MINUTES OF THE REGULAR MEETING
of the
BOARD OF REGENTS OF THE UNIVERSITY OF WISCONSIN SYSTEM

Madison, Wisconsin

Held in the Clarke Smith Room, 1820 Van Hise Hall
Friday, October 6, 1978
9:01 A.M.

President Hales presiding

PRESENT: Regents Barkla, Beckwith, DeBardeleben, Elliott, Erdman, Fish, Fitzgerald, Gerrard, Hales, Lavine, Lawton, McNamara, Neshek, Thompson and Walter

ABSENT: Regent Grover

Upon motion made and properly seconded, it was VOTED, That the minutes of the regular meeting of the Board of Regents of the University of Wisconsin System held on September 8, 1978, be approved as sent out to the Regents.

Regent Barkla observed that the minutes did not reflect her comments made at the September meeting relative to her hope that the members of the Board would not attend the meeting of the Association of Governing Boards which is to be held in a state that has not ratified the Equal Rights Amendment. Regent Erdman stated that she had attended one of the meetings, found them totally useless, and recommended that the members of the Board not attend the meetings regardless of where they are held.

REPORT OF THE PRESIDENT OF THE BOARD

President Hales referred to the report of the September 19, 1978, Wisconsin Board of Vocational, Technical and Adult Education meeting (attached as EXHIBIT A). There were no comments, and the report was ordered placed on file.

- - -

REPORT OF THE PRESIDENT OF THE SYSTEM

The following resolution was properly moved and seconded:

Resolution 1748: That the Report of Non-Personnel Actions by Administrative Officers to the Board of Regents and Informational Items Reported for the Regent Record be received for the record; and that actions included in the report be approved, ratified, and confirmed. (EXHIBIT B, attached)

Regent DeBardeleben noted that the Report of Informational Items dated September 27, 1978, included a report of the 2% remissions for the period March 1978 to September, 1978, which indicated that as against our authorized remissions for 300 students, only 148 had been used, and inquired as to why the full authorization was not used and what steps, if any, are being taken to determine that this does not happen again. Vice President and Controller Lorenz stated the 2% fee remissions by statute are for students in extraordinary circumstances, and each campus has a committee which reviews the requests for waivers to determine whether or not they really are extraordinary circumstances; they are acted upon by this committee and forwarded to Central Administration for review. Regent DeBardeleben stated that it appeared the standards are too rigid, because he could not imagine that out of 150,000 students there would not be another 152 that would meet his idea of what the standards ought to be. Vice President Lorenz responded the standards are developed by each campus with some overall system review of the guidelines, but there are no specific guidelines. Regent DeBardeleben stated that it appeared the program is being administered by admissions officers and he was concerned as to whether there is any uniformity of understanding on their part as to how this program ought to be administered. He requested a report on what the guidelines are supposed to be and how the members of the Board can be assured that they are being properly and fairly applied throughout the System on a reasonably uniform basis.

The question was put on Resolution 1748, and it was voted.

President Young stated the issue raised by Regent DeBardeleben is troublesome for us because we are pledged to maintain as much autonomy for each of our institutions as possible and at the same time we have statutes which are uniform for the System, and he said that if we leave some discretion and say there is some autonomy, there are bound to be slight differences. He continued that we try to make sure that no Regent rule is violated and no statute is violated, but decision making is encouraged at the campus level. He recalled that when he was Chancellor he argued very stoutly for autonomy and said we must wrestle with this problem from time to time. He noted we cannot behave in such a way as to create a sense of unfairness or to bring on to ourselves additional legislation. He said he continually asks the staff not to get involved in something they have a temptation to get involved in because that leads to a diminishing of campus autonomy. He said every day new rules come out from the federal government saying that you have to obey them if you want to get federal money. Students take federal assistance and that puts us in that ball park. State agencies say we have a rule for this and we have a rule for that and this goes on constantly. He said he was struggling to hold back some of it to keep autonomy, and it is a matter of very great concern. He said the biggest problem in higher education today is not a budget problem but the problem of regimentation of one kind or another. President Young said he would hope that the Regents in talking to legislators and government officials will suggest to them that allowing us to be a little bit wrong once in awhile, or a little bit different, may be a cheap price to pay for the initiative that comes from a faculty that has a hand in its own destiny.

Regent DeBardeleben stated it was not his intention or suggestion that anyone was at fault. He said he recognized there should be campus autonomy and there should be areas of discretion, but felt it is proper to let the Board know at least what the areas of discretion are so that we can satisfy ourselves that policies are being administered in a nondiscriminatory and fair manner.

Mr. Paul Rusk, President, United Council of Student Governments, reported on a National Conference for State Student Associations to be held in Wisconsin and distributed copies of the best letters written from the tuition check program.

At the request of President Young, Acting Dean Bernard Easterday made the following report on the planning process and progress of the School of Veterinary Medicine:

The process was begun on July 1, and in order to expedite the process eight committees were appointed to deal with the major aspects of the school, curriculum, admissions, facilities, and faculty etc. During the next four weeks these recommendations will be put together in a package for academic and facilities concepts. The Bureau of Facilities Management and the architectural consultants are working on the development of the facilities concept. By the 10th of November the academic and facilities concepts will be brought to the Madison Campus and then to the Regents so that the Board will have that material before the December meeting in order to meet the mandated deadline of January 1 set by the Legislature.

Regent Erdman stated that it did not appear to her that Dr. Easterday had answered the main thrust of the ADL Report that by 1990 there would be a surplus of veterinarians and that even 80 more students per year would contribute to that surplus. She said she was 100% for a School of Veterinary Medicine if funds were unlimited, but concerned that in a finite world, the funds that will be used year after year for veterinary medicine will be taken out of the total system funds, and we are already existing on a very limited budget. She asked that in a future report we go into some of the answers to the fact that we will be contributing to the expected surplus. She noted that 12 of the 17 students from Wisconsin going to the University of Minnesota were women who will most likely be entering the small animal urban practice, which is not going to be meeting the needs of the farmers who seem to be most vocal in their cries for veterinarians.

Dean Easterday stated that in the very limited space available to provide the information requested it was not felt important to address that particular matter at this time. He noted the article in the Wall Street Journal of the previous day addresses only the private sector of veterinary medicine and ignores the other kinds of needs perceived to be happening in the future. He recalled that we went through similar things previously such as the tractor and the automobile replacing the horse in the twenties which was going to result in a surplus of veterinarians, and in the fifties when hog cholera was eradicated, it was assumed that the veterinarians wouldn't know what to do with their time when they couldn't vaccinate hogs for cholera. He said that in the development of the planning of the school the position of the Board in 1975 was that manpower was not the major aspect of the development of the school -- there were other things they were concerned about such as providing service, research, continuing education, etc.; so the school is not being established as a manpower producer.

Regent DeBardleben said that he was originally opposed to the development of the School of Veterinary Medicine because he did not feel it had been demonstrated we could establish such a school without diluting support for other established programs within the University of Wisconsin

at Madison where it was proposed to be established. He said he became convinced by the recommendations of Central Administration and the Chancellor of the Madison Campus that this would not result and was somewhat persuaded by the fact that the state had a surplus. He said now we are faced with a freeze on hiring and we are faced with a lot of political rhetoric about millstones and about what is going to be done to cut down taxes, what is to be done to cut down bureaucratic bloat and reduce the size of our institutions, and was wondering what effect these considerations had on the matter. He asked if Dean Easterday now felt he can defend the continuance of this planning and development in view of what we know and the limitations that are presently enforced as far as hiring new staff is concerned?

Dean Easterday responded that his charge is a mandate to provide the plan to the Legislature and the response about the position freeze was not appropriate for his report -- he would turn that over to someone else. President Young said we had a mandate from the Legislature to come in with a plan for a Veterinary Medicine School by January 1, and at that time we, the Governor, and the Legislature will have to face up to the manpower problem. He said we cannot dismiss tenured faculty in order to make new positions available, and the state itself has not been totally clear about how this is to be administered. He said there was a plan in the administration that the positions that are mandated by legislative and federal actions will have a priority as vacancies occur throughout the whole state structure. He said that we will present the Legislature with the plan that they asked for and at the same time tell them what the manpower requirements are. He said he did not think it appropriate for us to stop now, because we have not been told we cannot have that manpower.

Senior Vice President Smith stated our position has not varied and will not vary from the initial action of the Board, that both the fiscal support required and the funding of the necessary positions are incremental and are not to require erosion of the other budgets of the University. Regent DeBardeleben inquired whether or not it would be appropriate at this time to suspend the planning and development efforts with reference to the new School of Veterinary Medicine until this situation has been clarified, particularly in view of the considerations mentioned by Regent Erdman. Vice President Smith stated that he felt that would be irresponsible on our part. We are under a legislative mandate to do this planning and for us to assume that anything that has happened such as the Arthur D. Little Company studies or in the way of the executive branch directives erodes our responsibility in carrying out the mandate of the law would be wholly irresponsible.

Regent Fish stated that he was astounded by Dean Easterday's statement that manpower shortages were not a consideration in the presentation to the Board. Dean Easterday stated that he had said it was not the main thing. Regent Fish stated that he felt that those who served on the Board at the time would have to disagree. He said it was sold to us on the basis of need -- there was a need, not just in Wisconsin, there was a shortage of veterinarians in the country. He said he was still supportive, but did not want to get on the record a statement that infers that we approved a concept of a veterinary school without regard to whether there would be a shortage or a surplus of veterinarians, because at the time we supported it, there was considerable data furnished to us that there was such a shortage. Dean Easterday agreed there was a need and the analysis was that if that was the only need that we had, that was the only justification for establishing a

veterinary school, we could not do it on that basis, that we had overwhelming other needs as well, and so it was the whole package, and manpower was not the only consideration for the school.

Regent McNamara stated that he was somewhat skeptical about the matter when it originally came up, but the more he got involved in it the more supportive he became of the program, because he learned that Wisconsin is third in cattle production after Texas and Florida. He pointed out that even if you stopped the new school of veterinary medicine and relied on going to existing schools, it would not solve the shortages in particular areas. He said these schools are by and large public institutions and a student going from Wisconsin to another state would probably be foreclosed from going by virtue of the very, very high out-of-state tuition that applies to all medical programs, veterinarian or human. He said another reason for supporting our own school is that it is just as cheap, if not cheaper, to build our own than to send students to Minnesota -- Minnesota costs are such that there are no economies any longer. He said he supported our previous action and the position that we will not build a school of veterinary medicine at the expense of other programs. He said we must have from the Legislature and from the administration at some place down the road, a clear understanding that it will take additional personnel, and that this is a fundamental part of the establishment of the veterinary school. Regent Beckwith noted Arthur D. Little's recommendation that we should be working toward regionalization of veterinary schools that says 25% of the entering classes should be residents from other states on a full cost of education reimbursable basis. He inquired what that means. He was advised that was taken verbatim from the mandate from the Legislature and means full cost. Regent Beckwith stated that for a new school, with new capital costs, new buildings and highly research oriented, he would assume the full cost reimbursable basis would be one of the highest tuitions in the country and inquired if it is realistic to think that we were going to get out-of-state on that basis from other states. Dean Easterday responded that it is happening now, and that there is a great range in this cost figure among the various schools.

Regent Lavine stated that he was shocked by the Arthur D. Little report. He said that in his section of the state research has resulted in the development of a new industry, namely the perch farm which supplies a high protein and low fat in a very short time. He stated the Arthur D. Little report looks not at all to government's needs for veterinarians, nor at the private sector's needs for veterinarians. He noted that in the initial findings relative to the proposed veterinary school it was found that if we save one or two steers per herd of cattle, we pay for the whole school. He said he supported the school, but if the situation has changed, he would change his opinion immediately.

Regent Erdman stated that she felt we have to have answers to the questions raised, but in no way should the Board of Regents consider suspending the planning at this time as that would be opposing the legislative mandate and opposing good common sense. She said she felt that the Regents who have raised questions have done so in the hope that answers would be forthcoming in the November or later reports. She continued that what we are talking about in planning is not a graduate school but an undergraduate school for veterinarians and she would like to see in the planning document the answers to the questions of what the vocational schools are doing in producing para veterinarians, and how much our present school of veterinary science is being used to satisfy requirements.

Regent DeBardleben stated that he would like to respond briefly to Senior Vice President Smith's comments that to consider or to actually suspend development of the program is being irresponsible. Regent DeBardleben said he did not have in mind that we would be saying to the Legislature that we have

declined to follow its mandate, but there is a question of timing involved here, and he did not feel that we are under such rigid time limitation that we could not hold this thing up or even suspend it for a few months so that the Legislature would have the opportunity to consider some of the questions that have been raised today. He said that he had very rarely observed situations in which the Legislature had appropriated more money for the support of higher education than the Governor has asked for, and that unless we are faced with the most rigid kind of time dictates, it would be prudent for us to suspend further expenditures on this program until we are certain that the program is going to move forward. He stated that in the Arthur D. Little report it was recognized "We expect there will be a shortage for some years of veterinarians with post professional education and training", and noted these were the people that developed the perch farm, not the undergraduates. He said he had great concern about this and if we see down the road nothing but dilution of other programs if we go ahead, he felt we have a responsibility to use whatever discretion is available to us, not to become so committed that we cannot turn around.

President Young stated there is a time set by the Legislature when we are supposed to have this ready -- the first of December -- and it has to go to the Governor and the Legislature by January 1, 1979. Senior Vice President Smith stated that in that there has to be a physical plan with the costs within certain parameters, there must be a programmatic plan, curriculum staffing, etc., and the legislation is quite specific what that plan must accomplish and it must all be accomplished by January 1. Regent DeBardeleben observed it would not be the first time in history that we did not meet a deadline.

Regent Walter stated that she remains a skeptic on the need for this and noticed that about 70% of the practice time is now spent on dogs and cats, and that regardless of how many cows there are in the state, if veterinarians continue to practice on that basis, it is not meeting the requirement of the Legislature. Dean Easterday said that the Little report says that 70% of all practice effort goes into what they call non-economic animals, such as dogs, cats, etc., and that if we are to serve the areas that are not being served -- the large animals -- those veterinarians will have to do cats and dogs, etc., as well. He said there will be no way that they can make their way in what is now unserved areas without also doing dogs and cats.

- - -

REPORT OF THE EDUCATION COMMITTEE

The report of the Education Committee was presented by Regent Lavine.

Regent Lawton stated that there had been a report in the Committee meeting on the previous day on Public Radio in Wisconsin - The UW System and the Educational Communications Board. Kenneth Warren, UW System Coordinator for Television Production and Media Activities, commented briefly about joint planning efforts between the UW System and the Wisconsin Educational Communications Board for the development of maximum public radio service to the people of Wisconsin. Jack Mitchell, Associate Director of Radio and Station Manager, WHA, described plans to realign programming on WHA and WERN-FM, modeled after patterns already established by CBC in Canada and BBC in Great Britain, as part of an experiment that could lead to similar changes in non-commercial educational radio programming throughout the state.

The plans call for a pilot period beginning January 1, 1979, during which stations WHA and WERN will separate their programming with WHA becoming an information-oriented service and WERN providing music and other cultural programming. If the project works out as expected, similar complementary services are expected to be developed in other parts of the state involving the ECB-licensed state network station in a given area and the UW-licensed station serving the same area. Regent Lawton reported Regent McNamara supported the pilot proposal as one that would use state funds wisely and provide listeners with desirable alternatives. The duration of the pilot project is to be one year at the end of which time the Regents will be informed of the results and the recommended next steps. Regent Lavine suggested that the Committee consider a year hence some of the specific questions raised during the discussion on the previous day, namely the protection of campus broadcasting rights, because he did not want to see the students and faculty rights to use their own station for their own purposes diluted. He said the subject of the possibility of putting some kind of transponders on the AM stations was discussed and that he would like a report on that matter a year hence.

-

Regent Lawton moved adoption of the following resolution, and the motion was seconded by Regent Fish:

Resolution 1749: That, upon the recommendation of the President of the UW System and the Chancellors and Faculties of the institutions involved, the following new academic programs be approved with an effective implementation date of Spring Semester, 1979.

UW-Green Bay	BA/BS Managerial Accounting
UW-Madison	MS Preventive Medicine-Administrative Medicine
UW-Milwaukee	BA/BFA Film MS Criminal Justice
UW-Oshkosh	Bachelor of Liberal Studies BS Human Services
UW-River Falls	BS Applied Computer Systems
UW-Stevens Point	BA/BS Managerial Accounting
UW-Stout	MS Hospitality and Tourism

Regent Erdman stated that in reading over the material relating to the above resolution she found that five of the institutions indicated that they needed no new funding, no new faculty, and no additional faculty members to start these new academic programs. She said she felt that these institutions and the administrators and professors involved should all be highly commended for this effort because it is an achievement of no mean significance.

The question was put on Resolution 1749, and it was voted.

-

Regent Lawton stated that the Report of the Senior Vice President covered the following items:

- (1) Approval of Transfer of Credits from Wisconsin Lutheran College to UW-Milwaukee and UW-Whitewater

Vice President Smith stated this is not a blanket accreditation of all the course work that is being offered and extends for three years. He said

the limiting of the transfer of credits to two campuses is within the aspirations of the Milwaukee Lutheran College. It serves the primary area from which their students come and places to which their students might be inclined to transfer at a point in time. If through time and evaluation we are satisfied, it might be extended as a systemwide transfer possibility. He said he felt this is a better way to treat these things when we are plowing new ground.

(2) Undergraduate Teaching Improvement Program

Regent Lawton reported System Academic Planner, Karen Merritt, and Bassam Shakkashirie, UW-Madison Professor of Chemistry, joined in a brief review of the activities of the Undergraduate Teaching Improvement Council organized a year ago under a grant from the Fund for the Improvement of Postsecondary Education. They referred to the publication Enhancement of Undergraduate Teaching: Proposals and Results, a copy of which had been furnished to each Regent, which contains a short history of the Grant program and abstracts of the 121 teaching improvement projects funded.

Regent Erdman said she was somewhat impressed by the size of the document but was also depressed by the emphasis on techniques and technology, and wondered if this new emphasis does not produce a rather passive unresponsive student. She said this kind of methodology is blinding us to the old-fashioned principles of good teaching, which is a professor standing in a classroom before his students, lecturing, inviting the students to give and take, and over all imparting the excitement and the challenge of learning. She said last year her son had taken a course in Art History which could have just had a lot of video material and you could have had the whole thing graded on a computer. She said that in addition to extensive reading, the professor required four, five, or six papers, and when he corrected these papers, he went over them not only for substance but for style, grammar, etc. She said this kind of teaching is more than an art, it is also an extremely conscientious professor who spends more time on the paper than the student spends in writing the paper. She said that when we talk about the enhancement of undergraduate teaching, we should think more of encouraging professors to do such splendid work in these areas.

Regent Lawton stated that he agreed with Regent Erdman, but did not interpret the report in that light -- he was impressed with the variety of proposals brought forward and did not interpret it as being to the exclusion of old-fashioned teaching. Senior Vice President Smith stated that Regent Erdman's comments would not be out of tune with the discussions of the undergraduate teaching council or of the chairman of that council. He said that the council is not conceiving the improvement of teaching as simply a question of methodology or technology, but we cannot dismiss that. He said there are particular areas where one strengthens markedly the effectiveness of the teaching by the support of the new technology, noting for example the assistance of the computer in the teaching of mathematics. He said one of the basic problems in the improvement of instruction is the re-examination of available subject matter. He said that probably a history professor is also a person who is a continuing scholar in the exploration of the resources of his particular teaching course, which adds excitement and new dimensions to instruction through these teaching improvements.

(3) Report on UW Health Science Advisory Council's Subcommittee Activities in the Area of Clinical Sites and Allied Health.

Regent Lawton reported Vice President Smith introduced William Blockstein, Chairman of the Health Science Advisory Council, who referred to two reports

which had been provided each member of the Board of Regents: The Use of Clinical Sites in Health Manpower Training in Wisconsin, and An Inventory of Allied Health Occupations Education in Wisconsin: 1977. Regent Lawton reported that with respect to the Clinical Sites report, Dr. Blockstein noted the trends reported by respondents which are likely to have substantial impact on educational policy decisions dealing with the number and kind of students to be prepared and where and how those students will get their "hands on" experiences and who will pay for the clinical experience. In that connection, two studies were cited which suggest that in the cost/benefit analysis of clinical education, the institution has a net benefit. Housing a clinical training program does not increase hospital costs, but may result in a net benefit to the hospital. Regent Lawton reported in the Allied Health report Dr. Blockstein drew special attention to the item dealing with teacher training programs and dealing with continual and periodic updating of allied health personnel. He stated that the cost of supporting a health professions student is not such that trade-offs with non-health-related disciplines can be made on a one-for-one basis. Regent Lawton stated Dr. Blockstein concluded by suggesting that the UW System should examine very closely any new proposals for health manpower education programs and that, unless National Health Insurance or other assurances of guaranteed funding suddenly appear, there should be few, if any, new programs mounted and present programs should not be encouraged to expand.

-

Senior Vice President Smith announced that women from most UW System institutions, private colleges, and many from the public schools were attending a conference on women in higher education administration being held in Green Lake on October 5 and 6, 1978. The conference is coordinated by Marian Swoboda, Director of the UW System Office of Women.

-

Regent Lawton moved adoption of the following resolution, the motion was seconded by Regent DeBardeleben, and it was voted:

Resolution 1750: That, upon recommendation of the President of the UW System and the Acting Chancellor of UW-Stevens Point, UW-Stevens Point is authorized to recruit for a Dean of Graduate Studies.

- - -

REPORT OF THE BUSINESS AND FINANCE COMMITTEE

The report of the Business and Finance Committee was presented by Regent Erdman.

Regent Erdman moved adoption of the following resolution, the motion was seconded by Regent Walter, and it was voted:

Resolution 1751: That, upon recommendation of the President of the System, the gifts, grants and contracts presented at this meeting (copy filed with the papers of this meeting) be accepted, approved, ratified and confirmed; and that, where signature authority has not been previously delegated, appropriate officers be authorized to sign agreements.

-

Regent Erdman reported that the late Ellen M. Jensen, Hempstead, New York, bequeathed \$2,000 to the Julius E. Olson Scholarship Loan Fund at the University of Wisconsin-Madison.

Regent Erdman moved adoption of the following resolution, the motion was seconded by Regent Walter, and it was voted:

Resolution 1752: That the bequest of the late Ellen M. Jensen, Hempstead, New York, to the University of Wisconsin be accepted by the Board of Regents of the University of Wisconsin System in accordance with the terms and conditions of the Last Will and Testament of Ellen M. Jensen, Deceased; and that the Secretary or Assistant Secretary be authorized to sign a receipt on behalf of the Board of Regents of the University of Wisconsin System for this bequest, and to do all things necessary to effect the transfer of this bequest to the University of Wisconsin-Madison.

-

Regent Erdman reported that the late Helen T. Parsons, of Madison, Wisconsin, bequeathed 1/24th of the residue of her estate to the University of Wisconsin-Madison Arboretum and 1/24th to the University of Wisconsin-Madison without restriction. She stated that Chancellor Shain has indicated that the unrestricted portion of the bequest will be used for the benefit of the School of Home Economics.

Regent Erdman moved adoption of the following resolution, the motion was seconded by Regent Fitzgerald, and it was voted:

Resolution 1753: That the bequests of the late Emeritus Professor Helen Tracy Parsons, Madison, Wisconsin, to the University of Wisconsin be accepted by the Board of Regents of the University of Wisconsin System in accordance with the terms and conditions of the Last Will and Testament of Helen Tracy Parsons, Deceased; and that the Secretary or Assistant Secretary be authorized to sign a receipt on behalf of the Board of Regents of the University of Wisconsin System for these bequests, and to do all things necessary to effect the transfer of these bequests to the University of Wisconsin-Madison.

-

Regent Erdman reported the proposal to extend the University Faculty Insurance Program to the staff of all institutions was presented for first reading at UW-Superior in September with action delayed to October in order to allow an opportunity for faculty response to it. She reported that the UW-Whitewater faculty senate had approved the concept (23-9) and that the TAUWF Executive Committee had approved it with the understanding that they would work within the organization to achieve some modifications which TAUWF felt were needed. She reported the Madison Academic Staff Association steering committee presented a letter opposing mandatory participation.

Regent Erdman reported Vice Chancellor Wimberly made a brief presentation at the request of the UW-LaCrosse faculty who objected to the "condition of employment" stipulation and preferred a process of providing written notification of a desire to be included in the program instead of having to indicate not wanting to be covered by it

Regent Erdman reported President Young spoke in support of the proposal by indicating the concept behind the program's origin: the need to provide low-cost insurance protection to young faculty members who, if not required to participate, might not elect coverage and would remain unprotected.

Regent Erdman moved adoption of the following resolution, the motion was seconded by Regent Lavine, and it was voted:

Resolution 1754: (Policy-Revised)

That, upon the recommendation of the President of the University of Wisconsin System, all actions taken by the former Chapter 36 Board of Regents with reference to University Faculty Association (UFA) be hereby rescinded and recreated to read:

UNIVERSITY FACULTY ASSOCIATION

Any person now or hereafter holding an appointment by the Board of Regents of the University of Wisconsin System, and a member of the faculty, academic or limited staff, unless excluded by the provisions below, shall be a member of the University Faculty Association.

- (a) Membership in the University Faculty Association and participation in its plan of group life insurance shall be a condition of employment for all those persons specified in the Membership paragraph who are on the October payroll (payable in November) and whose current rate of compensation is at least the minimum established by the Board of Directors of the Association, in cooperation with the UW System Administration, on an academic year basis or on an annual basis with the following exceptions:
- (1) Persons employed in the former Wisconsin State Universities System who make written Election of Nonparticipation not later than March 16, 1979. Filing of an Election of Nonparticipation is irrevocable, meaning that membership in the Association and participation in its plan of group life insurance is waived forever;
 - (2) Persons whose part-time status is included as a part of their appointment titles;
 - (3) All categories of graduate student members of the academic staff as identified by the appropriate UW System office responsible for staff benefits;
 - (4) All categories of interns, externs, residents, and any other groups or titles that by intent relate to similar positions or functions;
 - (5) Those who have attained the age of 64 on or before the previous twentieth day of March; and

- (6) Faculty members who refused membership on one of the two occasions in 1959 and 1966 when the classes eligible for membership were enlarged.
- (b) Regular membership begins on the twentieth day of September of each year, and the appropriate payroll offices shall deduct the annual premium as determined by the Board of Directors of the Association for the year during which employment occurs from the October payroll (payable in November). The effective date of coverage for persons employed in the former Wisconsin State Universities System who have not filed an Election of Non-Participation shall be March 1, 1979. Duration of employment is not considered in making this deduction. Refunds for parts of years of employment are not allowed because coverage continues for the balance of the year. When a member terminates, coverage may be continued beyond September 20 at the option of the member by direct payment to the insurance company under contract with the Board of Directors of the Association.
- (c) So as not to cause undue financial hardship for all otherwise eligible persons, those whose current earnings are less than 50% of the average salary of UW System instructors are automatically excluded. However, no current member shall be dropped from membership in the Association because of these provisions. The Board of Directors, with concurrence of UW System Administration, shall have authority to change the 50% figure if deemed to be in the best interests of the members of the Association.

Regent Erdman reported that in the discussion of the proposed policies of the Higher Educational Aids Board for 1979-81 in the Committee meeting on the previous day, there was discussion relating to the type of assistance which would be provided to students enrolled on a less than half-time basis. The concern was that the System should commit its resources to meeting only the direct educational needs of those individuals who would qualify under paragraph (3) of the resolution. She stated it was felt that the statement was too broadly written as presented, and it was then voted that it be amended with the change incorporated in the materials now before the Board. The resolution first presented included a phrase to offer "appropriate financial assistance to meet the needs of students". The Committee voted to remove the phrase "meet the needs" and to insert "cover the direct educational costs" in its place. Regent Erdman reported United Council of Student Governments President Paul Rusk told the Committee that his organization had reviewed the proposed recommendations to HEAB and was supportive of the concepts.

Regent Erdman moved adoption of the following resolution, and the motion was seconded by Regent Walter:

Resolution 1755:

Upon the recommendation of the President of the University of Wisconsin System, the Board of Regents of the University of Wisconsin System requests the Wisconsin Higher Educational Aids Board to consider the following recommendations of the UWS 1979-81 Biennial Budget Working Group on Holding Down Student Costs:

1. That the Higher Educational Aids Board seek in its 1979-81 biennial budget request an increase in the WHEG appropriation adequate to offset the impact that inflation has had on student budgets, to meet the anticipated inflation rate for the 1979-81 biennium, and to fund maximum grants at the same maximum grant level as that of the BEOG program.
2. That the Higher Educational Aids Board seek implementation of a program which would provide a state supplement to federally funded work study opportunity to bring the total program to a level equal to fifty percent of the total self-help requirement remaining after grant assistance has been awarded.
3. That the Higher Educational Aids Board reexamine its policies relative to part-time students and seek to offer appropriate financial assistance to cover the direct educational costs of students who are enrolled on a less than half-time basis.
4. That the University of Wisconsin System work with the Higher Educational Aids Board and state government to maintain and extend reciprocity compact opportunities thus removing financial barriers to education for additional students, both resident and nonresident.
5. That the Higher Educational Aids Board consider development of a suitable loan consolidation program to meet problems faced by particular groups of heavily indebted, multiple loan borrowers.

In response to Regent Lawton's question as to the meaning of paragraph (3), Regent Erdman stated the problem was that part-time students under the previous recommendation might just receive general aid and in effect a student might come to the University, enroll for three, four, five or six credits, and then receive aid for room and board. She said the Committee wanted this to be direct educational costs, tuition, books, etc. Regent Beckwith stated it was explained that there are persons who are on welfare programs who would like to attend the University and take less than six credits, and that the programs they were on do not provide funds for education. The concern was that it is all well and good to provide funds for education, but we are not in the welfare business and we should not be in the position of providing living expenses -- that is the responsibility of the welfare agency.

Regent Lavine pointed out that students taking six credits and above are covered by a system already in place. He stated each filled out a standard national student budget form which takes into account the student's ability to work, the ability of their family to support them, and the contributions the student himself may make. It also outlines the cost of going to school, not only the tuition and books, but also laboratory fees, transportation, etc. and applies what is appropriate for a student in certain circumstances for grants, aids, or loans. Regent Barkla stated it was her understanding that if you give people being supported by public assistance programs anything for direct educational costs, you reduce their other support. Regent Erdman stated the Committee was emphasizing that these five recommendations are to promote the holding down of student costs and certainly our first priority should be to our half-time and full-time students and we do not want to dilute this kind of effort with side issues which are not directly our concern.

Regent Beckwith stated that if a student wanted to take one course and had no job and was not on welfare, it seemed appropriate to him that the financial assistance officer should suggest he go to the Welfare Department or wherever else he should go to obtain general support. He said he did not want to undertake the burden, regulations and everything else involved in general welfare support of people simply by the reason they want to take one course. President Young stated that if an unemployed person came in and said he would like to take a course and would like to get financial aid to pay his room and board, the financial aid officer would advise him that this is a waste of your time and our resources; therefore if you are unemployed and want to go to school, we will help you to go to school, but we won't let you live in our dormitories, using up space and resources taking just one course and take fifteen years to get a degree. He said we need some pressure on our students to get on with the business. President Young noted that the length of time to get a degree is getting longer and we should not provide an easy mechanism to make it still longer. He said he would advise the counselors to advise these students that until they get a job, they should carry a full load, at least more than six credits, and that is the way it is handled all the time. He said some people go to school to get financial aid, but we should not encourage them to be dilettantes.

Regent DeBardleben was advised in response to his inquiry as to the meaning of the language in paragraph 2, "equal to 50% of the total self help requirement" that it referred to the programmatic total, not the individual total.

Regent Lavine stated that a study of the financial aid officers of the System revealed that some of the officers said they could use the entire program proposed on the state level on their own campus in terms of more work/study money, whereas others said they had enough of such support. He said he was shocked at the statement of the officers who said they had enough support, because it was his understanding that there is a large unmet need of students from the middle and lower income levels, not only in Wisconsin but nationally. He said that he and Regent Grover had been put in a very difficult position by such statements and did not feel that the financial aid offices are being supervised the way they should be. President Hales suggested that in view of Regent Lavine's comments, the Chancellors ought to check this problem on their campuses and report back some time in the future.

The question was put on Resolution 1755, and it was voted.

-

Regent Erdman stated that Vice President Lorenz provided the following information in his report to the Committee on the previous day:

- (1) Student enrollment appears to be in line with projections, but final FTE information is not available yet.
- (2) System administration has received grants from the Kellogg Foundation in the amount of \$205,973 for the development of a decision-making and policy implementation study for nursing education in Wisconsin, and the funding for the improvement of postsecondary education grant in the amount of \$69,105 has been continued.
- (3) Occupancy in all residence halls has increased this fall with substantial increases at UW-Whitewater and Milwaukee. Systemwide there is an increase of 400 residents in the System-owned dormitories.

-

Regent Erdman moved adoption of the following resolution, the motion was seconded by Regent Walter, and it was voted:

Resolution 1756: That the following properties, as fully described in quit claim deeds dated September 11, 1978, executed by the University of Wisconsin Foundation, be accepted, and that the University of Wisconsin Center System be assigned responsibility for the supervision thereof:

8.49 acres more or less
3.1181 acres more or less

both located in the Town of Summit, County of Waukesha, Wisconsin. The properties were given to the University of Wisconsin Foundation by the late Miss Gertrude Sherman, Oconomowoc, Wisconsin, and are adjacent to 92 acres of land she gave to the University in 1969.

Regent Erdman stated that the Committee considered a request from the UW-Superior Foundation to have funds transferred to it. It was not possible for one of the presenters to be in attendance until the November meeting. Therefore the Committee agreed the item would be deferred to that time for discussion in open session.

REPORT OF THE PHYSICAL PLANNING AND DEVELOPMENT COMMITTEE

The report of the Physical Planning and Development Committee was presented by Regent Gerrard.

Regent Gerrard reported the Committee first considered a request to approve two concept and budget reports. The first concept and budget report was for a heating plant improvement project at UW-Platteville for a total budget of \$370,000, representing an increase of \$80,000 from the amount authorized in the 1977-79 capital budget. The purpose of the project is to provide for the addition of oil-firing capability to the campus central heating plant's existing boilers, installation of an underground oil storage facility to provide 24-day fuel supply, and the addition of related oil heaters, pumps and piping to permit the use of heavy as well as light oils. The second concept and budget report relates to the North Hall remodeling project at UW-River Falls, at a revised total project cost of \$1,300,000 which is an increase of \$255,500 as authorized in the 1977-79 capital budget. He stated the additional funds are needed to include all work identified in the planning process and to fully complete the North Hall remodeling project as intended by prior Regent and State Building Commission action.

Regent Gerrard moved adoption of the following resolution, the motion was seconded by Regent Barkla, and it was voted:

Resolution 1757: That, upon the recommendation of the UW-Platteville and River Falls Chancellors and the President of the University of Wisconsin System, the concept and budget reports for the following projects be approved and authority be granted to plan, bid and construct at the total costs and from the funding sources indicated:

UW-Platteville

1977-79 Heating Plant Improvements project at a revised total project cost of \$370,000 from General Obligation Bonding (GPR)

UW-River Falls

1975-77 North Hall Remodeling project at a revised total project cost of \$1,300,000 from General Obligation Bonding (GPR)

Regent Gerrard moved adoption of the following resolution, the motion was seconded by Regent Fish, and it was voted:

Resolution 1758: That, upon the recommendation of the UW-La Crosse Chancellor and the President of the University of Wisconsin System, authorization be granted to purchase a 0.05 acre parcel of land at UW-La Crosse, more specifically described as:

North 54 feet of Lot 7, Block 1, Anderson and Edwards Addition (also known as 510 North 16th Street), City of La Crosse

at a cost of \$29,000 from Land Acquisition Funds (GPR)

Regent Gerrard moved adoption of the following resolution, the motion was seconded by Regent Fish, and it was voted:

Resolution 1759:

That, upon the recommendation of the UW-La Crosse, Madison and Extension Chancellors and the President of the University of Wisconsin System, authorization be granted to lease the following space:

UW-La Crosse

- (1) Space located on Pine Street for parking, for the period October 15, 1978 to October 14, 1979

City of La Crosse, Lessor
Parking Utility Board
La Crosse, Wisconsin

The annual leased cost is \$125 - Non-GPR.

UW-Madison

- (2) 3,000 square feet of space located at 325-331 North Randall Avenue, for the period 10-1-78 to 3-31-79 (325 North Randall-- 1,987 square feet) and 1,013 square feet (329 and 331 North Randall) for the period 10-1-78 to 3-30-80, with a renewal option for one three-month period

The First Wisconsin National Bank of Madison, Lessor
 Trustee of the Oscar Rennebohm Trust
 1 South Pinckney Street
 Madison, Wisconsin 53701

Annual leased costs are \$9,000 until 4-1-79; reduction of space leased to 1,013 square feet reduces cost to \$3,039 through 3-30-80 - GPR.

- (3) 350 square feet of space located in The Walkway, Highway 42, Sister Bay, for the period 10-1-78 to 6-30-79, with a one-year renewal option

Hull Enterprises, Lessor
 Gordon Hull
 726 Roger Avenue
 Kenilworth, Illinois 60043

Annual leased cost is \$1,949.50 - Non-GPR.

UW Extension

- (4) 3,200 square feet of space located at 333 North Randall (second floor) for the period 10-1-78 (or date of occupancy) through 9-30-79, with two one-year renewal options

The Rennebohm Foundation, Lessor
 1 South Pinckney Street
 Madison, Wisconsin 53701

The annual leased cost is \$11,200 - GPR.

- (5) 5,000 square feet of space located at 1902 East Johnson Street for the period 11-1-78 to 10-31-79, with a one-year renewal option

Reynolds Transfer and Storage Co., Inc., Lessor
 725 East Mifflin Street
 Madison, Wisconsin

The annual leased cost is \$4,800 - GPR.

Regent Gerrard stated the first item in the next resolution was an outgrowth of the Heating Plant Study Report Project, which identified the need for overhaul of the small boiler and the related boiler control system adjustments at four central heating plants. This is needed in order to be able to assure generation of the maximum capacity of steam for which the boilers were designed. The purpose of the request for authorization to seek an additional \$200,000 of State Building Trust Funds for UW System 1977-79 Small Energy Conservation projects is to enable the System to accomplish a relatively large number of small, short pay-off period type energy conservation projects as quickly as possible. This would bring the total System allocation for this purpose to \$400,000. The last minor project is a request from UW-Madison to undertake emergency repairs on the Lake Mendota breakwater and shoreline. He explained that over the past five years, waves, frost, ice action and differential settlement have undermined the concrete base and granular fill of the breakwater and shoreline of the breakwater, causing a very serious safety problem in an area which is intensively used during the warmer months of the year.

Regent Gerrard moved adoption of the following resolution, the motion was seconded by Regent Fish, and it was voted:

Resolution 1760: That, upon the recommendation of the UW-Eau Claire Madison, Platteville, River Falls and Stevens Point Chancellors and the President of the University of Wisconsin System, authorization be granted to plan, bid and construct the following minor projects, at the costs and from the funding sources indicated:

UW-Eau Claire, Platteville, River Falls, and Stevens Point

Small Boiler Overhaul Project at an estimated total cost of \$42,000 from State Building Trust Funds - Unprogrammed Surplus (GPR)

UW System

Allocation of an additional \$200,000 for UW System 1977-79 Small Energy Conservation Projects from State Building Trust Funds - 1977/79 Energy Conservation Project Funds (GPR)

UW-Madison

Emergency Repairs project on the Lake Mendota Breakwater and Shoreline at an estimated total project cost of \$90,000 from State Building Trust Funds - Unprogrammed Surplus (GPR)

Regent Gerrard reported that in the committee meeting on the previous day Chancellor Haas presented the 1978 Campus Development Plans for UW-Eau Claire. He stated Chancellor Haas indicated that this plan represents a substantial reduction in the boundary for the area of the campus located north of the Chippewa River, particularly that area north of Water Street.

Regent Gerrard moved adoption of the following resolution, the motion was seconded by Regent Fish, and it was voted:

Resolution 1761: That, upon the recommendation of the UW-Eau Claire Chancellor and the President of the University of Wisconsin System, the 1978 Campus Development Plan, as updated, be approved to document physical facilities and campus boundaries for UW-Eau Claire.

Regent Gerrard stated the Campus development plan for the UW-LaCrosse provides for substantial expansion of the boundaries to accommodate the University's need for parking and outdoor education and recreational space. The plan is complicated by the fact that the land needed for parking would be very difficult to finance without special state or federal financial assistance for its acquisition. He stated that in addition the LaCrosse campus is currently using for outdoor education and recreational purposes a large tract of land that is owned by the City of LaCrosse. This property is not being well maintained and there appears to be a growing desire on the part of the City of LaCrosse for the University to acquire this property for development in order to more adequately accommodate its educational program needs.

Regent Gerrard stated considerable discussion took place regarding the proposed development of the Northern Campus tract of land adjacent to the maintenance/stores building. He said Chancellor Lindner reviewed difficulties that are being encountered by actions of the DNR Board and the Public Intervenor from the State Attorney General's Office. He said it is quite apparent that a difference of opinion exists relating to the development of this land as well as the facts relating to past actions taken by boards and various officials. He reported Mr. Peter Peshek, Public Intervenor from the State Attorney General's Office, made a presentation indicating his strong opposition to the development of this northern tract of the LaCrosse Campus.

Regent Fish moved adoption of the following resolution, and the motion was seconded by Regent Gerrard:

Resolution 1762: That, upon the recommendation of the University of Wisconsin-La Crosse Chancellor and the President of the University of Wisconsin System, the 1978 Campus Development Plan be approved in concept but that any project action be deferred pending clarification of environmental factors.

Regent Fish stated that a letter was delivered yesterday from the Department of Natural Resources just prior to the meeting of the Physical Planning and Development Committee indicating they wished to consider the University property located in the swamp as part of a project they have under consideration. He said the members of the Committee were not certain as to what they were considering specifically and since there was no representative from the DNR and not having had an opportunity to look into the background of the matter, it was thought that implementation should be deferred until we have had the matter clarified by DNR and the administration. Chancellor Lindner stated that he supported the resolution because it recognizes a very serious need of the University of Wisconsin-LaCrosse. He said there was an intolerable situation on the campus at the present time in that

they do not have outdoor facilities for their physical education program, for the intramural and recreation program, and for intercollegiate athletics. He said it is an ambitious program but one that is badly needed because the average acreage that is developed for physical education and recreation and athletics in the System is 47 acres per campus, whereas this would put LaCrosse at 3.94 acres of developed area for such use. He noted there is another problem relating to parking for the University staff and students. The average number of parking spaces on campus per hundred people systemwide is .27, whereas at LaCrosse it is .15. He said we are never going to cure that completely, but felt that we have serious responsibility to respond to those problems along with the aldermen of the City of LaCrosse. He said the plan was endorsed and worked on by the Bureau of Facilities Management and is one that does give the boundaries to the campus so that people within the area will know what our intentions are through this century. He noted the area was acquired by the University in 1958 from the City of LaCrosse for approximately \$1200 per acre with the intention of locating a maintenance building on one corner, which was built in 1971, and then to provide an area for physical education and recreation fields. He said he was pleased that the resolution says that before any project can be implemented we need to clarify the environmental problems because it is important that people understand that our purpose is not to fill the swamp, but to provide facilities for the students of UW-LaCrosse. He said he has received letters from the DNR, the Public Intervenor's Office, Fish and Wildlife, Corps of Engineers, and from EPA relative to the matter. He said a preliminary environmental report and impact statement has been essentially completed. He continued that before implementation of any project all of the environmental issues will have been settled satisfactorily, if that is possible.

Regent DeBardleben stated that if we adopt the resolution which had been moved we are stating in principle that we favor the development of the campus plan. Chancellor Lindner responded that as he interpreted the resolution, it is recognizing the problems and suggesting that this may be one of the solutions. Regent DeBardleben said we are indicating we really favor this as a matter of principle, unless we are prevented from doing it by environmental factors. Chancellor Lindner responded that to him the resolution says that this will meet the needs of the University, and before anything is implemented, come back and talk to us. Regent DeBardleben stated that the resolution almost implies that there is an environmental impact statement, whereas in fact there is no such statement. He noted that Chancellor Lindner previously had indicated that it was substantially completed. Chancellor Lindner stated it is substantially completed in terms of the process. The public hearing has been held, but the campus recommendation following the public hearing has not been made. In response to his questions, Regent DeBardleben was advised by Chancellor Lindner that the Environmental Protection Agency has written a letter stating they were not supportive and the position of the DNR was taken at its Board meeting last week where it voted to purchase some 500 acres of marsh land in the City of LaCrosse, including this area. Regent DeBardleben inquired what would be the damage, if any, to the UW-LaCrosse if this matter was deferred, so that the Regents could have before them, in advance of voting, the documentation consisting of the environmental impact statements and the arguments that have been advanced in opposition to this. Chancellor Lindner responded there was no reason in the world why the Regents could not have this before them, but the administration had assumed that because the Regents had purchased this in 1968 with the approval of the Building Commission that that was the intent and the proper point to touch in terms of whether or not that area

should be filled. Regent DeBardleben stated that is exactly the reason he was concerned -- that because we took an action in 1968, we should really take this action. He said he feared that taking this action -- which is "in principle" -- will be cited to us later regardless of environmental factors as the reason why we should take some future action. He inquired if there would be any great problem at UW-LaCrosse if this matter would be deferred long enough to let the Regents look at the material. Chancellor Lindner responded that he felt there would be, because the process is in place, a request for the 404 permit is in the hands of the Corps of Engineers, but if the Board so requested, he could ask the Corps to remove that from their agenda. He said the course being followed was indicated to us by the DNR as the one that we should follow, but if the Board refuses to make this decision on its own in terms of the environmental impact, of course we will move from that position.

Regent DeBardleben moved that the resolution be deferred at least until the November meeting, until we can have before us the material that will enable us to study all sides of the question, and the motion was properly seconded.

Regent Barkla stated that she felt it important that if we are going to explore with the DNR, the public intervenor and with other state agencies, they ought to know that in concept we are considering a campus plan which may involve that piece of property. She said she felt it very important that they know we may want to use this property if it is possible, after considering all the objections in the environmental impact statement. Regent Beckwith stated he would gather there is some general consensus that the University does need more land for physical development of its outdoor recreation; whether it is this land or not is the question. Obviously this is the closest parcel and is already owned by the University and is an obvious choice, but for the environmental problems. He said he was fearful if we defer this matter, we take the pressure off everyone to bring the information back to us that Regent DeBardleben wanted. He said he recognized the University needs this amount of land, recognized it should be contiguous and recognized the environmental problems, but would like to see the process of ironing that out go forward and then would like to see a report before any steps are taken to develop the land. He said that if he were the Corps of Engineers or DNR and received word of a resolution to defer the matter, he would say, O.K., put it in the dead file until the Regents are prepared to proceed.

Regent McNamara stated he agreed with Regents Barkla and Beckwith that we need to approve the motion so that the Environmental Protection Agency and the DNR both know what our intentions are so they can make a decision based on some very hard facts. He said he was also saying that when it does come up formally, what both of those agencies have to say will have a very great impact on his ultimate decision. He continued that he felt that what is proposed this morning is only part of the process to get a proper environmental response from the two agencies involved; therefore he would support the motion.

Regent Fish said it appeared to be obvious that members of the Committee were concerned about these environmental aspects, but would oppose deferring any action by the Board. He stated the campus has come to us with a plan and a problem. We recognize the plan and we recognize the problem, and we are saying in this resolution that we support the plan if it meets environmental requirements. Without something in front of us there is no campus plan and there is nothing to discuss. Regent Lavine stated that

in reading the materials distributed at the table previously in the meeting, he found that the Environmental Protection Agency was saying "No" and the DNR was also saying "No". He inquired why members of the Board had not been given these items prior to today and are they not in fact the comments of those agencies as to how they view this project environmentally. Regent Fish responded we do not know as the DNR letter was dated the previous day and he was not sure that Chancellor Lindner had read them.

With the consent of the second, Regent DeBardleben moved to amend the motion to defer so as to move to defer this subject until the December 1978 meeting of the Board, so that anyone that wants to be heard knows what the definite date is. Regent DeBardleben noted the effect of the motion to approve in concept is going to place us in collision with the Environmental Protection Agency, with the DNR, and perhaps with other agencies, on the basis of the presentations that have been made here this morning. He said our action here this morning is going to be cited as indicating the position of this Board on this question and it has been conceded that we do not have the information before us to make a decision in concept. He noted Chancellor Lindner had stated he had not even officially received these papers and he may not have read them. He said he did not feel it is right for this Board to make a decision in concept on anything unless we have the facts before us. He continued that he did not believe we should be asked to do such a thing on the basis that we can later reverse ourselves after our decision will have been cited to others as representing our position. He said he had heard nothing advanced here as to why anyone is going to be prejudiced if this matter is deferred until December. It is not going to be an indefinite deferment, but it will tell the world if they want to make a presentation to us, they can make it by that meeting. Regent Gerrard stated that he felt we are only approving a concept and that if we do not approve it, we are tearing to pieces people that can generate something behind this project. He said he felt it is a very important issue and urged that it be supported, because all we are telling the people at the LaCrosse Campus is to go and see the DNR and see what you can work out, and see everybody else and see what you can work out with them. He said we really need this piece of land and all we are asking for today is to let the University proceed with all the agencies to determine what can be done, and after they see what can be done, they have to come back to the Board again.

Regent Lawton stated he could not vote for the primary resolution. He said he had nothing to do with passing the original plan years ago, had no idea what alternatives have been considered, and had a great deal of trouble rubber-stamping this concept and that he had not been presented alternatives for badly needed outdoor recreational facilities. He said he would support Regent DeBardleben's motion to defer until he had more information.

President Young stated he was not speaking for or against the motion, but what the administration would understand if it passes is that we would make it clear to everyone that this recognizes the problem at LaCrosse, encourages the campus to negotiate with the city for part of this plan, but in the area to the north, we will do nothing to use that land. Furthermore we will work out the problem with the DNR because he did not want to be a party to fighting with the DNR -- they have problems and he would want it to be clear that any action taken today would not say we are going to go ahead if we get the approval of the Corps of Engineers. He said we are more concerned really

about the DNR than we are about the Corps of Engineers. Regent DeBardeleben inquired of President Young what is the objection to waiting until December. President Young responded that he felt it is a technicality of keeping the paper work flowing. Mr. Peter Peshek, Public Intervenor, stated he appeared before the DNR Citizen's Board continually to assist in setting policy. He said he was asking the Board of Regents as citizen policy makers to tell their staff to move out of the wetlands. He recommended the resolution be revised to provide the staff shall not proceed with further processing of the 401 and 404 permits until the Board has had a chance to make the policy decision as to whether or not it wants to seek the use of the wetlands. He continued that by passing the existing resolution the processing will continue and that is going to cause governmental agencies and environmental groups to do things in the way of legal proceedings to try to box this thing up.

Regent Beckwith inquired as to what is going to happen in two months that will be any different than right now. Mr. Peshek responded that in two months you can ask the staff to bring you all the facts that are available so that you as citizen policy makers can tell staff, yes, go ahead and seek agency approval for this or no, we as policy makers do not want to have those wetlands destroyed. Regent McNamara stated that he objected to Mr. Peshek's remarks because people who have a certain point of view try to use technicalities to prevent decision making and that is what he is doing this morning. He pointed out that if we are to have an environmental impact study, we have to have something to study and the only way we can have something to study is to pass this motion and then the DNR and the Environmental Agency know what our intentions are and they could respond. He pointed out that if we followed Mr. Peshek's recommendations, we are doing nothing for two months, they won't do anything, and that will go on forever. He pointed out that we are committed to the environment but what he wants is the environmental people to come in with something thing positive so that he can make a decision. He said Regent DeBardeleben's motion would not give him that information, and Mr. Peshek's suggestion would postpone it forever; so the only sensible thing for us to do is to pass this motion, get the environmental impact study, and then study the matter and make the ultimate decision. He said at this point he did not know how he was going to vote, because he did not know anything about the wetlands.

Regent Barkla stated she respected what President Young said about not having a confrontation with DNR but that we ought to consider that when the DNR sends us a letter the day of our Committee meeting saying that they may not only object to the campus plan, but they want to buy our land, and when Mr. Peshek says we should get out of the wetlands altogether, that indicated to her that they wanted us to decide we have no further use for that land. She pointed out we own the land, whether it is wetland or otherwise, and did not feel we ought to make a statement today that we are going to study it -- they know we have a proposed plan. Regent Lavine stated he did not believe it is unreasonable that we wait thirty days as some of the members of the Board would like the opportunity to read all the available materials before we are put in a position of making a decision. He said he did not feel it was satisfactory to have three agencies come in with what look to be final statements and not have a chance to really sit down and read them before we are asked to vote on them.

Regent Lawton, with the consent of the maker of the amendment motion, and of the second, moved that the matter be delayed for one month. The question was put on the amendment and it failed on a roll call vote, with Regents DeBardeleben, Lavine, Lawton and Walter voting "Aye" (4), with Regents Barkla, Beckwith, Elliott, Erdman, Fish, Fitzgerald, Gerrard, Hales, McNamara, Neshek, and Thompson voting "No" (11), and with Regent Grover absent.

Regent DeBardleben moved that the resolution be amended so as to add the following words: "and no action shall be taken by way of applying for a 401 or a 404 permit until this Board shall have considered the environmental factors involved", and the amendment was properly seconded.

Regent McNamara stated the proposed amendment means precisely, in different words of course, what we have just defeated; therefore having taken the action once, he saw no point in taking the same action the second time. Regent DeBardleben stated the amendment does not say the same thing as the one just defeated, unless the persons who voted against the motion to defer meant something a little different than was said. He stated the reason for the motion to defer was because the adoption of the resolution would involve the taking of a position in concept upon this issue. If we are really not taking a position, if we really do want to consider the environmental factors before we take action, then we should effectively prohibit action, and that is all this does. It seeks to do exactly what the proponents of this resolution say they mean. In other words we do not want Chancellor Lindner or anyone else processing an application which will place the Board in collision with the DNR and the EPA until we have the facts.

Regent Beckwith stated voting for this amendment is voting "yes" for Mr. Peshek -- if the whole process stops, we will never have before this Board the real adversary test of the environmental issues even if the Corps of Engineers should grant a permit. He pointed out we are not obligated to use that permit -- we are not obligated to fill that land even if they do grant it. He said he wanted to see whether this is a real wetland, or as somebody suggested, a repository for trucks and tires. Regent DeBardleben stated that what you are asking for if you defeat this motion to amend is an adversary test before the courts in which this Board will not even have had a hearing on it, and will not even have advised itself. Regent Fish stated there will be no court determination unless and until we execute the permit that is granted to us -- we will not execute any permit until this Board has discussed it. Regent DeBardleben stated he believed that the minute you file an application for a 401 or 404 permit, the people who oppose us on this decision and concept are obliged to come in and make their objections, and those objections and that decision can be reviewed by the courts. We are asking this Board to abrogate its decision making power without hearing the evidence in favor of allowing the court to decide.

Mr. Peshek pointed out the 404 permit has been filed and the 401 permit has been requested. He said the DNR letter of September 11 indicates the Department's position as to 401 means essentially that they probably will say "no". Within thirty days after that permit process is completed, either side has to appeal. If you seek the permit, there will be all the environmental agencies coming in to oppose it. We will file separately in the next couple or three weeks, challenging what you are doing, because you are seeking it now. You are saying, Staff: go ahead and seek approval. If you do that, there has to be opposition. Regent Lavine stated it was his understanding of Mr. Peshek's position, that no action shall be taken by way of further application for further action on 401 or 404, and not trying to stop what has happened to date. Mr. Peshek agreed to the above position. Regent Lavine inquired of the Chairman of the Committee if this amendment is changed, could you bring back in November, the opportunity, not only to read the three items presented to the Board today, but to have an evaluation from our staff as to a summary of all the things to date. Regent Gerrard responded in the affirmative. Regent DeBardleben stated this is the first time we are being told that someone else has to read something for us -- there is a great volume of material here and we cannot be allowed to see it, but we are going to vote on it. He said we are getting ambiguous readings as to what the effect of the 401, 404

planning is -- we are being told on one hand it means nothing, and on the other we are going to be precipitated into a court fight and we haven't even had a chance to really consider our position. Regent Fish stated we are simply saying we adopt the campus plan at LaCrosse, but before we implement the utilization of the wetlands it will have to come back before the Board. In the meantime we are going to proceed with whatever filings, etc., that are necessary to find out whether it is possible for us to do so, and more important, whether it is desirable. Regent Lavine stated we are asking for time to read the material because it is a controversial issue.

With the consent of the maker of the motion to amend, and of the second, Regent Lavine moved that the amendment be revised to read "no action shall be taken by way of further processing of the 401 or 404 permits until the Board shall have considered the environmental factors involved".

Regent Lavine stated that the length of the discussion and the enthusiasm on both sides indicates this is no longer just a matter in the hands of the President of the System or the chancellor -- it is clearly now a Board matter -- and felt it is important that we make a record and state what we are doing. If we defeat this resolution, people will say the Regents are not going to come back at us by saying we will take no further action, and adding this to the original resolution appears to make it absolutely clear what it is we are doing.

The question was put on the proposed amendment, and it failed on a roll call vote, with Regents DeBardeleben, Lavine, Lawton and Walter voting "Aye" (4), with Regents Barkla, Beckwith, Elliott, Erdman, Fish, Fitzgerald, Gerrard, Hales, McNamara, Neshek and Thompson voting "No" (11), and with Regent Grover absent.

In response to his question, Regent Lavine was advised by the President of the Board that the matter will be on the Board agenda in November.

The question was put on Resolution 1762, and it was voted, with Regents Barkla, Beckwith, Elliott, Erdman, Fish, Fitzgerald, Gerrard, Hales, Lavine, McNamara, Neshek, and Thompson voting "Aye" (12), with Regents DeBardeleben, Lawton, and Walter voting "No" (3), and with Regent Grover absent.

Regent Gerrard moved adoption of the following resolution, the motion was properly seconded, and it was voted:

Resolution 1763: That, upon the recommendation of the UW-Parkside Chancellor and the President of the University of Wisconsin System, authorization be granted to name the Classroom/Modern Industry Building at UW-Parkside George Molinaro Hall.

- - -

Regent Neshek moved adoption of the following resolution, the motion was seconded by Regent Beckwith, and it was voted, with Regents Barkla, Beckwith, DeBardeleben, Elliott, Erdman, Fish, Fitzgerald, Gerrard, Hales, Lavine, Lawton, McNamara, Neshek, and Walter voting "Aye" (14), and with Regents Grover and Thompson absent:

Resolution 1764: That in accordance with sections 19.85(1)(c) and 19.85(1)(f), WIS. STATS., a closed session be held to consider employment and personal histories of specific persons, respectively.

The meeting recessed into closed session at 12:02 P.M.

The Board arose from closed session at 12:20 P.M.

President Hales announced that the following resolutions had been approved in the closed session:

Resolution 1765: That upon recommendation of the President of the UW System, the leave of absence without pay granted to Chancellor Lee Dreyfus, effective April 17, 1978 through September 15, 1978, be extended, per his request, through November 13, 1978.

Resolution 1766: That upon recommendation of the Milwaukee Chancellor and the President of the University of Wisconsin System, the following appointments to the Board of Visitors, University of Wisconsin-Milwaukee, be approved. Terms of appointment for the initial members of the Board will be for one, two, or three years, as assigned at the initial meeting of the Board of Visitors.

Frederick Dohmen
 Carl Gee
 Ray Grandbois
 Janice Kuhn
 Ray Majerus
 Barbara Michaels
 William Minehan
 Filiberto Murguia
 John M. Murry
 Ray L. Richardson
 Sarah Scott
 George R. Slater
 Nanette Winter
 Webster Woodmansee

Resolution 1767: That upon recommendation of the Madison Chancellor and the President of the University of Wisconsin System, the following appointments to the Board of Visitors, University of Wisconsin-Madison, be approved for terms ending May 1 in the years indicated:

F. Anthony Brewster, Madison	1979
Dale R. Clark, Ashland	1979
Constance W. Elvehjem, Madison	1979
Lawrence J. Fitzpatrick, Madison	1979
George S. Robbins, Marinette	1979
Mildred B. Becker, Fond du Lac	1980
Robert T. Foote, Milwaukee	1980
John R. Galloway, Neenah	1980
Margaret Nielsen, West Bend	1980
Robert Zigman, Milwaukee	1980
Donald H. Lee, Portage	1981
Byron C. Ostby, Madison	1981

Resolution 1768: That, upon recommendation of the President of the UW System and the Chancellor of the University of Wisconsin Center System, Donald Gray be appointed Dean, University of Wisconsin Center-Richland, beginning January 1, 1979 at an annual salary of \$27,500.

The meeting adjourned at 12:22 P.M.

10-24-78

TO: Board of Regents of the University of Wisconsin System

FROM: Regent Edward E. Hales

SUBJECT: September 19, 1978 WBVTAE Meeting

The Wisconsin Board of Vocational, Technical and Adult Education met at Nicolet College and Technical Institute in Rhinelander on September 19, 1978. This report summarizes the agenda items I believe to be of major interest to the UW System.

Report of the State Director

Federal appropriation bills for Vocational Education have not yet been passed in the Senate. House/Senate conference committee is expected to receive the issue in the next few weeks. The CETA bills, in both House and Senate, provide for close coordination of CETA and vocational education activities and retain set aside monies for vocational education purposes. The Department of HEW is again considering cuts of up to \$135 million in vocational education funding.

Wisconsin Advisory Council on Vocational Education

Appointments to the Wisconsin Advisory Council on Vocational Education have been certified by the US Commissioner of Education. This list is appended for your convenience.

Gateway-Lake County College Reciprocal Agreement

The principle that college transfer credits are not included in reciprocity agreements with vocational/technical schools in neighboring states was reaffirmed by action of the WBVTAE. This item is of such interest to the UW System that the complete resolution is appended for your information.

Interstate Reciprocity Agreement with Minnesota

Data on the import and export of students in vocational/technical programs was reported as follows:

EXHIBIT A

	<u>Exported to Minnesota</u>	<u>Imported from Minnesota</u>
1972-73	67	76
1973-74	99	90
1974-75	168	176
1975-76	206	247
1976-77	263	283
1977-78	<u>298</u>	<u>277</u>
Total	1,101	1,149

Planning for the Governor's Conference on Economic Development

Planning for the Governor's Conference on Economic Development for Industry, Business, Labor, and Vocational Education is proceeding with the full cooperation of Mr. John Schmitt, Wisconsin State AFL-CIO, and Mr. Paul Hasset, Wisconsin Association of Manufacturers and Commerce.

Both organizations are participating in the generation of a mailing list and are responsible for several of the platform speakers. Participation will be limited to those receiving personal invitations by the Governor which will be mailed approximately three weeks prior to the conference date, November 28, 1978.

Guidelines for Vocational and Technical Programs

Guidelines for "Divisional Review" of vocational programs were presented to the WBVTAE by the State Board staff. Copies of the procedures are available from the UW System Office of Academic Affairs if desired.

Biennial Budget

A biennial budget request of \$118 million, which is a \$19.1 million increase over the current budget, was proposed. There was considerable discussion about the failure to ask for substantial additional funding for new programs. The budget proposal prepared by the State Board office was approved as submitted. Copies of the proposed budget are available from the UW System Office of Academic Affairs if desired.

Energy Conservation

The WBVTAE, like other state agencies, is concerned about rising costs of energy and consequently passed guidelines that require life-cycle cost analysis of new structures and entire energy systems.

Retirement of the State Director

Director Eugene Lehrmann, after forty years of service in the field of vocational education, requested retirement as of July 1, 1979.

DISTRICT-STATE RELATIONS COMMITTEE

4. Modification of the Gateway-Lake
County College reciprocal
agreement (action)

The following motion was presented by Mr. Johnson, to the Higher Educational Aids Board. It articulates a principle which is implied in the reciprocity agreements with neighboring states.

I move that the Higher Educational Aids Board concur with the VTAE reciprocity agreement between the College of Lake County and the Gateway Technical Institute with the understanding that under the terms of the agreement, Wisconsin residents are not enabled to enroll in courses offered by the College of Lake County which are intended for college transfer.

In order to clarify the policy on a statewide basis, I recommend the adoption of the following resolution.

WHEREAS, the roles of WBVTAE and the University of Wisconsin systems have been defined in the statutes, and

WHEREAS, mission limitations have been provided to safeguard against confusion of role, and

WHEREAS, WBVTAE has been circumspect in its role and as a cooperator with the University of Wisconsin, and

WHEREAS, reciprocity agreements have been reached with neighboring states involving comprehensive institutions,

NOW, THEREFORE, BE IT RESOLVED that WBVTAE reaffirm its policy on the development of college parallel programs.

BE IT FURTHER RESOLVED that VTAE districts engaging in reciprocity agreements, excepting those authorized college parallel programs, may not authorize students to enroll in courses intended for college transfer under the agreement.

The following action was taken by the District-State Relations Committee: It was agreed to recommend that the State Board concur with the motion passed by the Higher Educational Aids Board modifying the Gateway District-College of Lake County (Illinois) reciprocal agreement.

B. The Marinette County Board of Supervisors has agreed to construct a 30' x 80' storage building at the UW Center - Marinette County. A copy of the addendum to the Memorandum of Agreement between Marinette County and the Board of Regents has been added to the original agreement.

C. The 1978-79 rental agreement between the Milwaukee Area Technical College and UW Extension relative to the rental of space in North Hall, 623 West State Street, Civic Center Campus, Milwaukee, has been signed. This agreement includes two less rooms than previously rented due to the expansion of Extension's programs.

IV. REPORT OF ACTIONS TAKEN BY THE STATE BUILDING COMMISSION ON
19 SEPTEMBER 1978 AFFECTING THE UNIVERSITY OF WISCONSIN SYSTEM.

UNIVERSITY	PROJECT	ACTION
1. UW-LA CROSSE	Requested release of \$29,500 of Land Acquisition Funds to purchase one 0.05 acre parcel of land.	WITHDRAWN
	* * *	
	Requested allotment of \$7,000 of State Building Trust Funds for a 1977-79 Field House Lighting Study project.	APPROVED
2. UW-MADISON	Requested approval of the Concept and Budget Report and allotment of \$503,000 of State Building Trust Funds to prepare final plans, bid, and construct a 1977-79 Weeks Hall/Geology-Geophysics Energy Conservation project.	APPROVED
	* * *	
	Requested release of \$157,000 of Advance Planning Funds to prepare Preliminary Plans and a Concept and Budget Report for a 1979-81 Plant Sciences/Agricultural Engineering Additions and Remodeling project for an estimated total project cost of \$7,845,000.	APPROVED release of \$157,000 APF to prepare C & BR for the construction of an addition to the Horticulture/Agronomy Bldg. and construction of the first addition to the Agricultural Engineering Shops Building AND remodeling of the existing Horticulture/Agronomy Building and construction of the second addition to the Agricultural Engineering Shops Building ... having an estimated total project cost of \$10,000,000.
	* * *	

UNIVERSITY	PROJECT	ACTION
2. UW-MADISON (cont.)	Requested release of \$35,200 of Advance Planning Funds to prepare Preliminary Plans and a Concept and Budget Report for a 1979-81 King Hall Remodeling project for an estimated total project cost of \$1,760,000.	APPROVED release of \$50,000 APF to prepare a C & BR for proposed King Hall Remodeling project AND a C & BR for razing King Hall and construction of a replacement facility.
	* * *	
	Requested allotment of \$200,600 of State Building Trust Funds to plan, bid, and construct a 1977-79 Walnut Street Heating/Chilling Plant Economizers project.	APPROVED
	* * *	
	Requested allotment of \$61,260 of State Building Trust Funds to plan, bid, and construct a 1977-79 Four Charmany Farms Buildings Roof Repairs project.	DEFERRED
	* * *	
	Requested allotment of \$122,200 of State Building Trust Funds to plan, bid, and construct a 1977-79 Vilas Communication Hall Roof Repair project.	APPROVED
	* * *	
	Requested allotment of an additional \$35,000 of State Building Trust Funds for the 1975-77 Zoology Cold Room/Refrigeration System Modifications project for a revised total project cost of \$55,000.	APPROVED using Prior Funding Balances in lieu of Unprogrammed Surplus Building Trust Funds.
3. UW-MILWAUKEE	Requested authority to plan, bid, and construct a 1978 Purin Hall Roof Replacement project for an estimated total project cost of \$24,600.	WITHDRAWN
	* * *	
	Requested allotment of \$78,240 of State Building Trust Funds to plan, bid, and construct a 1977-79 Four Building Roof Repairs project.	APPROVED
	* * *	

UNIVERSITY	PROJECT	ACTION
3. UW-MILWAUKEE (cont.)	Requested allotment of \$30,000 of State Building Trust Funds for a 1977-79 Three Boilers Tube Acid Cleaning project.	APPROVED
4. UW-OSHKOSH	Requested authority to plan, bid, and construct a 1978 Temperature Controls and Ventilation Modifications project for an estimated total project cost of \$169,300.	APPROVED
5. UW-PLATTEVILLE	Requested authority to plan, bid, and construct a 1978 Temperature Controls and Ventilation Modifications project for an estimated total project cost of \$109,500.	APPROVED
6. UW-STEVENS POINT	Requested authority to exchange two Board of Regent owned parcels for two privately owned parcels.	APPROVED
7. UW-STOUT	Requested approval of the Concept and Budget Report; release of an additional \$75,000 of Advance Planning Funds; authority to prepare final plans, bid, and construct the 1977-79 Library Learning Center project; and authority to increase the project budget by \$685,900 for a revised total project cost of \$6,972,900.	APPROVED release of \$75,000 APF, authority to plan, bid, and construct with a revised total project cost of \$6,772,900 (deleting \$200,000 for an automated book retrieval system).
	NOTE: The Commission, noting that automated book retrieval systems at UW-Oshkosh and UW-Parkside were installed using operating budget funds, suggested the Regents consider use of operating budget funds for the automated book retrieval system at UW-Stout.	
	Requested authority to plan, bid, and construct a 1978 Northeast Campus Parking Area project for an estimated total project cost of \$137,000.	APPROVED
