has been made to replace him.

Especially since the establishment of the four-years' course, the school has supplied a number of chemists to pharmaceutical manufacturing establishments and other works in which the services of a chemist are needed. Unfortunately, however, it has not been able to meet the demands for persons who combine a knowledge of the pharmaceutical sciences and of the art of pharmacy with a liberal college education. The University of Wisconsin was the first to offer a four years' pharmacy course and all of its graduates occupy positions of respectability.

EDWARD KREMERS.

HIGHER DEGREES IN ECONOMICS.

Following is a list of students who have taken advanced degrees with work in Economics, and also of fellows in Economics in the University of Wisconsin, during the decade 1892-1902, with present occupation and place of residence.

[NOTE.—It will be regarded as a favor if any corrections which

should be made in this list are sent to Professor Ely, Director of the School of Economics and Political Science.]

Ph. D.'s in Economics.

Mrs. Helen Page Bates, 1896. Assistant Sociology Librarian, State Library, Albany, N. Y.

- Chas. J. Bullock, 1895. Assistant Professor of Economics, Williams College, Williamstown, Mass.
- A. G. Fradenburgh, 1894. Associate Professor of History, Adelphi College, Brooklyn, N. Y.
- James H. Hamilton, 1896. Professor of Sociology, Syracuse University, Syracuse, N. Y.
- B. H. Hibbard, 1902. Instructor in Economics, Iowa State Agricultural College, Ames, Iowa.
- Gensamro S. Ishikawa, 1901. Public Service, Japan.
- A. E. Jenks, 1899. Assistant Ethnologist, Bureau of Ethnology, Washington, D. C.
- E. D. Jones, 1895. Assistant Professor of Commerce & Industry, University of Michigan, Ann Arbor, Mich.
- David Kinley, 1893. Professor of Economics and Dean of College of Literature and Arts, University of Illinois, Urbana, Ill.
- D. O. Kinsman, 1900. Professor of General History, Civics, Economics, Whitewater Normal School, Whitewater, Wis.
- B. H. Meyer, 1897. Professor of Institutes of Commerce, University of Wisconsin.
- H. H. Powers, 1896. Assistant Professor of Political Science, (until June, 1902), Cornell University, Ithaca, N. Y.
- Margaret A. Schaffner, 1902. Instructor in Economics and Sociology, University of Iowa, Iowa City, Iowa.
- Massasada Shiozawa, 1900. Instructor-elect, Waseda University, Tokyo, Japan.
- H. H. Swain, 1897. President State Normal School, Dillon, Montana.
- H. C. Taylor, 1902. Instructor in Commerce, University of Wisconsin.
- T. K. Urdahl, 1897. Professor of Political and Social Science, Colorado College, Colorado Springs, Colo.
- George Ray Wicker, 1900. Instructor in Economics, Dartmouth College, Hanover, N. H.
- Allyn A. Young, 1902. Instructor in Economics, Western Reserve University, Cleveland, Ohio.
- Ph. D.'s with Economics, 1st Minor.*
- Miss Kate A. Everest, 1893. Head Resident, Kigsley House Association, Philadelphia, Pa., until 1896. Since 1896—Mrs. E. R. Levi, Wilkinsburg, Pa.
- O. G. Libby, 1895. Professor of History, University of North Dakota, Grand Forks, N. D.
- Chas. McCarthy, 1901. Legislative Librarian, Madison, Wis.
- John Bell Sanborn, 1899. Attorney (Sanborn, Luse & Powell), Madison, Wis.
- S. E. Sparling, 1896. Assistant Professor of Political Science, University of Wisconsin.
- Ph. D.'s with Economics, 2d Minor.*
- George H. Alden, 1896. Professor of History, Cornell College, Mt. Vernon, Iowa.
- Louise P. Kellogg, 1901. Wisconsin State Historical Library, Madison, Wis.
- P. S. Reinsch, 1893. Professor of Political Science, University of Wisconsin.
- Lottie Pengra, 1901. Teacher, Elgin, Ill.
- Master's Degrees in Economics.*
- W. M. Balch, M. L., 1896. Fairbury, Neb. (Clergyman.)

- James E. Barbour, M. A., 1896. Fellow 1892-93. Assistant Professor of Political Economy, Amherst College, Amherst, Mass.
- Portland, Ore. (Clergyman.)
- Roscoe A. Barnes, M. S., 1895. Harvard, Neb. (Clergyman.)
- M. B. Hammond, M. L., 1893. (Ph. D. Columbia.) Assistant Professor of Economics, University of Illinois, Urbana, Ill.
- L. W. Hatch, M. A., 1893. Statistician, N. Y. Department of Labor, Albany, N. Y.
- Gasaburo Ishikubo, M. L., 1898. Yokohama Branch of the One Hundredth Bank, Yokohama, Japan.
- Carl Bernard Stroever, M. A., 1894. 1100 The Temple, Chicago, Ill.
- Jas. E. Hagerty (Ph. D. Pennsylvania), Fellow (honorary) 1897-98. Assistant Professor of Economics and Sociology, Ohio State University, Columbus, Ohio.
- Jas. H. Hamilton, Fellow (honorary) 1895-96. (See list of Ph. D.'s.)
- Alden E. Henry, Fellow 1899-1900. Harvard Law School.
- B. H. Hibbard, Fellow (Milwaukee Social Settlement) 1901-02. (See list of Ph. D.'s.)
- C. M. Hubbard, Fellow 1893-94. Secretary Associated Charities, Cincinnati, Ohio.

Master's Degree, Economics, 1st Minor.

- J. A. Doremus, M. A., 1897. Principal and Instructor in Mathematics, Gates Academy, Neligh, Neb.
- Georgine Zetelle Fraser, M. L., 1898. The Miss Wolcott School, Denver, Colo.
- Edmond S. Meany, M. L., 1901. Professor of History, University of Washington, Seattle, Wash.
- Mrs. Josephine Hunt Raymond, M. L., 1897. Chicago, Ill.
- W. S. Robertson, M. L., 1900. Fellow in Economics, Yale University, New Haven, Conn.
- A. E. Jenks, Fellow (honorary) 1898-99. (See list of Ph. D.'s.)
- David Kinley, Fellow 1892-93. (See list of Ph. D.'s.)
- D. O. Kinsman, Fellow (honorary) 1899-1900. (See list of Ph. D.'s.)
- B. H. Meyer, Fellow (honorary) 1895-96, 1896-97. (See list of Ph. D.'s.)
- T. W. Mitchell, Fellow 1901-02. Assistant Instructor in Economics and Statistics, University of Iowa, Iowa City, Iowa.
- A. A. Munro, Fellow (honorary) 1900-01. Teacher, New York City.

Fellows in Economics, 1892-1902.

- Mrs. Helen Page Bates, Fellow 1895-96. (For present position see list of Ph. D.'s.)
- James A. Beauchamp, Fellow (honorary) 1895-96. President, Liberty Ladies College, Liberty, Mo.
- Charles J. Bullock, Fellow, 1894-95. (See list of Ph. D.'s.)
- J. W. Crook (Ph. D. Columbia),
- Rosa M. Purdue, Fellow (honorary) 1901-02. Chicago Social Settlement, Chicago, Ill.
- Mary Sabin, Rockford College Fellowship 1896-97. Rockford College, Rockford, Ill.
- Y. Sakagami, Fellow (honorary) 1900-01. Graduate Student University of Wisconsin.
- Margaret A. Schaffner, Fellow 1900-01. Fellow Chicago Social Set-

tlement 1901-02. (See list of Ph. D.'s.)

Massasada Shiozawa, Fellowship (Japanese) 1896-97. Fellowship (honorary) 1897-98, 1898-99. (See list of Ph. D.'s.)

H. H. Swain, Fellow 1893-94. Fellow (honorary) 1895-96. (See list of Ph. D.'s.)

H. C. Taylor, Fellow 1898-99. (See list of Ph. D.'s.)

N. A. Weston, Fellow 1897-98. Instructor in Economics, University of Illinois, Urbana, Ill.

A. A. Young, Fellow 1900-01. (See list of Ph. D.'s.)

IN FACULTY CIRCLES.

CHANGES IN FACULTY.

Through resignations and additions by the regents many changes have occurred in the instructional force at the university since last year. Dr. E. A. Birge, who has so ably and satisfactorily filled the place of head of the institution since the retirement of Dr. C. K. Adams, was continued as such for another year by the board of regents at its summer meeting.

An important election was that of Prof. Frederick E. Turneaure, who has been chosen acting dean to take the place of Dean J. B. Johnson of the engineering school. Professor Turneaure was professor of bridge and sanitary engineering last year.

Attorney Eugene A. Gilmore of Boston, Harvard '99, will succeed Assistant Professor A. A. Bruce, who resigned to become the head of the law department of the University of North Dakota.

Assemblyman E. Ray Stevens was elected as special lecturer in criminal law and will lecture one hour a week.

C. K. Leith has been elected assistant professor of geology for one year, on the understanding that he is to give only part of his time to instruction, as he retains his position on the United States geological survey.

Dr. Harrison E. Patton will be instructor in chemistry to succeed Dr. Schlundt, who resigned to go to the University of Missouri.

Dr. Ulrich B. Phillips has been appointed instructor in history in place of Dr. O. G. Libby, who has gone to the University of North Dakota.

Max O. Lorenz will be assistant in economics to succeed Dr. A. A. Young, who has gone to Western Reserve University.

C. J. O'Connor has been appointed assistant in Latin, and takes the place of Miss Katherine Allen, who will spend the year in Europe.

George A. Olson has been appointed assistant chemist in the college of agriculture.

W. D. Patten, A. H. Smith, and E. B. Hutchins, Jr., will be assistants in chemistry.

W. H. Kelley, M. F. Angell, and E. M. Terry have been appointed assistants in physics.

August Hyllested, the famous Scandinavian pianist, who was connected with the university school of music last year, has cancelled his contract with the university and will remain in Chicago, giving his energies to concert work and to teaching. His retirement from the school of music was wholly voluntary.

Professor Alfred Vivian, assistant chemist at the university experiment station, has resigned his position at Wisconsin to become associate professor in the college of agriculture in Columbus, Ohio.

The following persons have been appointed instructors in the school of music: Maud M. Fowler, Alice S. Regan, piano; Genevieve Smith, voice.

Halsten J. B. Thorkelson, formerly assistant superintendent of the J. I. Case plow works at Racine, has been elected instructor in steam engineering.

Emil P. Sandsten, formerly associate professor of horticulture in Maryland agricultural college, has been chosen to the same position at the university to succeed Professor E. S. Goff, who died last June.

ABSENTEES AND SOJOURNERS.

Professor B. W. Snow is now in Europe but will be back in time to resume his work at the opening of the second semester.

Professor E. K. J. H. Voss has been granted a year's leave of absence which he will devote chiefly to study in Germany.

Miss Katherine Allen has also been granted a year's leave. She expects to spend most of her time studying in Rome.

Assistant Professor A. W. Tressler spent the summer in Europe and represented the university at the 300th anniversary of the establishment of the Bodleian library at Oxford.

Professor J. C. Freeman has returned to take up his work in the English department, after three years' absence in Europe. Professor Freeman has been United States consul at Copenhagen for the last two years.

Professor Julius E. Olson spent the summer in Scandinavia.

Professor Arthur Beatty spent his vacation abroad.

Professor Lucy M. Gay spent the summer in study and travel in France.

Miss Elsbeth Veerhusen, of the German department, who spent a year in Germany, returned last summer.

Professor and Mrs. Howard L. Smith enjoyed a vacation abroad during the summer.

Professor W. B. Cairns, who went to Europe in the summer, will be absent until the opening of the next semester.

Professor P. S. Reinsch spent most of the summer in study in France and England.

Prof. W. H. Hobbs spent the summer in geological work in the east.

NOTES OF THE FACULTY.

Professor R. A. Moore spent a month visiting the state and county fairs with an exhibit consisting of actual work performed by students,

enlarged photographs of the buildings and students at work and the class rooms.

Professor William A. Scott, director of the school of commerce, made a lecture tour through some of the largest cities of the west, presenting his new lecture on the Economic Formation of Society.

Dean W. A. Henry delivered a course of lectures at the University of California summer school the past season. While there he visited Mrs. Charles Kendall Adams at her home in Redlands.

The following resolutions on the death of Dean J. B. Johnson were adopted at a meeting of the Wisconsin alumni association of the University of Michigan at a meeting in Milwaukee last summer.

"The members of the Western Alumni Association of the University of Michigan desire to express their sorrow at the untimely death of one of its distinguished members, Dean John B. Johnson of the University of Wisconsin.

"Professor Johnson, as a student at the University of Michigan, was one of the most diligent of his class. Later, while teaching at the Washington University, he established for himself a national reputation as an author and as an authority on engineering. In 1898 he was called to the position of dean of the department of mechanics and engineering at the University of Wisconsin. He showed in this position great energy and ability, as a result of which the State of Wisconsin is proud of a fine structure for the college of engineering, and of its organization of a department for the study of engineering

which is one of the strongest in the country.

"We lament the loss to the profession which he adorned, to the university for which he was such a loyal and enthusiastic worker, and to our association of which he was an honored member. We especially lament the irreparable loss to his family, to which he was so devoted, and we extend to them our sincere sympathy in the loss they have sustained."

A memorial meeting, in honor of Dean Johnson, was held in the auditorium of the engineering building Thursday evening, Oct. 10, under the auspices of the J. B. Johnson engineering association. The meeting was largely attended by the friends of the late dean. Prof. Turneaure was the speaker of the evening and gave a touching eulogy on the life of Dean Johnson. At the close of the meeting appropriate resolutions were adopted.

The following resolutions were passed at the state conference of Unitarian churches held at Kenosha last summer:

"Resolved, that the conference expresses its regard for the high character and manly worth of its late president, Dean John Butler Johnson. He showed what is best in liberal Christianity, intelligent, active, public spirited, unselfish, clean, devout. We lament his death in the prime of his powers."

The University of Wisconsin was represented at inaugural ceremonies of three college presidents last week. These colleges include Princeton, Northwestern University and the University of Kansas. Acting President E. A. Birge and Professor

John C. Freeman represented the university at the installation of Edmund J. James as president of Northwestern University. Professor Charles R. Van Hise attended as representative of the National Academy of Science, Professor Charles S. Slichter represented the Wisconsin Academy of Science, and Professor Edward Kremers the pharmaceutical department. Acting President Birge was at the installation of Woodrow Wilson as president of Princeton University, Oct. 25. Professor Frederick J. Turner was present at the installation of Professor Frank Strong, the new chancellor of Kansas University.

Dr. Benjamin Szold, father of Mrs. Joseph Jastrow, died at Berkeley Springs, W. Va., July 31, aged 73. He was a prominent rabbi of Baltimore and a writer of national reputation. One of his principal works was a prayer book prepared in collaboration with Dr. M. Jastrow of Philadelphia.

Dean W. A. Henry, Professor A.

R. Whitson, of the agricultural college were in Washington, D. C., recently, where they were called by A. C. Calls, director of agricultural experiment stations. After a visit of several days in Washington they went to Atlanta, where they attended the meeting of the national association of agricultural colleges.

Edwin M. Maxey, fellow, has a creditable article on the Anglo-Japanese treaty in the August Arena. Professor M. V. O'Shea delivered a series of lectures in the west the past summer.

Mrs. J. B. Johnson and family will occupy the new house which Professor Johnson began on North Henry street in Madison.

Professor R. A. Moore, agriculturist at the experiment station, took a course in agronomy at the Ohio State University last summer.

Professor and Mrs. L. W. Dowling spent six weeks at the home of Professor Dowling's mother in Adrian, Mich.

ATHLETICS.

Views of a Coach.

Notwithstanding the pretty general belief to the contrary, the prospects for a championship team at Wisconsin, were at the beginning of the season anything but promising. It is true that we lost but four men, but no one at Wisconsin needs to be told that the filling of places left vacant by Curtis, Larson, Cochems and Marshall is no

light task. Material seemed fairly plentiful, but the new men were light in weight and sadly lacking in the great essential of experience. To further embarrass the team there was a general decline instead of an increase in the number of candidates so that it has been often a matter of some difficulty to fill out the second eleven.

This present season has been also the banner year for accidents.

Football luck, or perhaps more truthfully the wretched condition of the practice ground at Camp Randall, coupled with the fact that the preparation of the team had to be hurried in order to get them into condition for their early game with Michigan brought on injuries and sorenesses that kept a number of the men out of nearly every lineup. Driver, Juneau and Moffatt have done but little practice so far. Long and Liljequist, Findlay and Remp have spent a great deal of time on the side lines to stand the bruising game with Michigan on November 1. Of the old men Skow, Lerum, Abbott and Haumerson will retain their old positions in the line. Captain Juneau has been shifted from his place at end and is at present filling one of the vacant positions in the back field. Fogg, who was injured early in the season last year is filling the quarterback position very satisfactorily. Driver is finally rounding into condition and barring further mishap will be back. Vanderborm who is showing found in his old position as full-up better every day will probably

COACH PHIL KING.

The result of this series of misfortunes is that it has been extremely difficult to place the men and there has been more shifting than King was ever before known to have done. The fact that the men are in as good condition at the present writing as they are speaks volumes for the capability and tireless efforts of O'Dea. While their condition is far from perfect, it is hoped that the coming week will see them round to and become fit

J. P. RIORDAN,
Assistant Coach.

obtain the other back field position. Should Driver be unable to play Vanderborm will probably be moved to fullback, and Moffatt, Liljequist and Marsh will fight it out for the other position. Of the remaining positions Busch and Findlay seem to be the strongest candidates for Captain Juneau's end, while Bertke and Long seem to have first choice on the vacant guard and tackle positions, respectively, although Millman and Eiberts, two big freshmen, seem to be

going to give some one a fight for the vacant left guard. Both are big men and hard workers, although at present inclined to be slow.

Considerable of the practice work has been done in secret, and this seems to have called down criticism on Mr. King. It is claimed that it is dampening to the order of a football enthusiast not to be allowed to see the daily practice. Whatever may be the effect on the followers of the game—the exigen-

C. H. KILPATRICK,
Graduate Manager.

cies of the schedule, the hardest that a Wisconsin team has ever been called upon to play, demand that every effort possible must be made to bring home victory. If secret practice will inure to the benefit of the team, and it undoubtedly will, then practice must be secret, even though the followers be denied some pleasure. It is to be observed that little if any of the criticism of secret practice comes from the alumni or student body.

The students and those of the alumni who have kept in touch with methods, have in Mr. King a blind and unquestioning faith, born of his earnest and single-hearted efforts as a coach. If in his judgment secret practice is necessary, they will cheerfully abide by it, for they have faith that in the future as in the past, results will show that his judgment is correct.

JERRY P. RIORDAN.

Football Games so Far.

Following is the schedule of games for the football season of 1902:

Sept. 27.....Lawrence at Madison
Oct. 4.....Hyde Park at Madison
Oct. 11.....Lawrence at Madison
Oct. 18.....Beloit at Milwaukee
Oct. 25.....Kansas at Madison
Nov. 1.....Michigan at Chicago
Nov. 8..Northwestern at Madison
Nov. 15..Minnesota at Minneapolis
Nov. 27.....Chicago at Chicago

The football season was inaugurated Sept. 27th with a game in ankle-deep mud with Lawrence at Camp Randall. The visitors from Appleton had been prepared for the contest by the former Beloit star, Ed. Merrill, and the 'varsity was yet, so to speak, "all scrubs." But two touchdowns were made against the up-state Methodists and the after-kick of one of these was missed, making the final score 11 to 0 in favor of the State University players. But short halves were played and the score would have been much higher had the regulation time been played.

A week later, Oct. 4, Hyde Park and disaster, but not defeat, came

with the plucky high school team from Hyde Park, Ill. The youngsters from the Chicago suburb, who are as heavy and probably better coached than are most minor college teams, delivered a class of play better than was expected and they deserve credit for the score they made, although immediately it was made on a mistake or "fluke," for they carried the ball to within striking distance of the badger goal and in attempting a drop kick, the ball was sent rolling, a Hyde Park player secured it and landed it safely in the counting place after a clever scurry around the bunch of players over the goal line. The final score was 24 to 5.

For Oct. 11 a game had been scheduled with the Milwaukee Medical college team, but the latter could not come and a second contest was secured with Lawrence. A dry field brought better results than the former contest, and the score of 52 to 0 was rolled up in favor of the home team.

The first hard game of the season was that with the most generous and time-honored rival, Beloit, the contest taking place in Milwaukee Oct. 18, before a crowd of some 3,000 spectators. Although a creditable score of points was made against the representatives of the line city college, the badger goal line was crossed for the second time of the season. This time it was through no "fluke" or misfortune. The Congregationalists successfully executed an old and supposedly worthless trick play, known as a delayed pass, for a substantial gain, and a moment later for a long run resulting in a touchdown. Wisconsin evened things by making a total

score of 52 points, but these hardly offset the 6 secured by the trick play.

Arthur Curtis, last year captain of the 'varsity and for four years a member of the team, in which time he made the name of being the greatest tackle the University team ever had, came with the University of Kansas team, of which he is coach, on Oct. 25. A year ago the westerners were defeated by Wisconsin by the score of 50 to 0, but with Curtis as coach such improvement was made that the score was held down to 38 to 0 in favor of the badgers.

The game with Michigan, played at Marshall field, Chicago, Nov. 1, before over 20,000 people, was the athletic event of the season so far, and resulted in 6 to 0 in Michigan's favor. The only touchdown of the Wolverines was made after the after the first five minutes of play. After that the Badgers showed their powerful defense, once holding for downs when the ball was on their three-yard line, but were unable to wrest a victory.

The game was preceded by a banquet at the Victoria hotel to the football team by the Chicago alumni. Covers were laid for 200 but nearly twice that number presented themselves. Ringing speeches were made by ex-President T. C. Chamberlain, Coach Phil King, Prof. D. C. Jackson, Prof. J. J. A. Pyre, and many of the alumni. The Chicago alumni association was also reorganized under the name of the University of Wisconsin Club of Chicago, with the following officers:

President—George E. Waldo, '85.
Vice-President — Judge A. H. Chetlain, '70.

Secretary Treas.—O. W. Ray, '78.

ELECTIONS.

At the meeting of the athletic board H. B. Werder, '03, who was vice commodore of the crew last year, was elected commodore in

place of L. S. Bergstrom, '02. Herbert Lindsay, '05, was elected manager of the basketball team, Emil Haumerson, '05, manager of the baseball team, and Jack H. Friend, '03, for the track team. A manager for the tennis team as well as the several assistant managers will be elected at the next meeting. W. F. Moffatt, '02, A. C. Lerum, '03, and G. R. Keachie, '03, were elected to fill the vacancies on the board.

TRAINING TABLE.

A regular training table for athletes has been opened at 701 Langdon street, under an entirely new plan. The table will be maintained by the athletic association, and will be kept running continuously for the college year. After the football season is over the table will be run for the crew and the track team. The athletes who desire to do so will be permitted to board at the house when not in active training, and it is expected that enough will take advantage of the opportunity to make it pay to run the table all the year.

IN CREW CIRCLES.

The prospects for the 'varsity crew seem to be fair, all the old men returning with the exception of Lounsbury and Palmer. Thus only two new positions are left to be filled in the 'varsity boat. This will not be a difficult thing to do as the number of applicants is large and the material good. So far some forty freshmen have handed in their names as candidates for the freshman crew. These have been divided up into squads and indoor training will commence short-

ly. The men will be coached on the machines by the old 'varsity men for the present. Later in the fall if the weather permits one or two crews will go out on the water.

GYM. WORK POPULAR.

This year the registration at the gymnasium has been unusually large. Over 700 have registered, and the demand for lockers has been so great that it will be necessary to take out one of the bowling alleys and put in about 250 new lockers. These will be of entirely new pattern. Instead of wooden boxes they will be made completely of steel net work. Earl Wells, who assisted Dr. J. C. Elsom last year, has accepted a position as physical director at Huron, S. D. Warren Bishop has been appointed in his place. Dr. Elsom will be assisted this year by Harry E. Bradley, Warren Bishop, William A. Lee, office clerk, and Harold S. Peterson, pianist and assistant. The musical accompaniment for the gymnastic drills, inaugurated last year, proved to be so much of a help that it will be continued.

WATER POLO TEAM.

A movement is on foot for organizing a water polo team at the university, something practically new in western colleges.

CAN HAVE CALLIOPE.

B. B. Clarke, editor of the American Thresherman, of Madison, has consented to give the use of his new steam calliope at any particular jollification held by the students, especially at prominent football games and affairs of that kind.

PROGRESS OF THE UNIVERSITY.

JOINT DEBATE.

The joint debate between Athenæ and Philomathia will in all probability be held Friday evening December 12. The question to be discussed was submitted by the members of the Philomathia team, and reads:

"Is the present concentration of vast aggregations of capital in the United States in single private manufacturing corporations inimical to public welfare?"

"Interpretations: (a) Single private manufacturing corporations shall not include those operating under franchise by municipal corporations. (b) Manufacturing means the process, or one of the processes, of converting raw material into the finished product."

The Athenæan team will put forth the negative argument of the question. Those representing Athenæ in this contest are Loren D. Blackman, '04; Edgar J. McEachron, '04, and Ira O. Hubbard, '03. The Philomathian delegation comprises Eben R. Minahan, Voyta Wrabetz and Paul A. Schuette, all seniors.

A WOMAN'S BUILDING.

A project is on foot for the erection of a new university building, to be called the woman's building. While the plans are still vague it may be said that the building as projected will be a woman's club house, with all the furnishings for an up-to-date building of its kind.

At a mass meeting of the university women the matter was thoroughly discussed, and steps taken looking toward raising the required funds.

SCIENCE HALL IMPROVEMENTS.

To enlarge the facilities for work in the pre-medical course, a cold storage plant, consisting of a preparation room, a room for the condensers and pump and one for a five ton ammonia cooling plant is being built at the west of science hall. These rooms will be secluded entirely below ground, the only entrance being from the tower of science hall, in which will be placed an elevator to communicate with the attic. The three rooms below ground will be thoroughly ventilated and lighted by electricity, and will contain the latest and most improved facilities for the handling and keeping of subjects. In the science hall attic will be built a general work room, a room for the preparation of specimens, eight dissecting rooms and four research laboratories and store-rooms. The present literary society room will be used as the large lecture room for human physiology.

The course in botany under Dr. Harper will also be greatly improved by the construction of a greenhouse or conservatory, embracing the entire south attic.

CHADBOURNE HALL CHANGES.

Chadbourne hall underwent a number of changes during the sum-

mer. New improvements in the management of the kitchen and serving room were made after plans suggested by the new matron, Miss Crowe. Out of the 102 women students who will room in the eighty apartments of the hall, sixty-six are freshmen girls, only thirty-four, or one-third of the entire number, being former students at the university and previous hall girls. Every room is engaged, and a number of applicants have had to be refused for want of accommodation.

TRIPS FOR MUSICAL CLUBS.

The university glee and mandolin clubs will make their trip throughout the state soon after the Christmas recess. The points probable to be touched during the long trip will be Milwaukee, Fond du Lac, Appleton, Green Bay, Marinette, Sheboygan, Manitowoc, Racine, Kenosha, Sparta, La Crosse and Elgin, Ill. The cities to be made by short Friday night trips are: Whitewater, Portage and Ft. Atkinson. The make-up of the glee club is as follows:

First tenors: J. F. Graber, R. E. Bolte, C. A. Hoefler, F. Arnold; second tenors; A. J. Fiske, W. T. Moseley, H. S. Stronach, C. Watrons; first basses: S. E. Washburn (leader), Allan Pray, C. H. Gaffin, N. B. Nichols, S. I. Gilpatrick; second basses: W. G. Hamilton, R. T. Conger, Claude Luse, W. L. Davis. John C. Miller is the manager of both clubs. The members of the mandolin club are: First mandolins: Chas. Bigelow, Paul Rogers, Webber Russell, H. C. Parker, W. J. Rowe, G. R. Gove (leader); second mandolins: Ralph

McCrossen, D. S. Law, W. J. Benedict, E. A. Moritz, B. F. Adams, George Peckham; mandola: Isaac Goodman; guitars: S. E. Elmore, Edward Wray, S. Andrews, A. J. Rhodes, J. Allen, Bert Lindsay; violin, L. Parks; cello, Chas. A. Urner; viola, A. B. Smith; flute, Geo. Bigelow.

ALL-UNIVERSITY CLUB HOUSE.

Good results are reported from those engaged in canvassing the state during the summer in behalf of the all-university club house. Those engaged to do this work by the directors were Paul C. Foster, F. O. Leiser, D. G. Grover, all of the class of 1902, and C. O. Hubbard, '00. The work during the summer has been under the direction of G. S. Phelps, who is devoting all his time in this new project. They secured pledges for \$5,000. This makes the amount definitely pledged up to date about \$25,000. The work of continuing the canvass of the state has been assumed by Mr. Leiser.

ANNUAL CLASS RUSH.

The annual sophomore-freshman class rush followed the first meeting of the freshmen class for gymnastic drill and was the usual exciting affair. Several members of each class were given a chilly bath in Lake Mendota. The freshmen through superiority in numbers had perhaps the better of the struggle, and with their slogan, "Hit 'em with bricks! Hit 'em with bricks! U. W. 1906!" they took a triumphal march up town and around the capitol square, each helping himself to a brick on the

way from a pile in the street. A great struggle raged on the roof of the boathouse over which flag should fly there. That of 1906 was the last to remain but was discreetly taken down by the victors before dark.

CHARITY BALL.

The annual charity ball of the Attic Angels, which is a social event of much interest to the university, will be held Friday, November 7, in the university armory. The decorating committee consists of Misses Eleanor Wilson, Frances Main, Elsie Stevens, Bird Morrison, Martha Pound and Amy Young. The supper committee is Misses Clara McConnell, Ethel Raymer, Leta Harvey and Eleanor Bardeen. The committee on arrangements is composed of Misses Elizabeth Mills, Caryl Fairchild, Helen Palmer, Ann Regan and Charlotte Freeman.

The committees are as follows:

Decoration—Chairman, Miss Eleanor Wilson, Misses Bird Morrison, Martha Pound, Elsie Stevens, Caryl Fairchild, Frances Main.

Floor—Hereford White, Sigma Chi fraternity; Richard Hollen, Alpha Delta Phi; Morris Fox, Psi Upsilon; Isaac Dahle, Delta Tau Delta; William A. Walters, Kappa Sigma; Rex Welton, Sigma Nu, Irving Seaman, Chi Psi; Kenneth Tanner, Phi Delta Theta; Harry Janes, Phi Phi Phi; Harry W. Page, Phi Kappa Sigma; Henry Lea, Phi Kappa Psi; Irving Fish, Psi Upsilon; Samuel E. Elmore, Beta Theta Pi; Wallace Benedict, Delta Upsilon; Charles Riley and Edward Gernon.

Patronesses—Mesdames Joseph Jastrow, A. H. Main, J. W. Hobbins, J. B. Parkinson, W. H. Morrison, Lucius Fairchild, J. H. Palmer, Hugh Pound, C. V. Bardeen, E. M. Fuller, Geo. Raymer, L. D. Harvey, R. M. Bashford, S. H. Marshall, Albert G. Schmedeman, John C. Spooner, Wayne Ramsay, Magnus Swenson, B. J. Stevens.

CARDINAL STAFF.

The following is the staff of the Daily Cardinal for the year:

Editor-in-chief, W. F. Moffatt, law '05; managing editor, H. J. Masters, law '04; Assistant managing editor, W. E. Brindley, '03; university editor, E. W. Landt, '04; assistant university editor, J. T. Flint, '03; exchange editor, J. J. Moffatt, '05; high school editor, E. A. Edwards, '04.

Associate editors, Robert M. Davis, law '05; Gaius S. Woledge, '04; Charles S. Pearce, law '03; John C. Miller, law '05; Irving Seaman, '03; James G. McFarland, law '04.

Reporters, Harry Ross, '06; R. J. Neckerman, '05; Frank Newton, '06; W. F. Kelsey, '04; Rolf Falk, '06; Zellie Rice, law '04; Stanley Latshaw, '06; Herman Canfield, '06; Lucie Case, '04, Chadbourne hall; business manager, Richard H. Hollen, '03.

ENGINEERS ON TRIP.

Twenty-four students from the senior engineering class, accompanied by Professors Victor B. Swenson, John G. D. Mack, Arthur W. Richter and Assistant C. P. Shaad, left for Niagara Falls last week to study the great transmission plant there.

SPHINX STAFF.

The Sphinx staff for the year is as follows:

Harry C. Johnson, '03, editor-in-chief; Arthur B. Braley, '04, managing editor; Harry Gardner, '04, managing artist; Herbert F. John, '03, business editor; Clara T. Froelich, '03; Ralph B. Ellis, '05; Alletta F. Dean, '03; Floyd Naramore, '04; H. G. Winslow, '04; L. F. Van Hagen, '04; J. E. Boynton, '05.

PHILOMATHIA TO MOVE.

In order to make room in science hall for the pre-medical course rooms to be established during the present year, the Philomathian society will have to move their quarters. Although it has not been definitely decided, it is quite probable the society will use a room in the state historical library.

GREEKS IN NEW HOMES.

Several changes in quarters have been made by fraternities and sororities since last year.

Phi Kappa Sigma, which was organized last year with quarters on Frances street, has moved into the new house at 619 Langdon street, formerly occupied by Professor Scott.

The Phi Phi Phis, who occupied the old Kappa Kappa Gamma house at Langdon and North Henry streets last year, have moved into new quarters on Lake street, next to the Phi Delta Theta house.

Chi Omega will have the house at 723 State street, between Lake and Murray streets.

Sigma Nu, which was organized

last year, has moved to the old Phi Gamma Delta house at 613 Frances street.

NEW AGRICULTURAL HALL.

A notable addition to the buildings of the university will be the new agricultural hall, situated between Washburn observatory and the dairy building. It will be ready for occupancy by new year's. It is 64 feet wide by 200 feet long, three stories in height and will cost \$150,000 when completed. The structure is built of orange-colored brick with trimmings of Bedford stone. The roof will be covered with an asphalt roofing which will be tapped by red Spanish tile. The north side of the building has an octagonal annex which is to be used for auditorium and library purposes.

PROM. COMMITTEE.

The president of the junior class has appointed the twenty members of the 1903 prom committee. Each fraternity has a representation on the committee and five more appointed to represent the non-fraternity element of the class. The date has not been set for the prom nor have the sub-committees been appointed as yet. The committee as appointed is as follows:

William B. Uihlein, Milwaukee, Chi Psi.

Wallace J. Benedict, Milwaukee, Delta Upsilon.

Isaac J. Dahle, Mt. Horeb, Delta Tau Delta.

Kenneth B. Tanner, Kaukauna, Phi Delta Theta.

Marshall H. Jackson, Oak Park, Ill., Beta Theta Pi.

Charles W. Hagen, Chicago, Phi Kappa Psi.

Roy P. Staver, Chicago, Sigma Chi. Martha Prien, Rockford, Ill., Selina Anderson, Racine.

Hal E. Martin, Fond du Lac, Phi Gamma Delta.

Eden W. Drake, Jr., Milwaukee, Theta Delta Chi.

Walter H. Thom, Madison, Psi Upsilon.

Gaius S. Woledge, Antigo, Alpha Delta Phi.

Earl V. McComb, Brillion, Kappa Sigma.

Fred V. Carrico, Rockford, Ill., Phi Kappa Sigma.

Albert G. Hinn, Fennimore, Sigma Nu.

William B. Bennett, Mineral Point, Phi Phi Phi.

Arthur F. Krippner, Ft. Atkinson.

Raymond T. Conger, Elgin, Ill.

Gustav C. Kahn, Milwaukee.

William Earl Schreiber, Madison.

Harry W. Stark, Milwaukee.

FRATERNITY MEMBERSHIP.

The rushing season of the various fraternities is now drawing to a close and the list of pledgings is practically completed. The fraternities and sororities have displayed the usual activity in securing new comers to affiliate with their respective organizations.

Following is the list of pledgings as nearly complete as could be obtained:

Phi Gamma Delta.

W. H. Smith, Baltimore, Md.; John M. Detling, Sheboygan; C. D. Purple, Arcadia; W. D. Bird, Madison; J. W. McCrossen, Wausau; W. M. Shorer, Plymouth.

Delta Delta Delta.

Rowena Whittier, Boston, Mass.;

Phi Delta Theta.

Walter Sleet, Waukesha; Earl Rose, Milwaukee; Ward Blake, Winoona, Minn.; Tom Leahy, Platteville; Marco Arnold, Evanston, Ill.; Colbern Allen, Indianapolis; George Peckham, Milwaukee, Wis.; Curtis Osborne, Indianapolis, Ind.; Ralph Frawley, Merrill, Wis.; Ed. Leahy, Marion, Iowa.

Kappa Sigma.

Paul Schule, Chicago; Elmer Falk, Stoughton, Ralph Falk, Stoughton; Herman Canfield, Sparta; Edwin Sackett, Fond du Lac; Ambrose Tarrell, Darlington, Wis.; Charles Boardmen, Des Moines, Ia.; Harry Hodgson, Des Moines, Ia.; Joseph Beck, Milwaukee, Wis.

Sigma Chi.

Carl Richards, Platteville; Milton Wright, New London; Ray Smith, Milwaukee; Leonard Broenniman, Watertown, Wis.; Irving Bush, Chicago, Ill.

Delta Tau Delta.

Burnard Pease, Richland Center; Peter Fisher, Waukegan, Ill.; Paul M. Grier, Marquette, Mich.; Arthur Schumacher, Chicago; Archer Bernard, St. Joe, Mo.

Phi Kappa Psi.

Charles B. Marsh, Evanston, Ill.; Stanley G. Dunwiddie, Janesville; Charles Leslie, Evanston, Ill.; Douglas Lawrence, Sterling, Ill.; Frank W. Carpenter, Evanston, Ill.

Delta Upsilon.

Lloyd Churchill, Waupaca; Paul Kremer and Paul Watrous, Milwaukee; Francis McLean, Menominee; Wilfred Parker, Milwaukee.

Alpha Phi.

Nannette Birge, Madison; Ella Schmitt, Green Bay; Ortille Mulenach, Chicago; Annabelle Smith, Madison; Eleanor Pineo, Duluth; Bernice Buck, Platteville; Marion Gray, Rhinelander; Bessie Fox, Madison; Lulu Wellman, Madison; Clare Winslow, Madison.

Chi Psi.

Harry Putton, Milwaukee; Harold Falk, Milwaukee; John Wood, Chicago; Arthur Compton, Madison; DeWitte Pool, Madison; Olaf Johnson, Chicago; Kenneth Pray, Stevens Point; Walker Sanborn, Ashland; Oscar Uihlein, Milwaukee; Edgar Jewel, Oshkosh.

Beta Theta Pi.

Cyrus L. Garnett, Chicago; Paul Rogers, Milwaukee; James Silverthorn, Wausau; Thad H. Brindley, La Crosse.

Kappa Kappa Gamma.

Florence Rietow, Sheboygan, Wis.; Barbara Munson, Hazel Belt, Viroqua, Wis.; Bessie Smith, Hinesdale, Ill.; Grace Monroe, Maud Monroe, Baraboo, Wis.; Leonore Falk, Stoughton, Wis.; Bessie Smith, Hinesville, Ill.; Bernice Bannerling, Newport, R. I.; Jessie Johnson, Eau Claire, Wis.; Jessie Corse, Racine, Wis.

Delta Gamma.

Adalaide Miller, Chippewa Falls; Mary Stevens, Rochester, N. Y.; Isabel Cunningham, Chippewa Falls; Madge Laronger, Ashland; Ella Sutherland, Janesville; Louise Merrill, Janesville; Caroline Bull, Racine; Helen Whitney, Evelyn Anderson, Ruth Van Slyke, Josephine Proudfit, Myra Fox, Mary Ander-

son, Gladys Harvey, Margaret Frankenburger and Elizabeth Brown, Lottie Anderson, Lillie Taylor, all of Madison.

Pi Beta Phi.

Edna Ingalls, Ocarte, Ill.; Flavia Fezille, Lodi, Wis.; Emily Holmes, Baldwin, Wis.; Katherine Smith, Spring Valley, Ill.; Agnes Pinkerton, Mazomanie, Wis.; Hildred Moser, Madison, Wis.

Alpha Delta Phi.

Alfred G. Bostedo, Riverford, Ill.; Edward W. Stearns, Madison, Richard Sterling Ely, Philip A. Knowlton, Madison, Wis.

Gamma Phi Beta.

Bernice Hunter, Ft. Atkinson, Wis.; Bernice Dow, Madison, Wis.; Josephine Allen, Lake Geneva, Wis.; Eurette Kimball, Janesville, Wis.; Hattie Ludlow, Monroe, Wis.; Louise Durst, Monroe, Wis.; Agnes Westlake, Madison, Wis.; Jessie Westlake, Madison, Wis.

Phi Kappa Sigma.

Edward T. Carey, Clinton, Ia.; Jent G. Thorne, Clinton, Ia.; George R. Hess, Racine, Wis.; Alfred J. Rhodes, Galesville; Frank A. Newton, Sparta, Wis.

Sigma Nu.

Robert C. Nye, Ogden, Utah; Warren Mead, Plymouth, Wis.; Arthur Hughes, Milwaukee, Wis.; Oscar Espuchee, Milwaukee, Wis.

Phi Phi Phi.

Samuel A. Gilpatrick, Milwaukee, Wis.; Hiram Houghton, Red Oaks, Iowa; Jonathan Houghton, Red Oaks, Iowa; Ernst Jacobson, Hope, N. Dak.

Kappa Alpha Theta.

Grace Wells, Aurora, Ill.; Edith Clark, Monank, Ill.; Edna Clark,

Monank, Ill.; Marjorie Johnson, Madison, Wis.; Florence Srid, Valley City.

Chi Omega.

Jennie Thayer Sprage, Sheboygan, Wis.; Ella Reineking, Sheboygan, Wis.; Jean Porterfield, Marinette, Wis.; Tessa Hickisch, La Crosse, Wis.

Theta Delta Chi.

A. L. Gesell, Alma; Howard Elliott, South Dakota; Geo. Hauer, Madison; Leslie Woodruff, Milwaukee; John Gerlings, Milwaukee; P. L. Pease, Cumberland; Ernest Borchard, Milwaukee; Geo. Humphrey, Grand Rapids; Rube Willott, Manitowoc; Ernest Falconer, Medford; Geo. Seiler, Alma; Victor H. Kadish, Milwaukee; Thos. Kelley, Milwaukee; Amzi Chapin McLean, Eatontown, N. J.; C. R. Kayser, Madison; A. H. Kessenich, Madison.

HOLLOWEEN PARTY.

The young women of Chadbourne hall gave their annual fancy-dress party Hollowe'en eve. It was largely attended by the university women and was the usual complete and happy affair.

DEBATE WITH MICHIGAN.

Professor D. B. Frankenburger is in correspondence with the authorities at Michigan looking to a joint debate with Wisconsin.

SENIOR SWING-OUT.

The senior swing-out will be held in Library hall Nov. 22.

BIG CLASS IN AGRICULTURE.

The prospects this year are that the college of agriculture will be

taxed to its utmost to accommodate the incoming class. The short course opens Dec. 1. Already 240 students have signified their intention to enter the course and more applications are coming in daily.

UNIVERSITY DEMOCRATIC CLUB.

A students' democratic club has been organized, known as the University Democratic club. The following officers were chosen:

President—S. P. Wilson, Montfort.

Vice president—A. H. Schubert, Menasha.

Secretary—L. M. Evert, Pewaukee.

Treasurer—J. F. Hahn, Madison.

FOOTLIGHT DIVERSION.

The Red Domino, the girls' dramatic club of the university, held an initiation ceremony at the home of Dr. and Mrs. Frank H. Edsall, Mrs. Edsall being an honorary member of the society. Red Domino played Nance Oldfield and the farce Barbara last year at library hall, and at present is reading a number of plays from which two will be selected and presented some time after Thanksgiving. The present active members are Miss Fola La Follette, '04; Margaret Jackman, '04; Grace Ellis, '05, and Georgia Shattuck, '04. Those initiated recently were Misses Helen Harvey, '03; Bertha Riedesel, '03; Retta Kimball, '06, and Janet St. John, '03.

HYLLESTAD RECITAL.

Mr. and Mrs. August Hyllestad of Chicago gave a recital in library hall, Oct. 30.

CLASS PARTY ABANDONED.

The proposed class party which the university sophomores have been contemplating will not be held. Professor Julius E. Olson, chairman of the university social committee, has refused to grant permission on the ground that trouble would be likely to ensue between the freshmen and sophomore classes.

FREEMAN ON CAMBRIDGE.

Professor J. C. Freeman spoke at the convocation Oct. 24 on Cambridge University.

CO-OP. ELECTIONS.

The University Co-operative association elected the following officers

President, Chas. N. Brown; vice-president, E. J. B. Schubring; secretary, W. M. Bradford, '04; manager, H. A. Smythe, '02. Board of directors, faculty, Professor F. E. Turneure, Professor B. H. Meyer and Professor L. S. Smith; graduate, T. S. Morris, alumnus, C. N. Brown; law, E. J. B. Schubring; Hill, J. C. Miller, W. C. Wehe, R. C. Disque, E. A. Eckern, D. O. Hibbard, A. F. Meyer; at large, Dr. J. C. Elsom, R. G. Harvey, H. W. Adams. The business prospects point to a very successful year.

ORATORICAL ASSOCIATION OFFICERS.

The University Oratorical association elected the following officers:

President, L. F. Rahr; first vice-president, R. C. Disque; second vice-president, E. W. Thuerer; third vice-president, Tore Teigen; treasurer, J. T. Dougherty; secretary, S. P. Wilson.

TO LABOR IN JAPAN.

G. S. Phelps, for two years secretary of the university Y. M. C. A., and C. V. Hibbard, '00, of Racine, general secretary of the Y. M. C. A. of the Northwestern University, with their wives, will depart for Japan, where they will engage in the work of introducing the Y. M. C. A. work among the Japanese. Association buildings will be erected in Tokio and Kyoto, and the work carried on there along the lines pursued in the United States. Mr. and Mrs. Hibbard (Sue Lowell) '00, sailed for Tokio Oct. 21, on the Japanese mail line steamer Nippon Yusen Kaisha. Mr. and Mrs. Phelps will sail for Kyoto, Nov. 15, on the steamship Gaelic. Both Mr. Hibbard and Mr. Phelps are sent by the foreign department of the international committee of the Young Men's Christian association. They expect to be absent seven years.

DAIRY SCHOOL OPENS NOV. 6.

The dairy department of the college of agriculture will open, this year, November 6. The school can accommodate about 130 students and many will have to be turned away. During the past summer the interior of the dairy building has been refitted and the exterior repainted.

INTERCOLLEGIATE DEBATES.

At a meeting of the representatives of the various literary societies it was decided that Wisconsin would debate Michigan, Chicago and Minnesota, but propositions to meet Iowa will probably not be considered.

NEW LITERARY SOCIETY.

There is a movement on foot among the women of the university to organize a new literary society.

NOTED MEN TO LECTURE.

The oratorical association has arranged for a series of lectures during the coming winter, and has secured two strong attractions already in Senator Beveridge, Henry Cabot Lodge.

Cabot Lodge and Wu Ting Fang.

The following additional degrees were granted by the regents since commencement:

A. C. Scott, Ph. D.; Mrs. A. Y. Reed, Ph. D.; Margaret A. Schaffor, Ph. D.; I. M. Van Horn, A. M.; E. Ressman, A. M.; Helen B. Richardson, M. L.; Eva McNally, M. L.; J. W. Raymer, M. S.; Emily B. Clark, L. B. (Eng.); C. E. Ruhoff, B. S.; H. A. Winkenwerder, B. S.; H. A. Gunderson, B. L. (Eng.); W. J. Sutherland, Ph. B. (Ped.); C. E. Lamb, Ph. B. (Ped.); Hal Murrey, B. S.; G. C. Fortney, B. S.; Zella M. Shimmins, B. L. (Eng.); H. R. Dopp, B. S.; G. A. Scott, B. S. (E. E.).

1902 IN TEACHING FIELD.

The last graduating class at Wisconsin has furnished the usual large number of teachers. Following are some who have secured places for the coming year. Where not otherwise indicated the positions are in high schools and the places in Wisconsin:

Abbott, Maude E.—Marinette.
 Acker, Doby M.—Janesville.
 Angell, Martin F.—Assistant in Physics, U. W.
 Ballard, Bernice M.—Berlin.
 Bascom, Lelia—Escanaba, Mich.
 Brennan, J. V.—Principal High School, West De Pere.
 Bucklin, F. W.—West Bend.
 Case, Agnes E.—Sheboygan Falls.
 Case, Wilhelmina—Lake Geneva.
 Chamberlin, Hattie M.—Lake Geneva.

Chamberlain, Alice E.—Tower, Minn.

Donnelly, Esther—In the grades, Waukesha.

Eiche, Adela—Sheboygan.

Elliott, Ida—Greeley, Col.

Esch, Ella L.—Berlin.

Fairbank, A. F.—Michigan College of Mines.

Gapen, Anna—Director of Music Madison High School.

Godard, Grace G.—Ryan High School, Appleton.

Gilbert, Alvah L.—Fountain City.

Gohlke, G. H.—Baraboo.

Grandy, Adah G.—Winona, Minn.

Hasse, A. E.—Mauston.

Hayden, H. G.—Principal, grade school, La Crosse.

Heaton, Ruth —Neillsville.

Holah, Carolyn G.—West De Pere.

Holland, Julia C.—Seventh grade, Clintonville.

Hardy, Ella S.—Clinton.

Jordan, J. H.—Principal High School, Onalaska.

Kasberg, T. Luther—Prescott.

Kelly, Wm. H.—Assistant in Physics, U. W.

Kroenhke, Jessie P.—Rice Lake.

Latta, Maude A.—Cumberland.

Leihy, Edna M.—Rhineland.

Long, Charles—Berlin.

Merrill, Agnes—Ashland.

Merten, Edith B.—Ironwood, Mich.

Meyer, Cora E.—Jefferson.

Nicholas, William—Manual training, West Superior.

Pactow, L. J.—Scholarship in European History, U. W.

Patrick, J. Bartow—Ironwood, Mich.

Peckham, Mary G.—Kaukauna.

Pesta, Rose A.—Fellow in Mathematics, U. W.

Pickford, Merle S.—Plymouth.

Powers, J. F.—Lancaster.

Ranum, Blanche H.—Onalaska.

Rehberg, F. H.—Principal School District No. 13, Brooklyn.

Rhodes, A. L.—Principal High School, Wonewoc.

Richardson, B. D.—Plymouth.

Robinson, Bertha L.—Brodhead.

Ross, Josephine—Oconomowoc.

Sage, Laura E.—Oregon.
