The libraries provide public access to a wide range of material, including online exhibits, digitized collections, archival finding aids, our catalog, online articles, and a growing range of materials in many media.

When possible, we provide rights information in catalog records, finding aids, and other metadata that accompanies collections or items. However, it is always the user's obligation to evaluate copyright and rights issues in light of their own use.

NEUTRALIZATION AND ELIMINATION

The neutralization of acids and the dilution and elimination of toxins is recognized as important not only to the recovery but to the comfort of the patient.

The palatability of properly cooled Kalak is so appealing to the patient that the problem of proper alkali and fluid administration to combat an acid intoxication is solved for the physician.
