Special or Private Formulæ.

We wish particularly to call the attention of the Drug Trade, Physicians, Hospitals and others, to our exceptional facilities for the prompt and satisfactory execution of orders relating to special formulæ, and will be glad at any time, on receipt of necessary data, to quote prices, with the assurance always that all formulæ entrusted to us will be treated with the strictest confidence.

Our long experience and unequalled facilities as manufacturing chemists, coupled with the scrupulous care exercised in the selection of the material used, and, what is of still more importance in the preparation of special formulæ, viz., our PRACTICAL TRAINING AS RETAIL APOTHECARIES, warrant us in guaranteeing in all cases, a product representing the utmost uniformity and exactness in every respect, and, equipped as we are with the most complete and approved machinery and appliances, are enabled to execute such special orders at minimum of expense; and, further, our customers derive the benefit of material purchased at lowest obtainable cash prices, with the added advantage of our knowledge and experience in its selection.

Where orders for special formulæ are repeated, if there has, in the meantime, been any reduction in the cost of the materials entering into their composition, our customers can depend upon receiving the benefit of such reduction, and, in short, can rely always upon our exercising every care, with a view to protection of their interests. We have reference to the preparation not only of Compressed Goods, such as Pills, Triturates, Medicinal Lozenges, Hypodermic Tablets, etc., but also of Elixirs, Syrups, Wines, Suppositories of all the various shapes and sizes, Fluid Extracts and other medicinal compounds of original or private formulæ, orders for which are respectfully solicited.

MANUFACTURED BY

JOHN WYETH & BROTHER,
PHILADELPHIA.

JANUARY 3, 1899.

NOTES.

CANNOT SUPPLY LOOSE LABELS

1.—We are quite often requested by our customers to supply loose labels for replacing those soiled or shop-worn, and while we recognize that in most cases, they are asked for with the feeling that our interests will be served quite as much as those of our customers, still we are obliged to decline, as we are unwilling to become responsible for goods not labelled under our own immediate supervision and direction, and feel satisfied if the matter is given a moment's thought, it will be evident that it would be both unwise and unsafe for us to pursue any other course.

MAIL PACKAGES INSURED AT MINIMUM COST

2.—While we use every care to secure to our customers prompt delivery of mail packages, our responsibility ceases when these are placed in the hands of the postal authorities, but for a nominal consideration we are willing to indemnify the consignee to a limited extent; that is to say for a consideration of five cents, this to be charged in the invoice, we will hold ourselves responsible to our customer or consignee, in case of loss, to the extent of \$5.00 and for a consideration of ten cents, not to exceed \$10.00. Our customers, therefore, will kindly bear this in mind when ordering, indicating their wishes as follows: "*Provide for mail insurance.*" Without such instructions it will be understood that we assume no responsibility in the matter.

CANNOT EXCHANGE, OR GIVE CREDIT FOR BROKEN PACKAGES

3.—We cannot undertake to accept for credit or exchange, broken or opened packages, i. e., where stoppers (cap or cork) have been removed or seals broken, but will exchange any of our preparations, in original or unbroken packages, which may have undergone change from causes impairing their efficacy.

Since to attain the end desired, a Suppository must be so prepared that it will break down readily at the

temperature of the body (98.06° Fahr.), it is not possible, of course, to manufacture Suppositories which will not also break down when subjected to that temperature in stock, and we have, therefore, taken the precaution of attaching to each package a caution label that "These Suppositories must be kept in a cool place, preferably a refrigerator." We cannot undertake to make good any losses sustained through the breaking down or melting of Suppositories subjected to heat in excess of 97° Fahr.

SHIPPING DIRECTIONS

4.—Customers are particularly requested when ordering goods, to specify by what line or route they wish them shipped, otherwise we will use our own judgment, studying the best interest of our customers.

REMIT WHEN ORDERING

5.—Those with whom we have no regular correspondence will please make remittance when sending orders; unless this request is complied with, we will be compelled to decline forwarding. This is made imperative owing to the fact that many purchasers of small amounts pay little or no attention to the payment of such accounts. Under no circumstances will we send goods C. O. D. unless the order is accompanied with check, draft, or P. O. order for at least sufficient to cover cost of transportation. Our prices are very moderate, and the small margin of profit necessitates our insisting upon the above requests being complied with.

FLUCTUATING PRICES

6.—While we make every possible effort to keep our customers advised of fluctuation in prices of our products, we cannot be held responsible when this is not done. Current prices must be considered as applying on all orders when received and we will not entertain claims for allowances in case of a decline in market values, as it would be quite as consistent for us to make claim on our customers in case of an advance on goods recently purchased. Our prices are subject to market changes without notice, and special quotations are only binding for acceptance by return of mail.

COLD WEATHER SHIPMENTS

7.—Owing to liability to freeze if exposed to a low temperature, shipments of Liquid Malt Extract and Dialysed Iron should be avoided during extremely cold weather. If shipment is ordered during such period, same will be at the risk of consignee.

ALWAYS SPECIFY "PILLS" OR "TRITURATES"

8.—Customers are particularly requested in ordering compressed goods to specify whether Tablet Triturates or Pills are wanted, as *when Triturates are not indicated we invariably send Pills*. When ordering Pills specify plain or sugar-coated; uncoated Pills will be sent unless otherwise indicated. Compliance with this request will materially assist us in filling orders.

BREAKAGE AND SHORTAGE

9.—We exercise the greatest care to deliver all goods in prime order to the Transportation Companies, who act as agents of the purchaser, and to whom all claims for loss or breakage in transit should be referred. If however, our customers will report to us promptly on receipt of goods any shortage or breakage which may have occurred, we shall always be glad to promptly adjust any loss, whether from shortage, leakage or breakage directly traceable to any fault or negligence on our part, or to assist them in properly establishing their claim against the Transportation Company, but, kindly note, that all claims to receive attention must be made within ten days from receipt of goods, and accompanied by packer's ticket, which will be found in the top of each case of goods shipped.

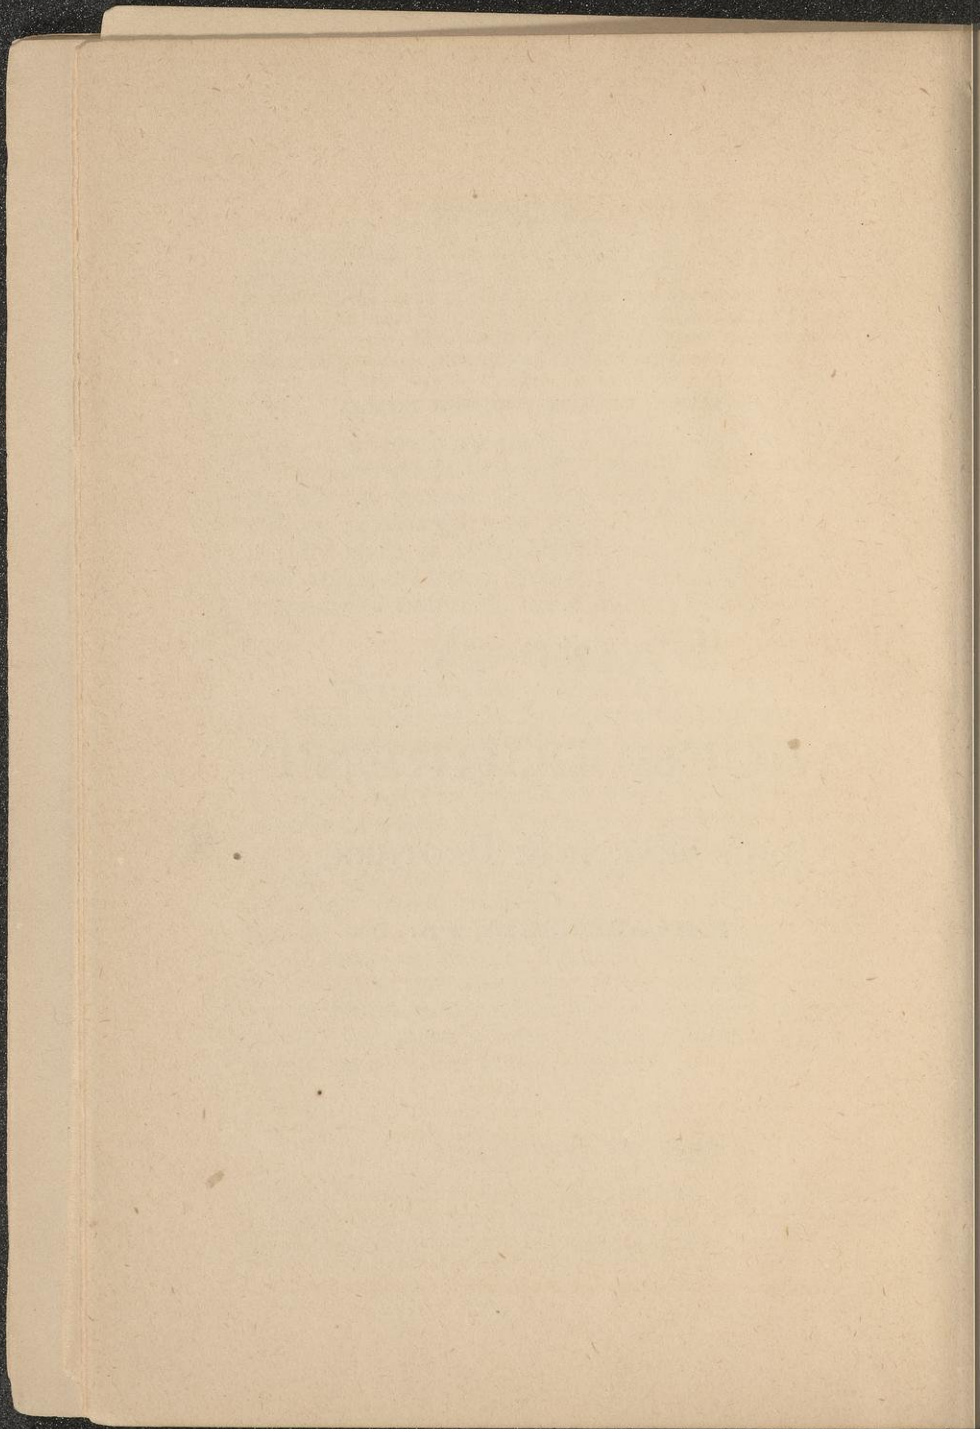

ADDITIONS TO LIST

are indicated by HEAVY FACED TYPE; either the *name* of the preparation or the *number* (as in Suppositories and Hypodermic Tablets) so appearing.

We cannot undertake to accept for Credit or exchange, broken or opened packages, i. e., where stoppers (cap or cork) have been removed or seals broken, but will exchange any of our preparations, in original or unbroken packages, which may have undergone change from causes impairing their efficacy.

Special Prices when ordered in Bulk (5 gal., or more);
also, special formulæ prepared at lowest figures.
Write for quotations.

ELIXIRS.

When ordering our preparations by the gallon, please specify the style of package; whether glass or jug is preferred.

Elixir Acid Salicylic.

Per gallon	\$6 00	Per quart	\$1 75
Per five pint	4 00	Per dozen pints	11 00

Two grains Acid Salicylic in each fluidrachm.

Elixir Aloin, Bellad. and Strych. (Sweetened).

Per gallon	\$4 25	Per quart	\$1 25
Per five pint	3 00	Per dozen pints	8 00

Each fluidrachm contains one-fifth grain Aloin, one-eighth grain Ext. Belladonna Leaves and one-sixtieth grain Strychnine.

Elixir Ammonium Bromide.

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Five grains Ammonium Bromide in each fluidrachm.

Elixir Ammonium Valerianate.

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Two grains crystallized Ammon. Valerianate in each fluidrachm.

ELIXIRS

Part A

In Ordering our Preparations through Dealers,

Elixir Anti-Asthmatic (Hare).

Per gallon	\$7 00	Per quart	\$1 90
Per five pint	4 50	Per dozen pints	12 00

Each fluidrachm contains two grains Sodium Iodide, two grains Sodium Brom., three minims Fl. Ext. Euphorbia, 1-200 grain Glonoin (Nitro-Glycerine), 2 minims Tinct. Lobelia (Herb).

Elixir Anti-Dyspeptic.

Per gallon	\$7 00	Per quart	\$1 90
Per five pint	4 50	Per dozen pints	12 00

Each dessertspoonful contains one grain Pepsin, two grains Pancreatin, one grain Cascara Sag., one-fifth grain Ipecac, one-sixtieth grain Strychnine, with the active constituents of thirty minims Antiseptic Solution.

Elixir Bismuth.

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Two grains Bismuth and Am. Cit. in each fluidrachm.

Elixir Bismuth and Strychnine.

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Two grains Bismuth and Ammonium Citrate and one-sixtieth grain Strychnine in each fluidrachm.

Elixir of Buchu.

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Each fluidrachm represents thirty grains of Buchu.

Elixir Buchu, Juniper, Uva Ursi and Potass. Acetate.

Per gallon	\$8 00	Per quart	\$2 50
Per five pint	5 50	Per dozen pints	15 00

Each fluidrachm contains ten grains Buchu, five grains Juniper Berries, five grains Uva Ursi and three grains Potass. Acetate.

Elixir Buckthorn Bark.

(Rhamnus Frangula.)

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Each fluidrachm represents thirty grains of Buckthorn Bark.

ELIXIRS

Please Specify **JOHN WYETH & BRO'S.**

Elixir Calcium Bromide.

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Five grains Calcium Bromide in each fluidrachm.

Elixir Calisaya (Cinchona).

Per gallon	\$4 00	Per quart	\$1 20
Per five pint	2 80	Per dozen pints	7 50

Each fluidrachm contains the equivalent in the alkaloids of Quinine and Cinchona, of five grains of Calisaya Bark.

Elixir Calisaya Bark and Bismuth.

Per gallon	\$4 00	Per quart	\$1 20
Per five pint	2 80	Per dozen pints	7 50

Each fluidrachm contains the active virtues of five grains Peruvian Bark and one grain Sol. Bismuth and Ammon. Citrate.

Elixir Calisaya Bark and Iron.

Per gallon	\$4 00	Per quart	\$1 20
Per five pint	2 80	Per dozen pints	7 50

Each fluidounce contains sixteen grains Iron Cit. and forty grains Calisaya Bark.

Elixir Calisaya Bark, Iron and Bismuth.

Per gallon	\$4 00	Per quart	\$1 20
Per five pint	2 80	Per dozen pints	7 50

Five grains Calisaya Bark, two grains Iron, and one grain Bismuth and Ammonium Citrate in each fluidrachm.

Elixir Calisaya Bark, Iron, Bismuth and Strychnine.

Per gallon	\$4 50	Per quart	\$1 35
Per five pint	3 25	Per dozen pints	9 00

Ten grains Calisaya Bark, two grains Iron, two grains Bismuth and Ammonium Citrate and one-sixtieth grain Strychnine in each dessertspoonful.

ELIXIRS

Part A

In Ordering our Preparations through Dealers,

Elixir Calisaya Bark, Iron, Pepsin, Bismuth and Strychnine.

Per gallon	\$7 00	Per quart	\$1 90
Per five pint	4 50	Per dozen pints	12 00

Five grains Calisaya Bark, two grains Iron and Ammon. Citrate, five grains Sacch. Pepsin, one grain Bismuth and Ammon. Citrate, and one-sixtieth grain Strychnine in each fluidrachm.

Elixir Calisaya Bark, Iron and Strychnine.

Per gallon	\$4 00	Per quart	\$1 20
Per five pint	2 80	Per dozen pints	7 50

Five grains Calisaya Bark, two grains Iron, and one-fiftieth grain Strychnine in each fluidrachm.

Elixir Calisaya and Tinct. Iron Chloride.

Per gallon	\$4 25	Per quart	\$1 25
Per five pint	3 00	Per dozen pints	8 00

Five minims of the official Tincture Iron Chloride, and five grains Calisaya Bark in each fluidrachm.

Elixir Cascara Sagrada, Aromatic.

(Rhamnus Purshiana.)

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Fifteen grains of the Bark, with Aromatics, in each fluidrachm.

Elixir Catnep and Fennel.

Per gallon	\$5 00	Per dozen pints	\$10 50
Per five pint	3 50	Per dozen 3-oz. bottles	2 40
Per quart	1 45	Per gross 3-oz. bottles	27 00

3-oz. paneled bottles are neatly cartoned.

For infants and young children this preparation is an excellent stomachic or carminative in cases of flatulent colic, hysteria, enfeebled digestion, sour stomach, etc., and a corrective to prevent griping and nausea. *It is free from Bromides, Chloral, Opium, Purgative or other Narcotics.*

(IMPROVED)

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per doz. 12-oz.	9 00

Tinnevely Senna, Butternut (Juglans Cinerea), Podophyllin, Rochelle Salt, Sodium Bicarb., with Aromatics and Tamarinds.

Please Specify **JOHN WYETH & BRO'S.**

ELIXIR CELERY AND BLACK HAW COMPOUND.

Per gallon	\$7 00	Per quart	\$1 90
Per five pint	4 50	Per dozen pints	12 00

Each fluidrachm represents five grains Celery Seeds, five grains Kola Nuts, five grains Coca Leaves, five grains Black Haw, with Aromatics.

Elixir Cinchona, Ferrated (Red Bark)

Per gallon	\$4 00	Per quart	\$1 20
Per five pint	2 80	Per dozen pints	7 50

Four grains Iron and Ammonium Citrate and ten grains Red Peruvian Bark in each dessertspoonful.

Elixir Cinchonidine, Iron and Strychnine.

Per gallon	\$4 25	Per quart	\$1 25
Per five pint	3 00	Per dozen pints	8 00

Two grains Iron, one grain Cinchonidine, and one-sixtieth grain Strychnine in each fluidrachm.

Elixir Coca Leaves.

(Erythroxylon Coca.)

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Each tablespoonful represents twenty grains Coca Leaves.

Elixir Cordial Aromatic

Per gallon	\$3 00	Per quart	\$ 90
Per five pint	2 00	Per dozen pints	6 00

An agreeable and convenient vehicle for administering nauseous drugs.

Elixir Cramp Bark Compound.

Per gallon	\$7 00	Per quart	\$ 90
Per five pint	4 50	Per dozen pints	12 00

Each fluidounce represents twelve grains Viburnum Opulus, three grains Scullcap, six grains Wild Yam, five grains Cinnamon, five grains Cloves and two grains Nutmeg.

Part A

In Ordering our Preparations through Dealers,

Elixir of the Digestive Ferments.

Per gallon	\$7 00	Per quart	\$ 1 90
Per five pint	4 50	Per dozen pints	12 60

One teaspoonful of this Elixir will digest 1000 grains of coagulated albumen in eight ounces of acidulated water (1 per cent. HCl.), at 104° F., in four to six hours. One teaspoonful, if added to a half pint of luke-warm milk, will quickly produce a firm curd.

Elixir Diuretic (Buchu, Juniper and Pot. Acet.)

Per gallon	\$5 00	Per quart	\$ 1 45
Per five pint	3 50	Per dozen pints	10 00

Each fluidounce contains forty-five grains Buchu, forty-five grains Juniper Berries, sixteen grains Potass. Acetate.

Elixir Eucalyptus Compound.

Per gallon	\$4 50	Per quart	\$1 35
Per five pint	3 25	Per dozen pints	9 00

Each fluidrachm represents ten grains Eucalyptus, five grains Prickly-Ash Berries, five grains Grindelia Squarrosa, two and one-half grains Golden Seal, with Aromatics.

ELIXIRS

Elixir Gentian.

Per gallon	\$4 00	Per quart	\$1 20
Per five pint	2 80	Per dozen pints	7 50

One-half strength of Tinct. Gentian Comp., U. S. P.

Elixir Gentian, with Tincture Iron Chloride.

Per gallon	\$4 25	Per quart	\$1 25
Per five pint	3 00	Per dozen pints	8 00

Five minims of Tinct. Iron Chloride, U.S.P. in each fluidrachm.

Elixir Guarana.

(Paullinia Cupana.)

Per gallon	\$8 00	Per quart	\$2 50
Per five pint	5 50	Per dozen pints	15 00

Each tablespoonful represents forty grains of Guarana.

Elixir Guarana and Celery.

Per gallon	\$7 00	Per quart	\$1 90
Per five pint	4 50	Per dozen pints	12 00

Each fluidrachm represents nine grains each of Guarana and Celery.

Please Specify **JOHN WYETH & BRO'S.**

Elixir Helonias Root Compound.

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Each fluidounce represents 110 grains *Mitchella Repens*, twenty-eight grains *Viburnum Opulus*, twenty-eight grains *Caulophyllum Thalictroides*, and twenty-eight grains *Helonias Dioica*.

ELIXIR HYDRASTIS.

Per gallon	\$5 00	Per quart	\$1 45
Per 5 pint	3 50	Per dozen pints	10 00

Each four fluidounces of this Elixir represents five drachms of Fluid Extract of Hydrastis.

Elixir Hypnotic.

Per gallon	\$8 00	Per quart	\$ 2 50
Per five pint	5 50	Per dozen 14 ozs.	12 00

Each fluidounce contains Chloral Hydrate one drachm, Potass. Bromide two scruples, Ext. *Cannabis Indica* one grain, Ext. *Hyoscyamus* one grain.

Elixir Iron, Arsenic and Mercury Chlorides, Aromatic.

Per gallon	\$4 25	Per quart	\$1 25
Per five pint	3 00	Per dozen pints	8 00

Each fluidrachm contains one-eighth grain Proto-Chloride of Iron, 1-280 grain Chloride of Arsenic, 1-128 grain Bichloride of Mercury, with Elixir Calisaya Alkaloids.

Elixir Iron Citrate, Quinine and Strychnine.

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Each fluidrachm contains two grains Iron Citrate, one grain Quinine, and one-sixtieth grain Strychnine, in Simple Elixir.

Elixir Iron, Magnesia and Strychnine Sulphates.

Per gallon	\$4 50	Per quart	\$1 35
Per five pint	3 25	Per dozen pints	9 00

Each fluidrachm contains one-thirty-second grain Strychnine Sulphate, two grains Iron Sulphate, ten grains Magnesia Sulphate, Acid Sulphuric a trace; with q. s. Aromatic Cordial.

ELIXIRS

Part A

In Ordering our Preparations through Dealers,

Elixir Iron Phosphate and Quinine.

Per gallon \$5 00 | Per quart \$1 45
Per five pint 3 50 | Per dozen pints 10 00
Two grains Iron Phosphate and one grain Quinine in each fluidrachm.

Elixir Iron Phosphate, Quinine and Strychnine.

Per gallon \$5 00 | Per quart \$1 45
Per five pint 3 50 | Per dozen pints 10 50
Two grains Iron Phosphate, one grain Quinine, and one-sixtieth grain Strychnine in each fluidrachm.

Elixir Iron Pyrophosphate.

Per gallon \$4 25 | Per quart \$1 25
Per five pint 3 00 | Per dozen pints 8 00
Each fluidrachm represents five grains Calisaya Bark, with two grains Iron and Sodium Citro-pyrophosphate.

Elixir Iron Pyrophosphate, Quinine and Arsenic.

Per gallon \$5 00 | Per quart \$1 45
Per five pint 3 50 | Per dozen pints 10 00
Two grains Iron Pyrophosphate, one grain Quinine, and one-thirtieth grain Arsenic in each fluidrachm.

Elixir Iron Pyrophosphate, Quinine and Strychnine.

Per gallon \$5 00 | Per quart \$1 45
Per five pint 3 50 | Per dozen pints 10 50
Two grains Iron Pyrophosphate, one grain Quinine, and one-sixtieth grain Strychnine in each fluidrachm.

Elixir Iron, Quinine and Nux Vomica.

Per gallon \$5 00 | Per quart \$1 45
Per five pint 3 50 | Per dozen pints 10 00
Each fluidrachm contains two grains Iron, one grain Quinine, one minim Fluid Extract Nux Vomica.

ELIXIRS

Please Specify **JOHN WYETH & BRO'S.**

Elixir Kola Compound.

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Each fluidounce represents forty-eight grains Kola, forty-eight grains Celery and sixty-four grains Coca.

Elixir Liquorice Compound.

Per gallon	\$4 25	Per quart	\$1 25
Per five pint	3 00	Per dozen pints	8 00

An Aromatic Elixir for masking the bitter taste of Quinine.
Each fluidounce represents 120 grains Liquorice Root with Aromatics.

Elixir Lithiated Strontium.

Per gallon	\$8 00	Per quart	\$2 50
Per five pint	5 50	Per dozen pints	15 00

Each fluidrachm contains two grains Strontium Salicylate, one grain Strontium Iodide and two grains Lithium Salicylate.

Elixir Lithium Citrate.

Per gallon	\$8 00	Per quart	\$2 50
Per five pint	5 50	Per dozen pints	15 00

Two grains Lithium Citrate in each fluidrachm.

Neutralizing Cordial.

(RHUBARB AND POTASS. COMP. OR ALKALINE ELIXIR.)

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Composed of Rhubarb, Potassium Bicarb., Golden Seal, Ceylon Cinnamon, Pancreatin and Oil Peppermint in proportionate combination.

Elixir Nux Vomica and Ignatia Comp.

Per gallon	\$14 00	Per quart	\$4 25
Per five pint	10 00	Per dozen pints	26 00

Ten minims of the Elixir contains 1 minim Tinct. Nux Vomica, 1 minim Tinct. Ignatia Amara, 4 minims Tinct. Cinchona, 1 minim Tinct. Matricaria, ½ minim Tinct. Gentian, ½ minim Tinct. Calumba, 1-300 grain Tinct. Phosphorus C. P., and 2 minims Aromatics.

ELIXIRS

Part A

In Ordering our Preparations through Dealers,

Elixir Pepsin.

Per gallon	\$6 00	Per quart	\$1 75
Per five pint	4 00	Per dozen pints	11 00
Five grains Saccharated Pepsin in each fluidrachm.			

Elixir Pepsin and Bismuth.

Per gallon	\$6 00	Per quart	\$1 75
Per five pint	4 00	Per dozen pints	11 00
Wine of Pepsin, with one grain Bismuth and Ammonium Citrate in each fluidrachm.			

Elixir Pepsin, Bismuth and Calisaya Bark.

Per gallon	\$7 00	Per quart	\$1 90
Per five pint	4 50	Per dozen pints	12 00
Wine of Pepsin, with one grain Bismuth and Ammon. Citrate, and five grains Calisaya Bark in each fluidrachm.			

Elixir Pepsin, Bismuth and Iron.

Per gallon	\$7 00	Per quart	\$1 90
Per five pint	4 50	Per dozen pints	12 00
Each fluidrachm contains five grains Sacch. Pepsin, one grain Bismuth and Am. Cit., and two grains Iron and Am. Cit.			

Elixir Pepsin, Bismuth and Strychnine.

Per gallon	\$7 00	Per quart	\$1 90
Per five pint	4 50	Per dozen pints	12 00
Each fluidrachm contains five grains Sacch. Pepsin, one grain Bismuth and Am. Cit., and one-sixtieth grain Strychnine.			

Elixir Pepsin, Bismuth, Strychnine and Iron

Per gallon	\$7 00	Per quart	\$1 90
Per five pint	4 50	Per dozen pints	12 00
Each fluidrachm contains five grains Sacch. Pepsin, one grain Bismuth and Ammon. Citrate, one-sixtieth grain Strychnine, and one grain Iron and Ammon. Citrate.			

Elixir Pepsin, Iron and Strychnine.

Per gallon	\$7 00	Per quart	\$1 90
Per five pint	4 50	Per dozen pints	12 00
Each fluidrachm contains five grains Sacch. Pepsin, two grains Iron and Ammon. Citrate, and one-sixtieth grain Strychnine.			

ELIXIRS

Please Specify **JOHN WYETH & BRO'S.**

Elixir Pepsin, Pancreatin and Bismuth.

Per gallon	\$7 00	Per quart	\$1 90
Per five pint	4 50	Per dozen pints	12 00

Each fluidrachm contains five grains Sacch. Pepsin, five grains Sacch. Pancreatin, and one grain Bismuth and Am. Cit.

ELIXIR PEPSIN LACTATED and COMBINATIONS.

NOTE.—For List Prices for Elixir Pepsin Lactated and Combinations, see our List below for same under names of Elixir Pepsin Powder Compound, etc.

Elixir Pepsin Powder Compound.

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Each fluidounce represents thirty-eight grains Compound Pepsin Powder of the National Formulary.

Elixir Pepsin Powder Comp. and Bismuth.

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Each fluidounce represents thirty-two grains Compound Pepsin Powder, N. F., and eight grains Bismuth and Am. Citrate.

Elixir Pepsin Powder Compound, Bismuth and Strychnine.

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Each fluidounce represents thirty-two grains Compound Pepsin Powder, N. F., eight grains Bismuth and Ammonium Citrate, and one-sixteenth grain Strychnine.

Elixir Pepsin Powder Comp. with Calisaya.

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Each fluidounce represents thirty-two grains Compound Pepsin Powder, N. F., and fifty grains Calisaya Bark.

ELIXIRS

Part A

In Ordering our Preparations through Dealers,

Elixir Pepsin Powder Compound with
Calisaya and Iron.

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Each fluidounce represents thirty-two grains Compound Pepsin Powder, N. F., forty grains Calisaya Bark and twelve grains of Iron.

Elixir Pepsin Powder Compound with
Calisaya, Iron and Strychnine.

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Each fluidounce represents thirty-two grains Compound Pepsin Powder of the National Formulary, with forty grains Calisaya Bark, sixteen grains Iron and eight-sixtieths grain Strych.

ELIXIRS

Elixir Pepsin Powder Comp. with Gentian
and Iron Chloride.

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Each fluidounce represents thirty-two grains Compound Pepsin Powder, N. F., eight grains Gentian and eight grains Iron Proto. Chlor.

Elixir Pepsin Powder Compound with Iron
Quinine and Strychnine.

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Each fluidounce represents thirty-two grains Compound Pepsin Powder, N. F., four grains Iron, four grains Quinine, and one-sixteenth grain Strychnine.

Elixir Peruvian Bark and Iron.

Per gallon	\$4 25	Per quart	\$1 25
Per five pint	3 00	Per dozen pints	8 00

Each pint represents 640 grains of best Peruvian Bark, and 256 grains Iron Pyrophosphate, combined with Aromatics.

Please Specify JOHN WYETH & BRO'S.

Elixir Phosphates Comp.

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

The alkaloids of Peruvian Bark with the Phosphates of Lime, Sodium and Iron.

Elixir of the Phosphates and Calisaya.

(Chemical Food with Cinchona.)

Per gallon	\$4 25	Per quart	\$1 25
Per five pint	3 00	Per dozen pints	8 00

Each pint represents the strength of one ounce of Peruvian Bark, and each tablespoonful contains one grain of freshly precipitated Iron Phosphate, two grains Lime Phosphate, one-half grain Sodium Phosphate, with a slight excess of Acid Phosphoric.

Elixir Phosphorus (Free).

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Each fluidrachm contains 1-100 grain of Free Phosphorus.

Elixir Phosphorus Compound.

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

1-100 grain of Phosphorus and one grain of Nux Vomica in each fluidrachm.

Elixir Potassium Bromide.

Per gallon	\$4 25	Per quart	\$1 25
Per five pint	3 00	Per dozen pints	8 00

Ten grains Potassium Bromide in each fluidrachm.

Elixir Quinine and Strychnine.

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

One grain Quinine and one-sixtieth grain Strychnine in each fluidrachm.

ELIXIRS

Part A

In Ordering our Preparations through Dealers,

ELIXIR RED GUM COMP.

Per gallon	\$7 00	Per quart	\$1 90
Per five pint	4 50	Per dozen pints	12 00
Each fluidounce contains fifteen grains Red Gum, seven and one-half grains Witch Hazel, five grains Guarana, five grains Cinnamon, one grain Opium.			

Elixir Rhubarb and Magnesium.

Per gallon	\$4 25	Per quart	\$1 25
Per five pint	3 00	Per dozen pints	8 00
Each fluidrachm represents twenty grains Comp. Powder of Rhubarb, U. S. P.			

Elixir Saw Palmetto Compound.

Per gallon	\$7 00	Per quart	\$1 90
Per five pint	4 50	Per dozen pints	12 00
A pleasant and very efficient combination of Saw Palmetto, Sandal Wood, Damiana, Potass. Acetate, Coca Leaves, Nux Vomica and Kola Nut.			

ELIXIR SAW PALMETTO, CORN SILK AND SANDALWOOD.

Per gallon	\$6 00	Per quart	\$1 75
Per five pint	4 00	Per dozen pints	11 00
Each fluidounce represents one hundred and twenty grains Saw Palmetto, one hundred and twenty grains Corn Silk, thirty grains Sandalwood.			

Elixir Saw Palmetto and Pichi Comp.

Per gallon	\$7 00	Per quart	\$1 90
Per five pint	4 50	Per dozen pints	12 00
A pleasant and very efficient combination of Saw Palmetto, Sandal Wood, Damiana, Acetate Potass., Coca Leaves, Nux Vomica, Kola Nut and Pichi.			

ELIXIR SAW PALMETTO AND SANDAL COMP.

Per gallon	\$6 00	Per quart	\$1 75
Per five pint	4 00	Per dozen pints	11 00
Each fluidounce represents one hundred and twenty grains Saw Palmetto, twenty-four grains Sandal Wood.			

ELIXIRS

Please Specify **JOHN WYETH & BRO'S.**

Elixir Sedative Comp.

Per gallon	\$14 00	Per quart	\$ 4 25
Per five pint	10 00	Per dozen pints	26 00
Per dozen 4 oz. bottles . . \$7 00			

Each fluidrachm contains fifteen grains Chloral Hydrate, fifteen grains Bromide Potass., one-eighth grain Ext. Hyoscyami and one-eighth grain Ext. Cannab. Indica.

Elixir Sodium Bromide.

Per gallon	\$4 25	Per quart	\$1 25
Per five pint	3 00	Per dozen pints	8 00
Ten grains Sodium Bromide in each fluidrachm.			

Elixir Sodium Salicylate Compound.

Per gallon	\$7 50	Per quart	\$2 25
Per five pint	5 00	Per dozen pints	14 00

Each fluidrachm contains Acid Salicylic three and one-half grains, Black Cohosh one grain, Yellow Jasmine one grain, Potass. Iodide one grain, Sodium Bicarb. q. s.

Elixir Stillingia Compound.

Per gallon	\$4 25	Per quart	\$1 25
Per five pint	3 00	Per dozen pints	8 00

Each fluidounce represents thirty grains Stillingia, thirty grains Turkey Corn, fifteen grains Blue Flag, fifteen grains Yellow Dock, seven and one-half grains Coriander, and seven and one-half grains Prickly-Ash Berries.

Elixir Strontium Bromide.

Per gallon	\$8 00	Per quart	\$2 50
Per five pint	5 50	Per dozen pints	15 00

Each fluidounce contains forty grains pure Strontium Bromide, sweetened with Saccharine.

Elixir Strontium Salicylate.

Per gallon	\$8 00	Per quart	\$ 2 50
Per five pint	5 50	Per dozen pints	15 00

Each fluidrachm contains two and one-half grains Strontium Salicylate, sweetened with Saccharine.

ELIXIRS

Part A

In Ordering our Preparations through Dealers,

Elixir Strontium Salicylate Compound.

Per gallon	\$8 00	Per quart	\$ 2 50
Per five pint	5 50	Per dozen pints	15 00

Each fluidrachm contains Strontium Salicylate two grains, Strontium Iodide one grain, Wine of Colchicum five minims, Tinct. Gelsemium two minims, sweetened with Saccharine.

Elixir Sumbul Compound.

Per gallon	\$7 00	Per quart	\$1 90
Per five pint	4 50	Per dozen pints	12 00

Each fluidounce represents sixty grains Sumbul, fifteen grains Scullcap, and four grains Valerian.

Elixir Taraxacum Compound.

Per gallon	\$4 25	Per quart	\$1 25
Per five pint	3 00	Per dozen pints	8 00

Each fluidounce represents Taraxacum (fresh root) thirty grains, Wild Cherry Bark fifteen grains, Gentian Root ten grains, Aromatics five grains.

Elixir Terpin Hydrate.

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Each fluidrachm contains one grain of Terpin Hydrate.

NOTE.—At a temperature of 55° or lower there may be a crystalline deposit in this—which will redissolve when slightly warmed—the therapeutic value is not impaired in any way.

Elixir Terpin Hydrate Compound.

Per gallon	\$7 00	Per quart	\$1 90
Per five pint	4 50	Per dozen pints	12 00

Each fluidrachm contains one grain Terpin Hydrate, one-eighth grain Codeine Sulphate, two minims Refined Oil Tar, one minim Tinct. Lobelia, one minim Tinct. Gelsemium.

NOTE.—This Elixir will become slightly turbid at a temperature of 55° F., or lower; this turbidity does not decrease its therapeutic virtue; it will regain its original clearness upon warming it slightly.

Elixir Terpin Hydrate with Codeine.

Per gallon	\$7 00	Per quart	\$1 90
Per five pint	4 50	Per dozen pints	12 00

Each fluidrachm contains one grain Terpin Hydrate and one-eighth grain Codeine Sulphate.

NOTE.—At a temperature of 55° or lower there may be a crystalline deposit in this—which will redissolve when slightly warmed—the therapeutic value is not impaired in any way.

ELIXIRS

Please Specify JOHN WYETH & BRO'S.

ELIXIR UNICORN COMP.

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Each fluidounce represents thirty grains *Aletris Farinosa* (Unicorn Root), thirty grains *Viburnum Opulus* (Cramp Bark), thirty grains *Mitchella Repens* (Squaw Vine), fifteen grains *Caulophyllum Thalictr.* (Blue Cohosh) fifteen grains *Helonias Dioica* (False Unicorn), in combination with Aromatics.

Elixir Uterine Sedative.

Per gallon	\$4 50	Per quart	\$1 35
Per five pint	3 25	Per dozen pints	9 50

Each fluidounce contains forty grains *Viburnum Opulus* (Cramp Bark), thirty grains *Hydrastis Canadensis* (Golden Seal), twenty grains *Piscidia Erythrina* (Jamaica Dogwood), ten grains *Anemone Pulsatilla* (Pulsatilla).

Elixir Wahoo (Bark of Root).

(*Euonymus Atropurpureus*.)

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Each half fluidounce represents eighty grains Wahoo.

Elixir Yerba Santa, Aromatic.

Per gallon	\$6 00	Per quart	\$1 75
Per five pint	4 00	Per dozen pints	11 00

Each fluidrachm represents seven and one-half grains Yerba Santa with Aromatics.

Elixir Yerba Santa, Sweetened.

Per gallon	\$4 00	Per quart	\$1 20
Per five pint	2 80	Per dozen pints	7 50

This combination has been devised especially for the purpose of offering a thoroughly good preparation for masking,—and in many combinations completely disguising,—the bitter or nauseous taste of drugs, particularly that of Quinine.

Elixir Zinc Valerianate.

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

One grain Zinc Valerianate in each fluidrachm.

SYRUPS.

Syrups containing HYPOPHOSPHITES have so largely increased in number that, to assist in filling orders correctly, we have thought it advisable to designate such Syrups by NUMBER as well as by name, and for the convenience of our customers we have adopted this method.

IN ORDERING PLEASE SPECIFY BY NUMBER
AS WELL AS BY NAME.

No. 1.

Nutritive Syrup of the Hypophosphites.

LIME, SODIUM, POTASSIUM, IRON, QUININE, MANGANESE
AND STRYCHNINE.

Per gallon	\$4 00	Per quart	\$1 20
Per five pint	2 80	Per dozen pints	7 50

This preparation should be kept well corked, in a cool, dark place,
and the bottle should be *shaken when the precipitate settles.*

No. 2.

Syrup Hypophos. Comp. of Quinine, Mangan.
and Strychnine.

Per gallon	\$4 25	Per quart	\$1 25
Per five pint	3 00	Per dozen pints	8 00

Each fluidrachm contains one-half grain Iron, one-fourth grain
Quinine, one grain Sodium, one-sixty-fourth grain Strych-
nine, and one-fourth grain Manganese.

No. 3.

Syrup of Hypophosphites Compound.

(CHURCHILL'S.)

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Each fluidrachm contains two grains Lime, two grains Sodium,
and one grain Potassium.

SYRUPS

Please Specify **JOHN WYETH & BRO'S.**

NO. 4.**Syrup of Hypophosphites Compound and Iron.**

Per gallon \$5 00 | Per quart \$1 45
 Per five pint 3 50 | Per dozen pints 10 00

Each fluidrachm contains two grains Lime, two grains Sodium,
 one grain Potassium, and one-half grain Iron.

NO. 5.**Syrup Hypophosphites Comp. with Quinine.**

Per gallon \$6 00 | Per quart \$1 75
 Per five pint 4 00 | Per dozen pints 11 00

Two grains Lime, two grains Sodium, one grain Potassium,
 one-half grain Iron, and one-half grain Quinine in each
 fluidrachm.

NO. 6.**Syrup of the Hypophosphites Compound
with Quinine and Nux Vomica.**

Per gallon \$6 00 | Per quart \$1 75
 Per five pint 4 00 | Per dozen pints 11 00

Each fluidrachm contains two grains Lime, two grains Sodium,
 one grain Potassium, one-half grain Iron, one-half grain
 Quinine Hypophosphite and one grain Nux Vomica.

NO. 7.**Syrup of the Hypophosphites Compound
with Quinine and Strychnine.**

Per gallon \$6 00 | Per quart \$1 75
 Per five pint 4 00 | Per dozen pints 11 00

Each fluidrachm contains one grain Lime, one grain Sodium,
 one-half grain Potassium, one grain Iron, one grain Quinine,
 one-fourth grain Strychnine.

NO. 8.**Syrup of the Hypophosphites Compound
with Strychnine.**

Per gallon \$5 00 | Per quart \$1 45
 Per five pint 3 50 | Per dozen pints 10 00

Each fluidrachm contains one grain Lime, one grain Sodium,
 one-half grain Potassium, one grain Iron and one-fourth
 eighth grain Strychnine.

SYRUPS

Part A

In Ordering our Preparations through Dealers,

No. 9.

Syrup Hypophosphites, U. S. P., 1890.

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Each fluidounce contains 20% grains Lime Hypophos., 6% grains Sodium Hypophos., 6% grains Potass. Hypophos.

No. 10.

Syrup Hypophosphites with Iron, U. S. P.

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Each fluidounce contains 20% grains Lime Hypophos., 6% grains Sodium Hypophos., 6% grains Potassium Hypophos., 4 9-16 grains Iron Lactate, 4 9-16 grains Potassium Citrate.

No. 11.

Syrup Hypophosphites Compound, Improved.

NATIONAL FORMULARY.

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Each fluidrachm contains two grains Calcium Hypophos., one grain Potassium Hypophos., one grain Sodium Hypophos., one-eighth grain Iron Hypophos., one-eighth grain Mangan. Hypophos., one-sixteenth grain Quinine Hydrochlorate, and one and one-fourth minims Tinct. Nux Vomica.

No. 12.

Syrup Hypophosphites of Lime and Sodium.

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Each fluidrachm contains two grains Lime Hypophosphite and two grains Sodium Hypophosphite.

No. 13.

Syrup Hypophosphite of Iron.

Per gallon	\$4 25	Per quart	\$1 25
Per five pint	3 00	Per dozen pints	8 00

One grain Iron Hypophosphite in each fluidrachm.

SYRUPS

Please Specify **JOHN WYETH & BRO'S.**

No. 14.

Syrup Hypophosphite of Lime.

Per gallon	\$4 25	Per quart	\$1 25
Per five pint	3 00	Per dozen pints	8 00

Two grains Lime Hypophosphite in each fluidrachm.

No. 15.

Syrup Hypophosphite of Sodium.

Per gallon	\$4 25	Per quart	\$1 25
Per five pint	3 00	Per dozen pints	8 00

Two grains Sodium Hypophosphite in each fluidrachm.

No. 16.

SOLUTION Hypophosphites Comp. (No Sugar).

SEE PAGE 29

No. 20.

SYRUP OF THE HYPOPHOSPHITES COMPOUND.

(HEMATIC HYPOPHOSPHITES.)

Per gallon	\$4 25	Per quart	\$1 25
Per five pint	3 00	Per dozen pints	8 00

Each fluidounce contains one grain Hypophosphite of Lime, one-eighth grain Hypophosphite of Soda, one and one-half grains Hypophosphite of Potass., one and one-quarter grains Hypophosphite of Iron, seven-sixteenths grain Hypophosphite of Quinine, one grain Hypophosphite of Manganese, and one-eighth grain Hypophosphite of Strychnine.

SYRUPS

Syrup Acid Hydriodic.

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 50

Each fluidounce of this Syrup contains 6.675 grains Acid Hydriodic, which represents 6.66 grains Iodine, or is equivalent to 8.69 grains Potass. Iodide.

Syrup Iron Iodide, U. S. P.

Per dozen pounds	\$8 00
Per gallon (equal to 11 lbs. and 14 ozs.)	7 50

Syrup Iron and Manganese Iodides.

Per dozen pounds	\$12 00
----------------------------	---------

Each fluidounce contains twenty grains each of Iron Iodide and Manganese Iodide.

Part A

In Ordering our Preparations through Dealers,

Syrup Iron, Quinine and Strychnine Phosph.

Per gallon	\$6 00	Per quart	\$1 75
Per five pint	4 00	Per dozen pints	11 00

Two grains Iron Phosphate, one grain Quinine Phosphate and one-sixtieth grain Strychnine Phosphate in each fluidrachm.

Syrup Iron, Quinine and Strychnine Lactophosphates.

Per gallon	\$6 00	Per quart	\$1 75
Per five pint	4 00	Per dozen pints	11 00

Two grains Iron, one grain Quinine and one-sixtieth grain Strychnine in each dessertspoonful.

Syrup Lactophosphates Compound.

(Lime, Iron and Potassium.)

Per gallon	\$8 00	Per quart	\$2 50
Per five pint	5 50	Per dozen pints	15 00

Each fluidrachm contains one grain Lime Lactophosphate, one-half grain Iron Lactophosphate, and one-fourth grain Potass. Lactophosphate.

Syrup Lime Iodide.

Per dozen pounds	\$12 00
----------------------------	---------

Two grains Lime Iodide in each fluidrachm.

Syrup Lime Lactophosphate.

Per gallon	\$7 00	Per quart	\$1 90
Per five pint	4 50	Per dozen pints	12 00

Two grains Lime Lactophosphate in each fluidrachm. It is prepared with an excess of Acid Lactic.

SYRUP PENTA BROMIDES.

(Syrup Five Bromides.)

Per gallon	\$8 00	Per quart	\$2 50
Per five pint	5 50	Per dozen pints	15 00

Each fluidrachm contains five grains Bromide Sodium, four grains Bromide Potass., three grains Bromide Calcium, two grains Bromide Lithium, one grain Bromide Ammonium.

Syrup Pectoral-(Jackson.)

Per doz. 4-oz. bottles . . .	\$3 00	Per gross 4-oz. bottles .	\$30 00
------------------------------	--------	---------------------------	---------

Made from the formula of the late Prof. Samuel Jackson.

SYRUPS

Please Specify **JOHN WYETH & BRO'S.**

Syrup Phosphates Compound.

(CHEMICAL, FOOD.)

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Each fluidrachm contains one grain freshly precipitated Iron Phosphate, two grains Lime Phosphate, one grain Sodium Phosphate, one-half grain Potassium Phosphate, with slight excess of Acid Phosphoric.

Syrup Phosphates Compound with Muriate of Quinine.

Per gallon	\$7 00	Per quart	\$1 90
Per five pint	4 50	Per dozen pints	12 00

Each fluidrachm contains 1 3-4 grains Potass. Phosphate, 1 grain Magnesia Phosphate, 3-4 grain Lime Phosphate, 1 grain Iron Phosphate, 1-120 grain Strychnia Phosphate, 1-4 grain Quinine Muriate, Syrupy Phosphoric Acid q. s. and free—Simple Syrup q. s.

Syrup of Tar.

Per gallon	\$4 00	Per quart	\$1 20
Per five pint	2 80	Per dozen pints	7 50

Very useful in cases of pulmonary diseases—in phthisis, chronic bronchitis and the catarrhs of the broncho-pulmonary tract. It can be used with much success in the catarrhal affections of the mucous membranes in general, and especially besides the pulmonary, in those of the genito-urinary passages.

Syrup Trifolium Comp.

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Each fluidounce represents thirty-two grains Red Clover, sixteen grains Burdock Root, sixteen grains Poke Root, sixteen grains Berberis Aquifolium, sixteen grains Cascara Amarga, four grains Prickly-Ash Berries, and eight grains Potassium Iodide

Syrup White Pine Compound.

Per gallon	\$4 25	Per quart	\$1 25
Per five pint	3 00	Per dozen pints	8 00

Each fluidounce represents the following ingredients: White Pine Bark thirty grs., Wild Cherry Bark thirty grs., Spikenard four grs., Balm Gilead Buds four grs., Blood Root three grs., Sassafras Bark two grs., Morph. Sulph. three-sixteenths gr., Chloroform four minims.

SYRUPS

Part A

In Ordering our Preparations through Dealers,

Syrup White Pine Compound and Tar.

Per gallon	\$4 25	Per quart	\$1 25
Per five pint	3 00	Per dozen pints	8 00

Same formula as Syrup White Pine Co., with the addition of Tar.

Syrup Yerba Santa Aromatic.

Per gallon	\$5 00	Per quart	\$1 40
Per five pint	3 40	Per dozen pints	9 00

Each fluidrachm represents seven and one-half grains of Yerba Santa, with Aromatics.

SYRUPS

Please Specify **JOHN WYETH & BRO'S.**

WINES.

Wine of American Ash.

(Fraxinus Americana.)

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Each tablespoonful represents sixty grains of the bark.

Wine of Calisaya.

Per gallon	\$4 25	Per quart	\$1 25
Per five pint	3 00	Per dozen pints	8 00

Each drachm represents five grains of Calisaya Bark.

Wine of Coca.

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Each fluidounce represents sixty grains of Coca Leaves with Sherry Wine and Aromatics.

FERRO-PEPTONIZED

Wine of Cod Liver Oil Extract.

Per gallon	\$4 25	Per quart	\$1 25
Per five pint	3 00	Per dozen pints	8 00

This preparation contains the extractive alkaloidal principles (so-called) of Cod Liver Oil in a pleasant, acceptable and palatable combination with Peptonized Iron and Port Wine. Each ounce represents one-fourth its volume of Cod Liver Oil, eight grs. Peptonized Iron with Port Wine and Aromatics

WINE OF COD LIVER OIL EXTRACT WITH CHERRY AND HYPOPHOSPHITES.

Per gallon	\$4 50	Per quart	\$1 35
Per five pint	3 25	Per dozen pints	9 00

Each fluidounce represents one-fourth its volume of Cod Liver Oil with Extract of Malt, Fluid Extract Wild Cherry Bark and the Hypophosphites of Lime, Soda, Potass., Iron, Manganese, Quinine and Strychnine.

W I N E S

Part A

In Ordering our Preparations through Dealers,

Wine of Glycero-Phosphate of Lime.

Per gallon	\$8 00	Per quart	\$2 50
Per five pint	5 50	Per dozen pints	15 70

Each ounce contains ten grains of the salt.

Wine of Ergot.

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Strength, United States Pharmacopoeia, 1890.

Wine of Iron.

Per gallon	\$4 25	Per quart	\$1 25
Per five pint	3 00	Per dozen pints	8 00

One grain Iron and Am. Cit. in each fluidrachm.

Bitter Wine of Iron.

Per gallon	\$4 25	Per quart	\$1 25
Per five pint	3 00	Per dozen pints	8 00

Each fluidrachm contains two grains Iron and Am. Cit. and five grains Calisaya Bark.

Wine of Kola Compound.

KOLA, CELERY AND COCA.

Per gallon	\$7 00	Per quart	\$1 90
Per five pint	4 50	Per dozen pints	12 00

Each fluidounce contains forty-eight grains Kola, forty-eight grains Celery and sixty-four grains Coca.

Wine of Pepsin.

Per gallon	\$6 00	Per quart	\$1 75
Per five pint	4 00	Per dozen pints	11 00

Five grains Sacch. Pepsin in each fluidrachm.

WINE OF SPURRED RYE COMPOUND.

(Uterine Tonic.)

Per gallon	\$8 00	Per quart	\$2 50
Per five pint	5 50	Per dozen pints	15 00

Each fluidrachm contains 1-32 grain Strychnine Nitrate, 20 minims Fluid Extract Claviceps Purpurea, Vinum Portense q. s ad ʒj.

WINE

Please Specify **JOHN WYETH & BRO'S.**

Wine of Tar.

Per gallon	\$2 15	Per quart	\$ 65
Per five pint	1 50	Per dozen pints	4 25

Formula of the late Dr. SAMUEL JACKSON, Professor of the
Theory and Practice of Medicine, University of Pennsylvania.

Wine of Wild-Cherry Bark, Ferrated.

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Each fluidrachm represents twenty grains of Wild-Cherry Bark
and two grains of Iron.

WINE S

In Ordering our Preparations through Dealers,

LIQUORS.

Liquor Acid Phosphates Compound.

(WITH IRON.)

Per gallon	\$3 20	Per quart	\$1 00
Per five pint	2 35	Per dozen pints	6 50

Each fluidrachm contains three grs. Lime, Phos., one-half gr. Magnesium Phos., one-quarter gr. Potassium Phosph., one-half gr. Iron Phosph., with free Acid Phosphoric.

Liquor Acid Phosphates Compound.

(WITHOUT IRON.)

Per gallon	\$4 50	Per quart	\$1 35
Per five pint	3 25	Per dozen pints	9 00

Each fluidrachm contains three grs. Lime Phos., two grs. Magnesium Phos., one and one-half grs. Potassium Phos., with free Acid Phosphoric.

Liquor Acid Phosphates (for Soda Fountain).

SEE PAGE 39.

Liquor Bismuth.

Per gallon	\$6 00	Per quart	\$1 75
Per five pint	4 00	Per dozen pints	11 00

Two grains Bismuth and Am. Cit. in each fluidrachm.

Liquor Pepsin.

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Five grs. Sacch. Pepsin in each fluidrachm.

Liquor Pepsin Powder Compound.

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Each fluidounce represents the activity of 38 grains Pepsin Powder Compound N. F.

Please Specify **JOHN WYETH & BRO'S.**

SOLUTIONS.

Solution Antiseptic.

Per gallon	\$4 00	Per quart	\$1 20
Per five pint	2 80	Per dozen pints	8 00

Represents in proportionate combination the purified active principles of Thyme, Eucalyptus, Gaultheria, Mentha Arvensis and Baptisia Tinctoria, with sixteen grains of Acid Benzoic and three grains Acetanilide in each fluidounce.

Solution of Acid Carbolic.

Per gallon	\$3 00	Per dozen pints	\$6 00
----------------------	--------	---------------------------	--------

Each fluidounce contains forty grains of Glacial Acid.

Solution Boroglyceride 50 per cent.

CONTAINING 31 PER CENT. ACID BORIC.

Per pound	\$1 00
---------------------	--------

Wyeth's

Solution Peptonate Iron and Manganese.

NEUTRAL.

(LIQUOR MANGANO-FERRI PEPTONATUS-WYETH'S).

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen 12 ozs.	9 50

This preparation contains Peptonized Albuminate of Iron and Manganese in a neutral organic chemical combination, slightly aromatized.

Solution Hypophos. Comp. (No Sugar.)

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen 14 ozs.	8 50

Each fluidounce contains Lime Hypophos. 4 grains, Sodium Hypophos. 1 grain, Potassium Hypophos. 4 grains, Iron Hypophos. 2 grains, Quinine Hypophos. 1 grain, Manganese Hypophos. 1 grain, Strychnine Hypophos. 1-32 grain.

Solution of Pepsin.

(SEE GLYCEROLE OF PEPSIN, PAGE 36.)

LIQUORS—SOLUTIONS

In Ordering our Preparations through Dealers,

PREPARATIONS OF COD-LIVER OIL.

Cod-Liver Oil.

Manufactured by Marvin Brothers & Bartlett, Portsmouth, N. H.

**MARVIN'S COD-LIVER OIL IS NOT SUBJECT TO OUR
REGULAR DISCOUNTS.**

Per dozen pints	\$7 00
Per gross pints	72 00

This Oil is sold only in bottles containing sixteen fluidounces.

Emulsion Cod-Liver Oil.

Per dozen	\$7 00
Per gallon	4 00

Each ounce of the Emulsion contains forty per ct. Cod-Liver Oil.

Emulsion Cod-Liver Oil, Ferrated.

Per dozen	\$7 00
Per gallon	4 00

Each ounce of the emulsion contains four grains of Iron Pyrophosphate.

Emulsion Cod-Liver Oil and Hypophosphites.

(Lime and Sodium.)

Per dozen	\$7 00
Per gallon	4 00

Each tablespoonful of the emulsion contains three grains of chemically pure Hypophosphite Salts.

Emulsion Cod-Liver Oil, with Lime Phosphate.

Per dozen	\$7 00
Per gallon	4 00

Each ounce of the emulsion contains eight grains Lime Phosphate.

PREPARATIONS OF COD-LIVER OIL

Please Specify **JOHN WYETH & BRO'S**

Emulsion Cod-Liver Oil, with Lime Lactophosphate.

Per dozen \$7 00
Per gallon 4 00

Each ounce of the emulsion contains four grains Lime Lactophosphate.

EMULSION COD LIVER OIL with HYPOPHOSPHITES AND CREASOTE.

Per gallon \$4 00
Per dozen pints \$7 00

Each fluidounce contains forty per cent. Pure Cod Liver Oil, four grains Hypophosphite of Lime, four grains Hypophosphite of Soda, four grains Hypophosphite of Potass., and two minims Beechwood Creasote.

FERRO-PEPTONIZED WINE OF COD LIVER OIL EXTRACT (SEE PAGE 25).

WINE OF COD LIVER OIL WITH CHERRY AND HYPOPHOSPHITES (SEE PAGE 25).

PREPARATIONS OF COD-LIVER OIL

Part A

In Ordering our Preparations through Dealers,

PREPARATIONS OF MALT.

Wyeth's Liquid Extract of Malt.

Per dozen bottles \$3 00

NOTE.—Owing to liability to freeze if exposed to a low temperature, shipments should be avoided during extremely cold weather. If shipment is ordered during such period, same will be at the risk of consignee.

Wyeth's Diastasic Malt.

Per gallon \$4 25 | Per dozen pints \$8 50

A pure concentrated extract prepared in vacuo from Canada Barley; it represents the diastasic and nutritious properties of the grain, producing a food which will not offend the taste in the least.

Wyeth's Diastasic Malt with Cascara.

Per gallon \$5 00 | Per dozen pints \$10 50

This combination will be found almost a specific in constipation, strengthening and invigorating the bowels, soon restoring the normal action.

WYETH'S DIASTASIC MALT with COD LIVER OIL.

Per gallon \$4 50 | Per dozen pints \$9 50

Each fluidounce represents forty per cent. of Cod Liver Oil.

Wyeth's Diastasic Malt with Hypophosphites.

Per gallon \$4 50 | Per dozen pints \$9 50

A powerful reconstructive combination in which the Malt assists the assimilation of the Hypophosphites.

WYETH'S DIASTASIC MALT with IRON PHOSPHATE, QUININE and STRYCHNINE.

Per gallon \$4 50 | Per dozen pints \$9 50

Each fluidounce represents four grains Iron Phosph. (soluble), one grain Quinine Phosph., and 2-75 grain Strychnine Phosphate.

Please Specify JOHN WYETH & BRO'S.

**WYETH'S DIASTASIC MALT WITH PEPSIN AND
PANCREATIN.**

Per gallon \$4 50 | Per dozen pints \$9 50

Each fluidounce represents fifteen grains Saccharated Pepsin
and fifteen grains Saccharated Pancreatin.

SPECIAL NOTICE.

Kindly note that we have added to our list a series of Malt Preparations of the semi-fluid or syrupy kind. These we list under the title of "DIASTASIC MALT," and care should be exercised in ordering to specify which is wanted, *otherwise we will invariably supply our Liquid Malt Extract.*

**JOHN WYETH & BROTHER,
PHILADELPHIA.**

Part A

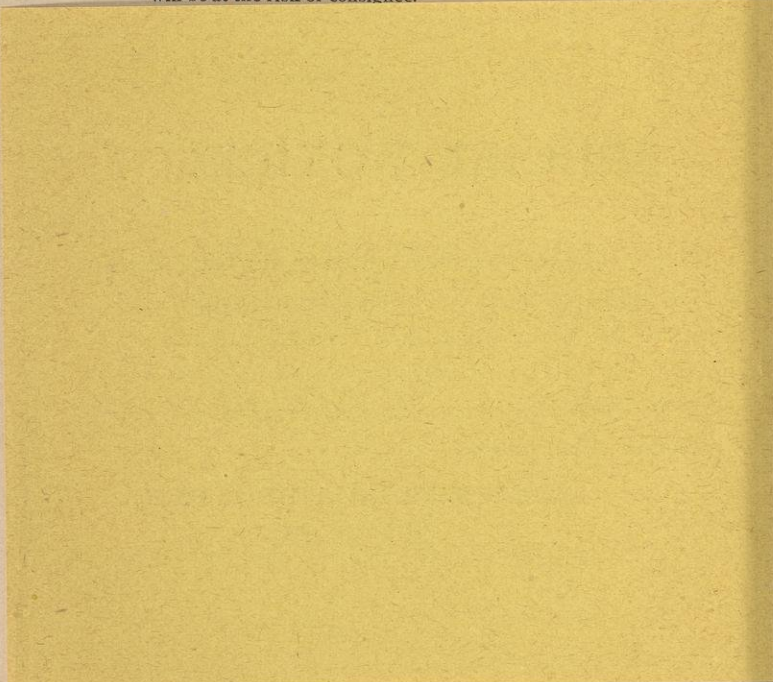

In Ordering our Preparations through Dealers,

PREPARATIONS OF MALT.

Wyeth's Liquid Extract of Malt.

Per dozen bottles \$3 00

NOTE.—Owing to liability to freeze if exposed to a low temperature, shipments should be avoided during extremely cold weather. If shipment is ordered during such period, same will be at the risk of consignee.

WYETH'S DIASTASIC MALT with IRON PHOSPHATE, QUININE and STRYCHNINE.

Per gallon \$4 50 | Per dozen pints \$9 50

Each fluidounce represents four grains Iron Phosph. (soluble),
one grain Quinine Phosph., and 2-75 grain Strychnine
Phosphate.

Please Specify JOHN WYETH & BRO'S.

WYETH'S DIASTASIC MALT WITH PEPSIN AND PANCREATIN.

Per gallon \$4 50 | Per dozen pints \$9 50
 Each fluidounce represents fifteen grains Saccharated Pepsin
 and fifteen grains Saccharated Pancreatin.

Wyeth's Diastasic Malt with Yerba Santa.

Per gallon \$4 50 | Per dozen pints \$9 50
 The tendency to nausea following the continued use of expectorants is overcome and corrected by the presence of Malt : hence the value of this combination will be appreciated.

Wyeth's Diastasic Malt, Dry.

Per pound \$1 00
 This Extract possesses remarkable diastasic properties, and is rich in soluble albuminoids. It is prepared by the process of "mashing," the starch of the grain being first converted into maltose and then evaporated *in vacuo* to a dry state, the finished product being a beautiful light-colored powder; for these reasons it is a valuable adjunct in the preparation of infant foods.

PREPARATIONS OF MALT

Part A

In Ordering our Preparations through Dealers,

Special Prices when ordered in Bulk (5 gal., or more);
also, special formulæ prepared at lowest figures.
Write for quotations.

PREPARATIONS OF BEEF.

Beef, Iron and Wine.

Per gallon	\$4 25	Per quart	\$1 25
Per five pint	3 00	Per dozen pints	8 00

Each tablespoonful contains the essence of one ounce of Beef,
one-half ounce of Sherry Wine, and two grains Iron and
Ammon. Cit.

Beef, Iron, Wine and Cinchona.

Per gallon	\$5 00	Per quart	\$1 45
Per five pint	3 50	Per dozen pints	10 00

Beef, Wine and Iron, with ten grains Cinchona in each dessert-
spoonful

Liquid Beef Extract.

FOR USE IN PREPARING HOT BEEF TEA OR BOUILLON.

Per pint	\$1 25
Per gallon (10 lbs., 8 ozs.,)	9 00

One teaspoonful mixed with a cup of hot water, and seasoned to
the taste with salt, pepper and a little celery salt, makes a
delicious hot Bouillon or Beef Tea.

This extract also makes a pleasant drink with Seltzer, or other
aerated waters.

Wyeth's Beef Juice.

Per dozen bottles	\$7 00
-----------------------------	--------

A Liquid Preparation of the Choicest Beef, containing the Nutri-
tive Albuminous Principles in an unaltered and soluble form.

Please Specify **JOHN WYETH & BRO'S.**

THE DIGESTIVE FERMENTS.

Amylopsin.—Animal Diastase.

(The starch digesting principle of pancreatic juice).

Per ounce \$1 00 | Per pound \$12 00

One part converts 250 parts of starch into dextrose in three hours.

Compound Pepsin Powder, N. F.

(PULVIS PEPSINI COMPOSITUS, N. F.)

Per lb. \$3 50 | Per lb., in $\frac{1}{4}$ -lbs. \$3 70

Per lb., in $\frac{1}{2}$ -lbs. 3 60 | Per dozen 1-oz bottles 3 60

Compressed Peptonizing Tablets.

Per dozen bottles \$4 50

These Tablets are put up in screw-cap bottles; each bottle containing twenty-four Tablets,—sufficient for peptonizing twenty-four pints of milk.

Essence of Pepsin.

Per gallon \$5 00 | Per quart \$1 45

Per five pint 3 50 | Per dozen pints 10 00

Combines in a pleasant and palatable form the therapeutic properties of Hog and Calf Pepsins.

Glycerole of Pepsin.

A CONCENTRATED SOLUTION OF PEPSIN IN C. P. GLYCERINE,
SLIGHTLY ACIDULATED WITH C. P. MURIATIC ACID.

Per gallon \$9 00 | Per quart \$ 2 80

Per five pint 6 25 | Per dozen pints 18 00

Wyeth's Glycerole of Pepsin will be found both economical, convenient and reliable in the manufacture of all liquid preparations of Pepsin, such as Liquid Pepsin, Elixir Pepsin, Bismuth and Strychnia, Elixir Calisaya Bark, Pepsin and Strychnia, Wine of Pepsin, etc.

Each fluidrachm contains six grains Pure Pepsin.

PREPARATIONS OF BEEF—DIGESTIVE FERMENTS

Part A

In Ordering our Preparations through Dealers,

THE DIGESTIVE FERMENTS—Continued.

GLYCEROLE OF THYROID GLANDS.

Per dozen pints \$24 00
Per dozen four ounces 7 50

A solution of colloid constituents of the Thyroid Glands of the sheep, each fluidrachm representing five grains of the fresh glands.

Granular Peptonizing Mixture.

Per dozen bottles \$4 50

Put up in four-ounce screw-cap bottles; each bottle containing sufficient Mixture to peptonize twenty-four pints of milk.

Granular Pure Pepsin—Soluble.

Per ounce 65 cts. | Per pound \$9 00

This Pepsin is prepared in the form of granules, and is so highly purified that it will make a transparent solution in water. This feature, together with its ready solubility, renders it the most desirable Pepsin for the dispensing counter, and for use in the form of solutions.

One part will dissolve 3000 parts of coagulated albumen under conditions directed in the United States Pharmacopœia, 1890 edition.

Liquid Rennet.

Per gallon \$3 00 | Per quart \$ 90
Per five pint 2 00 | Per dozen pints 6 00
Per gross four-ounce bottles 20 00

Powdered Pure Pepsin.

Per ounce 65 cts. | Per pound for dispensing \$9 00

A non-hygroscopic Pepsin particularly suited for dispensing in pill or powdered form.

Will be found to conform strictly to the requirements of the United States Pharmacopœia of 1890.

Powdered Thyroid Glands.

COLLOID CONSTITUENT PRESERVED UNALTERED.

Per ounce \$1 00 | Per pound \$12 00

Each three grains represents five grains of the Thyroid Gland of the Sheep.

DIGESTIVE FERMENTS

Please Specify **JOHN WYETH & BRO'S.**

THE DIGESTIVE FERMENTS—Continued.

Pure Pancreatin.

An active and permanent preparation of the pancreatic ferments, conforming strictly to the requirements of the United States Pharmacopœia.

Per ounce \$1 00 | Per pound for dispensing \$12 00

This article contains the three principal ferments of the Pancreas: Steapsin, Trypsin, and Amylopsin, in the same proportions as they are found in fresh Pancreatic Juice. It digests fibrin in alkaline solution, dissolves the casein of milk, emulsifies fat, and converts starch into sugar.

Rennene.

For the Rapid and Convenient Preparation of Delicious Desserts.

WE ARE SOLE AGENTS FOR THIS PREPARATION.

Per Dozen Boxes \$2 25

Rennene consists of the curdling principle of Rennet in crystallized form, carefully purified and concentrated, and combined with the finest quality of cane sugar. It is much more active than Liquid Rennet, and retains its strength indefinitely with proper care.

RENNET TABLETS.

1 tablet to 1 quart of milk.

Per bottle of 1000	\$ 3 00
Per bottle of 500	1 53
Per bottle of 100	33
Per dozen tubes (10 tablets each.)	85
Per gross tubes (10 tablets each.)	10 20

Saccharated Pepsin.

(Pepsinum Saccharatum.)

Per dozen ounces \$1 60 | Per pound for dispensing \$1 60

One part will dissolve 300 parts of coagulated albumen as directed by the United States Pharmacopœia, 1890 edition.

ELIXIR ANTI-DYSPEPTIC (SEE PAGE 2).

ELIXIR DIGESTIVE FERMENTS (SEE PAGE 6).

DIGESTIVE FERMENTS

Part A

In Ordering our Preparations through Dealers,

FOR THE SODA FOUNTAIN.

Calisaya Tonic.

(FOR SODA WATER.)

Per gallon \$2 50

To make Syrup Calisaya for the Soda Fountain, add four ounces of the Tonic to twelve ounces of Simple Syrup.

Kola-Phos. (Phosphated Kola Compound).

(FOR SODA WATER.)

Per gallon	\$6 00	Per quart	\$1 75
Per five pint	4 00	Per dozen pints	11 00

A highly concentrated combination of Kola, Celery, Guarana and Coca, with Phosphoric Acid deliciously Aromatized. Relieves headache, nausea, nervous debility, fatigue of mind and body; is particularly indicated in cases of exhaustion due to over-excitement or mental strain, insomnia, loss of appetite. One or two teaspoonfuls of KOLA-PHOS. in a tumbler of iced or carbonated water, sweetened, makes a deliciously refreshing and invigorating draught.

Lime Juice with Pepsin.

(FOR SODA WATER.)

Per gallon	\$5 00	Per quart	\$ 1 45
Per five pint	3 50	Per dozen pints	10 00

Liquid Beef Extract.

FOR USE IN PREPARING HOT BEEF TEA OR BOUILLION.

Per pint	\$1 25
Per gallon (10 lbs., 8 ozs.,)	9 00

One teaspoonful mixed with a cup of hot water, and seasoned to the taste with salt, pepper and a little celery salt, makes a delicious hot Bouillion or Beef Tea.

The extract also makes a pleasant drink with seltzer, or other aerated waters.

SUPPOSITORIES

FROM

PRIVATE FORMULÆ.

The rapidly growing, very successful and popular treatment of numerous diseases by the use of Suppositories, induces us to call particular attention to our exceptional facilities for filling private formulæ in any shaped Suppository as illustrated on pages 46 and 47, or from the private moulds of the purchaser.

We put up Suppositories of special formulæ in neat wooden boxes of twenty each, in tinfoil-lined cardboard boxes of any number of interspaces, or in bulk, so packed that the Suppositories retain their shape perfectly. The utmost care, exactness and scrupulous attention is given to the details of compounding and moulding, so essential in preparing a class of agents containing such potent remedies as are usually desired in this form of medication..

Each suppository contains the exact amount of drug thoroughly and evenly incorporated through the best quality of Cacao Butter, Gelatine or Glycerine, as the base may be, thus insuring the most prompt and effective action upon the economy. Our facilities for manufacturing special formulæ are unequaled, and any desired combination can be prepared in a few hours upon the most reasonable terms.

QUOTATIONS WILL BE GLADLY FURNISHED UPON APPLICATION

JOHN WYETH & BROTHER, Philadelphia.

SUPPOSITORY MOULDS

In Ordering our Preparations through Dealers,

SPECIAL NOTICE.

Since to attain the end desired, a Suppository must be so prepared that it will break down readily at the temperature of the body (98.06° Fahr.), it is not possible, of course, to manufacture Suppositories which will not also break down when subjected to that temperature in stock, and we have, therefore, taken the precaution of attaching to each package a caution label that "These Suppositories must be kept in a cool place, preferably a refrigerator." We cannot undertake to make good any losses sustained through the breaking down or melting of Suppositories subjected to heat in excess of 97° Fahr.

JOHN WYETH & BROTHER.

[COPYRIGHT SECURED.]

NEW LIST OF SUPPOSITORIES.

SUPPOSITORIES

For convenience in ordering our Suppositories of the various forms and combinations, it is only necessary to specify the numbers; the prices quoted are for one dozen boxes, containing twenty Suppositories each.

They are put up in neat wooden boxes, each containing twenty Suppositories, and can readily be forwarded to any destination, by mail or express.

The list of formulæ has been prepared with much care and research, having been submitted to several of our most eminent medical authorities, who have very cordially endorsed it, and to whom we are deeply indebted for many valuable suggestions as to doses and combinations. It embraces a great variety of formulæ, adapted to almost every symptom or emergency, and the utmost care, exactness, and scrupulous attention to detail so essential in preparing a class of agents, containing such potent remedies, are exercised in their manufacture. Each Suppository contains the exact amount of drug thoroughly and evenly incorporated throughout the excipient, thus insuring the most prompt and effective action upon the economy.

*We are constantly adding to our list and desire to call particular attention to those more recent additions of the **Boro-glyceride and its Combinations.***

Our facilities for manufacturing special formulæ are unequalled, and any desired combination can be prepared in a few hours, upon the most reasonable terms. Quotations will be gladly furnished upon application.

Please Specify JOHN WYETH & BRO'S.

[COPYRIGHT SECURED.]

FORMULÆ OF SUPPOSITORIES.

Put up in boxes of 20 each; also in boxes of 100 if desired.
Special Prices when ordered in quantity. Special formulæ at lowest figures.
Write for quotations.

NOTE.—The small figure to the left of each number indicates the shape and size of the suppository.

WYETH'S GRANULAR EFFERVESCENT SALTS.

The following list of Granular Effervescing Salts embraces those in popular and general demand. We ask the trade to compare their general physical appearance with those usually found in the market.

For uniformity and fineness of granule, ready and complete solubility, sparkling effervescence and general freshness, delicacy of flavor and character, they are unsurpassed. They are prepared with scrupulous exactness as to the strength and contents of each drachm or sixty grains.

WYETH'S EFFERVESCENT HEADACHE SALTS

Caf-Acetan.

[TRADE MARK.]

Relieves Sick Headache, Neuralgia, Sea Sickness, Migraine, Neuralgic Insomnia, Nervous Excitement, Dyspepsia, Morning Nausea, Acidity, etc., etc.

Four-ounce size, per dozen	\$5 25
Ten-cent size, per dozen	95
One-pound bottles, per pound	1 30
Five-pound bottles, per pound	1 25

The chief ingredients of this preparation are Acetanilid, Caffeine and Bromide of Sodium. In their effect on the nervous system, the first two are interco-operative, except in their action on reflex excitability, which is diminished by the Bromide and somewhat increased by the Caffeine.

The dose is a heaped dessertspoonful, which, taken in a little water, makes a pleasant drink, of gentle acidulous and saline taste, most grateful to an irritable, dyspeptic stomach.

WYETH'S GRANULAR EFFERVESCENT

Aperient.

Per dozen, four-ounce bottles	\$4 25
Per pound bottle	1 00

A most pleasant and agreeable morning draught, acceptable to the stomach, and mild, but effective in action.

Each dessertspoonful is the equivalent of fifty grains Saline Aperient Salts.

WYETH'S EFFERVESCENT SALTS

Part A

In Ordering our Preparations through Dealers,

WYETH'S GRANULAR EFFERVESCING

Bromides Modified.

Per dozen, four-ounce bottles \$5 25

Per pound bottle I 25

Nerve sedative, and hypnotic; more especially intended for use in cases suffering from kidney disorders.

Each dessertspoonful contains two grains Sodium Bromide, one grain Lithium Bromide, one grain Strontium Bromide, and one grain Sodium Iodide.

WYETH'S GRANULAR EFFERVESCING

Caffeine Hydrobromate.

Per dozen, four-ounce bottles \$5 25

Per pound bottle I 25

The advantage of this preparation over combinations containing drugs from which Caffeine is obtained, is that while possessing the same therapeutic properties, definite strength is assured.

Each drachm represents one grain Caffeine Hydrobromate.

Each dessertspoonful represents two grains Caffeine Hydrobromate.

WYETH'S GRANULAR EFFERVESCING

KISSINGEN.

Per dozen, four-ounce bottles \$5 25

Per pound bottle I 25

An excellent substitute for Carlsbad Water (much of the effect is due to the presence of this salt (may be obtained by adding a dose to a tumbler of water and taking gradually on getting up in the morning. As a specific for obesity it should be taken in alternation with Granular Effervescing Vichy, taking a dose of Vichy in the morning and a dose of Kissingen at night.

WYETH'S GRANULAR EFFERVESCING

Lithium Citrate.

Per dozen, four-ounce bottles \$5 25

Per pound bottle I 25

Indicated in Rheumatic, Gouty and kindred conditions.

Owing to its less nauseating character, it will prove more acceptable than the Carbonate.

Each dessertspoonful contains five grains Pure Citrate of Lithia.

WYETH'S EFFERVESCING SALTS

Please Specify **JOHN WYETH & BRO'S.**

WYETH'S GRANULAR EFFERVESCING

Magnesian Aperient.

Per dozen, four-ounce bottles \$4 25

Per pound bottle 1 00

An aperient and refrigerant, possessing the quality of rendering the secretions neutral or alkaline, more especially those of the alimentary canal. The mild and gentle action characteristic of Magnesia attends the use of this.

Dose—One dessertspoonful containing forty-five grains Magnesia Salt.

WYETH'S GRANULAR EFFERVESCING

Magnesium Citrate.

Per dozen, four-ounce bottles \$4 25

Per pound bottle 1 00

Possesses all the laxative and purgative properties of the liquid preparation, but has the advantage of being more economical to use; is effective, at the same time pleasing to the taste.

Dose—Two to four dessertspoonfuls.

WYETH'S GRANULAR EFFERVESCING

Potassium Bicarbonate.

Per dozen, four-ounce bottles \$4 25

Per pound bottle 1 00

The most freely prescribed of all alkaline remedies. Its worth is so fully recognized that recommendation is unnecessary. As a granular effervescent salt, we offer it in a most desirable form for administration.

Each dessertspoonful contains eight grains Bicarbonate of Potash.

WYETH'S GRANULAR EFFERVESCING

Potassium Citrate.

Per dozen, four-ounce bottles \$4 25

Per pound bottle 1 00

Diuretic, diaphoretic and febrifuge; a delightful draught, and more pleasant for administration than the ordinary alkaline waters. Especially recommended for neutralizing the secretions.

Each dessertspoonful contains ten grains of the Salt.

WYETH'S EFFERVESCING, SALTS

Part A

In Ordering our Preparations through Dealers,

WYETH'S GRANULAR EFFERVESCING

Seidlitz Mixture.

Per dozen, four-ounce bottles	\$4 25
Per pound bottle	1 00

A saline laxative, effective in relieving moderate constipation and in reducing the fever natural to kindred disorders. A more convenient form than the ordinary Seidlitz Powders. Each dessertspoonful represents fifty grains Seidlitz Aperient Mixture.

WYETH'S GRANULAR EFFERVESCING

Sodium Bicarbonate.

Per dozen, four-ounce bottles	\$4 25
Per pound bottle	1 00

This salt is largely prescribed in cases of dyspepsia due to acid fermentation; in fact, is especially valuable for overcoming the acid condition of the secretions. Each dessertspoonful contains eight grains Bicarbonate of Soda.

WYETH'S GRANULAR EFFERVESCING

Sodium Phosphate.

Per dozen, four-ounce bottles	\$4 25
Per pound bottle	1 00

This is a specific in constipation, obesity, rickets, jaundice, the diarrhoea of small children, etc., etc.; will also act as a mild, pleasant and tasteless laxative. Each dessertspoonful represents thirty grains of the salt.

WYETH'S GRANULAR EFFERVESCING

SODIUM SULPHATE.

Per dozen, four-ounce bottles	\$4 25
Per pound bottle	1 00

In small doses this remedy will be found to possess aperient and diuretic properties. Its particular office, however, is that of a laxative and its popularity in that capacity in the shape of an Effervescing Salt resulted in its addition to the British Pharmacopœia. Each dessertspoonful, or 120 grains, contains one drachm Sodium Sulphate.

WYETH'S EFFERVESCING SALTS

Please Specify **JOHN WYETH & BRO'S.**

WYETH'S GRANULAR EFFERVESCING

Sodium Sulpho-Phosphate.

Per dozen, four-ounce bottles	\$4 25
Per pound bottle	1 00

In this combination the aperient property of Sodium Phosphate is reinforced by the addition of Sodium Sulphate, producing a combination of decided merit.

Each dessertspoonful contains thirty grains of each Salt.

WYETH'S GRANULAR EFFERVESCING

Vichy.

Per dozen, four-ounce bottles	\$4 25
Per pound bottle	1 00

The well-known and valuable therapeutic properties of the Vichy water are strictly and carefully imitated, following the French government's official analysis. The most popular of the three springs is the one selected, namely the Grande-Grille.

Each drachm of sixty grains or a heaping teaspoonful is equivalent to a tumblerful of genuine Vichy water.

WYETH'S EFFERVESCING SALTS

Corrosive Sublimate Antiseptic Tablets.

(Suggested by CHAS. MEIGS WILSON, M. D.)

(7.7 grs. Hydrarg. Chlor. Corros., 7.3 grs. Ammonium Chloride.)

Each Tablet contains the requisite amount of Corrosive Sublimate to make a 1 to 1000 solution when added to a pint of water. By increasing or diminishing the amount of water, the strength of the solution may be altered at pleasure.

Per dozen bottles, each containing 25 Tablets	\$2 20
Per bottle, each containing 100 Tablets	50
Per pound	1 75
Per 1000	3 50

Alkaline and Antiseptic Tablets.

(As suggested by DR. CARL SEILER.)

Each Tablet Contains :

Sodium Bicarbonate,	Sodium Biborate,	Sodium Benzoate,
Sodium Salicylate,	Sodium Chloride,	Eucalyptol,
Thymol,	Menthol,	Ol. Gaultheria.

Per 1000	\$1 40
Per dozen bottles (50 each)	2 30
Per 500	80
Per bottle of 100 each	30
Per pound	75

SOLUBLE COMPRESSED TABLETS

OF

COCAINE HYDROCHLORATE.

For Making Extemporaneous Solutions.

One Tablet if added to 30 minims of water makes a 4 per cent. solution.
 One Tablet if added to 60 minims of water makes a 2 per cent. solution.
 One Tablet if added to 120 minims of water makes a 1 per cent. solution.

Price per tube (each containing 20 tablets)	\$ 50
In bottles of 100, per bottle	2 40

ABSORBENT COTTON—ANTISEPTIC TABLETS

Part A

In Ordering our Preparations through Dealers,

SOLUBLE COMPRESSED HYPODERMIC TABLETS.

HYPODERMIC TABLETS—ALPHABETICAL LIST.

All our Hypodermic Tablets are made by dry compression without admixture of any foreign substance or excipient, except where the bulk of the potent medicament is less than one-twelfth of a grain. We make the following unreserved and absolute claims for their superiority over all other like preparations:—*Perfect Accuracy of Dose, Ready and Entire Solubility, Unalterable and Perfect Preservation of the Drug, Absolute Freedom from Septic Infection or tendency to cause Inflammation.* As the originators of this class of agents, we do not hesitate to make the statement, that we believe we *have brought their manufacture to a higher state of perfection than ever before attained.*

ALPHABETICALLY ARRANGED.

FOR NUMERICAL ARRANGEMENT, SEE PAGES 70-74.

COMPRESSED OPHTHALMIC DISCS.

At the request and under the direction of Dr. Casey A. Wood, of Chicago, we have prepared a complete series of Ophthalmic Discs, for the convenient, extemporaneous and efficient treatment of the various affections of the eye.

We believe Dr. Wood's attention was primarily directed to our establishment by the perfection we have attained in the manufacture of our Compressed Hypodermic Tablets, which led him to suggest our manufacturing a series of Compressed Discs, containing all the medicaments ordinarily used in ophthalmic practice.

These Discs are put up in bone boxes with screw top, each containing FIFTY Discs, and for the convenience of the trade, are sold in cartons of ten boxes each.

No.	Per box of 50 Discs.

OPHTHALMIC DISCS

COMPRESSED POWDERS (OR PILLS)

The preparation of drugs in such a form as to be at once efficient and readily administered is a matter of the utmost importance, alike to physician and patient. In this respect, great advances have been made of late years; but we think we can confidently claim that our "Compressed Powders" are far superior to any of the other improved medicaments hitherto introduced.

These Compressed Powders or Pills, which are made by Dry Compression, disintegrate much more quickly than compressed Tablets or Pills manufactured from a moist powder or mass with the usual excipients; consequently the action of our Pills and Triturates must be much more prompt. In addition to the advantage of speedy disintegration and immediate effect, being Compressed from the Dry Powder, they will keep indefinitely, without becoming hard or insoluble, and being flat in shape are much more easily swallowed than those of any other form.

They are smooth, glossy, and elegant in appearance, and are made only of the purest materials.

Leading physicians have found these "Compressed Powders," to be reliable and quick in their action.

Bisulphate of Quinine being a more soluble salt than the ordinary Sulphate, we recommend its use in preference. When given in the form of a "Compressed Powder," it will act as promptly as a *solution* of Quinine.

Physicians who wish to prescribe our Powders should specify "Wyeth's Compressed."

SUGAR-COATED AND CHOCOLATE-COATED COMPRESSED PILLS.

We are prepared to furnish Sugar-Coated or Chocolate-Coated Compressed Pills, as indicated in following list, at same price as for the uncoated.

Please specify in ordering, which kind is wanted.

Unless otherwise indicated, we will always send *uncoated* pills.

Please Specify **JOHN WYETH & BRO'S.**

When ordering Compressed Pills be careful to designate what number you may desire in each Bottle, whether 1-500 or 5-100, 10-100 or 1-1000, 5-1000 or 1-5000, etc.

CUSTOMERS ARE PARTICULARLY REQUESTED in ordering, to specify whether Tablet Triturates or Pills are wanted, as WHEN TRITURATES ARE NOT INDICATED, WE INVARIABLY SEND PILLS. Compliance with this request will materially assist us in filling orders.

POWDERS OR PILLS

Unless otherwise specified, we will fill all orders for Compressed Tablets Tonic Chalybeate, Dr. Flint's formula, with those of a *brown color*, as by reason of the nature of the ingredients there is sometimes developed a slight discoloration of the white coating, which is objectionable to some, but of course does not in the least degree affect the therapeutic character of the Tablets. We can supply the Tablets *coated white*, if desired, but cannot guarantee that they will permanently remain so. We have them in stock *uncoated*, for those who may prefer to prescribe or dispense the plain compressed. Kindly specify when ordering.

* Plain or Sugar-Coated. ** Plain, Sugar- or Chocolate-Coated.

Part A

In Ordering our Preparations through Dealers,

COMPRESSED LOZENGES.

IN BOXES AND BOTTLES.

The following Compressed Lozenges are put up in a form, convenient for travellers, or those who are compelled to carry a supply with them. Full directions are given on each label. This list comprises those most popular, and in general use. They are very generally prescribed by our leading physicians apart from having a large popular demand.

Spencer's Chloramine Pastilles (see page 43).		
Wistar, screw-cap bottles	2 25	27 00
Tasteless Quinine and Chocolate Troches (in boxes of sixty)	4 25	51 00
Each Lozenge containing 1 grain Tannate of Quinine.		

Please Specify **JOHN WYETH & BRO'S.**

COMPRESSED TABLET TRITURATES

Triturates, in order to be genuine preparations, must be made in accordance with certain well-defined principles, viz:

They must not only contain the precise quantity of medicament they are alleged to have, but must be accurate in dose.

They must be genuine mixtures, in that the medicinal agent is uniformly distributed through the whole mass; and further, they must be sufficiently firm to retain their form, yet friable enough to break up into a powder when moderate pressure is applied.

If the medicament contained in a Tablet Triturate is a soluble substance, its solubility should be preserved.

Having an extensive plant, made expressly for the preparation of tablets, compressed pills, etc., we can claim with the utmost confidence that our tablet triturates conform to the most exacting standard of excellence, and are examples of the essential qualities described above. To effect a thorough admixture of the medicament with the vehicle or excipient; to insure that only the true dose is contained in the tablets, and that all are uniform in size and weight; these can only be accomplished when the laboratory of the manufacturer is equipped with the most complete appliances, and when the operating pharmacist, himself, gives the closest attention to every detail of the manipulation. In addition to these essentials of the mechanical process, the whole must be supervised and directed by the highest commercial integrity. The best quality of materials, in proper proportions, only, should be used; yet it is obvious that in the making of such preparations, there are great opportunities for an unscrupulous dealer to increase his gains by substituting inferior and cheaper drugs. The completeness of our laboratory equipment, and the reputation gained by our preparations, are guarantees that the claims put forth for our *Tablet Triturates* will be amply sustained and will bear the closest scrutiny.

TABLET TRITURATES

Part A

In Ordering our Preparations through Dealers

When ordering Tablet Triturates be careful to designate what number you may desire in each Bottle, whether 1-500 or 5-100, 10-100 or 1-1000, 5-1000 or 1-5000, etc.

CUSTOMERS ARE PARTICULARLY REQUESTED in ordering, to specify whether Tablet Triturates or Pills are wanted, as WHEN TRITURATES ARE NOT INDICATED, WE INVARIABLY SEND PILLS. Compliance with this request will materially assist us in filling orders.

Prices of Triturates, Pills, Hypodermic Tablets, etc., containing Quinine, Morphine, Pilocarpine, Cocaine, Caffeine and drugs of this class, we cannot make binding, owing to the possible changes in the market prices.

TABLET TRITURATES

When ordered in 1000's, our Triturates are supplied in very neat, square amber bottles, with ground-glass stoppers.

The 500's are supplied in same style bottle, with cork stoppers.

NOTE.—Those with whom we have no regular correspondence will please make remittance when sending order; unless this request is complied with, we will be compelled to decline forwarding. This is made imperative, owing to the fact that many purchasers of small amounts pay little or no attention to the payment of such accounts. Our prices are very moderate, and the small margin of profit necessitates our insisting upon the above reasonable request.

JOHN WYETH & BROTHER.

PHILADELPHIA, PA.

In Ordering our Preparations through Dealers,

MEDICINAL FLUID EXTRACTS OF STANDARD STRENGTH,

MANUFACTURED BY

JOHN WYETH & BROTHER.

FLUID EXTRACTS

In presenting to the trade our recently revised List of Standard Fluid Extracts, we desire to outline a few prominent features respecting the detail involved in their manufacture, and endeavor to state briefly the methods which have insured to us such marked success.

Recognizing the responsibility attending the selection of all crude material, and fully appreciating the fact that the best results can be attained only by a conscientious observance of this important preliminary step, we have not only inaugurated a most rigid system of inspection by competent experts, but in addition, adopted every possible precaution calculated to raise the therapeutic standard; more especially does this apply to the leading narcotics and other perishable drugs, whose active properties become greatly impaired by age and exposure; these drugs being carefully gathered, in compliance with our specific instructions, only at that season of the year when in the opinion of the best authorities they have reached their highest state of perfection; they are skillfully garbled, forwarded to us at once, and immediately converted into the various Fluid Extracts. As the therapeutic effect of most of these active drugs is, in a measure, ascribable to some definite active principle, susceptible of isolation, as an additional safeguard and as enabling us to attain that high standard which we always have in mind, we have further adopted a thorough system of preliminary assay.

Our process of manufacture involves the principles of prolonged maceration and re-percolation, although we do not confine ourselves exclusively to the application of these principles, as in many cases, where the drug is tough, tenacious and

Please Specify JOHN WYETH & BRO'S.

difficult to exhaust, we are obliged to concentrate in vacuo at a minimum temperature (110 F.), to insure a representative preparation. The seemingly unlimited varieties of drugs embraced within the scope of our Materia Medica, differing so vastly in their characteristics and composition and presenting so many conflicting conditions, require individual study and treatment.

Our laboratory is equipped with costly appliances, embracing the most advanced, scientific and modern devices known to the manufacturer, and we have never hesitated to incur any expense, which in our judgment, would insure corresponding improvement in our products. In addition to the precautionary measures outlined, and as enabling us to attest the accuracy of our work, we have established in many cases a minimum standard based upon the average percentage of active matter present in a prime quality of commercial drug. Druggists and Physicians will at once appreciate the vast difference in drugs which are so often inferior and less active from age or careless selection, the menstruum employed being frequently injudicious, and appliances used ill-suited to their manufacture, resulting in Fluid Extracts which do not represent fully the strength and value of the drug. We shall rigidly maintain the present high standard, guaranteeing to the trade absolute uniformity of our products.

It is not possible for us, nor are we willing, to compete with the prices of which we are advised from day to day. Fluid Extracts are offered to the drug trade, often lower than the cost of the drugs and the menstruum employed in their manufacture, and we cannot but think it is a grave error on the part of the druggist to discriminate in favor of cheap Fluid Extracts, owing to the fact that it is not possible with the menstruum often used, to extract the medicinal value of the drug. No druggist, wholesale or retail, should feel satisfied to accept the grave responsibility of selling Fluid Extracts, unless he first satisfies himself that they fully represent the medicinal efficacy claimed for them, and which the physician has a right to expect.

We desire in conclusion to thank our friends for the confidence they have reposed in us in the past, and promise our best endeavors in the future to advance their interests by supplying Fluid Extracts uniform as to strength and of the highest standard in quality.

FLUID EXTRACTS

Part B

In Ordering our Preparations through Dealers,

We cannot undertake to accept for Credit or exchange, broken or opened packages, i. e., where stoppers (cap or cork) have been removed or seals broken, but will exchange any of our preparations, in original or unbroken packages, which may have undergone change from causes impairing their efficacy.

DOSE AND PRICE LIST OF FLUID EXTRACTS.

PUT UP IN ONE- AND FIVE-PINT BOTTLES.

A deduction of 10 cents per pint from the list prices when ordered in five-pint bottles. No charge for bottles.
When ordered in eight- and four-oz. bottles, we charge 3 cents extra for each bottle.

It is best to commence with the minimum dose and repeat.

FLUID EXTRACTS

	DOSE.	Per pint.
Aconite Leaves, Aconitum Napellus.	2 to 5 min.	\$1 10
Sedative, Diaphoretic, Diuretic, Narcotic.

Part B

In Ordering our Preparations through Dealers,

FLUID EXTRACTS.

DOSE. Per pint.

Juniper Berries, *Juniperus Communis* . . . ½ to 1 fl. 3. \$1 00
Carminative, Diuretic, Stimulant.

Kamala, *Mallotus Phillippinensis*,
or *Rottlera Tinctoria* 2 to 4 fl. 3. 3 00
Tænicide.

Kava-Kava, *Piper Methysticum* 30 to 60 min. 2 00
Bitter tonic, Anti-gonorrhœal.

Kino, *Pterocarpus Marsupium* 20 to 40 min. 3 00
Astringent. Represents eight ounces to the pint.

Kino (Australian), an exudation from the
bark of *Eucalyptus Rostrata*, imported
from Australia. 20 to 40 min. 3 00

Each fluidounce (30. c.c.) represents one-half troy ounce (15.5 gms.)
of the drug. Extensively employed as a remedy in cases of
diarrhœa and dysentery, either recent or long standing.

"This gum adheres with great pertinacity to the mucous surfaces
and it is probably on this account that its astringency is more
effective than that of Catechu, Kino, etc."

—P. W. Squire, F.L.S., F.C.S.

Kola, *Sterculia Acuminata* 10 to 30 min. 2 00
Nervine, Stimulant.

Kola Compound 30 to 60 min. 3 00
Each pint represents:

Kola Nuts 4 ozs.
Celery Seed 4 ozs.
Coca Leaves 8 ozs.

Specific in nervous prostration, exerting a direct
action upon the hepatic functions.

Kousso, U.S.P., (Cusso, 1890),
Hagenia Abyssinica 2 to 4 fl. 3. 2 40
Vermifuge, Purgative.

Lactucarium, U.S.P., *Lactuca Virosa* . . . 2 to 10 min. 5 00
Anodyne, Soporific.

Ladies' Slipper, U.S.P.,
Cypripedium Pubescens 15 to 60 min. 2 00
Antispasmodic, Diaphoretic, Narcotic, Nerve
tonic.

Larkspur Seed, *Delphinium Consolida* . . . 1 to 2 min. 3 50
Acrid poison, Parasiticide.

Lavender Comp. 5 to 10 min. 1 60.
(For making *Tinctura Lavendulæ Comp.* U.S.P.)

Each pint represents about:

Oil Lavender Flowers (recent) . . . 1 floz.
Oil Rosemary Flowers ¼ floz.
Cinnamon Bark 2½ ozs.
Cloves ¾ oz.
Nutmegs 1¼ ozs.
Red Saunders 1¼ ozs.

Lettuce, *Lactuca Sativa* 20 to 60 min. 1 20
Sedative, Soporific.

SPECIAL PRICES WHEN ORDERED IN BULK. WRITE FOR QUOTATIONS.

FLUID EXTRACTS.

	Dose.	Per pint.
Scullycap, U.S.P., <i>Scutellaria Lateriflora</i>	1 to 2 fl. 3.	\$1 50
Antispasmodic, Nerve tonic.		
Scullycap Compound	1/2 to 1 fl. 3.	1 25
Used with good results in neuralgic and nervous affections.		
Each pint represents about:		
Scullycap	5 1/2 OZS.	
Hops	2 1/2 OZS.	
Ladies' Slipper	5 1/2 OZS.	
Lettuce	2 1/2 OZS.	
Nervine and Antispasmodic.		
Sea-Wrack, <i>Fucus Vesiculosus</i>	1/2 to 2 fl. 3.	1 50
For reducing obesity.		
Senecio (see Life Root).		
Senega, U.S.P., <i>Polygala Senega</i>	10 to 20 min.	2 40
Diuretic, Expectorant, Emmenagogue, Stimulant, Sialagogue.		
Senna, U.S.P., <i>Cassia Acutifolia</i>	1 to 4 fl. 3.	1 40
Prompt cathartic.		
Senna, Aqueous, <i>Cassia Acutifolia</i>	1 to 4 fl. 3.	1 50
Cathartic, without griping.		
Senna Comp. (with Aromatics).		
<i>Cassia Acutifolia</i>	1 to 4 fl. 3.	1 50
Each pint represents about:		
Senna Alexandria	12 OZS.	
Caraway Seeds	2 OZS.	
Coriander Seeds	2 OZS.	
Cathartic, without griping.		
Senna Pods, <i>Cassia Acutifolia</i>	1 to 4 fl. 3.	1 75
Prompt cathartic.		
Senna and Jalap	30 to 60 min.	1 50
Equal parts of each.		
Prompt cathartic.		
Serpentaria (see Virginia Snake Root).		
Simaruba, <i>Simaruba Officinalis</i>	20 to 60 min.	1 70
Bitter tonic.		
Skunk Cabbage, <i>Dracontium Foetidum</i>	20 to 60 min.	1 00
Antispasmodic, Narcotic, Stimulant.		
Soap Bark, <i>Quillaja Saponaria</i>	10 to 20 min.	1 20
Solomon's Seal, <i>Polygonatum Biflorum</i>	10 to 30 min.	1 00
Tonic, Astringent, Demulcent.		
Spikenard, <i>Aralia Racemosa</i>	1/2 to 2 fl. 3.	1 00
Alterative, Pulmonary remedy.		
Spiny Burreed, <i>Xanthium Spinosum</i>	15 to 30 min.	1 50
Antihydrophobic.		
Squaw Vine, <i>Mitchella Repens</i>	1 to 2 fl. 3.	1 20
Uterine tonic.

Expectorant, Stimulant.		
Yerba Santa, Aromatic	½ to 1 fl. 3.	1 75
For making the Syrup and Elixir of Yerba Santa.		

FLUID EXTRACTS

For extemporaneous production of Infusions, Syrups, Decoctions, Tinctures and Wines, our Extracts represent perfectly the full strength, odor, taste, and color of the drug used; and the preparations so obtained will not only be as effective but are entitled to even greater confidence,—as the extemporaneous preparations, especially of Decoctions and Infusions from the crude drugs, are often unreliable on account of careless manipulation.

The cost of many of the Drugs used in the manufacture of Fluid Extracts is subject often to great changes. When the difference is in our favor, our customers may depend upon receiving the advantage; when the cost is greater, we will advise them, if forced to increase the price.

Please Specify **JOHN WYETH & BRO'S.**

WYETH'S STANDARD POWDERED EXTRACTS.

It affords us pleasure in announcing to the drug trade and profession, that having perfected in every detail our processes for the manufacture of Powdered Extracts, we are now prepared to supply to our many friends a complete line of these important products. We fully appreciate the grave responsibility which the manufacture of these goods entails, as well as the watchfulness, skill and devotion to detail, which are essential to insure uniform and accurate results. The scrupulous care so faithfully exercised in the selection of crude material for our Fluid Extracts, is consistently maintained, the value of the drug accurately determined by a preliminary assay, and every practical precaution adopted, which is calculated to elevate the standard and efficiency of this line of preparations. Our appliances for facilitating concentration are most complete, concentrating in vacuo at a temperature not exceeding 120° Fahr., thus avoiding the destructive oxidation of many of the sensitive alkaloids and perishable constituents which establish their therapeutic importance.

We invite the profession to critically examine these products, to institute crucial comparisons, and to note particularly how well preserved are the sensible and predominating characteristics of the respective drugs.

Having for many years manufactured a complete line of these goods for consumption in our Pill Department, we are fully acquainted with the peculiar conditions which they frequently present and are prepared to furnish to the trade a line of products possessing the greatest degree of permanency consistent with standard quality. We are firmly convinced that the satisfactory therapeutic results of our Compressed Goods are largely due to the superior excellence and activity of our narcotic and other extracts. We will gladly prepare in quantity any special Powdered Extracts that may be desired by our customers.

POWDERED EXTRACTS

Part B

In Ordering our Preparations through Dealers,

We cannot undertake to accept for Credit or exchange, broken or opened packages, i. e., where stoppers (cap or cork) have been removed or seals broken, but will exchange any of our preparations, in original or unbroken packages, which may have undergone change from causes impairing their efficacy.

WYETH'S STANDARD POWDERED EXTRACTS.

POWDERED EXTRACTS

All drugs containing Alkaloids, Resins, or definite active constituents, are subjected to a preliminary assay, and the standard of the finished Extract adjusted to conform.

When Powdered Extracts are ordered in quarter-pounds a reduction of five cents per ounce will be made from list price.

When ordered in half-pounds a reduction of eight cents per ounce will be made from list price.

When ordered in pounds a reduction of ten cents per ounce will be made from list price.

We will be pleased to make specially low quotations for larger quantities in bulk.

	Per oz.
ACONITE LEAVES— <i>Aconitum Napellus</i>	\$ 40
1 grain represents 4 grains <i>Aconite Leaves</i> .	
ACONITE ROOT— <i>Aconitum Napellus</i>	40
1 grain represents 5 grains Assayed <i>Aconite Root</i> .	
ALOE (AQUEOUS) U.S.P.— <i>Aloe Perryi</i>	30
Prepared only from the choicest variety of Socotrine Aloes.	
BELLADONNA LEAVES— <i>Atropa Belladonna</i>	40
1 grain represents 4 grains of Assayed <i>Belladonna Leaves</i> .	
BELLADONNA ROOT— <i>Atropa Belladonna</i>	50
1 grain represents 5 grains of Assayed <i>Belladonna Root</i> .

BROOM TOPS—The Tops of <i>Cystitis Scoparius</i>	\$ 50
1 grain represents 4 grains of the drug.	
BUCHU— <i>Barosma Betulina</i> and <i>Barosma Crenulata</i>	40
1 grain represents 5 grains Green Buchu Leaves.	
BURDOCK ROOT— <i>Arctium Lappa</i>	30
1 grain represents 3 grains of drug.	
BUTTERNUT BARK— <i>Juglans Cinerea</i>	35
1 grain represents 5 grains of Butternut Bark.	
CALABAR BEAN— <i>Physostigma Venenosum</i>	1 50
1 grain represents 24 grains of Assayed Calabar Bean.	
CALUMBA— <i>Jateorrhiza Palmata</i>	40
1 grain represents 5 grains of Calumba Root.	
CASCARA SAGRADA— <i>Rhamnus Purshiana</i>	50
1 grain represents 3 grains of two-year old Cascara Bark.	
CASCARA SAGRADA (SWEET)— <i>Rhamnus Purshiana</i>	60
1 grain represents 4 grains of two-year old Bark.	
CHAMOMILE FLOWERS (English or Roman)	50
1 grain represents 4 grains of the drug.	
CHIRETTA—The Entire Plant <i>Swertia Chirata</i>	75
1 grain represents 5 grains of drug.	
CINCHONA, YELLOW— <i>Cinchona Calisaya</i>	75
1 grain represents 5 grains of Assayed Cinchona Calisaya Bark.	
CLOVER TOPS— <i>Trifolium Pratense</i>	35
1 grain represents 4 grains of the drug	
COCA LEAVES— <i>Erythroxylon Coca</i>	75
1 grain represents 4 grains of Assayed Coca Leaves.	
COLCHICUM ROOT— <i>Colchicum Autumnale</i>	40
1 grain represents 4 grains of Assayed Colchicum Root.	
Colchicum Seeds— <i>Colchicum Autumnale</i>	75
1 grain represents 4 grains Assayed Colchicum Seeds.	
COLOCYNTH (SIMPLE), U.S.P.— <i>Citrullus Colocynthis</i>	60
1 grain represents 8 grains of prime quality of Trieste Colocynth.	
COLOCYNTH COMP., U.S.P.	30
Powd. Ext. Colocynth	16 parts
Powd. Aloes, <i>purif.</i>	50 parts
Powd. Cardamom Seeds	6 parts
Powd. Resin Scammony	14 parts
Powd. White Castile Soap	14 parts
CONIUM LEAVES— <i>Conium Maculatum</i>	40
1 grain represents 4 grains of Assayed Conium Leaves.	
CONIUM SEED— <i>Conium Maculatum</i>	40
1 grain represents 5 grains Conium Fruit.	
CORN SILK—The Stigmata of <i>Zea Mays</i>	40
1 grain represents 5 grains Corn Silk.	
COTTON ROOT— <i>Gossypium Herbaceum</i>	40
1 grain represents 8 grains of Cotton Root Bark.	
CRAMP BARK— <i>Viburnum Opulus</i>	50
1 grain represents 5 grains of Cramp Bark.

CONCENTRATIONS OR RESINOIDS.

The following list embraces the most important and those in general demand. They represent in a concentrated form the active constituents of the various drugs from which they are derived, and will be found in many cases more active than the Powdered Extracts, offering a convenient form of medication. They are prepared under the most careful and intelligent supervision of an expert, from a superior quality crude material, carefully selected and definitely assayed. Our appliances for their preparation are unsurpassed and of the most modern and improved construction, enabling us to produce this class of preparations of exceptional merit and efficacy.

Our list at present is comparatively small—simply comprising those that are largely used. We propose from time to time to make such additions as may be justified by the demand.

When ordered in packages of one pound, eight ounces or four ounces, same deductions will be made from following list prices as noted for Powdered Extracts, page 194.

	Per oz.
ALOIN Aloes (Socotrine)	\$ 20
ALETRIN Unicorn Root, True	50
BAROSMIN Buchu Leaves (Short)	1 00
CASCARIN Rhamnus Purshiana	65
CAULOPHYLLIN Blue Cohosh Root	50

Wyeth's Beef Juice.

A Liquid Preparation of the Choicest Beef, containing the Nutritious Albuminous Principles in an unaltered and soluble form.

Physicians will find WYETH'S BEEF JUICE of great value as a strengthening diet in cases of convalescence, consumption, nervous prostration, and similar diseases; also in typhoid fever, debility, etc. Beef Tea prepared from it, contains more nourishment than any other liquid preparation of meat, and when properly seasoned, is more grateful and appetizing to the patient. Professional men who are suffering from over-work, mental anxiety, etc., will find that one-half teaspoonful in about half a glass of iced water, taken at intervals through the day, and upon retiring, will relieve fatigue,—both of mind and body.

CAUTION.—*As the valuable albuminous elements are rendered insoluble by extreme heat, this preparation should only be mixed with iced or LUKE-WARM water, and never with water at the boiling point.*

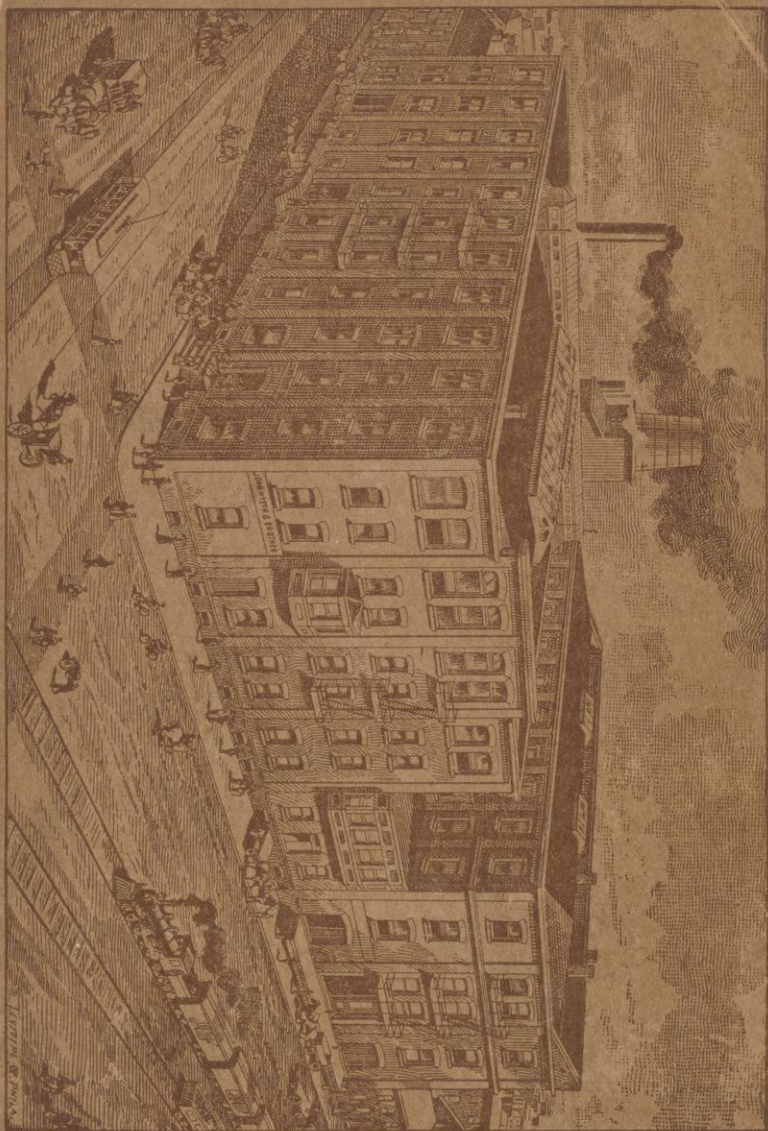

Put up only in bottles containing two ounces each.

ESSAY

ON

A Reliable and Harmless way to Diminish and Cure Over-Fatness.*

BY WILLIAM T. CATHELL A.M., M.D., OF BALTIMORE.

READ AT THE NINETY-NINTH ANNUAL MEETING OF THE MEDICAL AND CHIRURGICAL FACULTY
OF THE STATE OF MARYLAND.]

MR. CHAIRMAN AND GENTLEMEN :

Before all else, I shall state that I have neither medicine to sell, secret to extol, nor scheme to make money out of the public, as "Eureka" titles like this are apt to suggest, but, agreeing that every addition to true knowledge is an addition to human power, I intend to lay before you to-day the results of nearly five years' observation, upon a reliable and harmless way to remove over-fatness and the evils it creates.

That you may have a clearer conception of what is to follow, I shall first remind you that, by the natural law of proportion, fat should constitute about the one-fifteenth or one-twentieth of one's weight, and that a person's heft may vary ten or fifteen pounds either way, from the standard of weight to height, without its being significant of either discomfort or disease ; also, that a certain quantity of fat is a blessing, as it not only improves personal appearance, but is necessary to protect the various organs and to maintain their temperature ; and also, to serve as nutrition in time of need. For these purposes it is stored in cells in various parts of the body, but more plentifully in some regions than in others.

If any one has a much less proportion than one-twentieth : leanness, lankiness, or emaciation is observable ; a very much greater proportion than say one-ninth or one-sixth, constitutes corpulence, obesity or over-fatness, and although stoutness, to a moderate degree, is considered an element of good health and indicative of the successful working of one's physiology, yet, fatness alone is a very poor criterion of health, but, on the contrary, it is an element that possesses the power for serious mischief, because a very great amount of fat necessarily creates heaviness, impedes respiration, circulation, locomotion, digestion and other vital functions, to such a degree that the person who carries such a load of bulky ballast is more burdened than blessed.

In very fat persons, all the celluloadipose structures are filled to distension, more noticeably about the subcutaneous tissues, the breast and the abdominal walls ; also, in the omentum and mesentery ; on the surface of the heart, and about the kidneys ; and if this morbid accumulation grows to be excessive, these all become buried in fat, which mechanically interferes with both function and nutrition.

* Reprinted from *Maryland Medical Journal*, Ninth Edition.

According to my observations, there are four common causes of over-fatness:

Congenitally small lungs with defective oxygenating capacity.

Eating excessively of all kinds of food.

Want of lung-expanding exercise.

Alcoholics to excess.

There are numerous well known agents that more or less effectually reduce surplus fat, and also counteract its return. Among these, Iodine, Bromine, Mercury, Lead, Arsenic, Liquor Potassium, Lemon Juice, Sour Wines, Vinegar, purgatives, sweating, semi-starving, baths of various kinds, smoking and chewing, fish diet, Bladder Wrack, Phytolacca, Gulf Weed, and various quack nostrums, each have more or less reputation for diminishing weight.

Some of these, when taken sparingly or for a brief while, have a proper place and a useful power, but unfortunately, when used in quantities sufficiently strong, and long enough continued, to destroy any considerable amount of fatty tissue, they likewise injure other structures; therefore, are necessarily dangerous to health. Besides, they all act either by saponifying the fat or by producing numerical cell-atrophy, either of which exerts powerful influence on the lymphatic and absorbent systems, not only cause re-absorption and destruction of olein, stearin, margarin, protoplasm, nuclei, and other physiological constituents of the fat-cells, but go further, and annihilate myriads of cell-membranes, red blood globules, and other normal and essential elements of the economy; and as these perish, all histologists know, vitality is reduced and health is impaired.

It is also well known that, while affecting the fat, many of these articles also act as slow poisons, and damage or ruin the alimentary mucous membranes and the functions of digestion, and thus cause mal-assimilation and mal-nutrition, with repugnance to food. These, therefore, are all doubly injurious; and if used too heroically, or continued beyond a certain period, anemia, general debility, marasmus, consumption, or other fatal affections may be induced.

None but an idiot, however fat, wishes to endanger his health by unwise efforts to reduce it, and many over-weighted persons, anxious to throw off their fleshy burden, and aware of the danger of using anti-fat drugs, determinately avoid them, and resort to pedestrianism, bicycling, gymnastics, rowing, massage, electricity, restricted sleep, thyroid extract, skimmed milk and other popular means; while a few begin a regular dietary system: Banting's, Ortel's, Ebstein's, Bruen's, or other's, which all aim to limit the supply of elements that form fat, and to increase its re-absorption; and I am glad to say, to the honor of their founders, that every dietary system with which I am acquainted seems to be based on rational principles.

But, ball-and-chain rules, and iron-clad regulations requiring daily discomfort, long suffering, semi-starvation, abstemious dieting, etc., no difference by whom recommended, are rarely persevered with to a successful degree, by persons with simple over-fatness, and we rarely meet anyone wreathed in fat, who has not begun on one or another, or several different plans, and after awhile become either careless or disgusted, and—quit.

Neither with cases of enormous obesity, nor with celebrities of fabulous proportions, nor with over-fat invalids or semi-invalids have I had any special experience but, if any healthy person, whether male or female, weighing less than 300 pounds, with *simple uncomplicated over-fatness*, wishing to make a fair, honest and faithful trial of my plan to diminish over-fatness, will begin and drink a large glass of Kissingen Water, kept at all drug-store and other soda water fountains, twenty or thirty minutes after each of the three daily meals, one day, and a similar glass of Vichy Water, after each of the three daily meals the next

day, and persistently continue to take them thus, week after week, he will begin and gradually lose fat, until he comes down to medium weight and stoutness, and be correspondingly relieved of the discomforts and the dangers of obesity; after which their use should be discontinued.

The natural Kissingen and Vichy waters, when fresh, answer our purpose equally well, but I have learned to prefer the Artificial Compound made by the chemist's ingenuity to imitate the natural waters when the springs (Rakoczy and Grande Grille) are at their best, because, to be successful, both waters should be used while still fresh, and as the natural waters are brought from afar, by the cargo and carload, there is danger of their becoming so stale and altered before use as to be wholly unreliable, and in actual practice I have found the artificial waters, made from the Kissingen and Vichy powders by mineral water men everywhere, to be equally or even more definite in quality than the natural waters, therefore more certain in their action on fat.

Kissingen and Vichy are both cheap waters, and may be taken at the counter or procured by the dozen in citrate of magnesia or ginger ale bottles, or in syphons, or even in five or six gallon tanks to use at home.

Kissingen and Vichy Salts, taken in ordinary water are said to reduce fatness, but in a lesser degree, owing probably to the absence of carbonic and other gases; with them, given this way I have had no experience.*

It is useless to take either Kissingen or Vichy alone, as they act only when both are taken, and taken alternately. The temperature at which they are used is immaterial.

While using the Kissingen and Vichy, the person should as a necessary guide, keep tally on his girth and weight; by taking his measures, and by carefully weighing his body in the same clothes, and on the same accurate scales, every two or three weeks, and if he has lost more than a couple of pounds for each week, take a smaller glass of each, at every drink, and if he has lost less than a couple of pounds for each week, *squeeze a few teaspoonfuls of lemon juice into each glass of the Kissingen, to increase its acidity, and also add one teaspoonful of the Aromatic Spirits of Ammonia to each glass of the Vichy, to increase its alkalinity.* He can further aid them by using acidulous food and drinks on the Kissingen days, avoiding them with the Vichy.

He should also lend assistance to the action of the waters, not by a too restricted diet, which is not good even for the obese, but by using starches, sugars, fats, alcoholics and all other fat-forming food, but sparingly; avoid over-eating, and use neither food nor alcoholics except at the regular meals; also take early and light suppers, so that from that time until breakfast, the longest of the three intervals between meals, there may be but little pabulum for fattening, and favorable conditions for reduction; and especially that there may be complete emptiness of the stomach during sleep, so that nature may then utilize some of his surplus fat as fuel for the ceaseless wear and tear. He should also take moderate out-door exercise, on foot or wheel, or in any other way that will increase and deepen his respiration and promote tissue oxidation.

After drinking these waters and following these rules for awhile, he will find that he is losing part of his girth and a couple of pounds of avoirdupois every week, and that the loss consists entirely of useless fat; and that his appearance, activity and feelings will all be improved—just as if there exists some natural antagonism between these waters, taken thus, and adipose tissue; more especially that located in the great fat-centres already mentioned.

*Since the above paragraph was written, I have been furnished with abundant proof that Kissingen and Vichy Salts, both plain and effervescing, do act efficiently.

Now, while it is extremely difficult to search out the ultimate of anything in physiology—for instance, why opium relieves pain, and colchicum benefits gout—yet, after studying this subject thoughtfully, I am quite sure there exists either a specific physiological action or some definite chemical affinity between Kissingen and Vichy, taken by this rule, and abnormally-fat human tissues, that results in a lessening of the fat, with neither purging nor sweating, or injury to brain, blood, muscle or general health; but how, or why, I cannot yet explain.

They may reduce adipose and prevent further infiltration or storage, in either of several ways: One is, by merely inhibiting or controlling the disproportionate activity of fat-cell nutrition; thus placing less fatty pabulum and more blood, brain, muscle, nerve and gland elements, at the disposal of the absorbents, while the fatty tissue and oily material of the body, being the most lowly organized, are naturally the first to be removed by the corrected physiological processes.

Or, we may find that they act as alteratives, and restore equilibrium to the nutritive processes, by destroying or neutralizing some morbid fat-forming agency, occult derangement of digestion, or perversion of assimilation, that have been causing diminished oxidation, and a consequent accumulation of fat.

Again, when we study their analysis, and consider the complexity of the potent medicinal ingredients that lie hidden in each glass of these waters, another rational hypothesis arises: Kissingen being an acidulous *saline*, and Vichy an *alkaline*, and both containing salts of calcium, magnesium, potassium, sodium and other minerals, in decided and definite quantities, united with carbonic acid and other gases, it seems logical to suppose, that when *alternately* mingled with the food-pulp or chyme in the stomach and intestines, day after day, their special combination of ingredients, brings about reduction by some chemico-physiological readjustment of the alkalinity and acidity of the blood and the visceral fluids, or possibly, of both humors and solids; and that this readjustment, makes the fat-yielding pabulum less plentiful and less rich, therefore, less favorable for fat-creation, and metabolically explains why increase of fatness ceases, and why reabsorption of the surplus contents of the fat-cells begins, and also, why this physiological reduction and reconstruction results, all uniting to prove that Kissingen and Vichy, taken by this plan, are a reliable combination for preventing increase and reducing surplus fat to the normal proportion of one to fifteen or twenty.

But, whatever their exact mode of action may be, there certainly exists some natural and well marked antagonism between these two waters taken thus, and adipose material, that tends to restore a normal balance between the quantity of it and of other tissues. This has been proven again and again. In some cases, however, the direct and immediate effect of Kissingen and Vichy is more perceptible than in others, because some types of fatness reduce more easily and more rapidly than others. The more firm and solid the flesh, and the longer one has been fat, the more slowly it yields. Such a one, if quite fat and belonging to a constitutionally fat family, with proportionately small lungs, might require a persistence with Kissingen and Vichy methodically for six months or even longer, unless the ammonia and lemon juice are added regularly. Ungovernable appetite, failure to exercise, tipling, etc., may also retard or prevent success.

In some of these "stubborn" cases, a considerable decrease of size, with but little lessening of weight has been observed.

In addition, Kissingen and Vichy not only reduce over-fatness, but also tend to permanently correct the irregular and excessive fat-making activity on which it depends, without injury to health. The person gradually becomes thinner, looks healthier and feels younger and more active, as his (or her) superabundance disappears. At the same time, the skin being an elastic and active tissue, contracts

correspondingly, leaving neither flabbiness nor wrinkles, bagginess nor crow's feet, while brain, muscle, nerve, blood and glandular nutrition and strength, all remain normal, proving that this method does not cause either pathological diminution or morbid shriveling from inanition or loss of strength; or constipation with cachexy, from impaired digestion, as the various "Anti-fat" blood depuratives and glandular eliminatives are notoriously apt to do.

To properly appreciate this fact it must be remembered that a person in normal flesh has as much blood, and usually better blood, than a similar person whose weight has been ever so much increased by fat, and that Kissingen and Vichy act on the fat and not on either the blood, the glands or the bowels.

My attention was first called to the peculiar power of this combination over fat fully five years ago, in this way: Mr. McK—, a hearty looking, middle-aged gentleman, who was consulting me for an unimportant affection of the throat, informed me that in addition to this, he had lost about thirty pounds of flesh within the last half year, without sickness, loss of appetite or any other apparent reason, and that he was mystified and unable to discover the cause.

On inquiry I gleaned nothing important, except that for several months he had been following the habit of drinking Artificial Kissingen and Vichy Waters daily, under the belief, that being called for so often by soda water patrons, they must be good for one's health.

His throat being better, he soon passed from my care, with his loss-of-weight mystery unsolved.

The following year, Mr. J. H. H.—, a young man of thin visage and notable leanness in general, asked me the cause of his losing nearly nine pounds in weight. Among other things, I learned that for a year or more he and a companion had been daily visitors to a near-by soda water fountain, and tiring of the various syrups, they had changed, five or six months before, to Kissingen and Vichy, and that shortly thereafter they both noticed that they were getting thinner and thinner.

Remembering Mr. McK—'s decrease, and putting this case and that together, I told him of the resemblance, and caused him to discontinue Kissingen and Vichy immediately. Emaciation shortly ceased, and under tissue-building tonics he gradually regained what had been abstracted from his scanty stock of fat.

Feeling quite sure that I now had a clue to the mystery, I sought out Mr. McK—to tell him, but suspecting the waters himself, he had long since quit them, and his loss of weight had ceased, making him quite sure as to the cause.

A few months after this, friend, McK—, called at my office with a young Canadian, Mr. W. D. W.—, a bar-tender, whom he had incidentally met, and wished me also to see. His weight, under the liberal use of Kissingen and Vichy, had fallen, during the past summer and fall, from 223 to 180 pounds. He explained to me that, being a bar-tender, he was kept in constant contact with liquor drinking, and, being pledged against all intoxicants, yet, not wishing to offend customers, he would take a dozen or more small shell glasses of either Kissingen or Vichy daily, drinking whichever they had most of in stock.

He further informed me that his decrease in weight, and a striking rejuvenescence in his appearance, activity and feelings, began shortly after commencing this habit. His lessening in weight had also ceased promptly after Mr. McK— had caused him to quit them.

This was more than three years ago. His size still remains at comfortable stoutness, and his weight keeps below 200 pounds.

Anxious to utilize this discovery and determined to neglect nothing in pursuit of the truth, Kissingen and Vichy have since been experimented with by me, and by others, on different fat-laden persons at various hours and in varying quantities,

and as the result, I would recommend their use in the quantities and at the hours already mentioned, since these, in my opinion, constitute the most effective time and quantity.

At a recent interview Mr. W. D. W—, the bar-tender, told me that constantly fearing his superabundant fat may again force him above ordinary stoutness, he has adopted the habit of drinking a few glasses of Kissingen and Vichy daily, for ten or fifteen days, several times a year.

Governed by this and other cases, I would advise those with the smaller degree of over-fatness, who wish to effect a slight and gradual reduction of size; and also, those merely seeking to reduce unsightly chin, facial, bust, hip or abdominal fat, or to keep their general bulk down to the natural, to drink Kissingen and Vichy now and then, instead of adhering rigidly to the regular system.

When the excess is chiefly below the waist, causing what is called "large stomach," wearing a snug abdominal supporter or a moderately tight abdominal binder, while pursuing the method, makes the fat disappear much more promptly from this locality, and also braces up the reduced form as absorption progresses.

My father, Dr. D. W. Cathell, has recently at my request, tested this method on nearly a dozen cases of over-fatness with favorable results, and I hold in my hand now, the records of eleven cases, seven males and four females, who have used Kissingen and Vichy, more or less methodically, with the following positive results: A fat grocer, reduced from 310½ to 289 pounds in eleven weeks; bar-keeper, reduced from 223 to 180 pounds in nineteen weeks; a lawyer, reduced from 191 to 173 pounds in fourteen weeks; young real estate agent, from 173 to 151 pounds in twelve weeks; clergyman reduced 16 pounds in nine weeks; lady, aged 28 years, from 286½ to 264 pounds in thirteen weeks; stout actress, from 173 to 166 pounds in seven weeks; young English lady, from 149 to 142 pounds in five weeks; conductor on steam cars, from 183 to 174 pounds in six weeks; lady, aged 41, from 173½ to 160½ pounds in eleven weeks, and that of a well-known physician, who was reduced by an irregular use of Kissingen and Vichy from 211 to 196½ pounds in nine weeks.*

Fortified by such observations, I do not hesitate to assert, that the *heavy laden*, who are suffering with the fat-forming diathesis, and wish to reduce their surplus to healthy limits, and to regulate its further formation, can do so by avoiding over-eating, limiting the use of sugary and starchy articles, fatty and oily food and the alcoholics, and using Kissingen and Vichy Waters by the rules already mentioned.

Based on equally clear proof, I am also equally convinced that the lean, the puny, the slim, the pale and the flabby; those with weak hearts, irregular circulation poor vitality or limited health; together with all that numerous class of *feather-weights* whose percentage of fatty tissue is so scanty that they should either try to increase the number and fulness of their fat-cells else let them remain as they are, should seek good, nutritious food, fresh air and moderate exercise, and avoid mineral waters in general, and Kissingen and Vichy in particular.

My sole object, Mr. Chairman, in bringing before you a subject so far separated as this from the specialty to which I limit my practice—The Nose and Throat—is, that having observed what I believe to be a valuable therapeutic fact, I feel it to be my duty to lay it before the profession.

1308 N. Charles Street.

*NOTE TO THE NINTH EDITION.—Since this paper was originally published, very many reports of the successful use of Kissingen and Vichy have reached me, varying from the loss of fifteen, twenty or thirty pounds, up to ninety.

NOTE.

Acting on the suggestions in the foregoing reprint, and actuated by the very satisfactory results received, we have lately added to our list of Granular Effervescing Salts, a KISSINGEN SALT which embodies all the constituents of the natural Kissingen Water, but in a much more concentrated form, and is peculiarly adapted for the treatment of obesity, as suggested by Dr. Cathell. This Salt, we are satisfied, is decidedly more convenient for all concerned, as it is not always practicable to obtain artificial or natural Carbonated Waters. Our Granular Effervescing Salts of VICHY and KISSINGEN are also more economical, and what is more important, they will be found to possess greater activity than any of the medicated waters, as generally found in the market. VICHY and KISSINGEN SALTS yield in moderately cold water, a most refreshing and palatable effervescing draught which will certainly be relished and appreciated as a daily stomachic by the most exacting patient. The attention of physicians is especially directed to the very complete list of our Effervescing Salts which follows.

JOHN WYETH & BROTHER.

LIST OF WYETH'S GRANULAR EFFERVESCING SALTS.

EFFERVESCING HEADACHE SALTS.

(CAF-ACETAN).

The chief ingredients of this preparation,—Acetanilid, Caffeine and Bromide of Sodium,—are efficient and highly esteemed remedies for headache, neurasthenia and many nervous disorders in which pain and sleeplessness are prominent symptoms, and also in those diseases where stimulant, diuretic and alterative medicaments are indicated.

APERIENT.

A most pleasant and agreeable morning draught, acceptable to the stomach, and mild but effective in action.

BROMIDES MODIFIED.

Nerve sedative and hypnotic; more especially intended for use in cases suffering from kidney disorders.

CAFFEINE HYDROBROMATE.

The advantages of this preparation over combinations containing drugs from which Caffeine is obtained, are that while possessing the same therapeutic properties, definite strength is assured.

KISSINGEN.

An excellent substitute for Carlsbad Water (much of the effect is due to the presence of this Salt) may be obtained by adding a dose to a tumbler of water and taking gradually on getting up in the morning; as a specific for obesity it should be taken in alternation with Granular Effervescing Vichy, taking a dose of Vichy in the morning and a dose of Kissingen at night.

LITHIUM CITRATE.

Indicated in Rheumatic, Gouty and kindred conditions. Owing to its less nauseating character, it will prove more acceptable than the Carbonate.

MAGNESIAN APERIENT.

An aperient and refrigerant, possessing the quality of rendering the secretions neutral or alkaline, more especially those of the alimentary canal. The mild and gentle action characteristic of Magnesia attends the use of this.

MAGNESIUM CITRATE.

Possesses all the laxative and purgative properties of the liquid preparation, but has the advantage of being more economical to use; is effective, at the same time pleasing to the taste.

POTASSIUM BICARBONATE.

The most freely prescribed of all alkaline remedies. Its worth is so fully recognized that recommendation is unnecessary. As a granular effervescent salt, we offer it in a most desirable form for administration.

POTASSIUM CITRATE.

Diuretic, diaphoretic and febrifuge; a delightful draught, and more pleasant for administration than the alkaline waters. Especially recommended for neutralizing the secretions.

SEIDLITZ MIXTURE.

A saline laxative, effective in relieving moderate constipation and in reducing the fever natural to kindred disorders. A more convenient form than the ordinary Seidlitz Powders.

SODIUM BICARBONATE.

This salt is largely prescribed in cases of dyspepsia due to acid fermentation; in fact, is especially valuable for overcoming the acid condition of the secretions.

SODIUM PHOSPHATE.

This is a specific in constipation, obesity, rickets, jaundice, the diarrhoea of small children, etc., etc.; will also act as a mild, pleasant and tasteless laxative.

SODIUM SULPHO-PHOSPHATE.

In this combination the aperient property of Sodium Phosphate is reinforced by the addition of Sodium Sulphate, producing a combination of decided merit.

VICHY.

The well-known and valuable therapeutic properties of the Vichy water are strictly and carefully imitated, following the French government's official analysis. The most popular of the three springs is the one selected, namely the Grande Grille.

WYETH'S
SOLUTION
PEPTONATE OF IRON
AND
MANGANESE.
NEUTRAL.

(LIQUOR MANGANO-FERRI PEPTONATUS-WYETH.)

ANAEMIA,
SCROFULA,

CHLOROSIS,
DEBILITY,

The organic union of Iron and Manganese with Peptone forms a new preparation that represents the acme of scientific ingenuity as applied to the difficult problem of administering iron and manganese together, in such wise that the valuable properties of these remedies—as tonics and reconstituents—shall not be nullified by negative results in the organism, viz.: non-assimilation and indigestibility. For it has hitherto been found that iron and manganese, though of supreme value in impoverished states of the blood, are absorbed with great slowness and difficulty when given in some inorganic preparation, and, in many subjects owing to weak and defective powers of digestion and assimilation, not at all. In fact, to the organism of people who have feeble stomachs, experience has shown it to be well nigh impossible to furnish iron and manganese in a satisfactory manner. In such cases, the iron and manganese ingested is deposited along the intestinal tract, where it remains unchanged and inert until carried out in the fæces; and the minute quantities that may, under favorable circumstances, enter the blood current after a long and tedious process of giving accumulating doses (*Hamburger, Correspondenz-Bl. f. Schw. Aerzte*, No. 13, 1893), are apt to do so at the expense of the health. In other more happily constituted individuals, inorganic compounds of iron and manganese have done good by increasing the appetite, and, secondarily, by causing a larger assimilation of food-stuffs. But the improvement accomplished in this way is merely temporary, for the amount of hæmoglobin in the blood, the final test of the efficacy of iron preparations—is not materially augmented, nor is an increase in this respect, constant (*Nothnagel, v. Ziemssen, Gellhorn, in, Ther. Monatshefte*, May, 1897). Indeed, so small is the quantity of iron and manganese ordinarily absorbed from inorganic compounds, that Brown-Séquard and Bunge were led to entertain extreme views of the uselessness of these remedies. The latter, wishing to provide the profession with a compound of iron that could be readily absorbed, prepared after many trials, an albuminate which he called

Hæmatogen, and which, in a celebrated address he asserted to be superior to the iron compounds found in the yolk of egg, in vegetables and other natural products (*13 Congress für innere Medicin zu München*, April, 1895).

From the albuminate of iron to the present peptonized albuminates of iron and manganese is a step that has been taken after a long series of experiments and clinical observations. By associating the albuminates with peptones a very ingenious and effective combination is reached. For the albuminates, in their crude state, are liable to changes that rob them of their efficacy and their agreeable qualities. They become inert, unpleasant to the taste and of a thick jelly-like consistency, difficult of digestion. Hence the peptonization and aromatization of this preparation, contributes not only to its value and permanence as a remedy, but, by rendering it of neutral character and pleasant taste, prevents it from injuring the teeth, upsetting the stomach, and from undergoing any decomposition. As regards the digestibility of this preparation, we believe that its aromatic properties and, above all, the presence of peptone in it,—must make it tolerable and agreeable to the most susceptible stomach. The value of peptone here may be summarized from the latest scientific researches, shortly, as follows :

(1) By association with peptone, the albuminates of iron and manganese become "digested," or, in other words, much of the labor of the stomach and pancreas in this respect is saved.

(2) Peptone is a body that is not provided abundantly by the stomach, even in health ; and hence, its artificial administration is, for weak digestion a *desideratum*.

(3) It is a necessary adjunct of pancreatic digestion.

(4) It is easily absorbed.

(5) It increases peristaltic action.

(6) Given artificially to animals, its effect is to increase body weight (*Cahn, Berliner kl. Wochenschr.* No. 25, 1893).

Because peptone, under the most favorable conditions, is not produced in the course of digestion except in minute quantities barely sufficient for the economy, its artificial administration, under conditions that cannot be called favorable, is a matter of simple adjustment of the materials necessary to active digestion. According to Chittenden and Kühne peptone is not detected in the contents of the stomach until the last stage of digestion has been reached ; and even then, it occurs in small amount, about as 2 : 3, in comparison to the amount of the other products of digestion (*Hyg. and Dietetic Gaz.*, 1893, p. 125). In the course of pancreatic digestion, peptone assumes its most important functions. At this stage of digestion it acts in a stimulating manner (*Cahn*). In the small intestine, the union of iron and peptone—the "peptonate" of iron—is absorbed very readily, a fact that has been determined with considerable definiteness by Macallum (*Journal of Phys.*, vol. xvi, 1894). He administered the peptonate of iron to animals and studied its absorption in the intestine by micro-chemical methods. Iron in its various forms is chiefly absorbed in the villi of the intestinal wall, whence it is carried by the leucocytes through the epithelial layer into the blood. In the villi its presence may be detected by treating portions of the intestinal tissue with ammonium sulphide (which yields a greenish blue reaction, plainly to be seen under the microscope). Tested in this way, peptonate of iron gives a very dense reaction, and, as Macallum says, "when administered to guinea pigs, seems to stimulate the leucocytes to invade the epithelial lay of the intestinal villi (p. 295). Although there have not as yet been published any studies of the absorption of the peptonate of manganese, it becomes probable from the above evidence that it is taken up in the same manner as iron by the intestinal villi. These results have been confirmed by Quincke, who has shown besides that iron in small quantities may be found in the liver, spleen and kidneys.

Enough has been said to show that the absorption of Iron and Manganese must be materially aided by uniting them, as has been done in this preparation, with Peptone. Apart, however, from these considerations, Peptone has a variety of effects that are peculiar to itself in its isolated state. As its nature and attributes are somewhat vaguely understood, even by scientific men, it may be of use to describe it exactly. It is thus defined by Hammarsten: "As Peptone it is customary to designate the final products of the disintegration of albuminous bodies by proteolytic enzymes, in so far as these final products maintain their character as true forms of albumin" (*Physiologische Chemie*, Wiesbaden, 1895, p. 29). To distinguish Peptone from other albuminoid bodies, a simple test has been invented by Kuhne and Chittenden. According to this test Peptone is soluble in ammonium sulphide, whereas other forms of albumin are not (*ibid*, p. 30). Such being the nature of Peptone, it becomes clear that it is an important agent in the assimilation of albumin (*Cahn*). In fact, Peptone is the medium through which a large portion of the albumin consumed with the food enters the system. Hence, according to Cahn, Peptone is indicated in dyspeptic conditions where the quantity of albumin produced in digestion is deficient. As it increases peristaltic action, it is of value in constipation; and in the present combination its effect on the bowels is particularly useful as a means of overcoming the astringency of iron. But of all its uses, the most valuable, according to Cahn, are displayed in "combating those symptoms and phenomena that occur in the digestive system subsequent to anaemia and chlorosis, as well as in the course of many chronic febrile diseases, and during the stage of convalescence therefrom" (*supra*, p. 606).

It is evident from the foregoing observations that the combination of Peptone with Iron and Manganese has many natural and artificial advantages. That Iron and Manganese should be associated together in any preparation especially designed to increase the amount of haemoglobin, of red blood globules, is a necessary conclusion from the physiological fact that both these elements are always found combined in the haemoglobin of the red blood corpuscle to the normal construction of which they are indispensable (*Ascher, Allg. Med. Centra-Ztg.*, Oct. 16, 1889). As a means of raising the quantity of haemoglobin when diminished in disease, the salts of manganese are deemed by many more powerful than those of iron, for they give up their oxygen more freely than iron salts (*Loomis, New York Med. Rec.*, June 3, 1893). Manganese has been used in medicine since 1838, when Kugler employed it for the first time in scrofula. He had noticed that the workmen who handled manganese salts in chlorine bleaching establishments enjoyed immunity from affections of the skin, joints and bones. In 1844 Hannon demonstrated that in scrofula there was a diminution of manganese in the blood, and to an even greater degree in anaemia and chlorosis. These results, it is needless to say, have been fully confirmed. It is believed, also, by many authorities, that in anaemia manganese is diminished in quantity proportionately more than iron (*Loomis*). This proportion, however, is by other observers thought to be variable; in some cases of anaemia more iron, in others more manganese, being wanting. Anaemia, therefore, may result when either iron alone or manganese alone are abnormally diminished, or, as happens in some cases, when both together are lacking in the requisite amount (*Hannon*).

In anaemia and chlorosis the combination of iron and manganese was first employed by Petrequin in 1852. More recently a combination of the albuminates peptonized has been recommended in the highest terms by Professor Ruehle, of Bonn, for anaemia, chlorosis, phthisis and other conditions of debility. Dr. Ascher (*supra*) says: "I have employed it in eighty cases with extraordinary results." Similar encomiums have been passed upon it by Heitzmann (*Allg. Wiener Med. Ztg.*, No. 36, 1892), Perekhan (*Chicago Med. Rec.*, May, 1896), Schurmayer (*Deutsche Med. Wochenschr.*, No. 42, 1895), Woodruff (*Am. Therapeutist*, p. 258, 1896),

Williams (*Boston Med. and Surg. Journ.*, June 25, 1896), Gellhorn (*Ther. Monatshefte*, 1897), and by others. All these authorities pronounce a preparation of this kind by far the best method of administering iron and manganese, as it has been found by them, in practice, to be a remedy easily born by weak stomachs, and rapidly productive of the characteristic tonic and reconstituent effects for which those medicaments are given. Under its use a marked and speedy increase of haemoglobin, and of red blood corpuscles, has been verified. Loomis observed in his cases an increase of $2\frac{1}{2}$ per cent., which brought the amount of haemoglobin about to the normal, after a few weeks of medication. Gellhorn demonstrated a rise in the amount of haemoglobin of from 32 to 77.5 per cent., using 100 per cent. as the normal quantity. According to these authorities, the best and most striking results are obtained in chlorotic and anaemic women. By Gellhorn the most rapid rise in the amount of haemoglobin was observed in cases of convalescents from severe surgical operations, in which cases the construction of red blood under this treatment went on with remarkable quickness. Dr. Robert L. Pitfield, who has made an especial study of the action of our own preparation of Peptonate of Iron and Manganese noticed in his cases a gain in haemoglobin of 3 and even 8 per cent. He tested the weight of his patients, and observed a satisfactory gain in that respect also.

In an important class of cases allied to anaemia and chlorosis—in amenorrhoea and torpor of the uterus and ovaries—this preparation will be found of the greatest utility. As a remedy for amenorrhoea, the salts of manganese were introduced into medical practice by Ringer and Murrell. On the uterus and ovaries manganese has the effect of a tonic, restoring their functions after a period of quiescence and developing their vital activity in a remarkable manner. In such cases iron is an efficient synergist of manganese. In addition to this effect on the ovaries, manganese stimulates the liver and portal circulation. This is probably one of its most fortunate properties, and one that, in a preparation of this kind, is of especial value, aiding its digestibility and absorption (*Bartholow's Therapeutics, Art. Manganese*).

To sum up, our Peptonate of Iron and Manganese will be found very useful in the following diseases: *Scrofula, Anaemia, Chlorosis, Amenorrhoea, Debility* from various causes, *Convalescence* from acute fevers and surgical operations, *Nervous Maladies* such as *Graves's Disease, Neurasthenia, Epilepsy, Cretinism*, and any other *Nervous Condition* requiring a *Tonic Strengthening Medicine*, in *Rickets, Pyloric Stenosis, Phthisis, Diabetes*, etc., etc.

This remedy is of pleasant, neutral taste. It can readily be taken in a little water, milk or sweet wines, free of tannin, as may be preferred. Is non-astringent, and does not injure the teeth or constipate the bowels.

DOSE.—For an adult one tablespoonful well diluted with water, milk or sweet wine, three or four times a day; dose for a child is one or two teaspoonfuls, and for an infant, 15 to 60 drops, according to directions of attending physicians.

ELIXIR

UTERINE SEDATIVE.

Viburnum Opulus (Cramp Bark), *Piscidia Erythrina* (Jamaica Dogwood), *Hydrastis Canadensis* (Golden Seal), *Pulsatilla* (Anemone Pulsatilla).

The above combination cannot but at once appeal to the intelligent practitioner as almost a specific in the treatment of the various kinds of pain incident to the diseases of the female sexual organs so varied in their character and such a drain upon the general health and strength.

Cramp Bark, or *Viburnum Opulus*, as it is officially designated, is an indigenous plant, long and favorably known to American physicians as perhaps the best remedy for certain kinds of pain, particularly the pains of parturient women, and dysmenorrhœa. It is a variety of *Viburnum Prunifolium*, also highly esteemed, possessing almost identical properties, but more certain and efficacious in its action (Purdy: *New York Med. Journal*, 1882, vol. xxxvi, p. 402. Dujardin-Beaumetz: *Dict. de Thérapeutique*, vol. iv, p. 752). As its use is perfectly free from danger, and as it is as efficient in suitable cases as the most powerful anodynes, it is preferable in an elixir of this kind, which is a household remedy, and to be serviceable as such, must be both effective and safe.

According to Hale, *Viburnum* is a "powerful antispasmodic and is generally known to American practitioners by the name of Cramp Bark." It was given this title on account of its power in alleviating pain, especially the pain of dysmenorrhœa. In this disease, according to the same authority, "it never fails," and is equalled only by opium, without having any of the dangers of that narcotic (*Therapeutics*: Purdy: *loc. cit.*). Dr. Hall, who used it in a series of cases of dysmenorrhœa and uterine pain, found it remarkably efficacious, and regards it as an adequate substitute, in such maladies, for opium (*Phila. Med. and Sur. Reporter*, 1878, vol. xxxviii, p. 494). It was also tried with excellent results by Dr. Meyer (*Specific Med.*), and by Dr. Piffard (*Therapeutics of the Skin*). More recently a large number of eminent physicians have come forward in praise of *Viburnum Opulus*. According to Dujardin-Beaumetz "it possesses very remarkable antispasmodic properties. It is particularly efficacious in cases of dysmenorrhœa with uterine colic, taking place at the beginning of menstruation" (*Dict. de Thé. loc. cit.*). A very high authority sums up its properties as follows: "A nervine tonic, astringent,—dressing for ulcers, and aphthous stomatitis, a useful remedy in diarrhœa and dysentery" (*Dict. Encyclopédique des Sciences Médicales*, 5 sec., t. iii, p. 711). The two-fold astringent and nervine power of *Viburnum* renders it very useful in the colic of pregnant women accompanied with diarrhœa. Auvard employed it in a number of cases with great success (*Gaz. Hebdomadaire*, 1887, p. 548). Dr. Joseph, an Austrian physician, to whom we are indebted for an admirable paper on the uses of *Viburnum*, prefers it to all other remedies in the dysmenorrhœa of young girls, where there is some mechanical difficulty, such as ante-flexion. In such cases *Viburnum* "possesses an incomparable power" (*Wiener Med. Wochenschrift*, 1892, pp. 1430, 1462, and *Deutsche Med. Zgt.*, 1892). In this trouble, full doses are desirable. Dr. Huchard, of Paris, had good results with doses of twenty drops of the French tincture—a strong preparation—given every two hours (*Bulletin de la Soc. Medico-pratique*, 1886, ii, p. 15). The success of such medication is well attested, by the above authorities and by others, e. g. Roe (*Therapeutic Gaz.*, 1882, p. 8), Herrick (*ibid.* p. 129), Herr (*ibid.* p. 280), by Coleman, Reas, Boal, Rockwell, and many whose opinions may be found in the same journal. It is recommended by a number of English physicians for dysmenorrhœa, due to ante-flexion of the uterus (*Lancet*, 1885, ii, p. 36; *British Med. Journal*, 1889,

vol. i, p. 489, *ibid.* p. 640), and very recently by Dr. Shennan of Edinburgh (*Edinburgh Med. Journal*, Nov. 9, 1896). In pain due to other causes, but sometimes mistaken for dysmenorrhœa—in the pain that many women, who have previously aborted, suffer from during pregnancy, Viburnum is a most valuable remedy. In these cases, according to Schatz, there is no substitute for it (*Lancet*, 1888, ii, p. 133).

But valuable as Viburnum is in the treatment of the various kinds of pain, incident to the diseases of the female sexual organs, its chief use, and claim to the confidence of physicians, is its power of arresting abortion, where threatened, and of preventing it where habitual. Where there is this tendency to miscarry, Viburnum is the most efficient remedy that we possess. In other cases, where abortion has not proceeded so far as death of the foetus and detachment of the ovum, Viburnum is generally found to retain the child until full term. It fails in cases only where given in too small doses (Montclar: *Du Viburnum, Thèse de Paris*, 1887, p. 27; Eulenburg: *Real-Encyclopädie*, Bd. i, p. 88; *ibid.* Bd. ii, p. 132). Dr. Phares, of Newtonia, Miss., was the first to write about this use of Viburnum. He says:—"Viburnum is nerveine, antispasmodic, tonic, astringent, diuretic, and may be used to very good purpose in urinary affections, ophthalmia, aphthous sore mouth, chronic diarrhœa, dysentery, indolent ulcers, etc. It is an excellent remedy in colic, cramps, spasms, palpitation and other affections incident to pregnancy, or arising from uterine disorder, and for after-pains. But it is particularly valuable in preventing abortion and miscarriage, whether habitual or otherwise. It is therefore a 'uterine sedative.'" Dr. Phares supports this view with a list of successful cases (*Atlanta Med. and Surg. Journal*, 1866, vii, p. 409). Some years later, Dr. Jenks read a paper on the employment of Viburnum in abortion and other affections of women. After referring to Dr. Lusk's favorable opinion of it (*Midwifery*, p. 317), he proceeds:—"It is serviceable in all uterine disorders characterized by loss of blood. In menorrhagia or metrorrhagia depending wholly upon systemic causes, phthisis, organic diseases of the heart, hepatic disorders, anemia or malarial diseases, it is peculiarly applicable. There is no depressing effect succeeding its administration; on the contrary, it is a grateful tonic, seeming to stimulate rather than depress. It has a powerful influence in preventing threatened abortion" (*Gynecological Transactions*, i, p. 131). With regard to this important subject, the use of Viburnum in abortion, Dr. Monclar, who has made a special study of such cases, says: "The indications for the administration of Viburnum Prunifolium in obstetrics are the same, nearly, as in the case of opium. Without wishing to diminish the value of opiates in any particular, we believe that in many instances Viburnum is preferable. In habitual abortion, for example, when caused by irritability of the uterus, or by states of congestion, taking place at the usual epoch of menstruation, Viburnum may be given as often as it may seem necessary. With this medicament, even if it be employed for months together, no accident is to be apprehended" (*Thèse*, p. 29). The cases reported minutely in Monclar's Thesis are sufficient confirmation of this statement. Viburnum, not being toxic, may be used with boldness. Shennan's physiological study demonstrates that its action is limited to a diminution:

- (1) of reflex power,
- (2) of motor power,
- (3) of sensibility.

It contains an acid similar in all respects to valerianic (Van Allen: *Amer. Journal of Pharmacy*, 1880, vol. i, p. 441). On the presence of this acid, doubtless, depends the utility of Viburnum in nervous and hysterical cases, and in congested states of the uterus. Herr believes that it exercises a "tonic effect on the tunics of the uterus." It is more certain that by lessening motor and reflex action, it arrests the excito-motor awakening of the pregnant womb, a frequent cause of miscarriage (Monclar: *Thèse*, p. 22).

The power, indeed, of Viburnum in arresting abortion is often surprising. In the following report of a case by Auvard, it will be seen that this remedy prevented a miscarriage in the 6th—7th month, where there was already detachment of the ovum. Here the intelligent use of the drug was marked by brilliant results, prolonging the life of the embryo and rendering the delivery of a viable foetus possible. "I administered Viburnum Prunifolium with success to a young primipara who had experienced a premature rupture at six months and a few days of her pregnancy—attended with losses of a large quantity of amniotic fluid, sometime streaked with blood. There were also from time to time, painful contractions of the uterus. This patient was able, under the influence of Viburnum, to make a railway journey of three hours to her home, where three weeks later she was safely delivered of a child, perfectly viable (*Supra. loc. cit.* p. 549).

Not less remarkable cases of this type have been published by Campbell (*British Med. Journal*, 1886, vol. i, p. 391), Leith Napier (*ibid.* p. 489), Wilson (*ibid.* p. 640), Roberts (*ibid.* 1887, ii, p. 1153), L'voff (*Lancet*, 1886, ii, p. 888), and others. In post-partum hemorrhages, Viburnum is indicated, as its action upon the blood vessels is similar to that of ergot. Indeed, Campbell prefers it not only to ergot, but also to opium and Indian hemp, both of which are disappointing and uncertain in action. Olivier, an eminent French physician and obstetrician, having failed with morphine in arresting hemorrhage, succeeded with a 15 drop dose of Viburnum (Monclar: *Thèse. Obs.* xxi). Monclar, himself, has published a number of successful cases of this kind. In hemorrhage due to other causes, fibroid tumors, endometrial growths, etc., Viburnum is a valuable remedy (Holmes: *Journal of the Am. Med. Ass.*, 1894, vol. i, p. 631). Dr. Roe, recommends it as very efficient in sterility (*Ther. Gazette*, 1882, p. 8). In uterine engorgement, in ovarian irritation, in after-pains, it will be found of signal service, and also in uterine and ovarian neuralgias.

In the new preparation of Viburnum now submitted to the profession, the unquestionable utility of this agent is greatly enhanced by the addition of remedies possessed of analogous powers. Not only is the value of Viburnum thus promoted in the special field of its therapeutical activities, but a more extended range of powers is thereby secured. In other words, our new preparation possesses all of the virtues of Viburnum, and in addition all of the therapeutical properties of Hydrastis, Pulsatilla and Piscidia.

Hydrastis has been known as an indigenous remedy of considerable value, as a tonic and reconstituent, and as a topical alterant and astringent. It was not, however, until its physiological actions, especially its effects on the nervous system of animal and organic life, were first demonstrated by Bartholow (*Lloyd's Drugs of North America*, vol. 1), that attention was attracted to its remarkable powers. Fellner, Falck, Marfori and others, abroad, and Carna and Mays of this country, fully confirmed these observations and extended them. Although differing on some minor points, all of the authorities are agreed that *Hydrastis* stimulates the spinal cord and increases the reflexes. In sufficient doses it causes tetanic convulsions, closely resembling those caused by strychnine. By its effects on the vasomotor centre it causes a great rise in the blood pressure, and this action is increased by its stimulating effect on the muscular fibre of the arterioles. In the same way it promotes the action of the muscular fibre of the intestine, and increases peristalsis, and it, also, affects the organic muscular fibre of the uterus.

By virtue of bitter tonic properties, *hydrastis* promotes appetite and the digestive powers. As it increases the intestinal movements, by stimulating the organic muscular fibre, and as the secretions of the mucous membrane are also made more abundant, its effects are somewhat laxative. Rutherford has shown that it has some cholagogue properties, increasing the flow of the bile and stimulating the hepatic functions.

Hydrastis contains two alkaloids, berberine and hydrastine. The former is not peculiar to *hydrastis*, but is found in other plants. Hydrastine and hydrastinine, its product, are alone the active constituents of the drug. All of the powers and properties of *hydrastis* exist in hydrastine. To the presence of this constituent, is due the actions of the drug on the nervous system of animal and organic life. The most important of the recent observations on the alkaloid, is its action on the uterus, and clinically its power to restrain hemorrhage. The artificial alkaloid, *Hydrastinine*, produced by Freund by the oxidation of hydrastine, has been shown by Falck, by Prof. Schatz (*Centralblatt, f. a. Gesamte Therapie*, Band ii, p. 82), to have special powers in menorrhagia and metrorrhagia, and other hemorrhages. Hydrastinine has consequently become one of the notable remedies in the treatment of uterine congestion and hemorrhages, in congestive dysmenorrhoea. Hydrastinine slows the heart and strongly contracts the blood vessels, actions that explain its power in restraining hemorrhage. It has lately been shown, also, that this agent diminishes the irritability of the brain cortex, and that therapeutically, it lessens seizures of a convulsive kind. Indeed it has lately been found to have decided effects in epilepsy and other forms of convulsions. From this rapid survey of the physiological powers and clinical applicability of *hydrastis*, it becomes evident that it is an important adjunct to Viburnum, in the class of cases to which that agent has demonstrated its adaptation. Besides this, *hydrastis* confers new powers on the combination in the treatment of the various reflex neuroses arising from uterine maladies.

Pulsatilla, the next ingredient in the compound to be considered, has long been a favorite remedy of homœopathic physicians in the treatment of dysmenorrhoea of congestive character, of suppressed menses from exposure to cold, and

other causes of similar character. Like *Viburnum* it is used to relieve irritable states of the uterus, to remove uterine and ovarian irritation and to stop the reflex disturbances, vascular and nervous, arising therefrom. In recent times, the utility of *Pulsatilla* has been recognized and applied by all classes of practitioners who have learned to appreciate its value.

The properties of *Pulsatilla* are due to the presence in the plant of an alkaloid, *Anemonine*, which has powers similar to, but less energetic than *Aconitine*. The preparations of the plant, as well as the alkaloid, cause depression of the circulation, lower fever heat, and to some extent relieve pain, but the last mentioned property is a result rather of the impression made on the vascular system than on the sensory nervous system.

Therapeutically, *Pulsatilla* is useful in congestive headache, in sympathetic neuroses, even the convulsive, in the nervous and hysterical disturbances connected with dysmenorrhoea, in "nervous exhaustion" from overwork, etc. (Phillips). It has been found especially useful in scanty or delayed menstruation, in dysmenorrhoea, in catarrhal affections of the uterine system, in congestion of the uterus, in various reflex disorders due to this state. It will be seen from the foregoing, that *Pulsatilla* is well fitted to supplement the actions and uses of the other ingredients of this combination of remedies.

Piscidia Erythrina, or Jamaica Dogwood has only recently been introduced into medical practice. An examination of its properties will demonstrate how admirably it is fitted to contribute to the therapeutical effects of the other members of the combination. It has sedative and anodyne actions, by virtue of an impression on the sensory nervous system. It has, also, in a more direct manner, the properties of an hypnotic, so that it comes to supplement in a most satisfactory manner the other components of this preparation.

The most important study of its physiological powers was made by Ott and Nagle, who found it to have decided narcotic effects in the case of animals. It does not act directly on the motor nerves, nor does it inhibit the end organs of the sensory nerves. It is a moderator of reflex actions, and reduces the pulse rate, but raises arterial tension by stimulating the vaso-motor center in the medulla. The ultimate result of these actions is decline in the tension of the arteries and slowing and weakening of the heart. Its anodyne and hypnotic properties have been utilized in allaying neuralgia of the head and face, in relieving insomnia, and in stopping pain in any part of the body. It has proven useful in dysmenorrhoea, in ovarian and uterine neuralgia, in sciatica, and in muscular rheumatism. It is especially indicated in the insomnia and the reflex neuroses arising in course of ovarian and uterine disorders, and may be expected to prove of signal service in the melancholia of the puerperal state.

Each fluidounce of this Elixir contains forty grains *Viburnum Opulus* (Cramp Bark), thirty grains *Hydrastis Canadensis* (Golden Seal), twenty grains *Piscidia Erythrina* (Jamaica Dogwood), ten grains *Anemone Pulsatilla* (*Pulsatilla*).

DIRECTIONS:—The Elixir being free from irritant qualities may be given before or after meals. It has, indeed, the properties of a stomachic tonic, and will promote, rather than impair, appetite and digestion. The dose for ordinary purposes is a dessertspoonful three times a day. When the symptoms are acute, or pain is present, it may be taken every three or four hours. In cases of dysmenorrhoea, neuralgic or congestive, the administration should begin a few days before the onset of the expected period. In irritable states of the uterus, in threatened abortion, in menorrhagia, etc., it should be given frequently conjoined with rest and other suitable measures. For the various reflex nervous affections, due to uterine irritation, in which it is indicated, it should be persistently administered three times a day. When the pains are severe or symptoms acute the above dose, a dessertspoonful, may be increased to a tablespoonful at the discretion of the patient or advice of the attending physician.
