The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

TOWARDS A BETTER STANDARD OF PATIENT CARE

Patient's Amplifier for each bedside

Philips Vital Data Monitoring System for frequent or continuous supervision of intensive care patients provides the following data:

- ECG on a built-in oscilloscope
- Pulse rate on direct reading instrument
- Systolic and diastolic blood pressure on direct reading instrument
- Respiration frequency and type on instrument and oscilloscope

The system consists of 19" modular units for mounting in racks. It affords possibility of connecting recording instruments such as potentiometric recorders, tape-recorders, cardiographs etc. as well as adjustable upper and lower frequency alarm
