CHANGES IN CURRICULUM REQUIREMENTS IN THE COLLEGE OF AGRICULTURE

1. In regard to the requirements for a joint major, the following is approved:

The major consists of a minimum of 15 elective credits in a department. Not more than five credits in certain courses outside the given department may be substituted for an equivalent number of credits within the major department if reported in advance to the faculty.

In case a student is interested in a line of endeavor involving more than one department, he may select as a major study a minimum of 25 elective credits of suitable related work in two or more departments. In the latter case the program must have the approval of the Executive Committee not later than the middle of the junior year.

In either of the above cases, not more than 25 elective credits in any one department may count toward graduation.

2. The statement to appear in the circular regarding the mathematics requirement should read as follows:

"Mathematics 71, 1, or 51", -with a footnote to the effect that students who are certain they wish to continue mathematics beyond the required course should elect Mathematics 1; students who are to major in Agricultural Engineering should normally choose Mathematics 51; a student who carries Mathematics 71 with success will be permitted to take Mathematics 2 if he desires to continue his training in mathematics.

3. In regard to electives to be taken outside the College, the statement in the circular should read as follows:

"Twenty elective credits shall be taken outside the College, preferably in the junior and senior years."

Note. The effect of the above change will be to require the student to elect 20 credits which must be taken in some other College or Colleges of the University than the College of Agriculture. It seemed impossible to place any restrictions regarding these electives without handicapping one or more departments in what appeared to be a rather serious way.
