The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

More reason to recommend it for your patients in pain

More than acetaminophen

Anacin provides anti-inflammatory action which acetaminophen does not. With Anacin your arthritis patients get more freedom of movement. Anacin reduces inflammation and swelling in pain-stiff joints, as well as giving effective relief from pain itself. Millions now take Anacin without stomach upset or gastric irritation.

Clinical tests on hundreds of tension headache sufferers show Anacin to be as effective as propoxyphene HCl 65 mg. with APC: 368 of 416 patients (88%) obtained relief with Anacin; with the other, 369 of 410 patients (90%). Yet Anacin had virtually no side effects: 2% compared to 18% for the other.

More than propoxyphene HCl 65 mg. with APC

More than buffered aspirin

Tablet for tablet, Anacin delivers a higher level of pain reliever in the patient's bloodstream than the leading buffered aspirin. The fact is, Anacin contains more of the preferred analgesic for arthritis than any leading *regular* or *buffered* aspirin tablet.
