The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

Palumbo Dynamic Patellar Brace™

CLINICALLY PROVEN[†] IN . . . PATELLAR SUBLUXATION CHONDROMALACIA TENDINITIS

- Prevents SUBLUXATION or DISLOCATION
- Aids in DIAGNOSIS of patellar tracking problems
- Reduces symptoms and incidence of CHONDROMALACIA and TENDINITIS
- Valuable POST-OPERATIVELY e.g., lateral retinacular release
- May promote DEFINITIVE CURE, especially in young patients
- Valuable in ACUTE subluxation or dislocation
- Useful in patients in whom SURGERY is CONTRAINDICATED

Successfully used by physicians, therapists, major medical centers and universities.

Live rubber arms provide a constant, medially displacing force to the patella through a full range of motion, thereby improving patellar tracking.[†]

Simple to apply . . . Comfortable . . .
Available in 6 sizes (right & left)
for exact fit
