Just when your spinal needle
is coming on strong,

does it suddenly take a turn for the worse?

*Introducing the
Tapered Technology of the
SafeTap™ Spinal Needle*

When you're delivering spinal anesthesia, you need a needle that is strong enough to resist bending during insertion yet delicate enough to produce the smallest possible puncture site. Now there's the SafeTap Spinal Needle from Kendall, with a unique and patented needle profile that tapers gradually at the tip, successfully incorporating the strength of a 22 gauge shaft with the precision puncture of a 24 gauge needle.

The SafeTap Spinal Needle from Kendall. Designed to keep your spinal procedures on the straight and narrow.
