# DIRECTIONS FOR ORDERING WOOD TYPE.

The prices for all sizes of each style of type shown in this book can be found in the Revised Price List below. The left-hand column gives the size of type or lines pica. The letter L, M, N, etc., at the top of table give the class to which the letter belongs, and the figures in the different columns give the price. The Scale of Fonts gives the number of letters in the different-sized fonts.

**Always state whether CAPS alone are wanted, or CAPS and FIGURES, or CAPS, LOWER CASE and FIGURES, or CAPS and LOWER CASE, and how large a font or number of As.**

Give full directions for shipping, unless it is desired to leave the matter to us, in which case we will ship cheapest way, freight or express.

Customers should bear in mind that End-Wood Type can be made any size desired. It is obviously impracticable to show all sizes, but the sizes shown are those which experience has shown to be the best for the printer, and consequently the most in demand. A wood type letter increases in width in exactly the same proportion as it does in length. For example: If a 12-line letter is 2 inches wide, the same letter in 15-line will be 2½ inches wide, the increase being one-quarter each way.
